Defence Minister Harjit Sajjan threw a reality check on the notion he is considering giving direct power to First Nations to call in the military when they feel their rights or communities are being threatened. Sajjan met with indigenous leadership in Winnipeg Wednesday as part of his national defence policy review. At that meeting Ron Swain, vice-chief of the Congress of Aboriginal Peoples, which represents all off-reserve status and non-status First Nations, Métis and Southern Inuit, raised the issue of needing the military to come to the aid of indigenous peoples trying to defend their rights or territories. That could, for example, include protests against pipelines or other development, taking place without First Nations' consent. After the meeting Wednesday, Sajjan's office was non-committal but indicated the request was one of a whole host of things Sajjan would consider as part of the policy review. But Sajjan told the Free Press in an interview Thursday he didn't think the system needs to be changed. "We do have a good system in place and they just need to be reassured the system that is there will serve them as a priority," Sajjan said. The Canadian military is deployed at home almost entirely to help during natural disasters such as the Winnipeg flood in 1997, to help fight wildfires such as last spring's disastrous blaze that razed parts of Fort McMurray, Alta., or the much maligned call for help from Toronto during an extended snow storm in 1998. He said most of the assets and infrastructure to help is kept at the municipal or provincial level. "The military is there as a last resort," he said. Sajjan said the military is there to help First Nations affected as well but he said the process in place is for the province to seek help from Public Safety Canada, which has the lead on emergency preparedness. If the **public safety minister** feels additional resources are needed, he then turns to the defence minister to send in some troops. Winnipeg Free Press

Chris Selley: Shining a light on aboriginal suicides
An opinion piece states “The demand for national strategies to combat every problem under the sun is a signature feature of the Canadian political landscape, and it can be wearisome. Not by accident, Canada is a relatively loose and diverse federation containing multitudes of lifestyles and their associated challenges. Rare is the problem for which there is a single, federally designed solution. Recent demands for a national strategy on suicide prevention, however, have a certain logic — not because we’re “the only developed country without (one),” as the Toronto Star inimitably put it over the weekend, but because the most appalling subset of Canada’s suicide problem exists directly under federal jurisdiction: among the worst-off First Nations… If that holds true today, the rate of suicide on First Nations might well exceed that of any nation state on the planet. Among the Inuit in particular, it certainly does. According to Inuit Tapiriit Kanatami’s (ITK) suicide prevention strategy, in 2009-13 the suicide rate in Nunavut was 117 per 100,000. That’s almost twice the rate in Russia, which leads the world. In 2011, 13.5 per cent of all deaths in Nunavut were suicides. It’s horrifying… On Tuesday, reporters in Ottawa demanded to know what **Public Safety Minister Ralph Goodale** was going to do about the rifle used in the Dawson College

shooting still being legal to buy in Canada, along with a non-restricted longer-barrelled version. Why? Because it was the 10th anniversary of the mass shooting at the school in Montreal, in which some jackass from Lachine killed 18-year-old Anastasia De Sousa. In Canada, banning a specific gun because someone used it to do something awful passes for logical. And everywhere, mass shootings get far too much attention relative to other causes of death — not least suicide." Postmedia Network (National Post)

TOP STORIES / MANCHETTES

Ex-hockey coach and convicted sex offender Graham James granted full parole
A decision to grant convicted sex offender Graham James full parole sparked outrage Thursday from some of the players he abused when he was a junior hockey coach. James, 64, is serving a federal sentence for sexually assaulting players he coached in the late 1980s and early '90s with the Swift Current Broncos of the Western Hockey League. The Parole Board of Canada's decision followed a hearing in Quebec, where James has lived for several years. The move to grant James full parole was swiftly denounced by some of his victims. Canadian Press (CTV News)

Kevin Garratt back home in Canada following release by China
Kevin Garratt, the Canadian who was detained in China in 2014 and indicted on charges of spying and stealing state secrets, is back home in Canada following his release. According to an emailed statement from the Garratt family, a Chinese court ruled on his case on Tuesday and he was deported from the country and "has returned to Canada to be with his family and friends."... In January of this year, a Chinese foreign ministry spokeswoman said authorities there had found evidence that "implicates Garratt in accepting assignments from Canadian espionage agencies to gather intelligence in China." Their family denied accusations the couple had been involved in espionage. The Garratts' initial detention followed closely on accusations by the Canadian government that China had spied on Canadian federal agencies, including the National Research Council. During his China trip and a few days after his meeting with Li, Trudeau was asked how Canada could justify continuing discussions on trade and closer relations while Garratt was being held on charges Canada had said weren't based on evidence. He said Canadian officials had been working "diligently" on Garratt's case and on "other challenging issues." CBC News; Canadian Press (National Post)

Strike averted for Nishnawbe Aski Police Service in northern Ontario
Officers with the Nishnawbe Aski Police Service have reached a tentative agreement with their employer. The union representing officers, the Public Service Alliance of Canada (PSAC), said the deal was reached after two days of meetings with a conciliator. Those meetings were scheduled for Wednesday and Thursday of this week. Without a deal, the union would have been in a legal strike or lock-out position as of Friday morning. "I am very proud of our bargaining team for all their work and to the officers who stood strong and lobbied their provincial and federal political representatives to fund First Nations policing effectively," said Sharon DeSouza, the union's Regional Executive Vice President for Ontario. Nishawbe Aski Police serve 35 First Nations in the most northern parts of Ontario. It's funded through the First Nations Policing Program. An auditor general's report in 2014 found the program is not adequately funded and not working as intended. CBC News

Travis Vader convicted of 2nd-degree murder in McCann deaths
Travis Vader saw two Alberta seniors as "targets of opportunity" the day he murdered them and stole their money, their SUV and their motorhome, a judge ruled Thursday as he convicted the drug dealer and meth addict on two counts of second-degree murder. With a television camera recording the event, Court of Queen's Bench Justice Denny Thomas read a summary of his 131-page ruling, in which he accepted much of the evidence presented by the Crown... At the centre of everything, the outspoken accused man has badmouthed the RCMP, proclaimed himself the victim of a witch hunt, and insisted that he is innocent... Crown prosecutors have argued the McCanns never made it to B.C. According to the prosecution, they were killed near Highway 16, somewhere around Peers, Alta., while Vader was trying to steal from them. Their motorhome was found in flames at the Minnow Lake campground near Edson, Alta., two days after the couple left on their road trip. Their SUV was found several days after that. The McCanns' bodies have never been found. RCMP quickly zeroed in on Vader as a suspect. At the time, he

was a drug addict with no fixed address and a lengthy criminal record for petty crimes. CBC News; Toronto Star; Canadian Press (National Post)

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Transport des matières dangereuses à Québec: 161000$ pour des données périmées
«Quand on pense qu'en matière de transport on a pas de données à jour depuis neuf ou dix ans, c'est compliqué», a-t-il lancé. «Mais il n'existe aucune autre donnée. Ils ont fait des évaluations sur des données officielles qui sont vieilles. On s'est posé beaucoup de questions sur la valeur du travail de ceux qui ont fait le rapport, mais à cause de l'absence de données. Honnêtement, c'est anormal», a tranché le maire de Québec. Les données les plus fraîches du rapport qui a couté 161 000$ datent de 2012. Une situation plutôt ironique étant donné que le document de 130 pages a été commandé dans la foulée de la tragédie de Lac-Mégantic qui a fait 47 mors à l'été 2013. «On avait promis de faire l'étude, c'est fait. Mais on n'a pas de garanti», a dit M. Labeaume estimant quand même le travail «utile» et «valable». Le maire de Québec a écrit au ministre québécois des transports, Jacques Daoust et à celui du fédéral, Marc Garneau. Ce dernier lui a déjà accusé réception dans une missive que Régis Labeaume dit avoir trouvé plutôt «insatisfaisante». La Presse

Exercice d'intervention d'urgence à l'aéroport international d'Edmonton
Un exercice d'intervention d'urgence à grande échelle s'est déroulé à l'aéroport international d'Edmonton, avec faux blessés et avion en proie aux flammes. La formation a été mise en place pour permettre aux employés de l'aéroport et au personnel d'intervention d'urgence régionale de preatiquer les procédures en simulant une situation d'urgence. L'exercice a été simulé à l'aide d'une unité mobile ressemblant à un avion utilisée expressément pour des situations de formation. Des flammes et des nuages de fumée s'en sont d'ailleurs dégagés. Des acteurs jouant les victimes d'une explosion se sont prêtés au jeu. Des policiers, des pompiers et des ambulances étaient également présents pour simuler les interventions possibles en cas d'urgence. Radio-Canada

Province doing all it can to help drought-stricken Nova Scotians, says minister
The Nova Scotia government says it was doing everything it can to help the hundreds of families whose wells have run dry this summer. On Thursday, the minister responsible for emergency management office, praised municipal staff and volunteers who have been keeping fire halls and municipal facilities open so those who need water can get it." Ground Search and Rescue, volunteer fire departments have put countless hours in ensuring that people who need water are getting it," Zach Churchill said. "All that can be done is being done." Aéroports sans douaniers : le point dans l'Est du Québec
Des documents obtenus par Radio-Canada en vertu de la Loi sur l'accès à l'information nous apprennent que les passagers de vols privés qui atterrissent dans les petits aéroports du Canada ne rencontrent pas de douanier. C'est le cas dans l'Est du Québec, où aucun aéroport n'est desservi par l'Agence des services frontaliers du Canada (ASFC). Ce fait explique pourquoi il n'y a pas de vols commerciaux directement en provenance des États-Unis ou d'outre-mer dans l'Est du Québec. Quand un avion commercial revient d'un pays étranger, les passagers doivent passer à la douane dans un plus grand aéroport, comme celui de Montréal, Québec ou Ottawa. Pour ce qui est des vols d'aéronefs privés, comme des jets privés ou des avions nolisés par des entreprises, il est aussi possible de dédouaner les passagers et les membres d'équipage par téléphone ou par télécopieur jusqu'à deux heures avant l'atterrissage. S'il y a un doute sur un passager ou une marchandise, un examen physique peut être demandé. En 2012-2013, cet examen n'a toutefois eu lieu que dans 40 % des cas à travers le pays. Radio-Canada a tenté d'avoir ces données pour l'Est du Québec de la part de l'ASFC, mais nous sommes toujours dans l'attente d'une réponse. Radio-Canada

Transport Canada keeping close eye on bridge following emergency orders
Transport Canada is so far satisfied officials from the Ambassador Bridge company have done enough to act on "safety deficiencies" that have indefinitely closed down a curb lane on the 87-year-old crossing, a spokesman said on Thursday. "The Canadian Transit Company (CTC) is complying with the department's emergency direction, which required CTC to install temporary concrete or steel barriers between traffic on the bridge and the outside curbs as a safety precaution," said Daniel Savoie of Transport Canada. The orders did not include "a timetable for the repairs to be made," he said. "However, the minister of transport, in his statement on this issue, did ask CTC to do everything it can to speed up repair work," Savoie said. Transport Canada and federal Transport Minister Marc Garneau announced Sept. 2 that a section of the bridge will be blocked with concrete barriers near the entrance to Windsor where there is a crumbling sidewalk and rusted-out railings. The orders were issued in the "interest of public safety" after Transport Canada's latest bridge inspection which took place in August and found "issues" with the bridge's outside curbs and railings. Dawson: la cybersurveillance comme solution?
Le tireur qui a fait un mort et 16 blessés au Collège Dawson le 13 septembre 2006 avait tenu des propos inquiétants sur le site internet VampireFreaks et sur son blogue, en plus d'y afficher des photographies le montrant avec tout son attirail de guerre avant de se rendre lourdement armé au cégep montréalais. Avec les avancées technologiques effectuées depuis 10 ans, une cybersurveillance efficace pourrait-elle empêcher une autre tragédie de se produire ? La question se pose, car Kimveer Gill n'était pas étudiant au Collège Dawson. Son comportement n'aurait pu y être décelé. Mais il avait laissé des traces de son état troublé et de ses pensées violentes sur internet. Selon des experts en cybersurveillance, tenter d'arrêter une personne qui annonce son intention de tuer sur le web, en surveillant les sites internet, est un « défi herculéen » et équivaut « à tendre des filets pour attraper des comètes ». La tâche n'est pas impossible, souligne le professeur Stéphane Leman-Langlois, mais les ressources policières requises seraient alors considérables. La Presse (Le Droit)

La Gendarmerie royale du Canada recherche 4 enfants disparus à Drumheller
La Gendarmerie royale du Canada (GRC) recherche quatre enfants issus de la même famille qui se seraient échappés du domicile familial à Drumheller. Maxim Gruner 15 ans et ses frères et soeurs Olivia 13 ans, Charlie 10 ans et Sofia 8 ans sont portés disparus depuis le 31 août dernier, date de leur fuite. La GRC a expliqué dans un communiqué de presse que les enfants seraient actuellement cachés. Ils seraient aussi toujours ensemble. Radio-Canada

Review flags concerns about money laundering by organized crime in Canada's real estate sector
An in-depth review of Canada's anti-money laundering efforts has uncovered serious concerns that organized crime is using the country's hot real estate sector to illegally funnel cash. The report from the Paris-based Financial Action Task Force makes special note of real estate as an area of the economy with a high risk of illicit activity, one of a few weak spots in what the report calls a comprehensive federal regime to combat money laundering and terrorist financing. The charitable and life insurance industries are also identified in the report as sectors at risk of providing financial help to terrorists and criminals. Of particular concern are real estate schemes in which a foreign or domestic criminal provides cash to a local buyer, or more sophisticated schemes where loans and mortgages are combined with lawyers' trust accounts to move money around quietly. Canadian Press (National Post); Presse canadienne (Le Devoir)

Elsipogtog RCMP seek missing 13-year-old girl - Tia Augustine hasn't been seen since leaving her home around 5 p.m. Wednesday
RCMP in Elsipogtog First Nation are asking for the public's help to find a missing 13-year-old girl. Tia Augustine left her home around 5 p.m. Wednesday and hasn't been seen since. Augustine is Aboriginal and is about five feet, four inches tall with a medium build. RCMP said she has a medium complexion, brown eyes and dark shoulder-length hair with highlights at the ends. Anyone with information about her whereabouts is asked to contact the Elispogtog RCMP. CBC News

Federal prisons begin stocking fentanyl antidote naloxone after B.C. officers fall ill from suspected opioid exposure
Federal prison officers now have access to the life-saving opioid blocker naloxone, following a complaint that several front-line officers in B.C. were exposed to fentanyl. Jason Godin, president of the Union of Canadian Correctional Officers, says members logged a complaint with the Correctional Service of Canada a few weeks ago after some guards at Mountain Institution in Agassiz fell ill. He said paramedics had to administer naloxone to some of the affected officers, indicating that they had been exposed to fentanyl, an opioid that has led to a surge in overdose deaths in B.C. this year. "Fentanyl is a very dangerous for front-line correctional officers," Godin said, adding he did not have specific numbers on how many overdoses there have been in B.C. prisons. "I know we have issues with fentanyl in the prisons. There certainly has been a huge problem in B.C." Godin said over the past week the union has held several meetings with CSC, which agreed that the spray version of naloxone should be on site so officers have quick access in case of exposure. "We put our concerns on the table to make sure our members are protected," he said. Godin said the two parties agreed to have naloxone on site in a secured area instead of providing it to individual officers. Postmedia Network (Vancouver Sun)

Ex-hockey coach and convicted sex offender Graham James granted full parole
A decision to grant convicted sex offender Graham James full parole sparked outrage Thursday from some of the players he abused when he was a junior hockey coach. James, 64, is serving a federal sentence for sexually assaulting players he coached in the late 1980s and early '90s with the Swift Current Broncos of the Western Hockey League. The Parole Board of Canada's decision followed a hearing in Quebec, where James has lived for several years. The move to grant James full parole was swiftly denounced by some of his victims. Sheldon Kennedy convinced sex offender Graham James will reoffend
Former NHL star Theo Fleury called Canada the "Disneyland for pedophiles" following the decision to grant full parole to convicted sex offender and former hockey coach Graham James. The National Parole Board handed down its decision Thursday after a hearing at a federal penitentiary in Laval. Fleury was one of the players James abused while coaching the Swift Current Broncos of the Western Hockey League in the late 1980s and 1990s. Fleury and his cousin, Todd Holt, and former NHLer Sheldon Kennedy are among six former players James has been convicted of sexually assaulting. On his twitter account, Fleury issued a scathing press release which said Graham's former victims are being "re-victimized." "As the news came in today that a repeat offender was granted full parole, we are again asking questions as to how this is possible? I say again, "Canada is the Disneyland for pedophiles," Fleury's statement said. Montreal Gazette; CBC News

No parole for sex offender
Convicted sexual offender Carl Leone will be living at the minimum-security unit of Joyceville Institution for the foreseeable future after the Parole Board of Canada denied his request for day parole Thursday morning. Between 1997 and 2004, the Windsor, Ont., native had sex with multiple women without telling any of them he was HIV-positive. Five known victims contracted the virus from him. Before they met Leone, three of the women he infected were virgins. Two of his victims have attempted suicide. Leone, 40, wearing a light blue golf shirt, jeans and beige running shoes, stared silently at the two parole board members after they rendered their decision in a conference room at the institution just north of Kingston. Leone was sentenced to 18 years in prison after his 2008 conviction on 15 counts of aggravated sexual

assault. He was previously denied day parole on last November. He challenged the decision in a letter sent to the parole board in February, setting up Thursday's hearing. Whig-Standard

Eight overdoses in 20 minutes: The night fentanyl-tainted cocaine almost devastated a B.C. town
… Cody was the first of eight overdoses in a frenzied 20 minutes that night across three separate locations in the municipality of Delta. A ninth victim would be discovered about two hours later at a fourth address. They had taken cocaine tainted with fentanyl purchased earlier that evening, likely from the same dealer, police said. "At some point I wondered how many people would live and how many people would die," said Delta Police Staff Sgt. Ryan Hall, the watch commander that night. "How am I going to conduct up to nine next-of-kin notifications?" Postmedia Network (National Post)

Child porn, exploitation numbers jump drastically in Hamilton and across Ontario
In the last decade in Hamilton and across Ontario, child pornography and child exploitation incidents have grown a staggering amount, data obtained by CBC News shows. From police officers to victim services and support workers, the rallying cry is the same: The exploitation of children is a problem that is affecting more victims and demanding increasing attention from police and social agencies every year. "The amount of files coming to our attention is on a massive increase," Ontario Provincial Police Det. Staff Sgt. Frank Goldschmidt told CBC News. It's a loathsome problem that experts say is caused by many things. Chief among them is the continued rise of the internet and social media, which is connecting predators to victims - and to each other - in ways never before possible. While that explosion of technology has also given police a larger arsenal of tools to fight the problem, it's still nearly impossible to keep up with an increasingly interconnected underground culture. Back in 2005, Hamilton police didn't lay any charges for child pornography or child sexual exploitation. But in the last decade, those numbers rose drastically. Statistics Canada data shows local police reported 42 child pornography incidents in 2015. CBC News

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Légalisation de la marijuana : menace ou manne pour l'immobilier?
Les acheteurs de maisons et de condos devront redoubler de vigilance une fois que la marijuana sera légalisée, prévient une entreprise albertaine de remédiation. L'entreprise Western Site Technologies nettoie les résidences qui ont abrité des cultures illégales de cannabis. Selon un de ses employés, Adam Jackson, faire pousser de la marijuana dans une maison crée d'énormes problèmes même s'il s'agit que de quelques plants. La marijuana a besoin de beaucoup de chaleur et d'humidité, ce qui peut générer de la moisissure sans un bon système de ventilation. Ce n'est toutefois pas l'unique problème que pose la culture de la marijuana dans un domicile. « Des produits chimiques et des fertilisants sont évacués dans la plomberie ou suintent dans les tapis et les murs. Les insectes sont un autre problème et les gens devront utiliser des pesticides, » indique M. Jackson. Radio-Canada; CBC News

Federal goverment argues pay problems 'an honest administrative error,' as tribunal wraps – Public Service Alliance of Canada filed a complaint in June over payroll mess
The Phoenix pay problems affecting 80,000 workers is an "honest administrative error," the federal government argued as a labour tribunal came to a close on Thursday. The four-day hearing in front of the Public Service Labour Relations Board wrapped up with closing arguments from both sides. During the tribunal, union representatives and senior officials testified, including the associate assistant deputy minister responsible for the roll out of government's new Phoenix pay system. Rosanna Di Paola testified yesterday that the root cause of the problems are insufficient training, not the technology itself. The Public Service Alliance of Canada filed a complaint in June arguing the Treasury Board of Canada broke the law by not paying public servants accurately or on time after the roll out of Phoenix. Snowden's leaks caused 'tremendous' damage to U.S. security: House panel
A U.S. House committee issued a scathing report on Thursday accusing National Security Agency contractor Edward Snowden of lying about his background, feuding with co-workers and leaking secrets that "caused tremendous damage" to U.S. security. The House of Representatives Intelligence Committee report declared that Snowden was "not a whistleblower" as he has claimed in interviews and that most of the material he stole from NSA outposts was about intelligence and defense programs of great interest to U.S. foreign adversaries. The committee only released a four-page summary of what it said was a 36-page investigative report by committee staff that remains highly classified. But the summary contained strong words about Snowden's actions and background. Reuters

Michele Torre, ex-convict, spared deportation at last minute
A convicted felon who once had ties to the Mafia was not deported on Friday, even though a Federal Court judge had ordered Michele Torre out of the country earlier in the day. Torre's family said the last-minute temporary reprieve come following an order from a federal minister's office. His daughter Nellie said her member of parliament, Angelo Iacono, called her right after the deportation order was cancelled. "He advised me that he got a call from the [public security] minister's office saying that they are granting a

stay of a few weeks and they will be reviewing the file," she told CBC News. **No one from Public Security Minister Ralph Goodale's officer would comment, citing privacy reasons.** CBC News; Montreal Gazette; Canadian Press (Winnipeg Free Press)

Search boats scour Rivière des Prairies for missing persons
Three search boats are scouring Rivière des Prairies for an unknown number of missing people, possibly kayakers. So far, two have been found safe. Montreal Fire department spokesperson Mélanie Drouin said officials are "looking for people," but did not have more information. Officers from the Montreal and Laval police forces are aiding in the search. Global News

'Praying for tropical storms': Hope for respite in N.S.
An Environment Canada climatologist says it will take the tail end of a tropical storm to end the weeks-long dry spell in Nova Scotia, where some communities experienced their driest summer in more than a century. Bottled water is being delivered to residents of several towns in southwestern Nova Scotia, where close to 1,000 homes are without running water. "It really is a real head-shaker," Environment Canada senior climatologist David Phillips told CTV News Channel on Friday. "When you think about this summer, Calgary had one of its wettest summers on record and parts of Nova Scotia have had their driest in 150 years. We've got records in Dartmouth going back to 1870." CTV News

Water OK: Oil-spill cities can open intakes on North Saskatchewan River
Communities affected by an oil spill into the North Saskatchewan River are being told it's OK to start using the water again. Saskatchewan's Water Security Agency says the cities of North Battleford, Prince Albert and Melfort can resume taking water from the river. The cities had to shut off their intakes and find alternate water sources after the oil plume from a Husky Energy (TSE:HSE) pipeline spill moved downstream. Up to 250,000 litres of oil mixed with a lighter hydrocarbon leaked into the river near Maidstone, Sask., in July. The water agency says about 88 per cent of the oil has been recovered and there is no significant health risk once the water is treated. The City of Prince Albert, which had built a pipe to pump water from another source, said Friday that it will spend the next several days preparing its water treatment plant to return to full operations from the North Saskatchewan on Monday. Canadian Press (CTV News)

Summer storms push Saskatchewan insurance price tag over $30 million
According to new figures released by the Insurance Bureau of Canada (IBC), more than $30 million in insurance claims were issued after several storms passed through the province in June and July. The figures, provided by the IBC, lists the July 10 storm that caused severe flooding in Estevan as the costliest storm in the province this year, incurring more than $24 million in damages. The storm dumped 130 millimetres of rain on Estevan in a very short amount of time, resulting in flooded basements throughout the community. The storm system did a total of $48 million in damages through the Prairies. A storm that passed through Saskatchewan from June 24-25 caused $1.4 million in damage from heavy rain and hail, primarily in the Saskatoon area. On July 16, another storm did $1.5 million in damage, dropping baseball-sized hail in Stewart Valley, and 60 mm of rain in Swift Current in just one hour. One week later, a storm did $5.8 million in damage in the Stewart Valley and Outlook area. The storm did an overall $66 million in damage across Alberta, Saskatchewan and Manitoba. There were also reports of a tornado touching down in the Davidson area during the storm, lasting for four minutes and destroying a few farm buildings. "In recent years we have seen a number of instances of severe weather that go through a region and have heavy rains and winds. It can cause considerable damage," said Steve Kee, director of media and digital communications for IBC. Leader-Post

Trouver refuge au Canada après avoir caché Snowden?
L'avocat montréalais Robert Tibbo espère que les réfugiés qui ont caché Edward Snowden à Hong Kong pour l'aider à échapper aux autorités américaines pourront refaire leur vie dans un nouveau pays. Et il pense que le Canada pourrait très bien jouer ce rôle. « J'espère que ces gens extraordinaires vont pouvoir quitter Hong Kong et être réinstallés dans un pays qui estime et soutient les droits de la personne », a-t-il déclaré hier lors d'un long entretien accordé à sa résidence de Westmount. « Absolument ! », a-t-il répondu lorsque La Presse lui a demandé si le Canada pouvait constituer une destination intéressante pour les réfugiés en question. Quelques médias, incluant le New York Times et le National Post, ont révélé hier, avec l'assentiment de Me Tibbo, que certains demandeurs d'asile qu'il représente à Hong Kong avaient accepté d'héberger le célèbre lanceur d'alerte en juin 2013. Edward Snowden, qui était arrivé dans l'ex-colonie britannique en mai avec des documents confidentiels en poche pour rencontrer un groupe de journalistes, venait alors de s'identifier dans une vidéo du quotidien The Guardian comme l'auteur de fuites traitant des pratiques de surveillance de la National Security Agency. Et l'aveu venait de déclencher une traque à laquelle il n'était pas bien préparé. La Presse

Feds stop man's deportation
The federal government has stepped in at the last minute to temporarily stop the deportation of a Quebec man to Italy based on a 20-year-old conviction. Michele Torre was at Montreal's Pierre Elliott Trudeau airport awaiting an early evening flight when word of a ministerial reprieve came down late today. His daughter, Nellie Torre, says she received word from her local MP that a ministerial reprieve had been granted for three weeks to review the case. RCMP officer allegedly caught in Surrey Creep Catchers sting facing charges
A video shot by a controversial group allegedly showing an RCMP officer meeting an underage girl is making the rounds online and being investigated by Surrey Mounties. The Surrey Creep Catchers, who shot and streamed the encounter live on Facebook Wednesday night, claim the man in the video is an RCMP officer. Creep Catchers is a network of people who bait people arranging to meet juveniles and confront them in person, all with the cameras rolling. The RCMP have confirmed they are investigating the filmmakers and the alleged suspect. The man in the video has not been identified. Surrey RCMP said in a statement to CKNW they are "mindful of allegations that the matter involves a police officer. While a number of people have been identified, this remains a fluid investigation and no one is in custody and currently no charges have been laid." Global News; AM 730; Vancouver Sun

New RCMP commander imitates inimitable predecessor

The Upper Columbia Valley has a new commander for its RCMP detachment. Last week, Sergeant Bob Vatamaniuk stepped into the role vacated by former Columbia Valley Staff Sergeant Marko Shehovac in March, and although Mr. Shehovac (or Marko, as he was affectionately called up and down the valley) was an inimitable presence here, Mr. Vatamaniuk is doing is utmost to fill the large shoes left by his predecessor. Sgt. Vatamaniuk made clear last week, during a visit to The Pioneer, just how seriously (and how literally) he takes this quest — donning a faux bushy silver moustache and caterpillar eyebrows to demonstrate that he can not only look like Marko, but that he also has a similar sense of humour to the former commander. Columbia Valley Pioneer

Travis Vader verdict: lawyer files appeal notice less than 24 hours after convictions
The lawyer for Travis Vader, found guilty of second-degree murder in the deaths of an Alberta couple Thursday, says he has filed notice he will appeal his client's conviction. Brian Beresh says the appeal focuses on what he calls a major error in the ruling and is seeking to have Vader acquitted or a new trial ordered. The appeal also asks that if granted, a new trial be by judge and jury. Beresh says Justice Denny Thomas relied on a section of the Criminal Code that has been declared unconstitutional and made other errors involving the interpretation of evidence. Canadian Press (Global News)

Cops and cameras: What are your rights? - 'Caribou Legs' was stopped from filming a police officer outside Montreal
Two incidents in the past week involving cops, cameras and Northerners have raised the question: when are people allowed to film police at work? Inuvik's Brad Firth, known as Caribou Legs, was around 10 kilometres outside of Montreal when a police officer stopped him on the side of the highway. A video, posted on Facebook by the marathoner — who's running across the country to raise awareness around the issue of missing and murdered Indigenous women — shows a Sûreté du Québec officer approaching him on the side of the highway, asking a series of questions. After a brief interaction, the officer reaches towards the camera and blocks the lens. The video cuts out… A similar incident allegedly occurred last Friday in Fort Simpson during the public arrest of Darrell Sibbeston. "When I was at the scene... The RCMP officer was pointing his finger at me and telling me now is not the time, and he was asking me to leave," says the town's mayor Darlene Sibbeston, who's the sister of the man arrested. "I was calling out to the crowd: 'Is there somebody with a camera or phone?' And one of the community members came up with their cell phone and started taking pictures, and [the RCMP officer is]… blocking her and telling her she was not to take any pictures and leave. "She didn't put the camera away, she continued to take pictures close up and away, and I don't believe that she said anything, she refused to leave the situation," adds Sibbeston. An RCMP spokesperson declined to comment on the Fort Simpson incident, saying it was currently under internal review. CBC News

St. Albert RCMP issue warning after three fentanyl overdoses in the last week
A warning to parents, children and residents about fentanyl after three overdoses in St. Albert in the last week alone. According to the RCMP, in each case the individual was non-responsive and given naloxone, which immediately reverses the effects of the drug. All were transported to hospital and later released. "In all three cases, the individuals involved were extremely fortunate that they were located and received treatment so quickly as the outcome could have been drastically different," said Cst. M.J. Burroughs. They're reaching out to the public in hopes of, once again, informing them about the risks of this dangerous drug. 660 News

Êtes-vous préoccupés par les drones de la GRC?
La GRC utilise des drones dans des activités de surveillance sans l'encadrement voulu par le Commissariat à la protection de la vie privée. Les engins sont utilisés plusieurs fois par jour et le nombre de missions augmente. Radio-Canada a enquêté et a publié un article sur ce sujet. Des documents internes de la GRC, obtenus par Radio-Canada, montrent que la surveillance de personnes fait partie des tâches pour lesquelles ses drones peuvent être utilisés. Mais cela nécessite l'obtention d'une autorisation judiciaire. Radio-Canada

Conduct hearing postponed again for Osoyoos Mountie in fourth year of paid suspension
The lawyer for a Mountie in his fourth year of paid suspension told a disciplinary hearing Tuesday that proceeding with the matter could prove to be "an embarrassment for the RCMP". John Benkendorf,

representing Const. Amit Goyal of the Osoyoos detachment, said that after reviewing new evidence in the case, "it got to the point where I felt this hearing would be an embarrassment for the RCMP were it to proceed." The material, which Benkendorf described as "incontrovertible evidence of (Goyal's) innocence," led him to do something he had never done in five years of representing officers in misconduct allegations. Ahead of the scheduled hearing, he presented his defence case to his opposing counsel, the lawyer representing the RCMP. After the opposing lawyer reviewed Benkendorf's evidence, he agreed the four-year-old matter should not go ahead on Tuesday's scheduled hearing and instead he requested it be adjourned for a fifth time. The lawyers for both sides told Postmedia News it was a particularly unusual turn of events. Postmedia News (Osoyoos Times)

La centralisation de la lutte contre le crime organisé suscite des inquiétudes en région
Des craintes circulent dans les milieux policiers et judiciaires selon lesquelles les plus récents changements de structure dans la lutte contre le crime organisé faciliteront le retour en force des Hells Angels et autres groupes de motards dans les régions du Québec. Comme l'a démontré le reportage d'Enquête diffusé jeudi soir, les défis sont grands pour les policiers et les procureurs, maintenant que le crime organisé intègre l'économie légale - grâce à des commerces de vapotage ou de vêtements, par exemple - et qu'il recommence à mettre sur pied de nombreux clubs-écoles. Or, plusieurs sources consultées par Radio-Canada sont d'avis que l'abolition du Bureau de lutte au crime organisé (BLACO), en 2015, a dilué l'expertise de la Couronne. Elles jugent en outre que cette réorganisation, qui a fait en sorte de centraliser les activités de lutte contre le crime organisé à Montréal, a nui à des régions comme l'Outaouais, l'Estrie, la Mauricie, Québec et le Saguenay, qui disposaient jusqu'à l'an dernier d'antennes régionales du BLACO. Parole denied for multiple offender who took part in 1995 Toope murders
A man serving time for having killed a passenger in his car while driving impaired in LaSalle and for strangling his ex-girlfriend has been denied parole because his violent behaviour has continued while behind bars. Ryan Patrick McPhee, 36, has served time in the past for his role in the April 2, 1995, deaths of Jocelyn and Frank Toope, an elderly couple who were murdered in their home in Beaconsfield. McPhee, who was 14 at the time, and two other youths broke into the home because they believed the Toopes were on vacation. McPhee testified about his role in the murders in adult court, in 2012, and admitted he struck Frank Toope, a 75-year-old Anglican minister, with a baseball bat during the attack on the couple. Jocelyn Toope was 70 at the time of the murders. McPhee received three-year sentence, as a youth, after being convicted of second-degree murder. The murders are mentioned in a recent decision by the Parole Board of Canada denying McPhee any form of release on the 39-month sentence he received in 2014 for his latest crimes. Montreal Gazette

OPP seek public's help to locate federal offender known to frequent Ottawa
The Ontario Provincial Police is seeking the public's help to locate a federal offender known to frequent the Ottawa and Toronto areas. Mohamed Hersi, 29, is wanted on a Canada-wide warrant for being unlawfully at large, said the OPP's Repeat Offender Parole Enforcement unit in a release Friday. Hersi is serving a 27-month sentence for break and enter, assault with a weapon, robbery and forcible confinement. Ottawa Citizen

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

B.C. First Nation offers 20K reward in case of Immaculate Basil, missing since 2013 - Immaculate Basil, 26, last seen June 14, 2013 near Fort St. James, B.C.
A $20,000 reward is being offered for information that could help locate an Indigenous woman who disappeared from northern British Columbia three years ago. Immaculate "Mackie" Basil was 26 when she was last seen on June 14, 2013, around the Kuzche Reserve near Fort St. James, British Columbia. At the time, an extensive search by the RCMP and search rescue teams failed to find her. Large community searches were also conducted. The Tl'azt'en First Nation posted the reward after Immaculate's older brother, Peter Basil, approached the band to ask for help. "I asked our chief for $20,000, and he said he was going to put it through chief and council, and they did approve it for me," said Peter." The family is trying to open up any avenue that will get Mackie back," said Ron Wisner, the community's economic development officer, who also helped coordinate community searches when Immaculate first went missing. CBC News

'Loving' tribute to missing and murdered Indigenous women part of Edmonton art installation
An Edmonton artist has created a personal tribute to missing and murdered Indigenous women that, for a few hours Friday, people can actually walk through. The work by Dawn Marie Marchand is based on one of her paintings called "Prayers for my Sisters," and is open to everyone until around 6 p.m. Friday, at 101A Avenue and 96th Street "I've had my own personal life touched by violence. I could very easily have been one of these women," said Marchand, who is a Cree-Metis mixed-media artist and the first ever Indigenous artist in residence for the City of Edmonton. Marchand said the issue of the nearly 1,200 cases of missing and murdered women the RCMP have documented between 1980 and 2012 is one that's close to her heart and one that has affected many friends and family. She hopes when people walk through the installation they stop to remember all of the women. CBC News

Violence against aboriginal women ignored
An opinion piece states "At the centre of a circle of remembrance in London's Ivey Park last Sunday morning stood a staff decorated with colourful ribbons and two eagle feathers. The staff, said Dennis Whiteye, men's co-ordinator at AtLohsa Native Family Healing Services, is a sign of the 'life-giving force that women represent' in native culture. At its tip were two eagle feathers: one in memory of Therssa Wilson, a Londoner who went missing in November 2010 and was found dead near Chatham four months later; the other to commemorate Sonya Cywink, a London resident found murdered in August 1994. Nearby, Ken Oliver, who co-ordinates the Kizhaay Anishinaabe Niin ('I am a kind man') initiative to help aboriginal men understand the effects of violence against aboriginal women, smoked a ceremonial pipe, its stem representing the male spirit entity and its bowl symbolic of the female entity... The National Inquiry into Missing and Murdered Aboriginal Women and Girls, which formally began its work Sept. 1, aims to 'look at all underlying causes of violence against indigenous women and girls, including systemic issues, and make concrete recommendations to end the unacceptably high rates of violence, as well as the authority to examine institutional policies and practices such as policing or child welfare.' The panel's five commissioners, led by B.C. provincial court judge Marion Buller, are still trying to figure out how they'll tackle that mammoth task. But at least one thing should be clear: the inquiry must be more than a venue for the retelling of Canada's record of injustice against native people. It must be more than an inquiry that traces the many scourges that afflict First Nations people to the residential schools system. Those things have been established. And while the inquiry's hearings will serve as an opportunity for cathartic storytelling and attempts at some degree of closure by the families and loved ones of missing and murdered women, the exercise will be a failure if it does not adequately fulfil the 'concrete recommendations' aspect of its mandate and then see measures adopted by the government. Postmedia Network (London Free Press)

Public service union frustrated, disappointed with bargaining - PSAC president says the Liberals are negotiating like the former Conservative government
After a week at the bargaining table, the head of the Public Service Alliance of Canada says union negotiators are frustrated and disappointed with the Liberal government. "They told our teams they don't have a mandate," said Robyn Benson, PSAC president. "Well, if you don't have a Liberal mandate, then you still have a Conservative mandate." Benson said the government's agenda has changed very little since the Liberals were elected almost a year ago. PSAC, which represents a majority of federal government workers, has been trying to negotiate a new collective agreement for 26 months. Benson said no future bargaining dates are planned at this time, giving the union time to prepare its next steps. Benson said the PSAC remains open to negotiations, but only if government will make substantive changes to its offers. Among the top issues for the union are a negotiated sick leave program and a wage increase. So far the government has offered a wage increase of 0.5 per cent. CBC News

Federal copyright lawsuit involving Blacklock's Reporter puts content paywalls at stake
One of two radically different things will be taking place in an Ottawa court starting Monday. If you believe one side, a forum is being given to a "troll" website that hoodwinks government agencies into accessing content and then unfairly sues them for copyright infringement in order to make money. If you believe the other, an upstart media outlet is making an unprecedented defence of Canadian intellectual property rights in the digital era against federal bureaucrats who would rather steal than pay for content. What's not at issue is that the potential implications for Canadian copyright law are tremendous. Blacklock's Reporter, a four-year-old Ottawa-based subscription news site that caters to policy wonks, is suing the Government of Canada, claiming that staffers at Finance Canada used the subscriber account of a third party to access two articles from its website. Blacklock's does not disclose its number of subscribers, although says it has bulk subscriptions in all 10 provinces. An individual annual membership to its website currently costs $314. House Intelligence Committee Urges No Pardon for Edward Snowden
Lawmakers on the House Intelligence Committee unanimously signed a letter to President Obama on Thursday asking him not to pardon Edward J. Snowden, the former intelligence contractor who leaked troves of information about National Security Agency surveillance and data collection in 2013. "We urge you not to pardon Edward Snowden, who perpetrated the largest and most damaging public disclosure of classified information in our nation's history," the bipartisan letter said. "If Mr. Snowden returns from Russia, where he fled in 2013, the U.S. government must hold him accountable for his actions." New York Times

Study Confirms That Zika Virus Causes Brain Damage In Newborns
Early results from a crucial case-control study in Brazil have confirmed a direct causal link between Zika virus infection in pregnant women and the brain damaging birth defect microcephaly in their babies, scientists said on Thursday. But while preliminary findings from the first 32 cases involved in the study confirm causality, the researchers said, the true size of the effect will become clear only after full analysis of all 200 cases and 400 controls. The study, published in The Lancet Infectious Diseases journal, was requested by the Brazilian health ministry to investigate the causes of the microcephaly epidemic that the World Health Organization (WHO) declared an international public health emergency earlier this year. Reuters (Huffington Post)

Typhoon Kills at Least 11 in China and Taiwan; Another on the Way
The world's strongest storm this year killed at last 10 people in China when it hit the southeast coast, the government said on Friday, as rescuers scoured flooded streets and work crews struggled to restore power to more than a million homes. Typhoon Meranti had largely dissipated by Friday afternoon, a day after it swept in from the Pacific Ocean, clipping the southern tip of Taiwan, and making landfall near the Chinese port city of Xiamen, in Fujian province. The storm killed seven people in Fujian and three in neighboring Zhejiang province, state media and the government said. Eleven people were missing. Reuters (NBC News)

Suicide bomber kills at least 25 in Pakistan mosque
A suicide bomber has killed at least 25 people and wounded more than 28 others during Friday prayers at a Pakistan mosque in a tribal area bordering Afghanistan, local officials said. The attacker shouted "God is Great" as he entered the mosque in the village of Ambar in Pakistan's Mohmand tribal region, government administrator Naveed Akbar told The Associated Press. He said rescuers had transported the dead and wounded to nearby hospitals, where some of the wounded were listed in critical condition. Akbar said about 200 worshippers were inside the mosque at the time of attack. Al-Arabiya

Our best chance to repeal Bill C-51 is officially here

Here we go, everyone: the government has just released its official consultation on Bill C-51, privacy, and national security. This consultation represents our last, best chance to get this reckless legislation repealed, and to deliver the strong privacy rights Canadians deserve. Your OpenMedia team is working hard to ensure your voices won't be ignored. Today we're sharing a new action for you to tell the government to repeal Bill C-51 and strengthen our privacy laws to keep us safe. By taking action, we'll send a full letter on your behalf to Public Safety Canada's Consultation on National Security. Check it out right now. and let's tell **Public Safety Minister Ralph Goodal**e: "Repeal Bill C-51 and create strong, transparent, and enforceable privacy laws as outlined in Canada's Privacy Plan." rabble.ca blogs

Northwestel phone, internet services back up after Telesat satellite issue in Northern Canada
Northwestel phone and internet services have been restored in all satellite-served northern communities after problems with a Telesat satellite disrupted communications in a wide swath of northern Quebec and Nunavut on Sunday afternoon. After more than 12 hours, debit and credit services in much of Nunavut are finally back online (...)The Telesat Anik F2 satellite cut out around 5 p.m. ET Sunday. In a statement, the company said the satellite, which helps provide cellphone and internet service to communities across the North, experienced a "technical anomaly" that resulted in loss of services. The outage would also have impacted ATMs and aircraft in some communities, said John Flaherty, vice-president of marketing for Telesat, early Monday morning. CBC News

Disaster Assistance Granted To Flooded Homeowners
Windsor-Essex residents dealing with flood damage can now apply to get financial assistance from the province. Minister of Municipal Affairs Bill Mauro met with a team assessing damage in Tecumseh, Lakeshore and Windsor, and has determined that the region needs access to disaster relief programming. Half of the programming is for citizens, although Mauro's quick to point out that the funding is not a replacement for insurance (...)The other half of the disaster relief programming is for municipal infrastructure that may need repair. NATIONAL SECURITY / SÉCURITÉ NATIONALE

Quebec men among 'first wave' of Canadians to join jihadist groups
In 2012, a handful of young men from Quebec left the country for Turkey after having prepared as if they were heading to war. Four years later, police are still trying to establish what really happened during their trip. Some are suspected of having taken part in a kidnapping in Syria. Others were suspected of having fought alongside Islamists. They are the subject of a La Presse investigation into what appears to be the first wave of Canadian foreign fighters... For months, the Quebec group prepared their departure, according to sources. They trained with weapons, they frequented the same mosques - including two Montreal Islamic centres, Badr and Assahaba - and met up regularly at each other's house... Another man, who was 18 at the time of his departure, told his family that he left to do humanitarian work in Turkey. He had recently converted to Islam and practised an extremely rigorous version, refusing to shake hands with women. His speech became more and more alarming. In his luggage, he had night-vision goggles. Several months after leaving, he returned, completely disillusioned, said the imam who counselled him upon his return to Canada. What happened during his trip? He told investigators that he went to Antakya, a Turkish city well known as a passage for jihadists going to Syria. He swears that he never crossed the border. But that's not the view of police. According to court documents obtained by La Presse, the RCMP's Integrated National Security Enforcement Team believes that he and at least five other members of the group were involved in the kidnapping of two American journalists in Syria in 2013, which was orchestrated by a group linked to Al Qaeda. Toronto Star

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Irish-accented contractors in alleged paving scam arrested, ordered deported
Four people have been arrested and ordered removed from Canada after police warned the public about an alleged paving scam involving suspects with Irish accents. Four foreign nationals were arrested and $70,000 in cash was seized after investigators from the Canada Border Services Agency and Ottawa police's fraud unit teamed up to arrest the quartet on Sept. 24. The arrests came four days after Ottawa police warned the public to beware of door-to-door paving contractors with Irish accents who would quote an inexpensive price to repave a driveway or lane, only to do the work and then demand more money. The CBSA said Monday that the four foreign nationals who are suspected of being involved in the fraudulent contract work were working without a permit in Canada. According to the CBSA, an admissibility hearing took place in front of the Immigration and Refugee Board on Sept. 27 and all four were ordered removed from the country. The four were ordered to remain in custody pending their removal. All four are accused of two offences under the Immigration and Refugee Protection Act. Their names were not released. Ottawa Citizen

Over 70 Per Cent Terrorists Using Cyber Space: PMO Cyber Coordinator
Over 70 per cent of terrorists and terror groups across the globe are using various cyber medium tools to spread the evil of terrorism and further their goals, Gulshan Rai, the National Cyber Security Coordinator in the Prime Ministers Office (PMO) has said. Speaking at the India Conference on Cyber Security & Internet Governance organised by Observer Research Foundation in New Delhi, Mr Rai said 70-75 per cent of terrorists are using tools like voice over internet telecom, social media and even encryption to spread the menace of terrorism and further their goals. He said that post the controversy surrounding whistle-blower Edward Snowden, users and nations have become worried about the security of their data and are now using various encryption techniques and policies that has led to interruptions in seamless flow of data and information. NDTV; One India

Google diverts would-be jihadists away from radical websites

Hundreds of thousands of people seeking information about Islamic State on Google have been diverted to anti-extremism search results, as part of a drive to stop Muslims becoming radicalised online. The pioneering project directed people searching for particular Isis-related terms to YouTube videos that confront jihadist propaganda. The under-the-radar scheme, which has been praised by government ministers, made use of Google's AdWords service, which allows organisations to pay to have their results at the top of searches. The Times

Space Wars Will Be Fought With Hacks, Not Missiles
On Monday morning, a number of professionals in the aerospace industry received a rather mundane email containing a PDF ostensibly about the future of Russian aerospace programs, but which actually contained a 'Komplex' trojan. The Komplex trojan works by connecting the user's computer to a remote command and control server, a centralized computer that issues commands to a botnet. Although nothing malicious has happened in connection with the Komplex virus yet, this could change should the hackers responsible for the virus (believed to be the Sofacy Group, an infamous cyberespionage collective) choose to send commands through this server to be executed on the infected computers. The Sofacy Group's chosen target—the aerospace industry—is instructive, insofar as it speaks to the growing vulnerability of space systems in the information age. To address this issue, a panel of security experts convened at the International Astronautical Congress on Friday morning to discuss cyber-vulnerabilities particular to the space sector and how to protect it against hacking. Motherboard

UK National Cyber Security Centre comes online to protect nation from threats
The UK's National Cyber Security Centre (NCSC) has now opened, acting as a central command post to coordinate the nation's response to the growing threat of cyber attacks.The centre is based in London, near Victoria, and is headed by Ciaran Martin, formerly director general for cyber at GCHQ. Dr Ian Levy, currently technical director for cyber security at GCHQ, will join as technical director. They will oversee 700 staff at the facility. Speaking ahead of the launch of the centre last month Martin revealed that the government logs over 200 "national security-level cyber incidents" a month, and that it is only a matter of time before one does serious damage. The creation of a new centre to coordinate the response to cyber threats, including working with the private sector to have the right protection in place, was seen as vital for the future of the country. Report a Grim Reminder of State of Critical Infrastructure Security
U.S. critical infrastructure got another reminder this week that it needs to do more to protect itself from cyber attacks with the release of an annual government report. The NCCIC/ICS-CERT FY 2015 Annual Vulnerability Coordination Report points out that nagging issues continue to plague industrial control systems (ICS) and SCADA systems, notably a dearth of access controls limiting unauthorized access, poor software code quality, and the weakening, or absence of, crypotographic security when it comes to the protection of data and network communications. The report, released by the U.S. Industrial Control Systems Cyber Emergency Response Team (ICS-CERT), represents trend data culled by private and public industrial control firms for 2015. Topping the list of industries with the most reported vulnerabilities are energy, critical manufacturing, water and wastewater systems, and food and agriculture. Threat Post

HITRUST Begins Sharing Cyber Threats With Homeland Security
HITRUST, a consortium of stakeholders collaborating to better secure protected health information, is the first healthcare cyber threat-sharing information organization to connect with the federal government's cyber threat sharing program. The federal program, launched earlier this year, is the Automated Indicator Sharing Program of the Department of Homeland Security, designed to collect and disseminate cyber threat information. The DHS program enables electronic exchange of cyber threat indicators across private sector industries, and HITRUST is the first healthcare organization to link with the feds to receive and submit threat information, says CEO Daniel Nutkis Information Management

A top-level look at the cyber criminal underworld
Last month at CloudSec 2016, Robert McArdle - EMEA manager for forward looking threat research at Trend Micro – held a talk about the differences between the various underground marketplaces around the world. Undergrounds tend to be separated by language rather than geographical location and "the big three," as McArdle called them, are the Russian, Chinese and English speaking marketplaces. "You

need to be able to know your enemy in order to be able to defend against them," McArdle said, so understanding the differences between these secretive hangouts could be the difference between staying secure or being the next victim of a cyber attack. IT Pro Portal

Man found bleeding on steps of RCMP detachment in Burnaby
A man is in hospital this morning after being found on the front steps of the Burnaby RCMP detachment, stabbed in the lower back. Just before 2 a.m. Monday the man was reportedly at an apartment nearby when he got into an altercation and jumped off the balcony. Witnesses say he then ran to the police station on Hastings Street near GilmoreAvenue for help. It appears his injuries are not life-threatening. Global News

Ex-Mountie charged with drug dealing expected to enter plea
A former high-profile Kamloops police officer accused of trafficking cocaine while still employed by the RCMP last summer is expected to enter a plea later this week. Randi Love did not appear in person on Monday for a brief hearing in Kamloops provincial court, at which her arraignment was set for Thursday. Her lawyer, Brad Smith, appeared on her behalf. The 40-year-old is facing three counts of trafficking cocaine stemming from a trio of alleged incidents on separate dates in June 2015. At the time, Love was on injury leave from her job as an RCMP constable. Police launched an investigation into Love in the weeks that followed. She submitted her resignation papers to the national police force in October 2015. Love made headlines in 2013 when she testified at the fraud trial of her former boyfriend, then-RCMP Const. Trent Wessner, who was convicted of bilking Costco out of $400 based largely on Love's testimony. Wessner left policing following the conviction. Kamloops This Week

Large meth lab bust in Abbotsford nets police two suspects
Two men are in custody after a methamphetamine lab bust in a residential Abbotsford neighbourhood. The RCMP clandestine lab unit, Abbotsford police and Abbotsford fire and rescue swooped in on the house at 35045 Marshall Road Sunday around noon. "It was a large scale operation," said Abbotsford Police Const. Ian MacDonald, describing the size of the lab that was discovered. "A 20-year-old and a 30-year-old are in custody." MacDonald said he expects the men to be named, and charges to be laid, either today or tomorrow. He estimated it will take a little longer to complete a full inventory and analysis of the chemicals seized, some some which are considered hazardous. CBC News; CTV News

RCMP officers rescue man from Peace River
A pair of RCMP officers in Peace River are being hailed as heroes after a harrowing water rescue on the Peace River over the weekend. At approximately 9:00 on Saturday morning, members of Peace Regional RCMP were called to a report of a man in distress in the waters of the Peace, near downtown Peace River. Police arrived at the shoreline along with other EMS and called for the male to swim to shore as rescue boats were dispatched. As emergency personnel watched, the man was seen to be unable to manoeuver himself to shore and appeared to be going under. Two officers on shore jumped into action, grabbing the foam backseat of their police cruiser to use as a flotation device before jumping into the water. The officers were able to reach the man and eventually got him to shore where fire crews provided the man with first aid treatment. Energetic City

Three charged after stolen truck located
Two adults and one youth are facing charges following a Battlefords RCMP investigation into multiple complaints about a dark-coloured pickup truck. Reports indicated the occupants of the vehicle were in poseession of a firearm and stolen property. (…) A 17-year-old male youth is charged with two counts of failing to comply with an undertaking, resisting arrest and two counts of possession of property obtained by crime. Battlefords News-Optimist

RCMP warn Fort McMurray residents of CRA telephone scam

Fort McMurray residents are being warned to be aware of a phone scam where people are claiming to be from the Canada Revenue Agency (CRA). Wood Buffalo RCMP said they've received a few reports of residents in the region being targets of the "CRA scam," where the scammer tells the person they owe the CRA money and to pay in iTune gift cards or face arrest. Global News

Drayton Valley RCMP welcomes new sergeant
There is a new RCMP sergeant in town. In July, Erin Matthews replaced former Drayton Valley RCMP Sgt. Chris Delisle. Matthews, who has been working for the RCMP for 17 years, spent most of her time in Saskatchewan. "I spent the first 15 years in Saskatchewan and then I moved to Edson in 2014 and then just recently to Drayton Valley," she said. According to her, Drayton Valley is a "nice" place to live and work. "I am excited to be here. I really like it. It is clean and it's got lots to offer," she said. "With this line of work, we don't deal with everybody in the community, but I am getting involved in other aspects in the community and I am enjoying the work. The people I have dealt with so far are great." Drayton Valley Western Review

Purple to shed light on a dark topic in Chilliwack
That distinctive purple glow you'll be seeing this month is a declaration that domestic violence has no place in Chilliwack. The annual Purple Light Nights 2016 campaign kicks off Monday, Oct. 3 at the Chilliwack RCMP community policing office on Airport Road with a tree lighting ceremony at 6:30 p.m. "Domestic violence is a crime that often goes unreported," said Cpl. Mike Rail. "RCMP urges anyone who has knowledge of or suspects someone of being a victim of domestic violence, to report this crime to the police." (…) "Our goal is to increase awareness of domestic violence and the effect it has on children, families, and our community. Through the Purple Light Nights campaign we provide education to promote healthy relationships to youths and adults," said Darlene Wahlstrom, Victim Services coordinator for Chilliwack RCMP. Chilliwack Progress

Ontario review puts police oversight groups under scrutiny
Ontario's police oversight groups are themselves under scrutiny, as a provincially-appointed group travels to Sudbury to solicit input from citizens. Ontario's Special Investigations Unit, the Office of the Independent Police Review Director and the Ontario Civilian Police Commission are suffering from "inefficiencies due to overlap" said Danielle Robitaille, speaking for the Ontario Police Oversight Review, and these consultations hope to identify and recommend changes to the system. "We hear from community to community that there is a problem with these agencies in terms of overlap which creates confusion from members of the public in terms of where do they turn to," Robitaille said. "If they have a police complaint where do they go?" All three oversight agencies look into cases where there has been a complaint against police. They also investigate if police are involved in a death or serious injury involving a citizen. CBC News

Teen dies during police intervention in Cree community
A 19-year-old died Sunday night during an intervention with Chisasibi First Nations police in a Cree community in northern Quebec. Police responded to a call around 9:45 p.m. that claimed a person was outside a home with a gun. Police attempted to negotiate with the man. The Bureau des enquêtes indépendantes has called on the Sûreté du Québec to investigate. Investigators are expected to arrive mid-afternoon Monday. Chisasibi is a village on James Bay, about 1,400 kilometres north of Montreal. Montreal Gazette

Les drogues de synthèse augmentent en popularité
Le portrait du crime lié à la drogue change au pays : si le taux d'infractions visant le cannabis et la cocaïne a baissé ces dernières années, celui des drogues de synthèse, dont le dangereux «crystal meth», a augmenté, selon les plus récents chiffres de Statistique Canada. En ce qui concerne le cannabis, le taux d'infractions rapportées par la police mettant en cause cette drogue a fléchi de 15 % entre 2014 et 2015. Il s'agit d'une quatrième baisse annuelle consécutive. Le taux d'infractions rapportées liées à la cocaïne a aussi chuté de 7 % depuis 2014. En revanche, les taux d'infractions de possession, de trafic ou de production de «crystal meth» étaient en hausse de 25 %. Statistique Canada a également observé une croissance du taux lié à l'ecstasy (7 %) et aux autres drogues, telles que les médicaments d'ordonnance, le LSD et les «drogues du viol» (6 %). L'expression «drogues de synthèse» désigne des molécules chimiques concoctées en laboratoire, comme l'ecstasy et le fentanyl, par opposition aux substances qui proviennent de la nature, comme le cannabis. Le professeur Jean-Sébastien Fallu, professeur à l'École de psychoéducation de l'Université de Montréal, spécialisé en toxicomanie, a toutefois exprimé un doute sur le taux d'infractions calculé par Statistique Canada sur le «crystal meth» - une hausse de 25 %. Il est d'avis que la consommation du crystal meth est quand même limitée et croit que la statistique vise vraisemblablement plus la catégorie globale des métamphétamines, qui inclut le «crystal meth». Contactée de nouveau à ce sujet, Statistique Canada a toutefois confirmé sa donnée initiale. Presse Canadienne (Le Droit, 15, Quotidien)

Islamophobic 'feminism' doesn't help Muslim women
Time and tired time again, we have seen how the claim of standing up for Muslim women has served as a pretext for singling out Islam and Muslims for excoriation. This was the case in the recent furor over Toronto's Valley Park Middle School providing space for Muslim students to pray (in which girls and boys sat separately), and in the previous federal government's efforts to prohibit women in niqabs from becoming Canadian citizens. The castigation of Prime Minister Justin Trudeau for attending an Ottawa mosque on Eid ul-Adha is the latest in this string of manufactured controversies. Trudeau's recent visit to the mosque, where men and women pray in separate areas (but are mixed during other events), has been condemned as a betrayal of "feminism" and collusion with patriarchy. (…) According to Statistics Canada, "from 2010 to 2013, Muslim populations had the highest percentage of hate crime victims who were female (47 per cent)." Women wearing the hijab and the niqab have been physically attacked in cities across Canada and the United States. A few weeks ago, two Muslim women were assaulted while strolling their babies in Brooklyn; their assailant punched one of the women in the face, tried to rip off their headscarves, and yelled "Get the f— out of America, b——s." In June, a Muslim woman was punched, spat on and had her hijab pulled while shopping with her four-month-old son in London, Ont. Ottawa Citizen

Government must act to end racism in children's aid system: Editorial
A new report has found a children's aid system that is riddled with racism. The Ontario government must implement changes needed to keep families from being unnecessarily ripped apart. The Ontario government now has even more evidence, if it needed it, that Ontario's children's aid system is plagued by problems of race. It's high time for it to act. The evidence is detailed in a two-volume report from the Ontario Association of Children's Aid Societies that backs up what the Star reported as long as two years ago: four in 10 children in the care of the Children's Aid Society of Toronto are black in a city where only 8 per cent of children are. Worse, the problem is not just in Toronto, but throughout the province. (…)But it will take government funding to support the recommendations that are aimed at ending racism, ignorance about poverty and cultural misunderstandings. And it will take more financial support to provide parents with the services they need, whether it's to get back on their feet financially or to learn about what disciplinary measures are acceptable in Canada. REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Drogue au volant: un sénateur en faveur du dépistage chez les automobilistes
Avant de légaliser la marijuana, le gouvernement Trudeau devrait donner de meilleurs outils aux policiers pour combattre un fléau qui prend de l'ampleur au pays : la conduite avec les facultés affaiblies par la drogue. C'est du moins ce que soutient le sénateur conservateur Claude Carignan, qui entend déposer un projet de loi au Sénat demain afin de modifier le Code criminel de manière à ce que les policiers aient le pouvoir d'exiger un test de dépistage aux automobilistes dont la conduite est erratique en utilisant un appareil qui analyse un échantillon de salive. Cette méthode non invasive pour déceler la présence de drogue chez un conducteur est déjà utilisée dans certains pays, comme l'Australie, l'Allemagne, la France, la Belgique, l'Espagne, l'Italie et le Royaume-Uni, de même que dans certains États américains. Selon l'organisation MADD (Mothers Against Drunk Driving), la drogue était présente dans l'organisme du conducteur lors de 614 morts sur la route au pays, selon des données de 2012, tandis qu'on détectait de l'alcool chez le conducteur pour 476 morts de la route. « Le projet de loi du sénateur Carignan modifierait le Code criminel afin de donner aux policiers les outils dont ils ont besoin pour repérer sur la route les conducteurs aux facultés affaiblies par la drogue à l'aide d'un appareil de détection utilisant une méthode non invasive qui analyse la salive. Cet appareil décèlerait rapidement la présence de certaines drogues illicites », a indiqué une source conservatrice. La Presse

'It's not over' for U of T student released on bail in Bangladesh, brother says
A University of Toronto student detained in Bangladesh for weeks in connection with a terrorist attack has been released on bail, his family confirmed. Tahmid Hasib Khan, 22, is healthy, safe and living under the supervision of his parents in the capital city of Dhaka, said his brother Talha Khan. Tahmid Khan, a permanent resident of Canada, was arrested without charge on August 4. Bangladeshi police allege Khan was involved in a July 1 terrorist attack on the Holey Artisan Bakery in Dhaka, in which gunmen killed 20 people and took several others hostage. "He's the furthest thing away from all that," said Talha Khan of his younger brother. "He's the kind of person who has enough faith in the power structures of the world that are already there. (He's) not trying to resurrect the caliphate or something." But the ordeal "is not over," for Tahmid, Talha said. At the time of the attack, Tahmid was in Dhaka visiting his parents for the Muslim holiday of Eid al-Fitr, Talha said. Tahmid was then scheduled to fly to Nepal, where he an internship lined up with UNICEF. Khan is confirmed to have been in the restaurant at the time of the terrorist attack, but his family has maintained that he was merely a customer, a survivor of the attack, not a perpetrator. Toronto Star

U.S.-Led NATO in Spotlight as Europe Pushes Joint Army, Defenses
European nations are pressing ahead with plans for joint defenses and military cooperation, raising fears that U.S.-led NATO could be undermined. With Britain poised to quit the European Union and Donald Trump raising doubts over NATO, France and Germany have been spearheading moves to boost Europe's capacity to run its own security operations. oint development of assets such as helicopters and drones, stronger defenses against state-sponsored computer hackers and the expansion of peace-

keeping abroad were among the proposals unveiled last week at a conference of European ministers. The plans, which could be green-lighted as early as December, come after EU President Jean-Claude Juncker called for the construction of a new EU military headquarters that would eventually control a joint EU army comprised of troops from member states. A common military force would be "in complement to NATO," he insisted in a speech last month, adding: "More defense in Europe doesn't mean less transatlantic solidarity." NBC News

At least 2 killed as Hurricane Matthew starts lashing Haiti, Jamaica
Heavy rains from the outer bands of Hurricane Matthew drenched Jamaica and Haiti on Monday, flooding streets and sending many people to emergency shelters as the Category 4 storm approached the two countries. Two deaths were reported in Haiti, bringing the total for the storm to at least four. Matthew had sustained winds of 140 mph as it moved north, up from 130 mph earlier in the day. The center was expected to pass just east of Jamaica and near or over the southwestern tip of Haiti early Tuesday before heading to eastern Cuba, the U.S. National Hurricane Center in Miami said. "We are looking at a dangerous hurricane that is heading into the vicinity of western Haiti and eastern Cuba," said Richard Pasch, a senior hurricane specialist with the center. "People who are impacted by things like flooding and mudslides hopefully would get out and relocate because that's where we have seen loss of life in the past." Many were taking that advice. In Jamaica, more than 700 people packed shelters in the eastern parish of St. Thomas and the Salvation Army said there were about 200 people at its shelters in Kingston as it put out a call for mattresses and cots. Many streets flooded throughout the country's southeast. Associated Press (Fox News)

Morocco says arrests 10 suspected female ISIS militants
Morocco has dismantled a suspected ISIS militant cell and arrested 10 women believed to be planning attacks in the North African kingdom, the Interior Ministry said on Monday. It was the latest in a series of militant cells Morocco says it has broken up, but it is the first time authorities have arrested a group of female suspects. An Interior Ministry statement said the cell was operating in several regions including the cities of Kenitra and Tangier. It said the cell members reflected an ISIS effort to integrate female militants for attacks in the kingdom and they were inspired by the brother of one of them who was involved in bombings in Iraq earlier this year. Al Arabiya

Inside the mind of an honour killer in Pakistan: 'It was all I could think about. I had to kill her'
For two months, over the thunder of machines at the steel mill, the men taunted Mubeen Rajhu about his sister. Even now, they laugh at how easy it was to make him lose his temper. Some people had seen Tasleem in their Lahore slum with a Christian man. She was 18, a good Muslim girl, out in public with a man. Even though the man had converted to Islam out of love for her, this couldn't be allowed. K.M. Chaudary / Associated Press Mubeen Rajhu couldn't stand the teasing, accusations and whispers from co-workers and neighbors that his sister was having an affair and with a Christian "Some guys got to know that his sister was having a relationship," says Ali Raza, a co-worker at the mill. "They would say: 'Can't you do anything? What is the matter with you? You are not a man.'" Raza can barely contain a smile as he talks about the hours spent needling Rajhu. "He used to tell us, 'If you don't stop, I will kill myself. Stop!"' Raza says. He raises his voice to compete with the sounds of the coal-powered mill, and workers blackened by its dust gather to listen. They too smile. A few laugh at the memory of Rajhu's outbursts. (…) On the seventh day, he retrieved the pistol from where he had hidden it and walked up to his sister and with one bullet to the head, he killed her. Associated Press (National Post)

Canada's National Security Consultation I: Digital Anonymity & Subscriber Identification Revisited… Yet Again
An opinion piece states, "Last month, Public Safety Canada followed through on commitments to review and consult on Canada's national security framework. The process reviews powers that were passed into

law following the passage of Bill C-51, Canada's recent controversial anti-terrorism overhaul, as well as invite a broader debate about Canada's security apparatus. While many consultation processes have explored expansions of Canada's national security framework, the current consultation constitutes the first modern day attempt to explore Canada's national security excesses and deficiencies. Unfortunately, the framing of the consultation demonstrates minimal direct regard for privacy and civil liberties because it is primarily preoccupied with defending the existing security framework while introducing a range of additional intrusive powers..." CIPPIC

The Canadian Government's Plan to Sell New Spying Powers to Citizens
Canada's government is taking a forum for citizens to sound off about its spying powers and flipping it into an opportunity to sell Canadians on new and overbroad police capabilities, according to a new watchdog report. In September, Trudeau's Liberals made good on a promise to open a public consultation on national security and released two documents, a green paper and a background document, explaining the issues at stake to Canadians at a time when the government is ramping up its efforts to thwart domestic terrorists. These included hot topics such as the difficulties police face when dealing with encrypted devices and issues surrounding data retention. However, according to the watchdog report, the government's framing of the issues is selling Canadians on a police power that has been shot down again and again by the courts and the public: warrantless access to subscriber information from telecom companies. "Successive federal governments have sought to legislatively enshrine a state power to access subscriber identification data from telecommunications companies," Citizen Lab researcher Christopher Parsons and Canadian Internet Policy and Public Interest Clinic staff lawyer Tamir Israel write in their report. "Such legislative initiatives would have facilitated access to such data on an indiscriminate basis and without any judicial authorization or control." "All of these attempts have proven controversial and each has fallen in the face of public resistance," they continue. In 2014, the Supreme Court of Canada ruled that accessing subscriber information without a warrant constitutes an illegal search. In its green paper, the government describes subscriber information as being akin to a phone book. However, subscriber information includes IP addresses, name, home address, phone number, email address, and mobile devices' IMSI number—much more information than is contained in your average phone book. "Our laws on how information can be properly collected and then used in court as evidence were mostly written before the rapid pace of new technology became a consideration," the government's green paper states. Now, police worry about "slow and inconsistent access to basic subscriber information to help identify who was using a particular communications service at a particular time," the report states. EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

UPDATE: Hurricane Matthew could miss New Brunswick entirely
The latest weather prediction models suggest New Brunswick will be spared from Hurricane Matthew, but people should still prepare for the worst, says a forecaster with the Canadian Hurricane Centre. "Late last night, the models started to produce solutions that push the trajectory more eastward on a track south of the Maritimes," Jim Murtha said on Wednesday morning. But trends change, he said. "There is still a scenario where this storm could move towards the Maritimes, so we're not completely rejecting that consideration at this point," said Murtha. "We're still advising the public to pay attention to the forecast to see how this thing unfolds as Matthew moves northwards." CBC News

Tragédie de Lac-Mégantic : les accusés de retour en cour aujourd'hui
Les accusés impliqués dans la tragédie ferroviaire de Lac-Mégantic survenu le 6 juillet 2013 sont de retour en Cour, mercredi. La poursuite déposera son cahier de procès, rassemblant les preuves et souhaite fixer les dates de procès. Des accusations fédérales ont été portées contre l'entreprise Montreal, Maine & Atlantic (MMA) Canada, MMA Railways, et sept personnes en vertu de la Loi sur la sécurité ferroviaire et de la Loi sur les pêches. L'enquête menée par Transports Canada a conclu que le nombre de freins à main serrés pour immobiliser le train était insuffisant et que la résistance des freins à main au déplacement du train n'avait pas été vérifiée convenablement. L'audition est prévue à 9 h 30. Radio Canada

City of Saskatoon reporting multiple power outages; Environment Canada says storm will continue until Thursday
Saskatoon's first winter storm of the season has knocked out power in several Saskatoon neighbourhoods and Environment Canada says there is more snow is store. "Gusty northerly winds will also continue today and visibilities may be reduced at times in snow and blowing snow," says a snowfall warning issued by Environment Canada Wednesday morning. The warning, which predicts 10 to 15 centimetres of snow before the storm tapers off Thursday, is in place for a swath of Saskatchewan stretching from Southwest to East-Central. The City of Saskatoon's online service alerts page lists outages Wednesday morning in Sutherland, Sutherland Industrial, Forest Grove, Grosvesnor Park, Varsity View, Caswell Hill, Riversdale, Pleasant Hill, Westmount and City Park. Other neighbourhoods lost power overnight but have since had it restored. Star Phoenix; CBC News

Fort McMurray's Waterways subdivision given green light to rebuild
The Alberta government has assured the residents of a fire-ravaged community in Fort McMurray they can rebuild even though the subdivision sits on a floodplain. "This clears the path in some respects of people looking for some answers," Mayor Melissa Blake said Tuesday. The permission from the province was required because it will soon pass legislation preventing any community from building in zones prone to flooding. The Alberta government told the municipality it will provide disaster recovery funding in case of a future flood. CBC News

Province, emergency personnel to host mock disaster Wednesday
A major train disaster is being simulated in Truro on Wednesday. The mock disaster will test the health system response at the former Colchester Regional Hospital on Willow Street from 10 a.m. until noon. The simulation, hosted by the Department of Health and Wellness, will involve emergency personnel, including police, firefighters and paramedics. Truro Daily

Enterovirus is back: Cases of EV-D68 reported across Canada, U.S.
Exactly two years ago, kids turned up in hospital with cold-like symptoms and struggling to breathe across Canada and the U.S. as enterovirus swept the continent. Now, in 2016, the rare respiratory illness has resurfaced after disappearing last year. So far, cases have been reported in British Columbia, Alberta and Ontario, with experts anticipating escalating numbers. "The numbers are low so far but we can expect more infections to occur through the fall and early winter period," Dr. Danuta Skowronki, an epidemiologist with the B.C. Centre for Disease Control, said in a statement (…) It has also reappeared in the U.S. The Centers for Disease Control and Prevention said it's seen a rise in cases, too. Global News

RCMP officer from Yarmouth assists in resourceful rescue
Peace River RCMP officers use backseat of cruiser as flotation tool to rescue drowning man. Quick-thinking action by officers with the Peace River, Alberta, detachment of the RCMP helped save the life of a drowning man on Oct. 1. Yarmouth-born Constable Brandon Goudey was patrolling downtown Peace River with Cst. Tim Stevens and Cst. Stephanie Gratton when they saw EMS and the Peace River Fire Department (PRFD) driving with their emergency lights flashing near the dyke that runs alongside the river. The Mounties had not yet been dispatched to any calls so they decided to follow in case they could provide assistance. As they approached the River Front Park downtown, detachment dispatch notified them that EMS and PRFD were requesting assistance with a man in distress in the river. Constables Goudey and Gratton followed the PRFD rapid response truck to a boat launch that provides access to the Peace River, in hopes of sighting the man. Yarmouth County Vanguard

After Yahoo Revelations, Microsoft Swears It Didn't Spy on Users for the NSA
Microsoft was one of the first tech companies to deny involvement in spying programs secretly launched by the NSA and the US government and carried by Yahoo, according to recent revelations. The Redmond-based tech giant provided a very short statement to explain that the firm has never been involved in spying programs like the ones that Yahoo might have been part of, but the company refused to provide any other details on this. Softpedia

NSA contractor arrested over 'stolen secret code used to hack Russia'
The FBI has secretly arrested a National Security Agency (NSA) contractor suspected of stealing highly classified computer codes used to hack the computer systems of foreign governments including Russia and China, raising fears of another embarrassing intelligence leak to rival the Edward Snowden affair, the New York Times reported on Wednesday (…)The contractor in this case, who was reportedly arrested "in recent weeks", is suspected of stealing the NSA's "source code", used to break into the computer networks of rival powers such as Russia, China, Iran and North Korea. Independent (UK); New York Times

Feds subpoena, gag encrypted chat firm Open Whisper Systems
Open Whisper Systems, the brainchild of cryptographer Moxie Marlinspike, has published the results of an unsealed subpoena set against the company -- and how little US law enforcement received for their trouble. The company is the developer of encrypted messaging application Signal, recommended by NSA whistleblower Edward Snowden, of which the technology is also used in other services including WhatsApp, Facebook Messenger and Google Allo. According to court documents unsealed last week, OWS was forced to hand over user data as part of a federal investigation, but the firm's ethos gave law enforcement very little to work with. ZDNet; Threat Post; New York Times

Facebook rolls out opt-in encryption for 'secret' Messenger chats
As of today, all of Facebook's 900 million Messenger users should be able to choose to have specific chat threads end-to-end encrypted, protecting a message from all eyes except the sender and recipient. Called Secret Conversations, the feature also allows users to set messages to self-destruct anywhere between five seconds to one day. Once a Secret Conversation is initiated, Facebook's app says that the conversation has been "encrypted from one device to the other". Encrypted conversations can be started from the home page by tapping a new message and then tapping the Secret button on the top right corner of the page, followed by the contact you want to start a secret chat with. The new privacy feature follows the completion of Facebook's end-to-end encryption rollout for the billion users of its other chat app, WhatsApp, earlier this year. ZDNet

Three-quarters of Firms Hit by DDoS
Nearly three-quarters of global firms have suffered a DDoS attack over the past 12 months with half losing $100,000 or more each hour during peak periods, according to the latest study from Neustar. The global DDoS mitigation provider polled just over 1,000 C-suite execs to compile its October 2016 Worldwide DDoS Attacks & Protection Report. Of those who had experienced an attack, 85% said they were subject to multiple blasts, with the largest number (29%) suffering attacks between 2-5 times. Although 49% claimed they lost $100,000 per hour during peak periods as a result of an attack, the figure went as high as $250,000 or more for a third of respondents. Time is money, but unfortunately 71% of respondents said they took an hour or more to detect attacks and 72% an additional hour to respond. More worrying still for organizations is the fact that DDoS attacks appear to be increasingly used in conjunction with efforts to steal information, infect systems with ransomware or other cyberattacks – possibly as a smokescreen to distract IT teams. Infosecurity Magazine

Facebook Marketplace launches, selling guns, drugs and baby hedgehogs
Facebook's Marketplace has immediately been flooded with people selling guns, drugs and baby hedgehogs. The company has been forced to apologise after its brand new feature – intended to let people sell things in the same way as they would through Ebay or Craiglist – has already been flooded with illegal items, those that break rules, and others that are just odd. As well as offering illegal items like drugs, some users appeared to be selling things that are banned by Facebook's own terms, like snakes and hedgehogs. Independent (UK)

LAW ENFORCEMENT / APPLICATION DE LA LOI

Female youth behind Instagram kidnapping threats in Fort McMurray, RCMP say
A female youth from Fort McMurray has been identified as the person responsible for sending kidnapping threats via Instagram to students at two local high schools. No charges have been laid but the investigation is continuing, Wood Buffalo RCMP said in a news release Wednesday. Police said they have concluded interviewing four people who were arrested early Tuesday at a home in Fort McMurray. All four have been released from custody. Police started their investigation after receiving a complaint at 10:15 p.m. Monday that kidnapping threats had been uttered using Instagram's messaging feature. Investigators tracked down an I.P. (Internet Protocol) address which led them to a home in Fort McMurray. Police went to the home at 5 a.m. Tuesday and arrested four people from one family. CBC News

Outlaws Motorcycle Club gone from Gander, says RCMP

Police in Gander are praising the community's approach for helping discourage a chapter of the Outlaws Motorcycle Club to the point it has left town altogether. The bikers set up shop in a clubhouse on Gander's main drag in 2013, but they now "cease to exist" in the community, according to RCMP Staff Sgt. Roger Flynn. "I think it was a good example of how not just the police, but the community, can work together," said Flynn. "We had a lot of co-operation from the town of Gander to be able to manage that issue." Watch this Here & Now report from 2013 on the Outlaws Motorcycle Club. When the club's lease on the Airport Boulevard space ran out around May of 2015, they went door-to-door in search of a new location but no one would rent to the club. Flynn said it's an example of community policing at work. "People have to learn it's a community concern. Gone are the days when... it's just a policing issue," said Flynn. "It's a community issue." Last week raids in St. John's under Project Bombard made headlines across the province, as police laid a slew of charges against members of the Vikings Motorcycle Club, an affiliate of the Hells Angels. CBC News

'Overdose epidemic killing two per day'

An overdose death can hit any family. That will be the message Dr. Ingrid Tyler brings to tonight's community forum on fentanyl, taking place at Westview secondary. Tyler is a medical health officer with Fraser Health, and will talk about the epidemiology of overdose deaths in B.C. – the epidemic that has been caused by fentanyl. "Overdoses can affect everyone," said Tyler, whether it be young people experimenting with drugs, or adults who use drugs socially. Every drug bought in the street could be contaminated with fentanyl, she said. "There have been some high-profile cases that have not involved street-entrenched individuals." There have been 488 overdose deaths from the start of the year until the end of August, and that is a 60-per-cent increase over last year. There have been 20 in that period in Maple Ridge. "You can think of this as two deaths per day," she said. More than 60 per cent of the drug deaths involved fentanyl (…) The forum will run from 7-8:30 p.m. in the multipurpose room at Westview. It is being organized by Fraser Health, School District No. 42, Alouette Addictions, Ridge Meadows RCMP and the city. Maple Ridge News

What is up with this 'creepy clown' thing coming to Nova Scotia?

Alleged "creepy clown" sightings and hoaxes have been reported on social media across North America since August. Most have turned out to be pranks. According to the New York Times, as of Sept. 28, there were 12 arrests across the U.S. connected to clown hoaxes, including for alleged threats to individuals and schools. In the NYT piece, psychology cited "mass hysteria" and a desire to be part of a news event as possible fuel for the hoax. (…) Nova Scotia RCMP spokeswoman Cpl. Jennifer Clarke said Oct. 5 the force "is aware of the group posing as clowns and making threats on social media." "We have received complaints from concerned citizens regarding these people. We are taking these complaints seriously. Based on an evaluation of information provided, the RCMP may initiate an investigation." Annapolis County Spectator

Bomb threat cancels classes today for Baddeck Academy

It was a bomb threat that led to the cancellation of classes today at Baddeck Academy. The Cape Breton-Victoria Regional School Board announced the cancellation early this morning on social media through its Twitter account. An RCMP spokesperson confirmed a bomb threat as the reason for the cancellation. Officers were on scene this morning but have since left the scene. Cape Breton Post

Government will 'act swiftly' on e-gaming report

The P.E.I. government will take Wednesday's auditor general report as a reminder that transparency and accountability must be at the core of its decisions and actions, says Premier Wade MacLauchlan. Auditor General Jane MacAdam's report on the province's failed effort to establish P.E.I. as an e-gaming centre found "numerous examples of non-compliance with legislation, policies and controls."(…) Provincial NDP Leader Mike Redmond said he sent a copy of the report to the commercial crime division of the RCMP. "This is no longer an internal review of government affairs, this requires a thorough police investigation and with a view to charges being laid," said Redmond in a news release. Redmond said every government member that was in cabinet at the time needs to be held responsible. That would include several current members of cabinet. CBC News

Teens terrorize with pistols

A Kelowna mother is sounding the alarm after her 11-year-old son was chased home, terrorized and pelted with airsoft pistols. According to RCMP, a youth was confronted and allegedly assaulted by several other teens armed with apparent airsoft pistols in the area of Verna Court and Southview Avenue in Glenmore Monday evening at about 6 p.m. "The 11-year-old youth sustained minor injuries as a result of being shot at with the airsoft pistols," said Const. Jesse O'Donaghey. "The youth later reported the incident to his guardians, who in turn reported the incident to the RCMP." The mom, who asked to stay anonymous for her son's sake, is concerned about the safety of children and small pets in the area. She said the group of about five to seven teens, approximately 15 years old, terrorized her son. "There are several kids that hang out in that area, there are small pets. If they are targeting kids, they could be targeting pets," she said. Castanet

At large high-risk sex offenders back in custody: police
Two high-risk sex offenders, at large since July, are back in police custody, RCMP said Wednesday. The Manitoba High Risk Sex Offender Unit put out a public call for help in finding the two men in early August. Police said Martin Patrick didn't return to his approved residence on July 6, and was unlawfully at large. Patrick turned himself into police on Sept. 24, officials said. Meanwhile, Walter Francis didn't return to his approved residence on June 22 and was unlawfully at large. Police said Francis was found on Long Plain First Nation on Sept. 13. He was arrested without incident. CTV News

Collins Bay pen medium security unit locked down
October 05, 2016 11:42 am - Another lock down is in place at Collins Bay Institution in Kingston. Correctional Services locked down the medium security unit of the prison at about 7 p.m. Tuesday. The move was necessary for staff to conduct an exceptional search of the cells. Correctional Services has not said what prompted the lock down or what guards are searching for. Regularly scheduled visits to Collins Bay could be affected. Anyone who has planned a visit should contact the prison directly. CKWS (Big 963)

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

Failure to protect indigenous children in care perpetuates cycle of abuse
"Groomed for a lifetime of victimization," says Mary Ellen Turpel-Lafond. Too often, that is the tragic fate of kids in a child-welfare system that is supposed to protect them. Those who are victimized – abused sexually and otherwise – are most likely to be indigenous girls. But children with disabilities, mental illnesses and substance-abuse issues are also at higher risk. (…) The raw numbers are shocking – 145 reports of sexual violence against 121 children over a four-year period just in British Columbia – but the circumstances even more so, with foster children abused by foster fathers, foster children preying on younger ones and sexual abuse in group homes, not to mention by family members, casual acquaintances and strangers. Two in every three of the victims of sexual abuse disclosed between 2011 and 2014 were indigenous girls, even though they represented only one in four children in care in British Columbia. The fact that indigenous girls are four times as likely to be victims of abuse as non-indigenous girls – even when they are supposed to be in a safe space – is as shameful as it is unsurprising. Globe and Mail

'Gun culture' sounds like an excuse to us

An editorial piece states, "After three years of record-level shootings, Ottawa must ask itself, what kind of city do we want to be? How safe a city can we reasonably expect to be? Maybe the answer is that gun violence in any growing city is inevitable and we'll just have to be OK with guns going off. Maybe we have to accept the inevitable spillover from the U.S. Maybe we can blame some sort of nebulous "gun culture" that isn't ever defined. Or ... maybe we can ask hard questions about why the police don't seem to be making inroads on gun crime. Maybe we need to stop making excuses and resolve to get guns off the street." Postmedia Network (Ottawa Sun)

'You all have stories': Panel laments drugged drinks at UPEI
Students at the University of Prince Edward Island are having their drinks drugged, and everyone has to work together to deal with that reality, a panel told a meeting of students and staff Tuesday evening. "We always are optimistic. We hope we're not going to be dealing with this, but we do realize the reality that this can and does happen," said Shannon Fenelon, residence life coordinator at UPEI. One of the themes of the evening was the lack of official reports. That could be due to shame, or just uncertainty about what happened due to memory loss. CBC News

Case adjourned for teens accused of sharing intimate images without consent
The case of a group of Nova Scotia teens charged with sharing intimate images of more than 20 underage women has been adjourned until later this month. Judge Timothy Landry put the unusual matter over to Oct. 19 to allow lawyers time to receive more of the disclosure, which includes thousands of pages of evidence from several electronic devices that were seized following a year-long investigation. Two 18-year-olds and four 15-year-olds are facing charges of distributing intimate images without consent and possessing and distributing child pornography (…)The case is one of the first in Canada that involves federal anti-cyberbullying legislation introduced in late 2013 after the high-profile death of Nova Scotia teen Rehtaeh Parsons. Canadian Press (CTV News)

'Think about the future': Kids face up to the dangers of sexting
In a world where sexting — digital flirting — can create devastating personal and and legal problems, Grade 4 students in Nova Scotia are learning how to stay safe online. Like many teachers and school boards across Canada, educators at Bluenose Academy in Lunenburg are making online safety a priority (…)Concern about the dangers young people can encounter while sexting is growing. Some of it focuses on the nearby community of Bridgewater, where six teenage boys are scheduled to appear in court Wednesday on child pornography charges as well as charges of sharing intimate images without consent. They were arrested after pictures of more than 20 teenage girls were allegedly shared in a Dropbox account without the girls' knowledge (…) Canadian studies say kids as young as nine have sent explicit images of themselves. And half of older high school students say they've sent or received an intimate image. CBC News

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS | ENQUETE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINEES

Canada Slammed for 'Lack of Progress' on Inquiry into Missing and Murdered Indigenous Women
A Indigenous women's advocacy group is demanding more transparency and calling out the government for what they see as a "lack of progress" in Canada's national inquiry into missing and murdered indigenous women. The condemnation comes a day after Prime Minister Justin Trudeau stood on the steps of Parliament and denounced Canada for repaying Indigenous people with "neglect" and "indifference" during a vigil honouring Inuit artist Annie Pootoogook, whose body was found in an Ottawa river two weeks ago. In a press release Wednesday, the Native Women's Association of Canada slammed the government for a lack of communication and called for easily accessible information on office locations, how to reach commissioners and their staff, how members of the public can get involved, as well as a straightforward website. "We are very disappointed to see that over two months into the two-year Inquiry mandate, no visible progress has been made," said President Francyne Joe in a press release. "Family members, loved ones have been waiting for decades to be heard. We recognize that it is a big task to start a National Inquiry but the lack of communication has been disappointing and worrying."

A 2014 RCMP report found 1,181 Aboriginal women have gone missing or been murdered in Canada between 1980 to 2012, although Carolyn Bennett, the minister of Indigenous affairs, has said the true figure is "way bigger." VICE News; Globe and Mail

Confronting the crisis of violence against Indigenous women and girls in Canada
In late September, Inuit artist Annie Pootoogook died tragically in Ottawa. Pootoogook was an award-winning illustrator from Cape Dorset, Nunavut. Her ink-and-crayon depictions of everyday life in the north -- families sitting to eat a meal of seal meat or shopping at the Arctic co-op -- received international acclaim. In contrast to the idealized vision many Canadians have of the north, of majestic rock and ice landscapes or charismatic wildlife like polar bears, Pootoogook's drawings often reflected the crushing poverty northern families face and its devastating impacts on their health and well-being. (…) Although the national inquiry into murdered and missing Indigenous women won't investigate cases police previously examined, it will look at broader factors that put Indigenous women and girls at such great risk. According to the UN Committee on the Elimination of Discrimination Against Women, this includes institutional racism, social and economic marginalization and inadequate access to affordable housing so women can escape abusive relationships. Police forces have often failed to deal with violence against Indigenous peoples, and officers themselves have been implicated or charged with assaults and sexual abuse. Rabble

100 march for missing and murdered aboriginal females
Yellowknife resident James Jenka was like many of the other 100 or so people who marched in the annual Sisters in Spirit Walk yesterday. He too has lost a loved one - possibly due to violence. The march, from Ndilo to Northern United Place, was held on a blustery, chilly, grey day to honour and remember the roughly 1,500 missing aboriginal women and girls in Canada. The weather did not dampen the spirits of the marchers. Yellowknifer

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

What happens when you're caught driving stoned? Canada's Supreme Court may soon tell us
It seemed straightforward at first. In 2009, a number of people reported seeing an Ottawa driver cutting off another car, crossing over the centre line and barely missing oncoming traffic, forcing other drivers out of his way, and running into a car driven by an 87-year-old woman. Two separate people called 911 to report him as a drunk driver. To the police officer who showed up to investigate, Carson Bingley certainly seemed impaired: "swaying from side-to-side, slurred speech, slow and deliberate movements, and (staring) off into the distance during questioning." He stumbled, his fly was undone, and he had trouble zipping it up again, according to court documents. (…)If all of this sounds more complicated than a traditional drunk driving case, that's because it is. It's also why the courts have been chewing slowly on *Carson Bingley v. Her Majesty the Queen*, acquitting him twice because of an issue related to whether the police drug expert's evidence was admissible, ever since the original incident (the Supreme Court will hear the case in mid-October). Though stoned driving creates many of the same problems as drunk driving, it's not as easy to define. Without the ability to set a limit, measure it objectively and enforce it, the justice system is forced to fall back on the subjective judgment of police experts who have to determine whether someone was impaired in any given case. The result is an expensive, cumbersome system that has none of the clarity of our approach to drunk driving. Depending on what the Supreme Court does in the Bingley case, Canada's approach to drug-impaired driving may turn out to be broken in a way Parliament will have to fix. Stoned driving has attracted new attention lately because of the federal government's plan to legalize marijuana next spring. Global News

New Brunswick community colleges to offer pot-growing program
A new community college program is being developed in New Brunswick to train people to work in the growing medical marijuana field. Michel Doucet, executive director of contract training and customized learning for Collège communautaire du Nouveau-Brunswick, said he hopes the course will be offered at francophone community colleges in 2017. "We know there's a need for qualified workers. It's a brand new industry," Doucet said. CBC News

Matthew storms toward East Coast as evacuations begin
Authorities in Florida and South Carolina prepared to evacuate hundreds of thousands of people Wednesday as Hurricane Matthew roared closer to the U.S. after leaving a path of destruction across Haiti. Tropical storm conditions are expected to reach parts of the Florida coast by early Thursday, with hurricane conditions in some areas later that day, the National Hurricane Center warned. Matthew had top sustained winds of 120 mph, a Category 3 hurricane, Wednesday morning and could strengthen in coming days, the center said. "People have less than 24 hours to prepare," Scott warned Wednesday morning. "Having a plan could be the difference between life and death." At least 11 deaths have been attributed to the powerful storm as it has marched across the Caribbean this week, five of them in Haiti. But with a key bridge washed out there, roads impassable and phone communications down, there was no further word on the dead or injured. At 11 a.m. ET Wednesday the storm was about 105 miles south of the Bahamas, heading northwest at 12 mph. Florida and South Carolina prepared to evacuate more than 1 million people as the U.S. braced for the most powerful storm to smash through the region in almost a decade. Hurricane Matthew likely to miss D.C. and Delmarva
The track forecast for Hurricane Matthew has shifted dramatically since Tuesday, and the storm no longer appears to be a significant threat for the Mid-Atlantic coast north of the North Carolina Outer Banks. The computer model consensus is that Matthew will hug the Southeast coast between Thursday night and Saturday before retreating to the east. It poses a serious threat from the east coast of Florida to near the South Carolina-North Carolina border. Washington Post

Hurricane Matthew: UN says 350,000 Haitians in need of assistance
The destruction wrought by Hurricane Matthew has affected 350,000 Haitians and left the country facing its “largest humanitarian event” since the devastating earthquake six years ago, the UN has said. Ten thousand Haitians have been forced into shelters, while hospitals are under severe strain and water is in short supply, according to Mourad Wahba, the UN secretary general’s deputy special representative for Haiti. A situation report from the UN’s Office for the Co-ordination of Humanitarian Affairs (Ocha), citing information from the Haitian government’s Directorate of Civil Protection, says that 350,000 men, women and children in Haiti are in need of assistance. Ocha said that flooding had been reported in 11 towns on Haiti’s southern coast, while the International Organisation for Migration issued alerts over the plight of the 55,000 internally displaced people who are still living in temporary shelters in and around the capital, Port-au-Prince, following the 2010 quake. 2 Belgian police officers stabbed near Brussels in possible militant attack
Belgian counter terror prosecutors stepped in to investigate the stabbing of two police officers in Brussels on Wednesday, an indication the case was being treated as a possible militant attack. Brussels prosecutors said in a brief statement that the file had been taken on by their federal counterparts, who normally intervene in cases of organized crime or terrorism. According to public broadcaster VRT, one officer was stabbed in the neck and another in the stomach. The attacker then broke the nose of a third

policeman who had arrived at the scene. The attacker was shot in the leg and taken away by ambulance, VRT said, adding that the police officers' wounds were not life-threatening. Federal prosecutors were not immediately available to comment on why they were handling the case. Reuters (Global News); The Guardian; Sky News; Wall Street Journal; CBC News

France makes new push for Aleppo ceasefire
France is to launch a new push for United Nations backing for a ceasefire in Syria that would allow aid into the city of Aleppo after some of the heaviest bombing of the war. As diplomatic efforts resumed, a Syrian military source said army commanders had decided to scale back air strikes and shelling in Aleppo to alleviate the humanitarian situation there. The Syrian army command said civilians in rebel-held eastern Aleppo were being used as human shields and a reduced level of bombardment would allow people to leave for safer areas. France said Foreign Minister Jean-Marc Ayrault would travel to Russia and the United States on Thursday and Friday to try to persuade both sides to adopt a Security Council resolution to impose a new truce. Globe and Mail

Pakistan: trading fire with India after 'unprovoked' attack
Pakistan's military has accused India of another "unprovoked" attack in the disputed Himalayan region of Kashmir and says it is returning fire. In a statement, the military said Wednesday Pakistani and Indian troops continue to trade fire in various parts of Kashmir. It is unclear if either side has suffered casualties. The exchange of fire started shortly after Pakistani Prime Minister Nawaz Sharif arrived in parliament to discuss a Sept. 28 attack that killed two Pakistani soldiers, which India described as a "surgical strike" against militants. Associated Press (CTV News)

Morocco arrests ten female Isil suicide bombers who 'planned to strike on election day'
"It was a suicide attack and we found bomb-making materials," he added, but did not give further details. An interior ministry spokesman said the arrests, which followed a police raid in the capital of Rabat, could indicate that Isil was stepping up its efforts to recruit women to carry out attacks. "It was a suicide attack and we found bomb-making materials," he added, but did not give further details. An interior ministry spokesman said the arrests, which followed a police raid in the capital of Rabat, could indicate that Isil was stepping up its efforts to recruit women to carry out attacks. Canadian business leadership critical to reducing climate and other natural disaster risks, PwC Canada says

Canadian business leadership is crucial to reducing the risks from climate and other natural disasters, PwC Canada said on Friday. That day, PwC convened a group of private and public sector leaders to discuss the case for Canadian businesses to take action on reducing and managing the risks of climate and other natural disasters, the assurance, advisory and tax services firm noted in a statement. The event marks the first step in exploring the establishment of a country-level private sector leadership

alliance aligned with the global United Nations International Strategy for Disaster Reduction (UNISDR)-led ARISE partnership, PwC reported. Over the next year, PwC will engage Canadian businesses that are "willing and able" to take action on reducing the risks of climate, earthquake and other natural hazards, along with government partners and other parties interested in disaster risk reduction. Federal **Minister of Public Safety and Emergency Preparedness, Ralph Goodale**, **said** that the ministry is participating in the "***first step towards the launch of ARISE Canada. We are committed to working with all levels of government and partners from the private sector to strengthen public-private partnerships and to embrace a whole-of-society approach to emergency management***." **Goodale** pointed out that the upcoming National Roundtable on Disaster Risk Reduction in Montreal in November will provide further opportunities to engage across sectors on this important issue. "***We look forward to working with the private sector both domestically and as part of our international commitments with the UNISDR to meet Sendai commitments for disaster risk reduction and build a more resilient Canada***," **he said**. Un agent correctionnel de Donnacona tire sur un détenu
Un agent correctionnel du pénitencier de Donnacona a ouvert le feu sur un détenu, jeudi matin, le blessant sérieusement. La Sûreté du Québec a ouvert une enquête sur l'incident qui serait survenu suite à une bataille entre deux détenus. Une violente bagarre aurait éclaté entre deux détenus, vers 10h30, jeudi matin, au pénitencier à «sécurité maximale» de Donnacona. Craignant pour la vie d'un des détenus impliqués, des agents correctionnels auraient tenté de maîtriser l'agresseur avec des gaz irritants, avant d'ouvrir le feu sur lui. Selon Ann Mathieu, porte-parole de la Sûreté du Québec (SQ), «au moins un coup de feu» aurait été tiré par un agent correctionnel. Les deux détenus ont été transportés dans un Centre hospitalier. Le détenu touché par balle aurait subi des blessures sévères, mais l'on ne craindrait pas pour sa vie. L'unité des crimes majeurs de la SQ a été mandatée pour enquêter sur l'évènement. Rappelons que la sécurité à l'intérieur des pénitenciers fédéraux relève du Service correctionnel du Canada. La Presse; CBC News

ISIS just identified a dead leader by name — and that's unusual
The Islamic State has for the first time identified Canadian citizen Tamim Chowdhury as its former head of military and covert operations in Bangladesh — using his real name in print, in an unusual move — six weeks after he died in a hail of bullets during a shootout with Bangladeshi police. Chowdhury, a relative unknown until this year, gained worldwide notoriety in July as the alleged mastermind of a terrorist attack on a popular Dhaka cafe that left 22 people, mostly foreigners, dead. ISIS immediately claimed responsibility for the attack, but until Tuesday the extremist group had never acknowledged any association with Chowdhury. "I think it's the first time that ISIS has ever used anyone's real name in an official publication," said Amarnath Amarasingam, a fellow at the Center for Cyber and Homeland Security at George Washington University who has written extensively on extremism. Chowdhury was killed in August in one of a series of raids on suspected militant dens in Bangladesh, which has seen dozens of deadly attacks on atheists, secular writers, and religious minorities in the last two years. The latest issue of Rumiyah magazine, a newer publication hawked by the militants, includes a fresh account of the Dhaka attack, under Chowdhury's byline. The author profiles each of the six attackers who died in the clash and describes the bloodshed as "just a glimpse, and what is yet to come by the permission of Allah will be worse and far more bitter." (…) Since his death, other ties between Canada and extremist outfits in Bangladesh have emerged: One of Chowdhury's accomplices, a now-dead former army officer named Mohammed Jahidul Islam, once received training from the Canadian military. (Canada's Department of National Defence confirmed to VICE News that someone of a "similar name" participated in an academic course on warfare.) VICE News (2016-10-06)

RCMP too big to fix, says former spokesperson Catherine Galliford
The RCMP offered a national apology Thursday to female officers and employees who were subjected to harassment, discrimination and sexual abuse while on the job. Compensation could total up to $100 million. Catherine Galliford, a former high-pofile RCMP spokeswoman, filed an individual lawsuit in 2012 and settled in May. Hundreds of other women came forward afterwards, resulting in two class action

lawsuits. Galliford spoke with On The Coast host, Gloria Macarenko, to share her reaction to the apology and settlement. Q: What goes through your mind when you hear the emotional responses to the apology from other women? I am so proud of them. This is like a revolution because people are talking about it now. I don't want the members of the RCMP to stop talking about this because now they have a voice. Q: The settlement covers all women in the RCMP since 1974. What do you think about those terms? I think those terms are amazing. But what struck me today was the national apology For these women to have a national apology from the Commissioner of the RCMP, to have him say we owe these women an apology, that is worth more to them than anything. Q: Do you think this settlement goes far enough? I think they are talking about changing a culture and I don't know if that can be changed. I think the RCMP has gotten too big to be managed. There are a lot of women and men who have been harassed to the point where they are still trying to do their jobs but are walking zombies. People are afraid to complain and are still being harassed. I don't believe the RCMP in its current state can be fixed. I think it should be a federal police board only and provincial governments can set up their own police forces. CBC News

Canada's Police Force Pledges $75 Million in Compensation for Women Abused in Its Ranks
At a press conference Thursday announcing upward of $75 million in compensation for hundreds of harassed female employees with the Royal Canadian Mounted Police, Officer Linda Davidson embraced Commissioner Bob Paulson. "It takes a great person to acknowledge what went wrong," Davidson, who was diagnosed with PTSD as a result of alleged harassment by her co-workers and bosses, told reporters Thursday. "This is a new step, it's a new beginning. We are headed in the right direction." Davidson mounted a class action lawsuit against Canada's national police force in March 2015, alleging that she and other female officers were victims of systemic sexual harassment and discrimination within the force. It's the second class action of its kind after another such action by former RCMP constable Janet Merlo five years ago. The Merlo class action snowballed into about 500 women who joined on with their own allegations of harassment. The RCMP said Thursday they expect 1,000 women to come forward, which is how they decided on the "ballpark estimate" of $75 million in compensation. It was an emotional moment for Paulson, too, who choked up as he read his statement. "For many of our women, this discrimination and harassment has hurt them mentally and physically," he said. Adding: "Their very lives have been affected." VICE News

Harcèlement à la GRC : la députée Ginette Petitpas Taylor satisfaite du règlement
La députée fédérale de Moncton-Riverview-Dieppe, Ginette Petitpas Taylor, est contente que le commissaire de la Gendarmerie royale du Canada (GRC), Bob Paulson, ait présenté ses excuses aux centaines d'employées de la police fédérale qui disent avoir été victimes de harcèlement sexuel et de discrimination. La députée libérale a travaillé 23 ans au sein du détachement Codiac de la GRC, en tant qu'employée civile. Elle espère que l'annonce de jeudi va permettre de fermer un chapitre regrettable pour le service de police. Ginette Petitpas Taylor reconnaît qu'à certaines époques, il régnait une culture de discrimination au sein de la GRC. Cette attitude se manifestait notamment par des commentaires sexistes et des abus de pouvoir. Elle précise qu'au détachement de Codiac, elle n'a jamais eu l'impression que les femmes étaient désavantagées pour des promotions. Radio-Canada

Justice served by RCMP apology, $100M settlement of harassment claims says former Mountie
Justice has been served through Thursday's settlement of class action lawsuits over harassment of female RCMP members, says Heli Kijanen, the former Mountie who spearheaded legal action against the national force in 2011. RCMP commissioner Bob Paulson apologized to female RCMP officers who had been harassed, and announced $100-million has been allotted to settle claims. Kijanen, who was born in Thunder Bay, Ont., had been working as an RCMP officer in Saskatchewan, but resigned due to bullying from male members of the force. "I feel like people have been given back pieces of their lives to complete the puzzle of closure," she said of the settlement. CBC News (2016-10-07); Thunder Bay News Watch (2016-10-06)

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

UPDATED : Hurricane Matthew unlikely to reach Canada: weather expert

A Canadian hurricane preparedness expert says Hurricane Matthew is unlikely to reach Canada on its path up the East Coast. The massive Category 3 storm is far more likely to loop back on itself and pound Florida a second time in the days ahead, according to Bob Robichaud, a warning preparedness meteorologist with the Canadian Hurricane Centre... Hurricane Matthew is projected to slowly push north through Florida, Georgia and South Carolina, before eventually curving east out to sea and turning south again. CTV News

Stranded Yukon hunters survived on rosehips and lake water for 4 days
RCMP say three hunters followed "all the right steps" when they found themselves stranded for days on a remote Yukon lakeshore, with almost no survival gear. The three were successfully rescued on Wednesday, in good health, despite living only on rosehips and lake water for four days. Police say the hunters left Whitehorse Sunday morning on a hunting trip. They took their aluminum boat out on a lake about 90 kilometres west of Whitehorse.They beached their boat to look for some prey on shore. That's when the wind carried the boat away, and with it, all their supplies. The three men were left only with the clothes they were wearing, a few lighters, a knife and binoculars... Police say the men - all very experienced hunters - then hunkered down to wait for a rescue. They had told their families they'd be back on Tuesday night, so they knew it would likely be a few days before a search began... About midday on Wednesday, relatives reported them missing to police. RCMP search and rescue managers checked two possible locations the relatives had told them about, and soon found the men's vehicle. A helicopter was then used to search for the men, and they were found at about 6 p.m. on Wednesday. They were hungry, but otherwise in good health, according to RCMP. CBC News

Fort McMurray evacuees rebuild life in Elliott's Cove
Ivy and Bruce Berkshire sit for a photo on their newly constructed patio at their house in Elliott's Cove. The couple returned to the province after losing their home in the Fort McMurray wildfires on May 3... A week later, on May 11, they flew to Newfoundland. That's when Bruce began showing signs of illness. Inhalation of the smoke and live amber caused him to have a lung infection. "Naturally, I had to consume some of it, because I was in it," he said. "I was in that for two hours. Had no choice, we had to keep moving to get out of the city." He spent about a week recovering in hospital. Today, Bruce says he's feeling much improved, other than some minor issues... They say they harbour anger towards the powers-that-be for not accepting help that was offered by other countries and provinces, to help battle the blaze. The property owners for their complex, and their insurance company have also been silent, leaving them with some uncertainties. Besides what they lost in fire, flooding consumed belongings they had stored at the hotel where Ivy worked. All they can do now, is focus on the present. Telegram

Top squad
A national search and rescue (SAR) exercise — SAREX — conducted in Yellowknife, Northwest Territories, from Sept. 18-24 highlighted the importance of conducting real-world SAR missions and training to ensure crews are ready to respond when Canadians are in distress. The value of the Royal Canadian Air Force exercise was further underlined when exercise participants unexpectedly provided real-time assistance to a canoeist in distress on Great Slave Lake, N.W.T. and, in a separate incident, rescued four individuals from a remote area near Ulukhaktok, N.W.T. In the spirit of traditional, friendly competition during National SAREX 2016, 103 Search and Rescue Squadron from 9 Wing Gander, Newfoundland and Labrador, won the Diamond Trophy by emerging as the best overall SAR squadron after five intense exercise days. Gander Beacon

NATIONAL SECURITY CONSULTATIONS / CONSULTATIONS SUR LA SÉCURITÉ NATIONALE

Tackling the Government Green Paper on National Security: Part 2
This is our second in a series of responses to the federal government's Green Paper on Canada's current national security framework. While the paper generally favours the current national security framework, CCLA will seek to add additional context, and to show why there is no incompatibility between a strong commitment to national security and a strong commitment to our Charter rights and freedoms. This week, we discuss the amendments made by Bill C-51 to the Canadian Security Intelligence Act ("CSIS Act")

drastically expanding the Canadian Security Intelligence Service's (CSIS) powers. These provisions are among those highlighted in our constitutional challenge to the Anti-Terrorism Act, 2015 (the "ATA, 2015"). Canadian Civil Liberties Association (2016-10-05)

Improve mental health services for Edmonton deportee, urges Black Lives Matter
Black Lives Matter Edmonton is urging authorities to provide better mental health supports to a man awaiting deportation and has been detained without charge for months. "We really need to find help for him," said Ufuoma Odebala-Fregene, immigration consultant and executive member of Black Lives Matter Edmonton. "We need to engage the mental health system to find out why they are not taking him because that's clearly an issue." For at least eight months, authorities have held convicted criminal 31-year old Abdikarim Gelle in the Edmonton Remand Centre as they try to deport him, even though he has served his time. Somalia won't accept Gelle because he suffers from mental illness. Transcripts from Gelle's detention reviews show Canadian authorities hope that decision will change. In the meantime, the tribunal has ruled that Gelle is too dangerous to release. Gelle, who arrived in Canada as a 13-year-old refugee originally from Somalia, has racked up 57 convictions as an adult for crimes including sexual assault, assault of a peace officer and trafficking cocaine. Gellw failed to appear in court and breached his probation account for about a third of his convictions. Documents show Somali authorities have told Canadian officials they will not accept deportees suffering from mental illness. Gelle suffers from a long list of conditions which began showing up as a youth including schizoaffective disorder, chronic psychosis and cognitive delay that results in delusions, deficient judgement, hearing voices and other consequences. Officials have looked into transferring Gelle to Alberta Hospital, according to detention review transcripts. However, a forensic psychiatrist with Alberta Health Services has indicated the psychiatric hospital in Edmonton won't take Gelle because he can't be easily transitioned into the community, and won't comply with his treatment plan. Despite repeated requests from CBC News, neither Alberta Health Services or the Canadian Border Services Agency has provided comment. CBC News

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Yahoo's Government Email Scanner Was Actually a Secret Hacking Tool
The spy tool that the US government ordered Yahoo to install on its systems last year at the behest of the NSA or the FBI was a "poorly designed" and "buggy" piece of malware, according to two sources closely familiar with the matter... Anonymous sources told The Times that the tool was nothing more than a modified version of Yahoo's existing scanning system, which searches all email for malware, spam and images of child pornography. But two sources familiar with the matter told Motherboard that this description is wrong, and that the tool was actually more like a "rootkit," a powerful type of malware that lives deep inside an infected system and gives hackers essentially unfettered access. The rootkit-like tool was found by Yahoo's internal security testing team during one of their checkups, according to a source. "They assumed it was a rootkit installed by hackers," an ex-Yahoo employee, who requested anonymity to discuss sensitive issues, told Motherboard. "If it was just a slight modification to the spam and child pornography filters, the security team wouldn't have noticed and freaked out." "It definitely contained something that did not look like anything Yahoo mail would have installed," the source added. "This backdoor was installed in a way that endangered all of Yahoo users." Motherboard;

Web-Based Keylogger Used to Steal Credit Card Data from Popular Sites
Popular ecommerce sites have been infected with web-based keyloggers that are being used to steal credit card data as it's entered into online checkout forms. More than 100 compromised sites have been identified, but the number could be in the thousands, researchers said. RiskIQ, in collaboration with ClearSky, published their findings (PDF) Thursday, and said some of the ecommerce sites impacted include Everlast Worldwide, the Australian ecommerce site for apparel giant Guess and Fidelity Investments' FidelityStore, a site maintained by a third-party firm SwervePoint. Threat Post; Security Week

US NIST Warns Security 'Fatigue' is Putting Users at Risk
A reluctance to deal with computer security is putting users in danger online as they take unnecessary risks due to general fatigue with things like passwords, according to a new NIST study. The US standards body uncovered feelings of resignation, loss of control, fatalism, risk minimization, and decision voidance in its interviews with a range of ordinary computer users aged between 20 and 60-years-old. The research team found respondents have grown tired of being on constant alert for online threats and of trying to understand the nuances of online security issues. Infosecurity Magazine; SC Magazine; BBC News

EFF: NSA's Support of Encryption 'Disingenuous'
The National Security Agency came out in support of encryption again Wednesday, but privacy advocates were quick to contest the agency's stance, criticizing it for having a different definition of the term than others. Glenn Gerstell, general counsel for the NSA, stressed that the agency believes in strong encryption multiple times during a panel, "Privacy vs. Security: Beyond the Zero-Sum Game," at Cambridge Cyber Summit here at MIT, on Wednesday. Another panelist, Cindy Cohn, executive director of the Electronic Frontier Foundation, took offense and said that when the NSA uses the word encryption, it should really place an asterisk at the end. "I think there should be an asterisk most of the time. I've been in meetings with people from the NSA and FBI and when they say we support strong encryption... what they really mean is strong encryption that only they have access to," Cohn said. Threat Post

We're not going to beat cybercrime in our lifetime says ex-FBI cyber chief
A former director of the FBI's crime and cybercrime response unit has warned that the problems of hacking and cybercrime will not be solved in our lifetimes, but we that we owe it to future generations to avoid completely mismanaging the issue to make it worse to deal with in years to come. Shawn Henry spent 24 years at the FBI where he rose through the ranks to oversee all of the Bureau's criminal and

cyber investigations across the globe before retiring from the organisation in 2012. "We're not going to solve it, folks, not in our lifetime, but we have to constantly manage it," he said, speaking at IP EXPO 2016 in his post-FBI role as president of cybersecurity firm Crowdstrike… Rather than an organisation sitting back and waiting to see if it's attacked, Henry argues that cybersecurity professionals should be constantly examining their own network looking for indicators of attack because "If we're not out constantly hunting for the adversaries they're hunting us". ZDNet

Exclusive: The Aspen Institute's Walter Isaacson Interviews Admiral Michael S. Rogers from the Cambridge Cyber Summit Today
Following is the unofficial transcript of an EXCLUSIVE interview with Admiral Michael S. Rogers, Commander, U.S. Cyber Command; Director, National Security Agency; Chief, Central Security Service, live from the Cambridge Cyber Summit hosted by The Aspen Institute, CNBC and MIT on Wednesday, October 5th. CNBC

Arrested NSA Contractor 'Doesn't Fit the Profile'
The FBI has arrested NSA contractor Harold Martin, who is suspected of stealing highly classified source code developed by the agency to hack the computer networks of adversaries like Russia, China, Iran and North Korea. Apparently though, the suspect did not fit any of the usual profiles of an "insider threat."… One administration official told the *New York Times* that he didn't fit the assumed profile, and that he was "not like a Snowden or someone who believes that what we were doing was illegal and wanted to publicize that." A Navy veteran working on a Ph.D. in computer science, Martin may have simply been collecting files for his own edification—much like other senior officials across Washington take classified documents home with them. It's a known shadow practice, but not a malicious one. Infosecurity Magazine; Daily Beast

Radio hacker 'caused havoc at Edinburgh airport and hospital'
Jamie Corrigan was 17 when he started tapping into the signals "as a prank". Edinburgh Sheriff Court heard calls on the Air Traffic Control frequency at Edinburgh Airport interfered with aircraft and emergency vehicles. Network Rail also reported attempts to redirect moving trains. Corrigan, now 20, has now been banned from leaving his home between 22:00 and 06:00 for the next six months. He was also ordered to forfeit radio equipment. Corrigan, of Niddrie House Square, Edinburgh, had previously pleaded guilty to charges of culpable and reckless conduct by making repeated radio transmissions which caused fear and alarm, potential endangerment and making abusive and offensive remarks. His targets also included Edinburgh Castle, the Royal Infirmary of Edinburgh, NSL Services Group, and Westside and Cameron Toll Shopping Centres. BBC News

LAW ENFORCEMENT / APPLICATION DE LA LOI

RCMP too big to fix, says former spokesperson Catherine Galliford
The RCMP offered a national apology Thursday to female officers and employees who were subjected to harassment, discrimination and sexual abuse while on the job. Compensation could total up to $100 million. Catherine Galliford, a former high-pofile RCMP spokeswoman, filed an individual lawsuit in 2012 and settled in May. Hundreds of other women came forward afterwards, resulting in two class action lawsuits. Galliford spoke with On The Coast host, Gloria Macarenko, to share her reaction to the apology and settlement. Q: What goes through your mind when you hear the emotional responses to the apology from other women? I am so proud of them. This is like a revolution because people are talking about it now. I don't want the members of the RCMP to stop talking about this because now they have a voice. Q: The settlement covers all women in the RCMP since 1974. What do you think about those terms? I think those terms are amazing. But what struck me today was the national apology For these women to have a national apology from the Commissioner of the RCMP, to have him say we owe these women an apology, that is worth more to them than anything. Q: Do you think this settlement goes far enough? I think they are talking about changing a culture and I don't know if that can be changed. I think the RCMP has gotten too big to be managed. There are a lot of women and men who have been harassed to the point where they are still trying to do their jobs but are walking zombies. People are afraid to complain

and are still being harassed. I don't believe the RCMP in its current state can be fixed. I think it should be a federal police board only and provincial governments can set up their own police forces. CBC News

Canada's Police Force Pledges $75 Million in Compensation for Women Abused in Its Ranks
At a press conference Thursday announcing upward of $75 million in compensation for hundreds of harassed female employees with the Royal Canadian Mounted Police, Officer Linda Davidson embraced Commissioner Bob Paulson. "It takes a great person to acknowledge what went wrong," Davidson, who was diagnosed with PTSD as a result of alleged harassment by her co-workers and bosses, told reporters Thursday. "This is a new step, it's a new beginning. We are headed in the right direction." Davidson mounted a class action lawsuit against Canada's national police force in March 2015, alleging that she and other female officers were victims of systemic sexual harassment and discrimination within the force. It's the second class action of its kind after another such action by former RCMP constable Janet Merlo five years ago. The Merlo class action snowballed into about 500 women who joined on with their own allegations of harassment. The RCMP said Thursday they expect 1,000 women to come forward, which is how they decided on the "ballpark estimate" of $75 million in compensation. It was an emotional moment for Paulson, too, who choked up as he read his statement. "For many of our women, this discrimination and harassment has hurt them mentally and physically," he said. Adding: "Their very lives have been affected." VICE News

Harcèlement à la GRC : la députée Ginette Petitpas Taylor satisfaite du règlement
La députée fédérale de Moncton-Riverview-Dieppe, Ginette Petitpas Taylor, est contente que le commissaire de la Gendarmerie royale du Canada (GRC), Bob Paulson, ait présenté ses excuses aux centaines d'employées de la police fédérale qui disent avoir été victimes de harcèlement sexuel et de discrimination. La députée libérale a travaillé 23 ans au sein du détachement Codiac de la GRC, en tant qu'employée civile. Elle espère que l'annonce de jeudi va permettre de fermer un chapitre regrettable pour le service de police. Ginette Petitpas Taylor reconnaît qu'à certaines époques, il régnait une culture de discrimination au sein de la GRC. Cette attitude se manifestait notamment par des commentaires sexistes et des abus de pouvoir. Elle précise qu'au détachement de Codiac, elle n'a jamais eu l'impression que les femmes étaient désavantagées pour des promotions. Radio-Canada

Canadian Mounties apologise for rampant sexual harassment after multi-million dollar lawsuit settlement
The Royal Canadian Mounted Police have reached a multi-million dollar settlement with female members of the force after decades of gender and sexual discrimination and harassment. Once approved in federal court, the settlement agreement is expected to reach C$100m ($76m). The settlement comes as a result of two class action lawsuits filed by two former Mounties: Linda Gillis Davidson, who joined the RCMP in 1985, and Janet Merlo, who joined in 1991. “Some of these women left the RCMP heartbroken, disillusioned, and angry,” said RCMP Commissioner Bob Paulson, apologising for "shameful conduct". “Others stayed and were forced to find ways to cope with this inexcusable condition since they did not see an organisation that was willing to change.” Ms Merlo called Mr Paulson’s apology a “turning point” for the iconic Canadian organisation. “I have total faith that this is the beginning of a new era, hopefully a better era,” she said. She added that the hundreds allegations were not directed at the entire organisation, but rather at a few members of the Mounties. “Within the RCMP itself,” she said, “it seems that it was a minority, but a potent minority, that behaves this way.” Independent UK

Justice served by RCMP apology, $100M settlement of harassment claims says former Mountie
Justice has been served through Thursday's settlement of class action lawsuits over harassment of female RCMP members, says Heli Kijanen, the former Mountie who spearheaded legal action against the national force in 2011. RCMP commissioner Bob Paulson apologized to female RCMP officers who had been harassed, and announced $100-million has been allotted to settle claims. Kijanen, who was born in Thunder Bay, Ont., had been working as an RCMP officer in Saskatchewan, but resigned due to bullying from male members of the force. "I feel like people have been given back pieces of their lives to complete the puzzle of closure," she said of the settlement. CBC News (2016-10-07); Thunder Bay News Watch (2016-10-06)

Editorial: A welcome apology from the RCMP

An editorial states, "... Now RCMP Commissioner Bob Paulson has offered a heartfelt apology and committed to transformational change as part of the settlement of two class-action lawsuits. The mea culpa from the top brass is a historic public acknowledgement of the RCMP's failure to stand by its female members. The settlement represents justice for 500 complainants who have denounced demeaning treatment. About $100 million has been set aside for compensation. The process is to be administered by retired Supreme Court Justice Michel Bastarache and it is estimated as many as 1,000 women could make claims. The most important part of the settlement, though, is its reinforcement of efforts to bring the RCMP "into modernity," as Paulson put it... Paulson seems sincere in his commitment to banishing sexism from the RCMP and his leadership sends a strong message. But it is essential that the old boys' club get the memo that disrespect toward women is not acceptable." Montreal Gazette

IIO investigating death

The Independent Investigations Office of B.C. is investigating a fatality in Kelowna near the Bennett clock tower Wednesday afternoon. Spokesman Marten Youssef confirmed the IIO was called on to look into the incident after a man reportedly was in medical distress at the clock tower and later died after involvement with police. The organization investigates police-involved deaths across the province. Youssef said the IIO was notified of the incident by Kelowna RCMP and is assessing the situation. "The primary focus of our investigation is to first establish if there is a connection between the male's death and the actions or inactions of police," he told Castanet. "If there is, then we will continue with our investigation. If there is no connection, we will release jurisdiction back to the RCMP." At this time, the IIO is releasing no additional details "as we want to ensure that we independently verify the information," Youssef said in an email. Castanet

Police documents reveal how law enforcement keep Stingray use secret

Police records obtained by the Daily Dot reveal in unprecedented detail how the Obama administration enables law enforcement to suppress information about controversial phone-surveillance technology used by police throughout the United States. The documents, which link the purchase of so-called Stingray devices to various North Carolina state and local police agencies, include a fill-in-the-blank warrant drafted by the U.S. Justice Department (DOJ) and intended for use by state and local police that extends the veil of secrecy over law enforcement's Stingray use. (...) We know from sworn testimony from Toronto police that Stingrays can disrupt all cell activity up to and including 911 calls. Even though the devices are programmed to disengage when citizens in the area attempt to reach emergency services, they often fail to do so, according to an internal Royal Mounted Canadian Police (RCMP) memo, published this April by the *Globe and Mail*. Due to frequent malfunction with Stingrays, Canadian authorities admit the contraption is run at a "calculated risk to public safety," *Globe and Mail* reports. According to RCMP, police are now only allowed to use the device for three minutes at a time. And while the U.S. Justice Department's warrant is meant to reassure judges that any service disruption will be "brief" and "minimized," at least one documented case shows the continuous use of a Stingray in Oakland, California, for over nine hours. Daily Dot

Extortion scam circulating online in Leduc

RCMP are issuing a warning after a number of people in the Leduc area were blackmailed for money, after sharing "compromising" photographs of themselves online. In a statement issued Friday, police said they have recently received a number of reports from people who have been targeted in the social media scam. Police said victims are contacted through various social media platforms, with a friend request from a stranger. When the person accepts the friend request, the scammer then works to "bait" them into providing "compromising images" of themselves, which are then used to blackmail the victim, police said. The scammers demand money, and threaten to release the private images to the victim's friends, family and the public, if they fail to comply. RCMP are encouraging all users on social media to exercise caution when accepting new friend requests, especially when private or compromising images are requested. CBC News

25 000 $ pour aider à retrouver une adolescente de Yorkton

La générosité du public a permis à la famille de Mekayla Bali de récolter 25 000 $ qui serviront de récompense à quiconque partage des informations menant à l'adolescente de 17 ans, annonce la Gendarmerie royale du Canada (GRC). Mekayla Bali a été vue pour la dernière fois le 12 avril dans une

station d'autobus de Yorkton, sa ville de résidence, selon la GRC. Ce matin-là, l'adolescente de 17 ans a été déposée à l'école par sa mère. C'est à ce moment que Paula Bali a vu sa fille pour la dernière fois. La mère de l'adolescente disparue enjoint les personnes qui auraient vu sa fille de communiquer avec la GRC. Paula Bali tient également à remercier les gens qui ont donné à la cause pour aider à retrouver Mekayla. « Ça prend un village pour élever un enfant. Ça pourrait prendre un pays pour en retrouver un, » a-t-elle affirmé jeudi après-midi lors d'un point de presse de la GRC à Regina. Les autorités policières disent avoir reçu 130 indications du public depuis le début de l'enquête. Des pistes de recherche venant d'aussi loin que de la Colombie-Britannique font partie de ce nombre. Cependant, les indications reçues jusqu'à maintenant n'ont pas permis de confirmer quels sont les déplacements précis de Mekayla Bali depuis le 12 avril, précise Jennifer Ebert de la GRC. « Les informations reçues nous font croire qu'il n'y a pas d'acte criminel associé à sa disparition, mais c'est troublant de voir qu'une adolescente de cet âge peut disparaître sans laisser de traces alors qu'on vit dans l'ère du numérique. » - Jennifer Ebert, inspectrice de la GRC. Radio-Canada; Canadian Press (Castanet)

County RCMP seek missing teen
Strathcona County RCMP are asking for the public's assistance in locating a missing 15-year-old girl from Sherwood Park. Rachael Margaret McNeilly was last seen at approximately 6:15 a.m. on Monday, Oct. 3. "Although there is nothing at this time to lead police to believe that McNeilly's disappearance is suspicious, the RCMP are concerned for her well-being and need to locate McNeilly to ensure her safety," said Const. Chantelle Kelly, media liaison with the Strathcona County RCMP. McNeilly is described as Caucasian, five-feet tall, with a slim build and long red hair. Sherwood Park News

Queens District RCMP say there are no menacing clowns in Liverpool.
In a release sent out this morning, police say they want to allay public concerns about the issue, which they say was generated in large part by false social media reports that people disguised as clowns have been menacing local citizens. This week, several Facebook posts indicated that three people dressed as Clowns were in Liverpool. RCMP say this is not true. "While social media can be a useful tool in distributing information quickly, it can also be a detriment as witnessed by false reports of menacing clowns circulating in Queens County," says the release. Police say people should carefully assess unsubstantiated social media posts before forwarding them, and if they appear to be gossip or rumour, do not report them as fact. "Police do not wish to discourage anyone from contacting police if they are witness to an actual incident involving a clown appearing threating or assaultive however, and residents are encouraged to report any genuine wrongdoing." Queens County Advance

Helping out Shamattawa

Un agent correctionnel de Donnacona tire sur un détenu
Un agent correctionnel du pénitencier de Donnacona a ouvert le feu sur un détenu, jeudi matin, le blessant sérieusement. La Sûreté du Québec a ouvert une enquête sur l'incident qui serait survenu suite à une bataille entre deux détenus. Une violente bagarre aurait éclaté entre deux détenus, vers 10h30, jeudi matin, au pénitencier à «sécurité maximale» de Donnacona. Craignant pour la vie d'un des détenus impliqués, des agents correctionnels auraient tenté de maîtriser l'agresseur avec des gaz irritants, avant d'ouvrir le feu sur lui. Selon Ann Mathieu, porte-parole de la Sûreté du Québec (SQ), «au moins un coup de feu» aurait été tiré par un agent correctionnel. Les deux détenus ont été transportés dans un Centre hospitalier. Le détenu touché par balle aurait subi des blessures sévères, mais l'on ne craindrait pas pour sa vie. L'unité des crimes majeurs de la SQ a été mandatée pour enquêter sur l'évènement. Rappelons que la sécurité à l'intérieur des pénitenciers fédéraux relève du Service correctionnel du Canada. La Presse; CBC News

Fentanyl overdose: 131 people in northern Ontario killed since 2010
Fentanyl overdose has killed 131 people in northern Ontario since 2010, according to new data from the Chief Coroner's Office obtained by CBC.Fentanyl — a powerful narcotic that can be 50 to 80 times more powerful than morphine— is now the number one cause of opioid-related death in Ontario and killed nearly 200 people in 2015. In northern Ontario, an additional 134 people have died of methadone overdose and another 122 overdoses on oxycodone in the last six years. CBC News (2016-10-06)

Why would anyone use a chemical weapon to make drugs? Money
This summer, carfentanil — one of the most potent opioids on the planet — hit the streets of North America. Many users who thought they were taking heroin actually injected or snorted a substance that has until recently been viewed as a chemical weapon . First responders pumped hundreds of dying, bluish people full of the antidote naloxone to try to make them breathe again. Legally used as a tranquilizer for large animals like bears and elephants, carfentanil is so potent that an amount smaller than a poppy seed can kill a person. How such a toxic substance made its way into global narcotics supply chains is a matter of economics, and desperation. Carfentanil is 100 times more potent than fentanyl, a related drug that increasingly has been mixed into narcotics such as heroin. But carfentanil is only slightly more expensive than fentanyl, and it can be cut into much larger volumes, creating stronger, cheaper highs. Associated Press

Governments researched fentanyls as weapons for decades
Before appearing in global narcotics supply chains, fentanyl and substances like it were viewed as potential chemical weapons. Scientists struggled to figure out how to package the chemicals so that they would incapacitate but not kill targets. Here are some highlights of those efforts: Associated Press

Chinese companies willing to export deadly opioid carfentanil to Canada and U.S.
For a few thousand dollars, Chinese companies offer to export a powerful chemical that has been killing unsuspecting drug users and is so lethal that it presents a potential terrorism threat, an Associated Press investigation has found. The AP identified 12 Chinese businesses that said they would export the chemical — a synthetic opioid known as carfentanil — to the United States, Canada, the United Kingdom, France, Germany, Belgium and Australia for as little as $2,750 a kilogram (2.2 pounds), no questions asked. Carfentanil burst into view this summer, the latest scourge in an epidemic of opioid abuse that has killed tens of thousands of people in the United States alone. Dealers have been cutting carfentanil and its weaker cousin, fentanyl, into heroin and other illicit drugs to boost profit margins. Global News; Radio Canada International; Chicago Tribune

Naloxone nasal spray too pricey for those who need it, frontline workers say
Some front line overdose prevention workers in Montreal say a nasal spray version of the potentially life-saving drug naloxone is too expensive to purchase for their clients and should be covered by Quebec's public health insurance. This week, Health Canada approved naloxone for over-the-counter, non-prescription use in Canada, but its price – $145 for two single-use doses of the spray version – is too high for some clinics in Montreal to purchase the drug. Jeremy Wexler, a social worker at a Montreal opiate-replacement clinic, was hoping his clinic would begin training families and friends of users on administering naloxone in case of an overdose. But he was shocked when he found out about the price of the nasal spray version. "We felt like the nasal spray is a big advantage, but we had to back away," Wexler told CBC Montreal's Daybreak. Nunavut plans territorial inquiry into missing and murdered women

People in Nunavut will get to weigh in on the national inquiry into missing and murdered Indigenous women and girls. That news was delivered in person by Keith Peterson, Nunavut's justice minister and Cambridge Bay MLA this week, in his hometown, at the Kitikmeot Inuit Association's annual general meeting. The plan, not yet formally announced, is to hold a special inquiry into missing and murdered Indigenous women and girls [MMIWG] for Nunavut, using the same terms of reference as for the larger national inquiry, announced this past August, said Peterson, speaking Oct. 5 to the AGM. For its inquiry, Nunavut has asked for the additional consideration of domestic violence, due to the high level of domestic violence in the territory, Peterson said. This expanded orientation was confirmed Oct. 6 by Nunavut Premier Peter Taptuna, who also came to the KIA meeting. Taptuna had already brought up that need last February, saying the inquiry should look "at the root causes around systematic domestic violence against women in Nunavut." While there are few missing Inuit women in Nunavut, Taptuna told *Nunatsiaq News* that he hopes the inquiry's look at domestic violence—which has led to the murder of many Nunavut women—will raise awareness nationally about that issue. Nunatsiaq Online

Missing, but never gone: KTC hosts walk for missing and murdered indigenous men and women
Keewatin Tribal Council (KTC) organized a march in honour of missing and murdered aboriginal men and women in Thompson Oct. 4, marching from the KTC offices to the southern bank of the Burntwood River. Family members of the missing and murdered stood in the October cold to share their grief and memories. Laura Wood-Labonte attended to speak for her cousin, Christine Wood, whose recent disappearance is currently the subject of an active police investigation (supplemented by a private detective, as well as searches by Winnipeg's Bear Clan). Wood-Labonte noted that the reality of a missing person is difficult to grasp, until it happens to someone close to you. "It's hard seeing my aunt and uncle every week, seeing the heartache in their eyes." She said that the RCMP have been investigating thoroughly and have kept the family informed; however, she notes that the tips investigators have been receiving are often weeks old. Wood-Labonte noted that individuals with information should report it immediately. "Even if you're unsure, time is precious." Not everyone was satisfied with the RCMP's performance, however. Marylin Flett of Tataskweyak Cree Nation, whose husband Raymond went missing in July 2015, had marched at a separate event earlier this year, near the anniversary of his disappearance. A year later, she and her family are still investigating the disappearance themselves, and continue to express frustration with local RCMP, who she states will not re-open the investigation. Nonetheless, she and her family continue to search for him to this day. "I was married to this man for 35 years. I didn't give up on him, and I won't give up now." Thompson Citizen

Hurricane Matthew battering Florida's northeast coast as governor warns: 'This is not over'
Hurricane Matthew churned along Florida's Atlantic coast Friday, looking increasingly like its center would remain just offshore as the storm battered the state with punishing rain, beach-swallowing sea surges and destructive wind gusts topping 100 mph. Even if Matthew avoids making landfall and Florida dodges

some of the worst-case scenarios laid out by forecasters and public officials in recent days, the storm still poses a considerable threat to residents from Florida to North Carolina. The strongest hurricane to menace the United States in a decade is continuing its trek north as it rumbles near the coastline, and forecasts warn that a dangerous storm surge of up to 11 feet could cause life-threatening flooding in as many as four states. Early Friday, the storm weakened to a Category 3 storm, but still packed dangerous winds of 120 mph that could threaten land if the storm drifts only slightly closer to shore. The National Hurricane Center reported that the hurricane's center was "hugging the coast" as the storm moved along the northern part of Florida, battering the northeastern coastal areas, and headed toward Georgia and South Carolina. "The storm has only passed half our state, so this is not over," Florida Gov. Rick Scott (R) said during a briefing Friday morning. Washington Post; NY Times

Haiti likely to be 'critical' for 18 months after Hurricane Matthew
The situation in Haiti has been described as 'critical' after it was battered by Hurricane Matthew. Christian Aid told Sky News it was likely to remain that way for 18 months. Prospery Raymond from the charity said: "The south part of Haiti is really affected by Hurricane Matthew. "The population are really in need of water, shelter, materials and in the coming days there will be a resurgence of cholera. "Compared to the earthquake this emergency is very, very critical." Local officials said late on Friday afternoon that the number of dead had risen to 842. Thousands of homes have been destroyed, while more than 60,000 people have entered shelters. The US Navy is sending the USS Mesa Verde to help with the relief effort. The amphibious transport dock ship is carrying food, medicines, baby formula, nappies and first aid supplies. It can also produce 72,000 gallons of fresh portable water each day. There is a surgical team on board and two operating theatres. Across the country, the International Red Cross said tens of thousands of people needed help as it launched a $6.9m appeal. Sky News; Reuters (Global News); NBC News; Global News

Hurricane Matthew could cause US$25-30B in insurance losses
A hurricane threatening the first direct hit on the United States in more than a decade could cause insurance losses of $25-30 billion and be the second costliest U.S. hurricane on record for insurers, according to initial industry estimates. Hurricane Matthew is just off the east coast of Florida near Cape Canaveral, the National Hurricane Center said in an advisory on Friday, after killing at least 339 people in Haiti on its move north through the Caribbean. Data modelling firm RMS has told clients its initial estimates were a 42 per cent chance of a US$20 billion insurance loss and a 26 per cent chance of a $30 billion loss from the hurricane, a source familiar with the research said. Matthew remnants hit Atlantic Canada; wind, rain, flood risk
Parts of Atlantic Canada are set for a massive deluge, courtesy of moisture from Hurricane Matthew. The storm is no longer a hurricane, and its remnants are tracking away from the southeastern U.S., where it caused deadly flooding. Though it will not directly impact Atlantic Canada, it will still bring intense rainfall to areas of Nova Scotia and Newfoundland, where rainfall warnings are in effect. In Nova Scotia, the rain is already falling, moving east to west through the day, ending in the afternoon and evening after bringing a general 40-60 mm. "However over the eastern mainland Nova Scotia and parts of Cape Breton significantly higher amounts are possible and total amounts will likely exceed 100 millimeters in some areas," Environment Canada warns. Wind is also an issue across the Maritimes, with widespread gusts higher than 70 km/h on Monday afternoon. Northumberland Ferries has cancelled crossings between Caribou, N.S. and Woods Islands, P.E.I. until further notice. High winds have also caused restrictions on the Confederation Bridge, and the RCMP warns people to expect delays as they leave the island. Vehicle restrictions are in place for cars with trailers, motorcycles, highsided vehicles, tractor trailers, recreational vehicles, and buses. The Weather Network; CBC News

Why the risk of the 'Big One' in B.C. is heightened every 14 months - 1,000s of tremors — earthquake precursors in slow slip event — are expected on Vancouver Island
Roughly every 14 months, for about a two week period, seismologist Alison Bird won't park underground. That's because she knows the chances are higher of a big earthquake striking. Almost like clockwork, thousands of tiny tremors rumble unfelt across the Pacific Northwest indicating a 'slow-slip' event is taking place. Bird, an earthquake seismologist for the Geological Survey of Canada, says it's something scientists discovered at the office in Victoria when they noticed an unusual pattern on seismograms. "Every 14 months or so there's a sudden reversal of movement [of Vancouver island] for a couple of weeks," she said "It's buckling in that one direction but suddenly it settles a little bit ... it could be a last straw scenario, [where] just that little bit of extra stress that's going to cause that rupture to trigger ... the megathrust earthquake." CBC News

Climate change found to double impact of forest fires - Experts say both Canada and the U.S. must prepare for as western forests across North America grow warmer and drier and increasingly spawn wildfires that cannot be contained
Over the past 30 years, human-caused climate change has nearly doubled the amount of forest area lost to wildfires in the western United States, a new study has found. The result puts hard numbers to a growing hazard that experts say both Canada and the U.S. must prepare for as western forests across North America grow warmer and drier and increasingly spawn wildfires that cannot be contained. "Climate change is playing a substantial role in the variability of fire activity... and we expect that to continue into the future. The question is how are people going to respond to that," said John Abatzoglou, a climatologist at the University of Idaho and lead author of the study published Monday in the Proceedings of the National Academy of Sciences... Overall, they found that the amount of forest area that was dry enough to pose a high risk of wildfire grew by 75 per cent because of climate change, while the length of time during which there was a potential for wildfires grew by nine days per year. A key factor was the dramatic increase in the average dryness of the forest material that fuels wildfires. The analysis showed that just over half of that increase can be chalked up human-caused climate change. Globe and Mail

Uncharted waters: Mega-cruise ships sail the Arctic
A surge in Arctic tourism is bringing ever bigger cruise ships to the formerly isolated, ice-bound region, prompting calls for a clamp-down to prevent Titanic-style accidents and the pollution of fragile eco-systems. Arctic nations should consider limiting the size of vessels and ban the use of heavy fuel oil in the region, industry players said, after a first luxury cruise ship sailed safely through Canada's Northwest Passage this summer. The route, which connects the Atlantic and Pacific Oceans via the Arctic, was once clogged with icebergs but is now ice-free in summer due to global warming... Two shipping executives expressed concern that the one-off trip could become a trend, citing worries over safety, risks to the environment and the impact on small communities, in an area where there is no port between Anchorage

and Nuuk, in Greenland... Were a ship to be in trouble in the Northwest Passage, there would be little authorities could do given the lack of infrastructure, he said... Another concern is environmental. "Potentially, an accident involving a mega-ship could represent an environmental disaster," said Daniel Skjeldam, CEO of Hurtigruten, a cruise ship operator in the Arctic and the Antarctic, whose biggest ships can accommodate 646 passengers. Reuters

Energy East pipeline spill would affect Ottawa's drinking water within 48 hours
A new 30-page technical report commissioned by The Council of Canadians and Ecology Ottawa finds that a spill from the proposed 1.1 million barrel-per-day Energy East Pipeline could have catastrophic impacts on the Rideau, Mississippi and Ottawa rivers and put the region's drinking water at risk... The report by the independent Montreal-based technical firm Savaria Experts-Conseils Inc. finds that a spill in the Rideau River would impact Ottawa and Gatineau's drinking water within 48 hours and a spill in the Mississippi River would impact the drinking water for those cities after about 60 hours. Rabble

NATIONAL SECURITY CONSULTATIONS / CONSULTATIONS SUR LA SÉCURITÉ NATIONALE

The 'New' CSIS Brings Secret Police to Canada - Third in a series to help you participate in the federal consultation on national security
An opinion piece by Michael Vonn, Policy Director of the BCCLA, states "While a democracy can incorporate the need for an intelligence agency to operate with considerable secrecy, there is no place in a democracy for a secret police. Full stop. The Canadian Security Intelligence Service was created to collect and analyze information about threats to national security. It is a civilian agency, not part of the police or military. It operates with a substantial amount of secrecy, like its approximate counterparts the CIA in the U.S. and MI5 in the U.K. Bill C-51, the Anti-terrorism Act from 2015, gave CSIS new powers beyond collecting intelligence on security and disseminating it to relevant sectors of the government. The new law amended the CSIS act so that now, if CSIS has 'reasonable grounds to believe' that an activity constitutes a threat to the security of Canada, it can 'take measures, within or outside Canada, to reduce the threat.'... There has been considerable debate about what kinds of actions ('measures') are authorized under this new law. The government's view is that these new powers do not allow CSIS to arrest individuals. It gives examples of 'threat reduction' that include modifying websites, interfering with communications, disrupting financial transactions and manipulating tools or devices. Leading national security scholars believe that the law would also authorize capture, detention, interrogation and rendition. So, although government stresses that CSIS does not have 'law enforcement powers,' what they could do in the name of threat reduction looks very much like the powers of a secret police." The Tyee

NATIONAL SECURITY / SÉCURITÉ NATIONALE

Feds ban new embassies along Sussex Drive after RCMP flags security concerns
The federal government is forbidding the construction of new embassies on Ottawa's Sussex Drive following a stark RCMP assessment of the potential for "violent events" in the high-profile neighbourhood... Foreign Affairs Minister Stephane Dion was advised of the ban on new embassies in January by Daniel Jean, then his deputy minister, records released under the Access to Information Act show. Jean has since been named national security adviser to the prime minister... In summer 2015 the RCMP began a detailed assessment, at the request of Global Affairs Canada, of how construction of new embassies on vacant lots along Sussex Drive would affect the security of nearby Canadian and foreign facilities. The Mounties looked at "risks associated with violent events likely affecting Canadian and foreign interests," but not scenarios involving espionage or protection of critical infrastructure, such as power grids and water systems, says a letter to Global Affairs from RCMP Chief Supt. Rosemary Abbruzzese."In summary, and after considering a number of factors, the RCMP concludes and recommends that the only appropriate risk response is risk avoidance by not allowing any additional foreign missions to be located on Sussex Drive." Canadian Press (Metro News; iPolitics; Yahoo News); Radio-Canada

Nuances dans la position canadienne de ne pas négocier avec des ravisseurs étrangers
Le Canada exhorte officiellement ses pays alliés a faire comme lui et de ne plus verser de rançons aux ravisseurs. Mais quelle stratégie adoptée quand c'est un pays qui s'empare d'un de nos citoyen sous des prétexte fallacieux comme ce fut le cas tout récemment en Iran pour la canado-iranienne Homa Hoodfar? Interrogé il y a six mois sur la décapitation quelques jours plus tôt aux Philipines d'un premier touriste canadien, John Ridsdel, qui avait été kidnappé par le groupe Abou Sayyaf six mois auparavant, le premier ministre canadien avait martelé le message que le Canada ne paie pas et ne paiera jamais de rançon aux terroristes, directement ou indirectement. De préciser alors le premier ministre : « Nous ne voulons pas qu'un tel financement permette de commettre des actes terroristes contre des innocents. Payer des rançons pour des membres de notre nation mettrait aussi en danger la vie de tous les Canadiens qui vivent, qui voyagent et qui travaillent à travers le monde selon Justin Trudeau. Radio-Canada International

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Is Trudeau Really Revoking Citizenships at Record Rates?
Under Justin Trudeau, the Canadian government has revoked 184 citizenships. According to a CBC report released today, that's nearly as many revocations as the previous 27 years put together. These numbers may come as a surprise to anyone who has heard the prime minister speak on refugee and immigration issues. The CBC story sets Trudeau up as an opponent of citizenship revocation in the context of Bill C-24, which came into force in June 2015, and gave the government new powers to strip citizenship from Canadians convicted of terrorism. But Howard Anglin, former chief of staff to Jason Kenney's immigration ministry from 2011 to 2013, believes the uptick in citizenship revocations has little to do with Bill C-24 or marching orders from Trudeau. Anglin told VICE the jump from an average of 2.4 to 13 revocations per month under Trudeau is likely a holdover from the previous government. Vice News

Government officials were aware of arcane law that stripped Canadians born abroad of citizenship
The Canadian government was aware and warned repeatedly years before an arcane law began stripping longtime Canadians of their citizenship, says a man who spent decades lobbying for change. The law applies to people born between Feb. 15, 1977, and April 16, 1981, no matter how quickly after their birth they moved to Canada. It was rescinded in 2009, but the change didn't apply retroactively. The only way to prevent the automatic loss of citizenship was to apply to retain it before the age of 28 — a detail legal experts contend the government failed to adequately communicate to those affected. Janzen said he has heard numerous stories of people going to citizenship officials and being told they had never heard of the law. Canadian Press (National Post, Ottawa Citizen; Vancouver Sun)

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

IAEA chief: Nuclear power plant was disrupted by cyber attack
A nuclear power plant became the target of a disruptive cyber attack two to three years ago, and there is a serious threat of militant attacks on such plants, the head of the United Nations nuclear watchdog said on Monday. International Atomic Energy Agency (IAEA) Director Yukiya Amano also cited a case in which an individual tried to smuggle a small amount of highly enriched uranium about four years ago that could have been used to build a so-called "dirty bomb"... "This issue of cyber attacks on nuclear-related facilities or activities should be taken very seriously. We never know if we know everything or if it's the tip of the iceberg." Amano declined to give details of either incident, but said the cyber attack had caused "some disruption" at the plant, although it did not prove to be very serious since the plant did not have to shut down its operations. He said he had not previously discussed the cyber attack in public... He said the attack was disruptive, not destructive, a term used to refer to incidents like the 2014 attack that destroyed data on computers of Sony Corp's Sony Pictures Entertainment and rendered some of its internal networks inoperable. Concerns about cyber attacks on nuclear sites have grown in recent years after the emergence of computer malware that can be used to attack industrial controls. Reuters

US required to declassify Yahoo spying order, say experts

he Obama administration "must declassify" a secret court order that forced Yahoo to scan the emails of its customers' emails as part of a surveillance program. The order, first disclosed by Reuters last week, directed the company "to siphon off messages containing the character string the spies sought and store them for remote retrieval" by the intelligence community. But questions remain over exactly how the intelligence community compelled the web giant to carry out the classified order -- specifically if Yahoo was forced to rewrite software at the behest of the order, or use an existing system designed to filter spam, as reported by The New York Times. California-based rights group the Electronic Frontier Foundation said in a blog post that provisions passed by Congress in the wake of the Edward Snowden revelations "require" the government to review the order for potential public release. Ordinarily, secret orders from the Foreign Intelligence Surveillance Court, which authorizes the government's surveillance requests, are never released. But Congress last year passed provisions in the Freedom Act, which replaces parts of the expired Patriot Act, after the government was found to have widely interpreted the law in secret to carry out mass surveillance. "If the reports about the Yahoo order are accurate -- including requiring the company to custom build new software to accomplish the scanning -- it's hard to imagine a better candidate for declassification and disclosure under Section 402," said Aaron Mackey, a legal fellow at the EFF. ZDNet

Data retention supported by two-thirds of Australians: ANU
A poll by the Australian National University (ANU) has found that over two-thirds of respondents support the federal government's telecommunications data retention laws for the purpose of protecting national security.The Attitudes to National Security: Balancing Safety and Privacy -- ANU poll July 2016 [PDF], conducted via a random phone survey of 1,200 individuals between June and July, found that 67 percent thought the retention of communications metadata is "justified as part of the effort to combat terrorism and protect national security". In addition, almost 70 percent approve of data retention for counter-terrorism purposes. ZDNet

LAW ENFORCEMENT / APPLICATION DE LA LOI

Surrey police seek missing woman Kyonghee Kim
Surrey RCMP are hoping tips from the public will help them find a missing 54-year-old woman who was last seen on Tuesday, Oct. 4. Four days later, police found Kyonghee Kim's grey 2012 Hyundai Sonata with B.C. licence plates 334 PXH in Golden Ears Provincial Park in Maple Ridge. She and the vehicle had been reported missing the day before by her family. CBC News

RCMP search Golden Ears Park but few details available
Concern is growing in Maple Ridge this morning after a large police presence in Golden Ears Park. Police had the entrance to the park blocked for several hours on Sunday. The RCMP's Emergency Response Team, along with police dogs were called in. But Ridge Meadows RCMP will only confirm they were carrying out some kind of search. It may be connected to the search for Kyonghee Kim, a 54-year-old Surrey woman missing since Tuesday. Global News

Missing Sask. teen Mekayla Bali believed to be in Vancouver
The mother of a missing teen from Yorkton, Sask. travelled to Vancouver to set up a poster campaign in hopes of finding her daughter. Mekayla Bali, 17, was reported missing by her family on April 12. Mekayla's mother Paula Bali spent one week putting up posters around Metro Vancouver after the RCMP received tips that Mekayla was in the area. According to police, Mekayla was last spotted at a bus depot in Yorkton where she ate lunch at a restaurant but did not buy a ticket or board a bus. Investigators are also looking for a man who may have been with her at the bus depot before she disappeared. CTV News

Police investigate after body found near Burnaby ravine
RCMP investigated the discovery of a body near a ravine in Burnaby Sunday afternoon. Several police vehicles have been in the area of North Road and Lougheed Highway for hours. The area is known to attract local homeless people living along the ravine. Police have not yet confirmed how the person died. CTV News

Creepy clowns no laughing matter: RCMP
Those who wish to participate in the creepy clown phenomenon currently taking place across North America, should reconsider as it could cost them time in prison. “It’s a criminal offence to deliberately alarm, frighten, or threaten people and when we see that, we’re going to investigate it,” said Grande Prairie RCMP Supt. Donnan McKenna. If somebody does commit a criminal offence, you have to remember, wearing a disguise makes it very, very serious: It’s an indictable offence that’s punishable by imprisonment up to 10 years.” McKenna noted that although it’s not illegal to wear a creepy clown mask or costume, he did say if his officers see these clowns on the street they will stop and investigate. “It hasn’t really been an issue here and I think that the tolerance level for that kind of nonsense in Grande Prairie is pretty low,” he said, stressing anyone who feels intimidated by someone wearing a costume should call the detachment. Grande Prairie Daily Herald-Tribune

Regina protesters prepare to gather on Indigenous Day of Action
Protesters say they'll gather at a Husky gas station in Regina Monday to demand action on Indigenous issues. They'll be part of protests across Canada to mark Indigenous Day of Action. Organizers say Indigenous "land and water protectors" will be joined by environmentalists and labour organizers at the gas station on the north end of the city. They want Prime Minister Justin Trudeau to commit to "deeds, not words" when it comes to Indigenous issues... The Husky brand has been in the news lately after a Husky oil pipeline ruptured earlier this year, releasing as much as 250,000 litres of oil and chemicals into the North Saskatchewan River. CBC News

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

The crown jewel of prisons: In search of a new purpose
Having swapped guarded inmates for guided tours, the future of Kingston’s historic penitentiary remains unknown, though full of potential. The Kingston Penitentiary stands idle and empty; an unlikely marker of time, no longer a guardian of secrets but now a custodian of history. There’s a nervousness in the air now— an uncertainty so pervading that even the cool summer breeze of Lake Ontario cannot calm it. Change is coming. As Canada’s oldest and most infamous prison, Kingston Penitentiary, originally called the “Provincial Penitentiary of the Province of Upper Canada,” or the “Provincial Penitentiary,” sits on 8.6 hectares of land located on King Street West in Ontario’s historic City of Kingston. With a sordid past as long as its roll call of famous former inmates, ‘Kingston Pen’ or ‘KP’ as it’s become known to Kingstonians has housed some of the country’s most notorious criminals. For 178 years, this fortress played host to countless thieves, murderers, rapists and the like, ranging from women and children to the infamous Paul Bernardo and ex-Col. Russell Williams. Hill Times

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Cadieux: Embrace pot shops and marijuana

An opinion piece states, "A year into the new post-Stephen Harper era, it doesn't look like much has changed. We've done right by some 30,000 Syrian refugees, and ruffled a lot of feathers with the most recent carbon-pricing initiative, but everything else seems to be business as usual. But one thing that has quickly changed, party because of the Liberal party's platform, is the plethora of medicinal marijuana clinics that have cropped up all over the country, including Ottawa, even though they're not entirely legal – yet… Tetrahydrocannabinol (THC) is the compound responsible for the addictive psychotropic effects one gets from marijuana, and it seems to be causing all the flap. Yet there are other critical compounds in the plant, namely the cannabinoids, which latch onto none other than the body's own cannabinoid receptors within the nervous system and – you guessed it! – relieve pain… Our pharmacopoeia of painkillers is filled with faulty options and bad ideas – addiction and psychotropic side effects included – yet for some reason it's nothing short of a scandal when a medicinal marijuana clinic opens up in a neighbourhood. So how do we handle this new reality, then? We get over it, that's how. And we give it a chance. I am not saying we should all rally around the 4/20 movement, nor am I hopping on the miracle-cure bandwagon, but I am saying that the data are pouring in, and it's hard to deny that the unbiased and objective results collected by our freshly unmuzzled researchers, along with their international counterparts, point in a direction that we should take under serious consideration…" Ottawa Citizen

Ontario's medical pot vaping exemption came from consultations with two people
Ontario's Liberal government defended allowing medical marijuana users to vaporize anywhere by saying they had consulted "very broadly" -- but emails show those consultations involved the input of just two people, The Canadian Press has learned. Ultimately, the associate health minister had to defend the policy for just one day after the government backtracked on the policy within 24 hours… The new e-cigarette regulations banned the use of the devices anywhere regular cigarettes were prohibited. But the government provided an exemption for medical marijuana users, meaning they could have vaped in restaurants, at work or on playgrounds. The exemption became public Nov. 25 and by the next day, Dipika Damerla, then the associate health minister, said that based on the feedback the government had received, they were going back to the drawing board. The government ultimately decided there would be no exemption. Canadian Press (CTV News)

Canadian military to consider leaving sex crimes with civilian courts
The Canadian Forces has launched the first internal review of the military justice system in generations and among the issues being looked at is whether all military sexual crimes should be handled by civilian courts. The military justice system has been under the microscope over the last two years following complaints that many sexual crimes committed by service members have been glossed over or ignored. Currently, such offences can be referred to either civilian court or the military court system for a court martial, depending on the circumstances. But Col. Robert Holman, the Canadian Forces' deputy judge advocate general for military justice, says that could change. Canadian Press (Toronto Star)

UPDATED : Syrian, Feared to Be Planning Bombing, Is Arrested in Germany
The German police arrested a Syrian man early Monday who was suspected of plotting a bombing, bringing an end to a weekend manhunt that renewed fears about a threat posed by extremists among the nearly one million refugees and migrants who arrived in Germany last year. Federal prosecutors said the suspect, Jaber al-Bakr, 22, was "urgently suspected of planning and had already taken concrete steps to plan an Islamic-motivated explosive attack in Germany." Security officials in the eastern state of Saxony said they had found the same explosive materials in the suspect's apartment as those used in Islamic

State attacks in Europe. Jörg Michaelis, president of the police in Saxony, said that Mr. Bakr had been arrested in Leipzig, in the apartment of fellow Syrians who had recognized the man from photographs circulated by the authorities over the weekend. The Syrians tied up the suspect and took a photograph of him with a cellphone, which one of them took to a nearby police station, before urging officers to come and arrest him immediately. New York Times

The Latest: No evidence German bomb suspect had firm target
Federal prosecutors in Germany say there is no evidence a young Syrian man arrested in an alleged bomb plot Monday had picked a target to attack. Federal prosecutors said in a release Monday that police found some 1.5 kilograms of an "extremely dangerous explosive" and other material in the apartment where 22-year-old Jaber Albakr had been staying in Chemnitz. They say Albakr allegedly was "planning an Islamist motivated attack with high explosives in Germany" but so far investigators have no evidence he "already had a concrete target for his bombing attack." They say Albakr had been searching online for instructions on how to make explosives and "equipment for jihad" at least since the beginning of the month. Canadian Press (Yahoo News)

'Like a nuclear bomb,' cholera and destruction after hurricane in Haiti
Patients arrived every 10 or 15 minutes, brought on motorcycles by relatives with vomit-covered shoulders and hoisted up the stairs into southwest Haiti's Port-a-Piment hospital, where they could rest their weak, cholera-sapped limbs. Less than a week since Hurricane Matthew slammed into Haiti, killing at least 1,000 people according to a tally of numbers from local officials, devastated corners of the country are facing a public health crisis as cholera gallops through rural communities lacking clean water, food and shelter… Out on the streets, the scene was also shocking. For miles on end, almost all the houses were reduced to little more than rubble and twisted metal. Colorful clothes were littered among the chaos. The region's banana crop was destroyed with vast fields of plantain flattened into a leafy mush. With neither government or foreign aid arriving quickly, people relied on felled coconuts for food and water. The stench of death, be it human or animal, was everywhere. Reuters

North Carolina flood dangers rise in Hurricane Matthew's wake
Hurricane Matthew is gone, but the disaster its rains unleashed will slowly unfold all this week as rivers across eastern North Carolina rise to levels unseen since many of the same areas were destroyed by a similar deluge from Hurricane Floyd in 1999. Emergency planners are now using models that can pinpoint exactly how high the rivers can get and which buildings will be flooded days in advance. But they can't predict dams and levees breaking from the stress of more than a foot of rain in some places… The storm killed more than 500 people in Haiti and at least 21 in the U.S. — nearly half of them in North Carolina. Most were swept away by flood waters. McCrory and others fear the death toll may rise as impatient people drive around road barricades into swiftly moving floodwaters. Globe and Mail

Italy Expels Tunisian Accused of Supporting Islamic State
Italy says it has expelled a Tunisian man who pledged support to the Islamic State group on his Facebook page and was allegedly planning to go to the Syrian-Iraqi region to fight. Monday's expulsion marked the 122nd person Italy has kicked out since January 2015 on security grounds related to Islamic extremism. Interior Minister Angelino Alfano said the investigation was conducted alongside French authorities because the Tunisian, who came to Italy in 2003, was in touch with an underage Frenchwoman of Italian origin. Alfano said that French authorities had identified him from his activity on a jihadi chat board, adding that he "clearly intended to reach the Syrian-Iraqi theater." A plane carrying the 32-year-old left Palermo, Sicily, on Monday, bringing to 56 the number of people kicked out this year. Associated Press (ABC News)

U.S. Navy ship targeted in failed missile attack from Yemen: U.S.
A U.S. Navy guided missile destroyer was targeted on Sunday in a failed missile attack from territory in Yemen controlled by Iran-aligned Houthi rebels, a U.S. military spokesman told Reuters, saying neither of the two missiles hit the ship. The attempted strike on the USS Mason, which was first reported by Reuters, came just a week after a United Arab Emirates vessel came under attack from Houthis and suggests growing risks to the U.S. military from Yemen's conflict. Reuters

UN chief urges independent investigation of Yemen attacks
Secretary-General Ban Ki-moon on Monday urged the U.N. Human Rights Council to immediately establish an independent body to investigate rights abuses and other violations in Yemen, especially following last weekend's "horrendous attack" on a funeral hall reportedly by the Saudi-led coalition. The U.N. chief told reporters that Saturday's airstrikes in Yemen's capital Saana, which killed over 140 people and injured more than 525 others, were the latest disasters in the Yemen conflict, which has left over 20 million people — "an astounding 80 per cent of the population" — in need of humanitarian aid. "Aerial attacks by the Saudi-led coalition have already caused immense carnage and destroyed much of the country's medical facilities and other vital civilian infrastructure," Ban said. "Bombing people already mourning the loss of loved ones is reprehensible." "This latest horrific incident demands a full inquiry," he said. "More broadly, there must be accountability for the appalling conduct of this entire war." Earlier Monday, U.N. human rights chief Zeid Ra'ad al-Hussein denounced the airstrikes and faulted the Human Rights Council for not doing more in the face of a "climate of impunity" in the impoverished, war-torn country. At one year in power, the Liberals have yet to face a major national security test
An opinion piece by national security expert Wesley Wark states, "The Liberal government, in its first year in power, has enjoyed the benefit of a highly advantageous environment for national security policy making: a majority in Parliament; ineffective political opposition; no terrorist attacks; a public whose attention is largely elsewhere. The pressure has been off and the government has been able to pursue its agenda at a measured pace. (…) A second major promise concerns a millstone left around the new government's neck by the passage of the Harper's government's anti-terrorism legislation (the contentious Bill C-51) in 2015. The Liberals promised to repeal its "problematic elements" and ensure a better balance between security and rights for Canadians. While the Liberal government has signalled

what it thinks the problematic elements are, its caucus may have different ideas and certainly opposition parties do. (…) The most radical promise the Liberals made was to consult Canadians and increase transparency around intelligence and security issues. In fulfilling this promise, the government launched in September a "Green" (discussion) paper on national security, addressing 10 issues about which it encourages public discussion and input. An online portal is open until Dec. 1 and has already seen some 8,000 responses. In addition, the government has consulted with experts and stakeholders; the parliamentary Standing Committee on Public Safety and National Security is touring the country, holding "open mic" sessions; **Public Safety Minister Ralph Goodale** is on the road; and even his officials have been thrust onto the public parapet. How the government will digest and respond to the Green paper exercise remains to be seen. But this is an unprecedented and welcome experiment, whether it succeeds, fails or fizzles." Ottawa Citizen

Anger flares as wildfire-hit Canadian city struggles to rebuild
Some five months after the wildfires that devastated Fort McMurray were extinguished, anger over red tape and the slow pace of insurance payouts and permit issuance is flaring in the remote northern Canadian city. More than 1,900 structures were destroyed by the wildfire last May, which forced the evacuation of about 90,000 residents and shut in more than a million barrels per day of crude output from the area around Canada's oil capital in the province of Alberta. Around 80,000 people have returned, according to Red Cross estimates, but most of those who came back to find their charred houses gutted by the fire have yet to start rebuilding as city officials and insurance companies struggle to deal with Canada's costliest disaster ever. Making the situation worse, the region's harsh winter weather is set to raise construction costs and slow progress in rebuilding even further, residents say. "People are mad and companies are mad, there have been lawsuits filed. Nobody trusts a word the city says," said Kevin Lewis, a local demolition company owner who was forced to leave during the fire but came back to find his house still standing (…) Marc Fortais, recovery team chief of staff for the Regional Municipality of Wood Buffalo (RMWB), which governs the city and local area, said the frustration of resident is understandable. Reuters

Millions participate in annual earthquake readiness drills
More than 19 million worldwide are set to participate Thursday in the Great ShakeOut Earthquake Drills, an annual event that promotes earthquake preparedness. At 10:20 a.m. local time, participants in homes, schools and businesses will practice the "drop, cover and hold on" drill, which involves dropping to the ground, crawling for cover under a nearby desk or table and holding on securely until the earthquake

stops. The ShakeOut began in Southern California and has since grown to include participants across the USA and in Japan, Southern Italy, New Zealand and parts of Canada. USA Today

NATIONAL SECURITY / SÉCURITÉ NATIONALE

Snowden says Trudeau afraid to kill anti-terrorism bill
Whistleblower. Hero. Traitor. Patriot. These words and more have been used to describe former cybersecurity contractor Edward Snowden, who in 2013 copied and distributed thousand of documents to reporters and whose stories of Western intelligence agencies — including Canada's Communications Security Establishment (CSEC) — shook the world. This morning Snowden told the the annual SecTor cyber security conference in Toronto that Prime Minister Justin Trudeau want to amend the controversial Bill C-51 anti-terrorism law and not repeal it because he "is afraid of being attacked for being soft on terrorism." Speaking by video from Russia, where he fled to avoid prosecution by U.S. authorities, Snowden said the legislation, needs three fixes: First, a judicial body should have oversight over federal intelligence agencies that has the power to prosecute authorities that have broken the law. Second, because intelligence agencies are trading personal information of citizens "like baseball cards" citizens should be told if the data sharing hasn't led to an arrest for criminal activity. And finally, what Snowden called the criminalization of speech through vague definitions of terrorism should be taken out of C -51. A lot of what police call terrorism is the activity of what he called "common criminals" or those who are trying to make a political point but don't constitute a "super criminal threat." Customs Tariff Classification Of Hockey Gear Goes To Ultimate Referee: The Supreme Court Of Canada
On September 29, 2016, the Supreme Court of Canada ("SCC") issued a significant judgment on customs tariff classification. As noted in the majority opinion of Justice Russell Brown, Canada (Attorney General) v. Igloo Vikski Inc.1 represents the SCC's first foray into the world of Canada's Customs Tariff - federal legislation that adopts the World Customs Organization's "Harmonized System". The ruling includes an important analysis of the Canadian "General Rules for the Interpretation of the Harmonized System" (the "General Rules"). The Canada Border Services Agency ("CBSA") brought this appeal from a 2014 decision of the Federal Court of Appeal ("FCA").4 That decision overturned a ruling of the Canadian International Trade Tribunal5 ("CITT" or "Tribunal") which had, in turn, upheld the decision of the President of the CBSA to classify goaltender ice-hockey gloves imported by Igloo Vikski Inc. ("Igloo") under heading No. 62.16 of the schedule to the Customs Tariff as "gloves, mittens and mitts" rather than under heading No. 39.26 as "other articles of plastics", as requested by Igloo. Brampton man with bogus Canadian citizenship jailed 15 years for cocaine smuggling at Pearson airport
A Brampton man has been jailed 15 years in a case in which nearly $3 million in cocaine was smuggled into Canada via Pearson International Airport. Bruno Anigwe, 43, was convicted by a jury of importing cocaine, possession for the purpose of trafficking, conspiracy to commit an indictable offence and possession of a counterfeit mark (Canadian citizenship). Co-accused Nestor Nnaji, 43, was acquitted of similar charges in the trial before Superior Court Justice Gordon Lemon in Brampton court. Anigwe was sentenced to a total of 15 years in jail, including 12 years for importing cocaine and an additional three years for the fake Canadian citizenship. Anigwe attempted to appeal his conviction and sentence to Ontario's top court. But, the Ontario Court of Appeal dismissed the case. Brampton Guardian

Feds want review on huge tariff on drywall imports
The federal government is asking for a quick review of anti-dumping duties on drywall imports that have hiked the cost of construction in western Canada. In September the Canada Border Services Agency slapped tariffs of up to 276 per cent on U.S gypsum board or drywall imported from the U.S. for use in B.C., Alberta, Saskatchewan, Manitoba, Yukon and Northwest Territories. The agency said it was responding to a complaint that the products are being sold in Canada at less than normal prices. The

federal finance department has asked the Canadian Trade Tribunal to hold an inquiry on the duties and report its findings by early January. There is some gypsum production in western Canada, but not enough to meet demand, so extra product must be imported from the U.S. CJOB AM 680

Ontario senior booked of 14 child-porn charges
A 71-year-old northern Ontario man has been booked with 14 charges on account of an international child pornographic investigation. Police said search warrants executed at two Sudbury homes, brought to light the seizure of computers alleged of having child pornographic films and has evidences relating to the purchases of the same. 71-year-old Jean Pierre Melaye has been charged with eight counts of possession of child pornography and six counts of accessing child pornography. The investigation also involved the U.S. Federal Bureau of Investigation, Royal Canadian Mounted Police and the Canada Border Services Agency, Sudbury police informed. India Blooms

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Obama's Concerned an AI Could Hack America's Nukes
During his eight years in office, President Barack Obama has seen hackers grow into a threat no president has faced before. US intelligence and law enforcement agencies have responded to everything from a Chinese hack of Google in 2009 to Russian digital meddling in this election. He's learned, as a result, to think a few moves ahead. And that includes preparing for possibilities that others might consider science fiction—like the possibility of an artificial intelligence trained through machine learning and tasked with stealing US nuclear codes. In an exclusive interview with MIT Media Lab director Joi Ito and WIRED Editor-in-Chief Scott Dadich, Obama discusses the possibilities—and possible dangers—of AI. In an era when hackers can steal the fingerprints of 5.6 million federal employees and or pull off a modern version of Watergate, he wonders whether sophisticated adversaries might use AI to infiltrate the government's most sensitive systems (…) This notion of an artificially intelligent hacker or hacking tool is more than prognostication. The Pentagon's Defense Advanced Research Projects Agency is developing AI software for both offense and defense. Wired Magazine (2016-10-12)

LAW ENFORCEMENT / APPLICATION DE LA LOI

Surrey RCMP Constable Dario Devic charged with luring a child
The Criminal Justice Branch (CJB) of the Ministry of Justice announced on Tuesday that a charge of luring a child has been approved against Surrey RCMP Constable Dario Devic as a result of an investigation into conduct that is alleged to have occurred between August 29 and September 7 at or near Surrey. The charge alleges communications during this period between Devic and person he believed to be under the age of 16. It is an offence to communicate by means of telecommunication with a person who is under the age of 16, or who is believed to be under the age of 16, for the purpose of facilitating sexual conduct. On September 9, Surrey RCMP arrested Devic in relation to this matter and laid an information under the Criminal Code charging him with luring a child and breach of trust by a public officer. He was released on bail. The RCMP subsequently sent a report to Crown Counsel to the CJB for formal charge assessment. Indo-Canadian Voice; CBC News

Police Join Forces To Make Human Trafficking Arrests
A joint police effort has resulted in numerous charges in a human trafficking investigation, and the rescue of sixteen victims forced to work in the sex trade. Thirty-six police forces from across Ontario, including Toronto, Halton and Peel, worked on Operation Northern Spotlight, and charged twenty-five suspects with nearly seventy offences. Charges include making and distributing child pornography, child luring and exercise control. Names have not been released. iNews 880; Metro News; Radio-Canada

Des fraudes de type « client mystère » signalées au Nouveau-Brunswick
La Gendarmerie royale du Canada dit avoir reçu des appels à propos d'une fraude ayant cours dans le comté de Charlotte dans le sud-ouest du Nouveau-Brunswick. Des résidants ont reçu de faux chèques par la poste avec une lettre leur demandant de déposer le chèque dans leur compte personnel et

d'acheter des articles pour l'expéditeur. On leur promettait de faire un profit. La GRC signale cependant que dans tous les cas, la victime ne réalise aucun profit et pourrait être obligée de payer quand on découvre que le chèque est un faux. Les enveloppes et les lettres pourraient contenir les mots « Mystery Shopper Survey » ou un autre faux nom de compagnie. Presse canadienne (Acadie-Nouvelle)

Graydon makes push for RCMP recognition
Emerson MLA Cliff Graydon is leading the charge to have Royal Canadian Mounted Police honoured with a day of recognition in the province. Graydon has introduced legislation to make Feb. 1 an annual day in Manitoba to commemorate and show appreciation for the RCMP, and for the work they do to protect and serve Manitobans and people across Canada. The RCMP were first formed on the same date in 1920. "The Mountie and the Royal Canadian Mounted Police are among Canada's most recognizable symbols," said Graydon in a release. "The brave men and women of the RCMP serve Manitobans and all Canadians with distinction and give much in terms of service and sacrifice to our communities. The Carillon

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Researcher Reveals Temporary Prison Releases Benefit Inmates' Return to Society
Carleton University's Maaike Helmus, adjunct research professor in the Department of Psychology, has examined the effectiveness of temporary absences from prison and found they benefit prisoners returning to society. "Temporary absences reduce post-release unemployment, returns to custody and reoffending rates," said Helmus. "There's a dosage effect. The more absences an inmate receives, the better their outcome." The research study, published last week, tracked post-release outcomes of over 27,000 inmates released from federal prison between 2005-2011. Correctional Service of Canada has the power in advance of an inmate's parole eligibility, to allow offenders to receive a Temporary Absence (TA) from prison. These absences can either be escorted or unescorted and can vary in duration. The releases encourage inmates to maintain family and community ties and to take advantage of rehabilitative activities, while supporting a gradual release program. They allow inmates to demonstrate appropriate community behaviour and suitability for additional forms of conditional release. Exchange Magazine

Dennis Oland's lawyer says 'mistake' about jacket not a sign of guilt
Dennis Oland's lawyer says Oland made an honest mistake about what he was wearing the day his millionaire father was bludgeoned to death, and it's unreasonable for the Crown to suggest he was trying to mislead police. Alan Gold told the New Brunswick Court of Appeal Tuesday that Oland was not intentionally lying when he told police he was wearing a navy jacket on the day Richard Oland was killed. The jacket he was wearing, a brown Hugo Boss, was later found to have minuscule blood stains and DNA matching Richard Oland's profile on it. Gold, who is seeking to overturn Dennis Oland's murder conviction, said there was no indication of guilt because of the fact the jacket was taken to the dry cleaners the day after Oland was questioned by police. Canadian Press (Metro News)

Convicted sex offender backs out of school board race after crimes come to light
A convicted sex offender running in the Saskatoon Catholic school board election is no longer on the ballot after dropping out of the race. Denis Robert Hall announced his decision to withdraw his candidacy late Monday in a prepared statement reported by the Saskatoon StarPhoenix. He stated media reports describing his previous sex crimes "misrepresent me and my ancient past in the worst possible light," adding it prevented him from continuing as a candidate. (…) Hall received a full pardon in 1994. According to the 1985 Criminal Records Act, this means the Parole Board of Canada believed he was "of good conduct" and the conviction "should no longer reflect adversely on the applicant's character." CKOM 650

'Internet Black Widow' Melissa Ann Shepard agrees to sign new peace bond
An 80-year-old woman known as the "Internet Black Widow," who gained notoriety for killing and poisoning her intimate partners, has agreed to sign a two-year peace bond at the end of the month. Melissa Ann Shepard appeared briefly during a hearing in provincial court in Dartmouth, N.S., Tuesday morning. The hearing was related to her challenge of 22 conditions imposed on her when she

was released from prison in March after serving a full sentence of just under three years for spiking newlywed husband Fred Weeks's coffee with tranquilizers in 2012 at a bed and breakfast in Cape Breton. He and Shepard had only been married a few days before he fell ill. (…) Shepard is considered a high risk to reoffend by both the police and the Parole Board of Canada. The Crown applied under the Criminal Code to impose special conditions on her freedom. CBC News

New report reveals 'alarming' use of solitary confinement in Ontario jails — 939 days of continuous segregation for one inmate

Nearly one in five inmates in Ontario spent time in a solitary confinement cell over the final three months of 2015, statistics that Ontario's Human Rights Commission said reveals an alarming and systemic overuse of segregation in the province. In a new report released Tuesday, the human rights commission said 19 per cent of all Ontario inmates – or 4,178 people – were in segregation at one point or another between October and December of last year. Nearly half of the prisoners who were placed in segregation, or 1,889 individuals, were segregated multiple times. The report said that nearly 40 per cent of the 4,178 inmates placed in segregation, or 1,594 inmates, had a mental health alert on their file, the human rights commission said. Roughly 1,383 of the segregation placements were for 15 days or longer, they said, including one inmate who had been in continuous segregation for 939 days. (…) The report notes Ontario's use of segregation is much higher than in the federal correctional system, where use of administrative segregation has dropped by nearly 40 per cent since April 2014, the report said. Take-Home Naloxone Program launches in North Battleford

As part of Saskatchewan's expanding Take-Home Naloxone Program, THN kits will be available in North Battleford, starting Thursday. The program is being launched by Prairie North Health Region in partnership with the Ministry of Health, Battle River Treaty Health Centre and Battlefords Sexual Health Clinic. The THN kits will be available free of charge to individuals at risk of an opioid overdose. The kits can be obtained at the Battlefords Sexual Health Clinic between 9:30 and noon on Thursdays. At-risk individuals must first receive education on overdose prevention, recognizing and responding to an overdose and proper administration of Naloxone using the THN kit. The THN kit is then provided to the individuals at risk. Family members and friends are welcome and encouraged to participate in the training. The Battlefords Sexual Health Clinic is located in downtown North Battleford at 1192 – 101 St. Battleford News Optimist

De nombreux appels pour dénoncer les abus de policiers envers les Autochtones

Des dizaines d'Autochtones ont fait de nouvelles dénonciations d'abus commis par des policiers au moyen de la ligne téléphonique mise en place par le gouvernement du Québec pour inciter les femmes autochtones à briser le silence. Les dénonciations qui ont été faites au cours des derniers mois visent des agents de la Sûreté du Québec (SQ), mais également des policiers municipaux et des agents des corps policiers autochtones. Selon nos informations, au moins 75 appels ont été faits à cette ligne téléphonique jusqu'à présent. Les dénonciations proviennent d'un peu partout au Québec. Elles sont faites par des femmes, mais également par des hommes qui ont décidé de briser le silence, ce qui a étonné les représentants des Services parajudiciaires autochtones du Québec. « On ne pensait pas que les hommes avaient eu ce genre d'aventure là. Majoritairement, ce sont des agressions tant physiques que sexuelles […] La brutalité policière, c'est un cas assez fréquent; le harcèlement sexuel, c'est un autre cas. Il y aussi l'intimidation, les policiers font de l'intimidation envers les Autochtones », dit Jean Jolicoeur. Radio-Canada

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS | ENQUETE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINEES

MMIW families still waiting for promised help, Bernadette Smith says
The Manitoba government needs to step up with support programs and services that were promised to families of missing and murdered Indigenous women and girls, says Bernadette Smith, whose sister has been missing for eight years. In unveiling details of the inquiry earlier this year, the federal government said it would allocate $11.7 million over three years for provinces and territories to establish family information liaison units within their existing victims services departments. The units are meant to complement the work of the inquiry by supporting families seeking information about their loved ones from government institutions — including police, prosecutors, coroners and child protection services. (…) Little has been done in Manitoba since the federal money was distributed to the province months ago, said Smith, whose sister, Claudette Osborne, was 21 years old when she disappeared in 2008. "We've had numerous women go missing or be murdered across Canada while they figure this out," Smith said on Tuesday. "They've had a long time to figure this out, and I think it's time for action." (…) A spokesperson for Justice Canada told The Canadian Press that funding for family information liaison units is being directed to the provinces and territories because most of the information families are seeking is held by government institutions, which existing victims services are able to access, while at the same time being regulated by privacy legislation and accountability frameworks. CBC News

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

New poll says Canadians support the idea of independent pot retailers; few support liquor store sales of cannabis
It's going to be a big business: One Bay Street economist figures pot retailers will sell $10-billion a year worth of cannabis products. I've seen estimates that the Canadian market could grow to $20-billion a year. To put that in perspective, Statistics Canada says Canucks bought $9-billion worth of beer 2014-2015. So this cannabis market could be bigger than beer! So where are we going to buy these cannabis products? Right now, the only legal way to acquire cannabis products is by mail from a licensed producer. Purchasers need a prescription. But there's a booming market — grey at best, black at worst — of what are called pot dispensaries, storefront operations where you can walk in and — so long as you've got an easily acquired prescription — buy what you need. I'll introduce you to some of these independent pot retailers in my piece today. Now, as if right on cue, Vancouver-based pollster Insights West is out today with a survey of the attitudes of Canadians about pot retailers and other cannabis issues. Some findings: 36 per cent of all Canadians say they're cool with pot being sold in stand-alone stories set up for the purpose of selling cannabis products versus 29 per cent who think it should be sold in drugstores or pharmacies, while 16 per cent think selling pot products is a job best left to liquor stores or other outlets where alcoholic beverages are sold. National Post

Cannabis performance metrics: public safety
Public Safety Canada (PSC) recently released "Cannabis Performance Metrics for Policy Consideration: What do we need to measure?" For a concise synopsis of the report, I recommend this recent piece for Lift ' by Jenna Valleriani. The report is a great first step by PSC to identify measurement and evaluation (M&E) opportunities and needs in the cannabis industry. The Trudeau government would be wise to heed their advice and invest in M&E prior to legislation in the Spring of 2017. Tracking the landscape prior to, during and post-legalization will allow them to measure whether their policy changes are having the desired effect. It will have the further benefit of strengthening the results for dissemination (positioning the Canadian government as a world leader in effective public safety policy). Below is an overview of the first of four categories outlined in the report. The first category is Public Safety; it is comprised of 18 subcategories, which have been sorted for analysis into four buckets: Law & Order, Personal Use Trends, Production, and Transportation & Point-of-Sale. Bangladesh says 3 men funded deadly Dhaka restaurant attack
A counterterrorism official says Bangladesh has discovered who funded the July 1 attack in which a group of assailants tortured and killed 20 hostages at a restaurant in Dhaka. The police counterterrorism chief, Monirul Islam, says the $101,606 in financing came from three Bangladeshis, including a pediatrician who fled with his family to Syria to join the Islamic State. Islam on Tuesday identified the other financiers as a retired army major who donated his pension and savings and a man who donated proceeds from a Dhaka apartment sale. Both were killed in police raids. Islam said the three belonged to the banned militant group Jumatul Mujahedeen Bangladesh, or JMB. The IS claimed the responsibility for the July 1 attack, but Bangladesh's government insists the JMB was behind it. Global News

Syria's Aleppo calms down after Russia halts airstrikes
Syria's northern city of Aleppo calmed down on Tuesday, as Russia has halted airstrikes in the city, a security source said. The sky over hard-hit Aleppo has never been so tranquil for a long time, Xinhua news agency quoted the source as saying. Russia announced airstrikes on rebel-held areas in eastern Aleppo have been halted from 10.00 a.m. (local time) on Tuesday, as a prelude to an eight-hour humanitarian truce in the city, which will enter into force on Thursday. The Thursday truce could see the evacuation of hardline rebels of the Jabhat Fateh al-Sham, previously known as the Al Qaeda-linked Nusra Front. The truce and the rebels' evacuation are believed to be the outcome of a recent meeting in Lausanne, Switzerland, where world powers Moscow and Washionton sought to broker a humanitarian pause and eventual political solution to the crisis. The Russian air force and the Syrian army recently upped their offensives in Aleppo in order to banish the rebels from the east of the city. The Syrian government has issued multiple statements that urged the rebels to leave eastern Aleppo and promised them a safe passage to the rebel-held city of Idlib. Can-India

Mosul battle: EU 'should prepare for returning jihadists'
The EU should be prepared for returning jihadists if the so-called Islamic State (IS) is driven out of its Iraqi stronghold, Mosul, an official warns. Security Commissioner Julian King said even a small number of militants would pose "a serious threat that we must prepare ourselves for". Iraqi forces say they have captured 10 villages near Mosul since beginning their long-awaited offensive on Monday. As many as 5,000 IS fighters are believed to remain in the city. BBC News

Midway through releasing a series of damaging disclosures about U.S. presidential contender Hillary Clinton, WikiLeaks founder Julian Assange says his hosts at the Ecuadorean Embassy in London abruptly cut him off from the internet. The news adds another layer of intrigue to an extraordinary campaign. "We can confirm Ecuador cut off Assange's internet access Saturday, 5pm GMT, shortly after publication of Clinton's Goldman Sachs (speeches)," the group said in a message posted to Twitter late Monday. Associated Press (CTV News)

Racial profiling, by a computer? Police facial-ID tech raises civil rights concerns
The growing use of facial-recognition systems has led to a high-tech form of racial profiling, with African Americans more likely than others to have their images captured, analyzed and reviewed during computerized searches for crime suspects, according to a new report based on records from dozens of police departments. The report, released Tuesday by the Center for Privacy & Technology at Georgetown

University's law school, found that half of all American adults have their images stored in at least one facial-recognition database that police can search, typically with few restrictions. The steady expansion of these systems has led to a disproportionate racial impact because African Americans are more likely to be arrested and have mug shots taken, one of the main ways that images end up in police databases. Washington Post

Why aren't the candidates talking about the next security crisis?
An opinion piece states "As we prepare for the final presidential debate of 2016, with its inevitable clashes over Donald Trump's alleged groping of women and the latest WikiLeaks revelations involving Hillary Clinton, let's pretend for a moment that we are in an alternate universe where the American people are choosing a commander in chief who may have to lead our nation through an unprecedented — and unanticipated — national-security crisis (…) I asked a number of leading national-security experts what question they would ask the candidates — a question that no one is asking today but that could come to dominate the next president's term in office. Their answers are fascinating — and terrifying. Several pointed to Pakistan as the epicenter of the next major international crisis. "Pakistan is making nuclear weapons faster than any other country on earth as its society becomes more violent, more radicalized, and more anti-American," said former CIA and National Security Agency director Michael Hayden." Opération policière contre l'esclavage sexuel : 32 personnes accusées au Canada

Une descente policière coordonnée entre 53 services de police canadiens et le FBI a permis d'arrêter 32 personnes relativement à l'exploitation sexuelle et la traite de personnes au Canada, indique le service de police de Winnipeg. L'opération Northern Spotlight a comme objectif de s'assurer du bien-être de jeunes femmes qui peuvent être victimes de traite humaine et qui auraient été forcées de se prostituer. La police de Winnipeg, qui a participé à l'initiative, dit que la descente coordonnée qui s'est déroulée sur six jours en octobre a permis de venir en aide à 16 personnes à travers le pays qui avaient été forcées de travailler dans l'industrie du sexe. Plusieurs des victimes avaient moins de 16 ans. Les accusés font face à un total de 78 chefs d'accusation, dont des chefs pour agression, traite de personnes, séquestration, production et distribution de pornographie juvénile... En plus du FBI, 36 services de police ontariens et 18 autres services de police canadiens incluant la Gendarmerie royale du Canada ont participé à l'opération Northern Spotlight. EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Southern Nova Scotia still thirsty after last week's rain
Even after rain pounded Nova Scotia last week and flooded Cape Breton, southern parts of the province remain parched and hundreds of wells are still dry, according to municipal officials in Argyle and Barrington... Many people are still getting drinking water from search and rescue organizations and taking showers at schools. People are also bringing home large plastic boxes filled with water to allow them to flush their toilets. Normally those boxes are used to transport fish. CBC News

Heiltsuk First Nation calls tugboat sinking near Bella Bella 'environmental disaster' as clean-up efforts continue
The Heiltsuk First Nation caught in the middle of a diesel spill near Bella Bella is sounding the alarm and calling the situation an "environment disaster." The tugboat Nathan E. Stewart with more than 59,000 gallons of diesel fuel onboard sank at the entrance to Seaforth Channel, west of Bella Bella after running aground Thursday morning, causing booms and oil skimmers to be deployed. The barge that the tug was carrying was empty of cargo and has since been moved to a safe anchorage. Heiltsuk First Nation Chief Councillor Marilyn Slett says the spill is devastating the clam beds that the community relies on for income. Slett says only 6,554 gallons of the 59,924 gallons of diesel onboard the tug were able to be pumped from the vessel before it sank. She says since then, the sunken vessel has been leaking diesel into an area of enormous ecological, economic and cultural significance to the Heiltsuk Nation. Slett says spilled diesel has already fully blanketed the most important clam beds in Heiltsuk Territory. Global News

Sydney flood-contaminated items not safe for 'garbage pickers'
Some people make a hobby, or even a small income, from picking household items out of garbage left at the curb and fixing them up to sell. But these "garbage pickers" are now being warned off hauling away home goods that were contaminated with sewage or furnace oil during the Thanksgiving Day flood in Cape Breton Regional Municipality. Flood victims have been told to leave all their damaged or destroyed items on the curb for special collection, to prevent disease or mould inside their homes. "It's well known that sewage contains many different types of biological agents," said Bill Rideout, the acting manager of environmental health with the Nova Scotia Department of Environment. CBC News

Environment Canada confirms tornado hit Stayner, Ont. Monday
Environment Canada has confirmed that a tornado touched down in Stayner, Ont., about 130 kilometres northwest of Toronto, on Monday afternoon. Investigators are still working to determine the strength of the tornado, which landed around 4 p.m. in the community near the southern tip of Georgian Bay, uprooting several trees and overturning a trailer, the agency said on Tuesday. CBC News

Canada-bound plane crashed in Pennsylvania
A small airplane that lost contact with flight controllers while flying from Virginia to Canada has been found crashed in north-central Pennsylvania, with all three occupants killed... The Federal Aviation

Administration says the Canadian-registered Piper PA-28 took off from Richmond International Airport in Virginia. It was headed to St. Catharines/Niagara District Airport when the wreckage was found Late Monday. The coroner says the plane was found crashed in Keating Township in southern Potter County. That's about 150 miles northeast of Pittsburgh. Potter County borders New York. The FAA lost contact with the flight over Potter County about 7 p.m. Saturday. The National Transportation Safety Board is heading the crash investigation. Associated Press (Winnipeg Sun; Toronto Sun; Ottawa Sun; Edmonton Sun; Calgary Sun)

NATIONAL SECURITY CONSULTATIONS / CONSULTATIONS SUR LA SÉCURITÉ NATIONALE

We Need A Human Rights-Based Approach To National Security
A blog post by Amnesty International Canada Secretary General Alex Neve states "Human rights or security? In Canada and around the world the debate rages on; but it is an utterly false debate. We must, finally and firmly, reject the assumption and assertion that more of one necessarily leads to less of the other. There is no security without human rights (…) This week the federal government's review of Canada's national security framework has begun in earnest. The House of Commons' Public Safety Committee is holding hearings in five cities from coast to coast. Ministers Goodale and Wilson-Raybould are holding a roundtable in Ottawa with civil society groups. Members of Parliament are conducting town-halls in their ridings. And Canadians in all corners of the country are being encouraged to take part in online consultations. Amnesty International has been researching, reporting and campaigning on the grim human rights toll of unjust national security practices around the world, including in Canada, for decades. We have highlighted that without security, human rights remain precarious (…) At the same time we have demonstrated time after time that human rights violations stand to deepen insecurity. Allowing torture, discrimination or unfair trials as part of a counter-terrorism strategy creates more victims, fosters resentment and deepens divisions. There is no long-term security down that road. Canada can chart a different course, and that can start now by making a clear choice to develop and adopt a human rights-based approach to national security. There are three main components. Huffington Post

NATIONAL SECURITY / SÉCURITÉ NATIONALE

Why are three of the world's richest countries doing so little to stop corruption?
One of the best-known data points in the anti-corruption field is the estimate from Global Financial Integrity that US$ 1.1 trillion in proceeds of corruption, crime and tax evasion are taken from developing countries every year and invested in Western banks, real estate, and luxury goods… If you've ever found yourself wondering how this scale of pillage is possible, the most recent round of reports from the Financial Action Task Force has the answer. The Financial Action Task Force (FATF) is the world's anti-money laundering standard-setter. Every seven years FATF assesses how much each of its 180 member countries has done to stop dirty money from being used to buy real estate, high-end cars and other luxury items, or be deposited into a bank account. In other words, how good is a country at preventing itself from aiding the corrupt. Recently released reports on Austria, Canada and Singapore show how the corrupt have few roadblocks to parking and spending cash in these three countries. Similar to previous reports, the latest batch received limited media coverage aside from on specialist websites… Following a Supreme Court decision in 2015, the Proceeds of Crime (Money Laundering) and Terrorist Financing Act and its regulations were found to breach attorney-client privilege insofar as record-keeping, client identification and verification, and compliance inspection by Canada's Financial Intelligence Unit (FINTRAC) were concerned. The Government had previously withdrawn the reporting requirement for the law profession following injunctions by law societies. Though lawyers are subject to anti-money laundering rules set by Canadian law societies, according to the FATF the exemption of lawyers from federal legislation "constitutes a serious impediment to Canada's efforts to fight money-laundering" Transparency International

The Liberals after Year One - A mixed report card, but only themselves to blame

An opinion piece states, "Is it fair to judge a government only a year after an election? If the government in question made 325 promises during the campaign, as the Liberals did, then yes. Given our four-year election cycle, they had better be one-quarter of the way through checking off their pledges. Of course, only a deliverology guru could calculate this for sure. So let's just do a quick fly-by:... Indigenous Affairs - A "renewed nation-to-nation relationship" was among the government's most significant promises to Indigenous Canadians. Some things did happen: budget funding of $8.4 billion over five years is coming, and an inquiry is underway into missing and murdered indigenous women. Not accomplished: equal funding for First Nations children... Security - Canadians still haven't seen the changes coming to the "problematic" anti-terrorism act, Bill C-51. But there will be an all-party national security oversight committee and there are broader security consultations... Justice - The government spent the first half of the year wrestling down assisted-dying legislation. Now, disarray looms on the legalized-marijuana file. A task force will report, legislation will emerge - and meanwhile, illegal pot shops have sprung up with impunity..." Postmedia Network (Ottawa Citizen)

Progress report on Justin Trudeau's election campaign promises, one year later

An opinion piece states, "When it comes to keeping promises, Canadians know full well that politicians are not at all like Horton, the Dr. Seuss character who "meant what I said and I said what I meant: an elephant's faithful, 100 per cent." They make many promises to win elections, but often find it impossible to deliver on them once they take office... Here's a look at the main ones: Promises Kept - ...Launch a national inquiry into missing and murdered indigenous women. Create a parliamentary oversight committee on national security operations... Repeal Conservative legislation that allowed the government to revoke the citizenship of dual citizens convicted of terrorism, treason or espionage. In Progress - Legalize marijuana. A task force is to report by Nov. 30 and the government is promising legislation next spring... Amend controversial anti-terrorism legislation passed by the previous Conservative government. The government has launched consultations and is in the process of creating a parliamentary oversight committee on national security... Still to Come - Create an office of counter-radicalization to deal with the phenomenon of home-grown extremists..." Cape Breton Post

CATSA extends airport screening contracts

The federal agency in charge of security at Canada's airports has renewed screening contracts with three private-sector firms, GardaWorld, Securitas and G4S. The Canadian Air Transport Security Authority says the total value of the contract extensions is about $2.6 billion. They'll run from April 2017 through March 2022. CATSA says GardaWorld will receive contracts worth about $1.4 billion for 28 airports in Ontario, the three Prairie provinces and Northwest Territories. Securitas Transport Aviation gets contract extensions worth $632 million for Quebec and the four Atlantic provinces, while G4S Secure Solutions gets extensions worth $510 million for British Columbia and Yukon Territory. Canadian Press (Brampton Guardian)

Screening at Canadian airports should be faster, smarter and safer

An opinion piece by Senator Colin Kenny, former chair of the Senate Committee on National Security and Defence, states, "If you've flown anywhere in Canada recently, you will have noticed that wait times are getting worse. Since 2013, the length of screening times has deteriorated so badly that the Canadian Airport Council referred to security screening services as a being in a state of crisis. Not only are we waiting more, we are paying more. And getting less service... While it's annoying to wait in long lines, more important is the security risk these lines pose. A new wave of terrorist attacks on airports in Moscow, Brussels and Istanbul have all occurred between the sidewalk and the security inspection line. Instead of viewing screening lines as an annoyance, officials should see these lengthening lines as a soft spot for terrorists. Another problem with airport security highlighted in David Emerson's 2015 Review of the Transportation Act, is the strange restrictions faced by CATSA. Essentially, CATSA has no control over security screening policy. This has led directly to poor service and long wait times. Emerson recommends adopting the U.S. model wherein a single "agency has responsibility for both regulatory oversight and operations"... But perhaps the greatest failing of the Canadian model is with our trusted traveller program: NEXUS... NEXUS cardholders are also offered a special line at security screening. The problem is, it's not that special. NEXUS users are still forced to submit to the same cumbersome screening procedures as other passengers. The question is: If our border officials allow these pre-screened travellers to enter the country quickly and safely, why doesn't the same practice apply at airport

security? Replacing this "one-size-fits-all" approach to passenger screening with a risk-based, intelligence-driven approach was a key recommendation in the Emerson review..." Postmedia Network (Montreal Gazette)

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Fliss Cramman doesn't think she would survive deportation to U.K.
A hospitalized 33-year-old woman facing deportation from Nova Scotia to the U.K. says she's terrified of what could happen to her if she's forced out of Canada. "I've been here 25 years of my life. My kids are here, my family is here, everything I know is here," Fliss Cramman said Tuesday from her room in Dartmouth General Hospital... A hospitalized 33-year-old woman facing deportation from Nova Scotia to the U.K. says she's terrified of what could happen to her if she's forced out of Canada. "I've been here 25 years of my life. My kids are here, my family is here, everything I know is here," Fliss Cramman said Tuesday from her room in Dartmouth General Hospital. Cramman was released on parole in June, but immediately arrested by the Canada Border Services Agency to start the deportation process. She's been under guard in hospital since August, when she suffered a perforated bowel and needed multiple followup surgeries due to complications. For several weeks, Nova Scotia corrections officers kept Cramman shackled to her hospital bed. She was unchained after Nova Scotia Justice Minister Diana Whalen intervened... According to the Elizabeth Fry Society, Cramman became a ward of the court around age 12, but no one secured her Canadian citizenship. According to documents from the Parole Board of Canada, Cramman suffered from the effects of violence and alcoholism in her home. As a minor, she also suffered violent sexual abuse outside her home. The Elizabeth Fry Society said Cramman is being punished by a system that was supposed to care for her... Halpern said Cramman is at risk of being deported next month, despite the fact her surgeon and health-care team believe it's essential for her to stay in Canada for a year to follow up on her medical care, including a colostomy reversal procedure... ramman lost her health coverage when she was placed under an immigration removal order. The Canada Border Services Agency will only pay for medical expenses while she's in custody. CBC News

2 men charged with conspiracy to smuggle person across St. John River
Two New Brunswick men have been charged with conspiracy to smuggle a person across the Canada-United States border in the northwest of the province. A 67-year-old man from Edmundston and a 50-year-old man from Baker Brook appeared in Edmundston provincial court on Oct. 17. The incident that incited the charges took place in July. Authorities were made aware of a 46-year-old woman who crossed into the United States illegally across the St. John River using a paddle boat. The woman, a citizen of Ecuador, was apprehended in Van Buren, Maine. She is still in the United States. The two men charged were arrested by the RCMP on July 28. CBC News

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

B.C. auditor general warns info on government mobile devices at risk
British Columbia's auditor general says appropriate security controls are not always in place for thousands of mobile devices used by government employees, putting sensitive information at risk. Carol Bellringer says there is no central record of devices such as smartphones and tablets and that's concerning because information can't be protected without an inventory of the equipment being used. Bellringer has issued a report on security of mobile devices used by the Office of the Chief Information Officer and five ministries with the highest security risks. She says any loss, theft, or exposure of information accessed via mobile devices could have serious implications for the government and B.C. residents. Globe and Mail

Businesses cooperate with government mass surveillance at their peril, says Edward Snowden
Resisting government mass surveillance isn't just the right thing to do - it's good for business, whistleblower Edward Snowden told a Toronto cybersecurity conference Tuesday. Speaking via video

link to the annual Canadian industry event SecTor, Snowden brought up the recent revelation that Yahoo! Inc. had agreed to scan customer's emails for U.S. intelligence... nowden cited Open Whisper Systems, which makes the encrypted messaging app Signal, as an example of an organization that benefited from pushing back against a government request for cooperation in a surveillance program. With the help of the American Civil Liberties Union, Open Whisper Systems fought a gag order on a subpoena for information associated with two phone numbers.

Ultimately, Open Whisper Systems had comply with the subpoena, but the damage was mitigated because of another Snowden-approved policy: Only retaining as much personal data as absolutely necessary. The subpoena asked for browsing history and tracking data stored in web browsers, but Signal doesn't collect that information... Snowden questioned whether mass surveillance programs are beneficial to national security in the first place, citing reports by a review board appointed by U.S. President Barack Obama and the U.S. Privacy and Civil Liberties Oversight Board that found the mass collection of telephone records had failed to contribute significantly to any terrorism investigations. He argued there's no reason why tech and telecom companies should be required to build so-called back doors into their products to help law enforcement retrieve information. Postmedia Network (National Post)

LAW ENFORCEMENT / APPLICATION DE LA LOI

De nombreuses dénonciations d'abus de policiers envers les Autochtones
Des dizaines d'Autochtones ont fait de nouvelles dénonciations d'abus commis par des policiers au moyen de la ligne téléphonique mise en place par le gouvernement du Québec pour inciter les femmes autochtones à briser le silence. Les dénonciations qui ont été faites au cours des derniers mois visent des agents de la Sûreté du Québec (SQ), mais également des policiers municipaux et des agents des corps policiers autochtones. Selon nos informations, au moins 75 appels ont été faits à cette ligne téléphonique jusqu'à présent. Les dénonciations proviennent d'un peu partout au Québec. Elles sont faites par des femmes, mais également par des hommes qui ont décidé de briser le silence, ce qui a étonné les représentants des Services parajudiciaires autochtones du Québec. Radio Canada

Culture of fear prevents Indigenous victims of police brutality from reporting alleged crimes
At least 75 Indigenous men and women have come forward to report incidents of police brutality, intimidation and other mistreatment by Quebec police officers since the provincial government launched a tip line in April. But the people taking those calls worry a culture of fear is preventing many alleged victims from making formal complaints to police. The tip line was set up after Radio-Canada's investigative program Enquête uncovered stories of sexual violence by Sûreté du Québec officers toward Aboriginal women in Val-d'Or, about 600 kilometres northwest of Montreal. Managers of the tip line have received calls from across the province, from both men and women, complaining of abusive behaviour by SQ officers as well as members of Indigenous and municipal police forces. CBC News

Police help 18 women believed to be involved in Windsor sex trade
Numerous charges have been laid by police in Ontario following a national investigation to stop human trafficking, while providing information to people involved in the sex trade. Operation Northern Spotlight was a five-day investigation in early October that involved 36 police services across the province... n Windsor, police spoke to 18 women believed to be involved in the sex trade industry. Those women were from cities across Ontario and the United States, and they ranged in age from 20-40 years. All were provided safety plans and resources to exit the sex trade. It is not known how many accepted the help from police and service agencies. Across the province, police also interviewed 16 people who were working in the sex trade as a minor against their will. Police provided information and attempted to connect them with agencies in the community to help remove them from the sex trade. According the to OPP, a total of 207 police officers in Ontario and support staff engaged with 199 people and offered them information and contacts with community-based support agencies. CBC News

9 Manitobans charged in 'semi-organized' thefts across Western Canada
Nine Manitobans face numerous charges and 11 more people are wanted after police recovered more than $300,000 in stolen goods - including RCMP uniforms, camper trailers and blank passports - from a "semi-organized" crime ring spanning the four western provinces. Winnipeg police say 20 suspects have been identified in connection with Project Heavy Metal, a "complex stolen property investigation" that began late last year. The investigation targeted a number of break-ins and thefts in Winnipeg and the surrounding area, but investigators found some of the suspects were also active in Saskatchewan, Alberta and British Columbia, said Insp. Barry Kostchuk... The Winnipeg Police Service worked with the Calgary and Edmonton police services and the RCMP in the investigation. CBC News

Police arrest seven people from two organized crime rings in ATM thefts
Alberta police services have arrested seven people from two organized crime rings involved in ATM thefts, which have affected more than 60 communities across the province. ALERT said in the first six months of 2016, there were more than 130 instances of ATM thefts at banks, credit unions, gas stations and convenience stores. At an ALERT press conference Tuesday morning, Staff Sgt. Dave Knibbs says both groups targeted "small town Alberta" and terrorized rural communities. A total of 101 charges have been laid against the seven suspects. Postmedia Network (Edmonton Journal; Edmonton Sun; Calgary Sun); CBC News

IHIT charges 27-year-old man in connection with Langley homicide
27-year-old Jason Wallace has been arrested and charged with second-degree murder in connection with the homicide of Robert Green on Oct. 16. RCMP arrested Wallace at 152 Street and 71A Avenue in Surrey. He is currently in custody. Police said Wallace was not affiliated with the Hells Angels. Investigators are appealing to the public for information about the death of a 56-year-old Burnaby man who was a senior member of the Hells Angels. Around 10:30 a.m. Sunday, RCMP were called to the 23700-block of 72 Avenue in the Township of Langley, where a male victim was found suffering from severe injuries. Despite the best efforts of first responders, the victim died of his injuries at the scene soon afterwards, and the Integrated Homicide Investigation Team (IHIT) took over the investigation. Police have determined the homicide was targeted and not random, and are continuing to gather information. Global News

Elderly Bonnyville man's death was a homicide, RCMP say
Police said the death of an elderly man found in a Bonnyville home has been ruled a homicide. Bonnyville RCMP officers responded to the report of a death at a residence at about 1:30 p.m. Sunday. An autopsy Tuesday determined the case was a homicide. Police had been looking for a truck that was believed to belong to the deceased man. They said they found the missing pickup on the Kehewin Cree Nation, which is located about 20 kilometres south Bonnyville. The RCMP major crimes unit was leading the investigation. Edmonton Journal

Dressing up as clown illegal if you harass or intimidate public, say Airdrie RCMP
While it's not illegal to dress up in costume, Airdre RCMP are reminding anyone thinking of smearing pancake makeup on their face to remember to only do it in "good fun."... She said anyone who does that

could face criminal code charges, including mischief, causing a disturbance or uttering threats. CBC News

Charlottetown police searching for travelling diamond thieves
A surveillance image shows two individuals suspected of stealing approximately $20,000 in diamonds from a Charlottetown jewelry store last week. City police are asking anyone able to identify the two to come forward. Thieves swap "useless stones" for $20,000 in diamonds A Charlottetown jewelry store is victim to a brazen swap that netted thieves two diamonds valued at about $20,000... Charlottetown Deputy Police Chief Gary McGuigan says police believe the pair is the same two people wanted for a similar incident in Saint John, N.B. where a diamond worth $10,000 was stolen from W. Smith and Co. Fine Jewellers on Oct. 7. The store, which police are not naming, was hit last Wednesday. Guardian

Driver flees crash scene involving stolen car on P.E.I.
A young man crashed a stolen car into the ditch near Mount Stewart Monday, then took off. Now Queens District RCMP is asking for help finding that man. A 911 call came in about 5 p.m. Monday, Oct. 15, from a resident reporting that a vehicle had just gone into the ditch near his residence on Route 351 in Mount Stewart. "The caller saw a young male running away from the vehicle, through a field and then towards the river in Mount Stewart," said a police report issued Tuesday... The Police Dog Service was called in was not able to locate the suspect. Guardian

Graydon makes push for RCMP recognition
Emerson MLA Cliff Graydon is leading the charge to have Royal Canadian Mounted Police honoured with a day of recognition in the province. Graydon has introduced legislation to make Feb. 1 an annual day in Manitoba to commemorate and show appreciation for the RCMP, and for the work they do to protect and serve Manitobans and people across Canada. The RCMP were first formed on the same date in 1920. The Carillon

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Rights commission decries 'shocking' Ontario solitary-confinement numbers
Ontario's solitary-confinement cells are stocked with a "shocking" proportion of inmates who have mental-health issues, medical problems or other health challenges, including one prisoner who has spent more than four years in isolation, according to figures released by the Ontario Human Rights Commission... The commission requested the figures last January to help inform its submission to an internal review of segregation practices the province has been conducting for the past 19 months. It did not intend to make them public. But when Chief Commissioner Renu Mandhane finally saw the data, she decided it was so alarming as to warrant broader interpretation. "Given these shocking numbers, the OHRC again calls on the government to eliminate the use of [segregation]," states a commission submission to the province released on Tuesday... The commission, however, told reporters during a technical briefing on Tuesday that the numbers capturing the duration of segregation placements may mask on-the-ground practices. Every time an inmate is transferred, their total segregation counter is reset to zero. The resetting of segregation clocks was found to be a factor in the deaths of Ashley Smith and Eddie Snowshoe, two federal inmates whose deaths in solitary-confinement cells three years apart galvanized public support for segregation reform across the country. The federal correctional service has since phased out the practice. Globe and Mail; CBC News

Glen Wareham inquest hears inmate pushed system 'beyond its limit'
The first goal of the Shepody Healing Centre in dealing with Glen Edward Wareham was to protect him from himself, an inquest into the inmate's was told on Tuesday. Louis Blanchard, an institutional psychologist in Dorchester, testified he started working with Wareham in May 2007 and stated that all treatment options for Wareham had been exhausted and staff at the Shepody Healing Centre were mainly waiting for Wareham to be transferred elsewhere by the Correctional Service of Canada. Wareham, 28, from New Waterford, N.S., died in hospital in Moncton in 2010 from complications from self-harm. He was an inmate at the Shepody Healing Centre, which is a mental health facility for

prisoners operated by the Correctional Service of Canada. Chief Coroner Gregory Forestell is presiding over an inquest into Wareham's death in Moncton. CBC News

Dennis Oland murder appeal hears concerns from top judge about trial
New Brunswick's top judge expressed concerns during Dennis Oland's appeal of his murder conviction on Tuesday about how the trial was conducted last year. But Court of Appeal Chief Justice Ernest Drapeau stopped short of saying those concerns would be enough to overturn Oland's conviction in the 2011 bludgeoning death of his father, multimillionaire Richard Oland. Drapeau was responding to defence lawyer Alan Gold's suggestion that lead Crown prosecutor P.J. Veniot may have crossed a line in his remarks to the jury by speculating about what transpired between Dennis Oland and his father. CBC News

Ontario pathologist contradicts 2012 testimony at ex-judge Jacques Delisle's bail hearing
A forensic pathologist called to testify at the bail hearing for Jacques Delisle — the only judge in Canada to have gone to prison for first-degree murder — says the bullet that killed Delisle's wife entered the left side of her skull at a 90-degree angle, testimony that differs radically from the evidence at Delisle's original trial. CBC News

Reducing solitary confinement doesn't need more study. It needs action
An opinion piece states, "Ontario Corrections Minister David Orazietti actually said this on Monday, about his government's overuse of solitary confinement in provincial prisons: "After a thorough internal review and extensive consultations with a broad range of experts, it is becoming apparent to me ... that a more thorough and comprehensive review into the complex nature of the corrections system in Ontario needs to be conducted."... The United Nations, for instance, says putting a healthy, adult prisoner in solitary for more than 15 days in a row is a form of torture, and that it should never be used on youths and mentally ill inmates. Howard Sapers, the federal prisons ombudsman, says the maximum time in solitary should be 15 days. The Ontario Human Rights Commission has called for a complete ban on solitary in Ontario prisons. The union representing Ontario corrections workers says segregation is no place for inmates with mental illness, and that the province should build separate facilities for them. In January, President Barack Obama banned solitary for juvenile offenders in U.S. federal prisons... There is no question that corrections systems are complex. But the issue of solitary confinement is not. It is abusive, and it harms inmates suffering from mental illness, making it harder for them to rejoin society when their sentences are complete. Mr. Orazietti can request all the studies he wants, but it won't hide the fact that Ontario's perpetual inaction on solitary confinement is failing not only inmates but also the broader public." Globe and Mail

Traite de personnes : un projet de loi pour porter des accusations sans le témoignage des victimes
La traite de personnes est une réalité méconnue au pays. Ces jeunes filles, souvent recrutées sur Internet - parfois dès l'âge de 10 ans - se font entraîner dans la prostitution. Soumises à des proxénètes, elles sont exploitées sexuellement, souvent pendant de nombreuses années. De nombreux criminels ne sont pas arrêtés : la peur empêche trop souvent les victimes de parler. Les services policiers à travers le pays se retrouvent fréquemment les mains liées quand vient le temps d'arrêter les proxénètes, selon Maria Mourani, criminologue et sociologue spécialisée en gangs de rue. Le plus gros problème est que les victimes ne veulent pas toujours dénoncer leurs souteneurs, craignant les conséquences. Le projet de loi C-452, modifiant le Code criminel (exploitation et traite de personnes), vise justement à permettre aux services policiers de déposer des accusations sans le témoignage des victimes, comme cela se fait pour les cas de violence conjugale. Radio Canada

6 ans pour avoir eu deux blondes de 13 ans
Un homme de 21 ans qui sortait avec deux filles de 13 ans en même temps et qui a fait six victimes au total a été déclaré délinquant à contrôler. Il passera six ans au pénitencier. Tomy Éthier n'a que 21 ans,

mais il en est déjà à sa quatrième condamnation pour des crimes de nature sexuelle sur des mineures. Il venait à peine de sortir de prison en août 2015 lorsqu'il a utilisé les réseaux sociaux pour faire six nouvelles victimes âgées de 12 à 15 ans. Éthier était notamment en couple pendant plus de trois mois avec une enfant de 13 ans en mentant sur son âge. Pendant cette période, il a également eu une autre relation amoureuse avec une autre fille de 13 ans en plus de séduire son amie de 12 ans. Encore aujourd'hui, il ne reconnaît pas que ce qu'il a fait était grave puisque selon lui, plusieurs personnes utilisent aussi les réseaux sociaux pour séduire des personnes mineures. Il n'a entrepris aucune thérapie et son risque de récidive est considéré comme étant élevé. Son séjour en détention a été turbulent et il s'est retrouvé en confinement à quelques reprises. Éthier a plaidé coupable à 16 chefs d'accusation dont attouchement et incitation à des attouchements sur des mineures de moins de 16 ans. QMI (Journal de Québec; Journal de Montréal)

Toronto lawyer charged in sex assault of teens has licence temporarily suspended
A Toronto lawyer accused of sexually assaulting three teenage girls has had his licence temporarily suspended. The Law Society Tribunal says Francois Lesieur won't be allowed to practise law until he has a chance to respond to a motion brought forward Tuesday morning by the Law Society of Upper Canada. Toronto police charged Lesieur with four counts of sexual assault in late September, alleging he assaulted the girls -- aged 14, 15 and 16 -- in public places such as subway stations and a food court. CTV News

Nurses demand workplace safety
Janet Hazelton, president of the Nova Scotia Nurses' Union says an incident in a Middleton hospital should have been given more consideration in light of the serious nature of the threat and the escalating frequency of violent behaviour in health care facilities across the province. She, like other health care advocates, is very concerned about this issue, calling on government to make workplace violence a priority. Last week a Kings County man, once charged with plotting to kill police officers in Newfoundland, was charged with firearm-related offences after a disturbance at Soldiers Memorial Hospital in Middleton... Police responded to a call from the hospital about a man acting erratically. When they arrived, they found and arrested 60-year-old man. He has been charged with possession of a firearm while prohibited, unauthorized possession of a firearm and careless use of a firearm... The Nova Scotia Nurses' Union has been in talks with health care stakeholders for several months, since the NSNU released a study in January 2016 identifying violence in the workplace among 15 significant problems plaguing our health care system. Chronicle Herald

Online safety being highlighted by OPP
Police across the province are hoping to raise people's online security awareness this month as they focus on cyber safety. In a four-part series, OPP are reminding people how to keep information safe online. Topics in the series include Free Wi-Fi use and password protection, phishing and ransomware (on both personal and corporate devices) scams, e-mail attachments and online child safety. NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Explore B.C.'s notorious Highway of Tears in new virtual reality documentary
When Matilda Wilson's daughter Ramona went missing in 1994, Wilson never imagined that 22 years later, she would still be searching for answers about what happened... The RCMP have acknowledged that 18 girls and women have gone missing or been murdered along the stretch of highway between Prince George and Prince Rupert and nearby routes since 1969. Indigenous leaders say that number is closer to 50... CBC's first virtual reality documentary, Highway of Tears transports viewers to the Wilson home and then onto the notorious stretch of Highway 16, providing a visceral experience of the landscape and the personal tragedies that haunt that landscape and that have affected so many Indigenous people in Canada. The documentary was directed by Anishinaabe filmmaker Lisa Jackson... On Sept. 1 of this

year, the federal government launched a national inquiry into missing and murdered Indigenous women and girls. The inquiry came in the wake of emotional pleas from relatives and community members, news stories and police reports that underscored what is now recognized as the decades-long vulnerability and victimization of Indigenous women in Canada... Against this backdrop, The Current launched its virtual reality documentary at a public forum Oct. 13 in Prince George, a community with close links to the highway and the tragic stories associated with it. More than 250 people attended, many of whom came with their own personal stories of loved ones gone missing or affected by violence. CBC News

Anti-racism group slaps warning labels on Halloween costumes
Despite public protests, some costumes like Dream Catcher, Native Royalty and Pocahottie are still on store shelves in Saskatchewan and will remain there... On Sunday, members of Colonialism No More and the Saskatchewan Coalition Against Racism (SCAR) entered the Spirit Halloween store located at 2220 Willow Rd and put their own warning labels on costumes and other items they deemed in appropriate. The warning labels stated, "The items contained in this package are offensive and promote the sexualization of indigenous women and peoples. Please avoid contact with these dangerous materials"... in addition to the warning label, the activists placed information about missing and murdered indigenous women and girls in Canada as a way to help educate others about why the costumes are offensive to some people. REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Alberta justice minister to research cannabis policies in Colorado
Alberta's justice minister is travelling to Colorado this week to research the legalization of cannabis first-hand. Kathleen Ganley will be going to Denver Thursday to meet with the attorney general, police, fire and environmental health officials. She says the two-day trip will cost just over $4,000 but will help prepare the government for the eventual legalization of marijuana. Ganley says Colorado is an ideal location to research the issue since it legalized cannabis more than two years ago. She says she hopes the trip will help Alberta avoid problems during the legalization process. Ganley says the research will help cabinet ministers during the development and implementation of a cannabis framework for Alberta. Canadian Press (660 News)

Weed still on police radar, even though busts down
You won't find many, if any, people working in law enforcement ready to admit that marijuana trafficking isn't still on their radar. In fact, they will go to great lengths to tell you otherwise. But when you are dealing with the emergence of the province's deadliest killer drug fentanyl -- a synthetic opioid 100 times more toxic than morphine -- limited policing resources have to be focused on saving lives. Supporters of Raif Badawi worried lashings will resume in Saudi Arabia
Supporters of a blogger jailed in Saudi Arabia are concerned he will once again be subject to lashings and are calling for his release. Raif Badawi, whose wife lives in Sherbrooke, Que., was arrested in 2012 and sentenced in 2014. In a statement, the Raif Badawi Foundation said it had received word from a "private source" that the Saudi government will resume the lashing punishment... Mireille Elchacar, a spokesperson for Amnesty International in Quebec's Eastern Townships, where Badawi's wife lives, said the organization is trying to independently confirm the claim... Badawi is not a Canadian citizen, but his wife, Ensaf Haidar, and their three children were granted political asylum in 2013. CBC News; Radio Canada; Postmedia Network (Gazette)

Snowden: 'Politics of fear' keep Trudeau from repealing Canada anti-terror law
Edward Snowden has waded into the simmering debate over Canada's controversial anti-terror law, saying that Justin Trudeau was reluctant to repeal the law out of a fear of appearing soft on terror. Speaking to an audience in Toronto on Tuesday, Snowden pointed to a campaign promise by the Canadian prime minister to amend the sweeping legislation, which gives security forces heightened powers to apprehend suspected terrorists and disrupt their activities. "But he's been in office a little while now and we haven't seen that actually come to pass," said Snowden, appearing at the SecTor

cybersecurity conference via videolink from Russia. (…) Last month the Liberal government launched a wide-ranging consultation on national security, meaning any potential changes to the law will probably be delayed until next year. The extra time will offer the government the opportunity to get it right, said **Ralph Goodale, Canada's public safety minister**, as he announced the consultation. ***"A lot of people felt shut out, and we promised to give them the opportunity to be heard."*** Guardian

Flooding in Prince County possible on Friday and Saturday: Environment Canada
Environment Canada has issued a special weather statement, warning of potential heavy rain and localized flooding in Prince County. The weather will be caused by a "vigorous low pressure system," expected to cross the Maritimes on Friday and Saturday. CBC News: Compass weather specialist Kevin "Boomer" Gallant says the system is coming off the Great Lakes, and is absorbing tropical moisture from a low to our south. CBC News

NATIONAL SECURITY CONSULTATIONS / CONSULTATIONS SUR LA SÉCURITÉ NATIONALE

A mania for consultations
What do you think of The Fisheries Act? Got some thoughts about workplace flexibility? How about foreign aid? And where do you stand on a national immigration detention framework? These are just a tiny few of the literally hundreds of consultations the Trudeau government has completed or is in the midst of completing in its first year… As of this writing, there are precisely 78 different "open consultations" the federal government is engaged in right now. That link will take you to the federal Web site: ConsultingCanadians.gc.ca where, if you were so inclined, you could review the 316 consultations that the Trudeau government has already completed just since January 1. Most of these consultations are the self-service kind. But for the big headliners when it comes to consultations, MPs are needed, whole committees of MPs, which have been criss-crossing the country in search your views on electoral reform, the next federal budget, Canada Post and national security:… We've all got opinions about national security right? Of course we do. And that was just the thinking behind the MPs on the House of Commons Standing Committee on Public Safety and National Security as it decided to do its own national cross-country listening tour. Don't miss them today in Toronto, tomorrow in Montreal, and Friday in Halifax. National Post

NATIONAL SECURITY / SÉCURITÉ NATIONALE

The other hell: Lt.-Gen. Roméo Dallaire's new book is a brutally revealing memoir about his own inner torment
An editorial piece states, "One night after he was medically discharged from the army in April 2000, former Lt.-Gen. Roméo Dallaire drank most of a bottle of scotch in his Hull, Que., apartment before he opened a metal box containing his father's medals and his 50-year-old razor. Very slowly, he began to slice himself, first his thighs, then his arms. It was another of Dallaire's rolls of the dice, another in what has become an uncountable number of attempts, stretching over two decades, to kill himself "accidentally," through behaviour so reckless it is a wonder he is alive now. Much of it, in Africa to start and later in Canada, involved driving, including reaching 150 km/h on a Quebec road with his young children in the back seat. As UN commander in Rwanda during the still tense days after that nation's 1994 genocide bled to a halt, Dallaire would drive up, alone and at night, to checkpoints manned by heavily

armed teenagers as skittish and traumatized as he was. (…) If PTSD has had a face in Canada over the last 20 years, it is Roméo Dallaire's. His life story, in effect, is a personal history of how Canada, and the modern world in general, has responded to PTSD. "That's putting a lot on my shoulders," he protests, before conceding its inevitability and discussing the incomprehension that faced him when he returned to Canada in 1994, an incomprehension he fully shared." Macleans

Concordia's MIGS to host program to fight on-line extremism
As he was sipping a well-made latte in Montreal's Mile-End neighborhood, Kyle Matthews told *The Suburban* that violent extremism has already become one of the more important challenges to peace and security within the western world. "Everybody knows that ISIS is a genocidal force that wants to squash anyone who is different from what they are," said Matthews, "… but at this point, it's going to take a lot more than a 1-888 help-line number to do something about it." As the Executive Director of MIGS — the Montreal Institute for Genocide and Human Rights Studies — Matthews believes that ISIS and other radical jihadist groups would have been nothing but a collection of local (yet deadly) political movements if it had not been for the convergence of their radical ideology combined with the power of the new social media that's still being used to promote their cause and to lure vulnerable young people into joining their ranks. (…) "These were not isolated incidents," said Matthews. "We have several cases in Canada where individuals are being radicalized online and targeted by online (jihadi) recruiters in much the same way as sexual predators scour the web to find their victims" Suburban

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Les services frontaliers souhaitent identifier un mystérieux détenu anonyme
L'Agence des services frontaliers du Canada (ASFC) demande l'aide du public pour identifier l'individu qui se trouve en détention puisqu'il a été «jugé interdit de territoire» au pays. Pour ne pas nuire à l'enquête, l'ASFC n'a pas précisé depuis combien de temps l'homme est détenu. L'agence a tout de même révélé quelques autres détails. «L'enquête de l'ASFC révèle que l'individu est arrivé au Canada le 2 août 1969 à Montréal, à bord du train numéro 9 du chemin de fer de la fonction de Napierville, en provenance de la ville de New York. On croit que l'homme aurait de la famille à New York ou aux États-Unis», a indiqué l'Agence des services frontaliers par voie de communiqué. À ce jour, l'inconnu soutient être venu au Canada pour éviter la conscription. QMI Agency (Journal de Québec; Journal de Montréal); 680 News

Canada Acknowledges Antidumping
This has never happened before. This is very important. Trade lawyers outside Canada (and inside Canada) will be shocked by the steps being taken in Canada during an active antidumping proceeding. On October 16, 2016, the Department of Finance asked the Canadian International Trade Tribunal to commence a section 18 (of the *Canadian International Trade Tribunal Act*) reference concerning the effect of preliminary and final antidumping duties on gypsum board (also called drywall and wall board) from the United States into Western Canada (British Columbia, Alberta, Saskatchewan, Manitoba and the Yukon and Northwest Territories). The antidumping proceedings at the center of the request are the Canada Border Services Agency ("CBSA") dumping investigation that commenced on June 8, 2016 and the Canadian International Trade Tribunal ("CITT") injury inquiry that commenced on September 6, 2016. Innovation expert Alec Ross shares tech predictions in Saint John

Alec Ross has seen the future - and, believe it or not, it's not totally dystopian. "I do think tomorrow will be better than today," said Ross, a former senior adviser for innovation to Hillary Clinton, who is the Democratic nominee running in the U.S. presidential election. He has travelled to 41 countries, observing technologies that will radically alter the way people live in the coming decades. His New York Times best selling book, The Industries of the Future, examines the role of robotics, cyber security, the commercialization of genomics, and big data on world markets. Among the lessons Ross gleaned in his travels and research is that data, in the same way that land and iron were the raw material of past ages, is the raw material of the information age. "He or she who owns the data, controls the data, or can draw meaning from the data, is who creates the businesses and industries of the future," said Ross. Coding is crucial. In addition to the importance of big data, Ross says coding is also changing our lives in fields ranging from healthcare to warfare. "The weaponization of code is the most significant development in conflict since the weaponization of fissile material," said Ross. "The difference being creating a nuclear weapon requires access to the scarcest of scarce scientific talent, and transuranium elements, whereas hacking is a lot easier." On a similar scale are innovations like the robotics being pioneered in Japan - including Robina, a robot programmed to take care of the elderly - which can be read as a sign of where Western culture is heading. "I think the robots of the cartoons and movies of the 1970s are going to be the reality of the 2020s," said Ross. CBC News

LAW ENFORCEMENT / APPLICATION DE LA LOI

Ottawa police shouldn't investigate Nunavut RCMP: MLA
A Nunavut politician is calling for an end to a contract that sees Ottawa police investigate his territory's RCMP officers in cases of potential wrongdoing. Former Nunavut justice minister Paul Okalik says an Ottawa police sergeant's racist remarks after the death of Inuk artist Annie Pootoogook show the capital's force cannot be trusted to investigate the territory's Mounties... Insp. Jamie Dunlop, who oversees the training of Ottawa officers who perform those investigations, disagrees... The agreement between the Ottawa police and the Nunavut RCMP has been in place since 2012 and has resulted in 14 investigations, said Dunlop. Of those 14, two have resulted in charges being laid against police. Dunlop acknowledged the public might have questions about police forces investigating each other... Dunlop said there is currently no plan to end the agreement between Ottawa police and Nunavut RCMP. Metro News

Child sexual exploitation bust in northern Alberta nets 14 suspects
Fourteen suspects have been charged with online child sexual exploitation following a lengthy investigation across northern Alberta. An investigation by Alberta Law Enforcement Response Teams (ALERT) resulted in 33 charges. The people charged are from communities across northern Alberta. ALERT's Internet Child Exploitation (ICE) unit launched Operation ICE Reign between June and October 2016. ICE is an integrated unit with members from both the Edmonton police and the RCMP. CBC News

Coke, meth, guns seized in co-ordinated raid in Western Manitoba
A seven-month police investigation has taken down an alleged drug trafficking network in western Manitoba. At a press conference at RCMP headquarters in Winnipeg today, officers with Brandon police, the RCMP and Winnipeg police had big bags of cocaine, methamphetamine and marijuana on display next to a table of firearms and photos of vehicles seized during Project Derringer. Between Oct. 12-15, police executed search warrants and made arrests in the Brandon and Griswold, Man. areas as well as in the Toronto area. Leslie Gerald Bisson, 36, of Griswold, Justin Tyler Reimer, 28, of Brandon and Javed Ali, 29, of Georgetown, Ont. face numerous charges. The investigation was conducted by the Manitoba Integrated Organized Crime Task Force. The investigation is ongoing with further charges pending, police said. Winnipeg Free Press; Canadian Press (Metro News); Brandon Sun; CTV News

Fed up with crime, Langley residents demand action from RCMP
Miranda and her sister were sound asleep last July when their father encountered an intruder with a hunting knife hiding in the basement of their Langley home. Jamie Shaw believes the man had been in the family home for almost two hours... The incident wasn't isolated: Residents of a rural Langley neighbourhood say they've seen an alarming escalation in break-ins and property theft... haw is now part of a Block Watch program that's pinpointed several local properties believed to be tied to the spike in

crime. He's one of dozens of people demanding authorities to do more to protect them, and on Tuesday night, dozens of citizens fed-up with break-ins and living in fear came together to call for action from their mayor and the RCMP. One woman said when she has spoken to police she was "brushed off." "We're told we should not worry, and it won't happen again," she said... The mayor of Langley, also a victim of theft, says he plans to work with the community to find a solution. Langley RCMP Spt. Murray Power said it's alive to the concerns of the community. "We've been in contact with a number of people. We know the concerns have been out there since the incident in July, which concerns us all," he said. Langley RCMP have plans to meet with concerned residents in the coming weeks to organize a coordinated block watch involving both neighbours and police. CTV News

OPP officer's son, who pleaded guilty to sex crimes against kids and animals, designated dangerous offender

An Ontario man who pleaded guilty to sex crimes against young children and animals has been designated a dangerous offender. A Barrie, Ont., judge said Shayne Lund has shown a "complete inability to control his sexual impulses" and only expressed a desire to do so after his arrest in 2013. Justice Joseph Kenkel told the court Lund could not be trusted to commit to psychological treatment given his "history of manipulation and deceit" and that sexual gratification has so far been the main focus of his life. The dangerous offender designation means Lund could be imprisoned indefinitely... Lund's father, an Ontario Provincial Police constable, appeared distraught as the ruling was read in court Wednesday. Mark Lund, a 27-year veteran of the force, was recently charged with obstruction of justice. Police have released no other details but say he was off-duty at the time of the alleged offence. Canadian Press (National Post)

Man, 19, charged with sexual assault in Port aux Basques

A man from Port aux Basques has been charged with sexual interference and sexual assault involving a minor following an incident last month, the RCMP say. Police said in a statement on Wednesday that a 19-year-old is facing charges following a complaint of "alleged inappropriate interaction" between the man and a complainant who is under 16. The incident is alleged to have occurred in September, according to Const. Matthew Christie... The RCMP and the Department of Children, Seniors and Social Development jointly investigated the complaint. The 19-year-old was charged Saturday and is set to appear in court in December. He has been released from custody. CBC News; Gulf News

Human trafficking sweep catches Sudbury senior

The Sudbury senior charged with child pornography counts this week was one of 32 accused swept up in a six-day co-ordinated investigation into human trafficking across Canada. Police say officers laid 78 offences during the sweep. More than 390 officers from 53 Canadian police services, plus the FBI in the United States, directly engaged with people suspected of working in the sex trade, potentially against their will. Most of the arrests in Operation Northern Spotlight occurred in Ontario where 25 people were charged with 67 offences. Sudbury Star

US man admits raping boy, 6, after Canadian authorities intercept broadcast

A Pennsylvania man has admitted he sexually assaulted a six-year-old boy after Canadian authorities intercepted an Internet broadcast of him raping the child. U.S. authorities later discovered 10 other recorded assaults of the boy. PennLive.com reports 20-year-old William Byers Augusta pleaded guilty in Carlisle on Tuesday to charges including rape of a child. Prosecutors say Canadian authorities intercepted a broadcast of Byers Augusta sexually assaulting the boy in July 2015. Investigators found videos showing Byers Augusta assaulting the child, including one of him and 62-year-old Ira Task simultaneously sexually assaulting the child. Associated Press (Winnipeg Sun, Toronto Sun, Ottawa Sun, Edmonton Sun, Calgary Sun)

Tweet targeting Quebec women with reference to Marc Lépine prompts police probe

Quebec provincial police are investigating after someone tweeted a threat against women, making reference to the infamous hit list drawn up by Montreal Massacre shooter Marc Lépine. The tweet was in response to a new book celebrating the success of women in Quebec... nvestigators met with the man who sent the tweet on Tuesday, and Crown prosecutors will decide whether or not to press charges.

According to SQ spokeswoman Andrée-Anne Bilodeau, past cases that involved uttering threats or intimidation have resulted in anything from no jail time to a five-year sentence. Clermont-Dion said she was happy to see the SQ react so fast and to see that other men were taking a stand against the comments made against her and other women. CBC News

Man on P.E.I. tasered three times by police
A Cornwall man the police Tasered three times before managing to subdue him will be back in court next month for sentencing after he pleaded guilty to resisting arrest. Paul Godfrey, 51, appeared before Chief Judge Nancy Orr in provincial court in Charlottetown where the case was adjourned for sentencing... The officer followed the truck as it drove a short distance at a high speed before pulling into Godfrey's driveway. After pulling in behind Godfrey's truck the officer got out and ordered him to stop, saying he didn't want to have to chase him into the house. He eventually stopped and after a second officer arrived Godfrey struggled with them during his arrest for impaired driving... Godfrey managed to slip away and one of the officers ordered him to stop or he would use his Taser. Godfrey didn't stop and the officer Tasered him. Once the Taser finished cycling Godfrey got up and ran away. The second officer Tasered him again, but Godfrey was able to get up and go into his house. Once inside the police chased him through the house, Tasered him a third time and tackled him in the garage. MacDonald said on the way to the detachment Godfrey told the police he didn't feel well. An officer pulled the Taser prongs out of Godfrey at the detachment and he went to the Queen Elizabeth Hospital. Gander Beacon

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Dangerous offender's conviction stands, but sentence reduced
Although met with failure at attempting to have his conviction and dangerous offender designation overturned, Donald Francis Wilton had some success in appealing the length of his sentence... The 39-year-old appealed and, in June, the Saskatchewan Court of Appeal heard arguments from Crown prosecutor Dean Sinclair and Wilton's lawyer Kevin Hill. Hill argued the verdict was unreasonable and further urged the court to toss out the DO designation on grounds the sex offence - the first conviction of its kind for Wilton - does not fit a pattern of previous violent, criminal behaviour. Hill then asked the court to reduce Wilton's custody term, arguing sentencing Justice Guy Chicoine basically tacked on time after considering Wilton would receive parole or statutory release that could start before programming is completed or has taken effect... While the province's highest court didn't agree with Wilton's position on conviction or the DO finding, it found Chicoine had erred in sentencing and replaced the 45 months with 36. The court noted Chicoine's decision placed much of its focus on offender rehabilitation, with an estimated 18 months to three years needed to complete core programming, if everything went well... While the appeal court found Chicoine did not err in considering early release when deciding on sentence, it added there is no guarantee Wilton will receive such a release. Rather, the court noted there is a distinct possibility the parole board could hold Wilton until the end of his custody term - meaning the sentencing judge erred in assuming early release when crafting his sentence. Postmedia Network (Leader-Post)

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

Website aims to connect community with cops
The Sidney North Saanich Community Consultative Committee launched their website Monday with an aim to help the community connect with local police to help solve community problems. In spring of 2015, local police decided they didn't have an informal platform to communicate with. "We felt like there were probably issues of community concern that we weren't hearing about, because people only phone us for certain reasons," said Corp. Erin Fraser of Sidney North Saanich RCMP. Fraser said it's about increasing communication overall, not just bringing issues to RCMP attention. She said it's also a way to network in the community to get to know residents better. The committee, which has existed now for around two years, initially hosted a series of town hall presentations to try and procure volunteers. The committee

ended up with 14 volunteer members representing a cross section of Sidney and North Saanich residents. Peninsula News Review

Le théâtre pour sensibiliser les jeunes à la cyberintimidation

Depuis deux ans, la compagnie de théâtre sillonne le Québec pour raconter devant des élèves des histoires de cyberintimidation et de suicides. Radio Canada

Case of N.S. teens accused of sharing intimate images put over to November
Police and lawyers are seeing a rise in the number of investigations involving the sharing of intimate images without consent, according to a Crown attorney handling one of the largest such cases Nova Scotia has faced following the introduction of legislation dealing with the disturbing phenomenon. Peter Dostal said Wednesday that the case involving six Nova Scotia teens charged with sharing images of at least 20 high school girls is not the first to test the relatively new legislation, but it is one of the biggest and most complex... Several lawyers representing the young men were in provincial youth court in Bridgewater to request more time before entering pleas. They are due back in court on Nov. 28. Dostal said a trial could be lengthy due to the number of people charged in the matter and the volume of evidence, much of it taken from electronic devices and cellphones. Dates in July, August and September have been set aside for a possible trial... Police in Bridgewater launched a year-long investigation in response to complaints from school officials, leading to the seizure of a number of electronic devices -- mainly cellphones -- which were handed over to the RCMP Technological Crime Unit for analysis. The Mounties found more photos, and a search warrant was drafted to obtain information from Dropbox, a U.S.-based file-sharing service. Using an international treaty, Canadian officials obtained the files through the FBI. The case is one of the first in Canada involving legislation introduced in late 2013 after the death of Nova Scotia teen Rehtaeh Parsons, which captured national attention. CTV News

RCMP presents crime statistics
RCMP Sgt. Mark Harrison presented an update on the crime statistics in Pincher Creek at the Committee of the Whole meeting of council last Thursday. Harrison had the statistics for the first three-quarters of 2016, comparing them to the past several years of work in Pincher Creek. Although most of the statistics presented were concurrent with previous years, there was one stand-out that Harrison outlined. Over the first three-quarters of 2016, there was an increase in drug trafficking, but contrary to assumption, Harrison assured that the increase was a positive sign. There were 11 incidences of drug trafficking issues brought to RCMP for the first three-quarters of 2016, compared to seven in 2015, and two in 2014. Harrison said that this is not necessarily an increase in trafficking issues, rather, the RCMP has been better able to investigate and disrupt drug operations. Pincher Creek Echo

Indigenous women focus of Museum exhibit
The Peace River Museum, Archives and Mackenzie Centre (Museum) is honouring murdered and missing women as well as the historic struggle of all women in its newest exhibit. Titled “Silent Dreams: Their Story”, the exhibit puts a spotlight on both indigenous and non-indigenous women’s struggle in obtaining personhood in Canada. It also looks at the traditional role indigenous women played in their societies, and how colonization disrupted the traditional matriarchal structure integral to aboriginal culture. “It’s really important to be able to understand that historical context,” said Laura Gloor, Coordinator with the Museum. “It’s not about pointing fingers and creating blame, it’s about understanding. That’s where it originated. That’s where those derogatory words, those expressions, that attitude came from.” Peace River Record-Gazette

Inuit women's group frustrated by lack of communication on MMIW inquiry

It's been almost two months since the inquiry into missing and murdered Indigenous women and girls began its work and the national Inuit women's group says it's still waiting to hear from the organizers. "What we're frustrated about is we haven't heard anything," says Rebecca Kudloo, president of Pauktuutit. "We don't even have phone numbers to contact them. There's no connection." Kudloo says her organization has not heard a word about the timeline or the work of the inquiry since August when the names of the commissioners were announced. The inquiry officially started its work on Sept. 1, and is expected to last more than two years. CBC News

«On voit des signes positifs et encourageants»
De grands défis restent à réaliser pour amener une cohabitation totalement harmonieuse un an après la crise de Val-d'Or. Des pas ont toutefois tracé le chemin vers le «mieux vivre ensemble», selon le maire Pierre Corbeil. «Le 22 octobre 2015, l'émission Enquête diffusait un reportage sur une situation critique vécue par des femmes autochtones de Val-d'Or. Ce fut un choc. La problématique a été mise en évidence et il fallait se relever les manches pour trouver des pistes de solutions, a fait valoir M. Corbeil lors d'un point de presse, le 18 octobre. «Une mobilisation sans précédent de notre milieu s'est enclenchée et des actions se sont déclinées sous plusieurs formes tout au long de l'année. Toutes visaient à dénoncer les formes de violence faites aux femmes autochtones et allochtones, a-t-il ajouté. L'Écho Abitibien Le Citoyen

Alberta Justice Minister to get cannabis crash course in Colorado
Minister Kathleen Ganley will travel to Colorado from Thursday to Saturday, with hopes of learning how they've handled the legalization of marijuana. Alberta Justice Minister and Solicitor General Kathleen Ganley won't be trying any of the brownies when she heads down to Colorado for a crash course in cannabis. Instead, she hopes Alberta can learn from how Colorado has proceeded since marijuana was legalized in 2012, as Canada prepares for bud to hit the legal market in spring of 2017. The two biggest problems that Ganley hopes to address during her $4,000 trip south are keeping cannabis out of the hands of youngsters, and creating a system to detect those that drive under the influence. "They are still working on the science of what constitutes impairment. They measure your ability to walk straight and a lack of coordination, but there is no set content level and a method for testing (like with alcohol impairment)." Metro News; Edmonton Sun

A spiritual perspective on the legalizing of pot
An opinion piece states, "The city is gaining a surprising number of cannabis dispensaries recently. But maybe that shouldn't be a surprise. The wisdom of the drug war is finally coming under intense scrutiny, for good reason. Current policy has led to imprisonment, marginalization and needless deaths, including over 300 illicit drug-related deaths in B.C. in just the first months of 2016, in part due to toxic additives. Add to this the heavy social and economic costs of illegal activities and law enforcement. We've spent decades assisting too few to lift themselves out of addiction and too many to ill-gained wealth. On the other hand, our misgivings about decriminalization may result from a fear that it would lead to increased recreational use among all ages, particularly youth. It's a legitimate concern. Alcohol is currently the most widely used and abused drug by a wide margin. Health Canada reports that 78% of the population consumed alcohol in the last year surveyed. Of those, almost 20% exceeded Canada's Low-Risk Alcohol Drinking Guidelines. Consequences of abuse range from disruption in family life to safety issues. "In Canada, alcohol has been a factor in 30% - 40% of road deaths for the past 15 years," says the public education group Change the Conversation. No doubt people wonder what would happen if a large increase in drugged driving were added to these figures, if street drugs were as freely available and accepted as alcohol." Vancourier

Bone of Connor Hayes, Ottawa man swept away in a New Zealand landslide, found
A hunter in New Zealand has found a bone belonging to a 25-year-old Ottawa man who was swept away with his girlfriend in a landslide in 2013. Connor Hayes and Joanna Lam, 24, were travelling together in New Zealand in 2013 before Lam was scheduled to start a job as a medical imaging specialist with a health board on the country's South Island. The couple was last seen on Sept. 10 that year. New Zealand Police then discovered pieces of the couple's rented camper van two weeks later in a gorge on the Hasst River. Days later police discovered Lam's body. Hayes's remains weren't found. But in August 2016, a hunter found a human thigh bone where the Haast and Burke rivers meet, according to New Zealand officials. DNA analysis confirmed the bone belonged to Hayes. Police and volunteers conducted another search of the area the bone was found in on Oct. 16. "A number of items of interest" were recovered from the riverbed but police haven't yet confirmed whether they belong to Hayes. Insp. Mel Aitken with New Zealand Police says anything believed to belong to Hayes, including bones, will eventually be released to his family in Canada. CBC News

INTERNATIONAL

As territory shrinks, IS group looks for new money sources
As the Islamic State group sees its territory shrink to half its original size and its dreams of a caliphate evaporate, the extremist fighters are losing access to the sources of revenue that once gave them their power, prompting them to turn to extortion, kidnapping or foreign donations like their predecessors, the militant group al-Qaida. The Islamic State group had a unique ability to capitalize on the natural resources of its territory in Iraq and Syria and swiftly implement a system of taxation and governance that allowed it to rule an area that once was the size of Switzerland. As the battle gets underway to retake Mosul, the group's largest stronghold in Iraq, the Islamic State group is being denied access to revenue sources such as oil and gas and cash reserves that once amounted to more than $1 billion in 2014, said Daniel Glaser, the Treasury Department's assistant secretary for terrorist financing. With those resources slipping away, the Islamic State group is expected to revert to "traditional methods we see al-Qaida using — whether it's deep-pocket donors, whether it's charities, whether it's NGOs, whether it's criminal activity," Glaser said in a recent discussion at the Washington Institute for Near East Policy. UPDATED: Prominent Iranian human rights activist blocked from leaving country
Mansoureh Behkish was subpoenaed to court on the morning of Sunday, Oct. 16. A family member said the subpoena letter was delivered to Mansoureh Behkish in her apartment in Tehran, and she was given five days to show up at Evin revolutionary tribunal court. Background story below. Iran has once again targeted a prominent human rights activist, who lost six family members to state executions and killings in the 1980s. Mansoureh Behkish, who's been jailed several times for her past advocacy work, had her passport confiscated indefinitely and without explanation by authorities. It happened as she was about to board a plane to Ireland, where her daughter lives. Behkish said security agents did not tell her why they stopped her from boarding and took her passport at Tehran Imam Khomeini International Airport on Sept. 16. CTV News

MINISTER / MINISTRE

The night Colten Boushie died: What family and police files say about his last day, and what came after

… The killing of Colten Boushie has set Saskatchewan on edge. On Aug. 9, 22-year-old Colten and his friends set out from the Red Pheasant reserve, about 150 kilometres west of Saskatoon, for a day of swimming and drinking. The car they were riding in had a flat tire and they pulled into the yard of a local farmer named Gerald Stanley. What happened next is uncertain, but one thing is clear – Colten wound up dead. To summarize the competing views of the tragedy in their extremes: either Colten was the victim of

a racially motivated killing, or Colten's friends were trespassers and thieves who met swift, vigilante "justice." There are a number of other possibilities, too, of course… As the court process plays out, tensions are high and the facts contested. The aftermath has brought angry protests and signs that the white community is fearful of a backlash. One local pastor told the Saskatoon Star-Phoenix that Colten Boushie "is the Rodney King of Western Canada," and said his killing had unleashed a lot of hidden ugliness. Hundreds of people gathered to protest outside the court house for Mr. Stanley's first court appearance, watched carefully by RCMP on rooftops, and there was anger when he was granted bail on a $10,000 cash surety. Five days after the shooting Saskatchewan Premier Brad Wall called for an end to the flood of racist comments on social media directed at Indigenous people. And in late September, after armed, masked assailants threatened a farm hand in the province, local news was flooded with stories of farmers arming themselves for the harvest season. In response to the growing tensions, including Facebook pages featuring photos of farmers carrying firearms, the RCMP Superintendent held a press conference to ask residents to put their guns away. Mr. Boushie's killing lingered like an unspoken subtext. His slaying has become a symbol of a broken relationship between Indigenous people and their white neighbours. The anger that fuelled protests outside the bail hearing for Gerald Stanley, the 55-year-old farmer accused of second degree murder in connection with Mr. Boushie's death, has not subsided. Kimberly Jonathan, a vice-chief with Saskatchewan's Federation of Sovereign Indigenous Nations, said one of the principal reasons that violence hasn't erupted is that the Boushie family has called for peace. Ms. Jonathan, who urged that the shooting be investigated as "a crime based on race," said she met with **Public Safety Minister Ralph Goodale** and warned him of the seriousness of the situation. "I said, 'You ought to thank the family, because they came out with peace in memory and love for Colten. They could have gone the other way and there would have been, and I'm not exaggerating, there would have been a lot more blood shed.' "But I said we can't promise it's going to continue that way because of how the [justice] system has been lacking." Globe and Mail

MP Miller's firearm bill defeated
A private member's bill to amend the Criminal Code by Bruce-Grey-Owen Sound Larry Miller has been defeated. The House of Commons voted on Bill C-230 — An Act to amend the Criminal Code (firearm — definition of a variant) on Wednesday, where it was defeated 202-81… Miller said he was not surprised his bill was defeated, but he intends to write **Ralph Goodale, Minister of Public Safety and Emergency Preparedness**, and his parliamentary secretary Michel Picard and urge them to make the changes.
"I would have withdrawn my bill if they would have put something on the table that would fix it. That is all I want is this thing fixed," said Miller. "It is an obvious flaw." Owen Sound Times

TOP STORIES / MANCHETTES

CBSA arrest five men in three separate cocaine seizures - The drugs were allegedly destined for Alberta
Weighing in at 445.7 pounds, cocaine, seized by Canada Border Services Agency (CBSA) in three separate busts over the last two months, has led to the arrest of five men. According to the CBSA, the first bust took place Sept. 2 in Coutts, when officers conducted a search of a commercial truck as it entered Canada with a load of televisions. During their search of the truck they discovered 60 packages of cocaine, weighing 69 kilograms, secured in the load of televisions. As a result of the seizure, two men were detained by CBSA for smuggling, under the Customs Act, and RCMP out of Raymond were contacted and asked to attend the port of entry. The following day, the RCMP charged 29-year-old Gurpreet Singh Cheema and 28-year-old Gurpreet Singh with Importing a Controlled Substance and Possession for the Purpose of Trafficking a Controlled Substance under the Controlled Drugs and Substances Act. The two men have already appeared in court and have been released with strict conditions. They're scheduled back in Lethbridge provincial court Oct. 24. Metro News; CBC News; Postmedia Network (Calgary Herald; Calgary Sun)

Seizure of fentanyl south of Nanaimo one of the largest in B.C., RCMP say
RCMP are calling a bust near the Nanaimo Airport one of the largest seizures of fentanyl in B.C. in the past few years. Mounties say a suspicious vehicle was pulled over on the highway just south of the airport on Oct. 10 around 5 p.m. Police say the driver, a Vancouver Island man, was arrested and his vehicle

was searched. Cash and one kilogram of powdered fentanyl was found, according to RCMP. Police state in a release "this makes the seizure one of the largest for the RCMP in British Columbia over the past few years." "Locating and reducing the importation and distribution of fentanyl continues to be a priority for the RCMP, especially given the number of opioid deaths in British Columbia," states Cpl. Tammy Douglas in the release. The man arrested has been released and no charges have been laid at this point. The Federal Serious and Organized Crime Group on Vancouver Island has taken over the investigation. Nanaimo News Now; CTV News; Canadian Press (Times Colonist); Cowichan Valley Citizen; Global News

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Cape Breton prepares for more rain after historic flood
Cape Breton Regional Mayor Cecil Clarke says he's "petrified" of a looming rainstorm as the Sydney area continues to recover from severe flooding less than two weeks ago. A special weather statement issued by Environment Canada predicts heavy rains could cause more flooding this weekend in areas of the municipality badly damaged by more than 200 millimetres of rain on Thanksgiving Day.It's not yet known whether the weekend storm will actually cause trouble in Cape Breton, but the picture will become clearer early Friday morning, Clarke said Thursday. CBC News; Cape Breton Post

Mariners-in-training get a lesson in surviving Arctic waters
Swimming in Frobisher Bay in October is not everyone's idea of a fun time but for sailors who hope to navigate Arctic waters it's a necessary skill to have. This morning a group of sailors in training braved the frigid waters near Iqaluit to practise abandoning ship. It's something people who want to work on fishing vessels or sealift ships have to learn and mandatory training required by Transport Canada... The class is run by the Nunavut Fisheries and Marine Training Consortium, which trains between 200 and 300 people a year from across the territory. It's the only organization offering marine safety training in the Arctic. CBC News

Not just an earthquake drill, The Great BC Shakeout is a call to be prepared
When the big one hits, local officials hope that Vancouver Islanders will be ready. A massive province wide earthquake drill called The Great BC Shakeout took place today with an estimated 800,000 participants. Nanaimo emergency program manager Karen Lindsay says participating in the drill that was broadcast on 102.3 The Wave and 106.9 The Wolf is important, but in general she hopes people will go over their emergency plans and update their earthquake kits. Nanaimo News Now

Think before calling 911 in quake aftermath, operators plead
Many Metro Vancouver residents remember the night of Dec. 29, 2015, when a magnitude 4.7 earthquake rattled homes, jolted people out of bed and briefly left some wondering if The Big One was about to hit. Operators at E-Comm, the region's 911 dispatcher, certainly remember that night. That's because they were flooded with hundreds of non-emergency calls that tied up their limited and valuable resources, which should be reserved for helping people in dire need... The earthquake was the strongest felt in the region in more than a decade, but despite leaving people understandably concerned, there was virtually no fallout. No one was hurt, and no damage was reported. That won't be the case during The Big One, which is why E-Comm has asked the public to think before calling 911 in the aftermath of that or any other earthquake. CTV News

NATIONAL SECURITY CONSULTATIONS / CONSULTATIONS SUR LA SÉCURITÉ NATIONALE

We still don't have the right balance between security and civil rights
An opinion piece by Sukanya Pillay, Executive Director and General Counsel of the Canadian Civil Liberties Association, states "The Liberals campaigned on a promise to fix the "problematic" aspects of Bill C-51 - which passed into law as the Anti-Terrorism Act, 2015 last year - but have yet to close the deal.

As the Oct. 22 two-year anniversary of the tragic shooting of Cpl. Nathan Cirillo looms, concerns regarding the act, and accountability, remain. The government's recently released Green Paper, 'Our Security, Our Rights,' forms the basis for public consultations on Canada's national security framework but does not assuage concerns about the anti-terrorism act. Bill C-22 was also introduced this year to create a parliamentary committee to review national security activities and intelligence in order to fill the Canada's current gap of no parliamentary oversight of national security. But it doesn't go far enough. As such, the potential for rights and accountability failures, and errors, persists and Canada is not safer. The anti-terrorism act included new and secret powers for the Canadian Security Intelligence Service (CSIS) and rampant information-sharing among 17 agencies and more than 100 departments. These and other concerns about the act are exacerbated by accountability failures." Ottawa Citizen

Bill C-51 panelists urge Canadians to take part in national security consultation
Osgoode professor Faisal Bhabha joined a group of panelists at Ryerson University's Centre for Free Expression, or CFE, last Thursday to discuss the impact of Bill C-51 in relation to terrorism, national security and activism. The discussion was largely critical of the bill: Bhabha and his fellow panelists, Tom Henheffer of Canadian Journalists for Free Expression and Sukanya Pillay of the Canadian Civil Liberties Association, all questioned the need for Bill C-51 as well as the legislation's obscurity and effectiveness. Also known as the Anti-terrorism Act of 2015, the bill broadened the rights of government agencies to share personal information more easily in the name of national security... On September 8, 2016, the Liberal government announced a consultation on national security, which is open to public participation until December 1. The panelists, as well as the moderator, James Turk of the CFE, encouraged the audience to participate. Excalibur

NATIONAL SECURITY / SÉCURITÉ NATIONALE

Two years after attack on the Hill - Now we've got security right
An opinion piece by Senator Vern White, a former Ottawa police chief and Durham region chief, states, "Saturday Oct. 22 will mark the two-year anniversary of the lone-wolf attack on a soldier at the National War Memorial and on Parliament Hill. Michael Zehaf-Bibeau shot and killed Cpl. Nathan Cirillo at the memorial, then continued to Parliament... After wrestling with and wounding a security officer at the door, Zehaf-Bibeau proceeded down the centre hall of the building with his rifle, engaging in a firefight with police and security guards who were in pursuit. He was fatally shot multiple times by officers from the parliamentary security detail, RCMP and the Sergeant-at-Arms. These events had a profound impact on Canadians. The impact was made greater by the fact the gunman was able to get within 40 metres of the prime minister, cabinet members and parliamentarians who were meeting in various locations adjacent to the Hall of Honour... Today, the two internal agencies have been combined into one, been given firearms and a single communications capability, and are managed as a single entity. The RCMP now covers the grounds with an extensive force and a level of security that I believe better manages a potential threat, as well as overseeing the new combined internal agency. Any threat to Parliament needs to be met with the level and capability of force that can suppress it quickly. Removing a threat needs to be done at the gates, on the front lawn or at the doors of Parliament and not inside the Hall of Honour. I believe that the security force and RCMP model now in place can and will do that, should such an attempt occur again. Since the attack, the changes that have been implemented on Parliament Hill identify a level of security more in tune with today's reality and threat..." Postmedia Network (Ottawa Citizen)

Broadcast Media / Médias télédiffusés :

Border agents have made the largest ever seizure in the Prairies, intercepting more than 200 kilograms. Five men were arrested and charged. The [unintelligible] is worth $10 million. The drugs were found in three separate raids. (CTV News, 18:45 ET)

Pearson airport presses Ottawa to fix security backlogs
Officials at Pearson International Airport are pressing Ottawa to cough up more funding to ease backlogs at security and customs checkpoints that have left thousands of air travellers fuming. The problem even has the attention of the prime minister's office after Gerald Butts, the principal secretary to Justin Trudeau, took to social media to express his frustration at recent lineups... In a Friday presentation to the Commons' finance committee — which is conducting prebudget hearings — the authority will press Ottawa to invest millions of dollars more to improve security and border services. Scott Collier, the authority's vice president of customer and terminal services, will call for at least $5 million in extra funding for the Canada Border Services Agency, responsible for customs and immigration screening of arriving international passengers, to improve services at Pearson. During May, authority staff were forced to hold passengers outside a jammed customs hall an average of twice a day with wait times topping 30 minutes. The authority is also urging Ottawa to earmark another $20 million to the Canadian Air Transport Security Authority to improve security screening at Pearson alone. This would allow 95 per cent of passengers to be screened in 10 minutes or less. Postmedia Network (Toronto Star)

Akwesasne resident gets three years for human smuggling
Terri Ann Bush, age 43, of Hogansburg and St. Regis, Quebec, Canada, was sentenced Wednesday to 36 months in prison for her role in a human smuggling conspiracy, according to the U.S. Department of Justice. Bush pleaded guilty on June 21. In the evening of Nov. 17, a New York State Police trooper in rural northern New York performed a traffic stop on a southbound vehicle. A male citizen of Israel, Bush, and the driver, also from Hogansburg, told the trooper they were headed from the international border area to New York City... Later, troopers and Border Patrol determined that the Israeli man was known to immigration officials and not lawfully in the United States. The next morning, Border Patrol agents stopped the same vehicle northbound with the Israeli man was absent. After a search, federal agents found and arrested him in Philadelphia. He was brought back to New York for prosecution for illegal entry to the United States from Canada, and later pleaded guilty. The driver from Hogansburg also pled guilty to an alien smuggling charge, Hartunian said. North Country Now

Cyber security in Canada overdue for an update, experts tell Senate open caucus
Cyber security in Canada needs a major overhaul, one that looks at the problem beyond just the virtual scope; that was the message that panelists delivered at a public open caucus meeting hosted by Senate Liberals this past Wednesday during Cyber Security Awareness Month. "The rate and nature of change requires an evergreen cyber strategy," said Peter Sloly, executive director with Deloitte Canada, who works in the cyber section of the risk advisory services. "There's no point in having one in 2010 and updating it in 2014 or having one in 2016 and then updating it four years later around an election cycle." Sloly, a former deputy chief of the Toronto Police Service, emphasized that like policing, cyber security is more than law enforcement; it requires prevention, engagement, and the protection and promotion of rights. These same elements can, and should, apply to cyber security. Hill Times

"I've seen pretty much all your tech secrets"
Government prosecutors intend to file additional "serious felony charges" against a former NSA contractor who was arrested in August and charged with stealing a massive trove of top-secret intelligence documents. In court papers filed Thursday [you can read them below], the government said Navy veteran Harold T. Martin III stole 50,000 gigabytes of data over the course of two decades, which far exceeds the number of documents Edward Snowden took from the NSA and leaked to journalists. (One gigabyte can store about 10,000 pages.) Prosecutors say Martin, who had been a contractor with Booz Allen Hamilton — the same company that employed Snowden at the time of his leak — is a national security threat and a flight risk, and must remain behind bars until a trial in his case begins next year.... "Some of the documents are marked 'Unclassified/For Official Use Only,' and many are marked 'Secret' and 'Top Secret,'" the court filing says. "Many of the documents marked 'Secret' and 'Top Secret,' also bear special handling caveats. The information stolen by the Defendant also appears to include the personal information of government employees." Vice News

LAW ENFORCEMENT / APPLICATION DE LA LOI

Seizure of fentanyl south of Nanaimo one of the largest in B.C., RCMP say
RCMP are calling a bust near the Nanaimo Airport one of the largest seizures of fentanyl in B.C. in the past few years. Mounties say a suspicious vehicle was pulled over on the highway just south of the airport on Oct. 10 around 5 p.m. Police say the driver, a Vancouver Island man, was arrested and his vehicle was searched. Cash and one kilogram of powdered fentanyl was found, according to RCMP. Police state in a release "this makes the seizure one of the largest for the RCMP in British Columbia over the past few years." "Locating and reducing the importation and distribution of fentanyl continues to be a priority for the RCMP, especially given the number of opioid deaths in British Columbia," states Cpl. Tammy Douglas in the release. The man arrested has been released and no charges have been laid at this point. The Federal Serious and Organized Crime Group on Vancouver Island has taken over the investigation. Nanaimo News Now; CTV News; Canadian Press (Times Colonist); Cowichan Valley Citizen; Global News

Police pull gun, drugs and fake $100 bills out of Saskatoon home
Police in Saskatoon have released more details today about what they found when they executed what they describe as a high risk warrant. Yesterday, police moved in on a home in the 1600 block of Avenue C N. with back-up from their guns and gangs unit and the tactical support unit. A 36-year-old man was arrested. Inside the home, police now reveal that they found a rifle, along with some methamphetamine and marijuana. Police also found a small stack (10) of $100 bills. The man arrested now faces weapon and drug charges along with possession of counterfeit money and breach of undertaking. Police said their investigation is on-going. CBC News

Police seize more drugs in Nunavut's capital
For the second time this month police have seized a large amount of drugs in Iqaluit. On Oct. 12 investigators from the RCMP V Division Federal Operations Section in Iqaluit executed a search warrant and seized cash and drugs from a residence in the city. The search resulted in the seizure of $700 in cash, about a kilogram (more than two pounds) of marijuana, roughly a half a kilogram (one pound) of hashish, and a small amount of cocaine. Two Iqaluit men have been charged in relation to this investigation, police said Oct. 19. Nunatsiaq Online

RCMP investigating 80 arson cases in southeast communities
RCMP have determined 80 fires in southeast New Brunswick have been deliberately set over the past two years. The fires have been in several communities policed by the Richibucto, Bouctouche and Elsipogtog detachments of the RCMP. About half of the fires have been set in abandoned or vacant residences, cottages, trailers and vehicles and have happened at night. RCMP say the remaining fires have involved other structures and properties, including businesses and residences that were inhabited, but not occupied at the time of the fires. No injuries have been reported in the fires. CBC News

A B.C. city is building 'red zones' to banish repeat offenders from its downtown. Can cities really do that?
This week, the Ridge Meadows RCMP announced that they were a mapping out a "red zone" for downtown Maple Ridge, B.C., a suburb east of Vancouver. Covering a roughly 15-block section of the downtown's core known for its high crime, it would be a "designated area" where habitual offenders could be arrested on sight. Or, as the Mounties put it, it would be a "legal tool to arrest a repeat offender who is simply in a geographical area." The National Post called up the experts to get the details on B.C.'s most cinematically named crimefighting tool. Can you really just banish offenders from places?... How does it work?... Why would a city do this?... Does anybody else do this?... Is it legal? Postmedia Network (National Post)

Duo nabbed in diamond-swapping theft, police suspect nationwide spree
Jewellers across the country are being warned to check their stock for fake diamonds after a Toronto-area couple were charged in a daring diamond switch that could be connected to a string of similar heists nationwide. Police in Saint John, N.B., said Grigori Zaharov, 70, and Natalia Feldman, 44, of Vaughan, Ont., were arrested overnight Thursday outside a condo tower in Vaughan. The Saint John force said the couple "are suspects in numerous other jurisdictions for similar incidents," and multiple police agencies are working "to determine the entirety of their actions." CTV News; CBC News

54-year-old Kasabonika Lake man dead after reported altercation
Ontario Provincial Police have charged a 30-year-old man with murder in Kasabonika Lake First Nation after a reported altercation Wednesday morning left another man dead. Police charged George Darren McKay, 30, with second degree murder in the death of Alec Tom McKay, 54... According to police, an officer with the Nishnawbe Aski Police Service responded to a call at a home in the community about a disturbance outside the residence at about 7:00 a.m., CT. Alec McKay was subsequently transported for medical assistance, where he was pronounced dead by medical staff, police said in a press release Thursday. A post-mortem was scheduled in Kenora, Ont. on Thursday... Officers with the OPP and NAPS continue to investigate. Kasabonika Lake is a fly-in community located about 450 km northeast of Sioux Lookout, Ont. CBC News

L'armée doit se concentrer à protéger le Canada selon les conservateurs
L'armée canadienne doit concentrer ses énergies à défendre le Canada et l'Amérique du Nord au détriment de sa participation à des opérations de maintien de la paix de l'ONU, suggère le Parti conservateur dans un mémoire présenté mardi... La volonté des libéraux de renouer avec les opérations de paix des Nations unies nécessitera la mobilisation de quelque 600 militaires canadiens et 450 millions $ sur trois ans. Des policiers de la GRC et de différents corps provinciaux et municipaux seront aussi affectés aux opérations, ainsi que des spécialistes civils. TVA Nouvelles

Drogues, armes véhicules volés... coup de filet payant de la GRC à Kedgwick
Cinq personnes ont été arrêtées dans le cadre d'une enquête sur le trafic de drogue menée à Kedgwick. Deux d'entre elles ont été accusées. Mercredi, des agents du Groupe fédéral des crimes graves et du crime organisé ont exécuté un mandat de perquisition dans une résidence de la région de Kedgwick. La GRC affirme que les policiers ont saisi d'importantes quantités de différentes drogues. Ils auraient entre autres saisi plus de 20 000 comprimés, ainsi que des substances qu'elle croit être de la cocaïne, du haschisch et des champignons hallucinogènes. Acadie Nouvelle

Missing 13-year-old may have travelled to Winnipeg
Police are requesting the public's help in locating a missing girl. St. Pierre-Jolys RCMP say Samantha Gabriel, 13, was last seen last Monday, Oct. 10 in the rural municipality of De Salaberry, Man. Police believe she may have travelled to Winnipeg... Police describe her as an "at-risk youth" and say they are concerned for her wellbeing. CBC News; CTV News

Christopher Garnier heading for 2017 trial in death of Catherine Campbell
Christopher Garnier will go to trial late next year on a charge of second-degree murder in the death of off-duty Truro police officer Catherine Campbell. Dates for a five-week jury trial were set Thursday morning in

Nova Scotia Supreme Court in Halifax. Garnier appeared via videolink from the jail where he is being held. His trial is scheduled to begin on Nov. 20, 2017. CBC News

Why did Canadian police cars become so menacing?
An opinion piece states, "When did our community policing culture shift from one of assistance to perceived intimidation, and where did our honoured, approachable peace officers go? Are we following the footsteps of US police forces, which are armed with riot gear, armoured vehicles and other military-grade equipment? Having built my life as a design professional in the field of visual culture over the past 20 years, I have to ask what purpose is served by the recent shift in police vehicle design in cities across Canada..." National Observer

Mentally ill inmates don't belong in prison, coroner's inquest hears
A retired social worker who worked with a dying inmate in the Shepody Healing Centre in Dorchester told a coroner's inquest Thursday that mentally ill people should not be in a federal penitentiary. John Lutz was testifying at the inquest into the 2010 death of Glen Edward Wareham, 28, of New Waterford, N.S., who died as a result of complications from extensive self-harm. "A mental health psychiatric facility is where he should be, but the justice system was responsible for putting him there," said Lutz. The Shepody Healing Centre is the Correctional Service of Canada's facility in Atlantic Canada for inmates with mental health issues. Lutz said a mental health psychiatric facility would be a more appropriate setting for inmates like Wareham. "The Shepody Healing Centre, key people are correctional officers," said Lutz. "At a psychiatric facility there are no officers to egg patients on." CBC News

Decision in appeal of Dennis Oland's murder conviction expected Monday
Dennis Oland is expected to learn Monday if he'll continue to serve a life sentence for the murder of his father, win acquittal, or be ordered to stand trial all over again. Defence and Crown lawyers finished presenting arguments before three justices of New Brunswick's Court of Appeal Thursday on whether the guilty verdict delivered by a jury in December should stand or be overturned. Canadian Press (Global News; Chronicle Herald); Radio Canada; CBC News

Edmonton lawyer who smuggled meth into remand centre off to prison after appeal fails
A young lawyer convicted of smuggling drugs into the Edmonton Remand Centre has one week to turn himself in, after his appeal was rejected this week. In September, Justin Sidhu was sentenced to four years in prison for smuggling six grams of methamphetamine into the remand centre. CBC News

Pill-making machine could produce 6K fentanyl pills an hour: RCMP
Alberta police and politicians are meeting in Sherwood Park, Alta. over the next two days to address how they can work together to combat the dangers of fentanyl. The two-day Fentanyl Conference will look at issues like the risks of fentanyl use, toxicology of the drug and its importation. It will also allow various agencies, such as police, Alberta Health Services (AHS) and Health Canada, to share ideas and discuss case studies... Boechler said fentanyl is the drug of choice because it is easy to obtain online and drug traffickers can easily find it and import it. On Thursday morning, he demonstrated to the media how the illicit drug is made using a pill processing machine, often with counterfeit parts. Boechler said RCMP are concerned because there is no quality control. The pill processing machines can create up to 6,000 tablets an hour. RCMP are currently rolling out a new product in the fight against fentanyl – a nasal naloxone spray. The products cost approximately $150 and Mounties have ordered approximately 13,800 for officers across the country. Global News; Postmedia Network (Edmonton Journal; Edmonton Sun)

Broadcast Media / Médias télédiffusés :

Nova Scotia RCMP given Naloxone kits amid spreading fentanyl crisis
RCMP in Nova Scotia say 25 per cent of members are carrying Naloxone nasal spray kits in an effort to get ahead of a potential rise of the deadly opiate drug, fentanyl, which is rapidly spreading across the country. CTV News

South Surrey crime watchers call on RCMP for better communication
Block Watch captains in the Grandview Heights area of South Surrey say they are frustrated by a lack of communication from police and what they describe as a "one-way flow" of information around crimes occurring in their neighbourhood… According to Surrey RCMP Sgt. Alanna Dunlop, communication with Block Watch captains is among areas under review as part of a City of Surrey reorganization of RCMP volunteers that began in recent weeks. The communication review is "to ensure continued effectiveness of the relationship and the program," Dunlop told Peace Arch News this week after hearing of concerns. Dunlop described the relationship between Surrey RCMP, the City of Surrey and Block Watch volunteers as a good one. The reorganization that's underway, she said, is "to provide more consistency and oversight for the program," which has also seen some changes in personnel. The Now

Drug death toll reaches new peak in B.C. with 555 fatalities in nine months
The number of illicit drug deaths in British Columbia surpassed last year's death toll after just nine months. The Ministry of Public Safety says in the first nine months of this year there were 555 deaths because of illicit drug overdoses, compared with 508 for all of 2015. The ministry says fentanyl remains the major contributor to the high number of deaths and in more than 60 per cent of them, the drug was detected. Globe and Mail; Times Colonist

'They don't want to die': Families who lost loved ones to opiates say government must do more
It's been two years since Arlene Last-Kolb's son Jessie died of a fentanyl overdose, and she says Manitoba's opiate problem has only gotten worse since then. On Thursday, Last-Kolb joined a dozen other people who have lost loved ones to fentanyl and carefentanil to demand the Manitoba government do more to fight the rise of opiates in the province. They were there to support a new NDP private members' resolution demanding the Progressive Conservative government put together an anti-opiate strategy. CBC News

Davantage de fusillades à Ottawa, mais moins de violence attribuable aux gangs de rue
Une mise à jour de la Stratégie d'Ottawa relative aux gangs de rue montre que la violence dans la rue est de moins en moins attribuable aux bandes organisées. Cette Stratégie, qui est coordonnée par une vingtaine d'organismes et de groupes communautaires, a été mise en place il y a trois ans. Dans la mise à jour faite au Comité des services communautaires et de protection de la Ville d'Ottawa, jeudi, les responsables de la Stratégie indiquent qu'il y avait, en 2015, huit bandes de rue en activité, regroupant 435 membres. Mais le rapport souligne un changement dans l'activité criminelle. « Le commerce de la drogue, les infractions relatives aux armes, la violence et le commerce du sexe ne sont plus l'apanage de bandes de rues bien organisées. Actuellement, la violence dans la rue est plutôt attribuable à des individus vaguement reliés », peut-on notamment y lire. Radio Canada

Edmonton police officers say more training needed to interact with Somali-Canadians
Junior officers with the Edmonton Police Service say they are not adequately trained to interact with members of the Somali-Canadian community, according to a report being presented Thursday to the police commission. "The majority of constables, including beat officers, stressed that having more knowledge about the community would significantly help them in their day-to-day interactions," reads the 34-page report, co-authored by Dr. Sandra Bucerius, a criminologist at the University of Alberta. The findings are the result of 57 in-depth interviews with officers of various rank last year in a project approved by Chief Rod Knecht… The report said while some officers described receiving cultural competency training, it was not usually specific to Somali-Canadians. They stressed it would be helpful to receive knowledge before taking on a new beat requiring community interaction… Researchers, who also

interviewed 301 members of the Edmonton Somali community between 16 and 30, said the majority still describe the relationship with police as "difficult." But relations have improved, they stated... One inspector described the shift that has occurred as going from "playing the big bad cop" to a strategy of reaching out to communities and building relationships, not just to solve crimes but to come up with preventive strategies and programs. CBC News

Teen's death points to need for more substance use programs for youth, says watchdog
B.C.'s Representative for Children and Youth is once again calling for a comprehensive system of substance use services, as part of its report into the death of 15 year-old Nick Lang. The report released today says the Métis teenager's parents were unable to access suitable, culturally specific services to help address their youngest son's escalating substance use problem... This is the second time in less than six months that the RCY's office recommended a more comprehensive substance abuse policy. The report released today, Last Resort: One family's tragic struggle to find help for their son, found Nick had increased the use of methamphetamine and was hesitant to accept voluntary treatment. Investigators concluded that Nick may not have ended up in a provincially funded rehabilitation centre if the proper supports had been available when they were needed. The report also recommended that the province, in partnership with Métis leadership,develop and implement a strategic plan to deliver culturally responsive services for Métis. REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Preliminary hearing begins for three arrested in medical marijuana raid
A preliminary hearing began Thursday for three people arrested in a high-profile police raid at a Saskatoon medical marijuana dispensary last year. The dispensary's owner Mark Hauk, alongside the two others, appeared in Saskatoon Provincial Court for the hearing as police officers involved in the raid were questioned on the witness stand. Hauk's defence lawyer said he plans on bringing forward a constitutional challenge of Canada's medical marijuana laws, if a trial is ordered. The medical marijuana dispensary, known as The Saskatchewan Compassion Club, was raided Oct. 29 last year. Several charges initially laid against the accused were dropped in January. The charges related to derivatives like cannabis oil. The three who appeared in court Thursday are still facing charges of possession and trafficking of an illegal substance. The preliminary hearing is scheduled to resume in December, when more officers are expected to be questioned. CTV News

Toronto pot shop owners and employees fined by courts
Employees and owners of six pot shops have been fined by the courts after pleading guilty to Planning Act and Licensing Bylaw charges, the city says. The charges stem from enforcement efforts May 26 by Toronto police and the Municipal Licensing and Standards Division. The courts imposed sentences between $550 for an employee and $2,500 for an owner in addition to closing orders under the City of Toronto Act. The city said a closing order means the property is immediately closed "for any business use involving the sale of any form of edible marijuana foodstuffs intended for human consumption" for up to two years. "Residents, local Business Improvement Areas and other community leaders have been expressing their concern about the illegal storefront marijuana dispensaries over the last number of months," the city said in a news release Thursday, Oct. 20. There are 210 charges currently before the courts. Inside Toronto

Ottawa breaching Indian residential school settlement agreement: Sen. Murray Sinclair
Ottawa breached the multi-billion dollar Indian residential school settlement agreement by allowing its lawyers to use legalistic tactics to defeat and limit compensation claims from survivors during private hearings, says Sen. Murray Sinclair, who was chair of the Truth and Reconciliation Commission.Sinclair said he doubts many residential school survivors would have agreed to the settlement agreement, which was finalized under the Liberal government of Paul Martin, if they knew federal government lawyers would resort to splitting jurisdictional hairs to disqualify compensation claims under the Independent Assessment Process (IAP) which was created by the settlement agreement. Dion leads UN effort to ramp up pressure on Russia, Syria over Aleppo
Foreign Affairs Minister Stephane Dion is at the United Nations in New York to try to ratchet up pressure on Russia and the Syrian government to stop bombing Aleppo and allow in much-needed humanitarian assistance. Dion will call out Russia and Syrian President Bashar Assad by name during a special session of the UN General Assembly organized by Canada and supported by more than 70 other countries.The minister will ask the UN Security Council to break the impasse that has prevented the international community from intervening Syria, where more than 400,000 people have been killed since 2011. He will also remind Russia and Assad of their responsibilities to protect civilians and call for an immediate end to airstrikes against rebel-held parts of Aleppo, and access to humanitarian aid for the estimated 250,000 people trapped in the city. Dion says Canada asked for the special session so countries could express frustration at the current situation in Syria, and to try to put extra pressure on Russia and Syria to end five years of fighting. The storm that wasn't (and the earthquake that will be)
The frustrating news spread quickly among Vancouver Island parents at last weekend's B.C. Taekwando Master's Cup in Burnaby: the ferries were cancelled and we would all have to spend the night on the mainland (...) Onboard the 7 a.m. sailing from Tsawwassen to Swartz Bay the following morning, I laughed at some of those jokes on Twitter, and I confess I did wonder if perhaps BC Ferries had been a bit too cautious in cancelling so many sailings on that route the previous day. But the obvious question is what would have happened if they hadn't cancelled them, especially if the storm had been as big or even bigger than expected? What would have been the public backlash if people's lives had been put in jeopardy? Now that the storm is a week behind us, it might be useful to turn our attention to the much bigger natural disaster that will strike one day and the task of managing the risk beforehand. Of course I'm talking about a major earthquake (...) If the Big One hits British Columbia soon, it seems highly unlikely that the second-guessing after the disaster will bear any resemblance to the response to last weekend's storm. Last weekend, many of us asked if those in charge of public safety did too much. If a major earthquake were to happen next weekend, I'd wager, most of us would ask why they didn't do more. CBC News

Booms fail, diesel fuel spills from tug sunk near Bella Bella B.C. - Heiltsuk Chief Marilyn Slett questions why seaworthy booms were not installed?
The booms containing spilled diesel fuel from a sunken tug 20 kilometres west of Bella Bella have failed in rough weather conditions. A spokeswoman from Kirby Offshore Marine, which owns the tug, says crews are now working to reposition and replace the damaged booms as Gale winds and three-metre waves continue to batter the remote central coast. The spokeswoman says while it is unclear how much fuel has spread into the open water, no oiled wildlife have been detected or captured since the rough weather began Friday. But Heiltsuk Chief Marilyn Slett says her community is in shock of the incident and is questioning why more seaworthy booms weren't installed. Canadian Press (CBC News, Vancouver Sun)

Six months after wildfire, Fort McMurray on long road to recovery
Six months after one of the largest evacuations in Canadian history, no one in Fort McMurray seems to have a clear idea of just how many residents have returned to the fire-ravaged city. The local public school board says attendance was down by 270 students, or about four per cent, as of Sept. 30. Attendance at Catholic schools was down by 400 students this fall, about 6.5 per cent. The Regional Municipality of Wood Buffalo has tried to keep track of how many people have returned. As of Sept. 2, a total of 77,158 residents had registered at information centres in the municipality. But officials say those numbers don't offer a complete or reliable picture, since some may have returned without registering while others may have registered more than once. Despite the lack of firm numbers, there are indications that for some residents things are beginning to return to normal. The Alberta Electric System Operator said power usage dropped off during the evacuation period in early May. CBC News

Earthquake 'swarm' in New Brunswick unlikely to rattle residents: seismologist
A seismologist says a cluster of earthquakes was detected in southern New Brunswick over a two-week period, but it's unlikely residents in the area even felt a tremble. Maurice Lamontagne of Earthquakes Canada says a total of 10 earthquakes occurred around Sussex between Sept. 19 and Oct. 5. Lamontagne says the earthquakes were of such low magnitude -- about 2.3 on the Richter scale -- that people in the sparsely populated area may have heard a rumble, but probably felt nothing beneath their feet. He says the quakes were relatively shallow and focused less than five kilometres beneath the earth's crust. Canadian Press (Chronicle-Herald, CTV News)

Halifax hit with 55 to 80 mm of rain during weekend storm - Cape Breton Regional Municipality saw between 25-35 mm
Cape Bretoners braced for a repeat of the Thanksgiving storm, but for many, the wind and rain over Friday and Saturday didn't quite compare. Rainfall totals in Cape Breton, a region which saw widespread flooding which displaced homeowners on Thanksgiving Monday, averaged about half of what Halifax

County saw in the last 48 hours. The Cape Breton Regional Municipality said Thursday its infrastructure could handle 30 to 40 millimetres of rain, which is about what the area received. CBC News

Power out in many parts of P.E.I.
Power is out some parts of the Island, including Charlottetown. A Maritime Electric spokeswoman said crews are on their way to out to work on getting it restored. A list of communities currently without power is on the Maritime Electric website. CBC News (Yahoo! News); Charlottetown Guardian

Flood victims warned of scavengers in Sydney
Officials with the Cape Breton Regional Municipality are warning flood victims to watch for people scavenging from the water-soaked items they've put out at the curb. John Phalen, public works manager with CBRM, said the municipality has received reports of people rooting through flood victims's damaged belongings that are put out on the street for pick up (…) Phalen said the municipality is trying to discourage "treasure finders," from the practice, which can be common on regular large garbage pick-up days. He said picking through the trash of flood victims can be unsafe. "A lot of these places have had sewage and oil contamination, so there is a health hazard there as well. So stay away from it," said Phalen. "They're having a hard enough time as it is." CBC News

Winds, rain and snow cause power outages and flooding across Quebec
As of noon Sunday, 36,000 homes in Quebec were without electricity, almost half of them in the Montérégie, as strong winds and wet snow caused branches drooping under the weight to come into contact with power lines across the province. Hydro-Quebec said more than 140 of their crews had been deployed to restore power in the Montérégie, but also in the Eastern Townships, Lanaudière, the North of Quebec and Quebec City regions. Heavy winds followed several days of rain that also caused minor flooding in some areas, especially in the Beauce, as several rivers, including the Etchemin, Chaudière, Beaurivage, Famine, Ouelle and Nelson rivers overflowed their banks. Several regions, including Charlevoix, Saguenay-Lac-Saint-Jean, Lanaudière, Laurentides, Mauricie and the Montérégie had received rainfall warnings. The Quebec Public Safety department continued to monitor the situation of other rivers as well, Sunday afternoon. Montreal Gazette

Plusieurs rivières sous surveillance; inondations en Beauce
Les précipitations soutenues des derniers jours ont gonflé des cours d'eau où l'on signale ce matin des inondations mineures, dans les régions de la Beauce et de la Capitale-Nationale. Les niveaux des rivières Chaudière, Beaurivage et Nelson étaient toujours en hausse, ce matin, dans le secteur Saint-Étienne-de-Lauzon à Lévis, à Saint-Joseph-de-Beauce et à dans le secteur Val-Bélair à Québec, où l'on signalait déjà des inondations mineures. Quelques débordements ont aussi été signalés sur la rivière des Hurons, à Stoneham-et-Tewkesbury, et en bordure de la rivière Famine à Saint-Georges, en Beauce. La rivière Chaudière, en particulier, est sous surveillance. Les débits enregistrés à plusieurs endroits montraient des signes préoccupants, alors que de légères précipitations continuent de tomber sur la région. La Presse

Police searching Lake Simcoe for missing man Halai Li - An empty kayak was found floating in the lake on Wednesday
South Simcoe Police, York Regional Police, and the Canadian Coast Guard are searching for Toronto man who may have gone missing on Lake Simcoe over the past week. Halai Li, 57 years old, didn't show up for work on Tuesday, according to South Simcoe Police. Li was known to go fishing, and Monday was his day off. South Simcoe police found Li's car sitting in a marina, and a yellow kayak was found floating in Lake Simcoe on Wednesday. The search for Li began Friday, and continued Saturday before pausing overnight. Police resumed the search Sunday morning, and are asking residents along Lake Simcoe to check the nearby shoreline. CBC News

Barge to chill on Toker Point
A fuel barge that ran aground north of Tuktoyaktuk on Sept. 2 will spend the winter where it sits on Toker Point, said Tuktoyaktuk mayor Darrel Nasogaluak. Attempts to free the Fathom Marine barge were unsuccessful, so the vessel is now being prepared to spend the winter on the beach about 25 kilometres north of Tuktoyaktuk (…) Plans to remove fuel from the barge were originally scheduled to begin the

week of Oct. 5, but were delayed. On Oct. 20, fuel was being removed from the barge and brought to Tuktoyaktuk via helicopter, Nasogaluak said. The Canadian Coast Guard could look at establishing a maritime rescue sub-centre in the Arctic. "As we move around the Arctic and talk to people, it could be something we look at," said Peter Garapick, search and rescue superintendent for the central and Arctic region. "Could it be that there is a need for a marine rescue sub-centre in the Arctic? It's a possible question, something that we're open-minded to and we'll ask questions and evaluate the benefits of that." Nunavut News North

Private Eyes
It was a powerful piece of technology created for an important customer. The Medusa system, named after the mythical Greek monster with snakes instead of hair, had one main purpose: to vacuum up vast quantities of internet data at an astonishing speed. The technology was designed by Endace, a little-known New Zealand company. And the important customer was the British electronic eavesdropping agency, Government Communications Headquarters, or GCHQ. The leaked files, which were provided by a source through SecureDrop, show that Endace listed a Moroccan security agency implicated in torture as one of its customers. They also indicate that the company sold its surveillance gear to more than half a dozen other government agencies, including in the United States, Israel, Denmark, Australia, Canada, Spain, and India. Some of Endace's largest sales in recent years, however, were to the United Kingdom's GCHQ, which purchased a variety of "data acquisition" systems and "probes" that it used to covertly monitor internet traffic. Documents from the National Security Agency whistleblower Edward Snowden, previously disclosed by The Intercept, have shown how GCHQ dramatically expanded its online surveillance between 2009 and 2012. The newly obtained Endace documents add to those revelations, shining light for the first time on the vital role played by the private sector in enabling the spying. The Intercept

Chinese firm acknowledges inadvertent role in cyberattack
The hazard of having so many household devices connected to the internet is even more obvious after Friday's cyberattack. A Chinese firm that makes components for surveillance video cameras now admits their technology was used, in part, to carry out the unprecedented strike. XiongMai Technologies acknowledged that a piece of malware known as "Mirai" that's spreading around the internet targets vulnerabilities in their products. "Mirai is a huge disaster for the 'Internet of Things,'" XiongMai representative Cooper Wang told CNNMoney in an email. "[We] have to admit that our products also suffered from hackers' break-in and illegal use." It appears hundreds of thousands of internet-connected devices, such as security cameras and DVRs, were used without their owners' knowledge to help leverage Friday's attack, according to security firm Flashpoint. XiongMai acknowledged that the weaknesses in their products were identified last year and hackers continue to exploit them. Users were unable to change the default password on their devices, which allowed hackers to install malware and commandeer them for the DDoS attack. CNN

Cyber warfare: The new international warfront
To enter the Arizona Cyber Warfare range (AZCWR), a person must have a signed waiver, the consent from the strict private security firm that guards the facilities, and the fortitude to withstand the salty language and messy environment created by the hackers inside. "This is the only place in the world where the good guys can learn to hack from good guys who really know how to hack," Brett Scott, one of the founders of the AZCWR, told Al Jazeera inside their hacking headquarters (...) In the US, Scott explained, hackers still face witch-hunts and harsh penalties when the government should offer employment. AZCWR is there to force decision-makers to re-evaluate their stance on technologically-capable but legally questionable computer users. "World War III is already here, and it's happening on the internet," the hacker said. While the assertion that WWIII is happening on the internet sounds hyperbolic, there are those in the US government who agree with the sentiment. Al Jazeera

Creep Catcher vigilantes accused of threatening women who question group's tactics
A Red Deer, Alta., woman says she fears for her safety since going to police with allegations that a member of the Creep Catcher vigilante group planned to use a 14-year-old girl to bait and trap a suspected predator (...) Red Deer RCMP confirm they received a report from the woman relating to a missing girl but say they have no ongoing investigations concerning the complainant, the girl or the vigilantes. "This is not work that should be done by amateurs," Cpl. Karyn Kay said. "They don't have the skills or training, they may damage ongoing police investigations, and they certainly don't follow privacy legislation or due process." Chinksi denies he ever intended to put the girl in contact with the alleged predator. He said he only planned to ask the teen if the man knew her real age and to confront him if she said yes (...) Since she went to police and voiced her concerns on Facebook, the Red Deer woman said she's received threatening voice messages from the group's Calgary-based founder, Dawson Raymond. CBC News

Muskrat Falls protesters 'fighting for land and food'
Protesters who broke through a gate and entered the Muskrat Falls work site in central Labrador Saturday night say they were proud to make their voices heard (...) Adam Pardy attended the protest with his daughters and said it was a bit cold but he too was proud to protest. He arrived just before the road closed. On Saturday, RCMP closed Route 510, the Trans-Labrador highway, in response to the protests. "I think it's completely against the law, what they're doing," Pardy said. "They can't just block the road and not let people through for a peaceful protest." The RCMP reopened Route 510 Sunday morning to traffic both north and southbound. Police also asked motorists to continue to drive with caution as some pedestrians may be near the highway. CBC News; APTN

RCMP on scene by Red River in East Selkirk
For a second day, Manitoba RCMP officers are stationed at a scene by the Red River in East Selkirk. On Saturday, a reporter with the Selkirk captured a photo of an officer carrying a cardboard box and officer wearing thin purple gloves. RCMP have been on scene at the end of CIL Road near the Manitoba Hydro

Plant since 1:30 p.m Saturday. Police tape surrounds trees and an RCMP van, and another vehicle. CTV News; CBC News; AM640

Suspect arrested after woman stabbed on Kawakatoose First Nation
Punnichy RCMP have arrested 20-year-old Kayla Blueeyes, who was wanted in relation to a stabbing on the Kawakatoose First Nation. Emergency crews were called to a home on the First Nation around 11:30 p.m. on Friday. A 30-year-old woman was taken to the Royal University Hospital in Saskatoon by STARS Air Ambulance with serious injuries, RCMP said in a media release. CTV News; Global News

Possible human remains found in Abbotsford, IHIT taking over case
The Integrated Homicide Investigation Team (IHIT) has taken over a case where human remains were found on a rural Abbotsford B.C. property Oct. 22. A resident found the remains at around 2 p.m. PT Saturday on Downes Road near Mt. Lehman Road. Police say officers, major crime detectives and forensic identification members along with the B.C. Coroners Service are on the scene and are still in the early stages of the investigation. CBC News

Police officer charged racist comments posted online
Ottawa police have confirmed they have charged one of their own after accusations were made of racism after online comments were made following the death of acclaimed Inuit artist Annie Pootoogook. Sgt. Chris Hrnchiar has been charged with two counts of discreditable conduct under the Police Services Act. An internal investigation was launched after a comment on the Citizen's story about Pootoogook's death on Sept. 19 seemed to blame Indigenous people for their own hardships: "Because much of the aboriginal population in Canada is just satisfied being alcohol or drug abusers, living in poor conditions etc. (...) they have to have the will to change, it's not society's fault." Several members of Indigenous communities and other rights groups expressed outrage at these comments, reigniting accusations of racism in the force. "I have no evidence to indicate we have racist officers," Bordeleau said at the time, while condemning the comments. Hrnchiak is expected to make his first appearance to face the charges on Nov. 1, said Police Chief Charles Bordeleau. Ottawa Citizen; APTN; Metro News

No trust in Ottawa Police: Okalik calls on Justice minister to find new reviewers for incidents involving RCMP
When a police force struggles with racism toward Inuit, is it the right one to be conducting independent reviews of incidents that involve Nunavut's RCMP officers? That's what former Justice minister and Iqaluit-Sinaa MLA Paul Okalik's wanted to know at the legislative assembly Oct. 18. "The tragic death in Ottawa of Annie Pootoogook has called into question the attitudes of the Ottawa Police Service towards Inuit and other indigenous Canadians given what we have learned about the investigation into racist comments made by at least one senior member of the force," said Okalik. "Given this situation, it is obvious that the Ottawa Police Service can no longer be trusted to undertake independent and objective investigations into incidents that occur here in Nunavut," he said. "Why has the minister not said anything publicly about this serious situation?" Peterson said he understood "there is a bit of an investigation going on." Nunavut News North

More funding needed to help curb family violence: Lynn Moore
A prominent St. John's defence lawyer says more funding needs to be provided at the federal and provincial levels to help curb family violence. Lynn Moore's recommendations come on the heels of a report from Canada's Chief Public Health Officer that identified family violence as a major health issue. In Dr. Greg Taylor's 2016 report on the state of public health, he spoke of the "staggering" statistics

surrounding family violence, He said that population surveys tell us that one third of the population, or 9 million people, have reported experiencing abuse before they were 15 years old (…) According to Moore, preventing family violence should be one of the government's main goals. "It most definitely is a public issue, it's a safety issue, and it's really a law and order issue," she said. CBC News

Veterans allowed too much pot, says former NDP MP Peter Stoffer
Former NDP MP Peter Stoffer agrees that medical cannabis can have benefits for veterans, but says he's worried about the amount of cannabis former soldiers are allowed under Veterans Affairs Canada rules. Stoffer, who was veterans affairs critic for the NDP until he was defeated in the 2015 election, believes that the high level of medical marijuana allowed by Veterans Affairs — up to 10 grams a day — is fostering overuse. "Ten grams a day is an awful lot of marijuana to give one person. It is an incredible amount." Stoffer is now public affairs advocate for Trauma Healing Centres, a company that works with veterans, first responders and others dealing with trauma and chronic pain. While he says cannabis can help veterans who are suffering, he says the goal is to help manage their pain, not to get them high (…) Veterans Affairs doesn't actually give veterans medical marijuana, but the department allows them to be compensated for up to 10 grams a day through insurance. Veterans Affairs Minister Kent Hehr said back in March that he was launching an internal review of medical marijuana policy, after data showed the number of prescriptions had increased tenfold in two years. The results of that review will be released "in the coming weeks," Veterans Affairs Canada spokeswoman Sarah McMaster told CBC News. CBC News

Where Are Women in F.B.I.'s Top Ranks?
When the call came in that a bomb had exploded in Manhattan, Amy Hess quickly got to work.
She helped direct teams of F.B.I. agents to New York to collect evidence, set up secure command posts in the streets so agents could discuss classified information, and alerted the digital forensics, fingerprint and facial recognition experts she manages in Quantico, Va., site of the F.B.I. academy and its lab. By the next day, she and her team had played a crucial role in identifying Ahmad Khan Rahami, the man charged with planting the bomb in Chelsea along with a second, unexploded device. "We pulled out all the stops," said Ms. Hess, who as head of the bureau's science and technology branch oversees more than 6,000 F.B.I. employees. Inside the F.B.I., women in particular look up to Ms. Hess, and not just because they have nicknamed her the "rocket scientist" with a degree in aeronautical and astronautical engineering from Purdue University. She is also the first woman to head the science branch — one of few female agents commanding such an important job at the F.B.I., a clubby agency where men are more

predominant in senior positions than they were even three years ago. Ms. Hess, 50, put it simply: "There is a lack of women in leadership roles (...)" James B. Comey, the F.B.I. director, has described the lack of women — and also minorities — in the F.B.I. as a serious problem that can undermine investigations and keep the agency out of touch with the communities it serves. New York Times

Two Police Killed, 19 People Wounded in Bomb in East Turkey: Sources
Two police officers were killed and 19 people were wounded when a car bomb exploded near a passing police vehicle in the eastern Turkish province of Bingol on Sunday, security sources said.
The bomb, planted by militants from the outlawed Kurdistan Workers Party (PKK), was detonated near the district governor's office, the security sources said. Five police officers were among the injured, they said. Reuters (New York Times)

83 Nigerian soldiers missing after Boko Haram attack
Senior military officers say 83 soldiers are missing after Boko Haram Islamic extremists attacked a remote base in northeastern Nigeria. Officers said the soldiers were unable to fight back because they were poorly equipped. They spoke on condition of anonymity because they are not authorized to give information to reporters. MINISTER / MINISTRE

Montreal Cops Have Tracked a Journalist's Cellphone for the Past Year
Montreal police, investigating the possibility of crooked cops on the force, obtained warrants to surveil a journalist's iPhone, and even obtained permission to use his GPS chip to track his whereabouts at all time. But the **federal minister of public safety, Ralph Goodale, stopped short of discouraging police forces from going to the courts to obtain judicial orders against journalists**. Asked directly by NDP Member of Parliament Matthew Dubé on Monday about whether he'll issue a directive to create more formal rules around how police deal with journalists, **Goodale would only say that *"we take the***

freedom of the press in this country very, very seriously." Dubé raised the question after on Monday after Montreal newspaper La Presse published details on surveillances warrants, at least 24 in total, obtained to surveil journalist Patrick Lagacé. The MP also referenced another case, where federal police are working to obtain chat records from a VICE journalist's cell phone, as evidence that action needs to be taken. Vice News

SPVM: le ministre Coiteux est surpris par une procédure contre un journaliste
Le ministre de la Sécurité publique, Martin Coiteux, a exprimé sa surprise, lundi, en apprenant que la police a surveillé les appels téléphoniques d'un journaliste. M. Coiteux a entamé des vérifications pour établir si les procédures ont été respectées par le Service de police de la ville de Montréal (SPVM). «J'ai été très surpris et c'est pour ça qu'on fait des vérifications», a-t-il dit. La ministre de la Justice, Stéphanie Vallée, effectuera également une évaluation des procédures qui ont mené un tribunal à accorder à plusieurs reprises un mandat au SPVM, cette année… À Ottawa, **le ministre de la Sécurité publique, Ralph Goodale, a affirmé que la situation est toujours délicate quand le journalisme et les enquêtes policières se rencontrent. *«Il s'agit d'un cas qui relève des compétences provinciales, mais la position fédérale est d'affirmer que la liberté de presse est une valeur canadienne fondamentale»,* a-t-il dit.** La Presse Canadienne (L'actualité)

Affaire Lagacé : Goodale prêt pour «une discussion sérieuse» sur les règles policières
À la lumière de l'affaire Patrick Lagacé, **le ministre fédéral de la Sécurité publique Ralph Goodale se dit *« certainement prêt à avoir une discussion de politique sérieuse »* et *« à entendre les représentations »* des médias sur la façon dont les forces policières devraient concilier leurs enquêtes avec la protection des sources journalistiques et la liberté de presse. Le ministre Goodale, qui n'a pas voulu commenter le cas de Patrick Lagacé mais qui se dit *« profondément préoccupé par ce genre de dossier »,* s'assurera prochainement auprès du commissaire de la GRC Bob Paulson que les directives fédérales en vigueur sont respectées dans les faits.** Depuis 2003, une directive ministérielle demande aux forces policières de porter une « attention spéciale » au statut des médias dans le cadre d'enquêtes sur la sécurité nationale. ***« Au regard de ce dossier au Québec, qui est sous juridiction provinciale, c'est une question qui doit être posée [à la GRC]. Je n'ai pas encore eu l'occasion de le faire [hier], mais je le ferai [prochainement]. C'est une question juste de demander [à la GRC] de s'assurer que la directive ministérielle qui requiert un très haut standard soit appliquée dans les faits »,* dit le ministre Goodale en entrevue à La Presse. Le ministre Goodale, qui croit que la liberté de presse est *« une valeur fondamentale »* au Canada, n'a pas voulu s'avancer à savoir si des changements législatifs sont nécessaires afin de protéger la liberté de presse dans le cadre d'enquêtes policières. *« Nous devons traiter de cet enjeu sérieusement et je suis certainement prêt à entendre les représentations [des médias et d'associations de journalistes comme la FPJQ] sur ce qui pourrait être un meilleur ensemble de règles »,* dit le ministre Goodale…** La Sûreté du Québec a saisi en septembre l'ordinateur d'un journaliste du Journal de Montréal à la demande du Conseil de la magistrature en rapport avec un dossier traité par le conseil. **Le ministre Goodale, qui n'a pas voulu commenter sur ces cas précis, fait valoir que *« les cas vont suivre leur cours pour voir s'ils respectent les critères de la Cour suprême »* en matière de protection du matériel et des sources journalistiques.** La Presse

Liberals rapped as $900M unspent by Indigenous Affairs among 'lapsed' funding for fiscal 2016
Like the Harper government before it, the Trudeau government left billions of dollars unspent on everything from national parks to veterans services to economic development grants during the 2015-16 fiscal year. The so-called "lapsed" funding for fiscal 2016 is $9.7 billion, according to the Public Accounts of Canada. All of those unspent funds were used to pay down the federal debt. ublic Safety Canada, which includes the RCMP, the Correctional Service of Canada, and Canada Border Services Agency, was authorized to spend $9.2 billion in fiscal 2016 but left unspent 11.6 per cent of that — about $1 billion. **Scott Bardsley, press secretary to Public Safety Minister Ralph Goodale,** said the lion's share of the lapse — about $700 million — was related to disaster relief for the provinces that, while booked by the federal government in 2016, was not paid out. National Post

Pepper spray use with little accountability concerns prison watchdog
Canada's prison watchdog is raising red flags about the "go-to" use of pepper spray in federal penitentiaries, which his office found has tripled in a five-year period with little accountability. In his annual report tabled in Parliament Monday, Correctional Investigator Howard Sapers said pepper spray was used in 60 per cent of the 1,833 use-of-force incidents in 2015-2016. "The link between institutional safety and the increasing use and reliance on inflammatory agents is tenuous at best," said Sapers. The correctional investigator partly blamed the increase on a policy change back in September 2010 that allowed correctional officers to carry pepper spray canisters on their belts. Before then the chemical, which makes it hard to breath and see, was locked up. His report notes that there hasn't been a correlating increase in the severity of security incidents or threats to justify the increased use pepper spray. Sapers also called out what he termed a lack of monitoring and national oversight of how pepper spray is stored, weighed, inspected, assigned and controlled. CBC News; La Presse Canadienne (L'actualité)

The Number of Female Indigenous Prisoners in Canada Has Doubled in the Last Decade
The number of Indigenous people now represent more than a quarter of all inmates held in Canada's federal prisons, according to the new annual report from Canada's prison watchdog. And within the last decade, the number of female Indigenous inmates has doubled, while the population of male Indigenous inmates has increased by more than 50 percent. During that time, the federal inmate population increased by only 10 percent. "It's a shameful milestone in Canadian history," correctional investigator Howard Sapers told a press conference on Monday. His annual report, which also says Indigenous women represent 35 percent of inmates in federal prisons, serves to highlight his concerns about federal correctional facilities, which house offenders who have been sentenced to more than two years in prison... In addition to decrying the increase in Indigenous offenders, his report also sounds the alarm over a dramatic increase in guards using "inflammatory agents" such as pepper spray against inmates. The number of incidents involving the use of pepper spray against inmates has more than tripled since 2011, and more than one-third of those incidents involved inmates suffering from mental illnesses. Vice News

La Presse says Montreal police tracked journalist's iPhone for months
A Montreal journalist says he was furious when he learned that city police monitored his iPhone for months in order to find out who he was speaking with... The French-language newspaper reported it has learned at least 24 surveillance warrants were issued for Lagace's phone this year at the request of the police's special investigations unit. That section is responsible for looking into crime within the police force. Three of those warrants reportedly authorized police to get the phone numbers for all Lagace's incoming and outgoing texts and calls, while another allowed them to track the phone's location via its GPS chip. Lagace said police told him they obtained the court-issued warrants because they believed the target of one of their investigations was feeding him information. But he said the story in question was actually first reported on by a competitor, leading him to believe the investigation was actually a thinly veiled attempt to learn the identity of his sources within the police department... Reaction to La Presse's story was swift, with some unions and media organizations denouncing the police operation, and some opposition city councillors calling for Montreal's police chief to step aside while the matter is investigated. Canadian Press (Globe and Mail; CTV News; Herald News; Metro News); Montreal Gazette; Postmedia Network (Toronto Star)

Fort McMurray fire first responders honoured in Alberta legislature ceremony
Premier Rachel Notley and her government paid tribute Monday to those who came to Alberta's aid and rescue during the spring's devastating Fort McMurray wildfire. Notley said the fire devastated the lives of thousands of people but failed to cripple their spirit or resolve. Individuals representing nine first-responder agencies were recognized in a ceremony in the rotunda of the Alberta legislature... One of the recipients, Wood Buffalo fire Chief Darby Allen, said people are strong, but are still struggling with the

memories and reminders of the devastation. Canadian Press (Times Colonist; Winnipeg Free Press); CBC News; Fort McMurray Today

Canada not ready for catastrophic effects of climate change, report warns
Canada is not prepared to handle the devastating and costly effects of increased flooding and extreme weather brought on by climate change, according to a new report released Monday. The report from the University of Waterloo's Intact Centre on Climate Adaptation found governments at all levels across the country need to take immediate action to make the country's infrastructure – highways, railways and water supply systems- more resilient or face increasingly catastrophic financial loses in the future. "The country as a whole is not prepared for climate change, extreme weather events, with a primary focus on flooding," said Blair Feltmate, head of the Intact Centre on Climate Adaptation. "There was no particular province that was disproportionately good or bad compared to the other." CHML Hamilton

Alberta legislation aims to reduce human-caused wildfires
The Alberta government tabled legislation Monday that aims to reduce the number of human-caused wildfires in the province. Over the past five years, about 70 per cent of the wildfires in Alberta have been linked to human activity. The province said Bill 24, the Forest and Prairie Protection Amendment Act, will also enhance firefighting operations. Global News

Hunter and stepson reported overdue
Search and rescue teams have been called out to look for a 55-year-old man and his stepson, reported overdue Sunday from a hunting trip northeast of Quesnel. Glen Brooker and the 10-year-old, whose name was not provided, were to have ton into the area of Stoney Lake or Narrow Lake on Sunday and did not return home that night as planned. Ottawa terror suspect granted bail again after allegedly breaching conditions
An Ottawa terror suspect has been released from custody after he was charged with breaching some of his bail conditions while awaiting the outcome of his case. The RCMP arrested Tevis Gonyou-McLean in August on a terrorism peace bond for his alleged support of ISIL and was later granted bail on several conditions that included wearing a GPS monitoring device on his ankle and a ban on possessing any terrorist logos. On Oct. 25, the 24-year-old was arrested again after police allege he failed to report to the John Howard Society's bail supervisory program and reside at his pre-approved address, and that he damaged his ankle bracelet, thereby allegedly committing mischief. But his Ottawa lawyer, Biagio Del Greco, said the breaches were the result of a "miscommunication" and said the damage to the bracelet occurred while his client was in police custody and was unintentional. None of the breaches were related to alleged terrorist activity. Ottawa Citizen

Quebec hosts UNESCO conference on prevention of radicalization of young people

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Mammoth fine for importing woolly mammoth tusk
Border agents at the Ambassador Bridge fined two Canadians for under-reporting the value of antiques, which included a woolly mammoth tusk. Two Canadians returning from the U.S. in September brought along a haul of antiques, including the woolly mammoth tusk, according to Canada Border Services Agency. The two travellers reported the goods cost an estimated $760, but further estimates revealed the items were valued at $6,100. Border officials issued a $3,317 penalty for under-reporting the value. The items were eventually released to the owners. CBC News; Postmedia Network (Windsor Star)

Ottawa man gets 43-month sentence for forging immigration documents
An Ottawa man who forged documents to allow hundreds of immigrants to enter Canada has been sentenced to three-and-a-half years behind bars. Mohamed Farah Abdulle, 54, was sentenced Monday after being convicted last November on five charges relating to the immigration fraud scheme, according to a statement from the Canada Border Services Agency (CBSA). According to the CBSA, Abdulle had filed more than 170 fraudulent sponsorship applications for 528 people, all while collecting fees from the applicants for his services. CBC News

Border post in automated experiment
The border crossing at Morses Line is a tiny operation that's gone high tech to handle the traffic in slow periods. Described as a "sleepy border crossing" with few than 60 vehicles a day, there was a proposal at one point to close it down. Now the Canada Border Services Agency (CBSA) is testing new technology that could be the standard for border control at small and remote crossings across the country. But critics say the experiment is a threat to public safety. Radio Canada

John McCallum sets new base immigration target at 300,000 a year
The Liberal government is boosting the base number for immigrants to Canada to 300,000 to help drive economic growth as the country grapples with an aging demographic... McCallum said the new annual target will be set at 300,000. The target from 2011-2015 was 260,000 which increased to 300,000 in 2016 to account for the influx of Syrian refugees... More than half the 2016 total, 160,600, are in the economic category for skilled workers, business people and caregivers; 80,000 are in the family program for spouses, children, parents and grandparents; 55,800 are refugees and protected persons and another 3,600 are in the humanitarian category. CBC News

Law enforcement agencies around the world collaborate on international Darknet marketplace enforcement operation
A globally coordinated law enforcement action against the buyers and sellers of illicit drugs and other illegal activities using Darknet global marketplaces was conducted Oct. 22 to 28. "Operation Hyperion" was initiated by U.S. federal law enforcement, the Five Eyes Law Enforcement Group (Australia, Canada, New Zealand, the United Kingdom and the United States) and members of Europol, the European Union's law enforcement agency, as the first step in developing a more unified global law enforcement response to the growing usage of the Darknet by individuals seeking to buy and sell illicit drugs and other illegal goods and services... Operation Hyperion resulted in a number of law enforcement leads on cases related to the buying and selling of illicit drugs and other goods on the Darknet. This operation will also help law enforcement agencies continue to combat the trafficking of illicit goods and services on the Darknet through the identification of new smuggling networks and trends... International partners included Europol the United Kingdom's National Crime Agency; Australian Federal Police; New Zealand Police and New Zealand Customs Service; Canada's Royal Canadian Mounted Police, Canada Post and Canada Border Services Agency; The Netherlands; French Customs National Intelligence and Investigations Directorate; Finnish Customs; Swedish Police Authority and Swedish Customs; Ireland's

Garda National Drugs & Organised Crime Bureau; and Spain's Guardia Civil. U.S. Immigration and Customs Enforcement

Peace Bridge to close one lane for construction
As long as U.S. and Canada customs have the necessary staff available and suitable number of inspection lanes open, any traffic impacts related to the temporary closure of one lane on the Peace Bridge can be mitigated, according to the agency that owns and operates the international border crossing. The Peace Bridge will be reduced to two lanes between Nov. 15 and May 15 for an ongoing $100-million rehabilitation. Fort Erie Times

Liberals in denial about Monsef story
An opinion pieces states, "A file within the federal government has been opened to investigate Democratic Institutions Minister Maryam Monsef for citizenship fraud. And the Liberal government seems to be in denial about it. The Sun exclusively reported that a file was opened to investigate Monsef, who claims she only recently learned she was born in Iran, not Afghanistan. A number of complaints were received through a tip line created by Canada Border Service Agency (CBSA) and the Department of Immigration, Refugees and Citizenship Canada (IRCC), leading to an investigation. It remains unknown whether Monsef's proper birthplace information was included on her original refugee and citizenship application..." Postmedia Network (Toronto Sun)

RCMP not to blame for death of suspect who shot Golden Mountie: Police watchdog
The suspect who led police on a manhunt after shooting a Mountie near Golden died from head trauma and RCMP action or inaction was not to blame, B.C.'s police watchdog says. The provincial Independent Investigations Office launched a probe to determine whether there was any connection between the officers' actions and the death of Sheldon Kyle Thunderblanket, 40. Investigators concluded "there is no causal connection between death of the male affected person and actions or inactions of police," according to a Independent Investigations Office media release. RCMP nab 10 men for prostitution-related offences in Moncton
The Codiac RCMP arrested 10 men, aged 25 to 80, for attempting to obtain sexual services in Moncton in two separate busts earlier in October. The RCMP carried out two police operations Oct. 14 and 27 in the area of Dufferin Street targeting individuals attempting to buy services from sex trade workers. CBC News; CTV News

'We are seniors, why you hit me and my wife?': Elderly couple speak out about RCMP arrest
The elderly couple caught on camera being violently arrested by Coquitlam RCMP last week is speaking out. The incident happened on the evening of Oct. 26 after police were called to a strata meeting that allegedly got out of control. The video, which was posted on YouTube, appears to show an officer dragging a man down a staircase while another officer arrests a woman, who appears to fall at one point... Myung Ju Lee and his wife, Kap Su Lee, told Global News they spent the night in the hospital after ending up with bruises, cuts and scrapes as a result of the incident. "[The police] walked up and did not say anything. Just walked up and grabbed us," Myung Ju Lee said. Lee claims the strata meeting was

not over and there had been no screaming or fighting when police entered and grabbed him and his wife… Lee believes the police officers involved should not only apologize but lose their jobs. Additionally the couple wants compensation for their physical and mental anguish due to the incident. The couple have given a statement to Coquitlam police and will be getting a lawyer. Global News

RCMP vehicle involved in serious crash
An RCMP vehicle was involved in a serious crash Monday afternoon at one of the city's most notorious intersections. Emergency crews were called to the corner of Kenaston and McGillivray Boulevard for what appeared to be a two-vehicle crash. A light standard was seen sitting atop the police cruiser in the southbound lane of Kenaston. Front and side airbags were deployed. A van ended up in the westbound lane of McGillivray. No word yet on injuries. The intersection was highlighted eariler this year as having the second highest number of collisions in the city with 2,298 crashes between 2005 and 2014. Winnipeg Free Press; CTV News; CBC News

La Presse says Montreal police tracked journalist's iPhone for months
A Montreal journalist says he was furious when he learned that city police monitored his iPhone for months in order to find out who he was speaking with… The French-language newspaper reported it has learned at least 24 surveillance warrants were issued for Lagace's phone this year at the request of the police's special investigations unit. That section is responsible for looking into crime within the police force. Three of those warrants reportedly authorized police to get the phone numbers for all Lagace's incoming and outgoing texts and calls, while another allowed them to track the phone's location via its GPS chip. Lagace said police told him they obtained the court-issued warrants because they believed the target of one of their investigations was feeding him information. But he said the story in question was actually first reported on by a competitor, leading him to believe the investigation was actually a thinly veiled attempt to learn the identity of his sources within the police department… Reaction to La Presse's story was swift, with some unions and media organizations denouncing the police operation, and some opposition city councillors calling for Montreal's police chief to step aside while the matter is investigated. Canadian Press (Globe and Mail; CTV News; Herald News; Metro News); Montreal Gazette; Postmedia Network (Toronto Star)

Broadcast Media / Médias télédiffusés :

CTV News discussed the monitoring of Patrick Lagace's emails and phone calls by the Montreal Police as well as reactions to the revelation by the SPVP, Montreal City Councilors, the Minister of Public Security of Quebec, and the general public (CTV News, 18:15 ET, 19:15 ET)

Le chef du SPVM n'exclut pas que d'autres journalistes aient été placés sous surveillance
Le chef de police Philippe Pichet a pris la parole à 16 h 30 au quartier général du SPVM pour réagir à l'onde de choc créée par la mise sous surveillance du téléphone cellulaire de Patrick Lagacé. Le chef du SPVM a déclaré qu'il n'était pas insensible à l'affaire. «Cette enquête visait un de nos policiers et non Patrick Lagacé. C'est une situation qui a été traitée avec des moyens exceptionnels. Quand j'ai appris qu'un mandat a été demandé, je me suis assuré que nous respections toutes les règles», a-t-il dit. «Nous avons suivi les règles et le juge a autorisé le mandat», a-t-il rappelé. «Le SPVM reconnaît la liberté d'expression.» Répondant à la question d'un journaliste, il a précisé qu'il ne pouvait dire si d'autres journalistes ont été placés sous surveillance. Des vérifications à ce sujet sont en cours… Le ministre québécois de la Sécurité publique, Martin Coiteux, s'est dit «renversé» par ces révélations. La Presse; Radio Canada; CTV News

We're spied on more often than you think, journalists groups say
Canadians may be used to hearing about police tapping journalists' phones in China, or tailing them down the street in Turkey. But in Montreal, Canada? Unfortunately, say organizations like Canadian Journalists for Free Expression, it is happening a lot more than we think. "It's something we've been suspecting for a long time – that when this kind of power is in the hands of the police they will abuse it," said Tom Henheffer, executive director of CJFE. "I used to be cautious about drawing parallels with Canada and dictatorships like Turkey, China, Russia or Egypt. But the difference has started to erode, especially when it comes to privacy rights"... Montreal Gazette

Les pratiques du SPVM inquiètent Edward Snowden
Le lanceur d'alerte Edward Snowden, qui a mis à jour les activités de surveillance de masse de la NSA aux États-Unis, s'inquiète des pratiques du SPVM qui a espionné le journaliste de *La Presse* Patrick Lagacé. Dans un message publié sur le réseau social Twitter, Edward Snowden qui a fui en Russie par crainte des représailles dénonce la surveillance des journalistes en prenant l'exemple du journaliste de *La Presse*. «Êtes-vous un journaliste ? Le fait que la police vous espionne pour identifier vos sources n'est pas hypothétique. Ça se passe aujourd'hui», a écrit l'homme. Son message est accompagné d'un lien vers un article du quotidien montréalais *The Gazette* sur la surveillance dont le chroniqueur a été la cible le printemps dernier. La Presse

Lagacé espionné: «inacceptable», «troublant», réagit la classe politique
Pour le chef péquiste Jean-François Lisée, l'espionnage du journaliste de La Presse, Patrick Lagacé par la police de Montréal est « inacceptable » et devrait « cesser immédiatement ». Les révélations de La Presse laissent le chef péquiste « complètement outré », a-t-il dit dans une entrevue à 98,5 ce matin. « Le travail du journaliste fait partie de la démocratie, lance sans détour, Lisée, lui-même ancien journaliste. C'est un genre de soupape pour que des informations qui devraient circuler, mais ne circulent pas, puissent arriver aux lecteurs, aux citoyens, et même aux élus ». « Qu'un journaliste ait été sous enquête, que son téléphone ait été vu, qu'il ait été géolocalisé alors que la Cour suprême disait récemment que cela devrait être réservé à des cas exceptionnels - et c'est encore trop - que l'Assemblée nationale ait unanimement réprouvé en septembre dernier la saisie de l'ordinateur du journaliste du Journal de Montréal Michael Nguyen, que la police continue de tenter d'avoir des sources du côté des journalistes, c'est inacceptable. Il faut mettre un holà à ça ». La Presse

Spying on Montreal reporter an attack on free press
An opinion piece states, "For the second time in two months, a journalist reporting on matters related to the justice system has found his own rights egregiously compromised. These affronts to freedom of the press are deeply troubling. Starting last January, Montreal police spied on La Presse columnist Patrick Lagacé through his cellphone, obtaining his call records and tracking his movements, as part of what police said was an internal probe of anti-gang squad officers later charged with fabricating evidence. This is an outrageous violation of Lagacé's privacy and an attack on his role as a journalist in a democratic society. He was never a target of the probe nor suspected of any wrongdoing. And he was never even given an opportunity to safeguard his contacts from police scrutiny. In September, Journal de Montréal reporter Michaël Nguyen had his computer seized by the Sûreté du Québec after reporting on two judges under investigation by the Conseil de la magistrature... Police must be held to account for these heavy-handed tactics. But the judges and justices of the peace who signed off the police warrants have much to answer for, too..." Postmedia Network (Montreal Gazette); Globe and Mail

RCMP mourns one of its own
Insp. Tony Perry was found dead Friday morning in Happy-Valley-Goose Bay. Perry, who is originally from Deer Lake, joined the RCMP in 1988 and served in Nova Scotia until July 2015, when he was transferred to Newfoundland and Labrador. Most recently, Perry worked as a negotiator between police, aboriginal leaders and protesters at the Muskrat Falls hydroelectric project site. Foul play is not suspected. Western Star

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Pepper spray use with little accountability concerns prison watchdog
Canada's prison watchdog is raising red flags about the "go-to" use of pepper spray in federal penitentiaries, which his office found has tripled in a five-year period with little accountability. In his annual report tabled in Parliament Monday, Correctional Investigator Howard Sapers said pepper spray was used in 60 per cent of the 1,833 use-of-force incidents in 2015-2016. "The link between institutional safety and the increasing use and reliance on inflammatory agents is tenuous at best," said Sapers. The correctional investigator partly blamed the increase on a policy change back in September 2010 that allowed correctional officers to carry pepper spray canisters on their belts. Before then the chemical, which makes it hard to breath and see, was locked up. His report notes that there hasn't been a correlating increase in the severity of security incidents or threats to justify the increased use pepper spray. Sapers also called out what he termed a lack of monitoring and national oversight of how pepper spray is stored, weighed, inspected, assigned and controlled. CBC News; La Presse Canadienne (L'actualité)

Broadcast Media / Médias télédiffusés :

CTV News' Power Play interviewed Correctional Investigator Howard Sapers on the Correctional Investigator's 2015-2016 Annual Report and the use of pepper spray in federal penitentiaries. Rough Transcript (2016-10-31)

The Number of Female Indigenous Prisoners in Canada Has Doubled in the Last Decade
The number of Indigenous people now represent more than a quarter of all inmates held in Canada's federal prisons, according to the new annual report from Canada's prison watchdog. And within the last decade, the number of female Indigenous inmates has doubled, while the population of male Indigenous inmates has increased by more than 50 percent. During that time, the federal inmate population increased by only 10 percent. "It's a shameful milestone in Canadian history," correctional investigator Howard Sapers told a press conference on Monday. His annual report, which also says Indigenous women represent 35 percent of inmates in federal prisons, serves to highlight his concerns about federal correctional facilities, which house offenders who have been sentenced to more than two years in prison... In addition to decrying the increase in Indigenous offenders, his report also sounds the alarm over a dramatic increase in guards using "inflammatory agents" such as pepper spray against inmates. The number of incidents involving the use of pepper spray against inmates has more than tripled since 2011, and more than one-third of those incidents involved inmates suffering from mental illnesses. Vice News

Ontario premier calls inmate's 52-month segregation 'extremely disturbing'
The treatment of an inmate held in segregation for four years is "extremely disturbing," Ontario Premier Kathleen Wynne said Monday, but she declined to call it torture... Federal correctional investigator Howard Sapers called Capay's case "troubling," and said he had never before heard of someone being kept in such conditions. There have been cases, however, in the federal system in which offenders are kept in segregation for years, he said. "Until we have a legislated cap, I'm very concerned that long-term segregation and segregation that could go on almost indefinitely is still possible," Sapers said in Ottawa. Canadian Press (CTV News)

Dangerous offender status sought for man
It's been a long time coming, but the office of Kingston's Crown attorney is applying to seek a dangerous offender designation for a 39-year-old sexual predator initially sent to prison in 2004 for drugging and raping three women in North Bay between 1999 and 2002. The decision follows Rene R. Bourdon's convictions in Kingston's Superior Court on two new counts of sexual assault in the Kingston area; eight violations of the long-term supervision order imposed on him 12 years ago at his original sentencing; and fraudulent personation in the service of a sex scheme of Rube Goldberg complexity... In the first nine months following his release in November 2005, however, his release was suspended four times for violating conditions of the LTSO and he was shunted between all three (at that time) Ontario federal halfway houses directly operated by Correctional Service Canada. Known as community correctional centres, they're the the only halfway houses in the system that can't refuse to accept high-risk offenders... The Whig

St. Lawrence Parks Commission would like to continue Kingston Penitentiary tours
The prison that was once off-limits to most people has just completed its first full tourist season. Public tours of Kingston Penitentiary brought in thousands of visitors and millions of dollars over the past 5 months — making it Kingston's top attraction. The final "sold-out" tours concluded this weekend. The question now — will the once-notorious maximum security prison re-open next year? CKWS Kingston

Vancouver Coastal Health applies for 2 more supervised injection sites
Vancouver Coastal Health (VCH) has submitted applications to Health Canada to open two new supervised injection sites in Vancouver in the midst of an overdose crisis. The proposed supervised injection sites are located at the Downtown Eastside Mental Health and Substance Use Drop-In Centre (528 Powell Street) and the Heatley Integrated Health Centre (330 Heatley Street). "The evidence is clear that supervised consumption services reduce transmision of diseases and help to connect peopel to healthcare services," said B.C. Health Minister Terry Lake. "In the face of the current public health emergency, what is even more critical is the fact that more than three million injections have been done at Insite in the last 13 years and not one person has died of an overdose there." Insite, Canada's first supervised injection site, was opened in 2003 in Vancouver's Downtown Eastside. Metro News; CBC News

Vehicle seizures, extended zero tolerance as Saskatchewan tackles drunk driving
Proposed changes to impaired driving laws in Saskatchewan are being called a good first step by grieving families of people killed by drunk drivers. The changes include a three-day vehicle seizure for drivers who are charged for the first time with having a blood alcohol content over .04 and an extended a zero tolerance policy to all drivers under the age of 21. If passed, the new law would also extend mandatory ignition interlock durations for repeat drunk drivers and apply to those who refuse to provide a breath sample... The changes will take effect Jan. 1, if approved by the legislature. Canadian Press (Brandon Sun); Postmedia Network (Star Phoenix)

How North America Found Itself in the Grips of an Opioid Crisis
The story of today's prescription opioid overdose crisis didn't start this year, or ten years ago, or even 100 years ago. It starts with a plant—the opium poppy—that has been a part of human civilization for thousands of years... But how did we get here? The answer is a cautionary tale about the power of Big Pharma, the unintended consequences of government intervention, and the tenacity of drug markets. Vice News

Opioid overdose treatment kit requires training before use, but available soon
Government-funded kits announced this summer that will contain the antidote for the deadly drug Fentanyl and other opioid overdoses aren't on the streets yet... While there's no specific timeline, provincial officials are still promising a fall launch. The province announced funding for the Naloxone take-home kits in late August. According to the Department of Health, within days of that announcement, it struck a working group -- addictions experts, representatives of regional health authorities, government and the Aids Committee of Newfoundland and Labrador -- that has been meeting regularly. People who take the kit home have to be trained on its use and just last week, a train-the- trainer program got started. Telegram

Medical marijuana industry budding in Lachute
Medical marijuana is a growing industry in Canada. Doctors are increasingly prescribing marijuana to treat everything from cancer to back pain. There are currently 36 licensed medical marijuana facilities in the country, including 21 in Ontario. Two new facilities are expected to be opening in Lachute, one as early as next spring. Quebec currently has only one licensed facility, owned and operated by Gatineau-based Hydropothecary. After the city began the consultation process to rezone a section of the city for specific use by medical marijuana facilities, Lachute Mayor Carl Péloquin told The Review it received dozens of inquiries from interested companies. "I thought that it would be good to be ready and to have the right zoning, since it's now considered an acceptable therapy," said Péloquin. Council initially looked at the possibility of rezoning an industrial sector on Cristini Boulevard, but rejected the plan after nearly a dozen of the existing industries objected. After evaluating their options, Péloquin said council chose to begin the consultation process to rezone the area surrounding the Régie Intermunicipale Argenteuil Deux-Montagnes garbage dump, which is located on Chemin des Sources. The Review

CTV_PowerPlay
Federal correctional Investigator Howard Sapers is here to share the findings of a new report. #cdnpoli #ctvpp

alisoncrawford5
Sapers points out that RCMP use of force and pepper has gone down just as correctional officers use it more often. #hw

alisoncrawford5
Sapers says police services account for their use of force and pepper spray and Correctional Service Canada must do the same. #hw

alisoncrawford5
Sapers says lack of oversight, insufficient video footage, little documentation, makes it hard to see if pepper spray is used appropriately

alisoncrawford5
Sapers says pepper spray was used in 54% of use of force incidents when offenders were harming themselves. He says hardly therapeutic.

alisoncrawford5
Sapers says correctional officers often not following the rules for checking inmates' health after using pepper spray. #hw

alisoncrawford5
Sapers says 40% of use of force incidents at CSC psychiatric hospitals involved pepper spray. #hw

l_stone
Sapers says he's never heard of a similar case to Adam Capay - an inmate held in acrylic glass cell under artificial light for 24 hrs a day

l_stone
Since March 2005, aboriginal inmate population increased by 52%. Sapers again recommends a deputy commish for indigenous corrections

alisoncrawford5
Sapers says the increase is linked to pepper spray now being on officers' belts and not locked in designated control posts. #hw

MINISTER / MINISTRE

Montreal Cops Have Tracked a Journalist's Cellphone for the Past Year
Montreal police, investigating the possibility of crooked cops on the force, obtained warrants to surveil a journalist's iPhone, and even obtained permission to use his GPS chip to track his whereabouts at all time. But the **federal minister of public safety, Ralph Goodale, stopped short of discouraging police forces from going to the courts to obtain judicial orders against journalists**. Asked directly by NDP Member of Parliament Matthew Dubé on Monday about whether he'll issue a directive to create more formal rules around how police deal with journalists, **Goodale would only say that *"we take the***

freedom of the press in this country very, very seriously." Dubé raised the question after on Monday after Montreal newspaper La Presse published details on surveillances warrants, at least 24 in total, obtained to surveil journalist Patrick Lagacé. The MP also referenced another case, where federal police are working to obtain chat records from a VICE journalist's cell phone, as evidence that action needs to be taken. Vice News

SPVM: le ministre Coiteux est surpris par une procédure contre un journaliste
Le ministre de la Sécurité publique, Martin Coiteux, a exprimé sa surprise, lundi, en apprenant que la police a surveillé les appels téléphoniques d'un journaliste. M. Coiteux a entamé des vérifications pour établir si les procédures ont été respectées par le Service de police de la ville de Montréal (SPVM). «J'ai été très surpris et c'est pour ça qu'on fait des vérifications», a-t-il dit. La ministre de la Justice, Stéphanie Vallée, effectuera également une évaluation des procédures qui ont mené un tribunal à accorder à plusieurs reprises un mandat au SPVM, cette année... À Ottawa, **le ministre de la Sécurité publique, Ralph Goodale, a affirmé que la situation est toujours délicate quand le journalisme et les enquêtes policières se rencontrent. *«Il s'agit d'un cas qui relève des compétences provinciales, mais la position fédérale est d'affirmer que la liberté de presse est une valeur canadienne fondamentale»,* a-t-il dit.** La Presse Canadienne (L'actualité)

Affaire Lagacé : Goodale prêt pour «une discussion sérieuse» sur les règles policières
À la lumière de l'affaire Patrick Lagacé, **le ministre fédéral de la Sécurité publique Ralph Goodale se dit *« certainement prêt à avoir une discussion de politique sérieuse »* et *« à entendre les représentations »* des médias sur la façon dont les forces policières devraient concilier leurs enquêtes avec la protection des sources journalistiques et la liberté de presse. Le ministre Goodale, qui n'a pas voulu commenter le cas de Patrick Lagacé mais qui se dit *« profondément préoccupé par ce genre de dossier »,* s'assurera prochainement auprès du commissaire de la GRC Bob Paulson que les directives fédérales en vigueur sont respectées dans les faits.** Depuis 2003, une directive ministérielle demande aux forces policières de porter une « attention spéciale » au statut des médias dans le cadre d'enquêtes sur la sécurité nationale. ***« Au regard de ce dossier au Québec, qui est sous juridiction provinciale, c'est une question qui doit être posée [à la GRC]. Je n'ai pas encore eu l'occasion de le faire [hier], mais je le ferai [prochainement]. C'est une question juste de demander [à la GRC] de s'assurer que la directive ministérielle qui requiert un très haut standard soit appliquée dans les faits »,* dit le ministre Goodale en entrevue à La Presse. Le ministre Goodale, qui croit que la liberté de presse est *« une valeur fondamentale »* au Canada, n'a pas voulu s'avancer à savoir si des changements législatifs sont nécessaires afin de protéger la liberté de presse dans le cadre d'enquêtes policières. *« Nous devons traiter de cet enjeu sérieusement et je suis certainement prêt à entendre les représentations [des médias et d'associations de journalistes comme la FPJQ] sur ce qui pourrait être un meilleur ensemble de règles »,* dit le ministre Goodale...** La Sûreté du Québec a saisi en septembre l'ordinateur d'un journaliste du Journal de Montréal à la demande du Conseil de la magistrature en rapport avec un dossier traité par le conseil. **Le ministre Goodale, qui n'a pas voulu commenter sur ces cas précis, fait valoir que *« les cas vont suivre leur cours pour voir s'ils respectent les critères de la Cour suprême »* en matière de protection du matériel et des sources journalistiques.** La Presse

Liberals rapped as $900M unspent by Indigenous Affairs among 'lapsed' funding for fiscal 2016
Like the Harper government before it, the Trudeau government left billions of dollars unspent on everything from national parks to veterans services to economic development grants during the 2015-16 fiscal year. The so-called "lapsed" funding for fiscal 2016 is $9.7 billion, according to the Public Accounts of Canada. All of those unspent funds were used to pay down the federal debt. ublic Safety Canada, which includes the RCMP, the Correctional Service of Canada, and Canada Border Services Agency, was authorized to spend $9.2 billion in fiscal 2016 but left unspent 11.6 per cent of that — about $1 billion. **Scott Bardsley, press secretary to Public Safety Minister Ralph Goodale,** said the lion's share of the lapse — about $700 million — was related to disaster relief for the provinces that, while booked by the federal government in 2016, was not paid out. National Post

Pepper spray use with little accountability concerns prison watchdog
Canada's prison watchdog is raising red flags about the "go-to" use of pepper spray in federal penitentiaries, which his office found has tripled in a five-year period with little accountability. In his annual report tabled in Parliament Monday, Correctional Investigator Howard Sapers said pepper spray was used in 60 per cent of the 1,833 use-of-force incidents in 2015-2016. "The link between institutional safety and the increasing use and reliance on inflammatory agents is tenuous at best," said Sapers. The correctional investigator partly blamed the increase on a policy change back in September 2010 that allowed correctional officers to carry pepper spray canisters on their belts. Before then the chemical, which makes it hard to breath and see, was locked up. His report notes that there hasn't been a correlating increase in the severity of security incidents or threats to justify the increased use pepper spray. Sapers also called out what he termed a lack of monitoring and national oversight of how pepper spray is stored, weighed, inspected, assigned and controlled. CBC News; La Presse Canadienne (L'actualité)

The Number of Female Indigenous Prisoners in Canada Has Doubled in the Last Decade
The number of Indigenous people now represent more than a quarter of all inmates held in Canada's federal prisons, according to the new annual report from Canada's prison watchdog. And within the last decade, the number of female Indigenous inmates has doubled, while the population of male Indigenous inmates has increased by more than 50 percent. During that time, the federal inmate population increased by only 10 percent. "It's a shameful milestone in Canadian history," correctional investigator Howard Sapers told a press conference on Monday. His annual report, which also says Indigenous women represent 35 percent of inmates in federal prisons, serves to highlight his concerns about federal correctional facilities, which house offenders who have been sentenced to more than two years in prison... In addition to decrying the increase in Indigenous offenders, his report also sounds the alarm over a dramatic increase in guards using "inflammatory agents" such as pepper spray against inmates. The number of incidents involving the use of pepper spray against inmates has more than tripled since 2011, and more than one-third of those incidents involved inmates suffering from mental illnesses. Vice News

La Presse says Montreal police tracked journalist's iPhone for months
A Montreal journalist says he was furious when he learned that city police monitored his iPhone for months in order to find out who he was speaking with... The French-language newspaper reported it has learned at least 24 surveillance warrants were issued for Lagace's phone this year at the request of the police's special investigations unit. That section is responsible for looking into crime within the police force. Three of those warrants reportedly authorized police to get the phone numbers for all Lagace's incoming and outgoing texts and calls, while another allowed them to track the phone's location via its GPS chip. Lagace said police told him they obtained the court-issued warrants because they believed the target of one of their investigations was feeding him information. But he said the story in question was actually first reported on by a competitor, leading him to believe the investigation was actually a thinly veiled attempt to learn the identity of his sources within the police department... Reaction to La Presse's story was swift, with some unions and media organizations denouncing the police operation, and some opposition city councillors calling for Montreal's police chief to step aside while the matter is investigated. Canadian Press (Globe and Mail; CTV News; Herald News; Metro News); Montreal Gazette; Postmedia Network (Toronto Star)

Fort McMurray fire first responders honoured in Alberta legislature ceremony
Premier Rachel Notley and her government paid tribute Monday to those who came to Alberta's aid and rescue during the spring's devastating Fort McMurray wildfire. Notley said the fire devastated the lives of thousands of people but failed to cripple their spirit or resolve. Individuals representing nine first-responder agencies were recognized in a ceremony in the rotunda of the Alberta legislature... One of the recipients, Wood Buffalo fire Chief Darby Allen, said people are strong, but are still struggling with the

memories and reminders of the devastation. Canadian Press (Times Colonist; Winnipeg Free Press); CBC News; Fort McMurray Today

Canada not ready for catastrophic effects of climate change, report warns
Canada is not prepared to handle the devastating and costly effects of increased flooding and extreme weather brought on by climate change, according to a new report released Monday. The report from the University of Waterloo's Intact Centre on Climate Adaptation found governments at all levels across the country need to take immediate action to make the country's infrastructure – highways, railways and water supply systems- more resilient or face increasingly catastrophic financial loses in the future. "The country as a whole is not prepared for climate change, extreme weather events, with a primary focus on flooding," said Blair Feltmate, head of the Intact Centre on Climate Adaptation. "There was no particular province that was disproportionately good or bad compared to the other." CHML Hamilton

Alberta legislation aims to reduce human-caused wildfires
The Alberta government tabled legislation Monday that aims to reduce the number of human-caused wildfires in the province. Over the past five years, about 70 per cent of the wildfires in Alberta have been linked to human activity. The province said Bill 24, the Forest and Prairie Protection Amendment Act, will also enhance firefighting operations. Global News

Hunter and stepson reported overdue
Search and rescue teams have been called out to look for a 55-year-old man and his stepson, reported overdue Sunday from a hunting trip northeast of Quesnel. Glen Brooker and the 10-year-old, whose name was not provided, were to have ton into the area of Stoney Lake or Narrow Lake on Sunday and did not return home that night as planned. Ottawa terror suspect granted bail again after allegedly breaching conditions
An Ottawa terror suspect has been released from custody after he was charged with breaching some of his bail conditions while awaiting the outcome of his case. The RCMP arrested Tevis Gonyou-McLean in August on a terrorism peace bond for his alleged support of ISIL and was later granted bail on several conditions that included wearing a GPS monitoring device on his ankle and a ban on possessing any terrorist logos. On Oct. 25, the 24-year-old was arrested again after police allege he failed to report to the John Howard Society's bail supervisory program and reside at his pre-approved address, and that he damaged his ankle bracelet, thereby allegedly committing mischief. But his Ottawa lawyer, Biagio Del Greco, said the breaches were the result of a "miscommunication" and said the damage to the bracelet occurred while his client was in police custody and was unintentional. None of the breaches were related to alleged terrorist activity. Ottawa Citizen

Quebec is hosting an important conference on the links between radicalization and the Internet. A UNESCO conference called "Youth and the Internet: Fighting Radicalization and Extremism" is taking place in Quebec City. It started Sunday night and continues until Tuesday. Global News

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Mammoth fine for importing woolly mammoth tusk
Border agents at the Ambassador Bridge fined two Canadians for under-reporting the value of antiques, which included a woolly mammoth tusk. Two Canadians returning from the U.S. in September brought along a haul of antiques, including the woolly mammoth tusk, according to Canada Border Services Agency. The two travellers reported the goods cost an estimated $760, but further estimates revealed the items were valued at $6,100. Border officials issued a $3,317 penalty for under-reporting the value. The items were eventually released to the owners. CBC News; Postmedia Network (Windsor Star)

Ottawa man gets 43-month sentence for forging immigration documents
An Ottawa man who forged documents to allow hundreds of immigrants to enter Canada has been sentenced to three-and-a-half years behind bars. Mohamed Farah Abdulle, 54, was sentenced Monday after being convicted last November on five charges relating to the immigration fraud scheme, according to a statement from the Canada Border Services Agency (CBSA). According to the CBSA, Abdulle had filed more than 170 fraudulent sponsorship applications for 528 people, all while collecting fees from the applicants for his services. CBC News

Border post in automated experiment
The border crossing at Morses Line is a tiny operation that's gone high tech to handle the traffic in slow periods. Described as a "sleepy border crossing" with few than 60 vehicles a day, there was a proposal at one point to close it down. Now the Canada Border Services Agency (CBSA) is testing new technology that could be the standard for border control at small and remote crossings across the country. But critics say the experiment is a threat to public safety. Radio Canada

John McCallum sets new base immigration target at 300,000 a year
The Liberal government is boosting the base number for immigrants to Canada to 300,000 to help drive economic growth as the country grapples with an aging demographic... McCallum said the new annual target will be set at 300,000. The target from 2011-2015 was 260,000 which increased to 300,000 in 2016 to account for the influx of Syrian refugees... More than half the 2016 total, 160,600, are in the economic category for skilled workers, business people and caregivers; 80,000 are in the family program for spouses, children, parents and grandparents; 55,800 are refugees and protected persons and another 3,600 are in the humanitarian category. CBC News

Law enforcement agencies around the world collaborate on international Darknet marketplace enforcement operation
A globally coordinated law enforcement action against the buyers and sellers of illicit drugs and other illegal activities using Darknet global marketplaces was conducted Oct. 22 to 28. "Operation Hyperion" was initiated by U.S. federal law enforcement, the Five Eyes Law Enforcement Group (Australia, Canada, New Zealand, the United Kingdom and the United States) and members of Europol, the European Union's law enforcement agency, as the first step in developing a more unified global law enforcement response to the growing usage of the Darknet by individuals seeking to buy and sell illicit drugs and other illegal goods and services... Operation Hyperion resulted in a number of law enforcement leads on cases related to the buying and selling of illicit drugs and other goods on the Darknet. This operation will also help law enforcement agencies continue to combat the trafficking of illicit goods and services on the Darknet through the identification of new smuggling networks and trends... International partners included Europol the United Kingdom's National Crime Agency; Australian Federal Police; New Zealand Police and New Zealand Customs Service; Canada's Royal Canadian Mounted Police, Canada Post and Canada Border Services Agency; The Netherlands; French Customs National Intelligence and Investigations Directorate; Finnish Customs; Swedish Police Authority and Swedish Customs; Ireland's

Garda National Drugs & Organised Crime Bureau; and Spain's Guardia Civil. U.S. Immigration and Customs Enforcement

Peace Bridge to close one lane for construction
As long as U.S. and Canada customs have the necessary staff available and suitable number of inspection lanes open, any traffic impacts related to the temporary closure of one lane on the Peace Bridge can be mitigated, according to the agency that owns and operates the international border crossing. The Peace Bridge will be reduced to two lanes between Nov. 15 and May 15 for an ongoing $100-million rehabilitation. Fort Erie Times

Liberals in denial about Monsef story
An opinion pieces states, "A file within the federal government has been opened to investigate Democratic Institutions Minister Maryam Monsef for citizenship fraud. And the Liberal government seems to be in denial about it. The Sun exclusively reported that a file was opened to investigate Monsef, who claims she only recently learned she was born in Iran, not Afghanistan. A number of complaints were received through a tip line created by Canada Border Service Agency (CBSA) and the Department of Immigration, Refugees and Citizenship Canada (IRCC), leading to an investigation. It remains unknown whether Monsef's proper birthplace information was included on her original refugee and citizenship application..." Postmedia Network (Toronto Sun)

RCMP not to blame for death of suspect who shot Golden Mountie: Police watchdog
The suspect who led police on a manhunt after shooting a Mountie near Golden died from head trauma and RCMP action or inaction was not to blame, B.C.'s police watchdog says. The provincial Independent Investigations Office launched a probe to determine whether there was any connection between the officers' actions and the death of Sheldon Kyle Thunderblanket, 40. Investigators concluded "there is no causal connection between death of the male affected person and actions or inactions of police," according to a Independent Investigations Office media release. RCMP nab 10 men for prostitution-related offences in Moncton
The Codiac RCMP arrested 10 men, aged 25 to 80, for attempting to obtain sexual services in Moncton in two separate busts earlier in October. The RCMP carried out two police operations Oct. 14 and 27 in the area of Dufferin Street targeting individuals attempting to buy services from sex trade workers. CBC News; CTV News

'We are seniors, why you hit me and my wife?': Elderly couple speak out about RCMP arrest
The elderly couple caught on camera being violently arrested by Coquitlam RCMP last week is speaking out. The incident happened on the evening of Oct. 26 after police were called to a strata meeting that allegedly got out of control. The video, which was posted on YouTube, appears to show an officer dragging a man down a staircase while another officer arrests a woman, who appears to fall at one point... Myung Ju Lee and his wife, Kap Su Lee, told Global News they spent the night in the hospital after ending up with bruises, cuts and scrapes as a result of the incident. "[The police] walked up and did not say anything. Just walked up and grabbed us," Myung Ju Lee said. Lee claims the strata meeting was

not over and there had been no screaming or fighting when police entered and grabbed him and his wife… Lee believes the police officers involved should not only apologize but lose their jobs. Additionally the couple wants compensation for their physical and mental anguish due to the incident. The couple have given a statement to Coquitlam police and will be getting a lawyer. Global News

RCMP vehicle involved in serious crash
An RCMP vehicle was involved in a serious crash Monday afternoon at one of the city's most notorious intersections. Emergency crews were called to the corner of Kenaston and McGillivray Boulevard for what appeared to be a two-vehicle crash. A light standard was seen sitting atop the police cruiser in the southbound lane of Kenaston. Front and side airbags were deployed. A van ended up in the westbound lane of McGillivray. No word yet on injuries. The intersection was highlighted eariler this year as having the second highest number of collisions in the city with 2,298 crashes between 2005 and 2014. Winnipeg Free Press; CTV News; CBC News

La Presse says Montreal police tracked journalist's iPhone for months
A Montreal journalist says he was furious when he learned that city police monitored his iPhone for months in order to find out who he was speaking with… The French-language newspaper reported it has learned at least 24 surveillance warrants were issued for Lagace's phone this year at the request of the police's special investigations unit. That section is responsible for looking into crime within the police force. Three of those warrants reportedly authorized police to get the phone numbers for all Lagace's incoming and outgoing texts and calls, while another allowed them to track the phone's location via its GPS chip. Lagace said police told him they obtained the court-issued warrants because they believed the target of one of their investigations was feeding him information. But he said the story in question was actually first reported on by a competitor, leading him to believe the investigation was actually a thinly veiled attempt to learn the identity of his sources within the police department… Reaction to La Presse's story was swift, with some unions and media organizations denouncing the police operation, and some opposition city councillors calling for Montreal's police chief to step aside while the matter is investigated. Canadians may be used to hearing about police tapping journalists' phones in China, or tailing them down the street in Turkey. But in Montreal, Canada? Unfortunately, say organizations like Canadian Journalists for Free Expression, it is happening a lot more than we think. "It's something we've been suspecting for a long time – that when this kind of power is in the hands of the police they will abuse it," said Tom Henheffer, executive director of CJFE. "I used to be cautious about drawing parallels with Canada and dictatorships like Turkey, China, Russia or Egypt. But the difference has started to erode, especially when it comes to privacy rights"... Montreal Gazette

Les pratiques du SPVM inquiètent Edward Snowden
Le lanceur d'alerte Edward Snowden, qui a mis à jour les activités de surveillance de masse de la NSA aux États-Unis, s'inquiète des pratiques du SPVM qui a espionné le journaliste de *La Presse* Patrick Lagacé. Dans un message publié sur le réseau social Twitter, Edward Snowden qui a fui en Russie par crainte des représailles dénonce la surveillance des journalistes en prenant l'exemple du journaliste de *La Presse*. «Êtes-vous un journaliste ? Le fait que la police vous espionne pour identifier vos sources n'est pas hypothétique. Ça se passe aujourd'hui», a écrit l'homme. Son message est accompagné d'un lien vers un article du quotidien montréalais *The Gazette* sur la surveillance dont le chroniqueur a été la cible le printemps dernier. La Presse

Lagacé espionné: «inacceptable», «troublant», réagit la classe politique
Pour le chef péquiste Jean-François Lisée, l'espionnage du journaliste de La Presse, Patrick Lagacé par la police de Montréal est « inacceptable » et devrait « cesser immédiatement ». Les révélations de La Presse laissent le chef péquiste « complètement outré », a-t-il dit dans une entrevue à 98,5 ce matin. « Le travail du journaliste fait partie de la démocratie, lance sans détour, Lisée, lui-même ancien journaliste. C'est un genre de soupape pour que des informations qui devraient circuler, mais ne circulent pas, puissent arriver aux lecteurs, aux citoyens, et même aux élus ». « Qu'un journaliste ait été sous enquête, que son téléphone ait été vu, qu'il ait été géolocalisé alors que la Cour suprême disait récemment que cela devrait être réservé à des cas exceptionnels - et c'est encore trop - que l'Assemblée nationale ait unanimement réprouvé en septembre dernier la saisie de l'ordinateur du journaliste du Journal de Montréal Michael Nguyen, que la police continue de tenter d'avoir des sources du côté des journalistes, c'est inacceptable. Il faut mettre un holà à ça ». La Presse

Spying on Montreal reporter an attack on free press
An opinion piece states, "For the second time in two months, a journalist reporting on matters related to the justice system has found his own rights egregiously compromised. These affronts to freedom of the press are deeply troubling. Starting last January, Montreal police spied on La Presse columnist Patrick Lagacé through his cellphone, obtaining his call records and tracking his movements, as part of what police said was an internal probe of anti-gang squad officers later charged with fabricating evidence. This is an outrageous violation of Lagacé's privacy and an attack on his role as a journalist in a democratic society. He was never a target of the probe nor suspected of any wrongdoing. And he was never even given an opportunity to safeguard his contacts from police scrutiny. In September, Journal de Montréal reporter Michaël Nguyen had his computer seized by the Sûreté du Québec after reporting on two judges under investigation by the Conseil de la magistrature... Police must be held to account for these heavy-handed tactics. But the judges and justices of the peace who signed off the police warrants have much to answer for, too..." Postmedia Network (Montreal Gazette); Globe and Mail

RCMP mourns one of its own
Insp. Tony Perry was found dead Friday morning in Happy-Valley-Goose Bay. Perry, who is originally from Deer Lake, joined the RCMP in 1988 and served in Nova Scotia until July 2015, when he was transferred to Newfoundland and Labrador. Most recently, Perry worked as a negotiator between police, aboriginal leaders and protesters at the Muskrat Falls hydroelectric project site. Foul play is not suspected. Western Star

Ontario premier calls inmate's 52-month segregation 'extremely disturbing'
The treatment of an inmate held in segregation for four years is "extremely disturbing," Ontario Premier Kathleen Wynne said Monday, but she declined to call it torture... Federal correctional investigator Howard Sapers called Capay's case "troubling," and said he had never before heard of someone being kept in such conditions. There have been cases, however, in the federal system in which offenders are kept in segregation for years, he said. "Until we have a legislated cap, I'm very concerned that long-term segregation and segregation that could go on almost indefinitely is still possible," Sapers said in Ottawa. Canadian Press (CTV News)

Dangerous offender status sought for man
It's been a long time coming, but the office of Kingston's Crown attorney is applying to seek a dangerous offender designation for a 39-year-old sexual predator initially sent to prison in 2004 for drugging and raping three women in North Bay between 1999 and 2002. The decision follows Rene R. Bourdon's convictions in Kingston's Superior Court on two new counts of sexual assault in the Kingston area; eight violations of the long-term supervision order imposed on him 12 years ago at his original sentencing; and fraudulent personation in the service of a sex scheme of Rube Goldberg complexity... In the first nine months following his release in November 2005, however, his release was suspended four times for violating conditions of the LTSO and he was shunted between all three (at that time) Ontario federal halfway houses directly operated by Correctional Service Canada. Known as community correctional centres, they're the the only halfway houses in the system that can't refuse to accept high-risk offenders... The Whig

St. Lawrence Parks Commission would like to continue Kingston Penitentiary tours
The prison that was once off-limits to most people has just completed its first full tourist season. Public tours of Kingston Penitentiary brought in thousands of visitors and millions of dollars over the past 5 months — making it Kingston's top attraction. The final "sold-out" tours concluded this weekend. The question now — will the once-notorious maximum security prison re-open next year? CKWS Kingston

Vancouver Coastal Health applies for 2 more supervised injection sites
Vancouver Coastal Health (VCH) has submitted applications to Health Canada to open two new supervised injection sites in Vancouver in the midst of an overdose crisis. The proposed supervised injection sites are located at the Downtown Eastside Mental Health and Substance Use Drop-In Centre (528 Powell Street) and the Heatley Integrated Health Centre (330 Heatley Street). "The evidence is clear that supervised consumption services reduce transmision of diseases and help to connect peopel to healthcare services," said B.C. Health Minister Terry Lake. "In the face of the current public health emergency, what is even more critical is the fact that more than three million injections have been done at Insite in the last 13 years and not one person has died of an overdose there." Insite, Canada's first supervised injection site, was opened in 2003 in Vancouver's Downtown Eastside. Metro News; CBC News

Vehicle seizures, extended zero tolerance as Saskatchewan tackles drunk driving
Proposed changes to impaired driving laws in Saskatchewan are being called a good first step by grieving families of people killed by drunk drivers. The changes include a three-day vehicle seizure for drivers who are charged for the first time with having a blood alcohol content over .04 and an extended a zero tolerance policy to all drivers under the age of 21. If passed, the new law would also extend mandatory ignition interlock durations for repeat drunk drivers and apply to those who refuse to provide a breath sample... The changes will take effect Jan. 1, if approved by the legislature. Canadian Press (Brandon Sun); Postmedia Network (Star Phoenix)

How North America Found Itself in the Grips of an Opioid Crisis
The story of today's prescription opioid overdose crisis didn't start this year, or ten years ago, or even 100 years ago. It starts with a plant—the opium poppy—that has been a part of human civilization for thousands of years... But how did we get here? The answer is a cautionary tale about the power of Big Pharma, the unintended consequences of government intervention, and the tenacity of drug markets. Vice News

Opioid overdose treatment kit requires training before use, but available soon
Government-funded kits announced this summer that will contain the antidote for the deadly drug Fentanyl and other opioid overdoses aren't on the streets yet... While there's no specific timeline, provincial officials are still promising a fall launch. The province announced funding for the Naloxone take-home kits in late August. According to the Department of Health, within days of that announcement, it struck a working group -- addictions experts, representatives of regional health authorities, government and the Aids Committee of Newfoundland and Labrador -- that has been meeting regularly. People who take the kit home have to be trained on its use and just last week, a train-the- trainer program got started. Telegram

Medical marijuana industry budding in Lachute
Medical marijuana is a growing industry in Canada. Doctors are increasingly prescribing marijuana to treat everything from cancer to back pain. There are currently 36 licensed medical marijuana facilities in the country, including 21 in Ontario. Two new facilities are expected to be opening in Lachute, one as early as next spring. Quebec currently has only one licensed facility, owned and operated by Gatineau-based Hydropothecary. After the city began the consultation process to rezone a section of the city for specific use by medical marijuana facilities, Lachute Mayor Carl Péloquin told The Review it received dozens of inquiries from interested companies. "I thought that it would be good to be ready and to have the right zoning, since it's now considered an acceptable therapy," said Péloquin. Council initially looked at the possibility of rezoning an industrial sector on Cristini Boulevard, but rejected the plan after nearly a dozen of the existing industries objected. After evaluating their options, Péloquin said council chose to begin the consultation process to rezone the area surrounding the Régie Intermunicipale Argenteuil Deux-Montagnes garbage dump, which is located on Chemin des Sources. Government misses Halloween deadline to clear Phoenix backlog
Public Services and Procurement Canada has missed its promised Halloween deadline to clear the backlog of pay problems caused by the Phoenix pay system, as the cases of 22,000 public servants remain unresolved, the department's top bureaucrat says. Deputy minister Marie Lemay said the department couldn't meet the self-imposed Oct. 31 target because the remaining cases are older and much more complicated than the front end of the pile and require much more work than expected. Lemay said she is disappointed the deadline was missed but that the department did everything it could. Ottawa Citizen

Surveillance de journalistes : mutisme à la GRC et au SCRS
Alors que la SQ et la Ville de Montréal ont confirmé avoir mis des journalistes sous surveillance, la GRC et le SCRS, les deux corps policiers fédéraux, ne veulent pas confirmer s'ils ont déjà adopté de telles pratiques, et le cas échéant à quelle fréquence. La GRC précise seulement que «les cas où des enquêtes de la GRC concernant des journalistes ont eu lieu sont extrêmement rares». Le commissaire de la GRC Bob Paulson a dit mercredi «ne pas être au courant que nous avons des enquêtes actives ou de la surveillance à l'égard de journalistes», mais la GRC n'a pas voulu confirmer si des journalistes ont été

surveillés dans le cadre de ses enquêtes.... Tout en précisant «reconnaître» et «respecter [...] l'importance de la liberté et de l'indépendance de la presse», la Gendarmerie royale du Canada (GRC) a indiqué ne pas pouvoir commenter «l'existence d'enquêtes en cours» ou «discuter des détails opérationnels» d'enquêtes passées. La GRC n'a pas précisé à *La Presse* si elle effectuait, comme l'a fait la Sûreté du Québec cette semaine, un examen de ses enquêtes pour déterminer si des journalistes ont été mis sous surveillance... Le Service canadien de renseignement de sécurité (SCRS) n'a pas répondu aux questions de *La Presse* à savoir si l'organisme fédéral responsable des enquêtes de sécurité nationale : 1) surveille actuellement des journalistes, 2) en a surveillé par le passé, 3) mène actuellement des démarches pour répondre à ces questions et a l'intention de rendre public le résultat de ces démarches. De son côté, le gouvernement Trudeau n'a pas l'intention de demander à la GRC et au SCRS de divulguer de telles informations, estimant qu'il n'était «pas approprié de commenter sur les questions opérationnelles». ***«Bob Paulson, commissaire de la GRC, a confirmé qu'aucun journaliste ne fait actuellement l'objet d'une surveillance par la GRC. Le ministre Goodale examine la Directive ministérielle sur les enquêtes dans les secteurs sensibles existante afin de s'assurer que les plus grands soins sont pris lorsque des enquêtes criminelles et du journalisme se recoupent et que la valeur canadienne fondamentale de la liberté de presse est protégée. Il est toujours ouvert à recevoir des représentations sur ce qu'il y a d'autre à faire pour protéger les libertés fondamentales de la presse»,* indique Scott Bardsley, attaché de presse du ministre fédéral de la Sécurité publique Ralph Goodale.** La Presse

Senator André Pratte urges stronger protection for reporters, sources
Independent senator and former journalist Andre Pratte wants the Liberal government to look seriously at beefing up protection for reporters and their sources. Pratte says if the government shows no interest, he'll pursue the idea himself. It is "quite worrisome" that Montreal police obtained warrants to monitor one of his former colleagues, La Presse columnist Patrick Lagace, Pratte said Wednesday in an interview... **Public Safety Minister Ralph Goodale says the Supreme Court of Canada has already explicitly laid out the test that must be satisfied when police investigations intersect with media freedoms...** Despite his apparent reluctance to revisit the existing regime, **Goodale left the door open a crack*. "If there are those in the federation of journalists or others who have recommendations to make about how this can be more abundantly emphasized, I would certainly be glad to receive their recommendations,"* he said Tuesday. Pratte said he would contact the Liberal government for a direct answer about whether it will consider a new law.** Canadian Press (Globe and Mail; Metro News; Toronto Star)

Deltell wonders if he was monitored in Lagacé surveillance case
Conservative finance critic and former television journalist Gerard Deltell said he's "shocked" by revelations that police were monitoring La Presse journalist Patrick Lagacé's iPhone and thinks there's merit in starting a discussion on whether the laws protecting journalists and their sources are sufficient... But there don't seem to be immediate signs of cabinet interest in revisiting the laws. Public Safety Minister Ralph Goodale said yesterday the Supreme Court has already, in a "very clear ruling," laid out the conditions for how to proceed when police investigations run up against freedom of the press. The NDP's line of attack has been to pressure the federal government to say how many journalists are now being monitored**. Goodale said today that question has to be answered by the RCMP, and that Commissioner Bob Paulson's answer was "no." *"There are no such investigations to the best of his knowledge and he would certainly know,"* Goodale said**. Yesterday, Paulson told reporters he's "not aware that we have any ongoing investigations or surveillance activity against journalists." The RCMP also said it wouldn't provide details for "security reasons." iPolitics

Trudeau promet de «faire ce qui est nécessaire» pour la liberté de la presse
Le premier ministre Justin Trudeau promet que son gouvernement « va faire ce qui est nécessaire » pour défendre la liberté de la presse, a-t-il indiqué ce matin en rapport avec l'affaire Patrick Lagacé, dont le téléphone portable a été surveillé pendant six mois par le Service de police de la Ville de Montréal. « La préoccupation que nous avons tous par rapport à la protection de la liberté d'expression, la liberté de la presse, est soulignée par ce qui vient juste de se passer. On va regarder attentivement les conversations qui vont avoir lieu entre l'hôtel de ville de Montréal et les Services de police de Montréal, mais certainement, comme on a dit plusieurs fois, ce gouvernement est à la défense de la liberté de la presse

et on va faire ce qui est nécessaire pour l'encadrer s'il y a d'autres étapes nécessaires », a dit le premier ministre Trudeau à l'entrée du caucus libéral à la Chambre des communes. Le gouvernement Trudeau a annoncé mardi entreprendre un « examen » de la directive ministérielle de 2003 demandant aux forces policières de porter une « attention spéciale » au statut des médias dans le cadre d'enquêtes sur la sécurité nationale. Le cabinet du **ministre Goodale** n'était pas en mesure d'indiquer si cet « examen » comprendrait des consultations publiques... Le Nouveau Parti démocratique demande une enquête publique sur la question, tandis que les conservateurs veulent que le **ministre Goodale** fasse un examen de la situation et fasse s'expliquer en comité parlementaire... Le **ministre Goodale** n'a pas voulu indiquer mardi, en réponse à une question du chef néo-démocrate Thomas Mulcair à la Chambre des communes, si la Gendarmerie royale du Canada (GRC) ou le Service canadien du renseignement de sécurité (SCRS) espionnent actuellement des journalistes. Le commissaire de la GRC Bob Paulson a indiqué mardi « ne pas être au courant que nous avons des enquêtes actives ou de la surveillance à l'égard de journalistes ». **Le cabinet du ministre Goodale estime qu'il *« n'est pas convenable que le ministre formule des commentaires sur les enquêtes en cours ».*** La GRC est actuellement devant les tribunaux afin d'obtenir du matériel journalistique d'un journaliste de VICE au sujet d'un présumé terroriste. En 2007 et en 2008, la GRC avait aussi autorisé la filature du journaliste de La Presse Joël-Denis Bellavance. ***« C'était un cas clair où les règles en vigueur n'ont pas été suivies [par la GRC] »,* disait le ministre Goodale en entrevue plus tôt cette semaine.** La Presse

La protection des sources journalistiques rebondit jusqu'à Ottawa
Alors que Justin Trudeau promet de faire le «nécessaire» pour défendre la liberté de presse, Thomas Mulcair demande la tenue d'une enquête fédérale... Le chef sortant du NPD, Thomas Mulcair, n'est pour sa part pas rassuré par la situation et exige la tenue d'une enquête au niveau fédéral pour s'assurer que les journalistes ne fassent pas l'objet d'une surveillance similaire de la part de la GRC. «Au Canada, en ce moment, il y a combien de journalistes qui sont surveillés soit par la GRC, soit par le SCRS? M. Goodale connaît la réponse. Il a refusé de répondre hier (mardi) et il n'a certainement pas répondu qu'il n'y en avait pas, donc il y en a. Alors moi, je m'attends à ce que Justin Trudeau tire ça au clair. C'est son obligation», a-t-il suggéré. **Le ministre fédéral de la Sécurité publique, Ralph Goodale, a indiqué qu'une directive ministérielle datant de 2003, visant à protéger certains secteurs incluant les médias ferait l'objet d'une révision. *«Ce que j'ai entrepris, c'est de m'assurer que toutes les directives émises par le ministre de la Sécurité publique répondent aux buts auxquels elles devaient répondre»,* a-t-il fait valoir. Le ministre a ajouté que le commissaire de la GRC, Bob Paulson, avait indiqué mardi ne pas être au courant de cas de journalistes qui feraient actuellement l'objet d'une telle surveillance.** Agence QMI (Journal de Quebec; Journal de Montreal)

TOP STORIES / MANCHETTES

La SQ confirme que les appels téléphoniques de six journalistes ont été ciblés
La Sûreté du Québec a confirmé, mercredi, qu'elle a enquêté sur les activités de six journalistes il y a trois ans. Le capitaine Guy Lapointe a affirmé que l'enquête portait sur la révélation de contenu d'écoutes électroniques. M. Lapointe a expliqué que la SQ a déclenché cette enquête à la suite d'allégations que des journalistes ou d'autres personnes avaient divulgué de telles informations. Le directeur général de la SQ, Martin Prud'homme, en poste depuis deux ans, a obtenu ces informations concernant un seul dossier au cours des dernières 20 années, a indiqué le porte-parole. Selon M. Lapointe, la SQ a obtenu une ordonnance en 2013 pour consulter les registres d'appels entrants et sortants de six journalistes. Cette procédure ne prévoyait aucune écoute électronique ni surveillance par géolocalisation des personnes visées, que la SQ n'a pas voulu identifier, mercredi. Par ailleurs, M. Prud'homme a réclamé mercredi au ministère de la Sécurité publique qu'une enquête soit effectuée par «un tiers indépendant» afin d'examiner le recours à cette méthode dans le cas de journalistes. M. Lapointe n'a pas précisé si ce mandat devrait être confié au Bureau des enquêtes indépendantes, comme le réclame le Parti québécois depuis des révélations qui concernent la police montréalaise cette semaine... Les journalistes de Radio-Canada Marie-Maude Denis, Isabelle Richer et Alain Gravel sont parmi les cibles de la SQ, tout comme Denis Lessard, de La Presse, et Éric Thibault, du Journal de Montréal. La Presse Canadienne (Le Soleil); Postmedia Network (National Post); Agence QMI (Journal de Québec; Journal de Montréal); Radio

Immigration detainee hunger strike in Ontario jail goes into third week
A group of immigration detainees at the Central East Correctional Centre (CECC) in Lindsay, Ontario, have been on a hunger strike for over two weeks to protest Canada's immigration detention system, says a migrants' rights advocacy group. Eighteen immigration detainees at the maximum security provincial prison located about 125 km northeast of Toronto began refusing meals on Oct. 17 to demand legislative changes to federal immigration rules that allow Canadian authorities to detain certain immigrants for an indefinite period, said Macdonald Scott, an immigration consultant with the Toronto law firm Carranza LLP. On Wednesday, only four detainees were able to continue the protest, the third such hunger strike by immigration detainees this year, Scott said. "They are fighting for the same demands, the main one being the presumptive period, that they be released after 90 days if they are not deported," Scott said... The detainees are also asking for a one-on-one meeting with federal **Public Safety Minister Ralph Goodale** to discuss the issue with him, he said. RCI

RCMP were afraid to let officers testify at inquest of Nunavut man shot by police
New details emerged into how a 30-year-old man was shot by RCMP at his own home as a coroner's inquest got underway in Igloolik, Nunavut, Tuesday — including the fact the RCMP was afraid to let its officers testify in person. On March 20, 2012, two RCMP officers went to the home of Felix Taqqaugaq after getting a call from someone in the community who became concerned after hearing Taqqaugaq ranting on the community's local radio station. Taqqaugaq had schizophrenia and was being treated for mental health issues, according to the coroner's facts. On the night he died, the officers met with him briefly on his porch before Taqqaugaq went inside, returned with a knife, and was shot three times. This week's inquest, led by Nunavut's chief coroner Padma Suramala, will shed more light on the events surrounding his death and the subsequent investigation by the Ottawa Police Service. On Tuesday, the coroner's jury was selected, but it's still not clear how exactly the process will unfold, and how exactly the officers involved will take part. CBC News

Why Adam Capay has spent 1,560 days in solitary
Renu Mandhane spent part of her day on Oct. 7 at the Indigenous friendship centre located on the outskirts of Thunder Bay, Ont. Mandhane, 39, is chief commissioner of the Ontario Human Rights Commission (OHCR), the 55-year-old body charged with preventing discrimination and advancing human rights in Ontario. Her office had organized the meeting with Indigenous leaders and community members to talk about discrimination and racial profiling. After the meeting was over, Mandhane organized an impromptu tour of the Thunder Bay Jail, a 170-bed facility built in 1926. "It's a s–thole," says Mike Lundy, a union president and a correctional officer at the jail... According to Ontario's Correctional Services, inmates are placed in administrative segregation when they are in need of protection, pose a threat to the health and safety of themselves or others, or are alleged to have committed a serious misconduct. "In Canada, we do not practise solitary confinement," a Public Safety Canada official, Kimberley Lavoie, told a UN meeting in Geneva on Oct. 25, a week after Mandhane revealed Capay's plight... Yet as Kimberley Savoie reinforced to the UN, Canada is adamant it doesn't practise solitary confinement. "Please note that the term 'solitary confinement' is not accurate or applicable within the Canadian penitentiary system," says Correctional Services Canada spokesperson Avely Serin. Canada does, however, practise "administrative segregation." "It is the separation, when specific legal requirements are met, of an inmate from other inmates," explains Serin. The difference between the two is often lost on government... Capay's case speaks to another troubling trend in Canadian prisons: Indigenous offenders serve much harder time than anyone else... "There is a group in Canada that keeps mysteriously dying,'" says University of Toronto sociology professor Sherene Razack. Many of these deaths occur because officials "will not touch, examine, or closely monitor Indigenous people in their care," Razack says. "This indifference kills." Adam Capay's treatment has drawn condemnation from all corners—including the very people responsible for his care. Maclean's

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

B.C. announces first step in province-wide earthquake warning system
Earthquake technology saves lives. Japan has it, the U.S is working on it, and now B.C. is beginning the process to get it in place — a province-wide earthquake early warning system. The province of B.C. has issued a formal request for expressions of interest on an earthquake early warning and seismic monitoring program. It's the first step to gain a better understanding of what sensors and networks are already in place, and what groups are interested in — and have the capacity to implement — the program. CBC News

Windsor floods cause close to $108 million in insured damage
Flooding, which impacted the Windsor at the end of September, has resulted in almost $108 million in damages, according to the Insurance Bureau of Canada. "Flood events are happening across Canada with more frequency and with greater severity," said Kim Donaldson, the bureau's vice-president in Ontario. "It is important that Canadians understand their insurance policies and that they know what's covered before bad weather strikes." Over 6,000 home, auto, and business claims were filed with insurers following the flood, the bureau said in a statement released Wednesday morning. Postmedia Network (Windsor Star)

L'état des brise-glaces de la Garde côtière compromet le commerce sur le Saint-Laurent
Le géant Rio Tinto et d'autres grands joueurs de l'économie demandent l'intervention d'Ottawa pour prévenir une crise. Des centaines de millions de dollars sont en jeu. Et la situation ne peut que s'aggraver révèle une enquête de Radio-Canada. Quelque 120 navires par année franchissent le Saint-Laurent avant d'emprunter le Saguenay pour alimenter en matières premières les alumineries de Rio Tinto. Or, plusieurs sont déjà restés prisonniers des glaces pour une simple raison : le manque de disponibilité de brise-glaces de la Garde côtière canadienne (GCC). Tout un couloir commercial stratégique deviendra vulnérable au cours des prochains mois. Radio Canada

Cost of storm-surge barrier for False Creek dampens enthusiasm
The City of Vancouver's idea to build a storm-surge barrier in False Creek to protect against future flooding could come with a price tag of as much as $800 million, city staff told councillors Wednesday. In anticipation of rising sea levels over the next century, staff have come up with a range of options to protect low-lying areas of the city. But the estimated costs of the options are so significant that the mayor asked staff to examine the idea of legal action against major carbon-emitters, including companies in the oil and gas industry. Province

Search underway for missing hunting guide
Police in the Bay St. George area of Newfoundland are searching for a missing hunting guide who was separated from his party on Tuesday. RCMP were called at 2:15 p.m. about a man lost in moose management area 11, near the community of Jeffrey's. The guide was separated from his hunting party on Tuesday afternoon and hasn't been seen or heard from since... The Barachois Brook Search and Rescue Team are working to find the man. RCMP are also trying to get a helicopter to do an air search. CBC News; Gulf News; VOCM

Albertans bring Christmas cheer by the truckload to Fort McMurray
Christmas has come early to Fort McMurray, in boxes, as a truckload of donated Christmas decorations arrived at Shell Place Tuesday for distribution to residents affected by the wildfire. Municipal employees and volunteers unloaded the truck when it arrived yesterday afternoon, laying out the boxes of ornaments in the Diamond Ballroom at Shell Place. The province-wide donation campaign was organized by High River residents Helga and Terry Lempriere, whose house was badly damaged in the 2013 High River flood. Fort McMurray Today

Camp and catering firm blames poor results on slow recovery from Fort McMurray fire
A company that operates workcamps for the oilsands industry in northern Alberta says demand for its services has been weaker than expected over the summer in the wake of the Fort McMurray wildfire. CBC News

Bill aims to reduce human element from wildfires

Debate continues in the Alberta Legislature on major amendments proposed to the Forest and Prairie Protection Act that, among other things, will substantially increase penalties to those who cause forest fires. Bill 24, co-sponsored by Banff-Cochrane MLA Cam Westhead, calls for increasing fines to a maximum of $50,000 for individuals responsible for wildfires and up to $500,000 for corporations found responsible for the same. Both offences currently carry a maximum penalty of $5,000. The bill also gives clarifies processes, role and responsibilities of the Agriculture and Forestry ministry and forestry officials in making decisions that aim to reduce the threat of wildfire and stop action that interferes with firefighting. Cochrane Times

Red Cross brings mobile disaster response unit to Courtenay
It may only look like a truck and trailer, but what is inside a new Canadian Red Cross mobile unit can significantly help a community in a time of need. This week, one of four mobile units made its way across the Island, and stopped in Courtenay Tuesday at the Red Cross office to bring awareness to what the unit can offer if a disaster - flood, fire, earthquake or other - should strike... There will be four units across B.C. and the Yukon, and Harvey said he hopes to see one on Vancouver Island soon. Comox Valley Record

State of agricultural disaster declared in Brazeau County
A state of agricultural disaster has been declared in Brazeau County because of extremely wet conditions. County council unanimously voted for the move during Tuesday night's regular meeting and will notify provincial and federal government officials to ask for the establishment of a disaster recovery program. "These extremely wet conditions over the past few months have resulted in very low crop yields across Brazeau County," Reeve Bart Guyon said in a release. Postmedia Network (Edmonton Journal)

La SQ confirme que les appels téléphoniques de six journalistes ont été ciblés
La Sûreté du Québec a confirmé, mercredi, qu'elle a enquêté sur les activités de six journalistes il y a trois ans. Le capitaine Guy Lapointe a affirmé que l'enquête portait sur la révélation de contenu d'écoutes électroniques. M. Lapointe a expliqué que la SQ a déclenché cette enquête à la suite d'allégations que des journalistes ou d'autres personnes avaient divulgué de telles informations. Le directeur général de la SQ, Martin Prud'homme, en poste depuis deux ans, a obtenu ces informations concernant un seul dossier au cours des dernières 20 années, a indiqué le porte-parole. Selon M. Lapointe, la SQ a obtenu une ordonnance en 2013 pour consulter les registres d'appels entrants et sortants de six journalistes. Cette procédure ne prévoyait aucune écoute électronique ni surveillance par géolocalisation des personnes visées, que la SQ n'a pas voulu identifier, mercredi. Par ailleurs, M. Prud'homme a réclamé mercredi au ministère de la Sécurité publique qu'une enquête soit effectuée par «un tiers indépendant» afin d'examiner le recours à cette méthode dans le cas de journalistes. M. Lapointe n'a pas précisé si ce mandat devrait être confié au Bureau des enquêtes indépendantes, comme le réclame le Parti québécois depuis des révélations qui concernent la police montréalaise cette semaine... Les journalistes de Radio-Canada Marie-Maude Denis, Isabelle Richer et Alain Gravel sont parmi les cibles de la SQ, tout comme Denis Lessard, de La Presse, et Éric Thibault, du Journal de Montréal. La Presse Canadienne (Le Soleil); Postmedia Network (National Post); Agence QMI (Journal de Québec; Journal de Montréal); Radio Canada; La Presse; CBC News; Canadian Press (Metro News; Times Colonist; Winnipeg Free Press); Montreal Gazette

Journalistes épiés par la police : « une pratique qui n'appartient pas au Québec », dit Amir Khadir
« Ce genre de pratique appartient à des pays que je n'ose même pas nommer », a ajouté le député de Mercier de Québec solidaire. Plus tôt on apprenait que six journalistes avaient été ciblés en 2013 par des

mandats permettant aux policiers de la SQ d'obtenir le registre des appels entrants et sortants de leurs téléphones. Radio Canada

After Patrick Lagacé, other Montreal journalists worry they were spied on, too
Following revelations Montreal police obtained warrants to spy on a La Presse columnist, other Montreal journalists are raising concerns they may also have been tracked by law enforcement authorities. Monic Néron, a court reporter with the news station 98.5 FM, believes she may have been the target of investigators, as well. Néron said a source told her police have been looking at their own officers' phone records to find out who's been leaking information to the media... In her case, she said police probably didn't need a warrant, since cell phones issued to police officers are likely the property of their employer. CBC News

Le SPVQ a «d'autres chats à fouetter»
Le chef de police de Québec, Michel Desgagné, affirme que son service n'a jamais lancé une enquête visant la surveillance de journalistes. «Dans les cinq dernières années, il n'y a jamais eu d'enquête de ce type», a dit M. Desgagné. Il indique d'ailleurs que la réponse du maire Labeaume mardi sur le sujet provenait directement de lui. Plus encore, il affirme ne jamais avoir mené d'enquête interne sur des policiers de son service soupçonnés de donner de l'information aux journalistes. «On a d'autres chats à fouetter», a-t-il ajouté. Par contre, le directeur, qui prendra sa retraite le 31 décembre prochain, après 40 ans de service, dont cinq comme chef, avoue qu'il y a une préoccupation en ce sens, notamment en ce qui a trait aux enquêtes criminelles. «Il y a une préoccupation sur le serment de discrétion de nos collègues et on doit faire des rappels.» Agence QMI (TVA Nouvelles)

Edward Snowden talks surveillance at McGill University
McGill University will play host to whistleblower Edward Snowden tonight as many continue to question the tactics used by Montreal police after it was revealed they obtained warrants to spy on a journalist. Snowden, a former C.I.A. computer technician and contractor at the U.S. National Security Agency, will appear via video link to speak about surveillance in Canada. CBC News; Global News

It was judges who let police spy on a journalist
An opinion piece states, "You've probably heard of the Lagacé affair in recent days, about how Montreal police obtained warrants to spy on La Presse columnist Patrick Lagacé's cell phone for the apparent purpose of identifying the sources of leaks from the department... But while police have received most of the attention and criticism in connection with the Lagacé affair, they did not act alone. In fact, a more important role was played by the justices of the peace who gave the police the warrants that allowed them to spy on Lagacé's telephone, even though he was not suspected of involvement in any crime. As Pichet said, by seeking the warrants, the police followed the rules. Whether the justices of the peace did, too, in granting the warrants may be up to higher courts to decide. But this case is not the only one in which the actions of Quebec judges have threatened freedom of the press... So, the problem isn't with the police alone. It's also with the judges, or maybe with the rules under which the police and the judges operate. That's why the measures announced on Tuesday by the Couillard government in quick response to the Lagacé affair are a step in the right direction, but may not go far enough. One of the measures was an immediate order to police that they treat journalists the same as lawyers, judges and National Assembly members, by getting permission from the prosecutors' directorate before asking a judge for a warrant affecting them. Another is the formation of a committee including representatives of the police, the judges and the media to study the situation and, by next spring, make public recommendations that could include changes in provincial legislation. But prosecutors may be reluctant to refuse warrants to the police with whom they work closely and on whose co-operation they rely. And provincial legislation alone may not be enough to protect the watchdogs of public institutions and their sources. Changes in federal legislation may also be necessary." Postmedia Network (Montreal Gazette)

These Studies Shouldn't Be Used To Avoid The Issue Of Racial Profiling
An opinion piece states, "… A recent study, conducted by, the Canadian Network for Research on Terrorism, Security and Society, for the account of Public Safety Canada, claimed that "religious extremism has become the top motive for Canadian terrorism, replacing environmentalism." It is disturbing to know that such a study will be used by the government to write its own report about threats facing Canada. The study, not yet published but obtained by the National Post through access to information, found that between 2010 and 2015, 29 per cent of terrorist incidents were religiously motivated, while seven per cent were categorized as "anarchist," and three per cent were "supremacist." Meanwhile, we are surprised to know that the motivation for 61 per cent of the violent incidents examined are unknown. How reliable and serious could this study be if it identify three main motives for terrorist incidents and then leave more than half of the incidents with "no motives."…" Huffington Post

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Immigration detainee hunger strike in Ontario jail goes into third week
A group of immigration detainees at the Central East Correctional Centre (CECC) in Lindsay, Ontario, have been on a hunger strike for over two weeks to protest Canada's immigration detention system, says a migrants' rights advocacy group. Eighteen immigration detainees at the maximum security provincial prison located about 125 km northeast of Toronto began refusing meals on Oct. 17 to demand legislative changes to federal immigration rules that allow Canadian authorities to detain certain immigrants for an indefinite period, said Macdonald Scott, an immigration consultant with the Toronto law firm Carranza LLP. On Wednesday, only four detainees were able to continue the protest, the third such hunger strike by immigration detainees this year, Scott said. "They are fighting for the same demands, the main one being the presumptive period, that they be released after 90 days if they are not deported," Scott said… The detainees are also asking for a one-on-one meeting with federal **Public Safety Minister Ralph Goodale** to discuss the issue with him, he said. RCI

Drones, So Useful in War, May Be Too Costly for Border Duty
Cameras on drones stare down at the Canadian border from as high as 28,000 feet, scanning vast stretches of mountains, rivers and forests for potential terrorists and drug smugglers. The drones are intended to compensate for the Department of Homeland Security's lack of personnel and other surveillance equipment to adequately patrol the longest international border in the world. Equipped with high-tech cameras and radar, and capable of staying in the air much longer than planes flown by humans, the drones fill a critical gap in border security, officials with Homeland Security say. While the bulk of the department's drones are flown on the more troubled American border with Mexico, the ones here are used to surveil remote parts of the 5,500-mile border with Canada that are too risky for ground access or normal aircraft. New York Times

Richmond-based immigration fraudsters face sentencing
Three Richmond women appeared before a provincial court judge Friday for a sentencing hearing related to their involvement in a large-scale, Richmond-based immigration scam that has already sent Xu "Sunny" Wang to prison for seven years. The Richmond News understands that the nearly 1,200 clients Wang and the women — Ming Kun "Makkie" Wu, Jin "Fanny" Ma, Wen "Vvian" Jiang — assisted are now under investigation by Immigration, Refugees and Citizenship Canada (IRCC) to determine the validity of their residency and citzenship… IRCC spokesperson Nancy Caron would not explicitly confirm the 1,200 clients are under investigation… Caron also credits "large-scale fraud investigations led by our RCMP and Canada Border Services Agency (CBSA) partners. "These investigations led to criminal convictions of several immigration consultants. Notices of intent to revoke citizenship were sent to their clients who had provided fraudulent documents to suggest that they were living in Canada when they were living abroad," said Caron. But despite successes, a May 2016 report by Canada's Auditor General determined the federal government has not been adequately detecting and preventing citizenship fraud in part because the immigration department, along with the RCMP and CBSA, have failed to adequately share information. Richmond News

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Drone-hacking cybersecurity boot camp launched in UK
Budding cyberspies will learn how to hack into drones and crack codes at a new cybersecurity boot camp backed by the government. Matt Hancock, the minister for digital and culture, said students would gain the skills needed to "fight cyber-attacks" and help keep the UK safe. The 10-week course has been "certified" by UK spy agency GCHQ. But some security experts raised questions about the need for the course and the intent behind it. BBC News

Why Windows hack is being blamed on Russia-linked group
Microsoft's Windows chief has accused a notorious group of hackers - previously linked to Russia - of making use of an unpatched flaw in its operating system. Terry Myerson said Strontium was exploiting the bug to infect PCs in order to get access to potentially sensitive data. Strontium is also known as APT28 and Fancy Bear, and has previously been blamed for attacking a French TV network and the US Democratic Party. Microsoft says it is working on a fix. It intends to release the patch next week. BBC News

LAW ENFORCEMENT / APPLICATION DE LA LOI

RCMP were afraid to let officers testify at inquest of Nunavut man shot by police
New details emerged into how a 30-year-old man was shot by RCMP at his own home as a coroner's inquest got underway in Igloolik, Nunavut, Tuesday — including the fact the RCMP was afraid to let its officers testify in person. On March 20, 2012, two RCMP officers went to the home of Felix Taqqaugaq after getting a call from someone in the community who became concerned after hearing Taqqaugaq ranting on the community's local radio station. Taqqaugaq had schizophrenia and was being treated for mental health issues, according to the coroner's facts. On the night he died, the officers met with him briefly on his porch before Taqqaugaq went inside, returned with a knife, and was shot three times. This week's inquest, led by Nunavut's chief coroner Padma Suramala, will shed more light on the events surrounding his death and the subsequent investigation by the Ottawa Police Service. On Tuesday, the coroner's jury was selected, but it's still not clear how exactly the process will unfold, and how exactly the officers involved will take part. CBC News

RCMP now involved in Elections Yukon investigation in Whitehorse Centre
Elections Yukon said Monday it is investigating accusations of electoral shenanigans in two Whitehorse-area ridings. The RCMP are investigating claims that Tamara Goeppel, the Liberal candidate in Whitehorse Centre, violated the Elections Act by misusing proxy ballots. In a statement, Elections Yukon said “it appears that an offence, or offences under the Elections Act, have occurred.” Yukon News

Arrest made as RCMP investigate suspicious death in Kerrobert
RCMP have arrested a 56-year-old man in connection to a suspicious sudden death in Kerrobert early Wednesday morning. Police found a man dead after being called to a home in the community around 5 a.m. Officers believe his death is suspicious. Police have not revealed the victim's identity. CKOM; CBC News

Raid on Calgary home yields Alberta's fourth-largest fentanyl seizure
Police say they seized more than 3,700 fentanyl pills when executing search warrants in the Calgary communities of Killarney and Hillhurst in late October. The larger seizure involved 2,771 pills taken on Oct. 28 from a vehicle parked at a home in the southwest community of Killarney that was identified as "a potential fentanyl stash site" based on an earlier investigation in Lethbridge. That marked the fourth-largest seizure of fentanyl in Alberta's history, according to police. Police said the home was also being used as a cocaine conversion lab and officers seized 23 grams of cocaine along with 135 grams of a suspected buffing agent from the residence... Meanwhile, on Oct. 26, officers searched an apartment in the Hillhurst area and seized 943 fentanyl pills... The seizures were coordinated by the Alberta Law Enforcement Response Teams, or ALERT, a group that targets organized crime. and includes members

of the Calgary Police Service, Edmonton Police Service, Lethbridge Police Service, Medicine Hat Police Service, Alberta Sheriffs and RCMP. CBC News

Officer had a 'funny feeling' after encounter with a shaken Matthew Tucker
Two Oromocto RCMP officers told a murder trial in Saint John Wednesday of their strange encounter with Matthew Tucker on Nov. 9, 2014, the day before his mother Dorothy Tucker disappeared. The two officers were in separate cruisers late that morning when they stopped to assist a man, who was waving at them from a car. Const. Valerie Caron told the court the man, later identified as Matthew Tucker, was shaking and appeared nervous. He complained of seeing a "creature," a white head with no hair, she said. CBC News

Calgary police force needs new complaint process, Coun. Diane Colley-Urquhart says
Coun. Diane Colley-Urquhart stepped up her push Wednesday to reform the culture of Calgary's police force, one day after its chief and Mayor Naheed Nenshi gave assurances that change is coming. Last week, Colley-Urquhart, a member of the police commission, said several female police members of the Calgary Police Service (CPS) had come to her directly alleging they had been bullied and harassed while on the job, but felt that making formal complaints would hurt their careers. CBC News; Postmedia Network (Calgary Sun; Calgary Herald)

Surrey Mountie accused of child luring to appear in court Nov. 30
Surrey RCMP Constable Dario Devic is expected to appear in Surrey provincial court on Nov. 30 on a charge of child luring. Devic was arrested on Sept. 9 after Creep Catcher Surrey, a citizen group that aims to weed out "potential predators" and "blast" them in social media, did a sting outside a local mall. The Now

Local RCMP Veterans Association donate to Hospice Simcoe
A special entourage trouped into Hospice Simcoe on Wednesday with a gift for the palliative care organization. Members of the Georgian Bay division of the RCMP Veterans Association, two of them decked out in scarlet blazers, presented Hospice Simcoe executive director Sandra Dunham with a cheque for $7,000. The money came from the division's annual golf tournament in September, as well as the RCMP Musical Ride held during this year's Barrie Fair at the Essa Agriplex where Mountie hats were sold. Barrie Examiner

Auxiliary cop versatility
The City of Kelowna is seeking three levels of auxiliary cops. The three-tiered system preferred by council would allow auxiliaries to obtain specialized training and experience for specific requirements. In January, the federal government suspended the auxiliary constable program across the country, pending a full review. That decision took the civilian volunteers off the streets, where they had previously worked alongside regular RCMP members and assisted with traffic control for special events. "When the policy changed, it had a huge affect when you see the number of volunteers hours that are put in," said Coun. Brad Sieben. "It affects, financially, the functioning of the city." Castanet

RCMP humiliation: Sit on his knee and hike up your skirt
An opinion piece states, “Another drip falls in the continuing water torture of RCMP Commissioner Bob Paulson, who likely thought a public apology and a $100-million taxpayer settlement of two class-action harassment suits by female officers would shut down the tap. So much for wishful thinking. The added drip, and there are more, come to me in emails from individual women in the RCMP — both officers and civilians — outlining their alleged stories of physical and emotion abuse in the alpha-male dominated federal police force. All fear personal bankruptcy from pursuing their litigation, because the RCMP’s lawyers, paid for by the taxpayers, can play the long game of dragging the cases out. They also fear backlash from within, so much so that many have changed their unlisted numbers multiple times because harassment phone calls never failed to stop. And, even when they think they’ve won, they lose…”

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Why Adam Capay has spent 1,560 days in solitary
Renu Mandhane spent part of her day on Oct. 7 at the Indigenous friendship centre located on the outskirts of Thunder Bay, Ont. Mandhane, 39, is chief commissioner of the Ontario Human Rights Commission (OHCR), the 55-year-old body charged with preventing discrimination and advancing human rights in Ontario. Her office had organized the meeting with Indigenous leaders and community members to talk about discrimination and racial profiling. After the meeting was over, Mandhane organized an impromptu tour of the Thunder Bay Jail, a 170-bed facility built in 1926. "It's a s–thole," says Mike Lundy, a union president and a correctional officer at the jail... According to Ontario's Correctional Services, inmates are placed in administrative segregation when they are in need of protection, pose a threat to the health and safety of themselves or others, or are alleged to have committed a serious misconduct. "In Canada, we do not practise solitary confinement," a Public Safety Canada official, Kimberley Lavoie, told a UN meeting in Geneva on Oct. 25, a week after Mandhane revealed Capay's plight... Yet as Kimberley Savoie reinforced to the UN, Canada is adamant it doesn't practise solitary confinement. "Please note that the term 'solitary confinement' is not accurate or applicable within the Canadian penitentiary system," says Correctional Services Canada spokesperson Avely Serin. Canada does, however, practise "administrative segregation." "It is the separation, when specific legal requirements are met, of an inmate from other inmates," explains Serin. The difference between the two is often lost on government... Capay's case speaks to another troubling trend in Canadian prisons: Indigenous offenders serve much harder time than anyone else... "There is a group in Canada that keeps mysteriously dying,'" says University of Toronto sociology professor Sherene Razack. Many of these deaths occur because officials "will not touch, examine, or closely monitor Indigenous people in their care," Razack says. "This indifference kills." Adam Capay's treatment has drawn condemnation from all corners—including the very people responsible for his care. Maclean's

Former Oshawa politician Robert Lutczyk, jailed for kidnapping and weapons offences, denied parole
A bid for release by Robert Lutczyk, the former Oshawa councillor convicted last year of kidnapping and weapons offences, has been denied by the Parole Board of Canada. The board rejected Lutczyk's applications for both day and full parole following a video conference at Warkworth Penitentiary on Monday, Oct. 31. Lutczyk pleaded guilty last December and was sentenced in February to eight years and four months in federal custody. In a written decision released following the hearing, parole board members cited what they perceive as a failure on Lutczyk's part to take responsibility for his offences and the effect they had. Durham Region

Remembrance services across the area
The Orillia area salutes those who have given so much to the nation over the next 10 days. There are a number of Remembrance Day services slated throughout the region, beginning Friday in Brechin where the village holds its parade service. The parade will form at 10:30 a.m. at Brechin Public School with the Correctional Service Canada pipe band marching with veterans, other officials and local school children to the Brechin Legion for a Remembrance service and wreath-laying ceremony. Orillia Packet

Prime Minister Justin Trudeau appoints six new Quebec senators
Prime Minister Justin Trudeau has named six new senators from Quebec, including a doctor, an environmental scientist and a mayor. They include:.. Marc Gold, a former law professor who has held roles in the Jewish community and served on boards including the Parole Board of Canada, the Montreal Symphony Orchestra and Centraide. CTV News; CBC News

Union says cutting 14 deputy sheriff jobs in Saskatchewan will jeopardize safety
The union representing deputy sheriffs says 14 jobs have been cut in Saskatoon, Regina, Prince Albert, North Battleford and Weyburn. The Saskatchewan Government and General Employees' Union says losing the deputy sheriffs will jeopardize public safety. They screen people entering a courthouse, operate detention areas, escort prisoners inside the courthouse, provide courtroom security and transport prisoners by vehicle. They carry firearms. Union president Bob Bymoen says it's his understanding that the work will be contracted out to commissionaires who don't have the same level of training and are not

armed. Bymoen says government's mismanagement of public funds is to blame for the job cuts. Canadian Press (StarPhoenix; Leader Post)

Young man charged in deadly stabbing at Abbotsford high school
One day after a man walked into an Abbotsford high school and stabbed two students, killing one of them, charges have been approved against a suspect. Gabriel Brandon Klein, a young man in his early 20s, has been charged with murder and aggravated assault in connection with the attack, which shocked the Fraser Valley community. CTV News

Schools superintendent says Abbotsford, B.C. stabbing was 'random act'
The superintendent of schools in Abbotsford, B.C., says evidence suggests the man alleged to have killed one female student and injured another didn't know his victims. Kevin Godden says investigators believe the attack was a "random act of violence." "What I can tell you is that he is not a student of this school now." very school in the district will have all but one of its exterior doors locked during the school day out of an abundance of caution, Godden told reporter Wednesday. He said the Abbotsford Police Department has closed the high school where the two young women were stabbed to maintain the integrity of the investigation and a decision would be made later on Wednesday about when the school would reopen. Canadian Press (CTV News)

Liquid fentanyl found in Hamilton — believed to be 1st appearance in Canada
Police investigators in Hamilton announced today that they have seized what is believed to be the country's first stash of liquid fentanyl. The incredibly powerful prescription opioid is usually found on the street in pill, powder or patch form, but this new discovery is another marker in a growing opioid crisis across the country. CBC News

RCMP volunteers putting eyes on high crime areas in Kelowna
For the last two months local RCMP have been using specially trained volunteers to help go through hours of video surveillance footage and scout out problem areas in the city. The Auxiliary Constable Program is a nationally supported network of citizens who help local law enforcement with various tasks like public outreach. Since August, however, Kelowna has been using some of its 55 Auxiliary Constables in a very different way. In a report to council this week, Police Services Manager Stacey Jackson says the Auxiliary Constable Video Review Team has helped with one of the most time-intensive aspects of evidence gathering and investigation. Fentanyl-impaired driver convicted in Yellowknife
A woman in Yellowknife has been found guilty of driving while impaired by drugs including fentanyl — the first fentanyl-related impaired driving conviction in the N.W.T., say RCMP. Police arrested the driver, whose name they aren't releasing, in April. CBC News

Saanich Police will be equipped with overdose treatment
Saanich Police plans to purchase devices that would allow officers to administer a medication against the potentially deadly effects of illicit opioid overdoses. Acting Sgt. Jereme Leslie of the Saanich Police said the department anticipates "purchasing naloxone (hydrochloride) for our first line responders in the near future, once policy and training initiatives have been decided." Saanich News

Fentanyl crisis: Richmond to hold community forum on overdose prevention
Richmond will host a public forum this month on the impact of the North American drug-overdose crisis in the community. Parents, doctors, first-responders and educators will meet with the goal of helping community members understand the opioid-overdose epidemic and the lethal impact of the synthetic opioid fentanyl, according to a release. Province

New Gatineau crime map portal displays crime trends

Gatineau residents are now able to check out crime in their neighbourhoods and across the West Quebec city on the Gatineau police's new crime map portal. The portal, updated daily, lists seven offences: Break-ins, arson, mischief (for example, vandalism and graffiti), robberies, thefts from vehicles, thefts of vehicles and physical assault. The map will show incidents broken down daily, every 31 days and year to date. Deputy police chief Luc Beaudoin said in a release that the portal is part of the department's crime prevention strategy "because we believe people informed on certain crimes ... are able to take preventive measures" to protect themselves and their neighbours. Ottawa Citizen

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Fanshawe College's Woodstock campus kicks off traveling Faceless Dolls exhibit to bring greater awareness to staggering number of missing and murdered indiginous women in Canada
It's not just a statistic. Fanshawe College is launching an artistic endeavour to bring awareness to the fact that at least 1,200 indigenous women have gone missing or been murdered in Canada over the past few decades. The Faceless Dolls Exhibit, a student-made instalment, started its journey at the Woodstock Fanshawe campus last week. Students and staff gathered to echo a project started by the Native Women's Association of Canada, creating dolls out of felt and fabric to represent each one of those 1,200 missing or murdered women. How Taxing Weed in Canada Could Backfire
Next spring, the Liberal government is expected to introduce legislation to legalize marijuana for recreational use. Depending on how fast the legislation moves through parliament, legal weed sales could begin as early as 2018 and Canada would become the second country after Uruguay to legalize cannabis at a federal level. But with legalization comes hard questions about the amount of taxation necessary for that dank kush. Rachel Browne talks to us about the possible profits and consequences Canada could be seeing in the coming years once legalization becomes a reality. Vice News

One man in custody after police and bailiff shut down Ottawa pot shop
One of Ottawa's 17 illegal pot shops has been forcibly closed, but not by the drug squad. A bailiff arrived at the CannaGreen dispensary on Roydon Place Wednesday afternoon to enforce an eviction order. The shop had continued operating after an eviction notice was posted on the door Tuesday and the locks were changed. Ottawa police were on hand to help bailiff Doug Specht. A man inside the store was led out in handcuffs. Police said a man was arrested for trespassing, but no charges have been laid. Ottawa Citizen

Fatal car crashes triple among drivers high on marijuana after legalization in Colorado; double in Washington state
Prime Minister Justin Trudeau's plan to legalize marijuana should take into account "sobering" U.S. experiences where the first states to legalize the drug have seen big increases in fatal car crashes among cannabis-impaired drivers, according to a B.C. doctors' group. Washington State and Colorado started taxing and regulating cannabis in 2012 and the Council on Health Promotion, a section of Doctors of B.C., said vehicle fatality statistics, post-legalization, are "sobering." Postmedia Network (Edmonton Journal)

Federal pay backlog chopped in Phoenix system, but still slow going
Ottawa says it has winnowed down the backlog of federal salary problems related to the controversial Phoenix payment software to 22,000 from about 82,000 and is plowing ahead with eliminating the list. However, it won't give a deadline. IT World Canada

Ottawa's Phoenix nightmare rises in the House; all 338 MPs owe pension overpayments
Canada's 338 MPs, including Prime Minister Justin Trudeau and the entire cabinet are being forced to make retroactive payments to their pension plans after being hit by the same technical glitches in the new federal pay system that affected more than 80,000 federal civil servants this year. A notice to MPs sent last week from House of Commons chief human resources officer Pierre Parent pointed out that the maligned Phoenix pay system is the reason proper pension-plan deductions were not made between May and September of this year. The average MP will have to repay about $640, and cabinet ministers owe about $250. The actual amounts depend on an individual MP's specific pay situation, including tax deductions and payment amounts. The overpayments are being corrected during three pay periods, which began last month and continue through December. Winnipeg Free Press

Fort McMurray's next 6 priorities in wildfire recovery

The May wildfire that ripped through Fort McMurray was so devastating it not only razed communities but also hit the Canadian economy. The fire devoured more than 2,400 homes and forced more than 88,000 people to leave for over a month. The wildfire, which is still smoldering but no longer a risk, raged uncontrollably for six weeks and consumed 589,552 hectares of forest — an area larger than Prince Edward Island. Six months later, Fort McMurray's municipal and community leaders are reflecting on what the region's priorities should be over the next six months of recovery. CBC News

Fort McMurray's next 6 priorities in wildfire recovery
The May wildfire that ripped through Fort McMurray was so devastating it not only razed communities but also hit the Canadian economy. The fire devoured more than 2,400 homes and forced more than 88,000 people to leave for over a month. The wildfire, which is still smoldering but no longer a risk, raged uncontrollably for six weeks and consumed 589,552 hectares of forest — an area larger than Prince Edward Island. Six months later, Fort McMurray's municipal and community leaders are reflecting on what the region's priorities should be over the next six months of recovery. CBC News

Hydro seeks millions for emergency repairs
Newfoundland and Labrador Hydro is asking the Public Utilities Board (PUB) for more than $17 million in emergency funding for two major and unexpected repair jobs. In the first of two applications for extra money, the power company is requesting $4.6 million to fix damage to access roads in central Newfoundland caused by rain from Hurricane Matthew last month (…) The second Hydro application is for $12.9 million to repair faulty welds in the Bay d'Espoir penstock. The penstock is a sort of sluice that feeds water into power generation stations. The bad welding has caused two cracks in the structure, which means it can't be used again until it's fixed. CBC News

Canadian army interested in old nuke that may have been found off Haida Gwaii
Sean Smyrichinsky recently spent several hours diving for sea cucumbers off Pitt Island, near Haida Gwaii. He didn't find any. But he decided to hop on his underwater scooter for one last look before calling it a day. Flying around underwater, he spotted something unusual on the ocean floor. "I found this big thing underwater, huge, never seen anything like it before," Smyrichinsky related from Cortes Island (…)"That bomb" was a nuclear device that was dumped or exploded off the B.C. coast on Feb. 13, 1950, when an American B-36 bomber crashed while en route from Alaska to Texas. It was packed with lead – not plutonium – and TNT. Five crew members died but 12 were rescued after they parachuted onto Princess Royal Island, about 200 km south of Prince Rupert. They were forced to abandon the plane after ice built up on its wings and three of its six engines caught fire. None of the stories at the time of the crash detailed the payload the bomber had been carrying. But eventually it was discovered that the bomber's mission was to simulate a nuclear attack on San Francisco, and the plane had been carrying a Mark IV nuclear weapon. Postmedia (National Post, Vancouver Sun, Vancouver Province)

Canadian military sends surveillance aircraft to Arctic to investigate mysterious pinging sounds
The Canadian Forces has sent a surveillance aircraft to the Arctic to investigate a pinging sound that appears to be coming from the ocean floor, but the military is no closer to solving the mystery of what could be making the noise. The government of Nunavut asked Ottawa to investigate the sounds, prompting the decision to send a CP-140 Aurora aircraft to conduct surveillance of Fury and Hecla Strait, northwest of the hamlet of Igloolik. Descriptions of the noises range from pings to beeps or a hum. They have been reported by hunters in the region, who worry they are driving away animals. Paul Quassa, a member of Nunavut's legislative assembly, told lawmakers last month the sounds are coming from the sea floor. "The sound that has been heard in the area seems to be emitted from the seabed and underwater," Quassa said in an Oct. 25 statement. "Our constituents as well as hunters and boaters have reported that the area in question is almost devoid of sea mammals and that hunting has been poor in the area for quite some time." According to Department of National Defence spokesman Dan Le Bouthillier, the Aurora's crew "performed various multi-sensor searches in the area, including an acoustic search for 1.5 hours, without detecting any acoustic anomalies. The crew did not detect any surface or subsurface contacts." Postmedia (National Post, Ottawa Citizen); Motherboard

Sulphuric acid 'mist' reported in city's Wallace Emerson neighbourhood
Police are asking residents in the area of Bloor Street and Lansdowne Avenue to stay indoors and keep their windows closed due to a reported sulphuric acid "mist" in the air. Toronto Fire Services told CP24 that chemicals, including sulphuric acid, were reportedly mixed together at a building on Wade Avenue and the combination caused a type of mist to fill the air. The mist, Fire Capt. Michael Westwood said, can cause irritation to the nose, eyes and throat. The building where the incident occurred has been evacuated and a hazmat team is on scene. Streets in the area are blocked off and residents have been asked to stay indoors. No injuries have been reported. A TTC bus is in the area sheltering approximately 40 people. Westwood said a company is coming to remove the substance from the scene. CP24; Canadian Press (Globe and Mail); Toronto Star

Ottawa exigera l'installation d'enregistreurs audio-vidéo dans les locomotives
Le ministre fédéral des Transports a annoncé jeudi qu'Ottawa exigera dorénavant l'installation d'enregistreurs audio-vidéo dans les locomotives, comme le recommandait le Bureau de la sécurité des transports. Marc Garneau a indiqué que ces appareils serviront aux enquêtes sur les accidents comme celui de Lac-Mégantic, qui a fait 47 morts à l'été de 2013. Le ministre a aussi promis que l'examen de la Loi sur la sécurité ferroviaire sera terminé en 2017 plutôt qu'en 2018, afin de renforcer plus rapidement la sécurité dans les chemins de fer. M. Garneau était à Montréal, jeudi matin, pour présenter sa stratégie «Transports 2030», fruit de consultations que le nouveau ministre a menées depuis six mois. La Presse Canadienne (La Presse)

Search for missing Codroy Valley hunting guide into 2nd day
A ground search will continue Thursday for a 49-year-old man who became separated from his hunting group Tuesday afternoon on Newfoundland's west coast. RCMP said a helicopter search continued until midnight Wednesday, and will be back in the air Thursday, weather permitting. Barachois Ground Search and Rescue, a Joint Rescue Co-ordination Centre helicopter and RCMP assisted in the search, which began shortly after the man was reported missing at 1 p.m. Wednesday. Edward Snowden Calls Police Spying on Quebec Journalists a 'Threat to Democracy'
In a speech to 600 people at McGill University in Montreal on Wednesday night, Edward Snowden described police spying on Quebec journalists a "threat to the traditional model of our democracy." Though it had been announced months ago, the timing of Snowden's conference was strangely appropriate. The event took place just hours after *La Presse* revealed the Sûreté du Québec (SQ), which is the provincial police force, had put at least six prominent journalists under surveillance. Two days earlier, the same Montreal daily had broken the story that its own star columnist, Patrick Lagacé, had been spied on by the Montreal police force (SPVM). Appearing live from Russia, where he's been living in exile since exposing top secret information about US intelligence and surveillance programs, Snowden did not mince words when discussing the behaviour of Quebec police. (…) Snowden reiterated that citizens should be leery of authoritarian measures defended by governments that argue their very survival is under threat from terrorists. "There's no real evidence this is actually the case, but the politics of this fear have reshaped the way our laws are getting passed." Canada's Bill C-51, whose adoption in 2015 generated reams of criticism from legal experts and ordinary citizens worried about how it would erode Canadians' privacy and individual rights, was one such example, he said. During the election, Prime Minister Justin Trudeau promised to amend the law, most notably by scrapping some "problematic elements" like the overly vague proscription against terrorist propaganda and by "guaranteeing that all

actions undertaken by the Canadian Security Intelligence Service are consistent with Canada's Charter of rights and freedoms." Motherboard

Journalistes espionnés: Québec crée une commission d'enquête
Le gouvernement Couillard déclenche une commission d'enquête sur l'espionnage de journalistes par la police compte tenu de la « gravité » de la situation. Les nouvelles révélations voulant que la Sûreté du Québec ait, comme la SPVM, procédé à la surveillance électronique de journalistes « sont à ce point sérieuses » que Québec juge nécessaire de poser « un geste supplémentaire » pour faire « toute la lumière, de façon transparente » sur cette affaire, ont expliqué les ministres Stéphanie Vallée (Justice) et Martin Coiteux (Sécurité publique) en conférence de presse jeudi à l'Assemblée nationale. Plus tôt cette semaine, le gouvernement a annoncé la création d'un comité d'experts présidé par un juge et au sein duquel siégeront des représentants des corps de police et des médias. Or « le mandat confié au groupe d'experts sera conféré en vertu de la loi sur les commissions d'enquête », a annoncé Mme Vallée. Les commissaires auront ainsi le pouvoir de contraindre des personnes à témoigner. Leurs audiences pourront être publiques, selon le souhait des commissaires. Mais pour le premier ministre Philippe Couillard, il est évident qu'elles le seront. La Presse; Canadian Press (Daily Courier, iPolitics, Castanet); Agence QMI (Canoe); Presse canadienne (Journal Métro)

Stéphane Bergeron se retire de ses fonctions de porte-parole du PQ à la sécurité publique
Le député péquiste Stéphane Bergeron a annoncé qu'il se retire de ses fonctions de porte-parole à la sécurité publique après la révélation que des journalistes ont été surveillés par la Sûreté du Québec alors qu'il était ministre. M. Bergeron a pris cette décision parce qu'il craint de nuire au travail de sa formation politique à l'Assemblée nationale. Mercredi, M. Bergeron s'est défendu d'avoir demandé que des journalistes soient ciblés pour connaître l'origine de fuites de renseignements policiers dans les médias, en 2013, alors qu'il était ministre de la Sécurité publique. M. Bergeron a cependant reconnu qu'il avait contacté le directeur général de la SQ, Mario Laprise, à la suite d'une « conjonction » de faits, dont une lettre de l'ex-président de la Fédération des travailleurs du Québec, Michel Arsenault, se plaignant de fuites concernant des écoutes électroniques qui l'ont visé. Presse canadienne (Le Devoir); TVA Nouvelles; Radio-Canada

Coderre underwhelms with response to revelations of police spying
An opinion piece state, "Montreal Mayor Denis Coderre's response to revelations that police, with the approval of mainly one Quebec court judge, electronically monitored journalists was, in a word, unacceptable. While the Quebec government's response was encouraging, the mayor simply pronounced search engine-optimized keywords that imply "concern" for democracy, while simultaneously reiterating his support for a police chief whom he had recently nominated. "What you see is what you get," with the former Liberal MP, a "common sense" politician who is "close to the people" and can "walk and chew gum at the same time." He was elected mayor of Montreal three years ago this month and before his win, I warned that Coderre would be a bland "tofu mayor," adaptable and inoffensive. Coderre has expanded his bank of catch-phrases and remains bland, philosophically, but has become emboldened with power, seemingly incapable of backing down from any of his positions, no matter how ridiculous or wrongheaded. One of Quebec's most prominent journalists, La Presse columnist Patrick Lagacé, had his phone monitored by Montreal police (SPVM) as part of an investigation into officers who went on to be charged with falsifying evidence, it was revealed this week. Lagacé has been critical of the SPVM in recent years and was continuing to develop new stories based on sources within the department." National Post

Les journalistes dans l'œil de la cybersurveillance
Denis Lessard, Alain Gravel, Marie-Maude Denis, Isabelle Richer et Éric Thibault sont parmi les six journalistes ayant fait l'objet d'une surveillance confirmée par la SQ. Patrick Lagacé, lui, a été surveillé par le SPVM. Deux enquêtes qui se sont déroulées avant et après l'adoption du projet de loi C-51. La nouvelle a eu l'effet d'une bombe dans le milieu journalistique québécois cette semaine. On a ainsi appris qu'au total, sept journalistes ont été l'objet de surveillance de la part de deux corps policiers, la Sûreté du Québec et le Service de Police de la Ville de Montréal. Alors que ces révélations se sont effectuées au compte goûte depuis dimanche de façon antéchronologique, nous vous proposons ici un compte-rendu de ces deux histoires, en portant une attention particulière sur la nature de ces surveillances. L'adoption

du controversé projet de loi C-51 pourrait-elle avoir influencé la façon d'agir des forces de l'ordre? Branchez-vous

Feds forbid construction of new embassies on Sussex Drive
The federal government is forbidding the construction of new embassies on Ottawa's Sussex Drive following a stark RCMP assessment of the potential for "violent events" in the high-profile neighbourhood. Countries with diplomatic missions already located on the well-known boulevard include the United States, France, Kuwait, Saudi Arabia and South Africa. It is also home to Rideau Hall, where the Governor General lives, as well as the prime minister's residence at 24 Sussex. Justin Trudeau and his family are living in a house on the Rideau Hall grounds while federal officials consider badly needed renovations to the traditional address of Canada's leader. Foreign Affairs Minister Stephane Dion was advised of the ban on new embassies in January by Daniel Jean, then his deputy minister, records released under the Access to Information Act show. Jean has since been named national security adviser to the prime minister. "A recently concluded RCMP security assessment advises against any additional foreign embassies being located along Sussex Drive," says Jean's memo to Dion, obtained by The Canadian Press. "As a result, the department will no longer be approving requests by diplomatic missions to acquire land in the affected zone." Canadian Press (Daily Commercial News)

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Federal immigration policy 'a little disappointing' says ISANS
The federal government's new immigration strategy focuses too much on economic immigration and not enough on helping refugees, according to the director of operations for the Immigrant Services Association of Nova Scotia. The changes to Canada's immigration program will see the federal government increase the number of privately sponsored refugees to 16,000 in 2017, while the number of government sponsored refugees is being rolled back to 7,500. "It's just a little disappointing that the federal government's responsibility - those numbers are smaller than actually we thought they would be," said Gerry Mills director of operations for ISANS. Privately sponsored refugees arrive in Canada with financial help from community groups who pay for their travel and help them with housing, clothing and other basic needs. Government sponsored refugees have all of that taken care of by the federal government, said Mills. This year about 20,000 people were brought into the country as government-assisted refugees, in 2015 nearly 10,000 refugees were sponsored by the federal government. CBC News

The Detroit-Windsor Tunnel is how old?
They don't call us the Motor City for nothing. Yes, we're the home of the Big 3, everyone knows that. But, you probably didn't know (or maybe I'm the only one who didn't know?) that we're also home to the U.S.'s first vehicular tunnel that connects two countries. The Detroit-Windsor Tunnel, which runs underwater and takes drivers back and forth between Michigan and Ontario, turns 86 years old today. It's the second busiest crossing between the U.S. and Canada in the country, following Matty Moroun's Ambassador Bridge. Of course, it's not the country's first underwater tunnel. In fact, it's the third. The Holland Tunnel that connects New Jersey and Manhattan and the Posey Tube in California beat us out for that title. Detroit Metro Times; ClickOnDetroit

Canada: The Bri-Chem Trilogy: Federal Court Affirms Tribunal
On November 16, 2015, we described important substantive and procedural issues that would be addressed by the Federal Court of Appeal (FCA) in an appeal from a decision of the Canadian International Trade Tribunal (CITT). Almost a full year later, on October 21, 2106, the FCA affirmed the decisions of the CITT both in respect of the substantive customs issue, whether or not an importer may claim duty neutral relief under NAFTA more than one year from the date of accounting when its zero-

rated tariff classification is re-determined by the Canada Border Services Agency (CBSA) as a positive duty-rated tariff classification, and the procedural issue, the nature and application of the doctrine of precedent in the context of appeals from determinations of the President of the CBSA heard and decided by the CITT. The FCA deferred to the expertise of the CITT, particularly given its expertise and the fact-infused nature of the matters before it. Mondaq

China carfentanil trade thrives as seizures top 400 in U.S.
Seizures of the deadly chemical carfentanil have exploded across the United States, with more than 400 cases documented in eight states since July alone, The Associated Press has found. Fueled by a thriving trade out of China, the weapons-grade chemical is suspected in hundreds of drug overdoses in the U.S. and Canada. An AP investigation last month showed how easily carfentanil can be purchased online from China. Of the 12 companies that initially offered to export carfentanil around the world, just three have stopped since the report was released. Nine continue to offer carfentanil for sale, no questions asked, and the AP identified four additional companies willing to sell the drug, some of which claimed to have U.S. addresses. Asked for comment, most denied they'd ever made the offers. Jilin Tely Import and Export Co. initially boasted in an email that carfentanil was one of its "hot sales product (...) But it is not controlled in China, the top source of fentanyl-related compounds that end up in the U.S., Canada and Mexico, according to the U.S. Drug Enforcement Administration. "It's a loophole that needs to be closed because even small quantities can have a terrible lethal effect," said Andrew Weber, who served as U.S. assistant secretary of defence for nuclear, chemical and biological defence programs from 2009 to 2014. "Terrorists could acquire it commercially as we have seen drug dealers doing." Associated Press (CTV News, Global News)

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Domain search tool aims to foil phishing
In the race to be the most imaginative, so far attackers are outwitting defenders. Take, for example, the ability to craft and find look-alike domain names. Somehow, no matter how creative security teams get thinking about and storing alternatives for blacklists, criminals are able to spoof brand, product, or organization names faster. That can give them an edge in phishing attacks, where emails often include phoney but real-looking links gullible employees fall for. To give security teams a better chance DomainTools, which has domain name discovery and profiling system, has created a new cloud-based service called PhishEye. which automates searching for registered lookalike domains, including those deliberately created with typos and misspellings. IT World Canada

Your WiFi-connected thermostat can take down the whole Internet. We need new regulations.
Late last month, popular websites like Twitter, Pinterest, Reddit and PayPal went down for most of a day. The distributed denial-of-service attack that caused the outages, and the vulnerabilities that made the attack possible, was as much a failure of market and policy as it was of technology. If we want to secure our increasingly computerized and connected world, we need more government involvement in the security of the “Internet of Things” and increased regulation of what are now critical and life-threatening technologies. It’s no longer a question of if, it’s a question of when. Washington Post

LAW ENFORCEMENT / APPLICATION DE LA LOI

200 fentanyl pills seized in Saskatoon drug bust
Police said they have seized fentanyl pills and charged three people following a drug bust in Saskatoon. The bust happened after members of the Saskatoon integrated drug enforcement team spotted what they believed to be a drug transaction in the area of Taylor Street and St. George Avenue on Wednesday afternoon. Police arrested two men and said they seized 100 fentanyl pills and over $1,500 in cash. A home in the 100-block of Girgulis Crescent was then searched, where police said they seized an additional 100 fentanyl pills. Two men, 20 and 22, are facing charges of possession for the purpose of trafficking. The 22-year-old man is also facing charges of trafficking fentanyl and possession of the

proceeds of crime. An 18-year-old woman is also charged with possession for the purpose of trafficking. Global News

RCMP release photo of homeless man charged in high school murder
Homicide investigators have released a photo of the 21-year-old man charged in the stabbing death of an Abbotsford high school student in hopes the public will come forward with information. Staff Sgt. Jennifer Pound says the photo of Gabriel Klein was captured on closed-circuit surveillance just hours before a deadly attack at Abbotsford Senior Secondary. Thirteen-year-old Letisha Reimer was killed after being attacked by a barefoot intruder in the school's atrium. Her 14-year-old friend, who cannot be named because of a publication ban, was seriously injured and remains in hospital. CTV News

LGBTQ Canadians Sue Government for Decades-Long Witch Hunt
In a Canadian military interrogation room in 1990, strapped to a polygraph machine and sensing unseen observers behind a two-way mirror, 21-year-old Canadian sailor Todd Ross finally broke down in tears and said out loud what he'd been unable to say even to himself: He was gay. The military gave Ross an ultimatum: accept an honourable discharge or perform "general duties"—grunt work—for the rest of his career. (...) According to government records, the RCMP spent decades following World War II investigating, surveilling, and questioning suspected gay and lesbian public servants, including members of the military, about their sexual orientation. At one point, the RCMP amassed a list of 9,000 people deemed suspect and subject to investigation. The Canadian government would often employ a device that would measure sweat and sexual reaction to certain words, phrases, and images—dubbed internally as the 'fruit machine'—to vet suspected LGBTQ government employees. The project was created through a government grant at the Carleton University Psychology Department. Vice News

Edmonton judge stays sex charge over unexplained loss of evidence by RCMP
An Edmonton judge has tossed out a sexual assault charge against an Edson-area man as a result of the "unexplained" loss by the RCMP of an audio-recorded statement from the alleged victim. In a ruling released this week, Court of Queen's Bench Justice Denny Thomas issued a judicial stay of the 2015 sexual assault charge against the 21-year-old accused man. "Balancing the societal interest of having a full trial on the merits of this charge before a jury and the right of the accused to make full answer and defence, I conclude that this is one of those 'clearest of cases' where a stay should be granted to respect the rights of the accused," said Thomas in his written decision, The man had sought a stay of the charge, arguing the "unexplained" loss of key evidence by the Mounties was so prejudicial to his right to make full answer and defence that he would not get a fair trial. The Crown had conceded that the loss of the complainant's audio statement meant the prosecution had not met their disclosure obligation and it was therefore a breach of the accused's Charter rights, but had argued there was other evidence available to the defence which would have mitigated the prejudice to him. Edmonton Journal

Alberta vehicle theft suspect arrested after leading police on low-speed skid steer chase
Police have arrested a suspect in connection with a string of thefts of trucks, trailers and construction equipment east of Edmonton. The arrest came after a man driving a construction vehicle led Vegreville RCMP on a low-speed chase. It all began last Saturday around 4:45 p.m., when Mounties got a call about a suspicious man who had just parked a truck and trailer in a field southwest of Mundare. Police did a check and discovered the truck and trailer had been stolen from a business in the Nisku industrial park south of Edmonton. The person who called police then said the man who had dropped off the truck was leaving the scene in a John Deere skid steer, which was later determined also to have been stolen. RCMP found a man driving the skid steer on Range Road 17-0 and attempted to arrest him. The man fled in the equipment which, according to John Deere's website, has a maximum travel speed of about 20 kilometres per hour. Police said at one point during the low-speed pursuit, the driver attempted to ram a police vehicle. Global News

Ten drug dealers in dial-a-dope network allegedly operated by Mohamed Abdi Yusuf caught in Brooks, Alberta bust
Seven suspected drug dealers have been arrested and warrants have been issued for three others as ALERT (Alberta Law Enforcement Response Teams) shut down a drug trafficking network operating in Brooks, Alberta. ALERT's Medicine Hat organized crime team conducted the investigation in response to

community concerns related to cocaine trafficking. ALERT worked hand-in-hand with RCMP Brooks and Medicine Hat Police Service on the three-month investigation. ALERT alleges that the group was operating as a dial-a-dope network with Mohamed Abdi Yusuf, 40, as the suspected ringleader. The group played a significant role in cocaine trafficking within Brooks and the project implicated the suppliers and street-level dealers. A total of 10 men are facing 20 drug-related charges. "This dial-a-dope group presented a challenge for uniformed members to investigate. However, by virtue of the partnership with ALERT and their specialized skill sets and resources, we were able to deliver a coordinated response and provide a safer community," said Sgt. Raimo Loo, RCMP Brooks. Indo-Canadian Voice

Needles found in chocolate bars
Sewing needles were found in two large-sized chocolate bars collected by Cochrane youth while trick-or-treating, Oct. 31. Cochrane RCMP are investigating the incident and in the meantime are asking people to step forward if they have been the victim of the tampering of candy during the annual Halloween costume dash for candy. According to the Cochrane RCMP, the complainant had been checking their children's Halloween candy and found a sewing needle in a large O'Henry bar and another sewing needle in a large Kit Kat bar. They had been trick-or-treating on the west side of Gleneagles. The exact location of where the bars were received is still under investigation and if there are any other incidents with tampered candy the RCMP are strongly encouraging it to be reported to help narrow down where this could have taken place at. Cochrane Times

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Advocates urge Liberal government to reduce number of women in prison
Alia Pierini says she still suffers from anxiety as a result of the time she spent in solitary confinement. The 31-year-old from Chilliwack, B.C., says she panics when she ventures out in public alone — traumatized from the effects of having been held periodically in a segregation cell, a place she calls a "cage not meant for a human." Pierini, who served 44 months for drug and assault charges, was on hand at a news conference today where prisoners' rights advocates called on the Liberal government to take steps to reduce the number of women behind bars. Kim Pate, the longtime activist newly recommended for the Senate by Prime Minister Justin Trudeau, says she was "heartened" to see Justice Minister Jody Wilson-Raybould given a mandate to restrict the use of solitary confinement and improve the treatment of prisoners with mental illness. That would mean implementing recommendations from the inquest into the death of Ashley Smith, an emotionally disturbed 19-year-old who died behind bars in 2007 after tying a strip of cloth around her neck. Guards who were ordered not to intervene stood watch outside her cell. Pate says three years after the release of that report, she wants to see action in those areas as quickly as possible. Canadian Press (Chronicle-Herald)

Un jeune Terre-Neuvien craint de voir son père, l'assassin de sa mère, réapparaître chez lui
Un jeune homme de Stephenville, à T.-N.-L., affirme qu'il vit dans la hantise de voir son père, condamné pour le meurtre de sa mère lorsqu'il n'avait que 4 ans, revenir dans la province lorsqu'il obtiendra sa pleine libération. Dale Ogden a obtenu une libération conditionnelle de jour après avoir purgé 16 ans d'une peine de prison à vie pour le meurtre non prémédité de sa femme, Judy Ogden, en 1997. Il se trouve dans une maison de transition de l'île de Vancouver après avoir obtenu sa libération du pénitencier William Head en septembre. Son fils, Daniel Benoit, 22 ans, estime qu'il aurait dû rester en prison. Il a décidé de prendre la parole publiquement parce qu'il souhaite lancer un débat national au sujet des peines pour meurtre qui sont trop légères au Canada, à son avis. Depuis septembre, il craint de voir apparaître Dale Ogden à tout moment sur le pas de sa porte. Il fait pression sur Service correctionnel du Canada pour obtenir une photo récente de lui, pour être en mesure de le reconnaître. Il a également déposé une demande de « séparation géographique » pour empêcher Ogden de revenir à Terre-Neuve-et-Labrador. Ses demandes sont restées lettre morte. Service correctionnel Canada explique que les règles en matière de protection de la vie privée l'empêchent de rendre publiques les photos d'un contrevenant ou des renseignements précis concernant ses allées et venues. Daniel Benoit croit que la sécurité de sa famille devrait primer. Il en a aussi contre un certain laxisme du Service correctionnel du Canada lors d'un incident à la fin septembre. L'agence l'a prévenu le 30 septembre qu'un mandat d'arrêt avait été lancé contre son père parce qu'il était introuvable. L'appel a déclenché une panique dans la

maisonnée de Daniel Benoit, qui croyait que Dale Ogden s'était mis en route pour Terre-Neuve. Ogden a rapidement été retrouvé, mais les Benoit en ont seulement été prévenus 24 heures plus tard. Radio-Canada

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Amnesty International calls for more police in Fort St. John, northeast B.C.
Resource development contributes to crime, putting Indigenous women and girls most at risk, Amnesty says. A new report from Amnesty International says police in northeast B.C. are not equipped to deal with the high rates of crime in the region, particularly when it comes to violence against Indigenous women and girls. The report also calls on RCMP to increase Indigenous cultural knowledge for its officers, and renews Amnesty's demand for the Site C dam project to be stopped. The report titled Out of Sight, Out of Mind provides an overview of the ways in which resource development in B.C.'s Peace River region — including fracking, coal mining and hydroelectric dams — affect vulnerable populations. "There is a downside to the scale of resource development in the northeast and the people who live there," said Craig Benjamin, who helped prepare the report for Amnesty. "Particularly, Indigenous women and girls are bearing a very heavy burden for hosting these products in their region." CBC News

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Legal pot could boost economy
An editorial piece states, "It's possible, even likely, that at some point next year, Ontarians will be able to search store shelves for 'purple haze', 'blue dream' and 'kosher kush' marijuana alongside their VQA merlots, sauvignon blancs and moscatos. Work is well underway to lay the foundation for marijuana legalization in this country, with legislation expected in the spring. Pot advocates have long argued legalization could give our economy a lift. A new report suggests that lift could surpass anyone's wildest prophecy. A study produced by the Deloitte firm – titled Recreational Marijuana: Insights and Opportunities – suggests a legal marijuana industry in Canada could be worth an incredible $22.6 billion – more than the sales of wine, spirits and beer combined. Deloitte's research values the recreational retail market for weed at between $5 billion and $8.7 billion annually. Tack on between $12.7 billion and $22.6 billion for the ancillary market (growers, specialty product makers, testing labs and security) and you have what Deloitte calls "a bold new landscape" for businesses and governments. But that's not all." Simcoe

Canada's Budget Office Estimates Cannabis Market Worth Hundreds of Millions During Flagship Year
According to Canada's Parliamentary Budget Office, sales tax revenues from legal cannabis could be between $356 million and $959 million once the drug is legalized nationwide, as is expected this spring. The figures are based on legal per gram prices between $7.48 and $9.34 with only federal and provincial sales tax applied. Parliamentary Budget Officer Jean-Denis Fréchette notes that the office expects the revenues to, eventually, climb into the billions of dollars and that the new sector will create both new revenues and expenses for the government. "Different products, such as edibles and concentrates, may require entirely different approaches to taxation," the report states. "These variations, along with others, each have different implications for market incentives and fiscal revenues." The PBO projects that in 2018 — the likely first year of legal sales — Canadians will consume between 378 and 1,017 metric tons of cannabis and that the legal market will be largely driven by individuals who consume the drug daily or

weekly. The office suggests that between 3.4 million and 6 million Canadians will consume cannabis at least once after it is legalized nationally. Ganjapreneur (2016-11-02)

Medical marijuana group one step closer to business
As Canadians reacted to news that Shoppers Drug Mart is exploring the possibility of selling medical marijuana in the near future, an independent retailer is finalizing the last steps in opening a medical marijuana dispencery within the Camrose area. Grant Gillott, the chief executive officer of htKa group — the acronym stands for honour, truth, knowledge and action — made a presentation to the Rotary Club of Camrose Oct. 17, discussing what the plans are heading forward. htKa have purchased a 66 acre lot outside the city limits, which Gillott said will leave lots of room for expansion as the market allows. "We see that as something that's almost inevitable," said Gillott. "We didn't want to get into a small site with a single building and try to do expansion and then have to go back through the application process." To reach the stage of owning land, htKa had to become certified with Health Canada in a five step process. The third step was to go through security clearance, that Gillott said took 22 months before they reached an 11 month review process, that they are currently finishing up. Now Gillott is ready to move forward, break ground and be licensed, and he hopes to be ready to go within the next 18 months. While many Canadians are still skeptical about the legalization of medical marijuana, Gillott said there are bussiness opportunities as as legal companies start moving forward. Camrose Canadian

Auditor General flags 'unacceptable' Phoenix pay glitches, PS pension costs
Auditor General Michael Ferguson turned the spotlight on the pay problems of Canada's public servants and the risks of the growing liabilities of their pension plans with the present low interest rates in his latest audit observations on the federal government's books. Ferguson, who audits the government's financial statements, gave the 2016 Public Accounts a clean audit, but he flagged the delays and errors of the Phoenix pay system as "unacceptable" and praised the government for re-examining the assumptions in determining pension liabilities in the face of prolonged low interest rates. Ferguson uses these notes or observations in his audit opinion to highlight issues for MPs to watch. Ferguson, along with senior bureaucrats from Treasury Board and Finance appear at the Commons public accounts committee Thursday to discuss the Public Accounts. On pensions, Ferguson's 2014 report urged the government to re-examine the design of the three defined-benefit plans for Canada's public servants, military and RCMP to ensure it can manage risks that could affect the long-term affordability and "sustainability" of the plans (…) Ferguson said he will be watching the impact of Phoenix in his upcoming audit of the 2017 financial statements. He is also undertaking a major investigation into Phoenix and the whole pay transformation project — at the request of Public Services Minister Judy Foote — to find out how the project went off the rails. It's unclear when that report will be completed. Ottawa Citizen

Ottawa bringing in Air Passenger Bill of Rights: Garneau
The federal government will develop an air passenger bill of rights to better protect travellers, Transport Minister Marc Garneau told the Montreal Chamber of Commerce Thursday. (…) Canada's airport security screening is also under scrutiny. On Thursday, Garneau said Canadian travellers wait too long for security checks compared to their European counterparts. "Long lineups at screening checkpoints should be the exception but that is not the case," attendees were told. "Too many Canadians are waiting too long." Ottawa will develop international competitive targets aimed at ensuring Canadian airports keep up with other major hubs, Garneau said, like Germany and France. Meanwhile, the country's security agency, CATSA, will see its governance structure go under the microscope, while considering "new methods and new technologies." "We want achieve tangible improvements to the traveling experience," Garneau said. iPolitics; Toronto Star; Postmedia Network (National Post, Calgary Sun, Edmonton Sun, Toronto Sun, Ottawa Sun, Winnipeg Sun)

Liberals commit almost $350 million for Latvia mission to deter Russian aggression
The Trudeau government has set aside $348.6 million over the next three years for the deployment of a Canadian battle group in the Baltic States and ongoing air and sea patrols to counter the threat of Russian aggression on Europe's eastern flank. The Liberals have also renewed funding to support security forces and development assistance in Afghanistan until 2021. How much of the $465 million will be spent to prop up Afghan army and police units and how much has been earmarked for relief and capacity building is not clear. CBC News

Turkey's Erdogan says Germany has become 'haven for terrorists'
Turkish President Tayyip Erdogan said on Thursday Germany had become a haven for terrorists and would be "judged by history", accusing it of failing to root out supporters of a U.S.-based cleric Ankara blames for July's failed military coup. Erdogan said Germany had long harbored militants from the Kurdistan Workers Party (PKK), which has waged a three-decade insurgency for Kurdish autonomy, and far-leftists from the DHKP-C, which has carried out armed attacks in Turkey. MINISTER / MINISTRE

Civilian watchdog defends CSIS and embattled director over 'metadata'
Michel Coulombe, Canada's top spy, is in deep trouble with the courts and his political boss, **Public Safety Minister Ralph Goodale**, over revelations CSIS kept a decade's worth of data on Canadians who are no threat to national security. But Pierre Blais, head of the civilian watchdog agency over CSIS, says Coulombe "acted in good faith" and should not lose his job over the affair. "He's doing a good job. And that's a difficult issue, that we have to act as big girls and big boys and we look at this and we should do the best for the future," said Pierre Blais, chair of the Security Intelligence Review Committee

(SIRC)... Still, the judge said CSIS breached its ***"duty of candour"*** when it failed to reveal what it was up to. **Goodale said** Friday he first learned of it was two weeks ago when an unredacted copy of the pending judgment reached his desk. Asked point blank if he still has confidence in Coulombe, **the Public Safety Minister** would say only that he has made his expectations to the director abundantly clear. ***"A serious error has been made. (Coulombe) maintains that in his view, and in the view of the advice he got from the Department of Justice over the course of the last number of years, that the course of conduct by CSIS was within the parameters of law,"*** **Goodale told** reporters. ***"The court has now said very clearly and unequivocally that it was not. This situation needs to be remedied. It has to be remedied quickly . . . CSIS must be forthcoming and candid with the court. That will happen."*** Blais says Coulombe, who rose through the ranks of CSIS to become its head, should not resign or be fired, and expressed total confidence that he "is a very efficient person and he will make the correction that has to be done for the future no question about that." Asked if he was concerned CSIS had lied by omission to the courts, Blais said "lying, it's a very strong word." "As far as I'm concerned — I cannot say that; they never lied to the judge. They maybe (didn't) put everything that should have been presented to the judge," but he repeated "I'm sure that everybody's acting in good faith." A former chief justice of the Federal Court of Appeal who heard national security cases before taking the top job at SIRC, Blais was also once a Progressive Conservative solicitor general and justice minister, and said: "It's not that black and white all the time, particularly in this area. . . . It's never black and white, it's always grey, and we try to make sure that we do the best job possible in respecting the law." University of Ottawa law professor Craig Forcese said the debate over the scope of CSIS powers to collect and retain metadata "is one of these technical lawyerly discussions" but the Federal Court's findings about the spy agency's failure to be open and transparent are "very concerning" if not "astonishing" given that SIRC had recommended it disclose its activities to the court... **Goodale** left open the possibility of changing CSIS's governing legislation to allow new types of investigative techniques, noting the ruling said the CSIS Act could benefit from an update... **But Goodale was adamant** Friday that innocent people should not have their information tracked and stored by Canada's spies. ***"That's a fundamental principle of Canadian privacy,"*** **Goodale said.** Toronto Star

CSIS illegal data storage 'gross abuse of power': NDP

Revelations that Canada's spy agency has been illegally storing data not directly related to threats against national security for at least a decade continued to reverberate on Parliament Hill Friday. NDP justice critic Randall Garrison and public safety critic Matthew Dubé held a morning press conference to condemn the government for not revealing the behaviour, and to stress the need for committee of parliamentarians empowered to get to the bottom of such practices. "I think it reveals a gross abuse of power by Canada's spy agency," said Garrison. "This case makes clear the need for strong oversight of Canada's security agencies ... The bill which is before Parliament, Bill C-22, just simply doesn't do the job."... ***"A strong and timely remedial plan is required to assure the Federal Court about the issue of candour,"*** **said Public Safety Minister Ralph Goodale** in a press conference Friday morning, **stressing** the case shows the Security Intelligence Review Committee did its job by flagging this issue and bringing it to the Federal Court's attention. ***"I will discuss with the executive management of the service how they plan to respond to this judgment in full consultation with the Department of Justice,"*** **Goodale said** when asked specifically whether anyone might be fired over the metadata program. iPolitics

Former Ontario privacy commissioner wants CSIS metadata deleted

Information illegally held by Canada's spy agency over the course of a decade should be deleted from CSIS servers, according to Ontario's former information and privacy commissioner. Ann Cavoukian said metadata – the information included in a communication, such as a telephone number or email address – never should have been gathered because it included details on Canadians who didn't pose a security threat. "The Act is now more than 35 years old," said Jacques Shore, former director of research and investigation for the Security Intelligence Review Committee (SIRC), who now works as partner with Gowling WLG. "Clearly with new technologies, we have to address it." **Public Safety Minister Ralph Goodale said Friday he** was taking the finding ***"very seriously"*** and following up with CSIS top brass. ***"(CSIS) has confirmed to me that it is taking immediate steps to address the court's decision,"*** **Goodale said.** ***"It has blocked all access to, and analysis of, any associated data while it considers its next steps to comply."*** CTV News

Canada's spy agency may be hobbled by ruling on data collection

Canada's spy agency will not be able conduct normal operations until it assesses the effects of a court ruling that curtailed its ability to gather data and could make it less useful to key allies, say sources and officials. A federal court judge on Thursday said the Canadian Security Intelligence Service (CSIS) had secretly operated a data analysis center for 10 years and illegally retained electronic information from people in Canada who were not linked to particular security threats... CSIS could now also have trouble working with its allies in the so-called Five Eyes intelligence-sharing network, which also includes Britain, the United States, Australia and New Zealand, said a leading security expert. "The implications are major because the new constraints are now part of every warrant going forward," Christian Leuprecht, politics professor at the Royal Military College of Canada... If CSIS finds its ability to act is crimped it could in theory turn to the Royal Canadian Mounted Police, which shares responsibility for national security. Two sources with knowledge of the matter say relations between the agencies have deteriorated. Counterintelligence was originally handled by the RCMP's security service, but this was disbanded after a scandal and folded into the new CSIS in 1984 along with a new generation of civilian employees, a move that generated friction... CSIS officials said they retained the data in question because of its value. **Public Safety Minister Ralph Goodale**, who publicly criticized CSIS on Friday, **said** all intelligence and security agencies had to follow the law. Both agencies ultimately report to **Goodale**, **who said** CSIS director Michel Coulombe understood the need for immediate action in the wake of the court ruling. ***"A serious error has been made ... this situation needs to be remedied, it has to be remedied quickly," Goodale told reporters***. **He declined** to answer directly when asked whether he still had confidence in Coulombe, who has been in his position since May 2013. Reuters

What you need to know about the CSIS metadata ruling

A Federal Court judge's ruling this week that CSIS has been illegally storing Canadians' communications data for more than a decade has shed new light on the agency's secretive data analysis program. In his redacted ruling, Justice Simon Noël found the domestic spy agency held on to what it calls "associated data," vast amounts of data about private electronic communications obtained under warrant, long after it had decided the information was not related to a security threat... This practice, Noël wrote, goes beyond CSIS's limited mandate, which restricts its activities to those that are "strictly necessary for the purpose of protecting the security of Canada."... "We've heard the court loud and clear," Robert Frater, chief general counsel for the Department of Justice, who attended the press conference with Coulombe, said. "We are taking steps to improve our practices and we will meet that standard." Who knew about this operation? CSIS told the court that it had informed Stockwell Day, who was serving minister of public safety, about the associated data collection program. But Day refuted that claim in an interview with CBC News Network's Power & Politics. "If he is suggesting, or anybody, that they thought they told me something inappropriate was going on, yeah, I would suggest they did not." The current **public safety minister, Ralph Goodale**, **said Friday** the Security Intelligence Review Committee (SIRC) initially flagged possible problems with the collection and storage of associated data in a report tabled earlier this year. **Goodale said he** only became aware of the full extent of the problem recently, when Noël filed a preliminary report ***"a couple of weeks ago." "I took the immediate step of informing SIRC of the issue and asking SIRC to intervene in the situation to supervise the management of the data and to make sure that there was full compliance with the federal court's judgment," Goodale told*** reporters. CSIS does not need a warrant to review Revenue Canada files... **Goodale said** the Federal Court ruling is ***"timely"*** as it comes in the midst of the government's public consultations over the future of national security. **He has** already promised to launch a parliamentary oversight committee of CSIS, a promise the Liberals made after it tacitly endorsed parts of the controversial Bill C-51... Daniel Therrien, the country's privacy commissioner, told CBC News Friday that CSIS has already reached out to his agency to propose next steps. "At this point I can tell you that we welcome discussions on changes to CSIS policies required by the judgement. We also welcome a proposal from CSIS to meet to discuss their Privacy Impact Assessment for the Operational Data Analysis Centre and how it should be updated following the Court's decision." CBC News

A timeline of events in the case of CSIS's illegal data analysis

A timeline of events in the case of the Canadian Security Intelligence Service's illegal data analysis: 2005: A CSIS task force recommends the spy service retain all data collected from investigations and warrants in order to exploit that information in ongoing and future investigations through a technological program.

April 2006: CSIS sets up the Operational Data Analysis Centre (ODAC), a powerful program that processes metadata — the data trails associated with calls and messages, but not the actual content — to glean otherwise unknowable insights... January 2016: **Public Safety Minister Ralph Goodale tables** the 2014-15 annual report of the Security Intelligence Review Committee, the watchdog over CSIS. In reading it, Federal Court Justice Simon Noel understands for the first time that the service is retaining information collected through judicial warrants about people who were not actual targets of investigations. Noel directs CSIS to provide information at coming hearings concerning CSIS retention and use of metadata gathered through warrants. October 2016: In his ruling, Noel says CSIS violated the law by keeping potentially revealing metadata about people who were not under investigation over a 10-year period. **Goodale** receives a preliminary copy of the highly critical ruling. **He** immediately asks the intelligence review committee to supervise management of the data and ensure full compliance with the judgment. November 2016: A redacted version of the ruling is made public. CSIS says it has halted all access to, and analysis of, the data in question while it thoroughly reviews the court decision. **Goodale says** he expects CSIS to follow the court ruling. Canadian Press (Winnipeg Free Press, Metro News)

Commission d'enquête: Legault veut un examen de tous les corps policiers
Le chef de la Coalition avenir Québec, François Legault, estime que «tous les corps policiers du Québec» doivent être soumis à l'examen de la commission d'enquête chargée de se pencher sur la surveillance de journalistes. De passage à Montréal, vendredi, le chef caquiste a également réclamé que cette commission scrute attentivement la question de la nomination des directeurs de services policiers et les relations entre policiers et dirigeants politiques. «C'est un drôle de hasard que les deux derniers premiers ministres - ou première ministre - du Québec, dès leur arrivée, aient changé le directeur général de la SQ», a-t-il fait valoir. «Que M. (Stéphane) Bergeron (ancien ministre de la Sécurité publique) sente qu'il a le droit d'appeler le DG de la SQ pour demander ce qui se passe avec son ami Michel Arsenault de la FTQ, écoutez, c'est troublant. (...) Il y a beaucoup trop de proximité entre les chefs de police et les dirigeants politiques», a-t-il ajouté... Vendredi, aux Communes, **le ministre fédéral de la Sécurité publique, Ralph Goodale**, a reconnu que les révélations de la semaine au Québec sont ***«très inquiétantes»***, mais interrogé sur les gestes passés de la GRC et du SCRS, **il a clairement indiqué qu'il** n'avait pas l'intention d'aller fouiller dans les placards de ses organisations de sécurité. ***«La question porte sur ce qui se passe maintenant et nous pouvons offrir l'assurance que ce genre d'activité n'a pas lieu. Je ne sais rien sur les événements qui se sont produits lorsque nous (le Parti libéral du Canada) ne formions pas le gouvernement»,*** **a-t-il dit.** Presse Canadienne (La Presse, L'Actualité, Journal Métro)

Federal security review to examine CSIS powers in the digital age: Goodale
A federal review of national security will consider whether Canada's spy service should be able to sift through the kind of personal data it kept illegally for years, says **Public Safety Minister Ralph Goodale. Goodale** said Friday the notion that the Canadian Security Intelligence Service should avoid stashing away information about innocent people is a ***"fundamental principle of Canadian privacy."*** But the minister appeared to leave the door open to one day giving CSIS the legal authority to keep and analyze electronic data about individuals who do not pose a security threat. ***"I want to hear the professional advice on both sides,"*** **Goodale told** a news conference in the foyer of the House of Commons. ***"I'm not pre-empting the consultation."*** A Federal Court judge says CSIS violated the law by keeping potentially revealing electronic data about people who were not targets of investigation over a 10-year period...**Goodale said he** became aware of the ***"full scope of the issue"*** when the court judgment was made available to him in preliminary form a couple of weeks ago. **He said he** took the immediate step of informing the Security Intelligence Review Committee, the watchdog over CSIS, and asked the review committee to supervise management of the data and ensure full compliance with the judgment. Coulombe ***"understands my expectations here,"*** **Goodale added.** ***"A serious error has been made. This situation needs to be remedied. It has to be remedied quickly."*** The NDP said Friday the revelations underscore the need for stronger parliamentary oversight... **Goodale flatly** rejected the criticism, **saying** the committee would have extraordinary authority to look at classified information. Canadian Press (Chronicle-Herald, Metro News, Mississauga.com, Prince George Citizen)

Feds to appoint border crossing adviser
The federal government is set to appoint a special ministerial representative to look at border crossing issues faced by First Nations. In a joint letter written in response to a Senate committee study, Indigenous Affairs Minister Carolyn Bennett, Immigration Minister John McCallum and **Public Safety Minister Ralph Goodale** say the adviser and First Nations will discuss significant and complex challenges. It also says the resolution of these issues will require a "horizontal approach" involving several departments and agencies. The ministers say the results of the engagement between the representative and First Nations will shape the work of an interdepartmental committee of senior officials. The Senate committee on aboriginal peoples outlined border crossing issues in its June report. The committee said some First Nations believe they should have the right to freely cross the Canada-U.S. border, based on the 1794 Jay Treaty between Britain and the U.S. Canadian Press (Inside Ottawa Valley, CBC News); Presse Canadienne (Journal Métro)

Policing concerns in rural Saskatchewan prompt meeting of ministers - 'Public safety continues to be our challenge,' says Minister of Justice Gord Wyant
Saskatchewan's minister of justice says he went to the federal minister responsible for the RCMP over rural policing concerns. Gord Wyant said he and **Minister of Public Safety Ralph Goodale** agreed to have further meetings to discuss adequate RCMP deployment and resources allocated to this matter. "Public safety continues to be our challenge," said Wyant, adding that comments and concerns from the public prompted the meeting with the Saskatchewan MP. "We need to make sure that not only is the proper protection there, but people feel they are being protected," said Wyant. He said **Goodale is doing a review of vacancy management**. "I think that was a big concern that was expressed in rural Saskatchewan," said Wyant. **CBC has reached out to Goodale for comment.** CBC News; Radio-Canada

5 things to know about the CSIS metadata ruling
In a scathing ruling released Thursday, a Federal Court judge said the Canadian Security Intelligence Service illegally held on to potentially revealing electronic data about people over a 10-year timeframe. We break down the ramifications of the major decision and what it means for the future of Canada's spy agency: What do we know? Justice Simon Noel said CSIS held on to metadata that was not directly linked to threats to Canadian security... How has the government reacted? **Public Safety Minister Ralph Goodale said** the government won't appeal the decision and said he will follow up with CSIS top brass about the ruling. **He** added that ***"Canadians need to have confidence"*** about all federal departments and agencies. CTV News

MISE À JOUR : Canada - le renseignement rappelé à l'ordre pour abus de collecte de données
Le gouvernement canadien a rappelé à l'ordre vendredi le Service canadien du renseignement de sécurité (SCRS) reconnu coupable par un tribunal d'avoir mené une collecte "excessive" de données des citoyens, sans lien avec une menace précise à la sécurité nationale. ***"Le SCRS et toutes les agences de renseignement et de sécurité du gouvernement du Canada doivent respecter la loi"***, a **tonné le ministre de la Sécurité publique, Ralph Goodale**, après un jugement dévastateur rendu public jeudi par un tribunal fédéral***. "Le respect de la vie privée est très clairement une valeur canadienne fondamentale. Le respect de nos droits et libertés et de la justice est absolument fondamental"***, **a-t-il déclaré** lors d'une conférence de presse. La Cour fédérale a conclu que le SCRS avait violé son devoir d'être "franc" à son égard pour ne pas lui avoir dévoilé l'existence d'un programme qui, de 2006 à 2015, a permis de collecter et de conserver des métadonnées de tierces personnes, telles des numéros de téléphones et des adresses de courriel, sans que les personnes en question ne posent une quelconque menace à la sécurité nationale. ***"Le juge a conclu que la quantité d'informations collectées était excessive et injustifiée"***, **a rappelé M. Goodale** en réitérant que le gouvernement ne comptait pas faire appel de la décision. Michel Coulombe, directeur du SCRS, a indiqué jeudi que son organisme avait "déjà pris des mesures immédiates" comme la suspension de "tout accès aux données" obtenues en dehors des mandats ainsi que leur analyse... En vertu d'un projet de loi à l'examen au Parlement, ***"un nouveau comité parlementaire aura toute l'autorité pour examiner le travail de toutes nos agences de renseignement et de sécurité, non seulement du SCRS mais de toutes les autres aussi"***, **a dit M. Goodale.** Ce comité aura aussi le pouvoir d'examiner "les opérations en cours" de ces agences, a-t-il promis. Agence France-Presse (L'Orient le Jour)

UPDATE: Canadian Court Rules Spy Agency Illegally Kept Data Unrelated to Threats
A Canadian court issued a strong rebuke to the country's intelligence agency in a ruling released Thursday, saying the Canadian Security Intelligence Service broke the law by holding on to data that wasn't directly related to security threats... The issue of data collection has come under greater scrutiny since former U.S. National Security Agency contractor Edward Snowden revealed that agency was conducting surveillance of U.S. citizens... **Canada Public Safety Minister Ralph Goodale said** in a statement that the government doesn't intend to appeal the court's decision. **Speaking in Ottawa** early Friday, **Mr. Goodale said he** would follow up with the agency's executive management on its failure to inform the court of its actions. ***"CSIS must be forthcoming and candid with the court," he said. "That will happen." Mr. Goodale said*** a government-mandated watchdog, known as the Security Intelligence Review Committee, has also been tasked with supervising CSIS to ensure the data flagged by the court is dealt with properly. **The minister said he** first became aware of the issue through a report by the watchdog that was made public in January, but only learned the full scope of the CSIS program from the court's judgment. Wall Street Journal

Where is the review of intelligence analysis in CSIS?
An opinion piece by Stephanie Carvin, assistant professor of international relations at the Norman Paterson School of International Affairs at Carleton University and a former national security analyst with the federal government, states, "In a week dominated by headlines alleging the FBI meddling in the U.S. presidential election, and police surveillance of journalists in Quebec, Thursday's Federal Court ruling on CSIS's Operational Data Analysis Centre (ODAC) likely heightened the uncertainty many Canadians feel over the actions of our national security services... Although the Macdonald Commission desired to create a civilian intelligence agency, the character of CSIS continues to reflect the organization from which it was born – the 1970s RCMP. While the focus in the Act is rightly on stopping the "bad guys," other intelligence functions of national security organizations, especially analysis, are secondary considerations. Indeed, other than noting in Section 12(1) that the Service "shall report to and advise the Government of Canada" on national security threats, the role of intelligence analysis is barely given any consideration. There is no guidance as to how this role should be done, how intelligence should support operations or in what way advice is to be given... But complicating matters is the largely haphazard structure of the Canadian intelligence community's (IC) analytical branches. There is considerable overlap between several, including the Privy Council Office's Intelligence Assessment Secretariat, the Integrated Terrorism Assessment Centre (ITAC), and CSIS's analytical branches... On Thursday, **Public Safety Minister Ralph Goodale** stated that he was taking seriously the concerns about CSIS's bulk data collection activities. He must also take the time to consider what CSIS's analytical role should be and ensure there is appropriate oversight and review of its activities. After all, there are many excellent analysts in the government. Review will ensure their work helps Canada to be a safer place." Globe and Mail

CSIS must come clean on its spying
An editorial states, "So Canada's spy agency has gobs of people's metadata in a secret database. Well, it's just numbers, isn't it? You know, telephone numbers and Internet IP addresses and so forth. Who cares? The justice system, to begin with. On Thursday, the Federal Court released a ruling saying that the Canadian Security Intelligence Service's retention and analysis of wide swaths of data, which had been going on for 10 years, was illegal. And CSIS hadn't bothered to inform the court of what it was doing. This duplicity is unacceptable; keeping data you're not entitled to is a scandal that concerns all Canadians. And it's happening as a related mess unfolds in Quebec, where police have been spying on journalists, collecting their metadata too... Let's say your information, being scooped up by spies, shows a telephone call from your boss. Next, you telephone your mother. Then, you phone a number associated with a suicide hotline. What could be happening? It doesn't take a highly trained intelligence analyst to figure it out... **Public Safety Minister Ralph Goodale was shifty** on Friday when asked if the Liberals' planned security oversight committee would have stopped this sort of spying; instead **he** repeated talking points. **He also refused** to say how many Canadians had their data captured. Reassuringly, though, the government won't appeal the court ruling. But here are some questions CSIS and **the minister** still must answer: – How many Canadians had their privacy violated in this way? – Will their data be destroyed? If not, why not?... It's a bad day for our intelligence services. Shame on our spies. And on our lackadaisical oversight system." Ottawa Citizen

After trust has eroded, CSIS might get left out in the cold by ministers
An opinion piece states, ""Trust, but verify." Academics Craig Forcese and Kent Roach argue that this should be the maxim in the security sector when dealing with powerful state agencies like the Canadian Security Intelligence Service and the RCMP. But trust in Canada's security services is thin on the ground, after the news Thursday that a CSIS unit illegally kept data deemed unrelated to national security threats. **Public Safety Minister Ralph Goodale said Friday** that a Federal Court decision by Justice Simon Noel, who found CSIS has ***"breached, again, the duty of candour it owes the court,"*** is timely because the Liberals are in the midst of reviewing Canada's national security laws. The latest hit to the spy agency's reputation is unlikely to endear it to this government, and makes it more likely the Liberals will roll back what Forcese and Roach call the "outer limits" of C-51, the anti-terror legislation introduced last year by the Conservatives... Given the fact that the country's foremost jurists on national security law have repeatedly censured the spy agency for deliberately misleading them, it seems a good bet that the government will decide to shorten CSIS's leash. **Yet Goodale did not** rule out a change to the law to allow CSIS to keep the information ruled offside by the court. ***"This is an issue that I think needs to be examined in the context of our national security review,"*** **he said.** ***"I want to hear the professional advice on both sides ... Our security agencies to be effective in keeping Canadians safe. At the same time, what the agencies do needs to be in accord with the law and with the Constitution."*** Phil Gurski, a former CSIS analyst, said the metadata was retained for a reason — namely to identify people involved with, or sympathetic to, terror groups. "It was a legal opinion that this was illegal because the service is only allowed to retain information that is strictly necessary. I'm saying that it is strictly necessary and the data would inform future investigations."... Now trust has broken down, both with the judges who issue the warrants CSIS needs and with **the minister** to whom it answers. When consultations with Canadians over national security end, and the government reports back, the spies could find themselves left out in the cold." National Post

TOP STORIES / MANCHETTES

Animal Rights Groups, the KKK, and ISIS—the RCMP's New Guide To Extremism
For the past few years, the Canadian government has faced accusations that it's been asleep at the switch when it comes to stopping youth from being programmed by violent extremist groups. The Royal Canadian Mounted Police are striking back at that notion with a 140-page guide to radicalization, extremist groups operating in Canada, and terrorist groups abroad. The agency's Terrorism and Violent Extremism Awareness Guide, which was officially unveiled in October, "is intended for first responders, parents, colleagues or friends of persons at risk alike and is meant to help the reader to better understand and recognize the growing phenomenon of radicalization to violence." A large chunk of the report is just compiling resources on radicalization, offering different models that try to explain how someone might come around to violence and extremism based on their social, religious, and political beliefs. But the report also sheds light on exactly which domestic groups the RCMP are keeping an eye on. The report's language borrows heavily from internal security and intelligence assessments prepared by groups like the Canadian Security Intelligence Service and the Integrated Terrorism Assessment Centre... The RCMP also warns about the Internationalist Resistance (IR), which it describes as an "extremist anti-capitalist group." The classification is interesting, because the RCMP has spent the better part of a decade investigating a small group of Quebec Communists, accusing them of making up the central cell of the IR,

and for carrying out three bombings throughout Quebec from 2004 to 2010. A VICE Canada investigation raised questions about that investigation and whether the RCMP really has the right culprits. The RCMP report also names Skinheads Against Racial Prejudice and Red and Anarchist Skinheads, both committed to anti-fascism and anti-racism, as being two radical groups. Vice News

Quebec Mounties seek to launch discrimination lawsuit against RCMP
The association that represents RCMP members in Quebec is seeking to certify a class action lawsuit against the force on behalf of members across the country, alleging systemic harassment and discrimination against members by superiors. "There's some cases that have been done privately but on behalf of all members, this has never been done," said Frederic Serre, media officer for the Quebec Mounted Police Members Association. "You're looking at power trips and unfortunately there's a lot of it within the force … That's what we're trying to point out with this action." Serre said that although it's an association representing Quebec Mounties that's seeking to launch the suit, the class action is meant to represent all RCMP members across Canada — not just those in Quebec or francophones. iPolitics; Global News

City of Richmond: Volunteer cops need gun training
The amount of time Richmond's volunteer RCMP auxiliary constables are on the beat has dropped by 70 per cent this year, over 2014, after Mounties were ordered to have direct armed supervision of the complementary force and end all ride-along duties. Now, Richmond city council wants Ottawa to reinstate unsupervised duties for the unarmed auxiliary force and allow for firearms familiarization training. "We would like to see the auxiliary force back to what they used to be. It's been a great resource to augment our police force," said Coun. Bill McNulty. The city is backing a proposal by the Union of B.C. Municipalities to introduce a three-tier training program that would allow auxiliary constables to increase the number of duties they perform — such as public ceremonies, bike patrols and traffic and crowd control — without supervision. MINISTER / MINISTRE

Civilian watchdog defends CSIS and embattled director over 'metadata'
Michel Coulombe, Canada's top spy, is in deep trouble with the courts and his political boss, **Public Safety Minister Ralph Goodale**, over revelations CSIS kept a decade's worth of data on Canadians who are no threat to national security. But Pierre Blais, head of the civilian watchdog agency over CSIS, says Coulombe "acted in good faith" and should not lose his job over the affair. "He's doing a good job. And that's a difficult issue, that we have to act as big girls and big boys and we look at this and we should do the best for the future," said Pierre Blais, chair of the Security Intelligence Review Committee

(SIRC)... Still, the judge said CSIS breached its ***"duty of candour"*** when it failed to reveal what it was up to. **Goodale said** Friday he first learned of it was two weeks ago when an unredacted copy of the pending judgment reached his desk. Asked point blank if he still has confidence in Coulombe, **the Public Safety Minister** would say only that he has made his expectations to the director abundantly clear. ***"A serious error has been made. (Coulombe) maintains that in his view, and in the view of the advice he got from the Department of Justice over the course of the last number of years, that the course of conduct by CSIS was within the parameters of law,"*** **Goodale told** reporters. ***"The court has now said very clearly and unequivocally that it was not. This situation needs to be remedied. It has to be remedied quickly . . . CSIS must be forthcoming and candid with the court. That will happen."*** Blais says Coulombe, who rose through the ranks of CSIS to become its head, should not resign or be fired, and expressed total confidence that he "is a very efficient person and he will make the correction that has to be done for the future no question about that." Asked if he was concerned CSIS had lied by omission to the courts, Blais said "lying, it's a very strong word." "As far as I'm concerned — I cannot say that; they never lied to the judge. They maybe (didn't) put everything that should have been presented to the judge," but he repeated "I'm sure that everybody's acting in good faith." A former chief justice of the Federal Court of Appeal who heard national security cases before taking the top job at SIRC, Blais was also once a Progressive Conservative solicitor general and justice minister, and said: "It's not that black and white all the time, particularly in this area. . . . It's never black and white, it's always grey, and we try to make sure that we do the best job possible in respecting the law." University of Ottawa law professor Craig Forcese said the debate over the scope of CSIS powers to collect and retain metadata "is one of these technical lawyerly discussions" but the Federal Court's findings about the spy agency's failure to be open and transparent are "very concerning" if not "astonishing" given that SIRC had recommended it disclose its activities to the court... **Goodale** left open the possibility of changing CSIS's governing legislation to allow new types of investigative techniques, noting the ruling said the CSIS Act could benefit from an update... **But Goodale was adamant** Friday that innocent people should not have their information tracked and stored by Canada's spies. ***"That's a fundamental principle of Canadian privacy,"*** **Goodale said.** Toronto Star

CSIS illegal data storage 'gross abuse of power': NDP

Revelations that Canada's spy agency has been illegally storing data not directly related to threats against national security for at least a decade continued to reverberate on Parliament Hill Friday. NDP justice critic Randall Garrison and public safety critic Matthew Dubé held a morning press conference to condemn the government for not revealing the behaviour, and to stress the need for committee of parliamentarians empowered to get to the bottom of such practices. "I think it reveals a gross abuse of power by Canada's spy agency," said Garrison. "This case makes clear the need for strong oversight of Canada's security agencies ... The bill which is before Parliament, Bill C-22, just simply doesn't do the job."... ***"A strong and timely remedial plan is required to assure the Federal Court about the issue of candour,"*** **said Public Safety Minister Ralph Goodale** in a press conference Friday morning, **stressing** the case shows the Security Intelligence Review Committee did its job by flagging this issue and bringing it to the Federal Court's attention. ***"I will discuss with the executive management of the service how they plan to respond to this judgment in full consultation with the Department of Justice,"*** **Goodale said** when asked specifically whether anyone might be fired over the metadata program. iPolitics

Former Ontario privacy commissioner wants CSIS metadata deleted

Information illegally held by Canada's spy agency over the course of a decade should be deleted from CSIS servers, according to Ontario's former information and privacy commissioner. Ann Cavoukian said metadata – the information included in a communication, such as a telephone number or email address – never should have been gathered because it included details on Canadians who didn't pose a security threat. "The Act is now more than 35 years old," said Jacques Shore, former director of research and investigation for the Security Intelligence Review Committee (SIRC), who now works as partner with Gowling WLG. "Clearly with new technologies, we have to address it." **Public Safety Minister Ralph Goodale said Friday he** was taking the finding ***"very seriously"*** and following up with CSIS top brass. ***"(CSIS) has confirmed to me that it is taking immediate steps to address the court's decision,"*** **Goodale said.** ***"It has blocked all access to, and analysis of, any associated data while it considers its next steps to comply."*** CTV News

Canada's spy agency may be hobbled by ruling on data collection

Canada's spy agency will not be able conduct normal operations until it assesses the effects of a court ruling that curtailed its ability to gather data and could make it less useful to key allies, say sources and officials. A federal court judge on Thursday said the Canadian Security Intelligence Service (CSIS) had secretly operated a data analysis center for 10 years and illegally retained electronic information from people in Canada who were not linked to particular security threats... CSIS could now also have trouble working with its allies in the so-called Five Eyes intelligence-sharing network, which also includes Britain, the United States, Australia and New Zealand, said a leading security expert. "The implications are major because the new constraints are now part of every warrant going forward," Christian Leuprecht, politics professor at the Royal Military College of Canada... If CSIS finds its ability to act is crimped it could in theory turn to the Royal Canadian Mounted Police, which shares responsibility for national security. Two sources with knowledge of the matter say relations between the agencies have deteriorated. Counterintelligence was originally handled by the RCMP's security service, but this was disbanded after a scandal and folded into the new CSIS in 1984 along with a new generation of civilian employees, a move that generated friction... CSIS officials said they retained the data in question because of its value. **Public Safety Minister Ralph Goodale**, who publicly criticized CSIS on Friday, **said** all intelligence and security agencies had to follow the law. Both agencies ultimately report to **Goodale**, **who said** CSIS director Michel Coulombe understood the need for immediate action in the wake of the court ruling. ***"A serious error has been made ... this situation needs to be remedied, it has to be remedied quickly," Goodale told reporters***. **He declined** to answer directly when asked whether he still had confidence in Coulombe, who has been in his position since May 2013. Reuters

What you need to know about the CSIS metadata ruling

A Federal Court judge's ruling this week that CSIS has been illegally storing Canadians' communications data for more than a decade has shed new light on the agency's secretive data analysis program. In his redacted ruling, Justice Simon Noël found the domestic spy agency held on to what it calls "associated data," vast amounts of data about private electronic communications obtained under warrant, long after it had decided the information was not related to a security threat... This practice, Noël wrote, goes beyond CSIS's limited mandate, which restricts its activities to those that are "strictly necessary for the purpose of protecting the security of Canada."... "We've heard the court loud and clear," Robert Frater, chief general counsel for the Department of Justice, who attended the press conference with Coulombe, said. "We are taking steps to improve our practices and we will meet that standard." Who knew about this operation? CSIS told the court that it had informed Stockwell Day, who was serving minister of public safety, about the associated data collection program. But Day refuted that claim in an interview with CBC News Network's Power & Politics. "If he is suggesting, or anybody, that they thought they told me something inappropriate was going on, yeah, I would suggest they did not." The current **public safety minister, Ralph Goodale**, **said Friday** the Security Intelligence Review Committee (SIRC) initially flagged possible problems with the collection and storage of associated data in a report tabled earlier this year. **Goodale said he** only became aware of the full extent of the problem recently, when Noël filed a preliminary report ***"a couple of weeks ago." "I took the immediate step of informing SIRC of the issue and asking SIRC to intervene in the situation to supervise the management of the data and to make sure that there was full compliance with the federal court's judgment," Goodale told*** reporters. CSIS does not need a warrant to review Revenue Canada files... **Goodale said** the Federal Court ruling is ***"timely"*** as it comes in the midst of the government's public consultations over the future of national security. **He has** already promised to launch a parliamentary oversight committee of CSIS, a promise the Liberals made after it tacitly endorsed parts of the controversial Bill C-51... Daniel Therrien, the country's privacy commissioner, told CBC News Friday that CSIS has already reached out to his agency to propose next steps. "At this point I can tell you that we welcome discussions on changes to CSIS policies required by the judgement. We also welcome a proposal from CSIS to meet to discuss their Privacy Impact Assessment for the Operational Data Analysis Centre and how it should be updated following the Court's decision." CBC News

A timeline of events in the case of CSIS's illegal data analysis

A timeline of events in the case of the Canadian Security Intelligence Service's illegal data analysis: 2005: A CSIS task force recommends the spy service retain all data collected from investigations and warrants in order to exploit that information in ongoing and future investigations through a technological program.

April 2006: CSIS sets up the Operational Data Analysis Centre (ODAC), a powerful program that processes metadata — the data trails associated with calls and messages, but not the actual content — to glean otherwise unknowable insights... January 2016: **Public Safety Minister Ralph Goodale tables** the 2014-15 annual report of the Security Intelligence Review Committee, the watchdog over CSIS. In reading it, Federal Court Justice Simon Noel understands for the first time that the service is retaining information collected through judicial warrants about people who were not actual targets of investigations. Noel directs CSIS to provide information at coming hearings concerning CSIS retention and use of metadata gathered through warrants. October 2016: In his ruling, Noel says CSIS violated the law by keeping potentially revealing metadata about people who were not under investigation over a 10-year period. **Goodale** receives a preliminary copy of the highly critical ruling. **He** immediately asks the intelligence review committee to supervise management of the data and ensure full compliance with the judgment. November 2016: A redacted version of the ruling is made public. CSIS says it has halted all access to, and analysis of, the data in question while it thoroughly reviews the court decision. **Goodale says** he expects CSIS to follow the court ruling. Canadian Press (Winnipeg Free Press, Metro News)

Commission d'enquête: Legault veut un examen de tous les corps policiers
Le chef de la Coalition avenir Québec, François Legault, estime que «tous les corps policiers du Québec» doivent être soumis à l'examen de la commission d'enquête chargée de se pencher sur la surveillance de journalistes. De passage à Montréal, vendredi, le chef caquiste a également réclamé que cette commission scrute attentivement la question de la nomination des directeurs de services policiers et les relations entre policiers et dirigeants politiques. «C'est un drôle de hasard que les deux derniers premiers ministres - ou première ministre - du Québec, dès leur arrivée, aient changé le directeur général de la SQ», a-t-il fait valoir. «Que M. (Stéphane) Bergeron (ancien ministre de la Sécurité publique) sente qu'il a le droit d'appeler le DG de la SQ pour demander ce qui se passe avec son ami Michel Arsenault de la FTQ, écoutez, c'est troublant. (...) Il y a beaucoup trop de proximité entre les chefs de police et les dirigeants politiques», a-t-il ajouté... Vendredi, aux Communes, **le ministre fédéral de la Sécurité publique, Ralph Goodale**, a reconnu que les révélations de la semaine au Québec sont ***«très inquiétantes»***, mais interrogé sur les gestes passés de la GRC et du SCRS, **il a clairement indiqué qu'il** n'avait pas l'intention d'aller fouiller dans les placards de ses organisations de sécurité. ***«La question porte sur ce qui se passe maintenant et nous pouvons offrir l'assurance que ce genre d'activité n'a pas lieu. Je ne sais rien sur les événements qui se sont produits lorsque nous (le Parti libéral du Canada) ne formions pas le gouvernement»,*** **a-t-il dit.** Presse Canadienne (La Presse, L'Actualité, Journal Métro)

Federal security review to examine CSIS powers in the digital age: Goodale
A federal review of national security will consider whether Canada's spy service should be able to sift through the kind of personal data it kept illegally for years, says **Public Safety Minister Ralph Goodale. Goodale** said Friday the notion that the Canadian Security Intelligence Service should avoid stashing away information about innocent people is a ***"fundamental principle of Canadian privacy."*** But the minister appeared to leave the door open to one day giving CSIS the legal authority to keep and analyze electronic data about individuals who do not pose a security threat. ***"I want to hear the professional advice on both sides,"*** **Goodale told** a news conference in the foyer of the House of Commons. ***"I'm not pre-empting the consultation."*** A Federal Court judge says CSIS violated the law by keeping potentially revealing electronic data about people who were not targets of investigation over a 10-year period...**Goodale said he** became aware of the ***"full scope of the issue"*** when the court judgment was made available to him in preliminary form a couple of weeks ago. **He said he** took the immediate step of informing the Security Intelligence Review Committee, the watchdog over CSIS, and asked the review committee to supervise management of the data and ensure full compliance with the judgment. It has to be remedied quickly."*** The NDP said Friday the revelations underscore the need for stronger parliamentary oversight... **Goodale flatly** rejected the criticism, **saying** the committee would have extraordinary authority to look at classified information. Canadian Press (Chronicle-Herald, Metro News, Mississauga.com, Prince George Citizen)

Feds to appoint border crossing adviser
The federal government is set to appoint a special ministerial representative to look at border crossing issues faced by First Nations. In a joint letter written in response to a Senate committee study, Indigenous Affairs Minister Carolyn Bennett, Immigration Minister John McCallum and **Public Safety Minister Ralph Goodale** say the adviser and First Nations will discuss significant and complex challenges. It also says the resolution of these issues will require a "horizontal approach" involving several departments and agencies. The ministers say the results of the engagement between the representative and First Nations will shape the work of an interdepartmental committee of senior officials. The Senate committee on aboriginal peoples outlined border crossing issues in its June report. The committee said some First Nations believe they should have the right to freely cross the Canada-U.S. border, based on the 1794 Jay Treaty between Britain and the U.S. Canadian Press (Inside Ottawa Valley, CBC News); Presse Canadienne (Journal Métro)

Policing concerns in rural Saskatchewan prompt meeting of ministers - 'Public safety continues to be our challenge,' says Minister of Justice Gord Wyant
Saskatchewan's minister of justice says he went to the federal minister responsible for the RCMP over rural policing concerns. Gord Wyant said he and **Minister of Public Safety Ralph Goodale** agreed to have further meetings to discuss adequate RCMP deployment and resources allocated to this matter. "Public safety continues to be our challenge," said Wyant, adding that comments and concerns from the public prompted the meeting with the Saskatchewan MP. "We need to make sure that not only is the proper protection there, but people feel they are being protected," said Wyant. He said **Goodale is doing a review of vacancy management**. "I think that was a big concern that was expressed in rural Saskatchewan," said Wyant. **CBC has reached out to Goodale for comment.** CBC News; Radio-Canada

5 things to know about the CSIS metadata ruling
In a scathing ruling released Thursday, a Federal Court judge said the Canadian Security Intelligence Service illegally held on to potentially revealing electronic data about people over a 10-year timeframe. We break down the ramifications of the major decision and what it means for the future of Canada's spy agency: What do we know? Justice Simon Noel said CSIS held on to metadata that was not directly linked to threats to Canadian security... How has the government reacted? **Public Safety Minister Ralph Goodale said** the government won't appeal the decision and said he will follow up with CSIS top brass about the ruling. **He** added that ***"Canadians need to have confidence"*** about all federal departments and agencies. CTV News

MISE À JOUR : Canada - le renseignement rappelé à l'ordre pour abus de collecte de données
Le gouvernement canadien a rappelé à l'ordre vendredi le Service canadien du renseignement de sécurité (SCRS) reconnu coupable par un tribunal d'avoir mené une collecte "excessive" de données des citoyens, sans lien avec une menace précise à la sécurité nationale. ***"Le SCRS et toutes les agences de renseignement et de sécurité du gouvernement du Canada doivent respecter la loi"***, a **tonné le ministre de la Sécurité publique, Ralph Goodale**, après un jugement dévastateur rendu public jeudi par un tribunal fédéral***. "Le respect de la vie privée est très clairement une valeur canadienne fondamentale. Le respect de nos droits et libertés et de la justice est absolument fondamental"***, **a-t-il déclaré** lors d'une conférence de presse. La Cour fédérale a conclu que le SCRS avait violé son devoir d'être "franc" à son égard pour ne pas lui avoir dévoilé l'existence d'un programme qui, de 2006 à 2015, a permis de collecter et de conserver des métadonnées de tierces personnes, telles des numéros de téléphones et des adresses de courriel, sans que les personnes en question ne posent une quelconque menace à la sécurité nationale. ***"Le juge a conclu que la quantité d'informations collectées était excessive et injustifiée"***, **a rappelé M. Goodale** en réitérant que le gouvernement ne comptait pas faire appel de la décision. Michel Coulombe, directeur du SCRS, a indiqué jeudi que son organisme avait "déjà pris des mesures immédiates" comme la suspension de "tout accès aux données" obtenues en dehors des mandats ainsi que leur analyse... En vertu d'un projet de loi à l'examen au Parlement, ***"un nouveau comité parlementaire aura toute l'autorité pour examiner le travail de toutes nos agences de renseignement et de sécurité, non seulement du SCRS mais de toutes les autres aussi"***, **a dit M. Goodale.** Ce comité aura aussi le pouvoir d'examiner "les opérations en cours" de ces agences, a-t-il promis. Agence France-Presse (L'Orient le Jour)

UPDATE: Canadian Court Rules Spy Agency Illegally Kept Data Unrelated to Threats
A Canadian court issued a strong rebuke to the country's intelligence agency in a ruling released Thursday, saying the Canadian Security Intelligence Service broke the law by holding on to data that wasn't directly related to security threats... The issue of data collection has come under greater scrutiny since former U.S. National Security Agency contractor Edward Snowden revealed that agency was conducting surveillance of U.S. citizens... **Canada Public Safety Minister Ralph Goodale said** in a statement that the government doesn't intend to appeal the court's decision. **Speaking in Ottawa** early Friday, **Mr. Goodale said he** would follow up with the agency's executive management on its failure to inform the court of its actions. ***"CSIS must be forthcoming and candid with the court,"* he said. *"That will happen."* Mr. Goodale said** a government-mandated watchdog, known as the Security Intelligence Review Committee, has also been tasked with supervising CSIS to ensure the data flagged by the court is dealt with properly. **The minister said he** first became aware of the issue through a report by the watchdog that was made public in January, but only learned the full scope of the CSIS program from the court's judgment. Wall Street Journal

Where is the review of intelligence analysis in CSIS?
An opinion piece by Stephanie Carvin, assistant professor of international relations at the Norman Paterson School of International Affairs at Carleton University and a former national security analyst with the federal government, states, "In a week dominated by headlines alleging the FBI meddling in the U.S. presidential election, and police surveillance of journalists in Quebec, Thursday's Federal Court ruling on CSIS's Operational Data Analysis Centre (ODAC) likely heightened the uncertainty many Canadians feel over the actions of our national security services... Although the Macdonald Commission desired to create a civilian intelligence agency, the character of CSIS continues to reflect the organization from which it was born – the 1970s RCMP. While the focus in the Act is rightly on stopping the "bad guys," other intelligence functions of national security organizations, especially analysis, are secondary considerations. Indeed, other than noting in Section 12(1) that the Service "shall report to and advise the Government of Canada" on national security threats, the role of intelligence analysis is barely given any consideration. There is no guidance as to how this role should be done, how intelligence should support operations or in what way advice is to be given... But complicating matters is the largely haphazard structure of the Canadian intelligence community's (IC) analytical branches. There is considerable overlap between several, including the Privy Council Office's Intelligence Assessment Secretariat, the Integrated Terrorism Assessment Centre (ITAC), and CSIS's analytical branches... On Thursday, **Public Safety Minister Ralph Goodale** stated that he was taking seriously the concerns about CSIS's bulk data collection activities. He must also take the time to consider what CSIS's analytical role should be and ensure there is appropriate oversight and review of its activities. After all, there are many excellent analysts in the government. Review will ensure their work helps Canada to be a safer place." Globe and Mail

CSIS must come clean on its spying
An editorial states, "So Canada's spy agency has gobs of people's metadata in a secret database. Well, it's just numbers, isn't it? You know, telephone numbers and Internet IP addresses and so forth. Who cares? The justice system, to begin with. On Thursday, the Federal Court released a ruling saying that the Canadian Security Intelligence Service's retention and analysis of wide swaths of data, which had been going on for 10 years, was illegal. And CSIS hadn't bothered to inform the court of what it was doing. This duplicity is unacceptable; keeping data you're not entitled to is a scandal that concerns all Canadians. And it's happening as a related mess unfolds in Quebec, where police have been spying on journalists, collecting their metadata too... Let's say your information, being scooped up by spies, shows a telephone call from your boss. Next, you telephone your mother. Then, you phone a number associated with a suicide hotline. What could be happening? It doesn't take a highly trained intelligence analyst to figure it out... **Public Safety Minister Ralph Goodale was shifty** on Friday when asked if the Liberals' planned security oversight committee would have stopped this sort of spying; instead **he** repeated talking points. **He also refused** to say how many Canadians had their data captured. Reassuringly, though, the government won't appeal the court ruling. But here are some questions CSIS and **the minister** still must answer: – How many Canadians had their privacy violated in this way? – Will their data be destroyed? If not, why not?... It's a bad day for our intelligence services. Shame on our spies. And on our lackadaisical oversight system." Ottawa Citizen

After trust has eroded, CSIS might get left out in the cold by ministers
An opinion piece states, ""Trust, but verify." Academics Craig Forcese and Kent Roach argue that this should be the maxim in the security sector when dealing with powerful state agencies like the Canadian Security Intelligence Service and the RCMP. But trust in Canada's security services is thin on the ground, after the news Thursday that a CSIS unit illegally kept data deemed unrelated to national security threats. **Public Safety Minister Ralph Goodale said Friday** that a Federal Court decision by Justice Simon Noel, who found CSIS has ***"breached, again, the duty of candour it owes the court,"*** is timely because the Liberals are in the midst of reviewing Canada's national security laws. The latest hit to the spy agency's reputation is unlikely to endear it to this government, and makes it more likely the Liberals will roll back what Forcese and Roach call the "outer limits" of C-51, the anti-terror legislation introduced last year by the Conservatives... Given the fact that the country's foremost jurists on national security law have repeatedly censured the spy agency for deliberately misleading them, it seems a good bet that the government will decide to shorten CSIS's leash. **Yet Goodale did not** rule out a change to the law to allow CSIS to keep the information ruled offside by the court. ***"This is an issue that I think needs to be examined in the context of our national security review,"*** **he said.** ***"I want to hear the professional advice on both sides ... Our security agencies to be effective in keeping Canadians safe. At the same time, what the agencies do needs to be in accord with the law and with the Constitution."*** Phil Gurski, a former CSIS analyst, said the metadata was retained for a reason — namely to identify people involved with, or sympathetic to, terror groups. "It was a legal opinion that this was illegal because the service is only allowed to retain information that is strictly necessary. I'm saying that it is strictly necessary and the data would inform future investigations."... Now trust has broken down, both with the judges who issue the warrants CSIS needs and with **the minister** to whom it answers. When consultations with Canadians over national security end, and the government reports back, the spies could find themselves left out in the cold." National Post

Animal Rights Groups, the KKK, and ISIS—the RCMP's New Guide To Extremism
For the past few years, the Canadian government has faced accusations that it's been asleep at the switch when it comes to stopping youth from being programmed by violent extremist groups. The Royal Canadian Mounted Police are striking back at that notion with a 140-page guide to radicalization, extremist groups operating in Canada, and terrorist groups abroad. The agency's Terrorism and Violent Extremism Awareness Guide, which was officially unveiled in October, "is intended for first responders, parents, colleagues or friends of persons at risk alike and is meant to help the reader to better understand and recognize the growing phenomenon of radicalization to violence." A large chunk of the report is just compiling resources on radicalization, offering different models that try to explain how someone might come around to violence and extremism based on their social, religious, and political beliefs. But the report also sheds light on exactly which domestic groups the RCMP are keeping an eye on. The report's language borrows heavily from internal security and intelligence assessments prepared by groups like the Canadian Security Intelligence Service and the Integrated Terrorism Assessment Centre... The RCMP also warns about the Internationalist Resistance (IR), which it describes as an "extremist anti-capitalist group." The classification is interesting, because the RCMP has spent the better part of a decade investigating a small group of Quebec Communists, accusing them of making up the central cell of the IR,

and for carrying out three bombings throughout Quebec from 2004 to 2010. A VICE Canada investigation raised questions about that investigation and whether the RCMP really has the right culprits. The RCMP report also names Skinheads Against Racial Prejudice and Red and Anarchist Skinheads, both committed to anti-fascism and anti-racism, as being two radical groups. Vice News

Quebec Mounties seek to launch discrimination lawsuit against RCMP
The association that represents RCMP members in Quebec is seeking to certify a class action lawsuit against the force on behalf of members across the country, alleging systemic harassment and discrimination against members by superiors. "There's some cases that have been done privately but on behalf of all members, this has never been done," said Frederic Serre, media officer for the Quebec Mounted Police Members Association. "You're looking at power trips and unfortunately there's a lot of it within the force … That's what we're trying to point out with this action." Serre said that although it's an association representing Quebec Mounties that's seeking to launch the suit, the class action is meant to represent all RCMP members across Canada — not just those in Quebec or francophones. iPolitics; Global News

City of Richmond: Volunteer cops need gun training
The amount of time Richmond's volunteer RCMP auxiliary constables are on the beat has dropped by 70 per cent this year, over 2014, after Mounties were ordered to have direct armed supervision of the complementary force and end all ride-along duties. Now, Richmond city council wants Ottawa to reinstate unsupervised duties for the unarmed auxiliary force and allow for firearms familiarization training. "We would like to see the auxiliary force back to what they used to be. It's been a great resource to augment our police force," said Coun. Bill McNulty. The city is backing a proposal by the Union of B.C. Municipalities to introduce a three-tier training program that would allow auxiliary constables to increase the number of duties they perform — such as public ceremonies, bike patrols and traffic and crowd control — without supervision. Meet the 21 new Trudeau-appointed senators
Prime Minister Justin Trudeau has appointed 21 new independent senators, further bolstering the number of non-affiliated members in the upper chamber to 44... Marc Gold is a constitutional law expert who has

held major leadership roles in the Jewish community at the local, national and international levels, including being Chair of Jewish Federations of Canada... He currently serves as a part-time member of the Parole Board of Canada and is an adjunct professor of law at McGill University. CBC News

Boyfriend of pregnant killer Kelly Ellard a suspect in a 2016 disappearance
The boyfriend of pregnant killer Kelly Ellard is a suspect in the May 2016 disappearance of a low-level drug dealer, according to just released Parole Board of Canada documents. Darwin Dorozan had his parole revoked after Correctional Services of Canada officials were made aware of the investigation into Dorozan, the documents say. "On the same date full parole was granted, police advised CSC that you were a person of interest in the suspicious disappearance of a low-level drug dealer in May 2016," the parole board said in its Oct. 27 ruling...Her lawyer Sarah Rauch told Postmedia that they had known each other for about five years and that CSC followed all the rules in allowing them to have conjugal visits..."Corrections, as they do with everyone, does a huge scrutiny for a number of months if not a number of years," Rauch said. "Corrections did everything they always do in order to scrutinize the private family visits before granting them."... Under the Correction's mother-child program, there are currently six babies across Canada being cared for by their mothers in federal jails. Postmedia Network (Vancouver Sun, National Post)

La GRC et la surveillance des journalistes: rien de rassurant
Une article d'opinion mentionne, « Depuis les révélations sur la surveillance des journalistes par la police de Montréal et la Sûreté du Québec, la réaction du gouvernement Trudeau a de quoi rendre perplexe. Et inquiet. Même si le premier ministre et ses ministres répètent que la liberté de la presse est un pilier «essentiel pour une démocratie qui fonctionne bien et une société libre», et qu'ils suivent cette situation de près, ils se comportent davantage comme un gouvernement qui souhaite que la controverse ne franchisse pas la rivière des Outaouais. Le **ministre de la Sécurité publique, Ralph Goodale**, qualifie la

surveillance des journalistes au Québec de «très inquiétante», mais il ne cherche pas à faire toute la lumière sur les agissements passés de la GRC et du SCRS... La semaine dernière, le commissaire de la GRC, Bob Paulson, a dit «ne pas être au courant» s'il y a eu des enquêtes ou de la surveillance à l'égard des journalistes, avant de préciser qu'il n'y en a pas «actuellement». Même réponse du premier ministre Justin Trudeau, qui a voulu se faire rassurant après avoir parlé à la GRC et au Service canadien de renseignement de sécurité (SCRS), affirmant qu'il n'y a «aucune activité de ce type au niveau fédéral actuellement». Mais jamais de réponse sur les activités passées, même récentes... **Le ministre Goodale** y est allé d'une belle contradiction. D'abord, il a affirmé aux journalistes à Ottawa que leurs questions sur les activités et les enquêtes de la GRC et du SCRS étaient dangereuses pour la séparation des pouvoirs entre le gouvernement et la police. ***«Vous allez sur une pente très dangereuse quand vous invitez les politiciens à aller dans ce domaine»***, a-t-il dit. Et dans le même point de presse, il a ajouté: ***«Je n'ai pas connaissance de choses qui se sont produites quand nous ne formions pas le gouvernement du Canada.»*** Faut-il en déduire que **M. Goodale** est au courant de ce qui se passe dans les opérations de la GRC et du SCRS lorsque son parti forme le gouvernement? Si oui, où est la séparation des pouvoirs à propos de laquelle le ministre sermonne les journalistes qui veulent en savoir plus? Et si un pilier de la démocratie est atteint au point d'inquiéter le ministre de la Sécurité publique, comme il l'affirme, pourquoi ce manque de curiosité sur les agissements récents de ses forces de l'ordre? Il ne s'agit pas d'intervenir dans des enquêtes en cours, mais de savoir si une telle surveillance a eu lieu de la part de la GRC et du SCRS dans le passé, et si oui, quand, pourquoi et à combien de reprise? **Le ministr**e ne veut-il pas savoir?... » L'actualité

Security forces must be held accountable
A letter states "Re: CSIS kept metadata illegally, court rules, Nov. 4 - Given the director of CSIS's recent display of contempt for Canada's Parliament, if not for our constitution, **Public Safety Minister Ralph Goodale** has no other option than to demand Michel Coulombe's resignation. It will send a strong message to all of our security forces from CSIS, CSEC, the RCMP and the Quebec police, on both the municipal and provincial levels, to respect our laws. The 1982 McDonald Commission found the RCMP Security Service, PROFUNC, had a history of bending and breaking the law, violating rights, and essentially waging clandestine wars against its self-labelled "enemies." In fact, it was the McDonald Commission which recommended the foundation of our civilian intelligence service. It was called CSIS. To continue to give Coulombe unsupervised and non-accountable power is an incredible risk to our democracy. I mean no disrespect to Coulombe for this comparison, but Canada does not need its own J. Edgar Hoover, the disgraced former director of the FBI, who was infamous for spying on citizens like Dr. Martin Luther King and later using this information as psychological warfare and blackmail." Vancouver Sun

TOP STORIES / MANCHETTES

Man accused in Tina Fontaine's killing claims police entrapped him
The woman who raised Tina Fontaine says she is confused and upset that the man charged with killing the teen is alleging that police entrapped him in an undercover operation and fabricated evidence to build their case... Raymond Cormier, who is facing a charge of second-degree murder in Tina's 2014 death in Winnipeg, told CBC News that he was "sucked into a 'Mr. Big' operation" – a controversial technique in which undercover officers create a fake underworld organization headed by a Mr. Big, who asks an individual for a confession to a crime, ostensibly so that the person can prove their criminal bona fides. Manitoba's Law Enforcement Review Agency, a non-police body that investigates public complaints of police misconduct, confirmed that Mr. Cormier filed a complaint about the investigation in July. Commissioner Max Churley said in an e-mail that he advised Mr. Cormier that the complaint is "outside the scope" of the province's Law Enforcement Review Act. Mr. Cormier launched an appeal, to be heard by a provincial court judge. The next hearing is slated for Nov. 23. Tina's death captured the country's attention and reignited calls for an independent inquiry into Canada's more than 1,181 missing and murdered indigenous women and girls. The two-year, $54-million national inquiry was launched in September. Globe and Mail

CBSA seizes over 100 kg of cocaine at border
The Canada Border Services Agency announced that its officers had seized a major seizure of cocaine from a commercial vehicle last month. A trucker was arrested after agents found 107.5 kilograms of cocaine hidden in a shipment of rice inside a vehicle at the Pacific Highway Commercial port of entry on Oct. 21. CBSA said in a news release that the cocaine and the man were turned over to the RCMP. The suspect's name was not released. The driver was headed north bound through the border when his truck was sent for a secondary inspection. Vancouver Sun; The Now; Cloverdale Reporter

Trudeau announces $1.5 billion national coastal strategy at Vancouver stop
Prime Minister Justin Trudeau announced Monday a five-year, $1.5 billion national Oceans Protection Plan to ensure "environmental sustainability" and "responsible commercial use"... The program "will make Canada a world leader in marine safety and takes a powerful step toward co-management of our coasts with Indigenous and coastal communities, together making sure they remain healthy, clean, and safe for generations to come," he said at a subsequent news conference at the Royal Canadian Navy's HMCS Discovery shore-based facility at Stanley Park... Trudeau's announcement today didn't include many of the specific requests that Victoria has put forward, including three new salvage rescue tugs costing up to $50 million apiece, a new $6 million CCG station in Prince Rupert, and funding for a maritime training centre at the B.C. Institute of Technology. The announcement also doesn't include any reference to Trudeau's promise to bring in a crude oil tanker ban for B.C.'s north coast. However, the government has insisted that campaign vow will be kept. Vancouver Sun; CBC News; Canadian Press (City News)

Police say alleged ISIL supporter broke off electronic ankle bracelet that let authorities track him
An Ottawa man the RCMP says it fears may engage in terrorism allegedly broke off his electronic ankle bracelet over the weekend, prompting police to take him into custody for the second time in two weeks. Tevis Gonyou-McLean, a 24-year-old alleged ISIL supporter, was arrested on Saturday. He has been charged with three counts of breaching his release conditions, uttering threats and mischief under $5,000. The Ottawa Police Service said Monday the mischief charge was for removing the GPS monitoring system Gonyou-McLean was required to wear following his arrest on a terrorism peace bond three months ago. National Post

Denis Coderre admits he spoke to ex-police chief about Patrick Lagacé
Montreal Mayor Denis Coderre has admitted he telephoned then-police chief Marc Parent in 2014 to talk about journalist Patrick Lagacé, just before police obtained search warrants to look at Lagacé's cell phone logs. But Coderre insists he did not ask Parent to investigate the La Presse columnist, who has been at the centre of the unfolding police surveillance scandal. "I never mix police and politics, no matter what people try to interpret," Coderre told reporters on Monday. Montreal police have confirmed investigators spied on Lagacé a second time, in 2014, during an investigation completely unrelated to the one revealed last week. CBC News; Canadian Press (Global News); Vice News; Globe and Mail

Independent police investigation called for after fatal accident in NW Saskatchewan
The RCMP are reporting a death after a short police pursuit Sunday night, which was called off just before the driver lost control. Around 9 o'clock, RCMP officers were conducting a check-stop in the Onion Lake area. A stopped vehicle sped off and a pursuit ensued, but was called off for public safety. Police say the lone male in the vehicle was pronounced dead at the scene. As a result, the Saskatchewan RCMP has requested an independent, external investigation around the circumstances, which will be conducted by the Regina Police Service. The RCMP has also requested the Ministry of Justice appoint an independent observer. CKRM; StarPhoenix; Global News

Edmonton Institution inmates launch lawsuit over solitary confinement
Three federal inmates at the Edmonton Institution are suing the Attorney General of Canada for more than $5.5-million over their solitary confinement that only ended when a judge stepped in. The inmates are each claiming their charter rights were violated after they were placed in segregation this summer for 43 days, 13 days more than is permitted under the Corrections and Conditional Release Act. In a statement of claim filed last month in Edmonton Court of Queen's Bench, the men claim several breaches of their charter rights, including that the segregation amounted to "cruel and unusual punishment" and

that their punishment was "grossly disproportionate" and failed to comply with principles of fundamental justice. CBC News

Why Canada's Prisons Abuse Solitary Confinement
An opinion piece states, "... Solitary confinement is only supposed to be used when other less restrictive alternatives have been exhausted or are rendered ineffective. So why has it seemingly become a standard practice? Long-term stays are linked to an ambiguous category in corrections—administrative segregation. While rules and regulations around segregation can differ between federal and provincial corrections, some experts say that administrative segregation is being deliberately overused and has actually become the go-to choice because it's easier to get away with. "Sometimes you see prison administrations themselves get very creative with how they justify keeping people in segregation," Correctional Investigator of Canada Howard Sapers told VICE... These practices target Indigenous inmates at a higher rate because they are more likely to be classified as maximum security and spend more time in segregation, according to the latest Correctional Investigator of Canada report released on Oct. 31. Specifically, Indigenous women are significantly over-represented in maximum security and make up 50 percent of the segregation placements in women's prisons, although they make up only about four percent of the Canadian population... While the number of inmates heading into solitary confinement federally has decreased over the past two years, it certainly hasn't disappeared. The Globe and Mail reported that "of all inmates released from segregation in the 2015-16 fiscal year" 246 had spent more than 120 days in isolation, although that's a drop from 498 the year before. It's not time to pop the cork on the congratulatory champagne just yet when, according to United Nations, segregation placements longer than 15 days can be considered "torture or other cruel, inhuman or degrading treatment or punishment." There's another problem. That only shows the numbers of inmates in for the long-haul of segregation in federal institutions. Once provincial numbers come in it's a much larger problem..." Vice News

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Heavy rain, swelling rivers threaten Vancouver Island First Nation
A First Nation near Port Alberni, B.C., expects to evacuate some homes as heavy rains cause rivers to flood. Tseshaht Nation emergency preparedness co-ordinator Hugh Braker said the community has been sand bagging riverside properties and roads, but with up to 120 millimetres of rain expected by Wednesday, the risk for flooding remains high. Out buildings including garages and carports were damaged by flooding on the weekend, but no homes have been affected yet, Braker said. Six families who were forced to leave their homes on the weekend as a precaution were able to return, but a new round of evacuations is anticipated to begin Monday evening. Braker said the reserve's major thoroughfare, Highway 4, is also expected to be washed out by rising water levels, posing challenges for emergency crews as they try to reach people. Canadian Press (CTV News); Alberni Valley News

St. John's search and rescue centre to reopen by 2018
The St. John's Maritime Rescue Sub-Centre will reopen within 18 months. Fisheries Minister Dominc LeBlanc said Monday night that the federal government would restore the closed centre by 2018. The Coast Guard will also construct two new lifeboat stations in the province, and two new radars in Atlantic Canada... Before it was closed, the centre responded to about 500 incidents in an average year. CBC News; Canadian Press (Metro News)

Trudeau announces $1.5 billion national coastal strategy at Vancouver stop
Prime Minister Justin Trudeau announced Monday a five-year, $1.5 billion national Oceans Protection Plan to ensure "environmental sustainability" and "responsible commercial use"... The program "will make Canada a world leader in marine safety and takes a powerful step toward co-management of our coasts with Indigenous and coastal communities, together making sure they remain healthy, clean, and safe for generations to come," he said at a subsequent news conference at the Royal Canadian Navy's HMCS Discovery shore-based facility at Stanley Park... Trudeau's announcement today didn't include many of the specific requests that Victoria has put forward, including three new salvage rescue tugs costing up to $50 million apiece, a new $6 million CCG station in Prince Rupert, and funding for a maritime training

centre at the B.C. Institute of Technology. The announcement also doesn't include any reference to Trudeau's promise to bring in a crude oil tanker ban for B.C.'s north coast. However, the government has insisted that campaign vow will be kept. Vancouver Sun; CBC News; Canadian Press (City News)

B.C. premier says federal spill plan allays her concerns
Prime Minister Justin Trudeau has announced a $1.5-billion plan to protect Canada's oceans, which received immediate approval from B.C.'s premier, who has made "world-leading marine spill response" a condition for new heavy-oil pipelines. The premier's quick endorsement appears to remove a major barrier for major resource projects in B.C. such as Kinder Morgan's proposed Trans Mountain pipeline expansion, which the province has opposed in large part over concerns about oil spill cleanup. Mr. Trudeau said Monday that the federal Oceans Protection Plan will strengthen the Coast Guard, improve information sharing with an eye to prevent spills from happening, and strengthen laws to ensure owners of problem vessels are held responsible. Globe and Mail

Alberta to update immunization records to better respond to outbreaks
Alberta is moving to bring in new rules to get a handle on which children are immunized so that the province can better respond to outbreaks. The government introduced a bill Monday that would allow health officials to cross-match immunization records with school enrolment lists to see who is being overlooked. Canadian Press (Metro News)

Group says outdoor enthusiasts are not getting the message
Two searches in one week, on opposite sides of the island — one for a berry picker, the other a hunting guide — has the group responsible for searching for lost people reminding outdoor enthusiasts to 'be prepared' because it could happen to you. Bill Snelgrove, 82, spent a cold wet night in the woods in Conception Bay South, while, on the island's southwest coast, hunting guide Randy Hilliard spent three nights in a remote area of the Long Range Mountains. Both men lived to tell the tale. "They think they're prepared but they're really not," says Harry Blackmore, president of the Newfoundland and Labrador Search and Rescue Association. CBC News

UPDATED: Search continues for overdue boater on Slocan Lake
RCMP Sergeant Monty Taylor said in a media release Monday the search continues for a man last seen on Slocan Lake Wednesday (November 2). "The search for David Taylor continues," the RCMP Sergeant said in the release. "Since being reported missing the search has consisted over land, air and water utilizing ground searchers, boats, helicopter, RCMP float plane and Underwater Recovery Team, SONAR and underwater camera." RCMP was notified late Wednesday evening after Taylor had not returned from a 15-minute trip in a 14-foot aluminum boat on Slocan Lake at 7:30 p.m. Castlegar Source; Nelson Star

Are you ready for the new anti-money laundering rules?
The clock is ticking for financial institutions to comply with new regulations on how they verify the identities of their clients. Financial institutions have until June 17, 2017 to ensure they're following the new rules introduced under the Proceeds of Crime (Money Laundering) Anti-Terrorist Financing Act (PCMLTFA). "It's a short time to put a solution in place," Julia Szadowski, senior legal counsel with Equifax Canada, told participants in an ITWC webinar on the regulatory changes. "It's a challenge the whole industry is facing and the best way to face it is to be as vigilant and agile as possible"... Financial institutions need to be prepared because there are serious consequences for non-compliance with the rules, said Jim Love, ITWC CIO and host of the webinar. They include monetary penalties, criminal sanctions, and more importantly, reputational risk. FINTRAC has imposed fines totaling more than $3.5 million under the Act since December 30, 2008. IT World Canada

CSIS and the Metadata Muddle Pt 1: What is this case really about?
An opinion piece by Craig Forcese states, "I have prepared a series of blog entries on Noël J's recent Federal Court judgment on CSIS's retention of metadata from its warranted threat investigations. In this first entry, I try to articulate what this case is about. It may be useful to start with an analogy (however imperfect): this case is about CSIS fishing in the sea for sharks. When it uses certain sorts of intrusive nets to sweep up sharks, that net use must be authorized by the court. But technology being what it is, the nets also sweep up other fish – a by-catch. The court accepted that by-catch can happen, but did not actually know what CSIS was doing with the by-catch. In fact, CSIS was keeping a fin from each fish caught in the by-catch. The court learned about this after 10 years of CSIS fin-collection. And then when it learned about it, the court concludes that the law governing CSIS obliged "catch-and-release": the by-catch fish should have been released unmolested once identified as by-catch and not sharks. Because CSIS did not do this, it acted unlawfully. Plus in failing to tell the court, it violated very strong duties that it do so. I will deal with the by-catch issue in this blog entry, and the duty of candour in a subsequent entry..." National Security Law

CSIS and the Metadata Muddle Pt 2: On Secret Law, Courts and the Rule of Law

In my first entry, I tried to explain what this case is about. In this blog entry, I begin to explore its implications, as I see them. First up: what a tangled web our legal system has weaved..." National Security Law

Dissecting CSIS' Statement Concerning Indefinite Metadata Retention
An opinion piece states, "In this brief post I debunk the language used by CSIS Director Michel Coulombe in his justification of CSIS's indefinite data retention program. That program involved CSIS obtaining warrants to collect communications and then, unlawfully, retaining the metadata of non-targeted persons indefinitely. This program was operated out of the Operational Data Analysis Centre (ODAC). A Federal Court judge found that CSIS' and the Department of Justice's theories for why the program was legal were incorrect: CSIS had been retaining the metadata, unlawfully, since the program's inception in 2006. More generally, the judge found that CSIS had failed to meet its duty of candour to the court by failing to explain the program, and detail its existence, to the Court. The public reactions to the Federal Court's decision has been powerful, with the **Minister of Public Safety** being challenged on CSIS's activities and numerous mainstream newspapers publishing stories that criticize CSIS' activities. CSIS issued a public statement from its Director on the weekend following the Court's decision, which is available at CSIS' website. The Federal Court's decision concerning this program is being hosted on this website, and is

also available from the Federal Court's website. In what follows I comprehensively quote from the Director's statement and then provide context that, in many cases, reveals the extent to which the Director's statement is designed to mislead the public…" Christopher Parsons

Orwell, quand la fiction devient la réalité
Une pièce d'opinion dit « Il y a de ces moments, dans la vie, où l'on se dit que le timing est irréprochable, et que des événements se produisant en rapide succession sont forcément liés par le destin, plutôt que de n'être que des coïncidences. La sortie d'Orwell, un jeu de gestion développé par la boîte allemande Osmotic Studios, est l'un de ces événements. Comment ne pas estimer, en effet, que l'arrivée de ce jeu de surveillance policière et d'espionnage étatique sur la plateforme Steam, le 27 octobre, ne tombe pas exactement au bon moment? Au Québec, mais aussi dans l'ensemble du pays, des affaires d'espionnage de journalistes et de simples citoyens font trembler les piliers de la démocratie, et remettent en question les fondements de la notion de vie privée. À l'échelon fédéral, le Service canadien de renseignement de sécurité (SCRS), a conservé pendant 10 ans une gigantesque banque de métadonnées sur la population, allant à l'encontre du principe de protection des informations personnelles. Tandis que chez nous, la Sûreté du Québec et la police de Montréal ont procédé au filtrage des registres d'appel et des métadonnées liées aux conversations téléphoniques d'une dizaine de policiers. Pire encore, on apprenait lundi matin que le maire de Montréal, Denis Coderre, aurait directement demandé au chef de la police de la métropole de s'intéresser à une affaire de contravention supposément impayée rapportée par Patrick Lagacé, un chroniqueur influent du journal La Presse. » Pieuvre.ca

CBSA seizes over 100 kg of cocaine at border
The Canada Border Services Agency announced that its officers had seized a major seizure of cocaine from a commercial vehicle last month. A trucker was arrested after agents found 107.5 kilograms of cocaine hidden in a shipment of rice inside a vehicle at the Pacific Highway Commercial port of entry on Oct. 21. CBSA said in a news release that the cocaine and the man were turned over to the RCMP. The suspect's name was not released. The driver was headed north bound through the border when his truck was sent for a secondary inspection. Vancouver Sun; The Now; Cloverdale Reporter

Canada introducing gender-neutral option on visitor border document
Some foreign visitors to Canada will be allowed to identify themselves as male, female or other in a border document being introduced this week, officials said on Monday, as Canada joins a handful of nations offering gender neutral options. The new Electronic Travel Authorizations (eTAs) with three gender options will be introduced on Thursday for travelers flying into or through Canada, officials said. Canada also has taken steps toward allowing people who have changed genders to switch the designation on passports and other documents, said a spokeswoman for the Immigration, Refugees and Citizenship Canada (IRCC), the federal agency that issues travel documents. Reuters (Globe and Mail)

Federal Court dismisses bid to stop feds revoking citizenship without a hearing
A bid to stop the federal government from revoking Canadians' citizenship without a hearing has failed. Federal Court Justice Russell Zinn has dismissed a case brought by the Canadian Association of Refugee Lawyers and the British Columbia Civil Liberties Association. The two advocacy groups had sought a stay of a section of the Citizenship Act which allows the government to revoke the citizenship of anyone deemed to have misrepresented themselves — a provision which they argued could potentially ensnare Democratic Institutions Minister Maryam Monsef… The law is being challenged as unconstitutional but until that case is settled, the Federal Court has since January been systematically granting stays to individuals who apply for them… But Zinn ruled Monday that a blanket stay can only be ordered if the harm caused by the law is unavoidable. In this case, he said it is avoidable because any individual can apply to the court for a stay… The Liberals had denounced the law when they were in opposition and, since forming government, have promised to change it to provide for a proper hearing and appeal process for those believed to have misrepresented themselves to gain citizenship. However,

the government has so far refused to stop enforcing the law in the meantime. Canadian Press (Winnipeg Free Press)

Bill Lee wants to dissolve U.S.-Canadian border
Former Montreal Expos pitcher Bill "Spaceman" Lee says he'll work to dissolve the borders between Vermont, Quebec and the Maritime provinces if he is elected governor of the northeastern state Tuesday. Erasing the borders would allow Vermont to get its energy from the "biggest tides in the world" off the Atlantic Ocean, Lee says, describing his main election platform issue during an interview with The Canadian Press. The state will choose its governor the same day as the United States elects its president, and the former Major League Baseball pitcher is running with the Liberty Union Party, which describes itself as "non-violent" and "socialist." "We should form an alliance with the Maritime provinces," Lee, 69, said Monday. "That's an energy issue. We'll get all our energy from Canada." In an interview in which his remarks were difficult to distinguish between lighthearted banter and serious opinion, Lee said Canadians should have no problem incorporating Vermont because "we're just like you." Canadian Press (Guelph Mercury Tribune)

More Americans set their career sights north of the border
A growing number of Americans are setting their career sights north of the border, according to government and other data, and experts believe that is partly due to the spectre of a Donald Trump presidency. Data from Immigration, Refugees and Citizenship Canada (IRCC) shows a significant spike in the number of work permits being granted to American residents. The number of people receiving Canadian work permits in the first eight months of the year soared 54 per cent over the same period in 2015. Both the government and immigration lawyers say there have not been any policies to account for the increase. Canadian Press (City News; Times Colonist; Business News World)

Sorry Americans, you're just not our type
An opinion piece states, "… But for those of you thinking of moving to Canada as your Plan B, we're sorry. We really like newcomers, generally speaking. Canada takes in 250,000 annually, and this year has welcomed Syrian refugees by the planeload (or, as your Republican nominee says, by the Trojan horse load). But we can be a picky lot, and most of you need not apply. The median American adult is about in his or her mid-40s, and has not completed a college degree. Based on the criteria to enter the country as an economic immigrant—that is, not as a refugee or a Canadian's relative—those are two strikes against you. If you are not applying to migrate with a Canadian job already lined up in a field where there's a domestic skills shortage, that's more or less strike three…" Maclean's

Meeting murderer Dale Ogden on Plenty of Fish highlights perils of online dating
Millions of people sign up for online dating websites in hopes of finding love, and it's not unusual to meet someone who isn't exactly the person they've made themselves out to be online. But the story of a British Columbia woman who learned the man she met online and dated for several weeks was a convicted killer is serving as a cautionary tale. CBC News

Unsealed Court Docs Show FBI Used Malware Like 'A Grenade'
In 2013, the FBI received permission to hack over 300 specific users of dark web email service TorMail. But now, after the warrants and their applications have finally been unsealed, experts say the agency illegally went further, and hacked perfectly legitimate users of the privacy-focused service. "That is, while the warrant authorized hacking with a scalpel, the FBI delivered their malware to TorMail users with a grenade," Christopher Soghoian, principal technologist at the American Civil Liberties Union (ACLU), told Motherboard in an email. Motherboard

Turks Are Flocking to Tor After Government Orders Block of Anti-Censorship Tools
Turkish internet users are flocking to Tor, the anonymizing and censorship-circumvention tool, after Turkey's government blocked Twitter, Facebook, and YouTube. Usage of Tor inside of Turkey went up

from around 18,000 users to 25,000 users on Friday, when the government started blocking the popular social media networks, according to Tor's official metrics. To prevent Turks from doing exactly that and connecting to the blocked sites through censorship-circumvention tools such as Tor and Virtual Private Networks (VPNs), the government took a step further and ordered internet providers to block those too. Motherboard

Raid on 20,000 Tesco Bank accounts fuels cybercrime fears
Tesco Bank, owned by Britain's biggest retailer Tesco, halted online transactions from all current accounts on Monday after money was stolen from 20,000 of them in the country's first such cyber heist. The bank, which manages 136,000 current accounts, said it would repay people who had lost money in the attack, which targeted 40,000 accounts in all and fuelled fears about the British financial sector's vulnerability. Tesco Bank's Chief Executive Benny Higgins told the BBC he thought "relatively small amounts" had been stolen, but the bank declined to give details of how much money in total had been taken or if it knew how the thefts had transpired. Other British banks have been targeted by hackers in recent years, but the Financial Conduct Authority (FCA) regulator said it was not aware of any previous incident in which customers had had money stolen. Reuters

UK privacy watchdog says Facebook agrees to suspend using WhatsApp users' data
Britain's privacy watchdog said on Monday that Facebook FB.O has agreed to suspend using data from UK users of its WhatsApp messaging app for advertisements or product-improvement purposes after the watchdog said consumers weren't properly protected. The watchdog said the social media giant faces action if it uses such data without valid consent. The Information Commissioner's Office (ICO) had said in August that it would monitor WhatsApp's new privacy policy, after WhatsApp, acquired by Facebook in 2014, said it would share user data with its parent company to better fight spam and improve users' experiences of both services. The two companies have also come under scrutiny from the European Union's 28 data protection authorities, who last month requested that WhatsApp pause sharing users' data with its parent company until the appropriate legal protections could be assured. Reuters

Independent police investigation called for after fatal accident in NW Saskatchewan
The RCMP are reporting a death after a short police pursuit Sunday night, which was called off just before the driver lost control. Around 9 o'clock, RCMP officers were conducting a check-stop in the Onion Lake area. A stopped vehicle sped off and a pursuit ensued, but was called off for public safety. Police say the lone male in the vehicle was pronounced dead at the scene. As a result, the Saskatchewan RCMP has requested an independent, external investigation around the circumstances, which will be conducted by the Regina Police Service. The RCMP has also requested the Ministry of Justice appoint an independent observer. CKRM; StarPhoenix; Global News

Ottawa police table draft 2017 budget with $8.9 million increase
Ottawa police tabled their draft budget for 2017 just hours after the force laid yet another a murder charge in a year that has seen a record number of shootings and homicides across the city. The police service proposed a budget that would increase by $8.9 million over next year, adding $11 to the average homeowner's tax bill. Ottawa Citizen; CBC News

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Edmonton Institution inmates launch lawsuit over solitary confinement
Three federal inmates at the Edmonton Institution are suing the Attorney General of Canada for more than $5.5-million over their solitary confinement that only ended when a judge stepped in. The inmates are each claiming their charter rights were violated after they were placed in segregation this summer for 43 days, 13 days more than is permitted under the Corrections and Conditional Release Act. In a statement of claim filed last month in Edmonton Court of Queen's Bench, the men claim several breaches of their charter rights, including that the segregation amounted to "cruel and unusual punishment" and that their punishment was "grossly disproportionate" and failed to comply with principles of fundamental justice. CBC News

Why Canada's Prisons Abuse Solitary Confinement
An opinion piece states, "... Solitary confinement is only supposed to be used when other less restrictive alternatives have been exhausted or are rendered ineffective. So why has it seemingly become a standard practice? Long-term stays are linked to an ambiguous category in corrections—administrative segregation. While rules and regulations around segregation can differ between federal and provincial corrections, some experts say that administrative segregation is being deliberately overused and has actually become the go-to choice because it's easier to get away with. "Sometimes you see prison administrations themselves get very creative with how they justify keeping people in segregation," Correctional Investigator of Canada Howard Sapers told VICE... These practices target Indigenous inmates at a higher rate because they are more likely to be classified as maximum security and spend more time in segregation, according to the latest Correctional Investigator of Canada report released on Oct. 31. Specifically, Indigenous women are significantly over-represented in maximum security and make up 50 percent of the segregation placements in women's prisons, although they make up only about four percent of the Canadian population... While the number of inmates heading into solitary confinement federally has decreased over the past two years, it certainly hasn't disappeared. The Globe and Mail reported that "of all inmates released from segregation in the 2015-16 fiscal year" 246 had spent more than 120 days in isolation, although that's a drop from 498 the year before. It's not time to pop the cork on the congratulatory champagne just yet when, according to United Nations, segregation

placements longer than 15 days can be considered "torture or other cruel, inhuman or degrading treatment or punishment." There's another problem. That only shows the numbers of inmates in for the long-haul of segregation in federal institutions. Once provincial numbers come in it's a much larger problem..." Vice News

Confront scourge of sexual abuse, stand up for children, Inuit leaders demand
Prominent Inuit politicians are urging Canada's leaders — indigenous and otherwise — to protect children from the scourge of sexual abuse and suicide running through indigenous communities, saying no child deserves to have their innocence stolen. The head of Canada's national Inuit organization says it is incumbent upon all leaders to proclaim that abuse in indigenous communities is unacceptable. Canadian Press (Brandon Sun)

FSIN Chief Bobby Cameron stands by banishment of drug dealers on First Nations
The chief of Saskatchewan's Federation of Sovereign Indigenous Nations says he supports First Nations that exile criminals. Bobby Cameron, who represents 74 of the province's First Nations, says he backs banishment if it means getting rid of drug dealers or protecting young people from drugs and alcohol. An outraged Cameron says drug dealers in some communities are selling to 10-year-old kids and something has to be done to stop it. The chief says he supports a recent move by the Makwa Sahgaiehcan First Nation to banish six non-band members and give warnings to more than a dozen band members because of a crystal meth problem. Cameron says the RCMP has a big role to play too, helping band councils identify and stop drug dealers. Muskoday First Nation, Mistawasis First Nation and the Lac La Ronge Indian Band have also banished people to help control crime. Canadian Press (CKRM); Leader Post; CBC News

Liquid fentanyl seizure in Hamilton not the 1st in Canada
Health Canada says that the seizure of liquid fentanyl found in Hamilton that was announced last week is not the first in Canada, despite what Hamilton police investigators say. The national health agency also says Hamilton police knew the drug they had found was fentanyl in the summer, yet they did not release that information to the public until last week... "Health Canada's Drug Analysis Service (DAS) has received liquid samples for testing that have been found to contain fentanyl in the past," spokesperson Renelle Briand said in an email. CBC News

Drop-in centre for sex workers wins community safety award
Early every Friday morning between 5 a.m. and 8 a.m., sex workers drift into Daisy's Drop-In as their nighttime working day winds up. The drop-in is held in a west-end community centre, where child-sized chairs are stacked against one wall awaiting daytime programs. As dawn breaks, the women pick up clean needles, crack pipes and condoms. Nurses are available to offer testing for sexually transmitted infections, HIV, Hepatitis C and pregnancy. The sex workers warn each other about violent johns. Nikki Jalbert, the drop-in's counsellor, cooks up hot breakfasts in the kitchen. Some women grab naps, the only rest they will get all week in a warm place that is not a stairwell or a doorway... On Monday, Daisy's Drop-In won one of seven community safety awards from Crime Prevention Ottawa for its harm reduction approach that improves the lives of its clients and reduces harm to the community. Ottawa Citizen

B.C. mom jailed for making child porn using her own kids
A 37-year-old Fort St. James woman was sentenced Monday to 2 1/2 years in prison for making pornography involving her son and daughter and then sending the images and videos to a man she met through an Internet dating site. In issuing her decision, B.C. Supreme Court Justice Marguerite Church agreed entirely with Crown prosecution's decision on sentencing, noting it was actually at the low end of the range for the offences in question. Man accused in Tina Fontaine's killing claims police entrapped him
The woman who raised Tina Fontaine says she is confused and upset that the man charged with killing the teen is alleging that police entrapped him in an undercover operation and fabricated evidence to build their case... Raymond Cormier, who is facing a charge of second-degree murder in Tina's 2014 death in Winnipeg, told CBC News that he was "sucked into a 'Mr. Big' operation" – a controversial technique in which undercover officers create a fake underworld organization headed by a Mr. Big, who asks an individual for a confession to a crime, ostensibly so that the person can prove their criminal bona fides. Manitoba's Law Enforcement Review Agency, a non-police body that investigates public complaints of police misconduct, confirmed that Mr. Cormier filed a complaint about the investigation in July. Commissioner Max Churley said in an e-mail that he advised Mr. Cormier that the complaint is "outside the scope" of the province's Law Enforcement Review Act. Mr. Cormier launched an appeal, to be heard by a provincial court judge. The next hearing is slated for Nov. 23. Tina's death captured the country's attention and reignited calls for an independent inquiry into Canada's more than 1,181 missing and murdered indigenous women and girls. The two-year, $54-million national inquiry was launched in September. Globe and Mail

Messages supporting residential school survivors make up 'Healing Forest'
Handmade hearts containing messages of hope and love transformed a popular river valley trail into the city's first "Healing Forest." More than 1,000 hearts line the trail in honour of those affected by the legacy of residential schools in Alberta and across the country... While initially made to acknowledge residential school survivors, the idea is for the Healing Forest to be a place of reflection for missing and murdered Indigenous women as well as for children taken from their homes by the child welfare system. CBC News

Calgary police end search for Indigenous woman's body parts
The search for an Indigenous woman's remains at a Calgary landfill is over and that's news to her family. They say the Calgary Police Service hasn't kept them in the loop about the case of Joey English, 25. English's partial remains were found in the early morning on June 11, 2016, in a lightly forested area in the Crescent Heights neighbourhood. Calgary police told CBC the case is not being considered a homicide, but the family did not know that detail... The Calgary Police did not alert the family that they have ended their search. According to the family, police have not provided regular updates about the case. CBC News

Alberta researches legal weed market in Colorado
In an effort to prepare for Canada's coming legal recreational marijuana market, an Alberta government official visited Colorado recently to find out how that state's experiment with legal weed has worked out. Kathleen Ganley, provincial minister of justice, traveled to Colorado on Oct. 18 for a three-day trip to learn about the complex issues around legalization. She said she learned legalization will be a lot more involved than she expected. "We learned just how complex regulation around marijuana is going to be," Ganley said. Ganley said one lesson she learned in Colorado is the value of early action: It's important to have strict regulations in place before the first legal sale is made, because it's much harder to impose strict laws after the fact. Canadian Press (iPolitics)

Handful of marijuana dispensaries back in business, days after police raids
A stream of new customers dropped into the Weeds Glass & Gifts store on Bank Street Monday to purchase dried weed, cannabis cookies, brownies and oils. They flashed membership cards from the seven Ottawa marijuana dispensaries closed in police raids last week, said Weeds manager Kristina Simpson. The customers were politely turned away unless they could prove they need marijuana for medical reasons, said Simpson. Police investigators found the seven raided shops did not restrict their sales to medical patients, said Ottawa police Chief Charles Bordeleau. He said he hopes the raids send a warning to all dispensaries. That message had not prompted any changes by Monday morning, when a handful of the city's remaining pot shops were open for business, including Magna Terra on Carling Avenue, the Ottawa Medical Dispensary on Antares Drive, Sylk Medy on Gladstone Avenue and the Bank Street Weeds shop. (Three of the city's dispensaries are temporarily closed for other reasons — two were robbed at gunpoint and a third was hamstrung after its marijuana shipments from B.C. were seized by Canada Post.) Ottawa Citizen

Ottawa medical marijuana dispensary plans to stay open despite raids
An owner of one of the Ottawa medical marijuana dispensaries not targeted in a police operation last week is vowing to stay open, even if he has to take legal action to make that happen. Don Briere, owner of Weeds Glass and Gifts in Ottawa, as well as multiple similar stores in British Columbia, said he is not planning to close after Ottawa police raided other marijuana dispensaries last Friday. FBI director under attack from own agents, Congress for handling of Hillary Clinton email inquiry
FBI Director James Comey was under attack from some of his own agents and members of Congress on Monday over his handling of an inquiry into Hillary Clinton's emails, but the White House was remaining supportive, for now. In stunning fashion, Comey has injected the Federal Bureau of Investigation, meant to be politically neutral, into the thick of the 2016 U.S. presidential race, making a series of announcements on the inquiry. Reuters (Global News)

US official: Security controls 'working' despite NSA theft
The top U.S. counterintelligence official says secret government data is vulnerable to thieves, such as the National Security Agency insider accused of working undetected for 20 years to steal a large trove of classified material, even as he defends the security controls put in place after the Edward Snowden theft.

"I believe the reforms are working very well. I think we've done an amazing job in the intelligence community and across the government in executing our reforms," said Bill Evanina, the chief counterintelligence and security adviser to the national intelligence director. "However, I will say that if someone wakes up tomorrow and they make a decision that they're going to steal data from the government, they will be successful at it." Evanina told The Associated Press in a recent interview that no matter how good security controls are, they will never catch every insider or hacker -- and they must be continually improved because of technological advances. His remarks were the most extensive comments he's made since former NSA contractor Harold Thomas Martin III, 51, of Glen Burnie, Maryland, was arrested by the FBI in August. Associated Press (CTV News)

Official: 40 to 50 buildings damaged in Oklahoma quake
Dozens of buildings sustained "substantial damage" after a 5.0 magnitude earthquake struck an Oklahoma town that's home to one of the world's key oil hubs, but officials said Monday that no damage has been reported at the oil terminal. Cushing City Manager Steve Spears said 40 to 50 buildings were damaged in Sunday's earthquake, which was the third in Oklahoma this year with a magnitude of 5.0 or greater. No major injuries have been reported, and Spears said the damage included cracks to buildings and fallen bricks and facades. Oklahoma has had thousands of earthquakes in recent years, with nearly all traced to the underground injection of wastewater left over from oil and gas production. Sunday's quake was centered 1 mile west of Cushing and about 25 miles south of where a magnitude 4.3 quake forced a shutdown of several wells last week. Associated Press (Yahoo! News)

20 Islamists Found Infiltrating German Army
At least 20 Islamists successfully infiltrated the German army and more may yet be uncovered, according to an investigation by Germany's military counter-espionage service (MAD). The news was reported on November 5 by Funke Mediengruppe, according to Deutsche Welle. A spokesperson for MAD said 60 additional individuals in the Bundeswehr were under investigation for suspected Islamist links. He said the army was contacted by a suspicious number of individuals seeking to join the army for a few months just to receive weapons training. Clarion Project

Canopy Growth Corp becomes Canada's first billion dollar marijuana stock
When it comes to Canada's sizzling medical marijuana sector, a million dollars just isn't cool anymore. Well, at least not for Canopy Growth Corp (TSX:CGC)... Medical marijuana stock began to gain serious attention from market watchers a few months into this year, when comments from **Canada's Minister of Public Safety Ralph Goodale** were interpreted as a sign that marijuana legalization was closer to becoming a reality than previously thought, a development that is generally regarded as good news for Licensed Producers. ***"The preset regime with respect to marijuana has obviously failed and failed***

miserably because Canadian teenagers are among the heaviest users of marijuana in the Western Word, yet there has been no timeline set by the federal government," **Goodale told** CBC's "On The Coast" host Stephen Quinn. Cantech Letter

New Regina lab will use data to predict potential critical events
A new data-crunching centre in Regina is hoping to predict when potential critical events may happen. A centre of excellence for data analytics opened its doors Thursday on the University of Regina campus. The lab is a partnership between Information Services Management (ISM Canada) and the province of Saskatchewan. ISM Canada CEO Mark MacLeod said the lab offers an opportunity to provide better insight into the information and data collected through all levels of government and social organizations... **Federal minister of public safety and emergency preparedness Ralph Goodale said** the new lab will make the delivery of federal programs much easier. ***"This will make decision-making fact-based — based on research, based on hard evidence — and that is a major improvement for public policy,"*** **he said. He hopes** it leads to ***"precision policy-making"*** that can improve public safety. **Goodale also said he hopes** the centre will build partnerships with Indigenous communities — something MacLeod said the centre would "love" to do. High waves challenge for crews lifting sunken tugboat off B.C. coast
A rough sea is preventing crews from inflating air bags to lift the bow of a submerged tugboat that sank off British Columbia's central coast last month, spilling more than 100,000 litres of diesel fuel. Other pollutants also spilled into the water when the Nathan E. Stewart ran aground on Oct. 13, about 28 kilometres from Bella Bella. Despite the challenges facing crews, an incident report released Thursday says a cradle that will lift the tug is in position. As well, a receiving barge the boat will be placed on has been moved closer to the site. A boom that will contain any additional pollutants has been set up around the receiving barge. Heiltsuk Nation spokeswoman Jess Housty posted on Twitter Friday morning that all boats monitoring the site are operational, and efforts to move the vessel off the rocks into deeper water for removal are continuing. Canadian Press (Vancouver Sun)

Les municipalités rurales veulent plus d'efforts pour combattre le crime
L'association des municipalités rurales de la Saskatchewan affirme que plus d'efforts doivent être faits afin de lutter contre le crime en milieu rural... Plusieurs fermiers frustrés par ce qu'ils considèrent comme un manque d'action de la part de la Gendarmerie royale du Canada (GRC) ont d'ailleurs créé un groupe Facebook afin de surveiller eux-mêmes toute activité suspecte en région rurale... Cette semaine, le nouveau commandant de la GRC en Saskatchewan, Curtis Zablocki, s'est adressé au groupe lors de son congrès annuel. Il a dit que la meilleure façon de réduire la criminalité était de mettre l'accent sur l'engagement communautaire. Radio-Canada

Lutte contre les crimes contre la propriété: les efforts de la GRC Codiac rapportent
Un peu plus de 77% de la population du Grand Moncton se sent en sécurité. Cette mesure est le résultat d'un premier sondage réalisé par des étudiants du Collège communautaire en collaboration avec le service Codiac de la GRC. Le surintendant Paul Beauchesne, le grand patron de la GRC dans le Grand Moncton, a fait rapport au conseil de l'Autorité policière régionale de Codiac sur la performance de son service de police pour l'année en cours. Acadie Nouvelle

Jury makes 28 recommendations in Lena Anderson inquest
The inquest into the death of a Kasabonika Lake First Nation woman while in police custody has come to a close, with the jury making 28 recommendations around police funding and community grief counseling and suicide prevention. Lena Anderson hung herself in February 2013, using a draw string she removed from her pants while being held in the back of a Nishnawbe Aski Police Service (NAPS) vehicle. She had been left in the back of the vehicle as Kasabonika Lake didn't have any holding cells... The jury's 28 recommendations included: That police services in indigenous communities use the Police Services Act (PSA) as their governing legislation; That Canada, Ontario and Indigenous communities work together to ensure policing standards and service levels in Indigenous communities are equivalent to those in non-

Indigenous communities; That Indigenous police services are provided with enough funding to ensure an adequate complement of backup officers, and that they have access to a central communications and dispatch centre that meets PSA requirements; That Indigenous police services have adequate detachment buildings, proper training, and that officers review policies on prisoner care and identification of individuals at risk of self-harm. Pemberton residents clean up after rain, snowmelt causes heavy flooding
Emma Sturdy will never forget the wave of water that suddenly gushed into her family's Pemberton vegetable and fruit farm early Wednesday, flooding not only her and her sister's bedrooms, but almost the entire 21 hectares of their property. The flooding left them no choice but to place all of North Arm Farm's animals — pigs, sheep, turkeys and chickens — into the same pen, which made them none too happy, she noted... An evacuation alert for residents was issued for several areas around Pemberton on Wednesday, with about 20 residents forced to leave their homes. The alert was rescinded Thursday after the flood alert was downgraded to a high streamflow advisory due to decreasing river flows. Both the Village of Pemberton and the Squamish-Lillooet Regional District issued bulletins Thursday saying that dry conditions had resulted in decreasing flows in the Howe Sound region and that flows were expected to continue to drop through the day as dry conditions persisted until late Thursday. Vancouver Sun

«Je n'aurais jamais pensé que c'était de cette ampleur», dit le propriétaire
L'important glissement de terrain qui s'est produit à Saint-Luc-de-Vincennes a laissé un trou béant d'environ 152 mètres de large sur une terre agricole. Luc Normandin s'estime chanceux d'être ici pour nous parler. Mercredi soir, un cratère de la grandeur d'un terrain de baseball s'est formé dans sa cour arrière. Il s'en est fallu de peu pour que sa maison soit elle aussi emportée... Les ingénieurs de la sécurité civile sont toujours sur place. On ignore s'il pourra un jour réintégrer sa maison. En fin d'avant midi, le député fédéral Francois-Philippe Champagne est venu rencontrer les sinistrés afin d'évaluer concrètement de quelle façon l'État peut leur venir en aide. TVA Nouvelles

Résultat : une commission d'enquête publique (quasi judiciaire) aura comme vocation de colliger tous les faits pertinents, pour ensuite recommander au gouvernement les mesures

appropriées susceptibles d'être prises... Commentant les forfaitures de la police fédérale canadienne (GRC) pendant la crise d'Octobre en 1970, le premier ministre canadien Pierre Elliott Trudeau déclara en point de presse : en matière criminelle, ce n'est pas le gouvernement qui assure la protection des citoyens contre les abus policiers, ce sont les tribunaux. La police enquête sur des crimes sans l'autorisation du ministre responsable, et même à son insu, avait-il précisé. Il nuança son propos en matière de sécurité publique : la police doit agir dans le cadre d'orientations et de directives générales énoncées par le gouvernement du jour. Récemment, le Service canadien du renseignement de sécurité (SCRS) fut sévèrement blâmé par la Cour fédérale pour avoir manqué de transparence envers le tribunal à propos de son programme de collecte de données exécuté en vertu d'ordonnances judiciaires. En conférence de presse, penaud, le directeur du SCRS Michel Coulombe a dit regretter que la cour « s'inquiète en ce qui a trait au respect de l'obligation de franchise » du SCRS. Ce chef espion n'a rien compris : l'efficacité du contrôle judiciaire n'a de sens que si les agents de l'État jouent franc-jeu... » La Presse

Man charged in explosives-related incident at Montreal airport says he was set up
A Montreal man on trial for trying to board an airplane with explosives-related materials in his suitcase says he was set up. Antony Piazza, an Iranian-Canadian, is facing four charges stemming from the Montreal airport bomb scare on Oct. 27, 2013. Piazza, 74, told the court today he suspects an acquaintance in Spain with whom he had a falling-out likely inserted illegal materials into the handles of his carry-on luggage. Testifying in his own defence, Piazza says he was shocked when security screeners turned up the materials while X-raying his luggage. Canadian Press (CityNews, CTV News)

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Lanes will be reduced from three to two on Peace Bridge beginning Tuesday
Expect to encounter fewer and narrower lanes going across the Peace Bridge beginning Tuesday. The number of lanes will be reduced from three to two as work starts on a $100 million project to replace the bridge's deck. The two lanes will each be narrowed from 12 feet to 11 feet, to accommodate 24-inch Jersey barriers that will straddle both lanes... Delays aren't expected because of the construction, but could occur if inspection booths going into Canada continue to be poorly manned, said Ron Rienas, president and executive director of the Peace Bridge Authority... "U.S. Customs and Border Protection have committed to staff and resource primary inspection booths to ensure the bridge functions with no congestion, at least entering the U.S.," Rienas said. "We have not had a similar commitment from Canadian customs." The Canadian Border Services Agency has repeatedly claimed union rules regarding overtime make it difficult to ensure enough agents to staff the booths. Buffalo News

Canada: The Looming Uncertainty Of Softwood Lumber
The 8,891 km boundary between Canada and the United States is often referred to as "the world's longest undefended border," but that's only in a military sense. Despite free trade agreements, disputes over softwood lumber have been ongoing since 1982, stemming, largely, from US sentiment that the Canadian softwood lumber industry is unfairly subsidized. Police Are Best Substitute Teachers Ever, When Daycare Provider is Hospitalized
Three Canadian police officers aren't just good at protecting and serving – they're pretty good at babysitting too. When a daycare provider in Langford was taken to a nearby hospital as a precaution, these West Shore RCMP officers stepped up to look after the four kids awaiting their parents. Good News Network

U.S. cops can arrest Canadians in Canada, with restrictions -- can Trudeau stop Trump if he wants more power?
Back when Stephen Harper was Prime Minister, he signed a pact with President Obama that made many Canadians uneasy. The Integrated Cross Border Law Enforcement Operations Act was part of the 2012 omnibus budget package. It allows for American law enforcement agents to cross into Canada and gives, "Every designated officer has the same power to enforce an Act of Parliament as a member of the Royal Canadian Mounted Police." The program, called Shiprider, is limited to waterways between Canada and the United States. Law enforcement isn't supposed to be able to use these powers on land. But there were plans to expand Shiprider. Access to these powers on land was supposed come through another program. The plan would extend Canadian law enforcement powers to American officers, included creating new integrated units, focused on areas like crime and intelligence. Rabble

Key witnesses in probe of Indigenous man's 2015 death not interviewed by police, fifth estate finds
Police in Thunder Bay, Ont., never bothered to find and interview two key witnesses who were with an Indigenous man the night before he was found dead last year, the fifth estate has found. The body of Stacy DeBungee, 41, was discovered in the McIntyre River on the morning of Oct. 19, 2015. His death is one of several deaths of Indigenous people in Thunder Bay's waterways that were quickly deemed not suspicious with little apparent investigation by the city's police service. CBC News

Prisoners Keep Dying in Winnipeg's Jails
The death penalty is illegal in Canada. But that doesn't mean prisoners aren't dying in Manitoba. Since March, five people have died in custody at the Winnipeg Remand Centre, including two in October. Four of the five were Indigenous men. That includes Errol Greene, a 26-year-old man who was killed on May 1 after being denied epilepsy medication, and handcuffed and shackled on his stomach after the first of two successive seizures. Most were in remand for breaching court orders while awaiting trial, including drinking alcohol while on probation. Vice News

Good Behaviour Earns Cofell Additional Parole
A convicted killer from Chatham who murdered three people 25 years ago will continue to be monitored for at least six more months while he's out of prison on parole. The Parole Board of Canada released a decision on November 3, 2016 saying 43-year-old Jason Cofell, who killed Jasen Pangburn and Virginia and Alfred Critchley in 1991, will be able to continue his day parole for another six months. Blackburnnews.com

After shooting, Prison Pump is back as founder instructs from afar
In a gym on Barton Ave., a fitness group cools down under the direction of their instructor who isn't actually there. Alejandro Jose Vivar can't be. For his own safety, he leads the stretches via cellphone from an undisclosed location. The former federal inmate and founder of Prison Pump - a "penitentiary-style" workout he created on the inside - is laying low three months after someone pumped five bullets into him during a morning workout class held across the street in Christie Pits Park on July 30. The shooter is still wanted by police... Vivar went to jail a gang leader but came out a certified fitness instructor with a mission to be a community ambassador for good health. Postmedia Network (Toronto Star)

Man surrenders after being threatened with stun gun
The old adage of not bringing a knife to a gunfight sort of applied to a short standoff in St. John's early Friday. Fleeing on foot from police at 12:30 a.m., a 25-year-old St. John's man stopped and confronted his pursuers, wielding what RNC officers thought was a hypodermic needle. A police officer, in turn, pointed a "conducted energy device" at the suspect and told him to surrender or be zapped, the RNC stated in a news release. The man gave up, and his weapon was determined to be an epinephrine auto-injector, police said. The man -- who was being sought because of a parole warrant issued by Correctional Services Canada -- was arrested and charged with resisting arrest, assault with a weapon and assaulting a police officer. He was held in custody and was to appear in court later Friday. Telegram

Canada-wide warrant issued for sex offender Darren Wheatley who broke curfew third time
Vancouver police issued a Canada-wide search warrant for a high-risk sex offender who did not return to his Vancouver halfway house on November 9... He is a two-time federal offender serving a 10-year sentence for two counts of sexual assault, sexual assault causing bodily harm, and two counts of overcoming resistance by choking. He was involved in three separate attacks on women in Ontario. The Straight (2016-11-10)

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

SARM members want more action on rural crime
After a tense summer that saw farmers arming themselves during harvest, the Saskatchewan Association of Rural Municipalities (SARM) says more work needs to be done to battle rural crime. After becoming frustrated with what they saw as a lack of response from RCMP, farmers created a Facebook group this summer to track suspicious activity in rural areas. At one point, a farm worker said he was held up by three armed men with handguns during harvest. This week, Saskatchewan RCMP's new commanding officer, Curtis Zablocki, addressed the group at its annual convention. He said the best way to reduce crime was to focus on community engagement. While SARM president Ray Orb said he would still like to see more RCMP patrolling rural areas, he agreed that mobilizing farmers was a good idea. CBC News

Somali-Canadian officer a first for Edmonton Police Service
The first Somali-Canadian recruit to graduate from the Edmonton Police Service academy officially joined the ranks Thursday. Const. Amal Abdi, 28, was among 30 new officers celebrated during a ceremony at city hall. "We've been saying that we want to see representatives of our community be part of the Edmonton police," said advocate Ahmed Abdulkadi, with the Ogaden Somali Community of Alberta. "This is one step forward and this will heal a lot of wounds." Abdi shied away from attention herself, but friend Radwan Mohamed said, like the rest of her classmates, Abdi has worked hard to get to this point. "The diversity of experience that she brings will automatically make a difference," Mohamed said. CBC News

Canopy Growth is Canada's first 'cannabis unicorn' with $1 billion valuation
Canopy Growth Corp. is Canada's first marijuana "unicorn" after reaching a billion-dollar valuation Friday as part of an industry-wide rally buoyed by this week's legalization push in eight U.S. states... The federal Task Force on Marijuana Legalization and Regulation is expected to release recommendations later this month on how to implement a market that has been estimated to be worth between $5 billion and $10 billion. National Post

Weedmaps: New app provides medical marijuana dispensary information
Medical marijuana users in Halifax can now check pricing, strain availability and even watch tutorials on cooking edibles through the new application, Weedmaps. Introduced through an office in Waterloo a year ago, Weedmaps can pinpoint the addresses of dispensaries, what they sell, and also direct people to delivery services and doctors likely to provide medical prescriptions. Chronicle Herald

Cops put the brakes on marijuana vending cart
A budding business plan for a marijuana vending cart went up in smoke thanks to some eagle-eyed cops. Victoria Police busted a man for dealing weed from a well-marked marijuana vending cart last week. It didn't take much for officers on a late-night patrol to smoke out the alleged drug dealer - he was bluntly advertising it. The run-of-the-mill bicycle food cart clearly read "420 Delivery" along with the caveat "no minors." "The officers spoke with the man and quickly determined that he was selling marijuana," police said in a press release Thursday. More than 150 grams of marijuana was seized, police said. Cops seemed baffled by the brazenness of the bud business. Postmedia Network (Ottawa Sun)

Centretown medical marijuana dispensary robbed
A medical marijuana dispensary in Centretown was robbed Friday morning. No one was injured, said the police officers responding to a call from the Sylk Medy dispensary, on Gladstone Avenue near Bay Street... Sylk Medy opened this fall in the downstairs room of a converted house. It's locally owned and operated. At the time, the owner said the shop decided not to sell dried weed in order to discourage customers looking for recreational pot... Like all the dispensaries, Sylk Medy operates illegally. This is the fifth robbery at a marijuana dispensary this fall. Six dispensaries closed last week after police drug raids. All of the raided dispensaries were operated by a B.C.-based chain that, according to police, had expanded sales beyond just medical marijuana patients. Police say they continue to investigate the remaining dispensaries and respond to public complaints. Ottawa Citizen

PUBLIC SERVICE / FONCTION PUBLIQUE

Built to crash: The ugly, sputtering beginning of Shared Services, and how politics conspired against it

Liseanne Forand really didn't know what to expect. On Aug. 4, 2011 she was making her way on foot to Phase III of the Gatineau office complex known as Place du Portage. A career bureaucrat, Forand had, the day before, been appointed president of Shared Services Canada — a new federal department that would manage the government's email, data centres and telecommunications. Her mandate — representing about one-third of the federal government's $5-billion-a-year technology services budget — was breathtaking in its scope and complexity. She was to simultaneously streamline and modernize the government's electronic backbone, and keep the old gear running. Sixty-three email systems would be collapsed into one. More than 500 data centres were to be decommissioned, to be replaced by a mere handful. Fifty telecommunications networks connecting 3,500 federal buildings were to be upgraded. Forand was to do this with staff cobbled together from 43 different departments. But on this day, she had no office, and the paperwork had been approved for just 1,200 of an eventual 6,000 employees. Ottawa Citizen

Trump Protest Makes Its Way Through Downtown Vancouver

Hundreds of protesters snaked their way through downtown Vancouver on Thursday, pumping their fists in the air and chanting "Love trumps hate," as they rallied against the outcome of the United States presidential election. Dozens of placards bobbed above the crowd with various slogans disparaging president-elect Donald Trump, ranging from "Build kindness, not walls" and "Proud supporter of love," to "Make America safe again," and "Prejudice kills."... The protest was staged in front of Trump Tower, which attracted criticism and played host to another demonstration earlier this year thanks to its controversial namesake. The oversized letters spelling out the Trump name immediately above the building's front doors had been covered in blue sheets and a fence surrounded the entrance. Canadian Press (Huffington Post)

Public advocacy, private diplomacy secured Hoodfar's release: Cotler

A former MP and international human rights lawyer said he suspects a Concordia University professor was released after being detained by Iranian authorities only because of "the combination of effective public advocacy and effective private diplomacy." Irwin Cotler, former minister of Justice and Attorney General of Canada, added he believes timing was also a factor in the release of Homa Hoodfar, who became very ill during her detention in Tehran's notorious Evin prison. Iran became worried they might have "another Kazemi case on their hands," Cotler said, referring to Zahra Kazemi, an Iranian-Canadian freelance photographer who was arrested in Iran in 2003 and killed by officials. Fear about Hoodfar's declining health, pressure from the public and the Canadian government's behind-the-scenes work all convinced Iran that continuing to detain Hoodfar was no longer in their self-interest, Cotler said. iPolitics

Taliban attack on German consulate kills 4

A Taliban suicide bomber rammed a truck packed with explosives into a wall around the German consulate in the northern Afghan city of Mazar-i-Sharif, killing at least four civilians and wounding scores, officials said. The attack highlighted the security problems spreading across Afghanistan in recent months, underlining one of the most intractable foreign policy challenges that will face U.S. president-elect Donald Trump when he takes office next year. Reuters (CBC News)

Dozens of pipeline protesters arrested in latest skirmish

Law officers arrested about three dozen Dakota Access oil pipeline protesters in a confrontation that also shut down a state highway. The midday Friday incident began after about 100 protesters confronted crews doing work along the pipeline route where pipe had already been laid. Morton County sheriff's

spokeswoman Donnell Hushka says workers were safely evacuated. It happened about 20 miles away from a protest camp where hundreds of pipeline opponents have gathered for months. More than 470 people have been arrested since August. Associated Press (Star Tribune)

Trump protests surge across America
Another night of nationwide protests against Donald Trump's election came to a head in Portland, where thousands marched and some smashed store windows, lit firecrackers and sparked a dumpster blaze. Police termed the protest a riot and used "less lethal munitions" to help clear the streets. Some 4,000 protesters surged into the downtown area late Thursday night with chants like "we reject the president-elect!" Officers began physically pushing back against the crowd that at times threw objects at them as midnight approached, arresting several people and using flash-bang devices and types of smoke or tear gas to force people to disperse. After several orders to leave, police said officers used "less lethal munitions," such as pepper spray and rubber projectiles. Live video footage showed officers firing what appeared to be the non-lethal items. It wasn't immediately clear if anyone was hit. Associated Press (iPolitics)

Trump Homeland Security candidates include GOP lawmakers and, less likely, a sheriff
President-elect Donald Trump is considering two Republican members of Congress fo rDepartment of Homeland Security secretary, a critical post whose occupant would oversee his proposed crackdown on illegal immigration, people familiar with the deliberations said. The incoming chief executive is looking at Rep. Michael McCaul (R-Texas), chairman of the House Homeland Security Committee, and Sen. Jeff Sessions (R-Ala.), the people said. Sessions, who helped shape Trump's hardline views on immigration, is also under consideration for other top administration jobs such as defense secretary. Other names being floated for the Homeland Security post include former New York City mayor Rudy Giuliani and New Jersey Gov. Chris Christie, who leads Trump's transition team. But both are former U.S. attorneys also reportedly interested in being attorney general, so they could view DHS as a consolation prize. Washington Post

Daech à l'agonie
En un an, le nombre de photos et de vidéos diffusées par le groupe armé État islamique (EI) est passé d'un pic de 761 en août 2015 à 194 en août 2016, note le Combating Terrorism Center, de l'Académie militaire de West Point, aux États-Unis. Ce déclin serait d'abord attribuable à la mort de membres de l'équipe chargée des contenus visuels — dont celle du chef de la propagande, Wa'il Adil Hasan Salman al-Fayad — et à la destruction d'infrastructures de production de l'EI. Le ton des vidéos publiées a lui aussi changé. Le groupe ne vante plus les mérites du « califat », comme il le faisait en 2014, en diffusant des images de commerces florissants et de vie civile prospère. Les vidéos présentent désormais à 70 % des nouvelles de nature militaire, selon les chercheurs de West Point. Ce recul de la propagande de Daech est un coup dur pour un groupe qui a toujours cherché à attirer des combattants étrangers. Selon le Pentagone, le nombre d'étrangers rejoignant chaque mois les rangs du « califat » est passé d'environ 2 000 à à peine 200. L'actualité

RCMP tracked 89 indigenous activists considered 'threats' for participating in protests
The Trudeau government says Canada's national police force respects the right to peaceful demonstrations by indigenous activists, after it was revealed the RCMP compiled a list and distributed profiles of indigenous protesters it deemed "threats" who it determined were potentially willing and capable of criminal activities. Dubbed Project SITKA, the RCMP began soliciting information on indigenous activists who could be perceived "to have committed or commit" crimes from all of its divisions

and local police departments across the country in March 2014. Using the information it received and data collected from social media, the Mounties identified 313 activists — attendees of protests on issues ranging from natural resource development to missing and murdered indigenous women — who potentially posed a "criminal threat to Aboriginal public order events." The RCMP then narrowed that list to 89 individuals it said met "the criteria for criminality" and created unique profiles for each one. These profiles were then made available to front-line officers, analysts and other law enforcement agencies through two police databases, the RCMP's Automated Intelligence Information System and the Police Reporting and Occurrence System... A spokesperson for **Public Safety Minister Ralph Goodale** said Project SITKA was focused on identifying potential threats to public safety at indigenous events and protests. ***"This focus was in keeping with recommendations stemming from the 2007 Ipperwash Inquiry report, which highlighted the need to examine aboriginal protests as a separate and distinctive form of protest requiring dedicated and unique police resources, strategies and responses,"* said Scott Bardsley.** Bardsley added that the report on Project SITKA concluded there were no direct threats to critical infrastructure and no connection to organized crime associated with Indigenous protests. Red Cross funds study into how Fort McMurray wildfire affected indigenous people
Melanie Dene still remembers the harrowing ordeal of driving through fiery hell during the evacuation of Fort McMurray six months ago with her two young daughters... She and others are now the subject of a research study into how the wildfire affected First Nation and Metis communities in and around the Fort McMurray region. The Canadian Red Cross is funding research, which involves talking to people whose homes were destroyed in the city, who faced food shortages in outlying communities and those who can no longer hunt, trap or pick berries because of the charred terrain. The study involves five First Nations that make up the Athabasca Tribal Council along with the Wood Buffalo, Willow Lake and Chard Metis communities and other organizations. Canadian Press (Yahoo News)

Tug recovery near Bella Bella delayed again by poor weather - Crews hope to resume salvage operation Monday if conditions improve
Attempts to salvage a tugboat that sank off B.C.'s Central Coast nearly a month ago spilling more than 100,000 litres of pollutants have been delayed again by bad weather. The salvage crew working to raise the tugboat had hoped to lift the vessel Saturday, but Environment Canada issued a storm warning for the region calling for high winds. It's hoped the salvage operation can resume Monday, said Jessie Housty, an elected tribal councilor for the nearby Heiltsuk First Nation. Crews need a 36-hour window of clear weather in order to lift the sunken vessel from the water, Housty said. A large crane from Seattle was brought in to hoist the tug onto a barge. Last week, crews dragged the tug about 30 metres into deeper waters of Seaforth Channel, positioning it so that it could be lifted onto that barge. CBC News

Military conducting SAR exercises in metro region
The public can expect increased military activity in and around St. John's this week as search and rescue training exercises take place. The Royal Canadian Air Force says in a news release that 103 Search and Rescue Squadron from 9 Wing Gander will be in the area for training exercises between Nov. 13-18. "Due to the high tempo of this training, the general public are advised that there will be extensive Cormorant helicopter flights and higher than normal military activity in these areas during this period," the news release states. Northern Alberta hunter found safe after spending evening in woods
A 43-year-old hunter is safe after being lost in the woods south of Boyle Saturday, the RCMP say. The man became disoriented around 1 p.m. while hunting in dense brush near Long Lake Provincial Park, 130

kilometres northeast of Edmonton. He called for help using a cell phone, but reception was soon lost. The temperature was around o C with light rain. Boyle Fire and Rescue started a ground search with help from the Edmonton RCMP helicopter, which found the man around 11:45 p.m. He was in good health. Edmonton Journal

Cessna en difficulté: quatre personnes secourues par des chasseurs
Quatre personnes qui voyageaient à bord d'un Cessna ont été secourues par des chasseurs, dimanche matin, près du lac Cahill, à mi-chemin entre Gatineau et Maniwaki, en Outaouais. Vers 10 h 30, un témoin a contacté les secours par Skype après avoir vu un aéronef en difficulté dans ce secteur reculé, mais, vers midi, la Sûreté du Québec ne savait toujours pas si l'avion s'est écrasé ou si ses occupants se sont retrouvés en difficulté pour une autre raison. Toutefois, la SQ a pu confirmer que les quatre personnes étaient saines et sauves au moment où elles ont été secourues. Une équipe de sauvetage des Forces armées canadiennes a été envoyée de la base de Trenton, en Ontario, sur les lieux de l'événement. La Sûreté du Québec devait aussi dépêcher une équipe pour aller vérifier la situation. Agence QMI (TVA Nouvelles)

Canada's energy industry ponders how to face activist 'threats'
Canadian security experts are increasing their vigilance against activists' threats to the country's energy infrastructure, as civil-liberties advocates worry about the use of improper surveillance on peaceful opponents to major projects. In what is billed as a training workshop, Carleton University's Infrastructure Resilience Research Group is playing host to a closed-door conference on Monday and Tuesday for lawyers, police, regulators and industry representatives on "the challenges of dealing with natural resource development projects and activism." One of the organizers, professor emeritus Martin Rudner, said there are significant threats from "domestic extremists" to Canada's energy infrastructure, including pipelines, generating stations and transmission lines… In an interview, he pointed to incidents such as the confrontation three years ago between First Nations demonstrators and RCMP in New Brunswick over proposed shale-gas drilling, and to the emergence of more militant elements in the indigenous and environmental communities… But critics argue police and intelligence agencies are armed with overly broad definitions of national security and critical infrastructure, which include projects that are in the planning and construction phase, in addition to assets that are operational and delivering energy across the country. "A lot of these concerns are overblown," Ottawa lawyer Paul Champ said. He is a board member of the British Columbia Civil Liberties Association that has alleged RCMP and the Canadian Security Intelligence Service (CSIS) engaged in illegal surveillance of Canadians protesting against Enbridge Inc.'s proposed Northern Gateway pipeline. Mr. Champ said the RCMP and CSIS became more active in natural-resources development under the former Conservative government, which defined national-security threats to include actions that could affect the economic stability of the country, and then defined resource development as essential to the health of the Canadian economy. Signal Downloads Spiked After Election Results
If you use the popular encrypted messaging app Signal, you may have noticed an influx of friends downloading the app following the conclusion of the 2016 US presidential election. Signal received some significant buzz on November 9th, as the world awoke to find out Donald Trump was president-elect. In the 48 hours after the final results were announced, my phone had buzzed with no less than two dozen notifications informing me that friends and acquaintances—many of whom I'd long lost contact with—had finally installed the end-to-end encryption app, which has been praised by security experts and famously endorsed by NSA whistleblower Edward Snowden. "Signal's growth has really accelerated over the past week, and it isn't showing any sign of slowing down," Moxie Marlinspike, the pseudonymous creator of Signal's encryption protocol, told Motherboard in an encrypted chat. Motherboard

RCMP looking to increase number of women on the force
The RCMP is looking for more women to join the force. Just over 21 per cent of officers across the country are women. The force would like to see that number increase to 30 per cent. Erika McGrattan, a proactive recruiter for the force, told Global News they want to make sure their officers reflect Canada's population. "We want more women in the police force so we can go to calls and make women more comfortable when we attend calls, when we show up so they're not intimidated to speak to us, and to let us help them better." To apply you need to have completed high school. Applications will be screened by the force and successful applicants will then go through six months of training in Regina. "We want that person that wanted to become a police officer because they want to help people," McGrattan said. "They want to go out, they want to make a difference. We want to find that person who is honest, who does genuinely care." One in 10 women who apply to the force will be accepted. 630 CHED

Cinq personnes arrêtées - Un mort dans une fusillade à Halifax
La police régionale d'Halifax a confirmé dimanche matin le décès d'un jeune homme de 21 ans survenu samedi vers 17 h, à Halifax, sur la rue Washmill Lake. À l'arrivée des policiers, la victime était déjà décédée sur la scène du crime. Un périmètre de sécurité a été érigé près du 600 Washmill Lake. La police a précisé que les tirs ont eu lieu à l'intérieur. Une escouade de la Gendarmerie royale du Canada et des policiers d'Halifax ont été dépêchés sur les lieux. Cinq personnes, tous des hommes, ont été arrêtés et conduits au quartier général de la police. Dimanche matin, quatre suspects étaient toujours détenus. L'unité des crimes majeurs et des enquêtes criminelles poursuivent leur enquête sur cet homicide. TVA Nouvelles

Lloydminster RCMP say missing man found dead
A 48-year-old Lloydminster man who had been missing since Nov. 3, was found dead Saturday. RCMP released the man's description last week and asked the public for assistance in locating him. No foul play is suspected. Police thanked the public for their assistance during the search. The RCMP said no further details will be provided out of respect for his family. Global News

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

A touch of déjà vu: Harold Backer case rekindles Ian Thow scandal
The disappearance of mutual fund dealer Harold Backer, who former clients believe defrauded them of millions of dollars, has dredged up memories of another Victoria investment adviser who cost his clients millions. Calling it a touch of déjà vu, some of Ian Thow's former clients say they see strong parallels in the two cases. "Definitely," said Ron Black, a former Thow client who was bilked of $700,000. "It never does go out of your mind, it's there all the time and I'm reminded every time I see something like that. Yeah, I think about it." Thow took money from clients for schemes that included a Jamaican bank and short-term loans for developers. He never made those investments. The RCMP Integrated Market Enforcement Team led a five-year investigation into Thow, a former Berkshire Investment Group vice-president, based on allegations he cheated clients and friends out of more than $32 million. Thow was jailed in 2010 for defrauding 20 clients of $8 million, the total that the Crown felt it was able to prove...

Thow is on full parole and living in the Fraser Valley, where at last report he was working for a landscaping firm and paying $100 a month for restitution to his former clients. A court order requires him to pay back $3.8 million. Thow's warrant expiry date — the end of his sentence — is March 3, 2017. After that, he will no longer be under the jurisdiction of the Correctional Service of Canada or the Parole Board of Canada. Backer, meanwhile, is still considered a missing person by Victoria police. Times Colonist

Isolation a barrier to exposing sexual abuse, incest on reserve: Bellegarde
At night, he would arrive in Corey's room by crawling through the window next to the bunk bed where she slept. She knew from the smell when he was there. By day, she endured different hands, sometimes under the most mundane circumstances — once, she recalls, while in the kitchen eating lunch. He pulled down her underwear and started fondling her. He left money on the table. They were family members, these two predators — their unwanted touch impossible to escape for a young girl living on a remote First Nation in British Columbia. That isolation, a fact of life for many Aboriginal Peoples, is a pernicious barrier to the essential goal of exposing the scourge of indigenous sexual abuse and incest, says Perry Bellegarde, the national chief of the Assembly of First Nations. Bellegarde is pleading with chiefs to confront the problem head-on. But he also acknowledges a difficult truth: many First Nations people who live in remote areas are reluctant to come forward with their allegations for fear of reprisals in their small, tightly knit communities. Canadian Press (Yahoo News)

People, projects winners of mayor's safety awards
Two individuals and three community projects have been recognized in the sixth annual Mayor's Community Safety Awards. "I wish to offer my sincerest congratulations and thanks to each of this year's recipients," said Mayor Keith Hobbs in a ceremony at city hall. "This year's recipients are setting an example through their outstanding efforts to make our community safer and more welcoming for everyone. I hope we can all look at these recipients as inspirations as we work together to make our own changes to better our community." Chronicle-Journal

Les agressions sexuelles, un fléau chez les autochtones
Enfant, elle sentait sa présence dès qu'il arrivait, la nuit, dans sa chambre en entrant par la fenêtre qui donnait sur son lit superposé. Corey, qui a aujourd'hui 55 ans, est l'une des nombreuses femmes autochtones du Canada qui ont été victimes d'agressions sexuelles par des proches ou des membres de leur famille au cours de leur enfance. Corey (nom fictif) a enduré plusieurs fois de faire l'objet d'attouchements, parfois dans des circonstances des plus banales, en plein jour. Elle se souvient entre autres de la fois où, alors qu'elle mangeait à la cuisine, l'un de ses deux proches agresseurs a retiré sa petite culotte et s'est mis à la caresser. Après avoir mis fin à ces attouchements, l'homme a laissé de l'argent sur la table. L'isolement de nombreuses communautés autochtones est un des éléments qui freine les victimes d'abus sexuel ou d'inceste à dénoncer de tels actes, estime le chef de l'Assemblée des Premières Nations, Perry Bellegarde. Ce dernier souhaite que des actions soient entreprises pour faire face à ce problème, un appel qui est appuyé par d'autres chefs autochtones. Il note cependant que de nombreuses victimes ont peur de parler puisqu'elles craignent des représailles. Presse canadienne (La Presse)

Légalisation du cannabis : les intervenants jeunesse aux aguets
La légalisation de la marijuana promise par le gouvernement fédéral pourrait modifier le quotidien des intervenants jeunesse. Des formations sont déjà offertes pour mieux outiller les professionnels, dont certains craignent l'arrivée de la nouvelle loi. Des dizaines de professionnels de la santé, en majorité des intervenants jeunesse, seront formés au cours des prochains mois par le Groupe de recherche et d'intervention psychosociale (GRIP), un organisme qui se spécialise dans la prévention des toxicomanies. L'initiative, lancée par l'organisation située à Montréal, vise avant tout à rassurer les craintes de nombreux intervenants. « Les gens [à qui on a donné la formation] sont soulagés. Beaucoup avaient peur que la légalisation amène plus de consommation alors qu'en général, dans les pays où il y a eu la décriminalisation, c'est plutôt l'inverse : on voit moins de consommation. Ça a soulagé beaucoup d'intervenants », souligne Jessica Turmel, formatrice du GRIP. Radio-Canada

Canadian troops watching for human rights abuses as battle for Mosul rages
Canadian special forces troops have been told to keep an eye out for possible human rights abuses and sectarian score-settling as the battle to liberate Iraq's second largest city continues to unfold. The bloody fight to evict the Islamic State in Syria and Iraq (ISIS) from Mosul — which has been going on for almost a month — is being waged by uneasy allies who could quickly turn into enemies. Already Kurdish troops have been accused of destroying large numbers of Arab homes, and leaving Kurdish-owned homes untouched in areas cleared of ISIS control, according to a report released Sunday from Human Rights Watch. CBC News

INTERNATIONAL

A year after Paris attacks, Europe's extremism problem shows no signs of going away
In a series of attacks on "precisely chosen targets," nine Islamic State militants wrought devastation in Paris on Nov. 13, 2015, killing at least 130 people. A year later, the world is still grappling with violence exported from Iraq and Syria and carried out by those influenced by the missive to build an Islamic caliphate, even as the group's footprint shrinks. How did Europe get to this point? And why is it so hard for authorities to stop it? This is a look back at The Post's reporting on a year of attacks, and an attempt to explain how we got there. Washington Post

Islamic State group flourishes and recruits in Pakistan
The Islamic State group is increasing its presence in Pakistan, recruiting Uzbek militants, attracting disgruntled Taliban fighters and partnering with one of Pakistan's most violent sectarian groups, according to police officers, Taliban officials and analysts. Its latest atrocity was an attack Saturday on a Sufi shrine in southwestern Pakistan that killed at least 50 people and wounded 100 others. The group said in a statement that a suicide bomber attacked the shrine with the intent of killing Shiite Muslims and issued a picture of the attacker. Associated Press (Yahoo News)

Colombia signs peace deal with FARC
Colombia's government and the FARC rebel group signed a revised peace accord Saturday after years of negotiations and a half a century of conflict. Colombian President Juan Manuel Santos announced the new deal in a TV address Saturday evening, saying it will build a "broader, deeper peace." A peace deal negotiated earlier this year with FARC rebels was unexpectedly defeated by Colombian voters in October. Many were angered by what they saw as insufficient punishment for those who perpetrated a litany of crimes against their people. Negotiations for a peace deal continued after the defeat with rebels

and those opposed to the original agreement. Among the new stipulations are reparations for victims which will come from FARC's assets and money, Santos said. FARC can still form a political party under the agreement and members with minor offenses can apply to get their records cleared. CNN

2 dead after powerful earthquake, tsunami hit near Christchurch, New Zealand
New Zealand Prime Minister John Key says at least 2 people were killed in powerful earthquake. The earthquake hit New Zealand's South Island early Monday, shaking residents awake, causing damage to buildings and prompting emergency services to warn people along the coast to move to higher ground to avoid tsunami waves. The magnitude-7.8 earthquake struck just after midnight in a mostly rural area close to the city of Christchurch, but appeared to be more strongly felt in Wellington, the capital, more than 200 kilometres (120 miles) to the north. The quake was followed by a number of strong aftershocks. The quake temporarily knocked out New Zealand's emergency call number, 111, police reported. Associated Press (Global News)

Large 6.2 Magnitude Earthquake Hits Northeastern Argentina
A large earthquake with a magnitude of 6.2 has struck northeastern Argentina, but there are no immediate reports of damage or injuries. The earthquake struck just after 8 a.m. local time (14:00 GMT) and was centered about 16 miles (26 kilometers) north of the community of Chilecito in La Rioja province, near the border with Chile. It had a depth of around 62 miles (100 kilometers). Associated Press (ABC News)

Around 80,000 rally in Barcelona for Catalan independence
Around 80,000 people rallied in Barcelona on Sunday in a show of support for Catalan leaders locked in a tug-of-war with Madrid over independence for their region, police said.The demonstration aimed in particular at supporting Catalonia's former president, Artur Mas, and the head of its parliament, Carme Forcadell. MINISTER / MINISTRE

Liberals to revamp 'discriminatory' age law for anal intercourse

The Liberal government is repealing what it calls a "discriminatory" law that makes it illegal to have anal sex under the age of 18, unless it is between a husband and wife. Right now, the age of consent for sexual activity is 16 but the Criminal Code prohibits anal intercourse for people under the age 18 unless they are husband and wife, a discrepancy many have denounced as unconstitutional. Justice Minister Jody Wilson-Raybould announced the change today, saying the "outdated" law violates equality rights. Wilson-Raybould said the change is substantive and not just symbolic. In 2014 and 2015, there were 69

charges laid under the law, though none led to convictions. The minister said appellate courts across the country have deemed the law unconstitutional. The bill, C-32, is retroactive to 1983, but Wilson-Raybould said the law does not mean automatic pardons. That falls under the jurisdiction of **Public Safety Minister Ralph Goodale**, who is studying the issue, she said. Jake Wright, press secretary to interim Conservative Leader Rona Ambrose, said she backs the change. CBC News

Police investigating death of seven-year-old Nia Eastman in Choiceland
An Amber Alert issued on Thursday had a tragic result with the discovery of the body of seven-year-old Nia Eastman, just hours after the body of her father, Adam Jay Eastman, was found near Snowden. Nia's body was found in a home in Choiceland shortly after noon on November 10, just a block from WM Mason School where she attended Grade One. Nia was reported missing after her father failed to return her home to her mother on November 9. He had picked her up after school and was to have returned her by 7 pm. Eastman's body was found on a quarter-section of land along Highway 55 near Snowden, dead of self-inflicted injuries. **Federal Minister of Public Safety Ralph Goodale** issued a statement on Nia's death on Thursday afternoon. "***It was with great sadness that I learned that Nia Eastman was found deceased by the RCMP today following an Amber Alert***," **said Goodale** in the statement. "***It is heartbreaking to lose a child, and nothing can ever make that right. I wish to extend my heartfelt condolences to Nia's mother and family, her community and all those who have been touched by this tragedy. We are all grieving together this most terrible loss***." 'A lot of learning to do': Wawanesa Insurance on Fort McMurray wildfire response
Alberta's second-largest insurer admits it could have done things better in its response to the Fort McMurray wildfire. Wawanesa Insurance will review how the company performed in the aftermath of the wildfire, the company said in an interview with CBC News. It will survey all of its customers once claims are completed. "I think there's a lot of learning to do on this. It's tough," said Graham Haigh, Wawanesa's vice-president, business development. "It really does kill both us and our staff when we are not producing service at a level that we would want to for our families." The Insurance Bureau of Canada said the Fort McMurray wildfire is the country's costliest disaster. It estimates payouts will hit $3.58 billion. Wawanesa said it has settled 74 per cent of the 4,094 claims it has received to date. It has closed 71 per cent of 2,997 homeowner claims. CBC News

Before practice, the real thing for Arrowsmith Search and Rescue
Last week, area search and rescue teams were looking forward to some training at Little Qualicum Falls on Sunday. Little did they know they would be needed for a real-life rescue on Saturday in the hills above Nanoose Bay. A Victoria man was tired, cold but not seriously hurt after being rescued at Bonnell Falls. Arrowsmith Search and Rescue's Ken Neden told The NEWS the man was hiking with a friend on a trail near the falls and proceeded down a muddy slippery section with the aid of a rope that was in place... Neden said the man's friend called the RCMP for help who then called Arrowsmith Search and Rescue to assist at 3 p.m. Saturday. Parksville Qualicum Beach News

Peace Bridge lane restrictions begin
Crossing the Peace Bridge may be more difficult for the next six months, as traffic will be down to one lane in each direction from November 15 through May 15, 2017 for construction related to the ongoing $100 million Peace Bridge rehabilitation. “So long as Customs appropriately staffs and keeps inspection lanes open this winter, then we anticipate little to no traffic disruption,” remarked PBA Board Chair Sam Hoyt. “But that commitment really needs to be made and maintained and that is why the Authority is calling on all levels of government from both sides of the border to get involved and speak up about the importance of these traffic flow and staffing issues at the Peace Bridge. We’ve gotten strong indications from U.S. Customs and Border Protection that they can meet the staffing demand and we need Canada Border Services Agency to follow suit.”” (…) A series of traffic management improvements have been completed, including the recently completed widening of the Peace Bridge’s U.S. approach allows an increased number of trucks to be queued off the bridge. An eighth commercial inspection booth is also slated for installation by December to increase throughout capacity for trucks within the U.S. plaza. On the Canadian side, a partial fourth lane has been added to provide Canada-bound trucks and NEXUS users easier access off of the bridge. WBFO; WKBW

Thicker Canada-US border unlikely, Ridge says
The Canada-U.S. border is unlikely to see any thickening under president-elect Donald Trump despite the Republican's protectionist campaign rhetoric, former American security czar Tom Ridge said Tuesday. While Trump's views on Mexican migrants and Syrian refugees appeared to be sharply at odds with Canada's approach, Ridge said Canada needs to take a deep breath and wait to see what actually emerges from a Trump administration. Ridge, appointed as first Homeland Security secretary in the aftermath of the 9-11 attacks on the United States, was fiercely critical of the campaigning Trump, denouncing his "bumper-sticker approach" to policy and a bombastic tone that "reflects the traits of a bully." Now that the campaign is over, Ridge said he hoped Trump would "substantially alter his approach" to borders. "There's always a difference between the political rhetoric and actually the governing posture that he takes," Ridge told The Canadian Press in an interview. (…) Any thickening of the northern border in particular would be a "huge mistake" given the critical relationship Canada and the United States have, he said. "If you want to look at a relationship that has proven to be very sensitive to the needs of both countries, and the culture of both countries, take a look at the Canada-U.S. border." Canadian Press (Mississauga News, Times Colonist, Toronto Sun, iPolitics, CTV News)

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

From WhatsApp to Hawala, How the Taliban Moves Money Around
The Taliban has been trying to fundraise on the internet longer than Afghanistan’s current government has existed. In recent years, however, the insurgents have turned to internet messaging platforms secured by end-to-end encryption, such as Telegram, Viber, and WhatsApp, to solicit donations. On September 9, the Taliban posted a statement to its English Telegram channel in anticipation of an annual Islamic holiday. “As you know, Islamic Emirate of Afghanistan is the guardian of thousands of widows and orphans and provide them sacrifice of Eid-ul-Azha,” read the post, written in broken English. It implored

"every fortune and sympathizer Muslim" to contact the Taliban's treasury through its Gmail account or a phone number linked to Telegram, Viber, and WhatsApp. The statement failed to mention how potential donors could send money to the Islamic Emirate of Afghanistan, the Islamic state that the Taliban ruled from 1996 to 2001 and the name by which it still refers to itself. Taliban officials declined to comment for this article for "security reasons," referring to whatever money transmitter the insurgents might use as "a secret of the Emirate." Motherboard

Signal Protocol's crypto core has no major flaws, researchers find
A group of computer science and cryptography professors and doctoral students has effected a security analysis of the secure messaging Signal Protocol – specifically, of its Key Agreement and Double Ratchet multi-stage key exchange protocol (the effective cryptographic core). The results of the analysis are encouraging. "We have found no major flaws in the design, and hope that our presentation and results can serve as a starting point for other analyses of this widely adopted protocol," they noted in the paper detailing their research. The Signal cryptographic protocol is used by a variety of popular messaging apps, including Facebook Messenger, WhatsApp, Google Allo, Signal (the app developed by Open Whisper Systems, the company that also developed the secure protocol in question), as well as Silent Circle, CryptoCat (v2), and others. In short, billions of users depend on it for end-to-end encrypted, secure communication. Help Net Security

Spies Use Tinder, and It's as Creepy as You'd Think
On September 4, a group of young activists planned to attend a demonstration against Interim President Michel Temer in the city center of São Paulo. They never made it. Their group had been infiltrated by an Army Captain Willian Pina Botelho—via Tinder. Surveillance and infiltration are not new tactics, but the ACLU revelation last month that Twitter, Instagram, and Facebook had been sharing data with surveillance service Geofeedia reminds us that the internet is bringing it to whole new levels. The story of the "Tinder infiltrator" serves as a reminder for a generation of young activists who are organizing online: don't stop organizing, but be vigilant. Motherboard

Cozy Bear campaign 'PowerDuke' rides post-election wave
Russian advanced persistent threat (APT) group Cozy Bear has reportedly been targeting U.S. think tanks and non-governmental organisations (NGOs) in the immediate aftermath of the U.S. presidential race, devising malware campaigns that capitalise on post-election controversies. Cozy Bear, aka APT29, is already known for previously hacking the Democratic National Committee (DNC) and targeting Russia-focused think tanks in Washington D.C. According to a report from incident response and suppression service Volexity, the APT is now focusing its efforts on organisations specialising in national security, defence, international affairs, public policy and European and Asian studies. While these organisations and their members operate outside of the government, "A lot of times these people have close ties with political [groups]," noted Steven Adair, founder and CEO of Volexity, in an interview with SC Media. And "some of these folks may have access to or be involved with future administrations." SC Magazine

BlackNurse Low-Volume DoS Attack Targets Firewalls
A type of denial of service attack relevant in the 1990s has resurfaced with surprising potency against modern-day firewalls. Dubbed a BlackNurse attack, the technique leverages a low-volume Internet Control Message Protocol (ICMP) -based attack on vulnerable firewalls made by Cisco, Palo Alto, SonicWall and others, according to researchers. TDC Security Operations Center, a security firm that published a technical report (PDF) on BlackNurse this week, said the attack is more traditionally called a "ping flood attack." In this type of assault, traffic volume doesn't matter as much as the type of packets sent, researchers said. Threat Post; CSO

Mental-health workers to join Mounties in cars
Mental-health workers soon will be riding shotgun in some Kelowna police cars. A new policing initiative aims to pair such workers with RCMP officers in a bid to better help street people avoid criminal entanglements, city council heard Monday. Full details of the program, similar to ones already operating in some B.C. cities, will be announced soon, Kelowna RCMP Acting Supt. Brent Mundel told council. Councillors praised the RCMP for trying to work with social service agencies to curb what appears to be a local crime rate that's once again on a worrying rise. "The collaboration you're working on is phenomenal," Coun. Ryan Donn told Mundel. Coun. Gail Given said Kelowna's street population seems to have "grown quite considerably" during the past year. Dealing with challenges that flow from an increasing homeless and drug-involved population is the "top priority" for city council, Mayor Colin Basran said. Daily Courier (2016-11-14)

Former RCMP officer changes plea to guilty on one charge of assault.
Crown agrees to stop process on a second charge of assault plus a charge of uttering a threat. A former P.E.I. RCMP officer has pleaded guilty to assault. Jeffrey Rae Gillis appeared before Chief Judge Nancy Orr this morning in provincial court in Charlottetown where a trial on three charges was scheduled. With his guilty plea, the Crown stayed another assault charge and a charge of uttering a threat. Sentencing was adjourned until Jan. 18, 2017 to give time to prepare a pre-sentence report. While Charlottetown police were at Gillis's home investigating the assault complaint, the officers became aware of multiple weapons stored in the home, and sought a warrant to return to the home, search it, and seize the weapons. It was done, said officers in court, out of concern for public safety and not as part of a criminal process. Gillis will be back in court this afternoon where Judge Jeff Lantz will give a ruling after Gillis's lawyer challenged the validity of that warrant. Guardian

Nia Eastman, father died by murder, suicide: RCMP
Autopsies on seven-year-old Nia Eastman and her father have determined the causes of death were homicide and suicide. In a statement released Tuesday, the RCMP said the specific causes of death will not be released, but there is no evidence anyone else was involved. Adam Jay Eastman was found dead on Nov. 10, the same day RCMP issued an Amber Alert to find seven-year-old Nia Eastman. She was later found dead inside a residence in Choiceland, Sask. Police say no charges will be laid. More to come... CTV News

Suspicious package prompts evacuation of Red Deer RCMP headquarters
Police are investigating after a suspicious package was brought into the Red Deer RCMP's downtown detachment Monday, prompting road closures and a late-night evacuation. A section of 51st Avenue between 46th Street and 47th Street was closed for several hours after a resident discovered the suspicious package and brought it into the downtown headquarters. The explosives device unit was called in, and all non-essential staff were evacuated from the building. Officers canvassed the neighbourhood to advise businesses of the ongoing investigation. Officers "neutralized the device" shortly after 10 p.m. but police say they have yet to determine whether or not it was explosive. No one was hurt in the incident. The incident prompted RCMP to issue a reminder to the public. They say suspicious packages should be reported to police immediately, and should never be moved or touched. CBC News

Window shutter shot at S. Rutland Elementary over weekend
RCMP recovered evidence at South Rutland Elementary School showing damage to a window screen was caused by a small caliber firearm. On Nov. 14, shortly after 8 a.m., the Kelowna RCMP received a mischief report after school official's observed damage to the rear of South Rutland Elementary School in the 200 block of Mallach Road. School officials said the damage occurred sometime over the past weekend, between end of the school day on Thursday Nov. 10 and before the start of the school day of Monday Nov. 14. The damage was contained to a metal rolling shutter, which covers a classroom window at the rear of the school. RCMP made a full examination of the scene, with the assistance of both Police Dog Services and the Integrated Forensic Identification Services and recovered evidence that the damage caused is consistent with a small caliber firearm. Lake Country

Incivility most common complaint about Windsor police

Incivility is the most common complaint received by the Windsor police, which is often necessary given the situations many officers experience, according to Chief Al Frederick. He supports the latest review by the Ontario government, which is looking at how it investigates reports of officer wrongdoing. Frederick recognizes, though, there is no tolerance for officers insulting or demeaning the people they deal with. "Officers are interacting with people at their worst, during crises, and so sometimes they have to raise their voice or use language [that is] not appropriate in other circumstances," Frederick said. "I can live with that, knowing the volatility of situations on the streets." The Attorney General's office has ordered a review of police. The Ontario Independent Police Oversight Review is holding a public meeting held in Windsor on Tuesday. "Trust between a community and its police is a moving target," Federick said. "Yes, the oversight and the review of that oversight is a necessary tool." CBC News

Un détenu avait été victime de voies de fait samedi soir à l'Établissement Atlantique, un établissement fédéral à sécurité maximale situé à Renous, dans la région de Miramichi. Dans un communiqué de presse, Service correctionnel du Canada (SCC) indique que le détenu blessé a été immédiatement évalué par le personnel et transporté à l'hôpital pour y recevoir des soins. Aucune autre information concernant l'agression et l'état de santé de la victime n'ont été dévoilés. Le détachement de Blackville de la Gendarmerie Royale du Canada et l'établissement mènent une enquête sur l'incident. Les agresseurs ont été identifiés et des mesures appropriées ont été prises, avance Service correctionnel du Canada. Acadie Nouvelle

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

London police carding will meet minimal standards, chief says
The chair of London's police board said there are no plans to crack down on the Chief John Pare's plans to roll out street checks under new regulations in January, the board chair said. Jeannette Eberhard said the board supports the "guidelines and regulations" for the controversial practice as laid out by the Ministry of Community Safety and Correctional Services last spring after a round of public consultations across Ontario. "Our board is compliant with our ministry," she said. "I will look to their wisdom in their consultations." Controversy over a receipt that officers will be required to issue when they stop and question people re-ignited calls for a ban in this city -- where the most recent public statistics show that black and indigenous people were three times more likely to be stopped by police than white people -- altogether last week. At Thursday's police board meeting, Pare presented an updated draft of the receipt that will be handed out to people who are subjected to carding by London police. Police had revised the draft to include some explicit information about how citizens can access information about the stop under the Freedom of Information Act, as requested by the board in a motion last month, but decided not to add an area for officers to include the "reason" for the stop. London Free Press

VPD responds to nearly a dozen of opioid ODs in one day
A warning from Vancouver Police and health workers to drug users after a rash of opioid overdoses in the Downtown Eastside. The VPD says there were 11 ODs reported yesterday – luckily no one has died. Police believe fentanyl is to blame; the suspected drug appears to be purple in colour. You're advised not to snort, swallow, or inject drugs alone and call 911 immediately if symptoms, like trouble walking or talking, start to show. News 1130; Global News

Medicine Hat still a safe place, city police stress
Police are assuring local residents that Medicine Hat remains a safe community, despite two homicides occurring barely a week apart. "Having two homicides occur in such a short time frame is tragic and unprecedented in Medicine Hat," said Insp. Brent Secondiak Monday at a Medicine Hat Police Service press conference. Second-degree murder charges were laid against Noah Harrison Bentley, 26, over the death of Brenda Woloski, 53, this weekend. (...) These two incidents bring the number of homicides in

the city up to three for 2016. (…) According to police-reported crime statistics from StatsCanada, the homicide rate for 2015 was 1.68 homicides per 100,000 population in Canada. This is the highest rate since 2011, but remains below average for the previous decade. Medicine Hat News

Crime rides wave of theft
Kelowna's crime rate is up this year, thanks in large part to preventable property crimes. That was one of the conclusions reached during the RCMP's quarterly report to city council Monday. Kelowna's well-documented crime rate jumped in 2015, and acting top cop, Insp. Brent Mundle, said calls for service jumped during the third quarter of this year. Calls for service increased nearly 8.9 per cent – more than 3,900 – over 2015. Mundle said the biggest concern centres around property crime. Castanet

Prince George may act as model in addressing Merritt crime
The city of Merritt is reaching out to Prince George for help fighting crime. Merritt city councilor Mike Goetz was at the Union of B.C. Municipalities meeting this year when he heard how Prince George is using simple city bylaws to deal with suspected criminal activity at local hotels and businesses. CBC News

Twitter rolls out new tools to combat abuse, cyberbullying after months of criticism
Twitter, facing pressure for not doing enough to curb abusive behavior on its platform, said on Tuesday it would upgrade some features to better combat cyber-bullying. The company said it would expand the "mute" option to allow users to block tweets based on keywords, phrases and the content of conversations from a user's notifications .The "mute" option currently allows users to block tweets from accounts. The change will be rolled out to all users in the coming days, Twitter said in a blog post. "Because Twitter happens in public and in real-time, we've had some challenges keeping up with and curbing abusive conduct. We took a step back to reset and take a new approach, find and focus on the most critical needs, and rapidly improve," read the blog post. Global News

'It's just a waste': Refugees lack opportunity to play elite soccer
A local soccer player and coach are concerned newcomers to Winnipeg don't have the opportunity to play elite level soccer, which could pivot some from the draw of street gangs. When Omar Rahimi - an immigrant from Iraq - arrived in Winnipeg in 2001, soccer was the first thing he pursued. He went to Gordon Bell High School and played there, and then went on to play in the premier division for about eight years. The sport transformed his new life in Canada, he says. "Many of my good friends are from soccer. It was the best part of my transition. If not for soccer, I don't think I would be doing this good," he says, adding the sport also makes it easier to cope with stress. Many people who live in neighbourhoods that are hot spots for gangs are newcomers to Canada and their children are often targeted for recruitment, according to Winnipeg police. Rahimi added the sport made it easier to cope with stress. CBC News

Police ask for budget increase, more officers
The Saskatoon Police Service is asking the city for a budget increase to hire more police officers and other staff in 2017. The preliminary police budget calls for a $3.3 million increase to hire four new patrol officers and two detectives. The budget also includes additional medical staff in the detention unit and a lawyer and privacy officer to facilitate freedom of information guidelines. It's a 3.9 per cent increase over the 2016 budget. Mayor Charlie Clark says it's important to find efficiencies within the police service to tackle crime, but there is also a need for more officers as the city grows. CTV News

Police budget requires a balancing act
An editorial states, "Faced with an initial budget projection that would see property taxes rise by 3.97 per cent if newly elected councillors are unable to whittle down the city's spending when they begin deliberations at the end of November, it's understandable that Mayor Charlie Clark and some others might balk at Police Chief Clive Weighill's request to add $3.3 million to the allocation for his department. Granted, it's up to the board of police commissioners to assess and make a recommendation to council about the size of the police budget, which claims by far the largest share of property taxes at around 23 cents of every dollar collected. However, policing costs that continue to rise generate plenty of debate among elected officials, because voters hold them ultimately responsible for the associated property tax

increases. (...) The budget increase of $3.3 million that Chief Weighill seeks — to among other things hire four patrol officers and one officer each for special investigations and cyber crimes — presumably includes the above $2.6 million for inflation, pay raises and other costs. So, if the police commission grants Weighill's request, the additional cost to the city budget will be about $700,000, or an increase of close to 0.34 per cent, bringing the total property tax hike awaiting taxpayers to about 4.3 per cent, according to city officials." StarPhoenix

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Why writer Katherena Vermette searches the Red River
Katherena Vermette joins a volunteer search party on Winnipeg's vast Red River in the new short documentary This River. The organization, known as Drag the Red, routinely conducts searches in the river for clues around the disappearance of Indigenous friends and family. The group formed in 2014, after the body of a teenage girl was discovered in the Red River, inciting public outcry and renewed calls for a national inquiry into missing and murdered Indigenous women. It is believed that as many as 4,000 Indigenous women, men and children have gone missing or been murdered since 1980 in Canada. The documentary features Kyle Kematch, whose sister went missing over five years ago. Kematch and Vermette discuss the despair and frustration of working with police. "We reported [her disappearance]. We didn't get any response the first day. Second day, we went down there and they just kept saying, 'Well, if we find her we don't need to tell you where she is,'" said Kematch, who searches the water almost every day. "Took a couple weeks, but they labelled her as a prostitute and when they label her as a prostitute, that's when everybody stops caring. That's where it's wrong. It shouldn't matter what your race is or what you did or what you are doing. Everybody deserves to live." CBC News

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Canopy Growth becomes Canada's first marijuana unicorn, worth $1 billion
Medical marijuana producer Canopy Growth Corp. has become the first Canadian company in the sector valued at more than $1 billion after strong quarterly results sent the stock on a tear. The company was trading hands at $11.16 per share when stock markets closed in Toronto on Monday. That values the company at almost $1.3 billion. As recently as July, the company was worth less than a third of that. But that was before seven U.S. states voted last week to legalize some form of either recreational or medical marijuana. (...) During a conference call to discuss the company's quarterly results, CEO Bruce Linton emphasized the company's efforts to expand its production capacity to keep up with demand. CBC News

CAA wants to prepare the public for stoned drivers
The Canadian Automobile Association is lobbying for a government-funded public education program to warn of the dangers of cannabis-impaired driving before Canada legalizes recreational pot. Police will also need more funding to learn how to recognize and investigate drug-impaired drivers, says the CAA. The Liberal government has promised to introduce legislation legalizing recreational marijuana next spring and a committee report on the process is expected at the end this month. The CAA helped fund a study by the Ottawa-based Traffic Injury Research Foundation that suggests legalization will pose "incredible challenges" for managing pot-impaired drivers. The study is sure to inflame the escalating propaganda war over marijuana's harms and benefits, because it is premised on the assumption that access to legal cannabis will increase traffic accidents. The CAA commissioned a poll that found almost two thirds of respondents are worried roads will become more dangerous after legalization. CTV News (Civilized.life)

PUBLIC SERVICE / FONCTION PUBLIQUE

How politics sabotaged the federal government's grand IT plan, Shared Services Canada
An opinion piece states, "Liseanne Forand really didn't know what to expect. On Aug. 4, 2011 she was making her way on foot to Phase III of the Gatineau office complex known as Place du Portage. A career bureaucrat, Forand had, the day before, been appointed president of Shared Services Canada - a new federal department that would manage the government's email, data centres and telecommunications. Her mandate - representing about one-third of the federal government's $5-billion-a-year technology services budget - was breathtaking in its scope and complexity. She was to simultaneously streamline and modernize the government's electronic backbone, and keep the old gear running. Sixty-three email systems would be collapsed into one. More than 500 data centres were to be decommissioned, to be replaced by a mere handful. Fifty telecommunications networks connecting 3,500 federal buildings were to be upgraded. Forand was to do this with staff cobbled together from 43 different departments. But on this day, she had no office, and the paperwork had been approved for just 1,200 of an eventual 6,000 employees." Postmedia News (National Post)

Sodomie: le fédéral veut éliminer un article "discriminatoire" du Code criminel
Toutes les pratiques sexuelles seront désormais traitées sur un pied d'égalité avec l'abrogation d'un article "discriminatoire" du Code criminel qui interdisait partiellement les relations sexuelles anales. C'est ce qu'a plaidé la ministre de la Justice du Canada, Jody Wilson-Raybould, mardi, après avoir déposé le projet de loi C-32 à la Chambre des communes. La mesure législative ne prévoit pas de pardon pour les personnes qui ont été reconnues coupables d'avoir enfreint l'article 159 du Code criminel dans le passé, selon ce qu'a indiqué la ministre. Elle a cependant fait remarquer que la disposition a été jugée "inconstitutionnelle" par plusieurs tribunaux à travers le pays. La Cour d'appel du Québec fait partie du lot. Les représentants de la communauté LGBTQ2 qui assistaient à l'annonce, mardi, au parlement, ont accueilli favorablement le dépôt du projet de loi C-32, qu'ils considèrent comme une avancée. Ils attendent maintenant que le gouvernement bouge dans un autre dossier, celui des excuses aux fonctionnaires et aux militaires remerciés en raison de leur orientation sexuelle. Ce dossier atterrira notamment sur le bureau du député Randy Boissonnault, fraîchement nommé conseiller spécial sur les enjeux de la communauté LGBTQ2 par le premier ministre Justin Trudeau. L'élu albertain, qui est ouvertement homosexuel, n'a pas voulu se prononcer sur un échéancier, mais il a dit avoir l'intention de "rectifier les injustices commises dans le passé". La Presse Canadienne (L'actualité); Canadian Press (Ottawa Citizen, National Post, CTV News); News 1130; International Business Times (2016-11-15; iPolitics; Le Devoir (2016-11-14)

Edmonton Centre MP named special advisor on LGBTQ2 issues
Prime Minister Justin Trudeau has named an Edmonton MP as his special advisor on LGBTQ2 issues. Randy Boissonnault will work with advocacy groups to promote equality for lesbians, gays, bisexual, transgender, queer and two-spirited people - a term used broadly to describe indigenous people who identify as LGBTQ. Boissonnault, who represents the Edmonton Centre riding, will also be tasked with addressing historical and current discrimination against LGBTQ2 people. He will, however, stay on as parliamentary secretary to the minister of Canadian Heritage. The announcement comes as the Liberal government prepares to introduce legislation to repeal a Criminal Code provision on anal intercourse. Canadian Press (CTV News); CBC News

Turkish-Canadian Davud Hanci held in solitary confinement: wife
The wife of a Calgary imam jailed in Turkey says he is being held in solitary confinement and she's worried about his well-being. Davud Hanci, who has Canadian and Turkish citizenship, was arrested in July shortly after a failed coup attempt. Rumeysa Hanci says she has not been able to speak to her husband in more than three months and says it's been like torture for her and their two young sons. She adds Canadian government officials have not had access to him and he has only been able to see his lawyer twice. Canadian Press (Metro News)

Russian minister held in biggest Putin-era corruption case
Russia detained Economy Minister Alexei Ulyukayev on charges of taking a $2 million bribe to approve a major privatization sale, setting off shock waves as the highest-level official to face such treatment in President Vladimir Putin's 16-year rule. Ulyukayev, 60, was detained on Monday "in the act" of receiving the cash, said Russia's Investigative Committee. He was later charged with demanding the money from Rosneft to allow its purchase last month of the government's 50 per cent stake in regional oil producer Bashneft, the agency said in a statement. The economy minister denies any wrongdoing, his lawyer Timofei Gridnev told Business FM radio. Investigators moved that he be held under house arrest before he arrived for arraignment Tuesday at Moscow's Basmanny Court. Hamilton Spectator

German police raid offices of Islamist group allegedly recruiting youths for Syria
The German government announced Tuesday it had banned an Islamic group, "The true religion," which is suspected of targeting teenagers to radicalize to fight in Syria and Iraq. At the same time, police raided about 190 offices, storehouses, mosques and apartments of members and supporters. In searches in 60 cities in western Germany and in Berlin, police seized documents, hard drives, smartphones and weapons, German Interior Minister Thomas de Maiziere said. Nobody was detained. The group -- also known as "Read!" -- has been distributing German-language copies of the Qur'an across the country. The interior minister said that more than 140 youths had travelled to Syria and Iraq to join fighters there after having participated in the group's campaigns in Germany. Associated Press (CP24; CTV News); Reuters (Reuters; CBC News)

Light sentences for 2 of 3 ISIS conspirators in Minnesota
A Minnesota man who admitted plotting to join the Islamic State of Iraq and Syria (ISIS) has been sentenced to time served by a judge who said he hopes to see the man rehabilitated. Abdullahi Mohamed Yusuf is the first of nine men being sentenced in Minneapolis this week in the plot. The 20-year-old pleaded guilty more than a year ago of conspiring to provide material support to ISIS, and testified against some of the others. U.S. District Judge Michael Davis sentenced Yusuf to the 21 months he's already served in jail, plus 20 years of supervised release. Davis said it didn't make sense to send Yusuf to prison because the government would miss a chance to help him. CBS News

MINISTER / MINISTRE

Confidentialité des sources: des journalistes réclament une loi fédérale
Le premier ministre Justin Trudeau, qui s'est présenté comme un défenseur de la liberté de la presse, doit joindre la parole aux actes et légiférer afin de protéger les sources confidentielles des journalistes. C'est ce qu'ont réclamé mercredi en conférence de presse au parlement trois journalistes qui ont vu cette liberté entravée, Patrick Lagacé, Ben Makuch et Mohammed Fahmy, ainsi que le directeur exécutif de Journalistes canadiens pour la liberté d'expression (CJFE), Tom Henheffer. Ils ont exhorté le gouvernement à déposer un projet de loi pour protéger les sources, à revoir la façon dont les mandats de

surveillance sont accordés et à abroger des éléments d'une loi fédérale sur la cyberintimidation qui abaisse le seuil de la preuve requise pour l'obtention de mandats. Ils estiment aussi qu'une enquête publique fédérale s'impose afin de déterminer si la Gendarmerie royale du Canada (GRC) et le Service canadien du renseignement de sécurité (SCRS) ont épié des journalistes au cours des dernières années. On a appris en mai dernier que des enquêteurs de la GRC ont pris en filature les journalistes Joël-Denis Bellavance et Gilles Toupin, du quotidien montréalais La Presse, pendant neuf jours en août 2007. Il y a environ deux semaines, le premier ministre Trudeau et son ministre de **la Sécurité publique, Ralph Goodale**, ont affirmé qu'aucun journaliste ne faisait actuellement l'objet d'une surveillance policière. La Presse Canadienne (L'actualité)

ISIS, ISIL or something else? Declassified documents reveal struggle over what to call terrorists
When a federal bureaucrat circulated a map depicting "the Islamic State's regional spread," an email soon followed from the Foreign Affairs Department saying the document had to be changed. "We do not recognize the group as 'The Islamic State' and it is important it not be suggested that we do," read the email, which proposed amending the wording to " 'the global ambitions of ISIL' or something similar." Declassified documents released under the Access to Information Act show how Canadian officials struggled with language as they drafted a key report on terrorism in the age of the Islamic State of Iraq and the Levant. Planning for the latest annual Public Report on the Terrorist Threat to Canada began in April 2015, during the final months of the Conservative government. But the process dragged on for so long it was not released until August 2016. Part of the back-and-forth about its contents concerned how to talk about ISIL. Officials wanted to draw attention to the growth of the terrorist group but wrestled with terminology. There was discussion about whether to use the acronym ISIS or ISIL. That was followed by debate over how to describe the group's origins. The reference to al-Baghdadi as "caliph" was cut and **Public Safety Minister Ralph Goodale** wrote in the final version that because ISIL was "neither Islamic nor a state" the report would instead use the term Daesh, an Arabic acronym. The Integrated Terrorism Assessment Centre's view that the "greatest threat" to Canada, as well as its allies, "comes from individuals inspired and directed by ISIL" never made it into the final report. Nor did a Global Affairs Canada passage about how the RCMP and **Public Safety Canada** were using community engagement to "redirect" those at risk of radicalization. "The purpose of these efforts is to reduce and stop ISIL recruitment in Canada" and discourage support for the group, it said. National Post

TOP STORIES / MANCHETTES

Crown withdraws terrorism peace bond against Toronto man once accused of communicating with ISIL
A part-time Toronto security guard and business student, Abdul Aldabous came to the attention of RCMP national security investigators last April when information surfaced that he was communicating with ISIL terrorists. His online confidants allegedly included the failed Canadian suicide bomber Aaron Driver, an American killed while attempting an ISIL-linked attack in Texas, a prominent ISIL fighter in Syria, and Britain's youngest convicted terrorist. When the RCMP arrested Aldabous on a terrorism peace bond in September 2015, a search of his computer turned up materials, including the Islamic State of Iraq and the Levant handbook, reflecting his support for what a court document called "the radical jihadist cause." But following his arrest, Aldabous went to see a psychologist and began counselling under the guidance of a prominent Toronto imam, Yousuf Badat. Now, fourteen months later, federal prosecutors have ended their case against him. The peace bond was withdrawn at Toronto's Old City Hall courthouse on Tuesday because the Crown felt that, due to the measures Aldabous had taken largely on his own initiative, there were no longer grounds to fear he would engage in terrorism. National Post

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

No reports of damage after earthquake rumbles across southwestern Yukon
Seismologists have upgraded the magnitude of an earthquake that has occurred in a remote area of southwestern Yukon. Earthquakes Canada says the magnitude is now measured at 5.0, up from an earlier estimate of 4.7. It occurred at 6:25 a.m. local time and was relatively shallow at just 2.5 kilometres

underground. It was centred 100 kilometres south of the village of Haines Junction near the Alaska border, and about 180 kilometres southwest of Whitehorse. An online post from Earthquakes Canada says no reports of damage have been received. Canadian Press (660 News)

Broken rail caused Wadena, Sask. train derailment
A broken rail, caused by a defect that went unnoticed, led to a serious train derailment near Wadena, Sask.,according to findings released by the Transportation Safety Board. "The investigation determined that the train derailed when a sudden and catastrophic failure of one of the rails occurred under the train, due to the presence of an undetected defect," said a statement from the TSB on Wednesday. "Poor rail surface conditions had masked the presence of this defect and reduced the effectiveness of visual inspections and ultrasonic inspections." CBC News; 650 CKOM; Global News; StarPhoenix

Wawanesa: We could have done better in Fort McMurray
Wawanesca Insurance has admitted that it could have done things better in its response to the devastating wildfires in Fort McMurray, and will undergo a review of its response to the disaster. "I think there's a lot of learning to do on this. It's tough," Graham Haigh, Wawanesa's vice-president of business development, told CBC News. "It really does kill both us and our staff when we are not producing service at a level that we would want to for our families," he continued. Wawanesa received 4,094 claims following the disaster, it said, and has settled 74% of them. InsuranceBusiness.ca

Surveillance watchdog says C-22 not likely to be abused

The man in charge of overseeing Canada's electronics surveillance agency says there is no reason to believe the government would abuse controversial provisions in its national security committee legislation that give ministers the power to refuse to disclose requested information. "I don't see why they would do that unless they are in bad faith, and I assume that everybody is in good faith unless the contrary is proven to me," said Jean-Pierre Plouffe, commissioner of the Canadian Security Establishment. "The fears we have are seldom realized to the same extent we had thought. Yes, it is a restriction, but it is a reasonable one." Bill C-22, currently being studied at the House of Commons public safety committee, would create a nine-member committee of parliamentarians tasked with monitoring and scrutinizing the activities of all government departments and agencies that engage in national security activities. While it would bring Canada up to speed among the Five Eyes intelligence allies (we are currently the only one without such a committee), opposition critics have raised red flags over several key components of the bill. First, the legislation would allow the government to appoint a chair of the committee as well as all of its members rather than allowing parliamentarians to vote to confirm them or allow committee members to elect their own chair. Second, the bill contains what some national security experts have dubbed "potential Mack truck exemptions" when it comes to giving ministers the power to refuse to disclose information the committee has requested. Third, it requires the committee to submit any reports it produces to the prime minister for vetting and requires that the committee scrub the report for issues the prime minister flags as potentially jeopardizing national security before the report can be presented to Parliament. Ian McPhail, chair of the RCMP's Civilian Review and Complaints Commission, was also at the committee and stressed the need for a continued discussion around the balance of privacy and civil liberties, and suggested the committee can play a leading role in leading that conversation for Canadians. "There is a constant tension between our commitment to civil liberties but also to the protection of Canadians in terms of national security issues," he said. "Exactly how that balance should be reached I would see as being one of the key purposes of this committee because the review bodies aren't able to perform that function. The committee, provided there's not undue partisanship, should be able to do so." The committee is working to complete hearings and move to clause-by-clause consideration by November 23. iPolitics

Le juge Jacques Chamberland présidera la Commission d'enquête sur la surveillance des journalistes

C'est le juge Jacques Chamberland, qui a fait carrière à la Cour d'appel, qui présidera la commission d'enquête chargée de lever le voile sur l'écoute policière des journalistes. L'exercice devrait durer un an, selon le mandat qui sera dévoilé aujourd'hui, a appris La Presse. Le nom de Jacques Chamberland avait été évoqué il y a quelques années pour la Cour suprême, il avait aussi été pressenti comme juge en chef de la Cour d'appel. Cette nomination sera saluée par le monde juridique. Il est passablement connu à Québec ; il était passé directement du cabinet Lavery, de Billy au poste de sous-ministre à la Justice sous le gouvernement Bourassa en 1988 - Herbert Marx était alors ministre de la Justice et procureur général. Premier haut fonctionnaire nommé à forfait, son atterrissage avait soulevé un peu de controverse. La Presse

Surveillance chill on writers and journalists Canada

A new survey of some 129 writers and journalists in Canada showed many were concerned about government, police, and corporate surveillance of their work and habits. Many said that changed what they wrote and how they did research, in other words, self-censoring their work. The survey was conducted by the Centre for Free Expression at Ryerson University, in collaboration with PEN Canada and the Canadian Association of Journalists. It showed that about a quarter of writers and journalists reported that they avoid writing about certain topics because of government and corporate surveillance. A fifth said they refrain from conducting internet searches or visiting web sites on topics that may be considered controversial or suspicious. Canada's top police officer is now lobbying the government for more power to access digital data saying they are being blocked in important investigations. Radio Canada International

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Canadian businesses must lobby U.S. to fight protectionism, diplomat says

Douglas George, consul-general in Detroit, says government does not expect 'protectionism and anti-trade sentiment' from U.S. to wane that do business across the Canadian-U.S. border must fight back against American protectionism by lobbying president-elect Donald Trump's White House, one of Canada's top diplomats says. Douglas George, consul-general in Detroit, told the Canadian Council for Public Private Partnerships conference in Toronto on Tuesday that the federal government will work with business to keep the lines of trade open."Protectionism and anti-trade sentiment have been pervasive throughout the election cycle, and we do not anticipate this sentiment will wane as we move forward," he said. (…) Still, Mr. George sounded a note of optimism, arguing that Mr. Trump's election will not destroy the bond between Canada and its largest trading partner. "Yes, there are going to be bumps along the road, but [Canada's ambassador to the United States, David MacNaughton] does not see the fundamentals of our relationship changing," he said. Globe and Mail

Trump team flags Canadian livestock and lumber as targets in NAFTA reset
Transition team memo obtained by CNN points to looming 'aggressive, protectionist approach' by U.S. president-elect, Canadian Chamber of Commerce head says. Canada's softwood lumber and livestock producers are being targeted by Donald Trump's transition team, which is advising the president-elect to extract terms more favourable to the United States in these areas in a renegotiation of the North American free-trade agreement. The head of Canada's largest business group says a transition team memo obtained by CNN suggests Washington is about to embark on an "aggressive, protectionist approach to trade both with Mexico and with Canada." Perrin Beatty, president of the Canadian Chamber of Commerce, said statements Mr. Trump made during the campaign suggest every aspect of Canada-U.S. trade is up for negotiation. Globe and Mail

In Ottawa, TPP's death could open the door to transparent trade dealing
Trade deal talks that take place behind closed doors with little public consultation or review foster a culture of mistrust. Donald Trump's surprise presidential election victory promises to result in an overhaul of U.S. trade policy, including the immediate end of support for the Trans-Pacific Partnership, the controversial trade pact involving 12 Pacific countries, including Canada, the United States and Japan. (…) Their ambivalence was not a function of trade skepticism - the Liberals emerged as enthusiastic backers of the Comprehensive Economic and Trade Agreement (CETA) between Canada and the European Union - but rather stems from the recognition that Canadian interests in the TPP were largely defensive in nature. With agreements already in place with many TPP countries, the agreement offered at best limited benefits for Canada's economy. Globe and Mail

'The American dream moved to Canada': One of Donald Trump's speechwriters sees Canada as a beacon
An opinion piece states, "For millions of Canadians aghast at the election of Donald Trump, the American voters' choice of their next president seemed not just astounding, but entirely foreign-perhaps comfortingly so. While federal Conservative leadership aspirant Kelly Leitch might talk in a Trump-like vein about subjecting would-be immigrants to some sort of values test, she is easily dismissed as an outlier. Our more traditional, well-mannered Tories would never, Canadians might reassure themselves, slide toward the U.S. president-elect's angry brand of right-wing populism. (…)He concludes that a major factor explaining the difference is Canadian immigration policy. Starting in 1962, federal policy emphasized accepting immigrants based on their skills, and in 1967 a "point system" was introduced that rated would-be immigrants on factors including education, occupational skills, employment prospects, age and proficiency in English and French. To this day, Canada accepts a far larger proportion of immigrants than the U.S. does based on the likelihood that they will succeed economically. Buckley calls it "a system Donald Trump would love." Macleans

What happens when the walls go up: Trump has promised to tear up trade deals. How will an open economy like Canada cope?
An opinion piece states, "It's often said, in reference to the economy, that when the U.S. sneezes, Canada catches a cold. Well, in the words of Samantha Bee, the sharp-tongued comedian and former Daily Show correspondent (and Hillary Clinton supporter), U.S. voters "just hoicked up a marmalade hairball." (…) That's obviously not great for Canada, a self-described "trading nation" and a NAFTA member alongside Mexico. More than 75 per cent of our exports head to the United States. Complex

products like automobiles are effectively manufactured in both countries simultaneously, with engine parts and upholstered interior pieces whisked back and forth across the border by trailer truck. No wonder, then, Prime Minister Trudeau last week struck a conciliatory tone by saying "if the Americans want to talk about NAFTA, I'm more than happy to talk about it." (…) "The supply chains that run through Canada, the U.S. and Mexico are unbelievably intricate," Wolf says. "The auto industry is probably the best example. A spider couldn't weave a more interesting web. Look at the Ambassador Bridge in Windsor and how much stuff is moving back and forth." Macleans

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Tips on protecting devices from hackers
Billions of fitness trackers, medical implants, surveillance cameras, home appliances, thermostats, baby monitors and computers in automobiles now are connected as part of a rapidly expanding "internet of things." But many such devices were developed without security considerations. As a result, they are prime targets for hackers. Tips to protect your devices: Associated Press (St. John's Telegram)

Prediction: The Internet Will Get Shut Down Many More Times in 2017
It is a great irony that a system designed to withstand nuclear war falls so easily victim to a stampede of beeping baby monitors and webcams. We're talking about the Internet, of course. In October a number of top websites—Twitter, Amazon, Spotify, and more—were knocked offline when a sprawling botnet attacked New Hampshire-based Dyn DNS, a firm that serves as an Internet switchboard. An army of hijacked Internet of Things devices swarmed this choke point with overwhelming traffic. The result? A massive Internet outage. Now, far from being fixed, the problem compounds each time an unsecured device—surveillance cameras, toasters, and other home appliances—rolls off the production line with a weak default password. With billions of connected "things" entering the grid, it's open season for hackers. Fortune (2016-11-15); Infosecurity Magazine

The Web-Shaking Mirai Botnet Is Splintering—But Also Evolving
Over the last few weeks, a series of powerful hacker attacks powered by the malware known as Mirai have used botnets created of internet-connected devices to clobber targets ranging from the internet backbone company Dyn to the French internet service provider OVH. And just when it seemed that Mirai might be losing steam, new evidence shows that it's still dangerous—and even evolving. Researchers following Mirai say that while the number of daily assaults dipped briefly, they're now observing development in the Mirai malware itself that seems designed to allow it to infect more of the vulnerable routers, DVRs and other internet-of-things (IoT) gadgets it's hijacked to power its streams of malicious traffic. That progression could actually increase the total population available to the botnet, they warn, potentially giving it more total compute power to draw on. Wired (2016-11-15)

LAW ENFORCEMENT / APPLICATION DE LA LOI

Sask. Mounties on the hunt for police impersonators
The Mounties are looking for two people accused of impersonating police officers several weeks ago in east-central Saskatchewan. Two people were spotted outside a rural home in the rural municipality of Bjorkdale, about 180 kilometres southeast of Prince Albert, on Sept. 27. They had allegedly gone into somebody's vehicle when they were confronted by the owner of the property. The man and woman identified themselves as police officers. They were wearing clothing that may have been intended to look like an RCMP uniform. For instance, both were wearing pants with yellow stripes down the side, according to witnesses. CBC News; 650 News

Perquisition à Trois-Rivières: un réseau international de fraude démantelé
C'est un réseau international de fraudes qui a été démantelé mardi, un peu partout dans le monde, menant notamment à une perquisition sur le boulevard Saint-Michel à Trois-Rivières. La centrale d'information policière Europol a révélé mercredi matin que le réseau recrutait notamment des mineurs pour parvenir à ses fins. Au total, 15 personnes ont été arrêtées au cours de perquisitions qui ont eu lieu

simultanément au Canada, en Finlande, en Espagne et au Royaume-Uni. Pour le moment, nous ne savons pas si des personnes mineures ont été arrêtées à Trois-Rivières ou si la résidence visée faisait seulement l'objet d'un mandat de perquisition. Rappelons qu'une autre opération de même nature a aussi eu lieu à Longueuil, mardi. (…) La GRC, qui a participé aux perquisitions au Canada à la demande d'Europol, devrait faire le point un peu plus tard mercredi sur les opérations menées à Trois-Rivières et sur le niveau d'implication des personnes visées par les mandats dans la région. Le Nouvelliste

Les Soldats d'Odin, groupe anti immigration, anti réfugiés, sont maintenant présents au Yukon
Si, sur la scène internationale, le Canada reçoit des éloges pour son ouverture aux réfugiés – le secrétaire général des Nations unies, Ban Ki-moon a même fait l'éloge du Canada en ce sens – voilà que des groupes qui sont contre cette politique canadienne voient le jour un peu partout au pays. Selon la page Facebook du groupe et selon la Gendarmerie royale canadienne, l'organisation « The Soldiers of Odin » est un regroupement de personnes résolument anti immigration – en anglais, les termes utilisés sont « extreme anti-refugee vigilante organization. » On s'attendrait à voir surgir des groupuscules du genre dans les grandes villes, là où l'immigration est la plus présente, mais, au Yukon? En effet, la police fédérale canadienne affirme qu'un tel groupe a été constitué à Yellowknife, capitale du territoire nordique du Yukon. Radio-Canada International

Nunavut RCMP must learn better ways of handling the mentally ill, jury says
The jury that sat on a coroner's inquest into the 2012 death of a Nunavut man with serious mental health issues says the RCMP must find non-violent ways of dealing with people who are mentally ill. The six-member jury in Igloolik heard testimony about the death of Felix Taqqaugaq Nov. 1 to Nov. 10 from about 30 witnesses. Taqqaugaq died March 20, 2012, when an Igloolik RCMP officer shot him three times in the chest. "The [Government of Nunavut's] and the RCMP's goal must be zero shooting deaths for incidents where police interact with individuals with mental illness," one recommendation said. The inquest, which was mandatory because Taqqaugaq died at the hands of police, does not assign responsibility. Nunatsiaq Online

Did Canada's failure to fix policing problems in the North lead to the death Lena Anderson?
On a cold night in Feburary 2013, Lena Anderson tied the drawstring from her pants to a bar in the back of a police truck and hanged herself. Anderson was 23, and a mother. An inquest into the circumstances of her death wrapped up in Thunder Bay, Ont., with 28 recommendations to prevent her tragic death from happening again. A jury of five heard five days of testimony from 12 witnesses, including how Anderson was handcuffed and detained in the back of a Nishnawbe-Aski Police Service (NAPS) truck on Feb. 1, 2013. The police officer on-duty in the First Nations community Kasabonika left Anderson alone in the truck for 16 minutes. Anderson had been struggling with the recent suicides of two loved ones when she died. APTN (2016-11-15)

Kelowna could soon have new top cop
Kelowna is closer to getting a new police chief. The search for a new superintendent began in late September following the sudden resignation of Kelowna's former top cop, Nick Romanchuk. Kelowna Mayor, Colin Basran, said they've whittled the list down to a few candidates. "I believe the shortlist is four. They will all be coming to Kelowna for interviews with RCMP officials and City of Kelowna officials. Afterwards, a decision will be made jointly between the RCMP and the City of Kelowna as to who the new superintendent will be," said Basran. Global News

Rotary Fundraiser Luncheon Focuses On D.A.R.E. Program
The annual South Eastman Rotary fundraiser luncheon for the RCMP Drug Awareness Resistance Education program was held at the Mennonite Heritage Village on Tuesday. Rotary Club President Corny Petkau says when the club was founded in the Southeast they were looking for a good cause to support. He notes the RCMP D.A.R.E. program was a perfect fit for the Rotary Club. "Sometimes you wonder when you are phoning people and asking for funds if it is worth it or not but every time it is done and when we see the results in the kids, the teachers show us what the kids have learned, it is very well worth it and it is a big honour to be involved with that." Steinbach Online

No new trial for roommate torturer Dustin Paxton: Alberta Court of Appeal
Convicted roommate torturer, Dustin Paxton's aggravated and sexual assault convictions have been upheld by the Alberta Court of Appeal. The Alberta Court of Appeal released its decision on Wednesday, one month after hearing arguments from Paxton's lawyers and Crown prosecutors. In 2010, Paxton dropped off his victim at a Regina hospital weighing just 87 pounds, disfigured from daily beatings and with permanent brain damage. Paxton, 36, was deemed a dangerous offender and handed an indeterminate sentence in 2012 after being convicted of assaulting his victim and business partner over an 18-month period. CBC News; Canadian Press (Metro News, Global News, News1130, Chronicle Journal)

Man who assaulted teen gets early parole
A man who sexually assaulted an intellectually challenged teen has received day parole 16 months into his five-year sentence. Anthony Leo Gough, 50, of Middle Sackville, pled guilty in July 2015 to the sexual exploitation of a girl he was responsible for at the Social Opportunities and Recreation Society day camp. In a Parole Board of Canada decision, Gough was put on day parole in a community-based residential facility for a six-month term. He was ordered to avoid children and his victim and her family. The board said letters of support from Gough's family had come in, although he did not write on his own behalf. Chronicle Herald, A3

How to Prepare for Prison: Start by cutting your hair
Courtney Hills stole $950,000 from her employer in Calgary and pleaded guilty. As she waits to be sentenced, she meets with a prison consultant, Lee Chapelle, who spent 21 years behind bars. (According to this doc from director Matt Gallagher, rising incarceration rates in North America have turned prison consultancy into a cottage industry.) "So, haircut tomorrow," Lee says to Courtney, who is 20-something, with long hair. "We know why we do this: manageability, potential lockdown, lack of shower time, plus eliminate any chance of somebody being able to use it physically against you, grabbing your hair." In an interview for the camera, Lee explains, "Prison changes people. You put on a mask to survive. You don't cry, you don't smile. As time passes, this is no longer an act. This becomes the person." "I have to become someone I'm not but not lose the person I was," Courtney says. (…) Despite its promising title, this is film is not that. Instead, it decries a system that sends non-violent offenders to prison and then, somewhat cruelly, tries to manufacture suspense about what kind of sentence Courtney and two other accused criminals might get. It should have been called, *I Wish Someone Had Scared Me Straight, But Now It's Too Late*. The documentary *How to Prepare for Prison* aired on TVO Nov. 16. Toronto Star

Sex offender's library access under appeal
Is a public library a community centre? That's one of the issues judges of the province's top court will ponder as they decide whether or not an order that prohibited a Regina pedophile from attending community centres also extends to the Regina Public Library (RPL). The Crown is appealing a lower court decision that acquitted Robert Keith Allaby, 53, of breaching that prohibition order. But Allaby's lawyer says his client was specifically ordered to stay away from "community centres" - not "libraries" - and he so complied. The Saskatchewan Court of Appeal reserved decision after hearing arguments Tuesday. If the Crown's appeal is successful, it wants Allaby tried again. (…) The National Parole Board, which revoked his parole in March 2010, subsequently added a parole condition that expressly forbid him from entering libraries. However, when Allaby moved to Regina in 2014, he was no longer on parole, so wasn't bound by that condition. However, the lifetime prohibition order remains. Leader-Post, A2

Stuck in solitary
A letter to the editor states, "I am more than disgusted by the facts revealed in "1,560 days" (National, Nov. 14) about the treatment of Adam Capay in our prison system, and the excessive use of solitary confinement. How can we be doing this? We wouldn't treat dogs this way! It is reprehensible that the people responsible for this (who seem to all be passing the buck) are not being removed from their positions immediately. How can we call ourselves a progressive and humane country when this kind of thing is occurring? What we are doing is torture, plain and simple!" Macleans

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

Intoxication aux opioïdes : 13 Canadiens hospitalisés chaque jour
Le Canada traverse une crise de santé publique en raison de la hausse des préjudices associés aux opioïdes, conclut un nouveau rapport de l'Institut canadien d'information sur la santé (ICIS) et du Centre canadien de lutte contre les toxicomanies (CCLT). Selon le rapport *Hospitalisations et visites au service d'urgence liées à une intoxication aux opioïdes au Canada*, à l'échelle du pays, le nombre d'hospitalisations du genre a augmenté de plus de 30 % entre 2007 et 2015, tandis que les intoxications aux opioïdes entraînent plus de 13 hospitalisations par jour. Les taux de préjudices liés aux opiacés sont plus élevés dans l'ouest du pays, souligne le rapport, notamment en Saskatchewan (20,5 hospitalisations pour 100 000 habitants), en Colombie-Britannique (19,1 hospitalisations pour 100 000 habitants) et en Alberta (18,6 hospitalisations pour 100 000 habitants). Le Québec était la province avec le plus faible taux d'hospitalisations (9,7 préjudices pour 100 000 habitants), et ce, tout au long de la durée de l'étude. Alors que le taux d'hospitalisations liées à une intoxication aux opioïdes a augmenté parmi tous les groupes d'âges, les jeunes de 15 à 24 ans ont affiché le changement le plus marqué, soit une hausse de 62 % par rapport à 2007-2008. Il s'agit également de la tranche d'âge où les intoxications sont majoritairement le résultat d'un geste intentionnel (52 %). Radio-Canada ; CBC News; StarPhoenix; Vancouver Sun

Ottawa would've taken 'greater action' if opioid crisis struck Ontario as it has B.C.: Terry Lake
Would the federal government have taken quicker action if the opioid crisis had struck Ontario with the same magnitude as British Columbia? That's what B.C.'s Health Minister thinks. Speaking from Ottawa at a joint provincial-federal opioid conference, B.C. Health Minister Terry Lake says Ottawa needs to increase RCMP resources, ban pill presses, repeal Bill C2 and establish national surveillance of overdoses. "I don't think it's hit Ontario the way it's hit British Columbia, if it had I think we would see much greater federal action and so we are really pushing the federal government to take greater action than they have to date." He says Ottawa needs to amend legislation and increase resources to tackle the overdose epidemic. "We need more RCMP resources, we need legislation banning pill presses, we need the repeal of Bill C2 which prevents us from setting up safe consumption sites where they are needed, and we need national surveillance of opioid overdoses." CKNW

Hospital stays for opioid overdoses on the rise, warn health researchers
Slow breathing. A lack of oxygen. Blue discoloration. For Ottawa paramedic JP Trottier, the telltale symptoms of an opioid overdose are becoming all too common. "Our paramedics find the patient hypoxic, blue in colour ... they're breathing at four or six breaths a minute, certainly not enough to maintain life," said Trottier. This year Ottawa is on pace to see twice as many opioid-related 911 calls as the previous year, Trottier said. And they aren't the only emergency responders seeing a spike in recent years, if a study published Wednesday is any indication. The rate of opioid overdoses requiring hospitalization is on the rise in nearly every province, according to a new national study by the Canadian Centre on Substance Abuse and the Canadian Institute for Health Information. (...) Seniors age 65 and older had the highest rate of hospitalization, at 20 per 100,000 people, with the most common cause being "accidental" overdoses, due to confusion or misunderstanding about how to take prescribed drugs. The next biggest age group was youth, age 15 to 24. They were hospitalized at a rate of 10 per 100,000, with more than 50 per cent of the cases categorized as "intentional," meaning the person admitted to using the drug to "self-harm." But young people also had the biggest increase in hospital stays as a result of opioid poisoning, up 62 per cent compared with 2007-08. CBC News

Opioid crisis growing here, paramedics warn
Winnipeg paramedics are rushing to more homes where partygoers are daring death by using opioids such as fentanyl. The first report to examine Canada's growing epidemic of the use of synthetic narcotics such as fentanyl was released today, but city paramedics said they don't need statistics - they have seen overdose scenarios that shock veterans of the job. "From a front-line paramedic side, the calls with fentanyl and carfentanil, you don't know who your patients are. You have to assess everyone," said Ryan

Woiden, local 911 paramedics union president. "You walk into a house party and everyone has sunken eyes. They're all very pale, they're all nodding off, walking slowly, talking slowly and you don't know how many patients there are. "When I started, or even a year ago, you'd walk into a house party and there'd be boozing, loud music, someone getting sick in a corner, and you'd know who your patient was," Woiden said. He said he's gone to suburban house parties, including ones with young adults headed out for a night of clubbing. They start off with drugs such as fentanyl or carfentanil, to get a buzz on, not realizing the dangers or knowing what the drugs are. The stronger the buzz, the more deadly it is, Woiden warned. "This is no party drug. This drug will kill you. This drug is going to depress your breathing until you stop breathing," he said. Winnipeg Free Press, 1

VPD issue warning following string of drug overdoses
Vancouver police have issued another warning after 11 overdoses were reported in a single day in the city's Downtown Eastside. The move prompted the province's opposition party to call for more help for addicts and underscored the danger facing drug users ahead of a federal conference on the opioid crisis.Police issued the warning after a series of non-fatal overdoses on Monday, echoing previous notices from police and health officials, who have urged users not to inject when they are alone and to watch for overdose symptoms. Meanwhile, the city's supervised injection site saw 28 overdoses on Monday - none fatal. Federal Health Minister Jane Philpott will host a conference this weekend in Ottawa to discuss a crisis that has killed hundreds in British Columbia alone and resulted in thousands of overdoses, taxing police, fire and emergency health departments. Globe and Mail, S1

Estevan receives funding for officers
The Estevan Police Service (EPS) has received $330,000 in provincial funding for three police officer positions. Police Chief Paul Ladouceur said the money will support EPS community liaison officer Const. Danielle Stephany, as well as their drug and intelligence officer position and one of the EPS officers who are part of the Estevan Combined Traffic Services unit. Estevan Mercury

Police seek $1.2M increase for 2017 budget
City police will ask for a $1.2 million increase to its 2017 operating budget. Thunder Bay city council approved a $39 million 2016 budget for the Thunder Bay Police Service, but the force was unable to work within that budget and are projecing a shortfall of nearly $815,000 for the year, which is about two per cent of its total budget. During the Thunder Bay Police Services Board meeting Tuesday, Chief J.P. Levesque stated that they need more money to cover the increasing legal fees, which he believes will help alleviate the pressures it has felt over the past few years. TB News Watch (2016-11-15)

Halifax sees upswing in homicides
Homicides in Halifax are trending upward again, according to information from Statistics Canada and the Halifax Regional Police. On Tuesday evening, police confirmed Terrance Patrick Izzard, 58, was the city's latest homicide victim. His death brings the total number of homicides in Halifax this year to 11. That's already two more than last year and six more killings than the city saw in 2014. While it's an upward swing, its not a record for the region. According to Statistics Canada, 18 people were killed here in 2011. Former Saint Mary's University president Owen Carrigan sat on both the provincial and municipal task forces on crime and violence in the province. He says it's not possible to know whether the numbers are a new normal or an outlier. A comparison with Canada's national homicide rate between 2006 and 2014, also doesn't put Halifax in a favourable light. Statistics Canada's numbers show that the rate of homicides per 100,000 people in Canada in that period, varied between one and two homicides. Halifax has spent time above and below the national rate. Its highest rate was in 2011 with more than four homicides per 100,000 people. The lowest rate in that period was just over one homicide per 100,000 people in 2014. Global News (2016-11-15)

Bernstein: We asked the Ottawa police for crime stats, but the data are unreliable
An opinion piece states, "Ottawa has experienced a wave of media headlines profiling multiple violent crimes in our downtown core in recent weeks. Based on these stories alone, one might think Ottawa is a dangerous place to live. The reality is that our communities have no clear picture of the crime problem. Where knowledge and evidence should inform action, there is a frustrating lack of reliable data from the city and the Ottawa Police Service regarding crime rates in our neighbourhoods. Ottawa can do better.

The Police Services Board is meeting at the end of the month to review the 2017 departmental budget. They have an opportunity to increase funding of the police service's data capacity, in order to produce better information to direct policing action and to make reliable neighbourhood crime data available to the public. (…) Our search for reliable crime data initially brought us to the ByWard Market Safety and Security Committee and Crime Prevention Ottawa, neither of which had access to data on actual crime rates in our neighbourhood. We then turned to the most logical place for crime numbers – the police. The Ottawa Police Service directed us to two data collections available on their website; both are seriously flawed. The Crime Mapping Tool shows police calls-for-service from the public and displays them on a city map for the previous 15 days. The tool itself is preceded by a page of disclaimers explaining why the data is unreliable. The section of the map covering Lowertown is always crowded with icons, making the area look like a hotbed of crime. However, many of the calls-for-service are reported more than once, and some turn out to be of insufficient severity to actually open a police file. " Ottawa Citizen

Broadcast Media / Médias télédiffusés:

A new report from the Canadian Institute for Health Information says this country is facing a public health crisis over opioids. It says 13 Canadians are hospitalized every day for opioid poisoning. And here's a fact that may surprise you: the majority of them are seniors. (CBC News, 10:20EST)

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

B.C. limits on federal probe vex advocates
The B.C. government has issued an orderin-council that some legal advocates fear places new restrictions on the national inquiry into missing and murdered indigenous women. Attorney General Suzanne Anton said the order-in-council confirms the province's support for the inquiry by giving commissioners the power to examine relevant matters within B.C. "It gives them the authority that a provincial commission of inquiry would have," she said. But West Coast Women's Legal Education and Action Fund and the B.C. Civil Liberties Association both expressed concern Tuesday that the B.C. order comes with conditions attached. "I'm happy that they've committed to participating," said Kasari Govender, executive director of West Coast LEAF. "I'm less happy about the additional restrictions they placed on the terms of reference." She said the federal terms of reference already made clear that the inquiry will not reopen specific cases. The B.C. government's additional terms go beyond that by indicating that the commission "may not inquire into any matter respecting the exercise of prosecutorial discretion," she said. Times Colonist, A4

L'Assemblée des Premières Nations accuse Couillard de se trainer les pieds
Le PQ ainsi que l'Assemblée des Premières Nations du Québec et du Labarador (APNQL) réclament une enquête indépendante sur le sort réservé aux femmes autochtones. L'APNQL souhaite cependant que le mandat de cette enquête soit élargi à « tous les aspects des relations entre les services policiers et les Premières Nations ». « Le gouvernement Couillard refuse de faire face à ses responsabilités, la majorité des services policiers étant sous son autorité, a déclaré le chef de l'APNQL, Ghislain Picard. [Le gouvernement Couillard] a plutôt choisi de se cacher derrière l'enquête policière menée par le SPVM. » (…) L'APNQL accuse le gouvernement du premier ministre Philippe Couillard de gagner du temps au détriment des femmes autochtones. « Il [le gouvernement] souhaite également attendre […] les résultats de l'enquête déclenchée par le gouvernement fédéral sur les femmes et les filles autochtones disparues ou assassinées, soit dans deux ou trois ans! » Radio-Canada; CBC News; 98.5FM; Presse canadienne (La Presse)

BC Liberals reach into aboriginal governance ranks for northwestern B.C. candidate
The BC Liberals, for the second time, have reached into the ranks of northwest aboriginal governance for a candidate for next May's provincial election. Wanda Good, the deputy chief councillor for Gitanyow, located north of Gitwangak on Hwy37 North, has been selected as the party's candidate for the Stikine

riding. In a release Good said she was honoured to be a BC Liberal candidate. "Working in collaboration with the province, municipalities, and First Nations, I have been able to bring positive change to northwest BC. Now, I'm ready to step up and be a strong voice in Victoria for the Stikine riding, which has been underrepresented in government for too long," she said in the statement. (…) Good's also been very active in the cause of missing and murdered women along Hwy16 – a cousin, Lana Derrick, a 19-year-old college student, was last seen in Thornhill in the fall of 1995. Terrace Standard

Quebec needs an inquiry into Indigenous/police relations
An opinion piece states, "Quebec crown prosecutors won't be laying charges in 37 abuse complaints by Indigenous women against six Sûreté du Québec police officers in Val d'Or. Stop me if you've heard this one, or something similar, when it comes to a) complaints against police; b) complaints by Indigenous women; c) complaints by women who say they've been sexually assaulted. (…) The Couillard government and native affairs minister Geoff Kelley have tried to sideline the demand by palming it off on the federal government inquiry into Missing and Murdered Indigenous Women, but chief Ghislain Picard, leader of the Assembly of the First Nations of Quebec and Labrador, told *Le Devoir* this week that "we will continue to ask for an investigation. "There is nothing that prevents the government from carrying out an inquiry that is specific to Quebec, even as it feeds into the national inquiry." Quebec, he added, was trying to find comfort by hiding behind the MMIW probe. Indeed, although the mandate of the MMIW will no doubt lead it to examine the role of police in investigating the deaths and disappearances of anywhere from 1,200 to 4,000 First Nations women, a Quebec commission would have a much broader mandate." Cult Montreal

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Medical marijuana user warns about cannabinoid hyperemesis syndrome
Halifax woman say she vomited 'all day long' for eight months until specialist made diagnosis. A Halifax woman says she threw up "all day long" for eight months straight — and her medical marijuana is to blame. It wasn't until a specialist diagnosed Dawn Rae Downton with cannabinoid hyperemesis syndrome, and she stopped taking marijuana entirely, that she says the vomiting finally ended." Vomiting and just a complete malaise, I was bedridden most of the time," she said of the period she took marijuana. The condition, which was first documented in 2004 and has not been widely researched, is characterized by cyclical bouts of nausea, vomiting and gastrointestinal discomfort, said Toronto family doctor Peter Lin. If it occurs often enough, it can lead to things like weight loss, dehydration, and vomiting blood, said Lin, who is also a health columnist for CBC. CBC News

Major Businesses That May Benefit After Canada Legalizes Recreational Marijuana
In October 2015, Canadians elected the Liberal Party of Canada and their leader, Justin Trudeau, as the majority government and Prime Minister, respectively. A campaign promise of Prime Minister Trudeau was to legalize and regulate the use of recreational marijuana in Canada. Medical marijuana was and still is legal in Canada nationwide (with the proper prescription). Unlike the United States, Canada's Criminal Code is federal legislation. (…) Papa John's owns a lot of joint-venture stores in four states, including Colorado. So while we cannot get Colorado-specific numbers from the filing, we can look at how that group of four states did after marijuana legalization and compare it to the company as a whole. In the company's 10-K for the year ended December 28, 2014, the company gave a breakdown of its joint venture stores in four regions, including Colorado. Seeking Alpha

Marijuana stocks trading halted on TSX after massive jumps of up to 44% trip circuit breaker
Stock trading for several Canadian marijuana companies was halted briefly this morning, following massive increases in value in high volume trading. Canada's publicly-traded marijuana companies, including Aphria Inc., Mettrum Health Corp., Organigram Holdings Inc., Supreme Pharmaceuticals Inc., Aurora Cannabis Inc. and Canopy Growth Corp. were all halted for five-minute intervals before 11 a.m. Wednesday morning. The Investment Industry Regulatory Organization of Canada issued halt and resumption notices, giving the reasoning "single stock circuit breaker," for each. Circuit breaks can be triggered when a stock climbs at least 10 per cent in a five-minute period, which appears to be the case with the six marijuana stocks Wednesday. "IIROC can make a decision to impose a temporary

suspension (halt) of trading in a security of a publicly-listed company. Trading halts are implemented to ensure a fair and orderly market," the statements read. Vancouver Sun

Medical marijuana clinic sets its sights on a Rupert office
A medical marijuana company wants to plant seeds in Prince Rupert by opening a clinic by the end of the year. The Medicinal Cannabis Resource Centre Inc. (MCRCI) has been in business for six years and has clinics in Vancouver, Kamloops, Kelowna and Winnipeg. A physician-based medical marijuana clinic would be the first of its kind in the city, and will offer its service to surrounding communities including Haida Gwaii and Terrace. The company set its sights on Prince Rupert after opening the clinic in Winnipeg, said Ron Bell, director of business development for MCRCI. "We got involved in some of the issues around Indigenous peoples, smaller communities and under-serviced areas," he said. When they began to consider northern B.C. as their next site, they found a physician in Prince Rupert who was willing to work with them. Northern News

Canadian peacekeepers to Mali: deadly possibility
After the previous Conservative government scaled back Canada's peacekeeping missions, the current Liberal government subsequently announced a new commitment to international peacekeeping. In addition to contributing millions of dollars to UN peacekeeping, the announcement indicated Canada would commit some 600 soldiers and additional police to a United Nations mission in Africa. All signs seem to point to a mission to Mali where the Canadian defence minister visited this month and where a Canadian reconnaissance team also visited earlier. That country has been in a state of war and conflict for the past five years, with terrorists and rebel factions having killed some 100 UN peacekeepers since 2013, after French and Mali forces pushed back against radical Muslim forces which had taken over a large area of northern Mali. Some 30 peacekeepers have been killed this year alone. Radio Canada International

German court rejects opposition's bid for disclosure of NSA spy targets
Germany's highest court has rejected a bid by opposition politicians to make the government disclose spy targets it worked on with the U.S. NSA spy agency to a parliamentary commission investigating the NSA's activities in Germany. Germany began an investigation after news in 2015 that the Bundesnachrichtendienst (BND) foreign intelligence agency had helped the NSA spy on many European companies and politicians. German politicians and other critics also argue that a law passed in October after NSA whistleblower Edward Snowden's disclosures about U.S. spying on Chancellor Angela Merkel, will make oversight of the BND harder. The government says it will do exactly the opposite. Reuters; Deutsche Welle (2016-11-15)

L'immigration irrégulière au Canada décortiquée en 5 questions
La question des immigrants illégaux est un enjeu majeur aux États-Unis. Durant la campagne, Donald Trump a promis d'expulser les 11 millions de sans-papiers. Qu'en est-il au Canada? L'immigration irrégulière est-elle un problème?... 4. Que fait le gouvernement? Si le nombre d'expulsions a fortement diminué au cours des dernières années, il n'y a pas de raison de s'inquiéter, croit l'ASFC, qui soutient que la priorité est accordée « au renvoi des personnes qui constituent une menace pour la sécurité

nationale [en raison d'actes terroristes, de crimes de guerre ou d'atteintes aux droits humains] et des personnes qui sont impliquées dans le crime organisé ou qui ont commis des actes criminels. » Le syndicat des douaniers pense plutôt que cette baisse est le résultat des compressions budgétaires du gouvernement Harper qui ont entraîné la suppression d'un millier de postes. Jean-Pierre Fortin, président national du Syndicat des douanes et de l'immigration, soutient qu'il est pressant d'agir parce que le nombre de migrants irréguliers ira en augmentant si rien n'est fait. Le gouvernement de Justin Trudeau veut agir en amont, en diminuant le nombre de personnes qui restent au pays illégalement. **Le ministre de la Sécurité publique et de la Protection civile, Ralph Goodale**, a déposé en juin dernier un projet de loi qui vise, entre autres, à identifier les étrangers qui demeurent au Canada après l'expiration de leur visa. L'ASFC aura la tâche de recueillir « les données biographiques » de tous les voyageurs à leur sortie du Canada. ***« Lorsque le projet de loi sera adopté, le Canada saura à quel moment et à quel endroit une personne est entrée au pays, et à partir de quel moment et de quel endroit elle a quitté le pays »,*** indique le communiqué du **ministère de la Sécurité publique.** Radio Canada

Plus de 10 000 foyers toujours privés d'électricité dans la région de Québec
Quelque 200 équipes d'Hydro-Québec s'affairent toujours à rétablir le courant pour plus de 10 000 résidences qui sont privées d'électricité dans la région de Québec, samedi, au surlendemain de la première vraie bordée de neige de l'hiver. Sur le coup de midi samedi, 10 028 clients étaient toujours privés de courant, près de 50 heures après la tempête. Le poids de la neige et les branches tombées sur les fils électriques sont à l'origine des pannes… Les secteurs de Stoneham-et-Tewkesbury, Saint-Gabriel-de-Valcartier et la MRC de Portneuf sont particulièrement touchés. Radio Canada

Sinkhole shuts down Highway 4 east of Ucluelet Junction
People living in Tofino and Ucluelet are virtually cut off from the rest of Vancouver Island due to a washout on Highway 4. The portion of the highway near Kennedy Lake, about five kilometres east of Ucluelet Junction, has been shut down since Friday afternoon. According to people in the area, the road was initially open to a single lane, alternating traffic. However a sinkhole apparently expanded and closed down the highway completely. It's believed to be more than nine metres deep. A Geotech assessment was scheduled for Saturday morning. CTV News; Canadian Press (Vancouver Sun); CBC News

STARS, emergency personnel dispatched to school bus rollover carrying 25 kids
Dr. Myron Thiessen, the Chief Medical Officer for Interlake Eastern Regional Health Authority, confirmed a school bus carrying 25 children rolled over near Matheson Island, roughly 235 kilometres north of Winnipeg. Six ground units are on the way to the scene. STARS ambulance was also dispatched. Thiessen said there are other life flight units on standby to assist if necessary. CTV News

Rescuers in northwestern B.C. search remote highway for missing U.S. man
A search was underway along a remote northwestern B.C. highway for a 70-year-old Alaska man who was last seen on the route Monday. A news release from the RCMP says family members report Tony Adevai was driving from Oregon to his home in Alaska when he disappeared… They say it's possible that Adevai was picked up by another driver, but dog teams and search volunteers are scouring the Iskut area, where Adevai's truck was found. Canadian Press (Vancouver Sun)

Nelson House teacher believed to have fallen through ice: Chief
A Nelson House teacher who has been missing since Thursday, is believed to have fallen through the ice while riding his snowmobile… Moody told CTV there are snowmobile tracks leading to a hole in the ice.

He said a local search team is ready to be deployed, but due to freezing rain and mild temperatures, they can't set out… Moody said he's waiting for an RCMP dive team out of Winnipeg to help locate MacDonald. The RCMP Underwater Recovery Team is expected to be in the community on Monday to help with the search efforts. CTV News

More than 100 people join search for missing Bryan Balong
With piles of posters and a set plan, more than 100 people took to the streets around Winnipeg searching for 33-year-old Bryan Balong. Balong has been missing since Nov. 22. His brother Brad organized the searched with the help of family and friends. "I am hopeful, everybody is here. We are just going to keep searching," Brad Balong said. CBC News; CTV News

Le Canadien kidnappé en Libye raconte son histoire
Lorsque ses bourreaux l'ont conduit dans le désert de la Libye et lui ont dit de s'agenouiller dans le sable, le Canadien Frank Poccia croyait que ses sept semaines de captivité prenaient une fin tragique. Assis par terre et entouré d'individus armés jusqu'aux dents, M. Poccia s'est dit que la fin était proche. Il s'attendait à mourir. Mais au lieu de cela, le Canadien de 52 ans et deux autres otages italiens ont été transportés dans un autre véhicule qui s'est dirigé vers l'aéroport, où ils ont été libérés 47 jours après avoir été kidnappés par des hommes armés alors qu'ils se rendaient au travail à Ghat, en Libye. En ce moment, un mois après que le gouvernement italien eut annoncé la libération des trois hommes, M. Poccia a confié à La Presse canadienne qu'il se sentait chanceux d'avoir pu s'échapper pour retrouver sa famille à Montréal (…) Bien que plusieurs groupes terroristes rodent dans la région, M. Poccia ne croit pas qu'il avait affaire à des terroristes. Les individus fumaient, priaient rarement et n'étaient pas violents avec eux, ce qui concorde davantage avec l'hypothèse d'une organisation criminelle. «Ils voulaient nous garder en santé et alertes pour collecter une rançon ou quoi que ce soit d'autre», a-t-il soutenu, ajoutant qu'il avait craint qu'ils soient vendus en otage à Daech (groupe armé État islamique) ou à al-Qaïda. Il est tout aussi incertain sur la possibilité qu'une rançon ait été payée et sur l'implication des gouvernements canadien et italien. La Presse Canadienne (La Presse)

Captive in the jungle
Marites Flor first realized John Ridsdel had been murdered when she saw one of their captors cleaning his blood off a machete… Months later, on June 13, the militants struck again, this time beheading another hostage, Canadian Robert Hall. The 66-year-old was Flor's fiance. Now, months after her own release, Flor gave her first wide-ranging interview to VICE News over Skype, shedding light on the harrowing ordeal she and the hostages who did not make it endured. She revealed new details of just how close the Philippine military was to the Abu Sayyaf camp — at one point, the gunfire exchange between the militants and the army was so close, Flor could smell the smoke — and a $1 million ransom offer by the Ridsdel family that fell short of the captors demands. A Filipina woman, Flor was an afterthought in Canadian media coverage of the hostage situation that began on Sept. 21, 2015, when she, Ridsdel, Hall, and Norwegian Kjartan Sekkingstad were captured at gunpoint at a Philippine resort in the Mindanao region. But during her time in captivity, Flor played a crucial role, becoming the go-between translator and advocate for the three foreign hostages. They pinned their hopes on newly-elected Prime Minister Justin Trudeau, who stood firm on Canada's policy of not paying ransom demands to terrorists. After witnessing horrors and starving in the jungle, Flor is now back to a healthy weight and is getting support from a therapist. What follows is her account of the nine months she spent in captivity. Vice News

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Donald Trump Advised to Train 100,000 Hackers to Protect the US
US President-elect Donald Trump should train and hire around 100,000 hackers whose main purpose would be hacking but also defending the country from cyberattacks, a commission including top security experts, including former NSA director Keith Alexander and MasterCard CEO Ajay Banga, said in a report. The panel of security experts pointed out that cybersecurity should become a priority during Donald Trump's tenure at the helm of the United States, and recommended the President-elect not only to train hackers and be prepared for any cyber threat, but also to propose international norms for hacking that would guarantee better protection. Enter 'The Glass Room,' Where Privacy Goes To Die
The line of people moving down Mulberry Street in Manhattan's SoHo district on Tuesday night could've easily been confused for a product launch. It was pouring rain, and the mostly-young crowd was slowly shuffling past designer handbag stores and into a shiny, brightly-lit storefront reminiscent of Apple's trademark retail destinations. Unbeknownst to them or anyone casually passing by on the street, their smartphones were being tracked. An array of cylindrical Yagi antennas pointed outward from the storefront's windowed entrance, recording the positions and unique MAC addresses of every WiFi-enabled device that wandered by—a setup reminiscent of the "Stingray" fake cell tower devices secretly used by police to track cellphones en-masse. Inside, a huge screen displayed a map of those devices as their owners sauntered about the space, consuming hors d'oeuvres and cocktails with cheeky cyber-themed names like "The Firewall." The "store" isn't actually a store, of course. This was the opening party for The Glass Room, a pop-up digital privacy space that's free and open to the public through December 14, courtesy of Mozilla, makers of the Firefox browser, and the Tactical Technology Collective, a Berlin-based activist group known for interventions in online security and digital rights. LAW ENFORCEMENT / APPLICATION DE LA LOI

Threat called into Air Tindi ruled a hoax by RCMP
All of Air Tindi's planes landed safely Friday after a threat was called into the airline. The details of the threat have not been released, but in a press release, RCMP say it was a "hoax and all leads are being followed up by the police." Alasdair Martin, the president of Air Tindi, says four planes were in the air at the time of the threat, which happened around 12 p.m. Friday. "We are going through a process now on following up with the passengers as well to see if people have any concerns with people getting on the aircraft afterwards," he said. RCMP investigated on and near the Air Tindi site Friday afternoon and quickly concluded the threat wasn't real. No locations were evacuated, they say. CBC News

Waycobah man faces multiple drug and weapon charges after RCMP search his home
The Inverness Country District RCMP and Victoria Country District RCMP say they are continuing to investigate after they arrested a 51-year-old man. The Mounties say that while executing a search warrant on Friday night they found a quantity of marijuana, oxycodone and a set of brass knuckles. Kenneth John Googoo, 51, of Waycobah will face charges for possession for the purpose of trafficking oxycodone, possession for the purpose of trafficking cannabis and possession of a prohibited weapon. Metro News

RCMP searching for man in Nanaimo armed robbery
RCMP say a man armed with a handgun robbed a 7-Eleven in Nanaimo on Friday. A cashier was working alone just before 4 a.m. when a man entered the store, pointed a gun at the teller and demanded cash and cigarettes. Police say the cashier complied, and the man fled the store on foot. He has not been located, and police are trying to identify the man described as Caucasian, 6-feet tall with a thin build and dirty blond curly hair. Canadian Press (CTV News)

N.S. RCMP request public assistance after gas station robbery
RCMP in New Minas, N.S. are asking for the public's assistance in a gas station robbery investigation. Around 3:00 am Friday, a man entered a New Minas gas station and demanded money and cigarettes from the clerk. The man threatened to use a knife, though the clerk didn't see one. The man got away in dark coloured two-door vehicle with a quantity of cash and cigarettes. The clerk wasn't injured. The suspect is described as being five-feet 10 inches tall, 320 pounds, and wearing dark clothing. Kings District RCMP have not made an arrest. Anyone with information about the incident is asked to call RCMP or Crime Stoppers. CTV News; Metro News

Cops trying to save lives with CPR or naloxone won't be investigated
British Columbia's police watchdog will no longer investigate police officers who have provided life-saving measures resulting in someone's death. The Independent Investigations Office says that while it is tasked with investigating in-custody deaths, officers who use CPR or the overdose-reversing drug naloxone to save someone's life will not be subjected to an investigation. Spokesman Marten Youssef says the change was brought in on Friday, a week after an overdose victim died in Surrey while an RCMP officer was administering naloxone... He says some police departments have been reluctant to provide officers with naloxone because of concerns over investigations if someone dies, but that will no longer happen. Canadian Press (CTV News)

Amber Alert for nine-year-old girl concluded, girl still missing: police
Niagara police have concluded an Amber Alert for a missing nine-year-old girl; however they will continue looking for her, classifying the search as a missing persons case. Police first issued the alert for Layla Sabry on Friday night and the broadcast order ended at around 3 a.m. on Saturday, as per protocol. "The Amber Alert is not cancelled. What happened is the broadcast gets cancelled automatically after five hours," Staff Sgt. Paul Rogers told CP24. "We are still actively looking for this young lady and her mother. There is a court order that we will be enforcing to apprehend the child for now and sort all of this out." CP24; Canadian Press (CBC News; National Post; Huffington Post); CBC News

RCMP searching for missing 14-year-old girl
RCMP are searching for a missing 14-year-old girl from Ahtahkakoop First Nation. Rachel Isnana was last seen at her home at 3:30 a.m. CST Sunday morning. Her mother reported her missing at approximately 6:45 a.m. Isnana resides on the Ahtahkakoop First Nation, but may also be on the Beardy's First Nation. CBC News; StarPhoenix; Global News

Alvarenga Alert Cancelled: Missing girl found
An amber alert has been cancelled after Manitoba RCMP say the missing eight-year-old girl, Luisa Alvarenga, was found safe in Winnipeg. An AMBER Alert was issued for 8-year-old late Friday afternoon. RCMP confirmed that the girl was found safe just after 6 p.m. CT during a media briefing. Canada Journal; Canadian Press (Calgary Herald)

Body found on White Rock beach
Global News reports that a body has been found on the beach near White Rock Pier this morning. The man's body has not yet been identified by RCMP, but officials told Global the death doesn't appear suspicious. They also said the body has been in the water for some time. CKNW News

Vernon RCMP Supt. responds to 'RISK IT OUT'
A letter by Vernon RCMP Superintendent McNamara states, "Editor, I am concerned by significant inaccuracies that could compromise both officer and public safety, in the November 30th Infonews article by Charlotte Helston on RCMP staffing in Vernon.To set the record straight, I do not believe chronic

under staffing is leaving our police officers or the public in danger. Ms. Helston's article is largely based on information from anonymous sources. Unfortunately anonymous sources, or those not working within our environment, don't have to account for misinformation they're providing. When she contacted me with questions on staffing, overtime and leave I provided her with detailed, factual answers. She literally used less than ten words from what I gave her…" Infonews

Editor's Note in response to allegations from Vernon RCMP Supt. Jim McNamara
An editor's note in response to Vernon RCMP Superintendent McNamara's letter states, "Editor's note:• Watch shifts at the Vernon detachment have fallen as low as three roadable officers.• The department suffers from chronic understaffing.• Sources, who we trust and who have knowledge of the situation, say understaffing is creating dangerous work conditions for officers on the road.That's what our first story on chronic understaffing at the Vernon RCMP detachment alleged. They remain entirely unaddressed by Supt. Jim McNamara statement yesterday or by the City of Vernon in its response Thursday.Supt. McNamara alleges 'significant inaccuracies' in our story. We have found one error in our reporting, specifically the number of roadable officers... Supt. McNamara provided plenty of information, some of which we intended and still intend to use in further reporting on the subject. However, much of the information he has supplied did not aid our efforts to understand the issue facing his officers and the community of Vernon. He refused all requests for interviews for this story. We share Supt. McNamara's concern for officer and public safety. We look forward to returning to the discussion this story has provoked." Missing persons cases in Winnipeg continue to soar with 7.3k reports this year
The number of people reported missing in Winnipeg continues to soar with more than 7,335 missing persons reports since January. Detective Sgt. Shauna Neufeld, head of the Winnipeg Police Service's Missing Persons Unit, says the figure is in line with previous years, which saw record numbers. In 2015, 8,894 people were reported missing in the city — a 29 per cent increase over 2014. Those numbers are high but a lot of those numbers are quickly resolved throughout the year," Neufeld said, adding this week has been noticeably busy. As of Monday, there were 99 "short-term" active missing persons with roughly 70 per cent involving youth, she said. CBC News

Contrer l'alcool au volant : augmentation des contrôles routiers en Alberta
Des centaines d'agents de la Gendarmerie royale du Canada (GRC) et d'autres forces de l'ordre augmenteront le nombre de contrôles routiers en Alberta au cours de la fin de semaine. La GRC indique au public qu'elle veut renforcer la sécurité routière afin de combattre la conduite en état d'ébriété lors de la période du temps des fêtes, selon un communiqué. Le Service de police de Calgary a lancé sa campagne annuelle contre l'alcool au volant « Checkstop » vendredi soir… La GRC indique que plus de 1600 suspensions immédiates de permis ont été émises en 2016. Radio Canada

More than 1/3 of fatal crashes in N.B. involve impaired driving
More than a third of the fatal traffic crashes this year on roads patrolled by the New Brunswick RCMP have involved impaired driving. The force says 20 of the 55 fatal crashes involved drugs or alcohol. Those 55 crashes killed 60 people. As recently as the weekend of Nov. 12, Moncton's Codiac Regional RCMP arrested seven people for impaired driving. All of those drivers were arrested after checkstops, and RCMP will be out in full force Saturday with a similar initiative, but this time it will be province-wide. As part of National Safe Driving Week from Dec. 1 to 7, the provincial RCMP are participating in National Impaired Driving Enforcement Day. CBC News

Sask. RCMP using social media to curb drunk driving
Saskatchewan RCMP took a new approach to addressing drunk driving Saturday, sharing their stories on social media. It's part of National Impaired Driving Enforcement Day. At 11 a.m. they began posting stories from their members about their experience with drunk drivers. 650 CKOM; CTV News

Ridge Mounties continue holiday tradition
Ridge Meadows RCMP continue with the tradition of spreading good will amongst members of the community. Local police will go to senior care homes and events and perform Christmas carol sing-a-longs. Police will also visit a number of elementary schools in Maple Ridge and Pitt Meadows to meet students, and offer sweet treats. Maple Ridge News

Prince George Mounties hope to pack police cars with donations
The Prince George RCMP are looking to give to the Prince George Council of Seniors this holiday season. Today, they'll be holding their first ever 'Pack A P.C.' Event, with a goal of filling up police cars entirely with non-perishable food items. "We're not sure what to expect," says Corporal Craig Douglass. "We will have the van and that'll be interesting to see how much because it'll take more than a regular police car. Then other locations will have regular police cars." At each of the four Save-On-Foods locations in the city, RCMP are encouraging grocery shoppers to pick up something extra for their cause. My Prince George

Mayor Iveson thinks Fentanyl crisis needs to be met with compassion, not judgement
Mayor Don Iveson believes the opioid crisis facing our country needs to be met with compassion, not judgement. He said Edmonton is watching with great interest with how Vancouver is dealing with it as the problem seems to be moving west. "It came to Edmonton sort of through Calgary, so we had the benefit of watching public health responses and we don't have it licked by any stretch." Iveson said Vancouver is way ahead in harm reduction with its needle exchanges and safe injection sites. "The science gives us lots of guidance on what to do, the public needs a lot of conversation about why this is not only the compassionate thing to do but also from the public policy point of view the most cost effective approach. Even if it's not what people come to naturally because of assumptions that they make." AM 770

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Never Blame the Victim says YWCA Canada's Rose Campaign
YWCA Canada recently launched its annual Rose Campaign to end violence against women on Parliament Hill with a call for Canadians to #NeverBlameTheVictim of sexual assault. Through the Rose Campaign, Canada's oldest and largest women's multi-service association supports the wave of change on sexual assault working to end victim blaming and rape culture and adopt a consent culture... "NWAC is currently dedicated to seeking accountability from the Inquiry on Missing and Murdered Indigenous Women and Girls as they attempt to address the systems that contribute to the plague of violence upon Indigenous women here in Canada," says Francyne Joe, Interim President of the Native Women's Association of Canada. "Speaking at the press conference to launch the Rose Campaign 2016 and the 16 Days of Activism Against Gender-based Violence gives me a unique chance to speak not only for the Indigenous women of Canada but to draw attention to the need for more protection for Indigenous women worldwide." The Suburban

57th Six Nations elected council sworn in
Six Nations elected council scored a lot of achievements for the community in the past three years, but the new one has a number of challenges to keep the territory on a wave of growth and prosperity, re-elected Chief Ava Hill told more than 50 people at a swearing in ceremony. Standing in a community room in the Six Nations Tourism hall on Friday evening, Hill told an upbeat gathering to witness the 57th council take their oaths of office that she was proud the last council had brought the water treatment plant to completion... Council also must keep looking for ways to advance the issue of missing and murdered

indigenous women and children, Hill said, noting that Six Nations has its own cases right in the community. Brantford Expositor

Quebec Mohawk chief vows civil unrest if B.C. pipeline moves forward
A Quebec Mohawk chief is promising a coordinated campaign of civil disobedience if recently approved pipeline construction encroaches on aboriginal territory in British Columbia. The actions could range from demonstrations and rail blockades to people occupying government offices across Canada, according to Kanesatake Grand Chief Serge Simon. "I've always said my favourite form of action is civil disobedience," said Simon, in an interview with the Montreal Gazette. "If the government insists on ignoring its commitment to First Nations, we're looking at unrest in many areas of the country, not just in British Columbia." The chief's comments come as Natural Resources Minister Jim Carr suggested Friday that the federal government will consider deploying military forces in response to non-peaceful forms of protest. Gazette (Ottawa Citizen)

Expect to see CF-18 fighter jets operating out of Ottawa for a couple of days
Two Royal Canadian Air Force CF-18 Hornet fighter jets from 3 Wing Bagotville, Quebec, will operate out of the Ottawa Macdonald-Cartier International Airport for a military exercise in New York State. The exercise started December 2 and runs until Dec. 4. The CF-18s are taking part in Dissimilar Air Combat Training (DACT) with U.S. F-16 Fighting Falcons in New York State, just south of Ottawa, the RCAF noted in a news release. "DACT exposes RCAF CF-18 pilots to fighter aircraft that they do not interact with on a regular basis to provide more realistic training," the release added. Ottawa Citizen

Proposed bill would guarantee coverage for B.C. first responders: MLA
A B.C. MLA wants the provincial government to declare post-traumatic stress disorder a "presumptive illness" for emergency workers in order to guarantee coverage for health services. B.C. NDP MLA Shane Simpson says there is concern the British Columbia government isn't doing enough to help firefighters, police officers and paramedics suffering from post-traumatic stress disorder. Morocco arrests suspect tied to thwarted French attack plot
Moroccan police have arrested a "dangerous element" who allegedly served as a liaison between the Islamic State group's external operations and members of a French cell that was dismantled last month while allegedly planning an attack. The state-run MAP news agency reported on Saturday that the arrested man allegedly met on the Turkish-Syrian border with emissaries of the Islamic State group who provided instructions that were to be communicated to the group in France. MAP didn't name the suspect or say when or where he was arrested. Associated Press (CTV News)

Found at an Islamic State training camp: bunk beds, weapons manuals, steroids
The bunk beds that fill the rooms sleep more than 80 Islamic State recruits. On the walls, posters detail the components of Russian Kalashnikovs and American assault rifles. One sign reminds the trainees that

victory comes from long fights and pain — rewards come later: "Remember that we didn't come for this life, we came for the afterlife." Spread across several large houses, the "Sheikh Abu Samaya Ansari Camp" was discovered this week by Iraqi forces as they pushed deeper into the northern city of Mosul, which Islamic State militants have been fighting bitterly to retain. It is the first military training center that the Iraqi forces have found in the city since they began an offensive to retake it just more than six weeks ago. Washington Post

US cautions crackdown in Myanmar could radicalize Muslims
It's a scene straight out of Myanmar's dark past: a military offensive waged beyond world view that forces ethnic minority villagers from the smouldering ruins of their homes. The U.S. government, a key sponsor of Myanmar's democratic transition, says a security crackdown that has displaced tens of thousands of Rohingya Muslims and left an unknown number dead risks radicalizing a downtrodden people and stoking religious tensions in Southeast Asia. The military moved in after armed attacks by unknown assailants on police posts along the border with Bangladesh in October. The attacks in Rakhine State were a possible sign that a small number of Rohingya were starting to fight back against persecution by majority Buddhists who view them as illegal immigrants although many have lived in Myanmar for generations. Associated Press (Metro News)

North Korea's Government Sanctioned Operating System Can Be Hacked Remotely
Today a group of hackers found a new vulnerability in Red Star OS—North Korea's government sanctioned operating system—which allows it to easily be hacked remotely. The hermit kingdom's linux-based OS has never exactly been known for its security features and significant vulnerabilities have been exposed on numerous occasions since it leaked to the rest of the world last year. The latest vulnerability, exposed by the information security company Hacker House "to mark Red Star's anniversary leak," allows a hacker to remotely access users' computers simply by getting them to click on a hyperlink. Motherboard

'It's just a ploy': North Dakota protesters reject help from officials to leave as winter descends
The head of North Dakota's emergency management services says the state is prepared to respond to Dakota Access pipeline protesters who may need help during a winter storm or some other crisis. But some protesters on their way to the site are rejecting those calls, saying it's "just a ploy" to get them out. Speaking with CBC News near Standing Rock, Sam Deering and Sean Kristopher Tremblay of the group U.S. Vets for Standing Rock said the pledge by officials to help protesters leave the site on the basis of safety is disingenuous and proof that the movement is gaining momentum. CBC News

UK to double armed drone fleet in deal with US Predator manufacturer
The United Kingdom will double its fleet of armed drones, defense secretary Michael Fallon announced on Saturday, under a $125m (£100m) development deal with US arms manufacturer General Atomics. eneral Atomics, makers of the Predator and Reaper drones used widely by the US, will provide 10 drones to the Royal Air Force, bringing the fleet from 10 to 20. Fallon described the drone expansion as a major addition in terms of firepower, imaging and intelligence gathering. For the past two years, the UK's drone arsenal has been centered on fighting Islamic State in Iraq and Syria. Guardian (UK)

Police criticized after using 'fake news' in sting aimed at California gang
Police investigating a notorious gang in a city on California's central coast issued a fake press release that the chief credited with saving two men by deceiving gang members who wanted to kill them, but the ruse was criticized by news organizations who reported it as fact. Santa Maria Police Chief Ralph Martin defended the rare tactic this week when it came to light, saying he had never done such a thing in his 43-year career, but he wouldn't rule out doing it again. MINISTER / MINISTRE

La tuerie de Polytechnique est soulignée sobrement

L'école Polytechnique de Montréal avait choisi de souligner sobrement, mardi, le 27e anniversaire de la tuerie qui avait fait 14 morts — toutes des femmes — le 6 décembre 1989. Un bouquet de 14 roses blanches a été déposé devant la plaque commémorative en l'honneur des femmes tombées sous les balles de Marc Lépine ce jour-là. Les drapeaux étaient aussi en berne sur le campus mais aussi sur le toit de certains édifices montréalais mardi. Peu après midi, le premier ministre Justin Trudeau et 10 de ses ministres — toutes des femmes — ont déposé des roses blanches devant la Flamme du centenaire, à

Ottawa, sous le regard de six de leurs collègues masculins. La courte cérémonie s'est déroulée dans le silence, alors que la ministre de la Santé, Jane Philpott, pleurait à chaudes larmes. Sa collègue Mélanie Joly a réussi à refouler les siennes, avec difficulté. Invitée à dire après la cérémonie ce que son gouvernement pouvait faire pour adoucir le 6 décembre, la ministre Joly a répondu qu'il fallait «le commémorer»....En matinée, M. Trudeau, la ministre de la Justice, Jody Wilson-Raybould, et la ministre de la Condition féminine, Patty Hajdu, ont tous trois publié des communiqués pour souligner le 6 décembre, sans toutefois faire allusion au contrôle des armes à feu. «Aujourd'hui et chaque jour, nous réaffirmons notre engagement à trouver des solutions qui aideront à prévenir les actes de violence dans l'avenir», peut-on lire dans le communiqué du premier ministre. M. Trudeau insiste sur l'intention de son gouvernement d'augmenter le nombre de refuges et de maisons de transition pour les femmes victimes de violence familiale. «J'encourage tout le monde à réfléchir au fait que leurs propres gestes comptent. Pour commencer, joignez-vous à la conversation en ligne au moyen du mot-clic #GestesComptent», a-t-il également offert... En sortant de la réunion du cabinet, mardi après-midi, **le ministre responsable de ce dossier, Ralph Goodale**, a voulu calmer les doutes de Mme Rathjen. ***«Il y a toute une série d'amendements sur lesquels nous travaillons, a-t-il assuré. Nous présenterons un projet de loi dans les semaines et les mois à venir.»*** **Le ministre Goodale** a ensuite voulu souligner **qu'il** est à revoir la composition du comité consultatif sur les armes, groupe que les conservateurs de Stephen Harper avaient peuplé de membres du lobby pro-armes. **Il a promis** un comité mieux équilibré ***«très bientôt»***. Mais **il ne sait pas** si cela se fera avant janvier. ***«Nous travaillons très fort sur tous ces éléments et nous avons l'intention de les présenter aussitôt que nous aurons aligné nos flûtes»***, a insisté **le ministre de la Sécurité publique**, mais toujours sans offrir un quelconque échéancier. «C'était des choses assez faciles à faire. Ils ne les ont toujours pas faites», a critiqué le chef néo-démocrate Thomas Mulcair. Presse Canadienne (Journal Métro)

Spies should not be allowed to keep innocent people's data, privacy czars say
Canada's spy agencies should destroy the data trails of innocent people they incidentally collect during terrorism investigations once the actual targets have been cleared of suspicion, say Canada's privacy watchdogs. The declaration Tuesday from privacy commissioners across the country came after a judge recently ruled the Canadian Security Intelligence Service violated the law by keeping potentially revealing electronic data about people who were not under investigation. The message was part of a joint submission signed by federal, provincial and territorial privacy czars that urged the Trudeau government to strengthen protection of personal information as it revamps the national security regime. Rather than expand state powers and reduce individual rights, it is time to beef up legal standards and oversight to prevent repetition of mistakes, said federal privacy commissioner Daniel Therrien, flanked at a news conference by counterparts Brian Beamish from Ontario and Jean Chartier of Quebec. They urged the government to learn lessons from the information-sharing blunders that led to the overseas torture of Maher Arar following 9/11 and the current uproar over surveillance of journalists in Quebec... Just last month a Federal Court judge said CSIS broke the law by holding on to electronic data, over a 10-year period, about people who were not considered a danger to national security... **Public Safety Minister Ralph Goodale said** Tuesday the joint submission would help the government redraft security policy. ***"We have two critical objectives to achieve: No. 1, keep Canadians safe, and at the same time ... make sure that Canadian rights and freedoms are respected, along with the open, generous and inclusive nature of our democratic society."*** Canadian Press (Metro News)

Don't expand police spying powers, watchdogs say
Privacy watchdogs from across the country have come together to challenge proposals to expand police and intelligence agencies' powers. Federal Privacy Commissioner Daniel Therrien told a press conference Tuesday that state spying and investigative powers have "already been significantly increased" in recent years. The RCMP have recently undertaken a public push for more powers to investigate online crime, arguing privacy-protecting software and laws are preventing them from catching criminals. But Therrien suggested that the balance is actually tipped in police agencies' favour, and argued for greater legal safeguards to protect Canadians' privacy. "In my view, this is not the time to further expand state powers and reduce individual rights," Therrien said in a statement (...)In a joint submission to the federal Liberals with provincial and territorial privacy commissioners, Therrien questioned a number of proposals outlined in **Public Safety Minister Ralph Goodale's** discussion paper on Canada's national security framework. More strict rules should be brought in on accessing Canadian

metadata, for instance. Metadata is often described by police as innocuous "phone book information" — telephone numbers, IP addresses, residential addresses, and so on. Toronto Star

Trudeau cabinet expected to debate renewed Ukraine mission
The Liberal government signalled to its allies that it is prepared to extend Canada's military training mission in Ukraine, CBC News has learned. A series of senior Ukrainian government officials visited Ottawa over the last few weeks, warning of the dangers of warming frosty relations with Russia. But they have also lobbied for renewed Canadian assistance beyond March 2017, when the current deployment is set to expire. Several sources, with knowledge of the file who could not speak publicly, said there is a clear intention for Canada to remain, but the size, scope and composition of the force is yet to be determined and the federal cabinet has yet to give its blessing (...) Ukraine Interior Minister Arsen Avakov met on Monday with **Public Safety Minister Ralph Goodale,** where the two discussed Canada's commitment to police training and judicial reform, among other things. In an interview with CBC News, Avakov would not confirm if he and **Goodale** spoke about the military training commitment — or the reasons Canada has discontinued a program of providing satellite images of eastern regions where Russian-back separatists have been fighting a low-grade war of attrition (...) Avakov did, however, put a major proposal in front of **Goodale,** requesting training for Ukrainian national guard units and police forces. Canada seems anxious to remain involved in the building of institutions, such as the national police force where a partnership is being formed with the RCMP, he said (...) Both he and **Goodale** also spoke extensively about the daily cyberattacks that have hit Ukraine, and in some cases caused disruptions to important infrastructure including the country's power grid and major airport. Public Safety is the lead in Canada when it comes to cyber-defence and Avakov asked for the department's assistance, specifically access to analytical programs used by the federal government, ones "that analyze huge masses of information" known as metadata. Avakov also told **Goodale** he would like to see more Canadians involved as ceasefire observers through the Organization for Security and Co-operation in Europe (OSCE). CBC News

Liberals to announce $3-billion search and rescue aircraft contract — Airbus named as winner
The Liberal government will announce the winner of a multi-billion dollar program for new search and rescue aircraft on Thursday, even as industry sources say aerospace giant Airbus has won the deal. The announcement was planned for Winnipeg on Thursday but at the last minute was changed to the Canadian Forces base at Trenton, Ont., sources say. The Airbus C-295 was selected over the C-27J built by the Italian firm, Leonardo. National Post

Privacy watchdogs urge caution with encryption laws
Privacy watchdogs from across Canada warned the government on Tuesday to "proceed cautiously" before passing encryption legislation — a move that would have the potential to undermine the security of everything from financial transactions to online communication. The warning comes at a time when government and law enforcement agencies have been seeking the ability to access encrypted information, the lack of which they see as a growing investigative problem... The government is currently soliciting feedback and holding public consultations on this and other national security issues, as part of its pledge to to repeal the "problematic elements" of Bill C-51. In a submission to **Public Safety Canada**, Canada's Privacy Commissioner Daniel Therrien and his colleagues warned against introducing any legislation aimed squarely at encryption, as well as other proposed powers that police do not currently have... One particularly divisive issue is the matter of encryption — cryptographic protections that prevent attackers and police alike from eavesdropping on messages as they travel across the internet, or from accessing files on a password-protected device. ***"There is currently no legal procedure designed to require a person or an organization to decrypt their material,"*** according to **Public Safety Canada's** "***National Security Green Paper,"*** which was released in September to ***"prompt discussion and debate about Canada's national security framework."*** Both law enforcement and government agencies have increasingly characterized encryption as an impediment to investigations, a problem they refer to as "going dark." Canada's police chiefs, for example, recently called on the government to

introduce legal measures that deal with encryption, and the US Senate introduced a draft bill addressing encryption earlier this year. CBC News; IT World Canada

Surveillance: les commissaires à la vie privée demandent un meilleur encadrement de la police
Citant les révélations d'Edward Snowden et les cas de journalistes surveillés au Québec, les commissaires à la protection de la vie privée du pays mettent le gouvernement Trudeau en garde: au lieu de donner de nouveaux pouvoirs aux corps policiers, Ottawa doit plutôt mieux encadrer les pouvoirs policiers existants en matière de surveillance. Dans le cadre de la consultation du gouvernement Trudeau pour moderniser le cadre de sécurité nationale, le commissaire à la protection de la vie privée du Canada Daniel Therrien ainsi que tous ses homologues provinciaux demandent à Ottawa de ne pas hausser les pouvoirs policiers en matière de surveillance... «Sans vouloir faire comparaison» avec les services de renseignement des ex-républiques de l'Europe de l'est, le commissaire Daniel Therrien rappelle toutefois une décision récente de la Cour fédérale dénonçant le fait que le SCRS a conservé de façon illégale pendant plusieurs années des métadonnées de citoyens canadiens (le SCRS interprétait la loi différemment et s'est plié à la décision de la Cour fédérale). «Nous parlons ici de retenir des données de citoyens ordinaires. Je ne crois pas que c'est le type de société dans laquelle [les Canadiens] veulent vivre», dit le commissaire Daniel Therrien... Le gouvernement Trudeau a lancé a lancé cette année une consultation sur la modernisation du cadre de sécurité nationale. Les commissaires à la protection de la vie privée ont déposé aujourd'hui un mémoire commun. La Presse ; Globe and Mail

Police haven't made case for more digital spying powers
The federal privacy commissioner says he's not convinced Canadian law enforcement agencies have made their case for greater powers to access Canadians' online information, and urged the federal government not to grant new ones unless police can prove they're needed. "It's not as though there's an absence of tools," said Daniel Therrien Tuesday at the National Press Theatre, where he released a joint submission to the government's national security consultations that had been co-signed by all of Canada's provincial and territorial privacy commissioners. "We remain to be convinced. We do not think they have made their case." Launched in September, the government's national security consultations run until December 15, are aimed at getting Canadians to share their ideas and "will help inform future changes to national security tools," according to its website. The consultations come at a time of intense debate about how best to balance the privacy rights of law-abiding citizens with the need for security, and following two high-profile cases where the Canadian Security Establishment and the Canadian Security Intelligence Service were found to be failing to live up to their responsibilities. In January, the CSE held an unprecedented technical briefing to announce it had stopped its metadata sharing program with international intelligence partners because the data was not being properly scrubbed of information that could identify Canadians... More recently, some have accused the RCMP of using the media to create "moral panic" after they granted security clearances to two reporters from the CBC and the Toronto Star to view pre-vetted files on cases officials claimed had been running into digital roadblocks. One of those cases was that of Strathroy terrorist Aaron Driver, which RCMP said had been obstructed by encryption for more than a year. iPolitics

RCMP officers copied contents of Ismael Habib's laptop in 2014
The RCMP obtained a warrant to go into Ismael Habib's home, take his computer, replicate its contents and replace it while he was in Sault Ste. Marie, Ont., seeing a woman, a Quebec court heard Tuesday. Habib is charged with attempting to leave Canada to commit terrorist acts and giving false information to obtain a passport. The trial is being heard by Quebec Court Judge Serge Délisle at the Montreal courthouse. CBC News

City of Surrey and Surrey RCMP launch City Centre Response Plan
The City of Surrey and Surrey RCMP have launched their City Centre Response Plan to address the public safety and public health concerns for both the homeless and the community in the 135A area. The plan will address three key areas: 1. Enhanced Outreach and Presence on 135A. 2. Emergency Housing. 3. Engagement and Education. “As is the case with all municipalities in the region, Surrey is facing increased challenges related to homelessness, mental health issues and fentanyl use,” said Surrey Mayor Linda Hepner. “With the City Centre Response Plan, we are taking tangible, concrete action on addressing the public safety issues that area businesses and residents are faced with on a regular basis,

while addressing the public health challenges that affect the vulnerable who are easily preyed upon and exploited." Voice Online; CKNW NEWS AM 980

Violence against women has touched us all, Wynne says on anniversary of Montreal Massacre
Ontario Premier Kathleen Wynne placed roses in a vase at a ceremony in Toronto in memory of 14 women killed in Montreal 27 years ago. Wynne, along with Toronto Mayor John Tory, spoke at Women's College Hospital about the deaths at l'École Polytechnique on Dec. 6 in 1989. On this day in 1989, 14 women were shot and killed at the engineering school by a gunman professing to hate feminists. CBC News

Thousands of pounds of food collected in two hours by Chilliwack emergency responders
The Chilliwack Fire Department along with Chilliwack Search and Rescue (SAR) and Emergency Social Services (ESS) cruised around the city last night and collected approximately 13,000 food items (15,000 pounds) and $2,500. Chilliwack Times

Duo awaiting rescue keep cougar at bay
Two Campbell River men stranded on the shore after capsizing near Elk Bay had to ward off a prowling cougar while trying to attract attention from passing boats Saturday night. "A couple of guys were out doing some fishing in Elk Bay, there, and they ended up sinking their boat and had to swim for shore," said Ron Boucher, Officer in Charge of the Canadian Coast Guard vessel Cape Palmerston which is based in Campbell River. Campbell River Mirror

Health ministry investigators didn't understand Ottawa ambulance system, paramedic chief says
An opinion piece states, "Ottawa objects to several findings in a report from the Ministry of Health that said the city's paramedic service violated several policies and service agreements in one August shift, potentially harming patients, says Anthony Di Monte, Ottawa's acting general manager of emergency services. But in a long interview Tuesday, he didn't reject a ministry finding that paramedics frequently didn't tell their dispatchers they'd handed patients over to hospitals -- which cost Ottawa's ambulance system hours of work on one night in August and left people with new emergencies waiting..." "Lock up the agitators"

Conservative party leadership contender Kellie Leitch wants to crack down on and surveil those who interfere with natural resource development projects in Canada... Leitch outlined a five-point plan to quash "violence and/or vandalism" against Energy East and other natural resource projects. Perhaps most striking is her plan to create a "new task force" made up of "specialized components" of the Royal Canadian Mounted Police (RCMP), the Canadian Security Intelligence Service (CSIS), Canada's main spy agency, the Canadian Revenue Agency, and Global Affairs Canada. Government surveillance of Indigenous and environmentalist protesters is not new, but is always controversial. CSIS and the RCMP have been chastised for infiltrating, tracking, and surveilling peaceful activists. The spy agency came under fire for preparing national security plans in case peaceful Indigenous protests "escalated." And last month it was revealed that the RCMP was conducting surveillance on 89 Indigenous activists for their involvement in environmental efforts. Leitch's proposals would clearly turn up the dial on that sort of surveillance. Vice News

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Bridge Labour Stalemate Into Third Week

The strike by 47 employees at the Blue Water Bridge, now into its third week, was raised in the House of Commons Monday. Windsor West MP Brian Masse says drivers are using the privately owned Ambassador Bridge, resulting in lost revenue for the federal government. Toll collectors, currency exchange personnel, custodians and maintenance staff represented by Local 501 of the Public Service Alliance of Canada (PSAC) walked off the job November 21. Blackburnnews.com

Feds Beef Up Security on NORTHERN Border...To Keep Dems IN or Canadians OUT?

Despite the surge of illegal aliens into the U.S. from the south, U.S. Customs and Border Patrol (CBP) is offering hiring bonuses and advertising to shore up border security in Minnesota and North Dakota. Are they trying to keep Disgruntled Democrats in, or keep Conservative Canadians out? MRCTV

Port authority watches over 'Detroit's $300M forgotten economy'

Detroit is home to a port that's tied to some 15,000 jobs and generates nearly $300 million in state and federal taxes as part of the Great Lakes St. Lawrence Seaway System. And yet many are completely unaware of its existence. To make his point about the Port of Detroit being an afterthought -- if even that -- the head of the authority watching over the $300 million economy likes to use a story of border patrol agents being unaware of its existence. "There is a crewman who comes into the port (from Canada), and when he gives the customs agent his reason for coming, the agent says: 'There's no port here,'" said John Loftus, executive director of the Detroit/Wayne County Port Authority, about general unfamiliarity with the Port of Detroit. M Live

Mydemocracy.ca poses privacy risks for Canadians in small towns: professor
If Canadians using the government's new electoral reform consultation website don't disclose detailed demographic information, their input won't be included in the study's results - raising privacy concerns for those in small communities, according to University of Ottawa law professor Michael Geist. In a short blog post published Tuesday, Geist highlights a few sentences in the Mydemocracy.ca privacy policy that got missed in the coverage of the site's launch Monday. iPolitics

LAW ENFORCEMENT / APPLICATION DE LA LOI

A Look at Canada's 12 Most Wanted Fugitives
Despite having an international image of being a country purportedly full of angels, Canada has its fair share of unscrupulous transnational fugitives running amok and thwarting international law enforcement agencies. With consultation from RCMP and Interpol databases, we've compiled a list of the country's most wanted, a group of alleged gang bangers, murderers, pedophiles, bikers, and other crooks currently at large in a series of unsolved criminal cases. 1. David MacDonald "Wolf" Carroll. At 64 years of age and after 15 years on the run, Nova Scotian-born David MacDonald Carroll has proven he's a difficult man to trace. Vice News

No charges approved after RCMP investigation into death of aboriginal teen Paige Gauchier
The Criminal Justice Branch of B.C. (CJB) has announced no charges will be laid against police officers or paramedics who failed to tell Ministry of Children and Family Development (MCFD) officials about an incident with Paige Gauchier before the aboriginal teen died of a drug overdose... The CJB has concluded, based on available evidence, that there is no substantial likelihood that the officers or paramedics would be convicted of the offence recommended by the RCMP. CBC News

Ban Donald Trump and save breakfast cartoon characters: Notable petitions sponsored by federal MPs
Free the AR-15 - The AR-15 rifle — the much-maligned civilian variant of the M-16 — is classified as "restricted" in Canada. Just as it is with handguns, this means that the AR-15 can only be fired on a licensed gun range. The AR-15 doesn't shoot more or faster bullets than many non-restricted Canadian hunting rifles, but it made the restricted list largely because of its military appearance and violent cultural mystique. Calling the gun the "most versatile hunting rifle in the world," Newfoundlander Marc Bennett started this petition to once again get Canadians shooting non-paper things with their AR-15s. His efforts earned a pretty definitive "no" from **Public Safety Canada**. Or, as they put it, ***"the Government has no intention of using section 117.15 of the Criminal Code to change the classification of the AR-15."*** Vancouver Sun

Prince District RCMP advises of increased presence
Checkpoints were established in Tignish, Alberton, O'Leary, West Devon, Lennox Island and Borden, and the RCMP also partnered with police forces in Kensington and Summerside to conduct checkpoints in those municipalities. Journal Pioneer

Prolific offender caught in Beaumont Dec. 5
Submitted by the Beaumont RCMP. On December 5 at approximately 8 p.m. Leduc and Beaumont RCMP responded to a report that stolen property was being sold in the McDonald's parking lot in Beaumont. Police attempted to apprehend the suspect when he proceeded to ram two police vehicles with a stolen pickup truck in an attempt to evade police. Devon Dispatch

Charges laid against 2 after seizure of weapons, drugs and counterfeit cash
A list of drug and weapons-related offences have been laid against two people, after an Edmonton home was searched last month. Strathcona County RCMP began an investigation in October in relation to stolen property and drug possession and on Nov. 24, Edmonton police assisted with a search warrant in Edmonton. CKNW News AM 980

5 people wanted in connection to 1998 homicide of Tania Marsden, Manitoba RCMP say
Manitoba RCMP are on the lookout for three men and two women in connection to a homicide nearly two decades old. Tania Marsden was last seen alive on her 18th birthday on Sept. 9, 1998. Her body was found partially submerged and weighed down with a cement block, in the Assiniboine River on Sept. 29., nearly three weeks after she was last seen. Global News; CBC News; Postmedia Network (Ottawa Sun, Edmonton Sun, Toronto, Sun, Winnipeg Sun)

RCMP Report: National Impaired Driving Day was on Dec. 3
Clearwater Traffic Services issued two three-day immediate roadside prohibitions for alcohol and one 24-hour driving prohibition (under Section 215 of the Motor Vehicle Act) on National Impaired Driving Day, Dec. 3. Clear Water Times

RCMP CounterAttack in full force
With the holiday season in full swing, Kamloops RCMP are reminding drivers that roadblocks will be set up around the city for the next four weeks. According to the Ministry of Transportation, 66 people die every year from alcohol-related crashes with 35% of those right in the Interior. CFJC Today

RCMP share their drinking and driving enforcement experience
The public is used to hearing about stories from those impacted by drinking and driving. Those include stories from victims and their families, as well as from those dealing with the consequences of their decisions to drink and drive. But there aren't as many stories told about the impact on law enforcement responding to such instances. That's about to change. In Regina on Friday, Sgt. Al Hofland, acting officer in charge of traffic services in Saskatchewan, announced a social media campaign by the RCMP to tell the stories of police officers who have dealt with drinking and driving incidents. Battlefords News-Optimist

Shot fired at parked vehicle in Yorkton
RCMP are investigating after a parked vehicle was damaged by gunfire in Yorkton. Around 10:30 p.m. Monday, residents reported hearing a loud bang on the north end of First Avenue near York Road. CTV News

Drug busts in northern Manitoba
RCMP say they made two significant drug arrests in northern Manitoba this week. The north district Crime Reduction Enforcement Support Team, along with RCMP emergency response and police dog services, busted up two alleged drug operations in Grand Rapids on Friday and another in Chemawawin the following day. Winnipeg Sun

Man convicted in 2011 shooting death, disappearance of Cold Lake man
A 30-year-old man has pleaded guilty in the shooting death of a Cold Lake man almost six years ago. Tyler Arsenault of Cold Lake received a 23-month conditional sentence and a 10-year firearms prohibition Monday after pleading guilty in Court of Queen's Bench in St. Paul to careless handling of a firearm and offering an indignity to human remains, RCMP said in a news release. The victim, Dennis Cardinal, 40, was reported missing by friends and family to Cold Lake RCMP in December 2011 after having allegedly not been seen since Christmas 2010. An initial investigation was unable to locate him or explain his disappearance. Edmonton Journal

Two from Red Deer charged after allegedly trying to flee checkstop
A man and woman face criminal charges after allegedly fleeing an RCMP checkstop in a stolen vehicle and causing a serious injury collision in Red Deer on Saturday. As well over the weekend, RCMP charged eight impaired drivers during weekend checkstops and roving patrols. Red Deer Advocate; CBC News

N.B. RCMP investigating after firearms stolen from Canadian Tire
The RCMP are searching for a suspect, or suspects, after a number of firearms were stolen from a Canadian Tire in Riverview, N.B. Police say one or more individuals broke into the Pinewood Road store around 5:10 a.m. Saturday, causing damage to the main door. CTV News

Yukon RCMP has a new commanding officer
Scott Sheppard, a 27-year veteran with the RCMP, has taken over as head of Yukon's police force. The territorial government made the announcement Tuesday. CBC News

Cougars & Prince George RCMP team up to engage local youth
The Prince George RCMP are excited to announce a partnership with the Prince George Cougars Hockey Club. The Prince George Cougars will be providing police officers from the local Detachment with hockey cards to give out to youth in our community. WHL; Prince George Citizen

Toy drive continues at White Rock RCMP
The first of two three-hour efforts organized by White Rock RCMP to collect toys for the Salvation Army all-but-filled a police cruiser Sunday. "We loaded the back seat up to the ceiling and the front passenger seat," Const. Chantal Sears told Peace Arch News of the afternoon toy drive at Central Plaza. Peace Arch News

Police union head remains troubled by modest budget bump
Officials with the Winnipeg Police and police board are dismissing union concerns that a small percentage increase in the police budget for next year will result in longer wait times for 911 calls. Maurice Sabourin, president of the Winnipeg Police Association, told reporters Tuesday he remains troubled by the 1.3 per cent increase in the police budget for 2017. Winnipeg Free Press

Un Winnipegois accusé de pornographie juvénile
Le Service de police de Winnipeg a procédé à l'arrestation mardi d'un Winnipegois de 59 ans. Il fait face à des accusations de possession et de distribution de matériel de pornographie juvénile. Les policiers, qui ont mené une perquisition en octobre dernier, ont saisi du matériel informatique pour analyse. Des centaines de vidéos et des milliers d'images de pornographie juvéniles ont été récupérées. Radio-Canada ; CBC News

Ottawa's crybaby cops
An editorial states, "My, what a fragile, sensitive lot some Ottawa police are. When the deputy chief recently suggested there were patrol officers not pulling their weight, several took offence at her phrasing. One inspector described it as "shocking." What could have so dismayed the hardened men and women who take down criminals, help quell unruly protests and regularly interact with low-life scum? The offensive vocabulary, it turns out, consisted of the phrase "canine fornicators" - a euphemism uttered by Deputy Chief Jill Skinner during a November talk to frontline officers..." Ottawa Citizen

Inmate serving indeterminate sentence for murder dies at Regional Psychiatric Centre
A 65-year-old inmate serving an indeterminate sentence for second-degree murder died in custody at the Regional Psychiatric Centre on Sunday. According to assistant warden Tim Krause, Xavier Batoche was receiving palliative care. According to a news release issued Tuesday by Correctional Service Canada, Batoche was also serving time for impaired driving, driving while disqualified and obstructing a peace officer. He began serving his sentence in March 1985. StarPhoenix; CBC News

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

City of Surrey and Surrey RCMP launch City Centre Response Plan
The City of Surrey and Surrey RCMP have launched their City Centre Response Plan to address the public safety and public health concerns for both the homeless and the community in the 135A area. The plan will address three key areas: 1. Enhanced Outreach and Presence on 135A. 2. Emergency Housing. 3. Engagement and Education. "As is the case with all municipalities in the region, Surrey is facing increased challenges related to homelessness, mental health issues and fentanyl use," said Surrey

Mayor Linda Hepner. "With the City Centre Response Plan, we are taking tangible, concrete action on addressing the public safety issues that area businesses and residents are faced with on a regular basis, while addressing the public health challenges that affect the vulnerable who are easily preyed upon and exploited." Voice Online; CKNW NEWS AM 980

Violence against women has touched us all, Wynne says on anniversary of Montreal Massacre
Ontario Premier Kathleen Wynne placed roses in a vase at a ceremony in Toronto in memory of 14 women killed in Montreal 27 years ago. Wynne, along with Toronto Mayor John Tory, spoke at Women's College Hospital about the deaths at l'École Polytechnique on Dec. 6 in 1989. On this day in 1989, 14 women were shot and killed at the engineering school by a gunman professing to hate feminists. CBC News

'We have to keep reminding people:' Montreal Massacre remembered in Charlottetown
Islanders gathered Tuesday to remember the victims of the Montreal Massacre 27 years ago and to renew calls for an end to violence against women. Dec. 6 is the anniversary of the 1989 massacre at École Polytechnique in Montreal in which 14 female students were gunned down because they were women. CBC News

Halifax remembers Montreal's École Polytechnique victims
Red human-sized silhouettes of two Nova Scotia murdered women stood before a mostly female crowd who gathered in downtown Halifax Tuesday to remember the 14 women killed at Montreal's École Polytechnique 27 years ago. Doreen Bernard, a Mi'kmaq elder from the Sipekne'katik First Nation, prayed for the women's families and for missing and murdered Indigenous women, men and children across Canada. CBC News

Restorative Justice program success continues
Volunteers in Williams Lake have been facilitating restorative justice for almost 20 years. Getting its start in 1997 as a response to Williams Lake being the auto theft capital of Canada, the local committee has grown from a handful of volunteers to fluctuating between 35 and 45 active volunteers handling almost 50 files a year. In November, the group invited guests to its monthly meeting held at the Pioneer Complex, including some of the people responsible for starting the program. One of those original members was retired RCMP officer Jacques Drisdale who was trained in restorative justice with the RCMP in eastern Canada. Williams Lake Tribune

Opioid crisis wearing officers down
Police will have to train additional officers for its clandestine drug-lab team to prevent burnout from dealing with the growing opioid-overdose problem. The Winnipeg Police Board heard Tuesday about the strain on resources stemming from the often-deadly consequences of people abusing fentanyl and other opioids. Following the meeting, police chief Danny Smyth told reporters he was concerned there aren't enough members on the drug lab team. Winnipeg Free Press

La police recherche des témoins d'un crime haineux
La police d'Edmonton recherche un homme qui aurait approché deux femmes portant un hidjab avec un noeud coulant, en leur disant « C'est pour vous ». L'incident s'est produit vers 20 h 30, le 8 novembre, à la station de l'Université de l'Alberta du service de train léger sur rails. Radio-Canada

No concrete timeline for prison farm decision
Kingston and the Islands MP Mark Gerretsen told members of the Prison Farm Co-op last night that he has no news for them yet on the possible return of the farms. "I was really hoping to hear from the **minister's office** on what their decision was prior to the holidays, but they informed me two or three weeks ago they wouldn't have a decision before then," Gerretsen told the Whig-Standard on Friday afternoon before heading to the meeting. The decision on whether to reopen the prison farms rests with **Public Safety Minister Ralph Goodale**..."My intention tonight is to update everybody as to what I've done over the last year with respect to it, just to make sure I've been continuing to talk to **the minister**

and his office about the next steps," Gerretsen said. "And we're going to make sure the public consultation and information that was received from it is respected and utilized to make a decision."... Last month, Correctional Service Canada released a report from a survey on its website gauging Canadians' opinion on reopening the farms in some form or another... "My understanding, from what I've been told by **the minister's office**, is that they are currently reviewing the findings," Gerretsen said. Gerretsen said he doesn't have a timeline on a decision from **the minister's office**. "Not that I haven't been asking," he said. "I've been continually asking **the minister's office** for an update, but I haven't received anything to date."... Gerretsen said the challenge will be to combine the prison farm co-op plans along with plans from CSC and the **minister's office.** Whig-Standard

TOP STORIES / MANCHETTES

Ismael Habib a-t-il dit aux agents d'infiltration ce qu'ils voulaient entendre?
La Couronne a terminé sa preuve au procès du présumé sympathisant djihadiste Ismael Habib, à Montréal. L'avocat de la défense a tenté de soulever des doutes au sujet de la crédibilité de l'opération d'infiltration menée par la police. Habib aurait-il tout fait pour plaire aux agents d'infiltration afin qu'ils l'aident à retrouver sa famille? Pendant près de six mois avant son arrestation en février dernier, Habib était entouré de policiers de la Gendarmerie royale du Canada (GRC) qui formaient une fausse organisation criminelle. Le dernier témoin du ministère public était le cerveau qui élaborait les scénarios d'infiltration au sein de la GRC. En tant qu'agent couvreur, c'est lui qui donnait des directives aux agents d'infiltration. Il a expliqué que pendant l'opération, la police pouvait compter sur l'aide d'un « agent civil », un commerçant prénommé Lyes qui avait la confiance d'Ismael Habib. Radio Canada ; CBC News

Border agent charged in smuggling tobacco probe at Peace Bridge
The RCMP says a Canada Border Services Agency officer has been charged in a smuggling investigation. The Mounties say the arrest came as part of a joint forces investigation that focused on a criminal organization that was allegedly smuggling truckloads of contraband tobacco into Canada from the United States. They allege the group's smuggling activities were facilitated by a CBSA border services officer working at the Peace Bridge in Fort Erie, Ont. Investigators say arrests and seizures were made simultaneously in Canada and the U.S. but gave no other details. Police say 37-year-old Chad Gale of Welland, Ont. is charged with breach of trust by a public officer. CBSA southern Ontario regional director Rick Comerford called it a very serious matter. "It is an isolated incident and in no way reflects the integrity and professionalism of the thousands of dedicated CBSA officers who carry out their duties each day in an exemplary manner," Comerford added. Canadian Press (CP24, Globe and Mail, CTV News, Global News, Metro News, Toronto Star); CHCH

Investigation clears Alberta RCMP officers of any wrongdoing in shooting death
An investigation has cleared Morinville RCMP officers of any wrongdoing in the 2015 shooting death of a man with a "history of significant mental illness and conflict with the law." In a detailed report released Friday, the Alberta Serious Incident Response Team found the officers involved were "acting lawfully and the use of force was reasonable and justified in all the circumstances." Edmonton Journal; AM 630 CHED; CBC News

Lawyers, judge concerned about RCMP's handling of video evidence
A Yukon territorial judge has raised concerns over the RCMP's handling of video evidence. Judge Michael Cozens acquitted John Lavallee of impaired driving on Nov. 2 but criticized the RCMP for losing the video from the police cruiser's onboard camera. "The preservation of police audio and video recordings is of great assistance to a court in determining the actual circumstances of an arrest or the nature of any interaction between an accused person and the police," Cozens wrote. Yukon News

UPDATE: Winnipeg company 'ecstatic,' intends to maintain new search-and-rescue planes in city
A multibillion-dollar deal to purchase a new fleet of search-and-rescue planes will likely see a maintenance hub created in Winnipeg. On Thursday morning, the federal government announced it is purchasing 16 Airbus C-295W planes. The $4.7-billion deal also includes the creation of a training centre in British Columbia and includes a subcontract with PAL Aerospace, a company owned by Winnipeg's Exchange Income Corporation, to help with maintaining the new fleet. CBC News; Bloomberg News (Calgary Herald)

$4M boost for Coast Guard headquarters in St. John's
The Canadian Coast Guard Atlantic headquarters in St. John's is getting $4 million in federal cash for upgrades. The work includes removing sediment near the dock to create deeper water, so Coast Guard's larger vessels can use the wharf adjacent to the headquarters. CBC News

B.C. gives OK to drone pilot project for search and rescue in two communities
Drones will be used by search-and-rescue crews in two communities in British Columbia as part of a one-year pilot project. The drones will be used in Coquitlam and Kamloops with the blessing of Emergency Management B.C. Canadian Press (Vancouver Sun)

EMO meets with Sydney homeowners to discuss disaster relief details
Owners of 18 Sydney homes deemed uninhabitable after the Thanksgiving Day floods are in the process of learning what compensation they will receive from the province. On Thursday, the homeowners began individual meetings with officials from the Nova Scotia Emergency Management Office at a downtown Sydney hotel. Cape Breton Post

Trudeau must face facts on Iranian regime
An opinion piece states, "The Trudeau government is quietly working to strike a deal with the Islamic Republic of Iran. After becoming Prime Minister, Trudeau lifted virtually all economic sanctions against Iran. During the UN General Assembly meeting in September, Foreign Affairs Minister Stephane Dion met with regime officials to discuss the status of Canada-Iran relations... Besides the safety of our diplomats, there are many other reasons why Canada cut ties with Iran. Its elite military unit – the Iranian Revolutionary Guards Corp – is listed as a terrorist entity under Canada's Criminal Code. Iran openly funds and trains other terrorist groups, including Hamas, Hezbollah and the Taliban..." Toronto Sun

Ambassador Bridge company responds to Supreme Court decision
The Ambassador Bridge company says it's looking forward to resolving a dispute with the City of Windsor over the fate of several dozen rotting homes on the city's west end. The company was responding to Thursday's Supreme Court of Canada decision, siding with the municipality over the issue of jurisdiction. The court ruled that the issue should be heard in Windsor's superior court, rather than federal court, where the bridge wanted the matter decided. Windsor Star

Asbestos ban to be announced by federal government next week
The federal government plans to announce a comprehensive ban on asbestos in Canada next week, CBC News has learned. The country currently allows imports of construction products and automotive parts that contain the toxic fibre, even though Canada no longer exports the material. CBC News

Dead man left police no choice, final witnesses tell inquest
An inquest into the 2008 police shooting death of an indigenous man in Winnipeg - the first in Manitoba to specifically consider the role of racism - heard from its final witnesses Friday. Two officers responsible for use-of-force training with the Winnipeg Police Service and the RCMP said the police who shot Craig McDougall acted appropriately and that bias-free police training wouldn't have changed the outcome. Winnipeg Free Press

Widow of slain Mountie makes plea for Wynn's Law
The widow of murdered St. Albert RCMP Const. David Wynn vowed Friday to "fight a lifetime" to see a bail-reform bill become law. "I will fight a lifetime for this to pass if I have to," Shelly MacInnis-Wynn told a news conference organized by St. Albert-Edmonton MP Michael Cooper. CBC News

RCMP investigation of Winnipeg police HQ remains active
The RCMP investigation into Winnipeg's police headquarters remains active as the two-year anniversary of the criminal probe approaches. Winnipeg Mayor Brian Bowman said the Mounties recently contacted the city to request additional information pertaining to their investigation of the $214-million police-HQ project, which was completed this summer after three years of delays, $79 million worth of cost overruns and two external audits. CBC News

Time to saddle up: A new graduate for the RCMP's Musical Ride talks about horses, tradition and Canada's 150th birthday
The RCMP Musical Ride held its graduation ceremony, known as "Passing-Out," on Friday. Among the new graduates is Const. Mathieu Crousset, who says he's "very humbled to have this opportunity to represent the RCMP." The Musical Ride is based on cavalry drill movements. The riders and their horses are invited to perform at about 50 events a year in Canada and abroad. Last May, they performed at the Queen's 90th birthday celebrations. The equitation course, which teaches horsemanship, is the second-longest RCMP course, with only recruit training in Regina taking longer. As the newest graduates, these riders will be among the official riders in the Canada 150 tour. We asked Const. Crousset a few questions: Q: Tell us a little about yourself. A: I was born in Langley, B.C. I'm a second generation RCMP member and my father was posted in Surrey, B.C. Our family was transferred to Ottawa when I was a year old, and I grew up in Gatineau. Ottawa Citizen

Lawyers, judge concerned about RCMP's handling of video evidence
A Yukon territorial judge has raised concerns over the RCMP's handling of video evidence. Judge Michael Cozens acquitted John Lavallee of impaired driving on Nov. 2 but criticized the RCMP for losing the video from the police cruiser's onboard camera. "The preservation of police audio and video recordings is of great assistance to a court in determining the actual circumstances of an arrest or the nature of any interaction between an accused person and the police," Cozens wrote. Yukon News

RCMP renew call for help in cold case murder
RCMP are looking for the public's help for tips in the 2007 murder of a Portage la Prairie grandmother. Mounties renewed their plea Friday less than three weeks after issuing a press release asking for people to come forward with information in the 2007 death of Charlene Ward. Winnipeg Sun; CBC News

Drug ring shut down
A large drug ring, allegedly operating out of West Kelowna, has been shut down by RCMP. Following what police call a "significant" two-month investigation, RCMP say they gained enough information on the West Kelowna operation to indicate it had been supplying drug dealers and drug houses, primarily in Kelowna. Castanet.net; Global News

Red Deer woman charged in counterfeiting scheme
RCMP has laid charges against a Red Deer woman and is looking for another woman and a man in connection with a counterfeit cash scheme in Drumheller. In mid-November, police were called by a local business that a pair of women came into their store and bought a large amount of merchandise with counterfeit U.S. cash. CTV News

'Stuff the Cruiser' to collect donations for Christmas Amalgamated
Kamloops RCMP's annual 'Stuff the Cruiser' event takes place tomorrow. RCMP, BC Sheriffs and community volunteers will be at Walmart and Toys-R-Us between 10:00 a.m. and 3:00 p.m. collecting new toys and other items to go towards families in need this Christmas. CFJC Today

RCMP dog handler describes how he and his dog tracked suspect
An RCMP dog and his handler followed a scent that started near a Cornwall break-in to where the alleged "screencutter" parked his car, a judge heard Friday in provincial court. That was part of the testimony during the fourth day of Richard Joseph Arsenault's trial before Chief Judge Nancy Orr in Charlottetown. Charlottetown Guardian

Thieves use key to access mail in Surrey townhouse complex
While mail theft is a common problem across Metro Vancouver, you don't usually see perpetrators casually opening up mailboxes with a key. But that's exactly what happened Saturday morning at a townhouse complex in Surrey, where two suspects managed to make off with a veritable Santa's sack of stolen mail. Fortunately, the entire thing was caught on the complex's surveillance camera... The RCMP said it is investigating the theft, and that officers already have a pair of suspects in mind. No one has been arrested yet, however, and no charges have been laid. Canada Post also confirmed its security team is working with Mounties on their investigation, but the agency would not comment further. CTV News

Cinq suspects arrêtés dans deux opérations anti-tabac
Deux opérations policières visant des présumés contrebandiers de tabac ont permis l'arrestation de cinq suspects, mercredi, en Montérégie. Dans un premier temps, à Saint-Anicet, les policiers ont arrêté trois hommes et une femme, âgés de 20 à 25 ans, soupçonnés de faire partie d'un réseau de contrebande de tabac opérant dans le secteur. La perquisition menée au cours de la journée a permis la saisie de plus de 1,2 tonne de tabac en vrac... L'opération, à laquelle participaient la Sûreté du Québec et la Gendarmerie royale du Canada, a été rendue possible grâce à des informations fournies par le public. La journée de mercredi a donné lieu à une deuxième opération policière en matière de tabac illégal. Agence QMI (TVA Nouvelles)

Indigenous Val-d'Or residents face racial profiling, systemic discrimination, study suggests
A report released today suggests that police in Val-d'Or are racially profiling Indigenous people. Researchers Céline Bellot from l'Université de Montréal and Marie-Eve Sylvestre from the University of Ottawa conducted the study. They looked at how law enforcement and homelessness intersect in the city 600 kilometres northwest of Montreal. CBC News

Peel police chief subject of $21M lawsuit alleging interference
CityNews has learned Peel Regional Police Chief Jennifer Evans has been named in a $21-million lawsuit alleging interference in a controversial police shooting. In March 2015, Peel police responded to a neighbour dispute in Mississauga. A suspect was shot and killed. But a stray police bullet hit an innocent woman in the back as she was standing in her kitchen. 680 News

Amherstburg police is the first in Ontario to introduce the "sock gun" to all its officers. The latest crime-fighting tool fires beanbag-type bullets designed for use when someone is out of reach of a Taser. CBC News

Saskatoon teacher Rhett Lundgren facing child porn, child sex charges after police investigation
A 39-year-old teacher at a Saskatoon high school is facing child pornography charges following an investigation by the Saskatchewan Internet Child Exploitation unit. Rhett Jeffrey Lundgren, 39, has been charged with two counts of arranging to commit a sexual offence against a child and one count of attempting to access child pornography, Saskatoon police announced Friday. Lundgren appeared Friday in Saskatoon provincial court, where he was released on several conditions. StarPhoenix

Jonathan Bettez surveillé sans relâche par la SQ au cours de la dernière année
Jonathan Bettez a été traqué, littéralement, par les policiers de la Sûreté du Québec, dans l'année précédant son arrestation du 29 août dernier. Une surveillance qui s'est intensifiée à partir du 11 décembre 2015. Quelques jours plus tard, les policiers ont installé un dispositif sur son véhicule, un Infiniti G35, leur permettant de suivre ses allées et venues durant plus de sept mois. C'est ce qu'a pu apprendre Radio-Canada dans les dénonciations des policiers de la SQ, qui ont servi à son arrestation, le 29 août dernier. Il fait face à 6 chefs d'accusations de possession et de distribution de pornographie juvénile. Radio Canada; La Presse

London Police - Carding Q&A with Chief John Pare
Ontario is banning carding as it's now practised. London politicians want it scrapped entirely. London police disagree. As new rules on carding begin Jan. 1, police Chief John Pare weighs in on the

crackdown on randomly stopping and questioning people not under investigation. Jennifer O'Brien sat down with the chief. Police board chair Jeanette Eberhard was also there and spoke to some of the issues. London Free Press

Boy, 16, arrested after online threat puts 50 Ontario schools into 'hold and secure'
Provincial police have arrested a 16-year-old boy after a threat was made via Twitter on Friday morning involving the Trillium Lakelands District School Board in central Ontario. As a result, all Trillium Lakelands schools – both elementary and secondary – in Kawartha Lakes, Haliburton County, and Muskoka were put into a hold and secure… The hold and secure was lifted at the approximately 50 schools after about two hours. Recovering opioid addict pushes province to reconsider detox in Nova Scotia
After being in and out of detox programs multiple times, Danielle Noade says she didn't stop injecting drugs until she went to jail six months ago. Noade, 24, says the confines of a locked cell at the Central Nova Correctional Facility in Dartmouth, N.S., forced her to decide it was finally time to focus on recovery. CBC News

MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Trudeau still faces huge challenges if he wants to help indigenous Canadians
An editorial states, "The Kitigan Zibi Anishinabeg Algonquin band in West Quebec has filed suit against the federal and Ontario governments and the National Capital Commission over title to the land that includes the Parliament buildings and LeBreton Flats. It's the latest challenge facing Prime Minister Justin Trudeau as he works to improve the lot of indigenous Canadians… Consider the forest of pledges he made even before winning office: fixing chronic underfunding of education; preserving languages and

cultures; rebuilding schools; launching a public inquiry into murdered and missing indigenous women, enacting all 94 recommendation of the Truth and Reconciliation Commission; renewing the "nation to nation" relationship. None of these carries easy fixes... Earlier this week, the prime minister explicitly promised an Indigenous Languages Act. And while there has been early grumbling, the Inquiry into Missing and Murdered Indigenous Women and Girls is underway..." Ottawa Citizen

New counter-radicalization office head could be named before Christmas
The list of candidates to lead the government's new Office of Community Outreach and Counter-Radicalization is down to the final two, and an announcement naming the new head could be made before Christmas. ***"It's down to a shortlist of two and they're both excellent,"*** said **Public Safety Minister Ralph Goodale** in a scrum with reporters outside of the House of Commons public safety committee, where he spoke on supplementary estimates. "***It's very hard to make the choice. I'm hoping to make the announcement, if not before Christmas, then very early in the new year of this individual***." The creation of the new office, aimed at supporting community efforts to tackle radicalization,

formed part of the Liberals' 2015 campaign platform. In the 2016 budget, the Trudeau government earmarked $35 million over five years for the new office, with $3 million of that coming in its first year and ongoing funding of $10 million a year after that. But while the pledge earned praise from researchers and community advocates working on the front lines of counter-radicalization, few details have been made public about how the office will actually operate. **Goodale** shed some light on that before the committee Wednesday evening, saying that the government has been and will continue to deliver funding to counter-radicalization projects through an arm of the office called the Community Resilience Fund; a federal contribution to the recent UNESCO conference on radicalization held in Montreal this fall was the first grant approval through the fund. ***"That's the only initiative so far that's been taken,"*** said **Goodale**. ***"For the vast majority of the future funding I want to have the benefit of the Special Advisor that we are recruiting***." iPolitics

La liberté de presse, une valeur fondamentale!
Un article d'opinion par le député Matthew Dubé note, « En octobre dernier, La Presse a révélé que le journaliste Patrick Lagacé s'était fait surveiller par la police de Montréal. Ces révélations extrêmement troublantes nous rappellent que le gouvernement fédéral n'est pas sans blâme en ce qui concerne la surveillance des journalistes. En 2007, le journaliste de La Presse Joël-Denis Bellavance a été filé par la GRC. En effet, depuis 2003, une directive ministérielle fédérale demande aux forces policières de porter une « attention spéciale » au statut des médias dans le cadre d'enquêtes sur la sécurité nationale. Ces attaques à la liberté de presse s'ajoutent au cas du journaliste de Vice, Ben Makuch, qui risque la prison parce qu'il refuse de divulguer ses sources à la GRC. J'ai interpelé le ministre de la Sécurité publique, Ralph Goodale, à plusieurs reprises lors de la période des questions à Ottawa ainsi que dans le cadre d'une conférence de presse en partenariat avec la Canadian Journalists for Free Expression et les journalistes Ben Makuch, Mohamed Fahmy et Patrick Lagacé. » Chambly Matin

RCMP paid for info from civilian source during Habib investigation
While investigating Ismael Habib in late 2015, the RCMP was paying a Montreal clothing store owner who was well-connected in the Muslim community to feed them information. The man was described as a practising Salafist, a strict interpretation of Islam, who operates a second-hand clothing store on Jean-Talon St. Montreal's Muslim community gravitated around the store, an RCMP officer testified at Habib's trial on Friday. The officer said the man, in his mid-40s, acted as a mentor to young Muslims in the city and was used to build trust between Habib and the undercover RCMP agents investigating him. Habib is on trial for trying to leave Canada to commit terrorist acts abroad and giving false information to obtain a passport. In late 2015, he was involved with several undercover RCMP agents pretending to be an underground crime ring capable of obtaining falsified passports and getting people out of the country by boats leaving from the Port of Montreal. On Friday, defence lawyer Charles Montpetit cross-examined an RCMP officer who oversaw the sting operation. e officer said the store owner wasn't technically part of the operation, but was paid every time he handed over information on Habib. Montpetit questioned whether the man had his own motives, given that he wasn't paid if he didn't have new information. Montreal Gazette

Quebec terror trial adjourned until Jan. 23 for Mr. Big arguments
The Crown has rested its case at the trial of a Quebecer charged with attempting to leave the country to participate in the activities of a terrorist group. Ismael Habib is also charged with giving false information in order to obtain a passport. The trial is now adjourned until Jan. 23, when lawyers will argue whether the judge should disregard some of the evidence. Habib's lawyer intends to challenge the admissibility of a confession extracted by undercover agents, suggesting it was obtained in a Mr. Big operation, in which officers pose as criminals. A Mountie who designed the elaborate scenarios involving the undercover agents was the final prosecution witness.

Suspect in 2010 Scarborough homicide located in Malaysia, returned to Toronto
A suspect in a 2010 vehicular homicide that occurred in Scarborough six years ago was recently located in Malaysia and has been brought back to Toronto to face a second-degree murder charge. On March 13, 2010 at 3:11 a.m., police said they were called to 1641 Pharmacy Avenue in Scarborough for a report of a fail to remain collision. Twenty-five-year-old Nanthi Eashan Dharmaratnam was pronounced dead at the scene. Investigators allege he was deliberated struck and killed by a man driving a car. A post-mortem investigation found Dharmaratnam died as a result of blunt head trauma and injuries to the torso. A warrant was issued for a suspect identified as Seran Kasilingam, 28. He was wanted for second-degree murder. It was believed at the time that he fled Canada. A video appeal for witnesses was released to the

public in Feb. 2016. On Aug. 26, authorities located the suspect in Kuala Lampur, Malaysia. RCMP and Canada Border Services agents made arrangements to return him to Toronto. CP24

Toronto Police seize $2.5 million in counterfeit goods as holiday season starts
As the holiday season approaches, Toronto Police are warning the public to be vigilant with their gift-giving after they seized $2.5 million in counterfeit goods. In the investigation, Project Lucky Chan, the police executed four search warrants around the city. The first warrant was executed at the main floor of a hotel, which happened to be hosting an international anti-counterfeiting conference, Det. Rob Whalen said in a news conference, Friday morning. (…) Hock Chan, 46, of Mississauga has been arrested and charged with one count of possessing property obtained by crime, possessing property obtained by crime with the purpose of trafficking, fraud over $5,000 and passing of wares. In addition, two illegal immigrants who were assisting in the sale of these products were arrested and detained by Canadian Border Services, investigators said. Toronto Star

DNA barcoding could help end food fraud
Eating bread with eggs, butter or jam for breakfast is a ritual at Ryerson student Monica Mejia's household. But her four-year-old nephew is gluten intolerant and can't join in. "Knowing that he won't be able to do that, it's heartbreaking," Mejia, a fourth-year global management student and volunteer at Ryerson's Good Food Centre, said. "So we have to find alternatives for him to replace that." (…) While CFIA sets the regulations and policies for imports, the Canada Border Services Agency (CBSA) shares the responsibility for enforcing them during their initial inspection of food, agricultural inputs and agricultural products at entry points. The Eyeopener

Striking Blue Water Bridge workers reach tentative deal
Workers at the Blue Water Bridge have reached a tentative deal with their employer after nearly three weeks of job action. Members of the Public Service Alliance of Canada walked off the job Nov. 21, saying the federal bridge corporation was trying to slash their benefits in the latest contract negotiations. Union officials representing the 47 workers said they reached the tentative agreement Thursday evening after a full day of talks. The union met with workers Friday morning to review the details of the proposed deal. CBC News

Obama demande une enquête sur le piratage de l'élection présidentielle
Barack Obama a demandé aux agences américaines du renseignement d'ouvrir une enquête sur le piratage informatique et sur l'intervention de puissances étrangères dans le déroulement de la campagne présidentielle aux États-Unis cette année. Le président américain a souhaité qu'un rapport lui soit remis sur ce sujet avant qu'il quitte la Maison-Blanche le 20 janvier, a déclaré Lisa Monaco, conseillère à la sécurité intérieure, vendredi. Radio Canada; Agence France-Presse (La Presse); Politico

Canadian Cyber Threat Exchange ready to start membership push
After months of planning the country's first national IT threat service has issued its first threat report to a few early members and is ready to launch a campaign to expand its numbers, including lowering its fee for small businesses… Directors of the exchange come from some of the country's biggest enterprises including Air Canada, Bell Canada, Canadian National Railway, Manulife, Telus, TD Bank and Royal Bank. While many CISOs and infosec pros already get information from vendors, blogs and some threat data from vendors and services they subscribe to, the not-for-profit CCTX hopes to show value by tailoring reports and threat feeds for Canadian customers who don't want to know about the latest malware sweeping other parts of the world. The exchange also differs from other threat intelligence groups set up by industry associations and limited to verticals such as the healthcare or financial sectors by having a broad audience. The cross-industry appeal of the exchange has drawn the admiration of Rick Howard, chief security office of Palo Alto Networks, who was one of the keynote speakers at Wednesday's symposium and who believes the CCTX is the first national threat exchange in the world. IT World Canada

Ransomware Jumps Threefold in 2016
Ransomware attacks on businesses grew threefold this year to reach one every 40 seconds by October, according to new data from Kaspersky Lab. The Russian AV firm claimed that attacks came once every two minutes at the start of the year. For individuals it was even worse, with Kaspersky Lab calculating one attack every 10 seconds by Q3, up from once every 20 seconds at the beginning of the year. Some 20% of organizations worldwide suffered an IT incident as the result of a ransomware infection this year, and the same percentage of small businesses never got their files back even after paying up. That chimes with separate research from Trend Micro from earlier this year which claimed that one in five UK firms it polled were left without a decryption key after they paid the ransom. While Kaspersky Lab was at pains to point out there's no such thing as a low-risk sector, education was worst hit, accounting for 23% of all attacks, while retail and leisure (16%) was least affected. Infosecurity Magazine

Yahoo fixes flaw allowing an attacker to read any user's emails
Yahoo has fixed a severe security vulnerability in its consumer email service that could have allowed an attacker to read a victim's email inbox. The cross-site scripting (XSS) attack only required a victim to view an email in Yahoo Mail. The internet giant paid out $10,000 to security researcher Jouko Pynnonen for privately disclosing the flaw through the HackerOne bug bounty, In a write-up, Pynnonen said that the flaw was similar to last year's Yahoo Mail bug, which similarly let an attacker compromise a user's account. Yahoo filters HTML messages to ensure that malicious code won't make it through into the user's browser, but the researcher found that the filters didn't catch all of the malicious data attributes. He explained that sending a specially crafted email could have trigged malicious JavaScript to be immediately executed. Pynnonen said in an email that exploiting the flaw was "rather easy," but finding the bug was difficult. ZD Net; Security Week

US government seeks more data on Apple customers
Apple has seen a sharp year-over-year increase in the number US government demands for customer data. The company's first biannual report this year covers how many demands were made from global law enforcement and intelligence agencies -- including the US government -- for data it stores. Apple said it reviewed 4,822 demands for device data from US authorities, affecting 10,260 devices, an increase of 26 percent on the same period a year earlier. The company said that it was compelled to turn over data in over three-quarters of all cases. Additionally, the company received 1,363 demands from US authorities, the top requesting country, affecting 9,090 accounts. Apple turned over data in 84 percent of those cases. ZD Net

Government spies surveil phones in flight, report says
Turns out the skies are not so friendly after all, at least as far as privacy is concerned. American and British intelligence agencies have been surveilling cell phone use on commercial flights since 2005, according to a new investigation by Le Monde based on documents leaked by former NSA contractor Edward Snowden. As journalist and digital media teacher Dan Gillmor tweeted, it's "another good reason to use airplane mode when you're on the plane." But just turning on your phone when the plane is above 10,000 feet reveals your location to the NSA, according to 2010 internal NSA newsletter posted by Le Monde... Le Monde goes on to explain how the spy agencies can extract information like email addresses and Skype and Facebook ID data and then correlate it with flight and passenger data to pinpoint a particular user. They can also reportedly see what you're doing on your phone, be it looking through email or using a travel app. CNET; CSO Online; Le Monde

Russian cyberspies likely behind DNC breach move on to German election
A group of suspected Russian cyberspies blamed for interfering in the U.S. election is also attempting to influence the upcoming vote in Germany, according to the country's domestic intelligence agency. The Russian hacking group known as Fancy Bear or APT 28 has been targeting political parties in the country, Germany's Federal Office for the Protection of the Constitution (BfV) intelligence agency said in a statement Thursday posted online by Politico. The hacking activities have led to a surge in spear-phishing email attacks directed at German politicians, the agency said. CSO Online

Georgia Tech's $17 Million Rhamnousia Project and the Difficulty of Attribution

The Georgia Institute of Technology, Georgia Tech, has been awarded a $17.3 million contract to develop a scientific method for cyber attack attribution. Dubbed Rhamnousia after the ancient Greek spirit of divine retribution, the project will use machine learning (ML) technology to discover the groups behind different cyber-attacks. Security Week

What are Australia's policy options for responding to the internet threats of 2022? This question was explored in the 360° Cyber Game conducted jointly by RAND Corporation and the National Security College (NSC) at the Australian National University (ANU) in Canberra on Thursday. ZD Net

LAW ENFORCEMENT / APPLICATION DE LA LOI

From Standing Rock to Trans Mountain, dissent is in the pipeline
Melina Laboucan-Massimo, a Lubicon Cree, grew up in Alberta's oil country. Since the age of 7, she has joined blockades and protests aimed at protecting her community's traditional lands from resource development. "I was born into it," she said in an interview. "It's my inheritance." (…)Now, some indigenous leaders are pledging to use the tactics of Standing Rock to block the two pipeline projects approved last week by the Liberal government: the bitterly fought expansion of Kinder Morgan's line that runs to Vancouver Harbour, and Enbridge's lesser-noticed plan to rebuild and expand its Line 3, a main oil export line from Alberta to the U.S. Midwest. (…)Now, some indigenous leaders are pledging to use the tactics of Standing Rock to block the two pipeline projects approved last week by the Liberal government: the bitterly fought expansion of Kinder Morgan's line that runs to Vancouver Harbour, and Enbridge's lesser-noticed plan to rebuild and expand its Line 3, a main oil export line from Alberta to the U.S. Midwest. (…)At a symposium last month in Ottawa, security experts from government, law enforcement, industry and academia gathered to discuss "the challenges of dealing with natural-resource development projects and activism." Several speakers at the closed-door session spoke on emerging threats from the indigenous community. An RCMP document from 2015 tracked the aboriginal protest events – largely against natural-resource projects – and identified 313 individuals who had participated in them. Of those, 89 were judged to have some propensity toward criminality, and their names are being kept in a data base. "Some of these individuals advocate unlawful, and at times, violent protest tactics and techniques, yet there is no known evidence that these individuals pose a direct threat to critical infrastructure, the RCMP's "Project Sitka" report concluded. (…) "The situation at Standing Rock is going to be brought to a head and it's going to get real ugly," Mr. McConachy predicted. If he's right, Canada will be looking for new lessons to draw from the Sioux standoff. Globe and Mail

RISK IT OUT: Chronic understaffing a longstanding challenge at Vernon RCMP detachment
Chronic understaffing isn't a new problem for Vernon RCMP detachment — it has plagued the department for years, and it's not the only detachment facing the dilemma. Back in 2013, former Supt. Reg Burgess said the North Okanagan detachment, which includes Vernon and outlying communities, consistently faced 15 to 20 long term absences at any given time for the past several years. At the time, Burgess, who retired in 2015, said the detachment was operating with between 19 and 27 resources unable to perform duties at any given time. "This high percentage of non-operational resources often puts us short of the minimal resource levels in any of our areas resulting in excessive overtime, insufficient vacation time, compounded fatigue and stress which in turn contribute in part to our medical absences. Shortages affect sufficient developmental training time for members. They also significantly reduce our ability to conduct proactive policing such as undercover operations and high visibility random patrols," Burgess said in a report to Vernon councillors. Sources say those same issues continue to impact the detachment today, with chronic understaffing leaving some watches running short of the minimum manpower needed for officer safety. At times, watches are as low as three officers in the City of Vernon due to difficulty filling shifts, sources say, forcing remaining officers to 'risk it out' when they go on shift. InfoTel

Mounties ditch bodycam plans
Canada's Mounties might always get their man, but they're not going to be using body cameras to help their crime detection rates. The Royal Canadian Mounted Police (RCMP) said earlier this week that after

a feasibility study, it would hold fire on buying and deploying body cameras across 750 detachments "until such time as available technology can meet its specific operational requirements". While studies such as one carried out across some 2,000 police officers in the US and the UK by the University of Cambridge's Institute of Criminology have found that there's a sharp drop in the number of complaints against police – the Cambridge study said the drop was 93% – privacy campaigners have long disliked the trend for police officers to use body cameras. The Mounties seem mostly to be concerned about the quality of the tech and its fitness for purpose with the cameras they looked at, saying: "The RCMP needs to have confidence in the product and ensure that the choice of technology justifies the investment of taxpayers' money." However, they also noted the privacy issues, adding: "The RCMP will continue to work closely with the Office of the Privacy Commissioner to ensure privacy considerations are assessed when body worn cameras are deployed in operational settings." Naked Security

Calgary man wanted in organized crime bust surrenders to police
A man who was the subject of a Canada-wide warrant in connection with a major organized crime investigation has turned himself in to Calgary police. Andrew McGuire, 41, was one of 10 Calgarians implicated in the year-long probe that culminated late last month. The investigation by the Alberta Law Enforcement Response Teams (ALERT) netted 111 charges against the 10 men — related to drugs, firearms and organized crime. (…) The investigation involved the help of RCMP in Vernon and Sicamous, B.C. It also involved Public Prosecution Services Canada, Combined Forces Special Enforcement Unit British Columbia, Canada Border Services Agency, Criminal Intelligence Service Alberta, and Financial Transactions and Reports Analysis Centre. CBC News

Creep-catching crusade comes to Richmond
"We just want these creeps off the street." The leader of the Richmond and Vancouver chapter of Creep Hunters Canada, Brendon Brady, explained his group's motivation after they managed to lure a 36-year-old man to a McDonald's, where the suspect believed he was meeting a 15-year-old girl he'd been chatting with online. The confrontation and "catch" two weeks ago at McDonald's on Alderbridge Way was the group's first in Richmond and led to the man in question being arrested at the scene by the police for suspected child luring. Brady, 31, and a fellow Creep Hunter member handed over their online evidence and video footage to police at the scene and, according to Richmond RCMP, the man has been released on strict conditions while the police continues its investigation. (…) However, the RCMP also stated that it does not condone or recommend vigilantism. "Obtaining proper evidence required for this type of crime is very specific," said Richmond RCMP's Cpl. Dennis Hwang. "When individuals choose to bypass law enforcement to take matters in their own hands, investigations can be jeopardized, key evidence may become lost, and the individuals may jeopardize their personal safety and that of others." Richmond News

Hells Angel testifies he strung along police informant over cocaine shipment
A member of the Hells Angels says he never intended to ship cocaine from Ontario to Saskatoon but strung along a police informant because the man was his sole source of drugs for his back pain. Rob Allen, 36, testified Wednesday at his trial for cocaine trafficking, charges laid under the RCMP's Project Forseti, which saw 19 locations raided across Alberta and Saskatchewan. Noel Harder, the Crown's only witness in the case, has testified police instructed him to continue working on a plan to see Allen organize the movement of cocaine between the provinces. Allen testified that Harder pestered him constantly about using his contacts with Hells Angels in Ontario to get cocaine. Under questioning from the Crown, Allen insisted he never had any way of actually getting cocaine delivered to Saskatoon, but said he strung Harder along in order to avoid losing his source of OxyContin, which he became hooked on after injuring his back. Canadian Press (CFJC Today)

Alberta Mounties poring over new documents in little girl's death
Alberta RCMP are now going through thousands of pages of new information as they investigate the death of a 4-year-old girl who had been placed in kinship care. Serenity died in hospital of a massive brain injury in 2014, with her guardians saying she fell off a swing, but there are reports she was malnourished with signs of physical and sexual abuse. There have been calls for Alberta's Human Services minister to step down over how long it took the Mounties to get the new information they were

looking for, but Inspector Gibson Glavin says they did not ask for the documents until this summer, received them on Nov. 22 in a format they were unable to open, and got them open on Dec. 6. iNews880

Crime Stoppers tip line is back in Yukon
Five years after Yukon's last Crime Stoppers program folded, the tip and reward program is back in operation in the territory. Officials with the RCMP, the Yukon government, and the Yukon Community Crime Stoppers Association, held an event on Thursday to launch the program. "It is an effective tool," said RCMP Insp. Brian Jones, who is head of criminal operations with the Yukon force. "The anonymity that the program provides is critical to the success of that program, and that anonymity is respected throughout the program." CBC News

2 men handed lengthy prison sentences in J-Tornado drug case
Two Saint John-area men arrested as part of the RCMP's Operation J-Tornado in 2014 have both been handed lengthy prison sentences for their role in a criminal organization and cocaine-trafficking ring. Shane Williams, 34, of Smithtown, was sentenced to nine years and 11 months, while Joshua Kindred, 40, of Saint John, received six years. Williams, as the head of the criminal organization, deserved to get a serious sentence, Court of Queen's Bench Justice William Grant said on Friday. Kindred was not as culpable because he was not a member of the criminal organization; he operated in association with it, Grant said. The two men, who were both convicted in September, showed little reaction to their sentences, which work out to approximately six-and-a-half years and two-and-a-half years respectively with time already served in custody taken into account. (…) During the 65-day trial, the court heard the RCMP used a paid agent to distribute BlackBerry smartphones to drug suspects and lead them to believe the phones were immune to police surveillance. Instead, emails from the smartphones were routed directly through RCMP servers, with more than 30,000 messages intercepted and analyzed by police. CBC News

Four stores owned by local couple raided by RCMP, Revenue agency
Investigators with the Canada Revenue Agency, backed by RCMP officers, raided a string of convenience stores owned by a local couple Thursday. The first raid appeared to be at the Glebe Smoke Shop on Bank Street near Fifth Avenue Thursday morning. About half a dozen officers were in the 24-hour convenience store which stocks a large selection of magazines and tobacco products, according to an employee who answered the phone. The employee said the agents had not told him why they were in the shop, which recently reopened after a renovation, and deferred all comments to the store's owner. Agents were seen handling what appeared to be a hard drive, examining books and rifling through shelves. As well, RCMP officers and CRA investigators raided three Zesty Markets, one on Elgin Street and two on Rideau Street. Ottawa Sun

Marijuana seized at Atlantic Institution in Renous, N.B.
Corrections officials say they seized a large quantity of marijuana at the Atlantic Institution in New Brunswick. In a statement today, Correctional Service Canada says officials found a package with 65 grams of marijuana at the maximum security institution on November 29th. It doesn't reveal how the contraband was seized, saying only that it uses scanners and drug-detector dogs. Canadian Press (Global News)

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

Kelowna Council to review 2017 budget
Kelowna City Council will receive an overview presentation of the 2017 Financial Plan at the Dec. 12 regular meeting, where staff will recommend a 4.40 per cent tax increase. Deliberation of the provisional plan will take place during an all-day public meeting Thursday, Dec. 15. Previous years' budgets include commitments that impact the 2017 Financial Plan, such as contractual obligations, the Police Services building project and the annualization of six new RCMP positions approved in 2016. These previous commitments account for more than 2.2 per cent of the proposed 4.40 per cent tax increase. (…)Community safety continues to be a significant part of the City's budget, with requests in 2017 for two new RCMP members, ongoing RCMP contract costs, new firefighters, a new fire truck, two Bylaw Enforcement positions, continued work on the Police Services Building, Glenmore Firehall upgrades, needle sterilization and disposal and a safety coordinator, in addition to additional resources to address homelessness. REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Alberta pot tourism hanging in the balance as feds mull legislations
Although not clear how pot legalization will go down, Albertans are already planning to piggyback business on the marijuana economy. In Colorado, when pot was decriminalized in the state, their local tourism board didn't touch the stuff – because it's not federally legal. Yet if you plan a trip to the toking state, there are many services purporting to be 420 friendly. And according to Minister of Justice and Solicitor General Kathleen Ganley, because of the state's restrictions on smoking outside, and of course, in restaurants, they quickly found the edibles market exploding. That one legislative example can give you an idea of how many different scenarios could play out for small businesses, depending on how the government legalizes weed. There are still a lot of unknowns: whether regular businesses will be able to carry pot products, or if it will take a specialized license for weed dispensary type shops. Metro News

There's Been No Bait-And-Switch On Cannabis Legalization
An opinion piece states, "Prime Minister Justin Trudeau recently expressed frustration around the current cannabis landscape, explaining, "Until we have brought in the proposed system... the current prohibition stands," and encouraging police to enforce the law, particularly as it pertains to the continued expansion of medical cannabis dispensaries in major cities across Canada. The response has been one of uniform frustration from many angles, but I don't believe Justin Trudeau actually lied about the Liberal party's intentions on the cannabis file. From the very beginning, the emphasis has always been on restricting and regulating access to cannabis. In September 2015, Trudeau said he would not like to see cannabis sold at corner stores. In 2014, Trudeau said his government would legalize and make it more difficult -- not easier -- for children to get their hands on marijuana (which implies more regulation). As early as 2013, he was quoted saying, "Our government has no interest in seeing any of these drugs legalized or made more easily available to youth," and more recently he has been reaffirming the intention that, "our approach on legalizing marijuana is not about creating a boutique industry or bringing in tax revenues." The budget did not even include any mention of marijuana." Huffington Post

PUBLIC SERVICE / FONCTION PUBLIQUE

PIPSC union and federal government close in on deal

The federal government and the union representing professionals working in the public service wound up three days of contract talks early Friday morning with what some say are the makings of a tentative deal that could boost salaries by five per cent over four years. The Professional Institute of the Public Service of Canada, which had publicly resolved to have a contract deal by the end of the year, appears to have broken the logjam that has dogged negotiations for more than two years. Union and Treasury Board negotiators met until early Friday morning, when they wrapped up discussions for three of the union's bargaining groups. Two other groups return to bargaining today for another session. The government and 18 unions have been negotiating for months but spinning their wheels on two big issues — money and sick leave. The unions signed a solidarity pact vowing not to make concessions on the existing sick leave regime. PIPSC refused to comment with negotiations still underway but sources say the the latest wage offer is a 1.25 per cent a year increase over four years. Ottawa Citizen

Phoenix jitters affects federal United Way campaign
The federal government hopes to close in on its $19 million goal for this year's United Way workplace campaign despite employees' jitters about using the fickle Phoenix payroll system for their campaign donations. William Pentney, deputy minister at Justice and the campaign's chair, said apprehensions about Phoenix reduced the number of employees using payroll deductions for their donations this year, but they didn't put as much of a damper on the campaign as organizers had feared. The federal workplace campaign is the biggest in the country, with 80 per cent of donations typically come from payroll deductions. This year, that slipped to 70 per cent. About $14.6 million has been raised so far. "Seven out of 10 using payroll deduction is a bit of drop but I might have thought it would have been more dramatic than that," said Pentney in an interview. Public servants can also donate using credit cards, PayPal, cash and e-pledges, but contributions have tended to be more generous when they can be extended over 26 pay cheques. The problem is Phoenix has worked so erratically that public servants could be afraid to risk making deductions for fear of fouling up their pay. Pentney said the campaign could fall short of its target but he is hopeful it will climb to the $19 million mark as donations continue to roll in before the campaign closes at the end of December. He said 25 of 101 departments have reached their goals. Ottawa Citizen

Russia threatens retaliation over latest round of Canadian sanctions
Canada has quietly imposed additional sanctions on Russian nationals over the annexation of Crimea and Moscow's ongoing support for separatists in eastern Ukraine. The new measures, including asset-freezing and a prohibition on business dealings, were passed by the Liberal cabinet on Nov. 28 and released, without much fanfare compared with the former Conservative government, on the Global Affairs Canada website the same day. There are 15 individuals named in the regulation, which was to be formally posted Thursday in the Canada Gazette, the government's official publication of record. Six of the people are members of Russia's national assembly — known as the Duma — who were elected from Crimea in September in the first vote since the takeover. (…) The additional measures may have been discreet and garnered little public attention in Canada, but they have prompted a fierce reaction from both the Kremlin and the media in Moscow. Russian Foreign Ministry spokeswoman Maria Zakharova says her country regrets Canada's decision and "this unfriendly action" will not go unanswered. CBC News

Anti-corruption group calls for more disclosure on owners of Canadian companies, trusts
The federal government should require all companies and trusts in the country to identify their beneficial owners, according to recommendations contained in a new report from the Canadian division of Transparency International, a global anti-corruption organization. The government should then publish the collected information in a central registry that is accessible to the public in an open data format, TI Canada said in its report, which was released Friday. The lack of ownership disclosure makes Canada's real estate market attractive to those looking to invest the proceeds of crime, the group said. CBC News

Islamic State 'has lost 50,000 fighters' over two years
At least 50,000 militants from so-called Islamic State have been killed since the US-led coalition started fighting in Iraq and Syria two years ago, a US military official has said. The senior official described the figure as a "conservative estimate". The figure showed air power and a small number of US figures supporting local forces were having an impact, the official said. The US has, however, repeatedly warned that IS can replace fighters rapidly. BBC News

'People just panicked': 3,000 affected by earthquake in Solomon Islands, initial reports say
Hundreds of people in remote parts of the Solomon Islands have had their homes damaged or destroyed by a powerful magnitude 7.7 earthquake that struck Friday, an aid organization said. There have been no deaths reported from the quake, which also caused some small tsunami waves in the Solomon Islands and other Pacific islands. Speaking from the capital Honiara, Suzy Sainovski, World Vision's Pacific Timor-Leste spokeswoman, said it has been hard to get a full assessment from some more remote communities, some of which don't have cellphone coverage. La France ne compte pas que sur elle-même pour libérer ses ressortissants des mains de ravisseurs à l'étranger. Elle s'appuie souvent sur les Etats-Unis et le Royaume-Uni. Mais de nouveaux documents extraits par Le Monde, en collaboration avec le site The Intercept, des archives de l'ex-contractuel de l'Agence nationale de sécurité (NSA) américaine Edward Snowden confiées à Glenn Greenwald et Laura Poitras, montrent que cette coopération n'est pas aussi loyale qu'on pourrait le croire, malgré la sensibilité du sujet. Le Monde

Syrian civilians leave crumbling rebel enclave in Aleppo
Hundreds of Syrian civilians streamed out on foot from the eastern part of the city of Aleppo on Friday in the wake of the relentless campaign by government troops and their allies to drive rebels from their rapidly crumbling enclave. The U.N. human rights office said it was deeply concerned about reports that hundreds of men have gone missing after crossing from eastern Aleppo into government-controlled areas of the city. Spokesman Rupert Colville said that family members have reported losing contact with the fighting-age men, who are between 30 and 50 years old, after they fled opposition-held areas of Aleppo around a week or 10 days ago. It was not clear whether they were fighters or civilians. (…) "Bombing is truly round the clock," said Ziad Mohammed, a lawyer and father of three, still living in eastern Aleppo's al-Mashhad neighbourhood. "There are no hospitals, the remnants of the dead fill the streets and the wounded have to fend for themselves." News 1130

MINISTER / MINISTRE

Food portions at heart of Sask. Penitentiary riot, inmate's mother says
A riot that left one man dead and several others injured at Saskatchewan Penitentiary was the result of unmet requests from inmates for more food, one inmate's mother says... Canada's prisoners' ombudsman Howard Sapers said Saskatchewan Penitentiary generated more complaints — 413 — last year than any other federal facility in the country and that 93 per cent of complaints in the prairie region came from the Prince Albert prison. The complaints were made about things including food, health care, family visits and access to parole hearings. Sapers, the Correctional Investigator of Canada, has sent a

team from his office to investigate Wednesday's riot alongside the RCMP, the Union of Canadian Correctional Officers, and Correctional Service Canada. His office will not only be looking into the riot, but also the issue of food, he said. There have been several recent changes to food services and the "national diet" in federal institutions with the introduction of a new menu... Sapers said facilities across the Prairies tend to be the most overcrowded. He's raised concerns about the issue for years as it relates to the scarcity of resources, inmates being forced to double-bunk, and competition for employment and program placement."... **The office of Public Safety Ministry Ralph Goodale** sent a statement Friday saying Correctional Service Canada is reviewing the incident. "**Minister Goodale** was continuously briefed about the riot at Saskatchewan Penitentiary throughout the incident," the statement read. "His thoughts are with the family and friends of the inmate who passed away after the incident, and with those who suffered injuries." Don Head, Correctional Service Canada commissioner, was at Saskatchewan Penitentiary Friday. CTV News

Forget about "one-size-fits-all" counter-radicalization policies
An opinion piece states "The term 'radicalization' is used so much these days that people have come to assume that it refers to a single, undifferentiated process that every terrorist goes through. The quest to define and detail the specific steps of this process has become the 'Holy Grail' mission of radicalization studies in the post-9/11 era. Yet after a decade of searching, most experts have come to the conclusion that there's no single 'terrorist profile' to determine who might become dangerous and how... There is no overarching process that can account for every terrorist's personal journey to violence. Different life circumstances can produce different motivations and pressures. Canada's counterterrorism policies should reflect this reality... The Toronto Police Service revealed this week that it's been operating a secret radicalization prevention program for more than two years. Police officers and 'participating agencies' have been referring youth who they deem to be in danger of radicalization to one of four deradicalization 'hubs' across the city... This latest effort in Toronto is just Canada's latest attempt at getting counterterrorism right. The Trudeau government has set aside $35 million for counter-radicalization efforts **and Public Safety Minister Ralph Goodale** is sourcing public opinion on public safety strategies via his national consultations. All this will be in vain if the Canadian establishment doesn't take the latest conclusions on radicalization seriously and try to implement policies that reflect these findings." Policy Options

Opioids, pot and economics – three ways politics touched Canadians this week
It was the final week of Parliament before Christmas, and all through the House ... the Liberals did their best to make sure no one had any time to think about ethics or fundraising before heading home for the holidays. By the time MPs agreed Wednesday to rise until the end of January, the government had announced a new opioid strategy; ramped up negotiations with the provinces on health-care funding; welcomed a complicated blueprint on how to legalize pot; set up a different system for new Canadians to bring in their parents and grandparents; and launched a review of the assisted-dying law... The government has announced a two-pronged approach to confronting the opioid crisis. Health Minister Jane Philpott has tabled legislation that would give cities more leeway to open up supervised drug injection sites. The law would essentially remove the high bar set by the previous Conservative government, which required communities to meet 26 conditions in order to qualify. For now, there are only two safe-injection sites in Canada, both in Vancouver. At the same time, **Public Safety Minister Ralph Goodale** proposed measures to crack down on illegal drugs and their ingredients coming over the border. Border guards would be allowed to examine very small suspicious packages and also restrict the import of equipment used to make drugs... Even as Ottawa moved to more strictly control opioids, it also got a step closer to legalizing pot. A government-appointed task force finally made public a blueprint that would allow those 18 and older to buy regulated marijuana from stores and through the mail. Canadian Press (Ottawa Citizen)

TOP STORIES / MANCHETTES

Ottawa appoints special rep on First Nation border-crossing rights
The federal government is moving on the recommendations of a Senate committee and appointing a special representative on Canada-U.S. border issues for First Nations. Fred Caron, who is already

Ottawa's lead negotiator with Nunavut on the devolution of more government powers to the territory, will now also play a key role in figuring out how to ease travel between the two countries for First Nations split by the border. The Mohawk of Akwesasne, for example, have communities in both countries and face many practical problems in making the border crossing, the Standing Senate Committee on Aboriginal Peoples heard earlier this year... The committee heard from security officials who discussed several programs designed to ease travel between the two countries, like the Nexus card program for frequent travellers. The Akwesasne would like to see "the creation and admissibility of a secure ID card that would facilitate crossing for their members within their territory," says the committee's final report published in June. The committee's sole recommendation — the appointment of a special representative to explore solutions on border issues — includes looking at "secure identification cards, telephone and video reporting, and a review of admissibility requirements for Native Americans entering Canada." The committee advised the appointment take place before the end of this year. In a news release issued Friday, Indigenous and Northern Affairs Minister Carolyn Bennett said Caron's work will "inform the work of an interdepartmental steering committee" that's working on finding solutions to the border issue. "These solutions will also balance the need to maintain national security and public safety," said Bennett in the release. Caron's recommendations are due in the spring, said a spokesperson for Bennett. iPolitics

Investigation, cleanup underway after riot at Saskatchewan Penitentiary

A Saskatchewan prison where a major riot took place this week had the most complaints of any penitentiaries in the country last year, according to Canada's prisoners' ombudsman. Howard Sapers, the Correctional Investigator of Canada, says there were 413 complaints about things including food, health care, family visits and access to parole hearings from inmates at the Saskatchewan Penitentiary in Prince Albert. One inmate was killed during the riot Wednesday, as prisoners set fires, smashed windows and pulled heat registers off walls. Sapers says it's extremely troubling to hear about the incident because it speaks to a real dysfunction in an institution. He has sent a team from his office to investigate, along with RCMP, the Union of Canadian Correctional Officers and Correctional Service Canada. Saskatchewan RCMP officer charged with firearms offences in Edmonton

A Saskatchewan Mountie is facing firearms charges in Alberta. Const. Dale Malbeuf of the Morse detachment in southern Saskatchewan was arrested this week at a home in Edmonton. Police allege the officer produced and pointed a firearm at a woman in the home. Malbeuf appeared in Edmonton court Wednesday on charges of pointing a firearm and careless use of a firearm. He was released on conditions and is to attend court again Jan. 6. RCMP say Malbeuf, on the force for 12 years, has been suspended with pay. Canadian Press (Global News); Postmedia Network (Edmonton Sun); AM 980 CJME; Radio Canada

RCMP seize furanylfentanyl in raid on Orléans home

A police raid on an Orléans home Thursday resulted in the seizure of enough of the designer drug furanylfetanyl to supply between 21,000 and 38,000 doses, according to the RCMP. The RCMP said they found 19 grams of the opioid during a search of a home at 731 Clearcrest Crescent. Furanylfentanyl is an extremely potent drug with a similar compound to fentanyl. Police said they executed the search warrant following a joint investigation with the Canada Border Services Agency. Said Mehdi Rostaee, 42, was arrested and charged with importing a controlled substance and other drug-related offences, according to police. The investigation is ongoing. Postmedia Network (Ottawa Citizen; Ottawa Sun); CBC News

Update: B.C. man targeted by police for terrorism peace bond denies having any involvement in terrorism

The latest target of Canada's terrorism peace bond system insisted he has no connection to extremist violence and turned up at a B.C. police station to complain about press coverage of his case. "I throw your newspaper in the garbage," Khalid Ahmad Ibrahim, 39, told a reporter at the door of a New Westminster, B.C. apartment. "There is no terrorism," he added. The RCMP told the provincial court on Dec. 8 there were "reasonable and probable grounds to believe ... that Khalid Ahmad Ibrahim may commit a terrorism offence."... Meanwhile in Ottawa, Tevis Gonyou-McLean, arrested on an ISIL-related peace bond in August and released on bail, was arrested once again on Tuesday for six alleged

violations of his bail conditions. He was to appear in court Friday at 1:30 p.m. Postmedia Network (National Post; Calgary Herald)

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Is Canada ready to weather an electromagnetic pulse and widespread blackout? We don't know
In the early morning hours of March 13, 1989, Christine Gombas thought the world was ending. The then-52-year-old was at her home in rural Quebec, her son glued to the family's television, when the power blinked out. "The house made a funny noise, like a hum," Gombas told a reporter from The Montreal Gazette the next day. What she — and anyone else still awake at that hour in Quebec — saw was a solar storm hitting the Earth's upper atmosphere. Within minutes, Hydro Quebec's highly inter-linked electrical grid collapsed, plunging the province into darkness as temperatures dipped to -15 C. In 1989, the hours-long loss of electricity was inconvenient, costly and potentially dangerous. But the storm that struck Earth that night was nothing compared to the one that hit us over a century earlier, in the late summer of 1859. The so-called Carrington Event lit the sky so brightly that people could read newspapers by the aurora it generated. It blew out telegraph systems all over the globe. More than a few telegraph operators got a nasty shock. Today, a similar event would be catastrophic. Electrical distribution networks could theoretically be blown out across Canada, with some experts predicting that blackouts would last anywhere from weeks to over a year... **According to Public Safety Canada spokesperson Karine Martel, a series of "guidelines" for confronting an EMP pulse or major solar storm have been established for the owners and operators of Canada's electrical grid (these would include hundreds of utilities like Hydro Quebec and Ontario's Hydro One), local governments and other stakeholders.** These guidelines were also referenced, but not listed, in documents obtained by Global News last summer through Access to Information legislation. The guidelines themselves are only available though the department's Critical Infrastructure Gateway, which is not publicly accessible. ***"The guidelines share best practices and challenge assumptions as to Canada's level of preparedness to respond to these unique events,"*** **Martel wrote in an emailed response to questions from Global News... Public Safety Canada's guidelines for industry don't *"speak specifically to the use of surge protectors or other technology,"* according to Martel. But they do *"outline actions that can help minimize the impact of these disasters."*** Global News

Bennett pledges aboriginal housing improvements after fatal Ontario fire
The federal government is determined to improve aboriginal housing, Indigenous Affairs Minister Carolyn Bennett said Friday after an Ontario chief blasted Ottawa for a lack of action following a deadly blaze that killed a family of five... Bennett has said the federal government doesn't know how many indigenous people die in fires on reserves because it no longer collects such statistics.The collection of fire data was stopped six years ago to ease the "reporting burden" on First Nations communities, the minister said in written responses to questions recently tabled in Parliament. She said her department would work with partners, including the Aboriginal Firefighters Association of Canada, "on new options to address the fire data gaps on reserve." "All options to generate this data are on the table so we can ensure the right programs and policies are in place to keep First Nations communities safe." Canadian Press (Globe and Mail; Huffington Post)

Notley government increasing spending on flooding, drought protection
The Alberta government has announced more funding for flood and drought protection. The province is to invest an additional $31 million over four years in flood resiliency projects through the Alberta Community Resilience Program. The 10-year, $500-million program has so far helped to build flood barriers, as well as other safeguards. Another $14 million is to go to the Watershed Resilience and Restoration Program. Canadian Press (Global News; Calgary Herald); AM 630

Ice jam reaches emergency status
The city has declared a level one emergency as the ice jam on the Nechako River has reached the confluence of the Fraser River. Level one means there is a "heightened awareness" in place, city spokesman Mike Kellett said. If a level two is invoked, the city's emergency operations centre, located at Fire Hall No. 1 next to city hall, will be manned 24 hours per day. The situation is monitored around the

clock and the provincial government Emergency Management B.C. has been notified that assets, such as gabion diking, could be needed in short order to mitigate potential damage. Prince George Citizen

The Brick's 2016 Christmas video 'overwhelms' Fort McMurray family rebuilding after fire
Following in the footsteps of companies like WestJet and Shell, The Brick has created its own Christmas experience video, helping residents affected by May's wildfire in Fort McMurray. The Brick set up a temporary Christmas tree lot Dec. 3 and handed out nearly 200 free trees and 100 wreaths in the hard-hit Beacon Hill neighbourhood. AM 680

The best defense... : Canada is finally preparing an overhaul of its cyber security systems to protect it from threats from outside, and within. That's going to require getting proactive.
The Canadian Armed Forces is finally upping its game in the realm of cyber security — bolstering its shields against nation-state actors like Russia and China, malicious hacker groups, and "insider threats" that may be looking to follow in Edward Snowden's footsteps. In a pair of documents, published Friday, the Canadian military is asking industry to submit ideas on how they can assess and respond to cyber threats in real-time. Under the Defensive Cyber Operations Decision Project, which will ultimately culminate in a plan that will be submitted to the federal government, the Department of National Defense will be looking at capabilities that will allow the military to "operate effectively in cyberspace on government-authorized military missions, to support our federal partners in national cyber security efforts, and to work with international allies," according to a departmental spokesperson... "Domestic (routine and contingency) operations might involve assisting civil authorities in responding to natural disasters, cyber-attacks, terrorist attacks, crises in urban centres, threats to critical infrastructure, risks to health and food systems, or Chemical, Biological Radiological or Nuclear (CBRN) attack," the document reads. "Owing to the potential for an increase in domestic threats, [the Department of National Defense/Canadian Armed Forces] as a whole needs to become more integrated within the domestic response community — in particular, the security and intelligence sectors. In particular, the future security environment will require a level of domestic integration among agencies that does not exist at the present time." Canadian intelligence-watchers have, for years, noted an uptick in domestic activity amongst Canadian military intelligence units — which, traditionally, do not run national intelligence-gathering. This journalist reported in 2014 that military counter-intelligence kept tabs on Indigenous protesters, perhaps countering their own mandate. More recently, the Ottawa Citizen reported that military intelligence conscripted the Communication Security Establishment to track a Canadian within the country. The Communication Security Establishment, the signals intelligence agency that works hand-in-hand with the American NSA, does not appear to be covered by this cyber defense strategy. That agency does not have authority to do

surveillance inside Canada, unless specifically mandated to by another department. Vice News; Global News

Canada looks at possible changes to how it shares data among federal agencies, foreign partners
Canada is reviewing how intelligence agencies — such as the Royal Canadian Mounted Police (RCMP) and Canadian Security Intelligence Service (CSIS) — share information for the purposes of national security. Seeds for possible amendments to federal legislation are being planted by the House of Commons' ethics and privacy committee, which is currently reviewing the 2015 Security of Canada Information Sharing Act (SCISA) — the law that governs how information is shared between domestic agencies to thwart security threats. The committee plans to hold more hearings in coming weeks and expects to make recommendations in the near future on whether SCISA should be amended to address privacy concerns. The process is part of the Liberal government's ongoing national security consultation and review of Canada's 2015 Anti-Terrorism Act, previously known as Bill C-51, of which SCISA is a component... But while the SCISA exists to regulate how Canada shares information domestically, the review hearings have also raised questions around how Canada shares data with its foreign partners — a process critics say is shrouded in secrecy. Specifically, the review is looking at how Canada participates in one of its most important foreign spying arrangements — the decades-old deal between Ottawa and its Five Eyes allies in the U.S., UK, Australia and New Zealand. Man who killed soldier Patrice Vincent wanted more victims: Quebec coroner
A coroner says a Quebec man who killed a Canadian Forces warrant officer in 2014 wanted more victims. Patrice Vincent, 53, was killed in the parking lot of a shopping mall in Saint-Jean-sur-Richelieu when Martin Couture-Rouleau plowed into him and a fellow soldier, who survived. Couture-Rouleau had known jihadist sympathies. Coroner Andre Dandavino's report contains excerpts from a conversation Couture-Rouleau had with a 911 operator just minutes after Vincent's death. The report says Couture-Rouleau called 911 and said he was not going to surrender because he might run into another soldier and that he would kill him. Earlier, Couture-Rouleau tried to attack a police officer, while Dandavino noted he later had two knives in his hand as he tried to charge another officer before he was killed. Canadian Press (Global News; CTV News); CBC News

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Ottawa appoints special rep on First Nation border-crossing rights
The federal government is moving on the recommendations of a Senate committee and appointing a special representative on Canada-U.S. border issues for First Nations. Fred Caron, who is already Ottawa's lead negotiator with Nunavut on the devolution of more government powers to the territory, will now also play a key role in figuring out how to ease travel between the two countries for First Nations split by the border. The Mohawk of Akwesasne, for example, have communities in both countries and face many practical problems in making the border crossing, the Standing Senate Committee on Aboriginal Peoples heard earlier this year... The committee heard from security officials who discussed several programs designed to ease travel between the two countries, like the Nexus card program for frequent travellers. The Akwesasne would like to see "the creation and admissibility of a secure ID card that would facilitate crossing for their members within their territory," says the committee's final report published in June. The committee's sole recommendation — the appointment of a special representative to explore solutions on border issues — includes looking at "secure identification cards, telephone and video reporting, and a review of admissibility requirements for Native Americans entering Canada." The committee advised the appointment take place before the end of this year. In a news release issued Friday, Indigenous and Northern Affairs Minister Carolyn Bennett said Caron's work will "inform the work of an interdepartmental steering committee" that's working on finding solutions to the border issue. "These solutions will also balance the need to maintain national security and public safety," said Bennett in the release. Caron's recommendations are due in the spring, said a spokesperson for Bennett. iPolitics

Winnipeg man faces 136 fraud charges
A Winnipeg man has has been hit with a slew of charges after he is alleged to have fraudulently collected fees as an immigration consultant. The Canada Border Services Agency announced 56-year-old Vladimir Bibilov is facing 102 counts under the Immigration and Refugee Protection Act, and another 34 counts under the Criminal Code for alleged offences between January 2009 and December 2015. Bibilov is alleged to have acted as a paid immigration consultant when he was not licensed to do so and allegedly took fees from clients. The CBSA alleged Bibilov "misrepresented himself to foreign nationals with the promise to provide immigration services to Canada," and also alleged he "provided false and misleading information to induce or deter immigration to Canada." He will appear in a Winnipeg courtroom on Monday. "The CBSA takes immigration fraud very seriously and is committed to fully investigating and prosecuting those who violate our laws and seek to profit illegitimately from our immigration system," CBSA spokeswoman Kim Scoville said in a release. Postmedia Network (Winnipeg Sun)

Quebecer pleads guilty to possession of cocaine found on cruise ship
Isabelle Lagacé today pleaded guilty in an Australian court to cocaine possession charges, months after she and two other Canadians were arrested when 95 kilograms of cocaine valued at about $30.5 million were found in suitcases on a cruise ship… Their movements were tracked by a joint operation involving the Canada Border Services Agency (CBSA), Australian Federal Police and the U.S. Department of Homeland Security from the time they boarded the cruise ship in England. Police in Australia believe the operation was organized by a powerful drug syndicate. CBC News

One quarter of Canadian online traffic vulnerable to NSA sweeps: researchers
A large amount of Canadian internet traffic is being routed through the United States, leaving it vulnerable to collection and probing by the National Security Agency. And most Canadians have no idea of how exposed they are to American data sweeps, say the researchers behind a new tool that aims to show Canadians what path their internet traffic takes to connect to the websites they want to visit. In a new online project launched Thursday, researchers from the University of Toronto and York University have partnered with Open Media to create a tool to show the paths Canadians' internet data take when they access websites or send online communications. iPolitics

Yahoo faces proposed Canadian class action following hacks
Yahoo is now facing a proposed class action on behalf of Canadians whose personal information may have been stolen. A Toronto-based law firm says a notice of action was filed today. The class action will take in Canadians whose user account information was stolen or whose email accounts were accessed. The representative plaintiff is a Canadian who used Yahoo for her email. The proposed $50-million suit comes on the heels of a similar action in the United States. Yahoo published a security notice in September and another earlier this week that its computer networks were hit with cyberattacks. Man arrested as cocaine, marijuana seized from home in C.B.S
The equivalent of 1,290 marijuana cigarettes and 224 "dosages" of cocaine have been seized from a residence in Conception Bay South, police say. The RCMP said on Friday afternoon that officers arrested a 22-year-old man after a search warrant was executed at his residence. Cocaine, marijuana and cannabis resin were taken from the home. CBC News

Dawson Creek man arrested counterfeit U.S. money investigation
A Dawson Creek man has been arrested in connection with what police believe is a counterfeit money ring operating in communities across the north. On Dec. 13 at around 2 a.m., police in Prince George were called to a convenience store where a woman had tried to pass counterfeit American currency. The woman fled in a "distinctive" vehicle bearing Alberta plates, according to an RCMP news release. Police tracked down the vehicle a short time later at another Prince George convenience store and arrested the woman and a 33-year-old man she was travelling with. Both were carrying counterfeit American dollars, as well as pre-paid credit cards and "other counterfeiting evidence," according to the release. The woman was later found to hail from Spruce Grove, Alta., while the man is from Dawson Creek. Police have not released the names of either suspect. RCMP are sharing information with police in other communities to determine whether there are connections to other counterfeiting incidents. Dawson Creek Mirror

Man charged with murder on Little Black Bear First Nation
A 37-year-old man has been charged with second-degree murder on the Little Black Bear First Nation. RCMP were called to a residence Thursday morning where they found an unresponsive woman outside. EMS declared 33-year-old Lauren Quewezance dead at the scene. Police arrested Sherman Luke Bellegarde, who is also from Little Black Bear. He was known to Quewezance. CBC News

Saisie de 1,2 tonne de tabac et 4 suspects arrêtés à Saint-Anicet
Quatre suspects ont récemment été arrêtés à Saint-Anicet, en Montérégie, alors qu'ils étaient en possession de plus de 1,2 tonne de tabac de contrebande. Le 7 décembre, en début de journée, les policiers ont repéré une embarcation près de la berge du fleuve Saint-Laurent, dans le secteur de Saint-Anicet... L'opération a été menée par des policiers de la Sûreté du Québec, de la Gendarmerie royale du Canada et par des membres du Groupe de travail régional de Cornwall, une force policière mixte composée de la Gendarmerie Royale du Canada, de la Police provinciale de l'Ontario et du ministère des Finances de l'Ontario. Agence QMI (TVA Nouvelles); Journal Saint-Francois

RCMP to be on patrol during the holidays
Throughout the year (from Jan.1 to Dec. 15) Gander's RCMP detachment received 76 documented impaired driving complaints, resulting in nine charges being laid. With Christmas holiday celebrations now in full swing, Staff Sargent Roger Flynn said, traditionally in Canada, impaired driving is at its peak. Impaired takes in more than just alcohol, he noted. It also encompasses drugs – both prescription and illegal. But if anyone is fool hardy enough to put their lives and others in danger, be prepared to face the consequences. Throughout the holidays the RCMP will be carrying out numerous checkpoints and patrols to try and curb illegal activity. Gander Beacon

Schools benefit from RCMP officer's presence

Positive relationships have been cultivated by having a member of the RCMP available at high schools in Spruce Grove and Stony Plain. Parkland School Division's (PSD) board of trustees received a report from its school resource officer, Const. Pat Chornoby, during its regular meeting on Dec. 13. The partnership to provide a uniformed officer to the high schools was formed five years ago between the Town of Stony Plain, City of Spruce Grove, Parkland County, RCMP and PSD. The intention of the officer's presence is to help students make positive choices through law education and law counseling. The program has fostered relationships with youth, intervened with students making poor choices that may lead to criminal or risky lifestyles, and provided assistance with situations. Spruce Grove Examiner

RCMP stuff two cruisers for Digby Foodbank
Roger Tibbetts, manager at the Digby Foodbank, says he was extremely pleased with the generous response to the RCMP's Stuff the Cruiser donation drive at the Digby Sobeys and Superstore on Dec. 10 Shelburne County Coast Guard

Surrey residents generously "Pack the Police Car"
MORE than 4,500 pounds of food and over $8,000 in cash were collected in support of local food banks and Christmas hamper programs during the Surrey RCMP's 11 "Pack the Police Car" events held across the city between December 1 and 13. Indo-Canadian Voice

Toys for the North with RCMP and North Star Air
Toys for the North headed to seven communities in Northern Ontario on December 16, 2016. While the usual path for toys at this time of the year is from the North Pole at Santa's workshop, Toys for the North sees toys head north to make a brighter Christmas holiday for children across the north. The program in Northern Ontario runs in partnership with the "O" Division of the Royal Canadian Mounted Police (RCMP), and North Star Air. For the past three years, across Northern Ontario, North Star Air has participated in the 'Toys for the North' toy drive. Toys are flown from the Thunder Bay International Airport to make sure children across the North have some extra smiles over the holiday season. Net News Ledger

Help Mounties cram their cruiser
Nanaimo RCMP and Country Grocer have joined forces again for Cram the Cruiser, an annual drive to raise food for local families in need at Christmas. This year's event happens Saturday (Dec. 17) 9:30 a.m. to 2:30 p.m. at Country Grocer's Chase River Market Place location at 82 Twelfth St., where Mounties will be filling police vehicles with food. Nanaimo News Bulletin

Autochtones et policiers: Québec donnerait le feu vert à une enquête
Tout porte à croire que Québec donnera le feu vert à une enquête publique sur la relation entre les autochtones et les forces policières, comme le réclame depuis les événements de Val-d'Or l'Assemblée des Premières Nations du Québec et du Labrador. «Tout converge vers une décision à mon sens qui est inévitable. Tous les éléments sont réunis» pour que Québec acquiesce à notre demande, a affirmé au Soleil le chef Ghislain Picard. «Jusqu'où le gouvernement est prêt à aller? [...] Je pense qu'on est plus près du 100% en ce qui concerne nos demandes que le contraire.» Selon Radio-Canada, l'exercice porterait sur plusieurs services gouvernementaux pour examiner plus largement les liens entre l'État et les communautés des Premières Nations. Le Soleil (La Presse); Radio Canada

Permanent protection for police HQ remains 2 years away
Winnipeg's new police headquarters may be stuck with temporary protection against drive-up vehicle attacks for another two years, according to a plan to replace concrete slabs with a more permanent and more esthetically pleasing alternative. A city plan to improve downtown streetscaping calls for permanent bollards to replace temporary Jersey barriers — upright concrete slabs — around the police headquarters by 2019. CBC News; CTV News

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Investigation, cleanup underway after riot at Saskatchewan Penitentiary
A Saskatchewan prison where a major riot took place this week had the most complaints of any penitentiaries in the country last year, according to Canada's prisoners' ombudsman. Howard Sapers, the Correctional Investigator of Canada, says there were 413 complaints about things including food, health care, family visits and access to parole hearings from inmates at the Saskatchewan Penitentiary in Prince Albert. One inmate was killed during the riot Wednesday, as prisoners set fires, smashed windows and pulled heat registers off walls. Sapers says it's extremely troubling to hear about the incident because it speaks to a real dysfunction in an institution. He has sent a team from his office to investigate, along with RCMP, the Union of Canadian Correctional Officers and Correctional Service Canada. Canadian Press (Sudbury.com; Province; Vancouver Sun; Leader-Post; CP24); AM 650 CKOM

'They were setting fires': New details emerge about deadly Saskatchewan prison riot
A more detailed picture emerged Friday about a deadly riot that broke out at a federal prison in Prince Albert, Sask. Jason Leonard Bird, 43, who was serving a 31-month sentence for breaking and entering, died in Wednesday's rampage at Saskatchewan Penitentiary. Eight other inmates were hurt, two seriously. James Bloomfield of the Union of Canadian Correctional Officers spoke to the National Post's Douglas Quan. Postmedia Network (Montreal Gazette; Province)

Family of Jason Bird grieving following his death at Sask. prison
Holly Lynn Lafond says underneath his tough exterior, her older brother Jason Leonard Bird was a man who had a heart of gold... Prison watchdog Howard Sapers said in his experience the issue is likely bigger than food. "There's been a lot of changes around food in Canadian penitentiaries and so it's not just that there wasn't enough food or just that the food wasn't very appetizing, although both of those things may be true — there's usually a lot more behind it," Sapers told CBC Radio's Morning Edition. Sapers said while double bunking and use of segregation is down in federal prisons, other things have the institutions in flux. "We've seen trends going up in terms of assaults, use of pepper spray, use-of-force incidents, lockdowns. [Prince Albert] is not unique in that regard," Sapers said. Staff from Sapers' office are on their way to Prince Albert today to further investigate the cause of the riot. CBC News; Radio Canada

Prison violence won't stop until overcrowding addressed, says former inmate
For many familiar with this country's correctional facilities, news of prison riots is not surprising. For years across Canada, violence in prisons has been steadily rising. Lee Chapelle has 100 convictions on his record — all of them property-related and non-violent in nature. He's spent 21 years in prison and tells The Current's Friday host Piya Chattopadhyay that overcrowding plays a huge role in prison violence... He suggests "public safety should come to the forefront," to make Canada's prison system work better for the people that are incarcerated inside them. "If they are not violent, scary people and don't have a long history, let's look at alternative sentencing - restorative," Chapelle says. "I think we really need to restore our belief in the potential of rehabilitation." CBC – The Current

Alberta jails battling the scourge of drugs
With more than three-quarters of incoming inmates having addictions, stemming the flow of drugs and other contraband in prisons is a priority, officials say. It has become even more crucial as toxic narcotics such as fentanyl are being smuggled into institutions and unsuspecting staff and prisoners are exposed. "Almost 80 per cent of offenders arrive at federal institutions with some level of substance abuse problem, and many have multiple addictions," said Jeff Campbell, spokesman with the Correctional Service of Canada (CSC). "We acknowledge the prevalence of substance abuse problems among offenders and assist in addressing those problems through a drug strategy." A Bowden Institution guard collapsed this week during a search for drugs and it's believed he was exposed to fentanyl. Postmedia Network (Calgary Sun)

Care homes being warned about high-risk sex offender who abused seniors
Vancouver police say they will visit care homes to tell them about the release of a high-risk sex offender who's known for targeting seniors. James Burrows, 56, was convicted of four sexual assaults against women between the ages of 72 and 93 years old, and has just been released from prison. He is currently residing in a halfway house somewhere in the city, although the exact location is being withheld due to

privacy laws. Because he is from "back east," police say there are no indications that he will stay in B.C. – but they wanted to warn the public because of his "disturbing past." An assessment by the Correctional Service of Canada found Burrows is a high-risk for violent and sexual re-offending. CTV News; CKNW News; Global News; BC Local News

Canada's federal jails may stop sorting trans inmates by their genitalia
Canada's federal prison system could soon scrap a longstanding policy of housing trans and intersex offenders based on their genitalia while effectively barring them from gender-confirming surgeries, Xtra has learned. Since at least 1999, Correctional Service Canada (CSC) has sorted trans inmates who haven't transitioned based on their genitalia. CSC's current "gender dysphoria" policy allows for hormone therapy. However, it restricts gender-confirmation surgery to those who have spent "12 continuous months in an identity-congruent gender role," while only counting months prior to their incarceration. But that will likely change soon. In an email to Xtra, CSC spokesperson Lori Halfper says the policy "is currently being reviewed after recent consultations," including the clause that jail time doesn't count towards the 12 months. "The revised guideline should be finalized and published this winter," Halfper writes. Daily Xtra

Ontario Correctional Services Minister David Orazietti quits
Liberal cabinet minister David Orazietti is resigning from provincial politics, setting the stage for a byelection in his northern Ontario riding about a year before the next general election. The Community Safety and Correctional Services minister made the announcement in his Sault Ste. Marie riding Friday, saying he is leaving for family reasons… Orazietti took on the corrections file in June, at a time of increasing public scrutiny and anger over solitary confinement practices. He had to answer for the treatment of Adam Capay, an inmate held in segregation for four years in Thunder Bay. Orazietti recently announced he had tapped federal correctional investigator Howard Sapers to lead a provincial review into the use of segregation. Just one day before his resignation, Orazietti announced the province was hiring more corrections staff, including officers, nurses, psychologists and segregation managers in an attempt to address issues with solitary confinement and inmates with mental-health challenges. Le fentanyl tue 9 personnes en une nuit à Vancouver
Des surdoses de fentanyl ont provoqué la mort de neuf personnes à Vancouver dans la nuit de jeudi à vendredi, a déclaré le chef de la police municipale, Adam Palmer, en conférence de presse. Le maire de Vancouver, Gregor Robertson, se tenait debout à ses côtés… Adam Palmer affirme que les toxicomanes ont besoin d'une aide immédiate. Il n'existe pas assez de lits pour les aider à surmonter leur dépendance et il faut parfois les transférer jusqu'à Nanaimo sur l'île de Vancouver. D'après le maire Gregor Robertson, les toxicomanes attendent huit ou neuf jours avant de pouvoir être pris en charge par les autorités sanitaires, ce qui est « inacceptable » lorsqu'environ 1300 personnes prennent des opioïdes illicites chaque jour. Radio Canada; Postmedia Network (National Post); Canadian Press (Huffington Post; City News); CTV News; CBC News

Calgary police chief open to supervised-injection sites
Calgary's police chief is open to introducing supervised facilities for drug users, so long as such programs are part of a larger strategy to lower addiction rates and address problems that accompany drug dependency, such as crime and joblessness. "It always makes police chiefs look resistant when they say no to these things. My answer has been: 'Sure, as long as it is part of a better strategy,'" Calgary Police Service chief Roger Chaffin said in an interview this week. "I'd be more mindful of it if it was part of a more robust strategy to lower the issues of addiction." Globe and Mail

In The Mayor's Chair
Steinbach City Councillor Earl Funk got to be Mayor for the morning. Funk sat in the Mayor's chair Friday for the monthly open door session… Meanwhile, Funk also sat down Friday morning with a member of

the local Citizens On Patrol Program (COPP). "I just want to really thank the entire group, all the members for what they do for our city and how they tirelessly provide security for us, they work very closely with the RCMP," he says. Funk says earlier this week when he stopped by his business late at night, there were COPP volunteers patrolling the area. He notes that provided a level of comfort to know that his store was being looked after while he was at home resting. He adds COPP is always looking for new recruits. Further to that he says this time of year they are stressing the importance of locking our doors. Steinbach Online

Allan Waugh's family seeks answers, justice and peace
A week away from Christmas, a Yukon family is asking for one thing: to know what happened to their father. On Monday the Waugh family made yet another public appeal asking anybody with information about the 2014 murder of 69-year-old Allan Waugh to come forward… Now they want to take advantage of the new Crime Stoppers program that relaunched last week after a five-year hiatus. The program passes on anonymous tips to the RCMP. If the tip leads to an arrest, the tipster could collect a cash reward. Yukon News

MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Man charged in 2014 death of Indigenous woman in Edmonton's west end
Edmonton police have charged a man with second-degree murder in the death of a woman in Edmonton's west end in 2014. Freda Goodrunning was 35 when her body was found in a storage shed at 174th Street and Stony Plain Road on June 4, 2014. She died of blunt force trauma, police said. A Cree woman from the Sunchild First Nation, Goodrunning had lived on the streets for the final four years of her life, according to police… She had been married with six children, and was considered one of Alberta's unsolved cases of missing and murdered Indigenous women. On Wednesday police arrested and charged a 33-year-old man with second degree murder and possession of an offensive weapon. CBC News; Turtle Island News

A 'tub of ugly:' Stories of victims turned survivors
Her diaries, trial transcripts, letters, newspaper clippings, and videos of television reports were put in storage years earlier, in a large plastic tote marked "trial stuff." Such a simple and mundane label, it didn't aptly describe the evil contained there. The contents reflected horrific acts of sexual violence committed against children, teens and women spanning three decades… A dangerous sexual predator, the senseless murder of a teenage girl, a missing indigenous woman ultimately found murdered — they were shocking crimes that dominated the news anywhere from a decade to three decades ago. But what happens next, after the trial ends, the offender goes to prison and the crime falls from the headlines? Visit a courtroom on any given day, and you'll hear about the long-term devastation wrought by such trauma, the suffering at times leading to alcoholism, addiction, or worse, victims turned perpetrators. These are the other stories, of victims who became survivors. Shaped by their experiences, they found ways to move beyond them to help themselves and others. Postmedia Network (Leader-Post)

7,420 kms With Caribou Legs to End Violence Against Women
This week I'm sharing part of a speech I gave in tribute to ultra-marathon runner, Brad Firth AKA Caribou Legs, who crossed Canada over 7 months to raise awareness about missing and murdered Indigenous women and girls (#MMIW, #MMIWG). Brad's work was an epic adventure that also happened to occur not long before the long-awaited official inquiry into the issue by the Canadian government commenced. This adventure was an eye-opener for many Canadians who, despite news coverage of varying degrees, didn't know of the depth of the subject, nor why Indigenous groups were fervently calling for that inquiry. It was also a stark reminder for those of us who do know the background, that we must always remember, regardless of how well we know our issues and think we've publicized them, we're not even close to having reached the populace in Canada or the U.S. Blog Woman!!!

Anti-Poverty Activist Looking to Replace NDP MLA Kevin Chief
Only one day after NDP MLA Kevin Chief announced he's stepping down from provincial politics, another well-known Manitoba is stepping up to the plate. Bernadette Smith, an anti-poverty activist and co-founder of the Manitoba Coalition of Families of Missing and Murdered Women in Manitoba and the Drag the Red Initiative is looking for the NDP nomination for the Point Douglas riding. REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Cannabis Canada supports Task Force recommendations for legalization of marijuana
"Overall, the Task Force has succeeded in providing the federal government with a set of well-informed and comprehensive recommendations that will guide the development of legislation for the legalization and regulation of cannabis in Canada," said Colette Rivet, Executive Director of Cannabis Canada Association. Rivet says that Cannabis Canada encourages the government to allow product branding and advertisements for cannabis that in no way appeals to children, which is one thing that the Task Force recommended. Along with recommending that the packaging the product don't appeal to children, the Task Force also suggests an age restriction for purchasing cannabis, re-sealable and childproof packaging, comprehensive labelling and a well developed public education campaign. Le SPVM frappe une boutique de pot illégal
Les agents du Service de police de la Ville de Montréal ont frappé au moins une des boutiques de pot illégal qui avait ouvert ses portes il y a seulement 24 heures, celle sur Mont-Royal. Dans ces boutiques administrées par la compagnie de Vancouver Cannabis Culture, on ne trouvait pas du pot médicinal, mais bien du pot récréatif. TVA Nouvelles; La Presse; Canadian Presse (Vancouver Sun); CTV News; Le Devoir

Saskatchewan Compassion Club trio headed to trial
Three people charged in a bust of a medical marijuana dispensary have been committed to trial. A preliminary hearing for Mark Hauk, Jeff Lundstrom and Jaime Michelle Hagel wrapped up in Saskatoon Provincial court on Thursday. The three have been charged with trafficking marijuana and cannabis resin and possession of a controlled substance for the purpose of trafficking. Police raided the Saskatchewan Compassion Club in October of 2015. Marijuana was seized from the club, which eventually closed down, although it still has a presence online. CBC News

How Weed Is Helping Opioid Users Beat Addiction
... The Liberal government's Task Force on Cannabis Legalization and Regulation released dozens of recommendations this week on how the legal weed regime in Canada should look. While much of the report focused on recreational use, it also recommended more clinical research about the medical use of cannabis with the aim of bringing cannabis-based drugs onto the market. But some Canadians, including doctors and patients who deal with pain, are asking why the government hasn't already embraced cannabis as an alternative to opioids—especially with the country in the grips of a deadly overdose crisis. Vice News

Canada Is On Track To Legalize Cannabis, But Here's Why It Will Still Be A Bumpy Ride
This week, Canada's cannabis task force released a report with 80 recommendations for the federal government to consider while drafting regulations for the country's legal recreational marijuana market. But even with that intel, the road to legalization will be a bumpy ride as Canada becomes the second country in the world to legalize recreational marijuana (after Uruguay). Here are six reasons why the road ahead will be rocky but still worthwhile for Canada to take. Civilized

Details of marijuana regulation remain hazy
Legal weed may not be the "revenue cash cow" provinces and territories were hoping for, says the Yukon's assistant deputy minister of justice. While the recreational marijuana market will open up new

revenue streams, said Al Lucier, those dollars, at least in the early days, will be funneled into awareness and education campaigns, research and policy enforcement. "The regulatory and enforcement aspects that will come in with these changes will certainly offset revenues generated by the taxation of the products," Lucier said in an interview this week. He is also a senior official in a working group on the legalization, regulation and restriction of cannabis in Canada. On Tuesday, a cannabis legalization task force, chaired by former Liberal cabinet minister Anne McLellan, released a report with more than 80 recommendations for how to regulate marijuana and end nearly a century of prohibition in Canada. Whitehorse Daily Star

Legal weed will be ridiculously profitable — and a huge headache
An opinion piece states, "…So I read with some interest the way the task force on the legalization of cannabis sees the landscape facing Canada as we move towards becoming the first major developed nation to legalize recreational marijuana. "Like scraping ice from the car windows on a cold winter morning, we believe that we can now see enough to move forward," this week's report said. I wasn't reassured. Don't get me wrong. I understand the arguments in favour of legalization — that recreational use of cannabis is already widespread, that most of it is controlled by criminal elements who have no concern for the quality of the product and its impact on society. And does it really make sense for our police forces to be wasting so much time and effort on arresting pot users? The report notes that 49,577 of the 96,423 police-registered drug charges in 2015 were for possession of cannabis. Yet the report and its 80 recommendations makes for sobering reading. It shows how hugely complicated setting up a national regime to regulate the growing, sale and distribution of cannabis will be, let alone dealing with the health impacts and the surge in impaired driving cases that inevitably will result…" iPolitics

Good pot report stumbles on medical access
An opinion piece states, "The federal task on marijuana released a thorough report last week that proposes to end Canada's 93-year prohibition on legal pot production and consumption. Its 80 recommendations touched on the important considerations and concerns for a well-regulated system, and appeared to borrow from the experience of several U.S. states that are several years ahead of us. But the federal task force failed on one important point: the merger of the medical and recreational marijuana markets…" Times Colonist

Bonuses for Phoenix executives still under review, department insists
Public Services and Procurement Canada insisted Friday that bonuses for executives responsible for the Phoenix pay system remain under review and have not been approved, after a department official said some involved in the project would get the incentive pay. The official, speaking on background Friday, told CBC News that performance pay had been approved for some executives involved with the troubled payroll system. But the department's media relations manager, Me'Shel Gulliver Bélanger, later contacted CBC News to apologize for any confusion and stressed that bonuses for the top decision-makers responsible for Phoenix were still under review. CBC News

Federal government departments have a 'dismal' record of hiring wounded veterans, senator says
Just over 25 per cent of veterans who were given priority hiring status in the federal public service because the military released them for medical reasons weren't able to find jobs, according to newly released statistics. Five hundred and eighty-five individuals released from the Canadian Forces for medical reasons between 2005 and early 2016 were unsuccessful in finding work with federal departments within the period for which they were allotted priority status for employment appointments, and as a result lost that status. That has prompted one Liberal senator to call on federal departments to

step up... Since 2005, when those medically released from the Forces have been eligible for priority status, the bulk of hiring of those eligible has been by the Department of National Defence. Since 2005, it has been responsible for 70 per cent of the hires of those with priority-status, some 928 veterans. Correctional Service Canada hired five per cent, or 66 veterans, according to the figures provided to Downe. Employment and Social Development Canada has been responsible for 4.2 per cent of the hires of those eligible, or 56 individuals, while Fisheries and Oceans, the RCMP, and Public Services and Procurement Canada were each hovering at around two per cent of the hires. Postmedia Network (National Post; Ottawa Citizen; Province; Vancouver Sun; Windsor Star)

Lower-cost alternative was ignored for stumbling, over-budget Canada.ca project
The federal government could have employed a simple framework for its massive Canada.ca web renewal project, making it much cheaper than the large corporate Adobe contract it signed, according to several sources familiar with the project. Ottawa Citizen

Government offices closed because of flooding, boiler failure
Readers are reporting that Department of National Defence offices at 25 Nicholas St. was evacuated due to power outage and sprinkler system outage. There has also been a flood there. It is unclear whether the whole building is affected or whether the issue was confined just to DND facilities. And the government building at 615 Booth St. has been shut down completely because of a boiler failure. The Department of National Defence has confirmed both. Repairs are under way at Booth Street and the building is expected to re-open on Saturday. At the Nicholas St., building, DND says a damage assessment is underway and it is uncertain when the building will be reopened. Ottawa Citizen

PSAC welcomes asbestos ban
The federal government has announced its commitment to banning asbestos and asbestos-containing products by 2018. This is a long-awaited decision; PSAC has been calling on the federal government to ban the import, export and manufacturing of asbestos for years. The federal government will create new regulations to ban asbestos, establish new federal workplace health and safety rules, and enhance the registry for federally owned buildings. "We welcome the government's decision to ban asbestos, which is the result of years of hard work by activists in the labour movement and our allies," said PSAC National President Robyn Benson. "Asbestos is the leading cause of workplace-related deaths in Canada; we must put an end to this epidemic." Public Service Alliance of Canada

Canadian Armed Forces sergeant sentenced to six years in prison for child porn offences
A Canadian Armed Forces sergeant based at CFB Trenton in eastern Ontario has been sentenced to six years in prison for child pornography offences and arranging to commit a sexual offence against a child. Court officials in Belleville, Ont., say David Rodwell was sentenced yesterday. The 57-year-old air weapons system technician was convicted on Sept. 22 of possession of child pornography, making child pornography and making an agreement to commit a sexual offence against a child. He was arrested last year after an online sting involving a U.S. Homeland Security special agent posing as a mother of three. Canadian Press (Vancouver Sun; City News)

Coast Guard seizes 26.5 tons of cocaine
More than 26 tons of cocaine worth $2 billion have been seized by the US Coast Guard and Royal Canadian Navy, officials said Thursday. Approximately 100 suspected drug smugglers were apprehended at sea and turned over to federal authorities, said Vice Adm. Karl Schultz, commander of the U.S. Coast Guard Atlantic Area. The inter-agency operation intercepted 27 shipments and five bale recovery efforts over the course of 10 weeks, Schultz said. CNN

Tips for stress-free air travel this holiday season
Like creamy eggnog, holiday movie marathons and cookies for Santa Claus, airline travellers at Vancouver International Airport should be prepared to add one more holiday tradition to their list

this year: the long airport lineup. "Our partners at CATSA (Canadian Air Transport Security Authority) are doing a great job of adding staff, and all of our partners have been working for months having extra staff ready for the extra volumes, but you can be prepared to wait a little bit longer than normal," said Reg Krake, director of customer care at Vancouver International Airport. Missing and murdered Indigenous women inquiry launches new website
Families of missing and murdered Indigenous women should sign up for MMIW inquiry emails while they wait to register to participate, inquiry commission officials say. The emails will provide updates ahead of the inquiry, which is expected to begin in spring. "We want to create a families first process," said Michael Hutchinson, the commission's director of communications. "Nobody has a list of the people that

want to take part in the national inquiry.... We're trying to collect that information from families." The MMIW inquiry has a new website, where families should be able to register soon. The inquiry has five commissioners who in the new year will hear testimony from families of missing and murdered Indigenous women and others in order to examine the systemic causes of violence against Indigenous women and girls in Canada, and make recommendations about how to prevent violence against Indigenous women. Ferocious Fort McMurray wildfire voted news story of the year for 2016
The ferocious wildfire that forced nearly 90,000 to flee Canada's oilsands region and reduced thousands of homes to rubble has been picked as the top news story of 2016 in an annual survey of newsrooms across Canada. Dubbed "the beast" for its merciless unpredictability, the Fort McMurray wildfire garnered 39 of the 67 votes cast by senior editors. It was followed by Canada's ongoing resettlement of Syrian refugees with 11 votes, the fentanyl crisis with six and the Tragically Hip's farewell tour with five. "Not even a Hollywood script could match the terror, uncertainty, and heroism to come out of what seemed to be a surreal event," wrote Dave Barry, news director of CKPG TV in Prince George, B.C. Canadian Press (Brandon Sun, Winnipeg Free Press, Metro News, Global News, 570 News, Globe and Mail)

Sask. government rejects privacy commissioner's recommendation to release Husky pipeline records
The Saskatchewan government has rejected a recommendation from the provincial privacy commissioner to release records and information about Husky Energy pipeline inspections. In a report focused on the Ministry of the Economy, the Office of the Saskatchewan Information and Privacy Commissioner says the government should not have withheld records in response to an access to information request. On July 21, about 200,000 litres of heavy oil mixed with another petroleum product spilled into the North Saskatchewan River from a Husky pipeline near Lloydminster, Sask. The cities of Prince Albert, Melfort and North Battleford had to temporarily shut down their drinking water intake from the river and find other means to supply their residents with drinking water. Fête du Nouvel An : la sécurité à l'ordre du jour
L'attentat survenu lundi au Marché de Noël de Berlin fait réfléchir sur les mesures de sécurité à l'approche des célébrations du Nouvel An sur la Grande Allée à Québec. La sécurité sera d'ailleurs au coeur des discussions lors d'une rencontre qui était déjà prévue mercredi entre les organisateurs de la fête, les services de sécurité et la Ville de Québec. La Ville ne veut pas confirmer si elle envisage des mesures supplémentaires et de quelle nature elles pourraient être. Marie-Ève Painchaud, porte-parole du Service de police de la Ville de Québec, souligne que le risque n'est pas le même à Québec, mais que la Ville est bien outillée. Radio-Canada

Eight reasons why Canada must repeal its anti-terror laws
An opinion piece states, ""Sunny ways my friends," Canadian prime Minister Justin Trudeau told his supporters on election night last year. "Sunny ways. This is what positive politics can do." One of Trudeau's main campaign promises was to hold public consultations to review and amend draconian national security laws (known as Bill C-51 at the time) that the outgoing Conservative government enacted prior to being thrown out in 2015. After public consultations wrapped up last week, many are now awaiting to see if sunlight will disinfect the national security shadow. Like most countries, Canada's legal landscape underwent a seismic shift in the immediate aftermath of 9/11. The Liberal government, led at the time by prime minister Jean Chretien, enacted a slew of national security laws and policies. They included the 2001 Anti-Terrorism Act, which echoed the infamous American Patriot Act. (...) Canada's spy agency, the Canadian Security Intelligence Service (CSIS), was created in 1984 as a civilian agency to address abuses of power that occurred when the Royal Canadian Mounted Police (RCMP) handled both intelligence and law enforcement. The Anti-Terrorism Act of 2015 radically expands

the powers of the CSIS, and disregards constitutional protections. (…) Thousands of Canadian Muslims and Arabs have had to submit themselves to "voluntary" interviews with the CSIS. The number and frequency will undoubtedly increase under the new laws. Many of these people are ensnared in the national security web merely through guilt by association and the inevitable false positives." Middle East Eye

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

The Lie-Detecting Security: Kiosk of the Future
SDSU professor is developing a robotic kiosk that could help detect travelers with sinister intentions. When you engage in international travel, you may one day find yourself face-to-face with border security that is polite, bilingual and responsive—and robotic. The Automated Virtual Agent for Truth Assessments in Real Time (AVATAR) is currently being tested in conjunction with the Canadian Border Services Agency (CBSA) to help border security agents determine whether travelers coming into Canada may have undisclosed motives for entering the country. (…) In the meantime, Elkins is looking for a government agency willing to utilize the technology in a real-world application. "AVATAR has been tested in labs, in airports and at border crossing stations," Elkins noted. "The system is fully ready for implementation to help stem the flow of contraband, thwart fleeing criminals, and detect potential terrorists and many other applications in the effort to secure international border. San Diego Metro

Why are public schools recruiting adult students overseas?
The Quebec government encourages school boards to conduct vocational training Quebec English School Boards Association president Jennifer Maccarone told The Suburban. "Emploi Québec dictates if, say, we need 40 skilled workers in a particular region in welding and fitting, 100 new jobs in secretarial and another number in plumbing and fitting," she explained in an interview last month. "We hold regular meetings with universities CEGEPs and school boards to work with Emploi Québec to determine what programs we need to be backing away from because there is a surplus and which ones will see growth in demand." The results are then coordinated with provincial education and immigration officials, to ensure that Quebec has sufficient qualified workers to keep its economy thriving. The vocational studies thus indirectly help international students to apply for permanent residence, so they can remain here and make a useful contribution by reducing Canada's skilled worker shortage, once they complete their program. "People come here to get a profession," English Montreal School Board (EMSB), communication and marketing specialist Michael Cohen told The Suburban. "Many apply to immigrate and Quebec gets workers skilled and able to pay taxes." Suburban

Americans dream of Canada after Trump
As electoral college votes in Donald Trump, many US citizens plan move to Canada, but may face cold reception. Lola Al-Uqdah won't soon forget the morning of November 9. A mother of three and psychology professor who lives in Camden, New Jersey, Al-Uqdah was in the midst of her usual pre-work routine when she learned that Donald Trump had defeated Hillary Clinton to become the next president of the United States. It was the morning after the US election and her husband had delivered the message through the bathroom door. (…) Her American Dream was dead. There was only one thing left to do: plan her move to Canada. Al-Uqdah is one of hundreds, if not thousands of Americans who, during the election, contemplated moving to Canada if Trump won. But unlike the vast majority of liberal anti-Trumpers who flip-flopped on Canada once the billionaire real estate mogul pulled off a stunning victory, Al-Uqdah was serious. For Al-Uqdah, a Muslim woman, a Trump presidency wasn't just an inconvenience - it was a terrifying reality. AlJazeera

Gypsum tariffs will save Canadian manufacturing jobs
An opinion piece states, "The International Brotherhood of Boilermakers represent 120 workers employed at CertainTeed Gypsum (CTG) wallboard manufacturing operations in Western Canada and we are concerned their jobs are at stake. We appeared before the Canadian International Trade Tribunal (CITT) to explain what happens to laid-off workers and why Canada should not change its 112-year-old policy of fighting the evils of dumping. Our members have already lost over 100 well-paid, middle-class union jobs at idled gypsum plants in Western Canada and we cannot afford to lose 120 more. David Campbell, of

Empire Drywall Ltd., presented an argument on Dec. 13 in the Edmonton Journal, for why U.S. drywall producers should be given a licence to engage in what the Canada Border Services Agency (CBSA) has already determined to be illegal dumping. We disagree with this notion. Ottawa must not give U.S. producers a licence to dump gypsum board and steal our jobs; to do so would be a miscarriage of justice. Western Canada needs jobs and potential investors must be convinced that they will have protection against unfair trade practices." Edmonton Journal

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

ShadowBrokers Dump Came from Internal Code Repository, Insider
An analysis of the latest ShadowBrokers dump of alleged NSA spy tools points to an insider with access to a code repository belonging to the intelligence agency, experts said. Researchers at security company Flashpoint said today that its investigation of the leaked data points away from an attack against NSA infrastructure, or other theories that operators mistakenly left classified data on staging servers, for example. Instead, clues in code made available last week point toward an NSA employee or contractor. Threatpost

The complaint, by Consumer Watchdog and Privacy Rights Clearing House, alleged that Google has created "super-profiles" as it can track user activity on Android mobile phones, with an 88 percent market share of smartphones worldwide. The information can also be gleaned "from any website that uses Google Analytics, hosts YouTube videos, or displays ads served by DoubleClick or AdSense," according to the complaint. Computerworld

Malware Exchange Busted by the Feds Relaunches, At Least in Name
The digital underground is a fragile place, with hacking forums sometimes being shuttered by police. That's what happened to malware-marketplace Darkode last year: in coordinated raids, the FBI, UK's National Crime Agency, and a slew of other law enforcement bodies arrested over 70 hackers and closed the popular site. Now, Darkode, is back, at least in name. Motherboard

Hackers Might Have Turned Off the Lights in Ukraine for the Second Time
Ukraine experienced a new power outage during the weekend, and it's believed that hackers are once again responsible, after they previously breached energy companies in 2015. Softpedia; Bleeping Computer

This is your captain speaking... or is it?
Vulnerabilities in Panasonic in-flight entertainment systems create a possible mechanism for attackers to control in-flight displays, PA systems and lighting, say researchers. Ruben Santamarta, principal security consultant at IOActive, said it had found vulnerabilities in Panasonic Avionic In-Flight Entertainment (IFE) systems that it claims could allow hackers to "hijack" passengers' in-flight displays and, in some instances, potentially access their credit card information. The research revealed it would also theoretically be possible that such a vulnerability could present an entry point to the wider network, including the aircraft controls domain. Hailstorm methods used to spread malware in phishing attacks
Cisco Talos researchers have spotted Hailstorm spam tactics used to evade cyber defenses and spread malware via phishing attacks. Rather than send large volumes of mail for large periods of time, hailstorm campaigns send larges bursts of spam over very short periods of time, according to a Dec. 19 blog post. The spam is sent via IP addresses located around the world with the intent of flying under the radar with respect to any reputation or volume-based metrics that could be applied by anti-spam systems. SC Magazine

Evolved DNSChanger malware slings evil ads at PCs, hijacks routers

Malware that spreads via evil web ads and menaces broadband routers has been discovered – and it's going to be particularly horrible for small business and home internet users, which it targets. This latest variant of the years-old DNSChanger nasty, just spotted by Californian infosec biz Proofpoint, works like this: some JavaScript code is hidden in advertisements placed on mainstream websites via ad networks. The code – which prefers Chrome on Windows and Android – checks for the local IP address of the browser visiting the site using a WebRTC request to a Mozilla STUN server. Register

Mobile banking trojans adopt ransomware features
Cybercriminals are adding file-encrypting features to traditional mobile banking trojans, creating hybrid threats that can steal sensitive information and lock user files at the same time. One such trojan is called Faketoken and its primary functionality is to generate fake login screens for more than 2,000 financial applications in order to steal login credentials. Computerworld

Inside LeakedSource and Its Database of 3 Billion Hacked Accounts
By now it's hard to keep track of which companies have been hacked and which haven't. Remember the FourSquare hack? What about Adobe? Even breaches that were high-profile at the time are fading into obscurity as bigger and scarier ones crop up. (Ahem, Yahoo.) And if you can't remember what's been hacked, you're probably struggling to keep track of which leaks have included your personal data. That's where "the Google of data breaches" comes in. LeakedSource is a service that sends email notifications about new breaches and offers a database of information stolen in hacks. Its basic services—the ability to sign up for email notifications and search the database—are free, but users can pay to access more advanced search functionality. Wired Magazine

Scars on his body remind boy of abuse he suffered in Mountie's basement
The boy who was restrained, tortured, sexually abused and neglected in the basement of his family's home told court in a recorded victim impact statement that while he's doing better, the scars on his body remind him of the abuse he suffered. He was 11 when his parents were arrested in February 2013 and is now 14 years old. He appeared in Ontario Superior Court in Ottawa Tuesday via a video recorded last week. The boy looked healthy, though his voice sometimes cracked. He said he avoids answering questions about the scars on his body and that he's reminded in the shower about what he endured when he sees the red marks around his ankles from his restraints. He said he knows he needs psychological help, and that he one day hopes to be able to put the memories aside. Her Mountie husband — the boy's father — was found guilty of aggravated assault, sexual assault causing bodily harm, forcible confinement and failing to provide the necessaries of life. He has been suspended from the RCMP without pay. The Mountie is expected to be sentenced in March. CBC News

RCMP sing at six care homes in Parksville Qualicum Beach
Residents at a half-dozen Parksville and Qualicum Beach care homes were serenaded with Christmas carols Thursday by an unusual choral group — the Oceanside RCMP. Outfitted in red serge and supported by several family members, civilian office staff and women from the victims services department, a group of 18 detachment members regaled seniors with classic carols in a one-day tour of brief stops. Parksville Qualicum Beach News

Police constable debunks Vader's claim strip search was 'humiliating'
A constable involved in the strip search of Travis Vader in 2010 at the Edson RCMP detachment told an Edmonton courtroom he was just following instructions from a superior officer. Const. Steven McQueen, with the Edmonton serious crimes unit, testified at Vader's sentencing hearing Monday that he and another officer brought Vader to an empty cell where they proceeded to "secure his clothes as potential evidence." They searched for weapons and drugs, McQueen said, then gave Vader a fresh T-shirt, sweatpants and socks to wear as they put his clothes in an evidence bag. Vader was naked for less than a minute in a quiet cell with nobody else around, McQueen said, suggesting the search was routine and requested by a superior. Last week, Vader testified the strip search went on for five minutes, with the

door to the holding cell left open where "everybody could see." He called the experience "absolutely humiliating." CBC News

Calgary police chief announces independent review of officer-involved shootings
Calgary's police chief announced on Monday there will be an independent review into officer-involved shootings in Calgary. Speaking before Calgary city council, Chief Roger Chaffin said he wants the review to be conducted by someone outside of the City of Calgary and Calgary Police Service. They have been 10 officer-involved shootings in Calgary so far in 2016, five of which were fatal. There were three in 2015. Chaffin has attributed the increase to a changing nature of crime in the city, citing the presence of meth and opioids on the Calgary streets as driving factors. Calgary Mayor Naheed Nenshi said an independent review is the right approach. A provincial watchdog does review officer-involved shootings in Alberta. The Alberta Serious Incident Response Team (ASIRT) determines if officers acted appropriately and whether or not any wrongdoing took place. Global News

Body found on Big Island Lake Cree Nation during RCMP theft investigation
RCMP believe the death of a person found on the Big Island Lake Cree Nation as officers investigated a theft is suspicious. Mounties say officers were investigating a theft Tuesday at about 5 a.m. when police found the deceased male — officers do not yet know his age — outdoors on the First Nation. Investigators do not yet know the circumstances of the death or the body's identity, but police do believe the death is suspicious. The RCMP's major crimes north unit and forensic identification section are investigating alongside the officers from Pierceland, the Meadow Lake detachment's police dog unit and the coroner's office. CTV News Saskatoon; StarPhoenix; CBC News

Vigil grows at apparent murder-suicide scene in Spruce Grove
With just days to go before Christmas, an Alberta family will spend the holidays planning funerals, instead of celebrating. Two hockey sticks, two teddy bears and a collection of flowers formed a memorial on the front lawn of a home west of Edmonton, where two brothers and their father were found dead Monday morning in what appears to be a murder-suicide. The bodies discovered inside the home were those of Corry MacDougall and his sons, 13-year-old Ryder MacDougall and 11-year-old Radek MacDougall. Brent Stark, the boys' stepfather, spoke to Global News Monday evening. He said it was he and the boys' mother Tracy who discovered the bodies and called police. He also said he believes Corry killed his sons in an apparent murder-suicide. RCMP confirmed that the bodies of three people were found in the home at 2 Haney Ct. Monday morning and that they are not looking for any suspects. Global News

RCMP looking for Big River teen
A 13-year-old girl from the Big River area has been reported missing. Maria McAdam, who also goes by 'Littlechief,' was reported missing on Dec. 18. She was last seen at a school on Dec. 16 and was supposed to be at a friend's home over the weekend, but this wasn't the case. PA Now

L'ex-juge Delisle saura s'il peut reprendre sa liberté mardi
L'ex-juge Jacques Delisle saura mardi s'il peut recouvrir sa liberté en attendant que la ministre fédérale de la justice détermine s'il a été victime, ou non, d'une erreur judiciaire en étant condamné pour le meurtre de sa femme. Ces dernières semaines, les avocats de M. Delisle ont tenté de démontrer que l'homme est innocent du crime pour lequel il a été condamné en 2012 à la prison à perpétuité en présentant une nouvelle analyse balistique. M. Delisle, aujourd'hui âgé de 81 ans, a passé les quatre dernières années derrière les barreaux suite au meurtre de sa femme survenue en 2009. Agence QMI (Journal de Québec, Journal de Montréal); TVA Nouvelles

Saskatchewan Penitentiary remains under lockdown following riot
A lockdown at the Saskatchewan Penitentiary remains in place after 185 inmates in medium security destroyed parts of the prison during a deadly riot last Wednesday. There are still plenty of questions as to what sparked the riot but it appears food portions being served to inmates may have played a role.

During the rampage, six inmates suffered non-life threatening injuries after being hit by shotgun pellets. Another three were sent to hospital in serious condition after being assaulted by other prisoners, including Jason Leonard Bird, who died Wednesday evening. A wake for Bird will take place on Tuesday. An investigation into his death and the entire riot is still on-going. "The investigation that is going to be done by both Corrections Canada and the police will be extremely difficult," James Bloomfield, with the Union of Canadian Correctional Officers, said in a phone interview with Global News. Global News

Broadcast Media / Médias télédiffusés:

A lockdown is still in effect at Saskatchewan Penitentiary following last week's deadly riot. The riot prompted the lockdown in maximum and medium security areas. Three inmates were injured. Officers were forced to discharge shotguns to control the riot, as a result, six other inmates were injured. (CTV NEWS, 8:00)

What Teaching In Jail Is Teaching Me About Privilege
A blog states, "Four months ago, I began teaching inmates in two of Ontario's maximum security jails. The experience has taught me a lot in a very short amount of time. I'm learning about an alternative universe that exists in parallel to mine. I'm accessing a dimension which is completely divergent from the one I was born into, and I'm still trying to digest it all. I come from an upper-middle class, white family, and I grew up in an affluent Toronto suburb. It was the modern-day "leave it to beaver." I started walking to school in grade three, and I wandered through life feeling safe and protected. I ventured into the downtown core once every six months to see the dentist, and that's about as much of Toronto as I registered. To me, this city consisted of my tiny suburbia and the urban dentist chair. (…) *Literal Change is dedicated to teaching the incarcerated population the skills and strategies that will help these individuals reach literacy proficiency. According to the Correctional Services of Canada:* "[A] survey of Canadian institutional libraries warned that limited access to information, exacerbated by low literacy levels, renders inmates ill-equipped to cope with the complexities of Canada's information driven society upon release."" Supervised drug site aims to cut overdose deaths
An orange shipping container converted into a supervised consumption site for injection drug users opens today in the courtyard at Our Place on Pandora Avenue. The hope is that the new temporary and limited service helps to curb the catastrophic number of overdose deaths in Victoria. It is the first supervised consumption service to open at the end of a year of unprecedented deaths, the day after the B.C. Coroners Service announced November overdose deaths were the highest on record for the province. Victoria is in the top three communities of overdose deaths, and Vancouver Island has the highest rate of overdose deaths in the province, with 139 so far this year and November the worst month yet with 18 deaths. "It's completely devastating. The numbers are devastating but sadly I'm not surprised," said Heather Hobbs, who has worked in harm reduction with Aids Vancouver Island for 13 years. "I remember very clearly this time last year when there were a number of deaths in the community and it started to get really bad. We've never seen anything like this. It just keeps getting worse." Hobbs said that despite harm-reduction measures such as supervised consumption services and training to administer naloxone - the antidote to the powerful opioid fentanyl - part of the problem stems from years of "bad" drug policy. "We've done a lot of work to treat drug use as a health issue, not a criminal justice issue, but the justice system is far behind," said Hobbs. "Systems that criminalize and punish people for having a health problem do not work. The whole attempt to keep on top of drugs and dealers is not working. We thought fentanyl was bad, now there's carfentanil." Times Colonist

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Who is Canada's self-styled 'Prince of Pot' — and what does he want?
Marc Emery and his stores, Cannabis Culture, came out of nowhere last week with the announcement that they were breaking Federal marijuana laws at eight secret locations in the city. A few days later, the stores were raided, closed and Emery was thrown in jail. He was charged with drug trafficking, possession for the purpose of trafficking and conspiracy. He has been released on bail and is due back in court Feb. 15. Here's a look at Emery's background and what he might hope to accomplish in Montreal. CBC News

How young is too young for legal pot?
Experts are debating the age limit for buying marijuana, with one Edmonton group saying a legal age on par with alcohol could ease the crowding of prisons and remand centres. “There’s a lot of people that are in remand, that are in provincial institutions, for minor drug offences,” said Chris Hay, executive director of the John Howard Society, a non-profit advocating for prison reform. “I think this will definitely help to stave that off, or prevent that a little bit.” Legalization is expected in spring 2017. A recent landmark report from the federal Task Force on Cannabis Legalization and Regulation recommended age 18, but the Canadian Medical Association is pushing for 21. “This is a balance between protecting the developing brain versus trying to address some of the social realities and harm reduction,” said Dr. Jeff Blackmer, who is based in Ottawa. “Obviously there’s no perfect solution here.” Blackmer said evidence shows marijuana has a detrimental effect on short-term memory and retention of information, and chronic use is linked to depression, anxiety and psychosis in some users. Ideally, he said, youth would not use the drug until their brains stop developing around age 25. Metro News

Officials investigate U.S. air traffic incident with Air Canada plane
U.S. officials are investigating after an air traffic controller error sent a jet from Los Angeles International Airport into the flight path of an Air Canada plane while flying low over Southern California mountains. KABC-TV reports an EVA Air Boeing 777 that left LAX around 1:20 a.m. Friday heading to Taiwan was given an incorrect instruction by a controller based in San Diego to turn left instead of right. That sent the airliner toward mountains above Altadena, as well as toward the path of an Air Canada plane that had just

taken off. Audio traffic indicates the same controller realized the error and told the airliner to "stop your climb" and head southbound. CBC News

Jordanie: l'EI revendique l'attaque de Karak
Le groupe État islamique (EI) a revendiqué l'attaque meurtrière ayant «visé forces de sécurité et touristes» dimanche près du site touristique de Karak en Jordanie, selon un communiqué diffusé mardi sur internet. «Quatre soldats du Caliphat --décédés-- munis d'armes automatiques et de grenades ont attaqué des rassemblements de la sécurité jordanienne et des ressortissants des États de la coalition croisée dans la ville de Karak en Jordanie», affirme le texte faisant référence à la coalition internationale antijihadistes qui lutte contre l'EI en Syrie et en Irak. L'attaque près du site de Karak, à 120 km au sud d'Amman a fait dix morts, sept policiers, deux civils jordaniens et une touriste canadienne, et une trentaine de blessés, selon les autorités jordaniennes. Elle a visé un commissariat et une patrouille de police. Canadian and American hostages appeal to Trump and Obama in new scripted video
An American woman and her Canadian husband who were captured four years ago by the Taliban are appealing to President Barack Obama and President-elect Donald Trump to exchange Afghan prisoners for their release, in a video that also shows their two young children for the first time. "My children have seen their mother defiled," says Caitlan Coleman in the new video released on Monday by the Haqqani Network, an Afghan and Pakistani insurgent group, and posted to YouTube. Next to her, a baby and toddler squirm on her husband Joshua Boyle's lap. The toddler laughs at something off camera, and then picks his nose. "We ask quickly, in our collective fourteenth year of prison, urge the governments on both sides to reach some agreement to allow us freedom." Coleman was 27 and pregnant in the fall of 2012 when she and Boyle were captured by the Taliban as they were backpacking in Afghanistan. They are now being held by the Haqqanis, a group affiliated with the Taliban who have been known for their hostage operations — including holding American soldier Bowe Berghdal. "Obama, your legacy in leaving office is probably important to you, and our lives and those of our children are to us," Coleman says in the video. "So please don't become the next Jimmy Carter. Just give the offenders something so they and you can save face, and we can leave the region permanently." VICE News; Radio-Canada (Huffington Post Québec)

Berlin Christmas market: Police release man from custody
The man detained after a truck crashed into a Berlin Christmas market has been set free, Germany's general prosecutor said in a statement Tuesday. "The investigations thus far have not produced urgent suspicion against the suspect," the statement said. Police say the man they detained after a truck plowed into a Berlin Christmas market may not have been the driver, leading to fears that the attacker could still be on the loose. "They're really back to square one in terms of this investigation. ... It may well be a scenario of a manhunt, a race against time to arrest this individual before they can strike again," CNN terrorism analyst Paul Cruickshank said. CNN; Radio-Canada ; Associated Press (Calgary Sun, Edmonton Sun, Ottawa Sun, Toronto Sun, Winnipeg Sun)

First Berlin victim a Pole who fought for his life
He was the first victim in the attack on a Berlin Christmas market -- a 37-year-old Polish truck driver who was seemingly stabbed and shot to death in the cabin of his truck. One of his colleagues said he was so dedicated to his work and his truck that he could be expected to defend the vehicle "to the end." Lukasz Urban, a 37-year-old from the western village of Roznowo, near the border with Germany, was found dead in the cabin of the truck that was hijacked and driven into the crowd Monday evening, killing at least another 11 people. German authorities are calling it an "act of terrorism." Chronicle Herald

UK police forces reviewing security plans after Berlin attack
Police forces across Britain are reviewing their security plans following the Berlin Christmas market attack and remain on high alert. The threat level in London remains at "severe", meaning the police consider an attack highly likely, the Metropolitan police said in a statement on Tuesday. A Downing Street spokeman said: "The safety and security of British citizens in the government's number one priority. Clearly in the light of what has happened in Berlin police will be reviewing what is in place." Guardian UK; BBC News

NSA watchdog on leave in whistleblower case
Allegations of retaliation against a whistleblower at the National Security Agency have left its top watchdog fighting for his job, according to an intelligence official and another individual familiar with the case. The case could offer some credence to Edward Snowden's claim that he could not have reported the government's domestic surveillance program without facing reprisals. George Ellard, the NSA's inspector general, was placed on administrative leave after he refused to give the whistleblower a certain job assignment. The Project on Government Oversight, an advocacy group, first reported last week that Adm. Mike Rogers, director of NSA, had placed Ellard on leave and recommended that he be terminated. Ellard is appealing that decision. Associated Press (CTV News)

US cities step up security at Christmas gatherings after terrorist truck attack on Berlin market which killed 12 shoppers
Cities across America are stepping up security at Christmas events following a terrorist truck attack on a Berlin market that has left 12 people dead. Police are boosting their presence at holiday villages and major sites around cities such as New York, Chicago and Boston as the US remains on high alert. It comes after a Christmas market in the German capital was deliberately targeted by a man, who is believed to have used a hijacked 25-tonne lorry to murder 12 people and injure 48 more. And in New York, police confirmed highly trained specialist units and its anti-terror squad would be deployed to high profile locations around the city. Sites expected to have a high armed police presence include the Winter Village market in Bryant Park, the Christmas market near Columbus Circle and the festive stalls in Union Square. Also under close surveillance by the security services are the world-famous Christmas tree at Rockefeller Center, Times Square and Herald Square, home to department store Macy's. Daily Mail

After Berlin atttack, the cracks in Germany's security are showing
An opinion piece by professor Christian Leuprecht states, "The attack in Berlin may have taken the world by surprise; the only surprise to the German security and intelligence establishment is that something of the sort did not happen sooner. Hannover, Würzburg, Ansbach: An air of terrorism has been hanging over Germany all year. Since the attacks in Paris and Brussels, German authorities have been on high alert, and nowhere more so than in Berlin: Note the pattern of sensational attacks in capital cities. The July shooting in Munich that caused authorities to shut down the city was the canary in the coal mine. As in Munich – but unlike Paris – the response in Berlin was swift and co-ordinated; with one notable difference: Information operations in Berlin were far superior because authorities there finally understood social media. Yet, authorities seem to have few leads (if any) and there are now doubts about the suspect who was initially apprehended. How is that possible? Much of German's security architecture was designed to prevent what happened during the Third Reich: The logic was to take domestic security out of the hands of the central government. Germany has some of the strictest privacy laws in the world. As a result, agencies are loath to talk to one another: Foreign intelligence (the *Bundesnachrichtendienst*, or BND) faces severe hurdles communicating with domestic intelligence (the *Verfassungsschutz*, which loosely translates to protection of the constitution) – and is subject to an extensive parliamentary inquiry into unauthorized "selector" data sharing with the U.S. National Security Agency." Ferocious Fort McMurray wildfire voted news story of the year for 2016
The ferocious wildfire that forced nearly 90,000 to flee Canada's oilsands region and reduced thousands of homes to rubble has been picked as the top news story of 2016 in an annual survey of newsrooms across Canada. Dubbed "the beast" for its merciless unpredictability, the Fort McMurray wildfire garnered 39 of the 67 votes cast by senior editors. It was followed by Canada's ongoing resettlement of Syrian refugees with 11 votes, the fentanyl crisis with six and the Tragically Hip's farewell tour with five. "Not even a Hollywood script could match the terror, uncertainty, and heroism to come out of what seemed to be a surreal event," wrote Dave Barry, news director of CKPG TV in Prince George, B.C. Canadian Press (Brandon Sun, Winnipeg Free Press, Metro News, Global News, 570 News, Globe and Mail)

Sask. government rejects privacy commissioner's recommendation to release Husky pipeline records
The Saskatchewan government has rejected a recommendation from the provincial privacy commissioner to release records and information about Husky Energy pipeline inspections. In a report focused on the Ministry of the Economy, the Office of the Saskatchewan Information and Privacy Commissioner says the government should not have withheld records in response to an access to information request. On July 21, about 200,000 litres of heavy oil mixed with another petroleum product spilled into the North Saskatchewan River from a Husky pipeline near Lloydminster, Sask. The cities of Prince Albert, Melfort and North Battleford had to temporarily shut down their drinking water intake from the river and find other means to supply their residents with drinking water. Fête du Nouvel An : la sécurité à l'ordre du jour
L'attentat survenu lundi au Marché de Noël de Berlin fait réfléchir sur les mesures de sécurité à l'approche des célébrations du Nouvel An sur la Grande Allée à Québec. La sécurité sera d'ailleurs au coeur des discussions lors d'une rencontre qui était déjà prévue mercredi entre les organisateurs de la fête, les services de sécurité et la Ville de Québec. La Ville ne veut pas confirmer si elle envisage des mesures supplémentaires et de quelle nature elles pourraient être. Marie-Ève Painchaud, porte-parole du Service de police de la Ville de Québec, souligne que le risque n'est pas le même à Québec, mais que la Ville est bien outillée. Radio-Canada

Eight reasons why Canada must repeal its anti-terror laws
An opinion piece states, ""Sunny ways my friends," Canadian prime Minister Justin Trudeau told his supporters on election night last year. "Sunny ways. This is what positive politics can do." One of Trudeau's main campaign promises was to hold public consultations to review and amend draconian national security laws (known as Bill C-51 at the time) that the outgoing Conservative government enacted prior to being thrown out in 2015. After public consultations wrapped up last week, many are now awaiting to see if sunlight will disinfect the national security shadow. Like most countries, Canada's legal landscape underwent a seismic shift in the immediate aftermath of 9/11. The Liberal government, led at the time by prime minister Jean Chretien, enacted a slew of national security laws and policies. They included the 2001 Anti-Terrorism Act, which echoed the infamous American Patriot Act. (...) Canada's spy agency, the Canadian Security Intelligence Service (CSIS), was created in 1984 as a civilian agency to address abuses of power that occurred when the Royal Canadian Mounted Police (RCMP) handled both intelligence and law enforcement. The Anti-Terrorism Act of 2015 radically expands

the powers of the CSIS, and disregards constitutional protections. (…) Thousands of Canadian Muslims and Arabs have had to submit themselves to "voluntary" interviews with the CSIS. The number and frequency will undoubtedly increase under the new laws. Many of these people are ensnared in the national security web merely through guilt by association and the inevitable false positives." Middle East Eye

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

The Lie-Detecting Security: Kiosk of the Future
SDSU professor is developing a robotic kiosk that could help detect travelers with sinister intentions. When you engage in international travel, you may one day find yourself face-to-face with border security that is polite, bilingual and responsive—and robotic. The Automated Virtual Agent for Truth Assessments in Real Time (AVATAR) is currently being tested in conjunction with the Canadian Border Services Agency (CBSA) to help border security agents determine whether travelers coming into Canada may have undisclosed motives for entering the country. (…) In the meantime, Elkins is looking for a government agency willing to utilize the technology in a real-world application. "AVATAR has been tested in labs, in airports and at border crossing stations," Elkins noted. "The system is fully ready for implementation to help stem the flow of contraband, thwart fleeing criminals, and detect potential terrorists and many other applications in the effort to secure international border. San Diego Metro

Why are public schools recruiting adult students overseas?
The Quebec government encourages school boards to conduct vocational training Quebec English School Boards Association president Jennifer Maccarone told The Suburban. "Emploi Québec dictates if, say, we need 40 skilled workers in a particular region in welding and fitting, 100 new jobs in secretarial and another number in plumbing and fitting," she explained in an interview last month. "We hold regular meetings with universities CEGEPs and school boards to work with Emploi Québec to determine what programs we need to be backing away from because there is a surplus and which ones will see growth in demand." The results are then coordinated with provincial education and immigration officials, to ensure that Quebec has sufficient qualified workers to keep its economy thriving. The vocational studies thus indirectly help international students to apply for permanent residence, so they can remain here and make a useful contribution by reducing Canada's skilled worker shortage, once they complete their program. "People come here to get a profession," English Montreal School Board (EMSB), communication and marketing specialist Michael Cohen told The Suburban. "Many apply to immigrate and Quebec gets workers skilled and able to pay taxes." Suburban

Americans dream of Canada after Trump
As electoral college votes in Donald Trump, many US citizens plan move to Canada, but may face cold reception. Lola Al-Uqdah won't soon forget the morning of November 9. A mother of three and psychology professor who lives in Camden, New Jersey, Al-Uqdah was in the midst of her usual pre-work routine when she learned that Donald Trump had defeated Hillary Clinton to become the next president of the United States. It was the morning after the US election and her husband had delivered the message through the bathroom door. (…) Her American Dream was dead. There was only one thing left to do: plan her move to Canada. Al-Uqdah is one of hundreds, if not thousands of Americans who, during the election, contemplated moving to Canada if Trump won. But unlike the vast majority of liberal anti-Trumpers who flip-flopped on Canada once the billionaire real estate mogul pulled off a stunning victory, Al-Uqdah was serious. For Al-Uqdah, a Muslim woman, a Trump presidency wasn't just an inconvenience - it was a terrifying reality. AlJazeera

Gypsum tariffs will save Canadian manufacturing jobs
An opinion piece states, "The International Brotherhood of Boilermakers represent 120 workers employed at CertainTeed Gypsum (CTG) wallboard manufacturing operations in Western Canada and we are concerned their jobs are at stake. We appeared before the Canadian International Trade Tribunal (CITT) to explain what happens to laid-off workers and why Canada should not change its 112-year-old policy of fighting the evils of dumping. Our members have already lost over 100 well-paid, middle-class union jobs at idled gypsum plants in Western Canada and we cannot afford to lose 120 more. David Campbell, of

Empire Drywall Ltd., presented an argument on Dec. 13 in the Edmonton Journal, for why U.S. drywall producers should be given a licence to engage in what the Canada Border Services Agency (CBSA) has already determined to be illegal dumping. We disagree with this notion. Ottawa must not give U.S. producers a licence to dump gypsum board and steal our jobs; to do so would be a miscarriage of justice. Western Canada needs jobs and potential investors must be convinced that they will have protection against unfair trade practices." Edmonton Journal

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

ShadowBrokers Dump Came from Internal Code Repository, Insider
An analysis of the latest ShadowBrokers dump of alleged NSA spy tools points to an insider with access to a code repository belonging to the intelligence agency, experts said. Researchers at security company Flashpoint said today that its investigation of the leaked data points away from an attack against NSA infrastructure, or other theories that operators mistakenly left classified data on staging servers, for example. Instead, clues in code made available last week point toward an NSA employee or contractor. Threatpost

Privacy groups complain to FTC over Google's 'deceptive' policy change
Privacy groups have complained to the Federal Trade Commission that Google is encroaching on user privacy through a policy change in June that allows it to combine personally identifiable information with browsing data collected by its DoubleClick digital advertising service. The complaint, by Consumer Watchdog and Privacy Rights Clearing House, alleged that Google has created "super-profiles" as it can track user activity on Android mobile phones, with an 88 percent market share of smartphones worldwide. The information can also be gleaned "from any website that uses Google Analytics, hosts YouTube videos, or displays ads served by DoubleClick or AdSense," according to the complaint. Computerworld

Malware Exchange Busted by the Feds Relaunches, At Least in Name
The digital underground is a fragile place, with hacking forums sometimes being shuttered by police. That's what happened to malware-marketplace Darkode last year: in coordinated raids, the FBI, UK's National Crime Agency, and a slew of other law enforcement bodies arrested over 70 hackers and closed the popular site. Now, Darkode, is back, at least in name. Motherboard

Hackers Might Have Turned Off the Lights in Ukraine for the Second Time
Ukraine experienced a new power outage during the weekend, and it's believed that hackers are once again responsible, after they previously breached energy companies in 2015. Softpedia; Bleeping Computer

This is your captain speaking... or is it?
Vulnerabilities in Panasonic in-flight entertainment systems create a possible mechanism for attackers to control in-flight displays, PA systems and lighting, say researchers. Ruben Santamarta, principal security consultant at IOActive, said it had found vulnerabilities in Panasonic Avionic In-Flight Entertainment (IFE) systems that it claims could allow hackers to "hijack" passengers' in-flight displays and, in some instances, potentially access their credit card information. The research revealed it would also theoretically be possible that such a vulnerability could present an entry point to the wider network, including the aircraft controls domain. Register; Infosecurity Magazine

Hailstorm methods used to spread malware in phishing attacks
Cisco Talos researchers have spotted Hailstorm spam tactics used to evade cyber defenses and spread malware via phishing attacks. Rather than send large volumes of mail for large periods of time, hailstorm campaigns send larges bursts of spam over very short periods of time, according to a Dec. 19 blog post. The spam is sent via IP addresses located around the world with the intent of flying under the radar with respect to any reputation or volume-based metrics that could be applied by anti-spam systems. SC Magazine

Evolved DNSChanger malware slings evil ads at PCs, hijacks routers

Malware that spreads via evil web ads and menaces broadband routers has been discovered – and it's going to be particularly horrible for small business and home internet users, which it targets. This latest variant of the years-old DNSChanger nasty, just spotted by Californian infosec biz Proofpoint, works like this: some JavaScript code is hidden in advertisements placed on mainstream websites via ad networks. The code – which prefers Chrome on Windows and Android – checks for the local IP address of the browser visiting the site using a WebRTC request to a Mozilla STUN server. Register

Mobile banking trojans adopt ransomware features
Cybercriminals are adding file-encrypting features to traditional mobile banking trojans, creating hybrid threats that can steal sensitive information and lock user files at the same time. One such trojan is called Faketoken and its primary functionality is to generate fake login screens for more than 2,000 financial applications in order to steal login credentials. Computerworld

Inside LeakedSource and Its Database of 3 Billion Hacked Accounts
By now it's hard to keep track of which companies have been hacked and which haven't. Remember the FourSquare hack? What about Adobe? Even breaches that were high-profile at the time are fading into obscurity as bigger and scarier ones crop up. (Ahem, Yahoo.) And if you can't remember what's been hacked, you're probably struggling to keep track of which leaks have included your personal data. That's where "the Google of data breaches" comes in. LeakedSource is a service that sends email notifications about new breaches and offers a database of information stolen in hacks. Its basic services—the ability to sign up for email notifications and search the database—are free, but users can pay to access more advanced search functionality. Wired Magazine

LAW ENFORCEMENT / APPLICATION DE LA LOI

Scars on his body remind boy of abuse he suffered in Mountie's basement
The boy who was restrained, tortured, sexually abused and neglected in the basement of his family's home told court in a recorded victim impact statement that while he's doing better, the scars on his body remind him of the abuse he suffered. He was 11 when his parents were arrested in February 2013 and is now 14 years old. He appeared in Ontario Superior Court in Ottawa Tuesday via a video recorded last week. The boy looked healthy, though his voice sometimes cracked. He said he avoids answering questions about the scars on his body and that he's reminded in the shower about what he endured when he sees the red marks around his ankles from his restraints. He said he knows he needs psychological help, and that he one day hopes to be able to put the memories aside. Her Mountie husband — the boy's father — was found guilty of aggravated assault, sexual assault causing bodily harm, forcible confinement and failing to provide the necessaries of life. He has been suspended from the RCMP without pay. The Mountie is expected to be sentenced in March. CBC News

RCMP sing at six care homes in Parksville Qualicum Beach
Residents at a half-dozen Parksville and Qualicum Beach care homes were serenaded with Christmas carols Thursday by an unusual choral group — the Oceanside RCMP. Outfitted in red serge and supported by several family members, civilian office staff and women from the victims services department, a group of 18 detachment members regaled seniors with classic carols in a one-day tour of brief stops. Parksville Qualicum Beach News

Police constable debunks Vader's claim strip search was 'humiliating'
A constable involved in the strip search of Travis Vader in 2010 at the Edson RCMP detachment told an Edmonton courtroom he was just following instructions from a superior officer. Const. Steven McQueen, with the Edmonton serious crimes unit, testified at Vader's sentencing hearing Monday that he and another officer brought Vader to an empty cell where they proceeded to "secure his clothes as potential evidence." They searched for weapons and drugs, McQueen said, then gave Vader a fresh T-shirt, sweatpants and socks to wear as they put his clothes in an evidence bag. Vader was naked for less than a minute in a quiet cell with nobody else around, McQueen said, suggesting the search was routine and requested by a superior. Last week, Vader testified the strip search went on for five minutes, with the

door to the holding cell left open where "everybody could see." He called the experience "absolutely humiliating." CBC News

Calgary police chief announces independent review of officer-involved shootings
Calgary's police chief announced on Monday there will be an independent review into officer-involved shootings in Calgary. Speaking before Calgary city council, Chief Roger Chaffin said he wants the review to be conducted by someone outside of the City of Calgary and Calgary Police Service. They have been 10 officer-involved shootings in Calgary so far in 2016, five of which were fatal. There were three in 2015. Chaffin has attributed the increase to a changing nature of crime in the city, citing the presence of meth and opioids on the Calgary streets as driving factors. Calgary Mayor Naheed Nenshi said an independent review is the right approach. A provincial watchdog does review officer-involved shootings in Alberta. The Alberta Serious Incident Response Team (ASIRT) determines if officers acted appropriately and whether or not any wrongdoing took place. Global News

Body found on Big Island Lake Cree Nation during RCMP theft investigation
RCMP believe the death of a person found on the Big Island Lake Cree Nation as officers investigated a theft is suspicious. Mounties say officers were investigating a theft Tuesday at about 5 a.m. when police found the deceased male — officers do not yet know his age — outdoors on the First Nation. Investigators do not yet know the circumstances of the death or the body's identity, but police do believe the death is suspicious. The RCMP's major crimes north unit and forensic identification section are investigating alongside the officers from Pierceland, the Meadow Lake detachment's police dog unit and the coroner's office. CTV News Saskatoon; StarPhoenix; CBC News

Vigil grows at apparent murder-suicide scene in Spruce Grove
With just days to go before Christmas, an Alberta family will spend the holidays planning funerals, instead of celebrating. Two hockey sticks, two teddy bears and a collection of flowers formed a memorial on the front lawn of a home west of Edmonton, where two brothers and their father were found dead Monday morning in what appears to be a murder-suicide. The bodies discovered inside the home were those of Corry MacDougall and his sons, 13-year-old Ryder MacDougall and 11-year-old Radek MacDougall. Brent Stark, the boys' stepfather, spoke to Global News Monday evening. He said it was he and the boys' mother Tracy who discovered the bodies and called police. He also said he believes Corry killed his sons in an apparent murder-suicide. RCMP confirmed that the bodies of three people were found in the home at 2 Haney Ct. Monday morning and that they are not looking for any suspects. Global News

RCMP looking for Big River teen
A 13-year-old girl from the Big River area has been reported missing. Maria McAdam, who also goes by 'Littlechief,' was reported missing on Dec. 18. She was last seen at a school on Dec. 16 and was supposed to be at a friend's home over the weekend, but this wasn't the case. PA Now

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

L'ex-juge Delisle saura s'il peut reprendre sa liberté mardi
L'ex-juge Jacques Delisle saura mardi s'il peut recouvrir sa liberté en attendant que la ministre fédérale de la justice détermine s'il a été victime, ou non, d'une erreur judiciaire en étant condamné pour le meurtre de sa femme. Ces dernières semaines, les avocats de M. Delisle ont tenté de démontrer que l'homme est innocent du crime pour lequel il a été condamné en 2012 à la prison à perpétuité en présentant une nouvelle analyse balistique. M. Delisle, aujourd'hui âgé de 81 ans, a passé les quatre dernières années derrière les barreaux suite au meurtre de sa femme survenue en 2009. Saskatchewan Penitentiary remains under lockdown following riot
A lockdown at the Saskatchewan Penitentiary remains in place after 185 inmates in medium security destroyed parts of the prison during a deadly riot last Wednesday. There are still plenty of questions as to what sparked the riot but it appears food portions being served to inmates may have played a role.

During the rampage, six inmates suffered non-life threatening injuries after being hit by shotgun pellets. Another three were sent to hospital in serious condition after being assaulted by other prisoners, including Jason Leonard Bird, who died Wednesday evening. A wake for Bird will take place on Tuesday. An investigation into his death and the entire riot is still on-going. "The investigation that is going to be done by both Corrections Canada and the police will be extremely difficult," James Bloomfield, with the Union of Canadian Correctional Officers, said in a phone interview with Global News. Global News

Broadcast Media / Médias télédiffusés:

A lockdown is still in effect at Saskatchewan Penitentiary following last week's deadly riot. The riot prompted the lockdown in maximum and medium security areas. Three inmates were injured. Officers were forced to discharge shotguns to control the riot, as a result, six other inmates were injured. (CTV NEWS, 8:00)

What Teaching In Jail Is Teaching Me About Privilege
A blog states, "Four months ago, I began teaching inmates in two of Ontario's maximum security jails. The experience has taught me a lot in a very short amount of time. I'm learning about an alternative universe that exists in parallel to mine. I'm accessing a dimension which is completely divergent from the one I was born into, and I'm still trying to digest it all. I come from an upper-middle class, white family, and I grew up in an affluent Toronto suburb. It was the modern-day "leave it to beaver." I started walking to school in grade three, and I wandered through life feeling safe and protected. I ventured into the downtown core once every six months to see the dentist, and that's about as much of Toronto as I registered. To me, this city consisted of my tiny suburbia and the urban dentist chair. (…) *Literal Change is dedicated to teaching the incarcerated population the skills and strategies that will help these individuals reach literacy proficiency. According to the Correctional Services of Canada:* "[A] survey of Canadian institutional libraries warned that limited access to information, exacerbated by low literacy levels, renders inmates ill-equipped to cope with the complexities of Canada's information driven society upon release.'" COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

Supervised drug site aims to cut overdose deaths
An orange shipping container converted into a supervised consumption site for injection drug users opens today in the courtyard at Our Place on Pandora Avenue. The hope is that the new temporary and limited service helps to curb the catastrophic number of overdose deaths in Victoria. It is the first supervised consumption service to open at the end of a year of unprecedented deaths, the day after the B.C. Coroners Service announced November overdose deaths were the highest on record for the province. Victoria is in the top three communities of overdose deaths, and Vancouver Island has the highest rate of overdose deaths in the province, with 139 so far this year and November the worst month yet with 18 deaths. "It's completely devastating. The numbers are devastating but sadly I'm not surprised," said Heather Hobbs, who has worked in harm reduction with Aids Vancouver Island for 13 years. "I remember very clearly this time last year when there were a number of deaths in the community and it started to get really bad. We've never seen anything like this. It just keeps getting worse." Hobbs said that despite harm-reduction measures such as supervised consumption services and training to administer naloxone - the antidote to the powerful opioid fentanyl - part of the problem stems from years of "bad" drug policy. "We've done a lot of work to treat drug use as a health issue, not a criminal justice issue, but the justice system is far behind," said Hobbs. "Systems that criminalize and punish people for having a health problem do not work. The whole attempt to keep on top of drugs and dealers is not working. We thought fentanyl was bad, now there's carfentanil." Times Colonist

MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS | LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINEES

Missing and murdered Indigenous women inquiry launches new website
Families of missing and murdered Indigenous women should sign up for MMIW inquiry emails while they wait to register to participate, inquiry commission officials say. The emails will provide updates ahead of the inquiry, which is expected to begin in spring. "We want to create a families first process," said Michael Hutchinson, the commission's director of communications. "Nobody has a list of the people that want to take part in the national inquiry.... We're trying to collect that information from families." The MMIW inquiry has a new website, where families should be able to register soon. The inquiry has five commissioners who in the new year will hear testimony from families of missing and murdered Indigenous women and others in order to examine the systemic causes of violence against Indigenous women and girls in Canada, and make recommendations about how to prevent violence against Indigenous women. CBC News

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Who is Canada's self-styled 'Prince of Pot' — and what does he want?
Marc Emery and his stores, Cannabis Culture, came out of nowhere last week with the announcement that they were breaking Federal marijuana laws at eight secret locations in the city. A few days later, the stores were raided, closed and Emery was thrown in jail. He was charged with drug trafficking, possession for the purpose of trafficking and conspiracy. He has been released on bail and is due back in court Feb. 15. Here's a look at Emery's background and what he might hope to accomplish in Montreal. CBC News

How young is too young for legal pot?
Experts are debating the age limit for buying marijuana, with one Edmonton group saying a legal age on par with alcohol could ease the crowding of prisons and remand centres. “There’s a lot of people that are in remand, that are in provincial institutions, for minor drug offences,” said Chris Hay, executive director of the John Howard Society, a non-profit advocating for prison reform. “I think this will definitely help to stave that off, or prevent that a little bit.” Legalization is expected in spring 2017. A recent landmark report from the federal Task Force on Cannabis Legalization and Regulation recommended age 18, but the Canadian Medical Association is pushing for 21. “This is a balance between protecting the developing brain versus trying to address some of the social realities and harm reduction,” said Dr. Jeff Blackmer, who is based in Ottawa. “Obviously there’s no perfect solution here.” Blackmer said evidence shows marijuana has a detrimental effect on short-term memory and retention of information, and chronic use is linked to depression, anxiety and psychosis in some users. Ideally, he said, youth would not use the drug until their brains stop developing around age 25. Metro News

Officials investigate U.S. air traffic incident with Air Canada plane
U.S. officials are investigating after an air traffic controller error sent a jet from Los Angeles International Airport into the flight path of an Air Canada plane while flying low over Southern California mountains. KABC-TV reports an EVA Air Boeing 777 that left LAX around 1:20 a.m. Friday heading to Taiwan was given an incorrect instruction by a controller based in San Diego to turn left instead of right. That sent the airliner toward mountains above Altadena, as well as toward the path of an Air Canada plane that had just

taken off. Audio traffic indicates the same controller realized the error and told the airliner to "stop your climb" and head southbound. CBC News

Jordanie: l'EI revendique l'attaque de Karak
Le groupe État islamique (EI) a revendiqué l'attaque meurtrière ayant «visé forces de sécurité et touristes» dimanche près du site touristique de Karak en Jordanie, selon un communiqué diffusé mardi sur internet. «Quatre soldats du Caliphat --décédés-- munis d'armes automatiques et de grenades ont attaqué des rassemblements de la sécurité jordanienne et des ressortissants des États de la coalition croisée dans la ville de Karak en Jordanie», affirme le texte faisant référence à la coalition internationale antijihadistes qui lutte contre l'EI en Syrie et en Irak. L'attaque près du site de Karak, à 120 km au sud d'Amman a fait dix morts, sept policiers, deux civils jordaniens et une touriste canadienne, et une trentaine de blessés, selon les autorités jordaniennes. Elle a visé un commissariat et une patrouille de police. Agence France-Presse (Journal de Montréal, Journal de Québec); Associated Press (Sault Star, Fort McMurray Today, Cornwall Standard Freeholder, Owen Sound Sun Times, Brantford Expositor, Chatham Daily News, North Bay Nugget, Thunder Bay Chronicle-Journal, Kelowna Daily Courier, Calgary Sun, Edmonton Sun, Ottawa Sun, Toronto Sun, Winnipeg Sun, Guelph Mercury, MetroNews Canada, Brandon Sun)

Canadian and American hostages appeal to Trump and Obama in new scripted video
An American woman and her Canadian husband who were captured four years ago by the Taliban are appealing to President Barack Obama and President-elect Donald Trump to exchange Afghan prisoners for their release, in a video that also shows their two young children for the first time. "My children have seen their mother defiled," says Caitlan Coleman in the new video released on Monday by the Haqqani Network, an Afghan and Pakistani insurgent group, and posted to YouTube. Next to her, a baby and toddler squirm on her husband Joshua Boyle's lap. The toddler laughs at something off camera, and then picks his nose. "We ask quickly, in our collective fourteenth year of prison, urge the governments on both sides to reach some agreement to allow us freedom." Coleman was 27 and pregnant in the fall of 2012 when she and Boyle were captured by the Taliban as they were backpacking in Afghanistan. They are now being held by the Haqqanis, a group affiliated with the Taliban who have been known for their hostage operations — including holding American soldier Bowe Berghdal. "Obama, your legacy in leaving office is probably important to you, and our lives and those of our children are to us," Coleman says in the video. "So please don't become the next Jimmy Carter. Just give the offenders something so they and you can save face, and we can leave the region permanently." VICE News; Radio-Canada (Huffington Post Québec)

Berlin Christmas market: Police release man from custody
The man detained after a truck crashed into a Berlin Christmas market has been set free, Germany's general prosecutor said in a statement Tuesday. "The investigations thus far have not produced urgent suspicion against the suspect," the statement said. Police say the man they detained after a truck plowed into a Berlin Christmas market may not have been the driver, leading to fears that the attacker could still be on the loose. "They're really back to square one in terms of this investigation. ... It may well be a scenario of a manhunt, a race against time to arrest this individual before they can strike again," CNN terrorism analyst Paul Cruickshank said. CNN; Radio-Canada ; Associated Press (Calgary Sun, Edmonton Sun, Ottawa Sun, Toronto Sun, Winnipeg Sun)

First Berlin victim a Pole who fought for his life
He was the first victim in the attack on a Berlin Christmas market -- a 37-year-old Polish truck driver who was seemingly stabbed and shot to death in the cabin of his truck. One of his colleagues said he was so dedicated to his work and his truck that he could be expected to defend the vehicle "to the end." Lukasz Urban, a 37-year-old from the western village of Roznowo, near the border with Germany, was found dead in the cabin of the truck that was hijacked and driven into the crowd Monday evening, killing at least another 11 people. German authorities are calling it an "act of terrorism." Chronicle Herald

NSA watchdog on leave in whistleblower case
Allegations of retaliation against a whistleblower at the National Security Agency have left its top watchdog fighting for his job, according to an intelligence official and another individual familiar with the case. The case could offer some credence to Edward Snowden's claim that he could not have reported the government's domestic surveillance program without facing reprisals. George Ellard, the NSA's inspector general, was placed on administrative leave after he refused to give the whistleblower a certain job assignment. The Project on Government Oversight, an advocacy group, first reported last week that Adm. Mike Rogers, director of NSA, had placed Ellard on leave and recommended that he be terminated. Ellard is appealing that decision. Associated Press (CTV News)

US cities step up security at Christmas gatherings after terrorist truck attack on Berlin market which killed 12 shoppers
Cities across America are stepping up security at Christmas events following a terrorist truck attack on a Berlin market that has left 12 people dead. Police are boosting their presence at holiday villages and major sites around cities such as New York, Chicago and Boston as the US remains on high alert. It comes after a Christmas market in the German capital was deliberately targeted by a man, who is believed to have used a hijacked 25-tonne lorry to murder 12 people and injure 48 more. And in New York, police confirmed highly trained specialist units and its anti-terror squad would be deployed to high profile locations around the city. Sites expected to have a high armed police presence include the Winter Village market in Bryant Park, the Christmas market near Columbus Circle and the festive stalls in Union Square. Also under close surveillance by the security services are the world-famous Christmas tree at Rockefeller Center, Times Square and Herald Square, home to department store Macy's. Daily Mail

After Berlin atttack, the cracks in Germany's security are showing
An opinion piece by professor Christian Leuprecht states, "The attack in Berlin may have taken the world by surprise; the only surprise to the German security and intelligence establishment is that something of the sort did not happen sooner. Hannover, Würzburg, Ansbach: An air of terrorism has been hanging over Germany all year. Since the attacks in Paris and Brussels, German authorities have been on high alert, and nowhere more so than in Berlin: Note the pattern of sensational attacks in capital cities. The July shooting in Munich that caused authorities to shut down the city was the canary in the coal mine. As in Munich – but unlike Paris – the response in Berlin was swift and co-ordinated; with one notable difference: Information operations in Berlin were far superior because authorities there finally understood social media. Yet, authorities seem to have few leads (if any) and there are now doubts about the suspect who was initially apprehended. How is that possible? Much of German's security architecture was designed to prevent what happened during the Third Reich: The logic was to take domestic security out of the hands of the central government. Germany has some of the strictest privacy laws in the world. As a result, agencies are loath to talk to one another: Foreign intelligence (the *Bundesnachrichtendienst*, or BND) faces severe hurdles communicating with domestic intelligence (the *Verfassungsschutz*, which loosely translates to protection of the constitution) – and is subject to an extensive parliamentary inquiry into unauthorized "selector" data sharing with the U.S. National Security Agency." Extract, decode, analyze
As the RCMP tries to convince the public that phone encryption is hobbling its investigations, new documents obtained by VICE News show that the federal police agency already has the ability crack encrypted and locked cellphones without help from the owner or the manufacturer. The records, obtained via access to information request, show that the RCMP's British Columbia branch just renewed its license

for the Cellebrite Touch Ultimate. That device, according to the documents, "enables the most technically advanced extraction, decoding, analysis, and reporting of mobile data. It performs physical, logical, file system, and password extraction of all data (even if deleted) from the widest range of devices including legacy and feature phones, smartphones, portable GPS devices, tablets, and phones manufactured with Chinese chipsets." The cost of the renewal, dated February, 2016, was redacted from the documents. The records show that they were sent out to both the B.C. division of the RCMP, and the local RCMP detachment in Nanaimo. Other contract documents suggest that, for the Cellebrite device and an enclosure in which police can hack the phone — one that blocks all outside cell, Wi-Fi, and other signals — the total cost was just above $90,000. (…) "We generally do not comment on specific investigative methods, tools and techniques outside of court," an RCMP spokesperson told VICE News over email. Staying mum on their current techniques hasn't stopped the force from launching a public relations campaign on the problem of encryption — dubbed "going dark" — aimed at getting new powers, however. (…) Next month, Constable Frank Dudas of the RCMP's Technological Crime Section, is slated to speak on a panel regarding the "cutting-edge solutions" for search warrants, especially for encrypted and locked smartphones, "to maximize technology investments and respect privacy rights within Canada." Dadas will be joined on that panel by Daniel Embury, a technical director at Cellebrite. Ultimately, mention of this sort of technology appears nowhere in the federal government's national security consultations, which were designed to give the public a voice in drafting new legislation that could authorize — or forbid — certain intrusive investigative techniques. VICE News

Four charged in alleged human smuggling ring near Cornwall
Four people have been charged after a joint Canada-U.S. investigation broke up an alleged human trafficking ring operating across the St. Lawrence River near Cornwall. The charges come after a seven-month investigation and authorities say more charges may follow. The investigation, called Project Oinertia (the 'O' comes from the RCMP's 'O' division, plus 'inertia'), involved the Canada Border Services Agency, the Royal Canadian Mounted Police, the Akwesasne Mohawk Police Service and Massena Border Enforcement Security Task Force (BEST). Police allege the ring smuggled people across the border in both directions between Cornwall, St. Regis, Que., and Massena in New York state. The arrests were made in raids in Ontario and Quebec back on Oct. 20, but weren't announced until Thursday. A fifth person was arrested, but has not been charged. EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

'An over-stressed workforce with little or no support,' B.C.'s paramedics are hitting mental health tipping point
Incessant overdose calls and multiple drug deaths during shifts are taking a serious toll on the mental health of B.C. paramedics, according to their union. Bob Parkinson, director of health and wellness for the Ambulance Paramedics and Emergency Dispatchers of B.C., said even before the current fentanyl-related overdose crisis, paramedics were feeling strained while responding daily to life-and-death situations (…) Paramedics aren't able to respond as quickly to non-life-threatening calls and are arriving to find upset patients and family members. Parkinson said depression and anxiety are the most common mental-health issues among paramedics, but some are dealing with post-traumatic stress disorder or struggling with family problems and their own addiction issues. He's worried the workforce will lose quality women and men. Postmedia (Vancouver Province)

NATIONAL SECURITY / SÉCURITÉ NATIONALE

2017 may be the year of the battle over encryption, again
As cyber security pros look to 2017 there's no shortage – as in previous years – of predictions that we're going to see more of the same: More spear phishing attacks, more DDoS attacks, more ransomware, more suspected state-sponsored intrusions … But the year may also be notable for another reason: The return of the fight to give police easier access to encrypted devices and documents through backdoors. "In the Western world I'm sure we'll see increasing pressure to do that," says Jacob Ginsberg, senior director of products at Toronto-based Echoworx, which makes enterprise email encryption solutions.

"Canadian police came out this past summer saying they want access to people's phones as part of an investigation … We're seeing a pretty serious erosion of our privacy by way of technology." With the installation of Donald Trump as president a number of observers believe the fight over giving law enforcement and intelligence agencies in the U.S. better access to encrypted communications and devices will be re-opened after having been smothered in 2016. It's a debate that was included in the just-closed federal public consultation on a new Canadian national security framework, which saw the IT and telecom industry line up against any law forcing makers or distributors of encryption solutions to add backdoors to their software or make decryption keys available. A discussion paper included the police arguments that encryption of mobile devices and data has stalled some investigations, although it also included arguments about expectations of privacy. Belarusian steel mill BMZ ready to assist Canada with antidumping investigation
The Belarusian steel mill BMZ is ready to assist the Canada Border Services Agency with carrying out an antidumping investigation. Anatoly Savenok, Director General of Belarusian Steel Works (BMZ trademark), made the relevant statement in a recent interview with the SB. Belarus Segodnya newspaper, BelTA has learned. The BMZ Director General said: "It is difficult to predict the outcome of the investigation for now. I can only note that BMZ has declared its readiness to assist with the investigation. The Canada Border Services Agency will get answers to all the questions in addition to explanations needed to make the relevant decisions. In turn, the company will invite experienced lawyers, who will work together with specialists and entities of the company's proprietary distribution chain to take all measures to properly protect BMZ." Belarus News

Couple sent back to Canada for trying to sneak cat into New Zealand
A Canadian woman who authorities say managed to hide her 4-year-old pet cat Bella in her handbag during a trans-Pacific flight had her vacation cut short when border agents discovered the ruse at a New Zealand airport. The woman was refused entry into the country and she, her husband and the cat were forced to catch the next flight home, Ministry for Primary Industries spokesman Craig Hughes said Thursday. He called the woman's actions "reckless and dangerous." New Zealand has strict regulations for importing pets. Cats and dogs from most approved countries must have an implanted microchip and be quarantined for a minimum of 10 days after arrival. Hughes said the couple, both in their mid- to late-20s, managed to conceal the cat from the flight crew and other passengers during the 11,300-kilometre flight from Vancouver to Auckland. CTV News

OurMine Hacks Netflix's Twitter Account
Hackers who are part of the group called OurMine have managed to get control of the official Netflix Twitter account and post public messages to the nearly 2.5 million followers. One of the tweets taunts Netflix's security on Twitter, probably a weak password, with a message reading "World security is s**t. We are here to prove this." At the time of writing this article, Netflix seems to be back in control of its

Twitter account, but the company has also sent out messages using the official support account, which shows that it's still working on recovering after the hack. Softpedia; Register

Russian hacks into Ukraine power grids a sign of things to come for U.S.?
Russian hacking to influence the election has dominated the news. But CBS News has also noticed a hacking attack that could be a future means to the U.S. Last weekend, parts of the Ukrainian capitol Kiev went dark. It appears Russia has figured out how to crash a power grid with a click (…) The hackers sent emails with infected attachments to power company employees, stealing their login credentials and then taking control of the grid's systems to cut the circuit breakers at nearly 60 substations. The suspected motive for the attack is the war in eastern Ukraine, where Russian-backed separatists are fighting against Ukrainian government forces. But hackers could launch a similar attack in the U.S. "We can't just look at the Ukraine attack and go 'oh we're safe against that attack,'" said Rob Lee, a former cyberwarfare operations officer in the U.S. military, investigated the Ukraine attack. CBS News

Yellowknife police test technology to identify high drivers

Yellowknife RCMP officers are testing out new technology to identify high drivers. Officers will be equipped with hi-tech mouth swabs and will administer roadside tests to see how well the swabs work in real life situations. The detachment is one of seven forces across the country testing the swabs, as the federal government prepares to legalize marijuana. "We have the dark, we have the cold, the environment itself. What we're doing is seeing how practical we can implement these devices and use them in real world situations," says Cpl. Todd Scaplin. If a driver decides to participate, they'll be asked to provide a saliva sample, which will be analyzed to see whether drugs are in their system. "Everything is confidential, there's no names taken, nothing like that. It's completely voluntary. If they don't want to do it, [it's] 'have a nice day. Thank you very much,"' says Scaplin. People who fail the test won't be charged. However, if they appear impaired anyway, officers will still investigate. "Nothing's changed. It's just that we're gonna hopefully eventually have really good tools for us to use," says Scaplin. CBC News

Every child in Tuk gets a gift, thanks to RCMP toy giveaway

Christmas came a little early for children in Tuktoyaktuk, thanks to a toy giveaway organized by the RCMP. The annual Christmas toy give away with Santa Clause was held this week in the Hamlet. Members of the RCMP and their spouses bought, wrapped, and sorted all of the presents to make sure everyone got an age appropriate gift. "I think it was a great event for the whole community," said Sgt. Marco Papillon with the Tuktoyaktuk RCMP. "It allowed RCMP officers and their families to meet with most of the community." Nestled on the shores of the Arctic Oceans, Tuktoyaktuk is an Inuvialuit hamlet of about 850 people, according to the 2011 census. The community is currently in total darkness until January 6. The event, which featured Christmas carols and refreshments, was supported by Stanton Group Limited. Several hundred parents and children reportedly turned out. My Yellowknife Now

Phil Sheegl's lawyer calls claim his client was 'in on it' false, stupid and ill-informed

The lawyer for former Winnipeg chief administrative officer Phil Sheegl says allegations about attempts to influence the award of a major Winnipeg construction contract are false, stupid, ill-informed and defamatory. The RCMP investigation into Winnipeg's police headquarters has unearthed emails that officers suggest show Caspian Construction owner Armik Babakhanians said he tried to curry favour with Sheegl and others to obtain the $156-million construction contract. The information was provided to a judge in February 2016 in order to obtain bank records and represents a snapshot of a two-year-old RCMP investigation, dubbed Project Dalton. Before police are allowed to search financial records, they are required to present evidence to support their request for institutions to produce documents. According to prior information presented to a judge in order to obtain a search warrant, the police-HQ investigation originally involved fraud and forgery allegations. Last year, the investigation expanded into allegations the principal engineer and architect on the project, as well as Caspian's owner, conspired to offer project director Ossama AbouZeid a $600,000 secret commission. AbouZeid said he never asked for one, was never offered one and he never received one. CBC News

Pictou Landing youth charged with attempted murder

Pictou County District RCMP, with the assistance of Northeast Nova Major Crimes Unit, has charged a 17-year-old male as a result of a stabbing in Pictou Landing. Shortly after 11:30 p.m. on Tuesday evening, RCMP received a call of a stabbing that occurred on Beach Rd. in Pictou Landing First Nation. Preliminary investigation determined that a 29-year-old male from Belle Marche, Nova Scotia, had suffered apparent stab wounds to his body. He was transported to the Aberdeen Regional Hospital in New Glasgow with serious but non-life threatening injuries. He remains in hospital. The News

Fatalities involving impaired drivers rise to 20 from 5 since 2013

Motor vehicle fatalities involving impaired drivers have steadily increased over the past four years across the province, according to New Brunswick RCMP. So far this year, there have been 20 fatalities. In 2015 there were 15, while 2014 had 11 and there were five in 2013. Staff Sgt. Gilles Blinn, the RCMP's provincial traffic co-ordinator, said he's not sure why the numbers keep climbing, even after vigorous anti-drinking and driving campaigns. He also admits he doesn't know how to fix the problem. CBC News; Radio-Canada

Man charged with 1st-degree murder in Big Island Lake Cree Nation death

RCMP have charged Anthony Mitsuing with first-degree murder in the death of a 28-year-old on Big Island Lake Cree Nation. Jordan Sandfly's body was found earlier this week outdoors on the Saskatchewan First Nation. Mitsuing, 32, is from the Makwa Sahgaiehcan First Nation. Both men were known to each other and police are not seeking anyone else in relation to Sandfly's death. CBC News

17-year-old missing Yellowknifer located, say RCMP
Yellowknife RCMP are advising the public that a teenager reported missing earlier this week has been located. Ethan Moses, 17, had been last seen on Monday at the Capitol Theatre in downtown Yellowknife, according to an RCMP press release sent out on Wednesday afternoon. Police said in a news release Thursday morning that Moses has been located. The RCMP thanked the citizens of Yellowknife for their assistance in locating Moses. CBC News

More RCMP please
Re: Story in the Dec. 8 edition of The NEWS ('Worked up about speeding')
A letter to the editor states, "In response to the query as to why the RCMP do not do more to enforce the speed limits in Parksville, I was given an answer in the summer of 2015 when I called the RCMP to complain about the speeding cars on Morison Avenue between McMillan and Finholm streets. "There is only one officer assigned to traffic daily and his/her hours are 8 a.m. to 4 p.m." You cannot set up a radar trap with only one officer. Do not think reducing the speed on Chestnut Street would help. The speed limit on Morison is already 40 km, but some drivers ignore it. The officer then told me if I had actual licence plate numbers, makes, models and colours of cars they would be able to respond to my complaint. I sat for hours in my car that summer to record this information. I dropped the list off at the RCMP station. The dispatcher asked if I wanted a callback. I said I did. I am still waiting for that call." Parksville Qualicum Beach News

Elderly pedophile convicted of sex tourism seeks parole for second time
An 86-year-old Montreal man who was convicted of having sex with young girls during his frequent trips to Dominican Republic is scheduled to make his second request for parole on Thursday. Joseph-Charles Côté, a former pilot with the Canadian military, is currently serving a seven-year sentence he received in 2014 after he was found guilty at the Montreal courthouse of four counts related to how he sexually abused a girl for years and three child pornography charges. Materials seized from Côté revealed he recorded his abuse of the girl and served as evidence that had intercourse with at least one other girl. Côté travelled to Dominican Republic several times following his retirement in 1987 but that all came to an end in February 2013 when he was arrested in that country following an investigation by the Sûreté du Québec and Canada Border Services Agency. Police who searched his hotel room in Sosua found the walls covered in photos of nude girls. (…) Côté is currently incarcerated at a federal penitentiary in Laval. He was denied parole in July after making his first request. The parole board was not impressed with how he denied he is a pedophile and is therefore unwilling to address his sexual deviance. Montreal Gazette

'Watershed moment' for bail
The John Howard Society says it expects to soon have the capacity to take on more than 200 new people in their bail supervision program after receiving increased funding from the province to hire more case workers. The program is also expected to expand to courthouses in Perth, Pembroke and L'Original. That is in addition to two new workers in Ottawa, including one who will be exclusively available to those suffering from mental illness. The expansion is expected to ease pressure at the often overcrowded Ottawa-Carleton Detention Centre, as more low-risk accused people who otherwise wouldn't be released can now access the bail supervision program. Currently, the bail supervision program in Ottawa has space for 250 people and is operating at capacity. The new hires are expected to nearly double the number of accused that can participate in the program, which provides supervision to offenders who are in poverty and might lack a surety, or someone who will monitor to make sure they obey their release conditions. "Honestly, it's a watershed moment for bail. We've been advocating for this expansion for many years," said Tyler Fainstat, executive director of the John Howard Society of Ottawa. "Hundreds

more people will have access to community supervision rather than waiting at OCDC for their trial." Ottawa Citizen

Fentanyl in Yukon: Kwanlin Dün Chief vows community patrols
The Chief of Kwanlin Dün First Nation is raising warnings about fentanyl. Doris Bill says the community is trying every possible step to prevent people from dying due to opioid overdose over the holidays. Four people have died in Yukon in the last seven weeks, in cases the Chief Medical Officer of Health says are likely related to opioid overdose. Bill says preventative measures will include community patrols during the holidays. "Four people are suspected to have died from this and it's urgent in my view. We need to reach people especially people at the street level," she says. Bill recorded a warning distributed through social media this week. "All Yukoners are important to us. Please be safe and be informed. To reduce your risk, never use street drugs alone," Bill says in the video. The message also tells viewers that Naloxone kits are available at the Kwanlin Dün's health clinic as well as Blood Ties Four Directions in Whitehorse. The video has been seen about 1,500 times through Facebook. CBC News

Seized fentanyl could have led to multiple overdoses: N.L. advocate
On the street, they have a few nicknames: green monsters, greenies, green beans, green apples. "Even cocaine is laced with fentanyl now. It's in essentially everything." Tree Walsh. They're 100 times stronger than morphine, and have caused an increasing number of deaths in Newfoundland and Labrador in recent years. It's fentanyl, an extremely potent synthetic pain medication, and it doesn't just come from pharmaceutical companies. Drug dealers are cooking them up in home labs and selling them disguised as less-potent Oxycontin pills and other drugs. On Wednesday, police said "Oxycontin" pills seized by the RNC/RCMP's Combine Forces Special Enforcement Unit (CFSEU) last month as part of Operation Titanium have been confirmed by Health Canada to be fentanyl. Police believe the pills were made in a clandestine lab and not by a pharmaceutical company, since they look identical to Oxycontin 80s -- green with the number 80 stamped on one side and "CDN" on the other. Telegram

1 in 4 Canadians admit to driving while legally drunk, half think limit is too low
A full quarter of Canadians admit they've had a few too many drinks before driving in the past, a new poll reveals. A full half of the population thinks the legal blood-alcohol limit for drivers should be raised. The survey was conducted between by Ipsos on behalf of Global News between Dec. 16 and Dec. 19, and it highlights some surprising trends when it comes to attitudes toward impaired driving across Canada. Sean Simpson, vice president of Ipsos Public Affairs, said the polling firm didn't place a time limit on when an incident occurred, so it's perhaps not surprising that 24 per cent of respondents said they'd been legally drunk behind the wheel. One of the most surprising figures in the survey, said Simpson, was that about half of respondents said they believe the legal limit for what constitutes impaired driving (0.8 per cent blood alcohol content or higher) is too low. Global News

Cyberstalking more prevalent among single, never-married women, study shows
Cybersecurity expert urges caution in sharing personal information online. Cyberstalking is more prevalent among single, never-married young women, a new study from Statistics Canada shows. The study of internet users aged 15 to 29 also showed those with a history of being victimized are much more likely to experience cyberstalking, or cyberbullying. The results come as no surprise to Ron MacLeod, a cybersecurity specialist who has worked in the industry for about 30 years and is currently the president of the High Technology Crime Investigation Association for Atlantic Canada. Young women tend to live their social life online, through online dating sites and the use of social media, said MacLeod, the father of two teens. CBC News (2016-12-20)

Police still 'dedicated' to busting pot dispensaries, even as laws set for change
Hamilton police say they'll remain 'dedicated" to enforcing current pot laws and crack down on sales and trafficking from marijuana dispensaries, even as the federal government commits to changing regulations. The latest messaging regarding pot legalization in the city comes after police seized $20,000 in marijuana and marijuana derivatives from Royal Farmacy at 1395 Main Street East, near Kenilworth Avenue. A 45-year old Hamilton, believed to be the owner of the business, was charged with possession for the purpose of trafficking both marijuana and THC, and for proceeds under $5,000. CBC News

From Dime Bags To Money Bags, Businesses Look Forward To Legal Marijuana
It's Sunday afternoon and Toronto's Centre for Social Innovation is packed full of marijuana enthusiasts perusing tables of goods. Everything from marijuana-infused barbecue sauce to medicated body rubs is available at Green Market, where artisans peddle their various craft cannabis products. Such events, which sell to patients and casual users alike, operate within a foggy regulatory environment. Selling marijuana is illegal unless you are a large-scale producer licensed under Health Canada's medical marijuana regime. However, licensed producers are only permitted to sell dried cannabis flower and oils, in spite of a Supreme Court ruling last year that said Canadians have a right to access medical marijuana in all of its forms. The year ahead is expected to be a pivotal one for Canada's burgeoning marijuana industry, as the federal government is planning to table legislation in the spring that will lay out the ground rules for a legal, recreational market. There's also a lot of money to be made in marijuana. A report published by consultancy firm Deloitte in October estimates that legalizing recreational use of the drug could ignite a $22.6-billion industry in Canada. That figure includes sales of marijuana products as well as ancillaries such as security, transportation and testing labs. Civilized

Canora resident asks, 'Is Canada growing to pot?'
A letter to the editor states, "Our federal government will soon legalize marijuana. I'm not saying it's a good thing or bad thing. It is so prevalent in society something had to be done. My thoughts on the matter is that if the federal Liberals think that they are going to put these illegal pot-growing operations out of business, they must stay monetarily competitive or better with the underground prices for cannabis. Otherwise, people will not buy in the legal outlets." Canora Courier

Reevely: Toxins leaked into Dow's Lake from new hospital site, feds say
Poisonous chemicals from the demolition of the Sir John Carling Building have seeped into Dow's Lake and pose challenges for building a new hospital at the northeast corner of the Central Experimental Farm. (…) In the case of the Sir John Carling site, near Carling Avenue and Preston Street, the contamination is just a couple of years old. The 11-storey former headquarters of Agriculture Canada was demolished in 2014 and as part of the takedown, two basement levels were filled with pulverized concrete from the rubble. Before the demolition, the building had been carefully stripped of everything from its wiring to asbestos: the contractors knew a lot of dust would go flying even from the many small controlled explosions used to knock the building's supports out. But the concrete filling the basement, it turns out, was tainted with phenol from the 400 kilograms of dynamite used in the demolition. Phenols are a diverse class of chemical compounds, many of them found in nature. The kind used in explosives is highly acidic: in humans, phenols can cause chemical burns to the skin, eyes and lungs. Attentat de Berlin : les empreintes digitales du suspect retrouvées sur le camion
L'Allemagne a annoncé, mercredi, qu'elle recherchait activement un demandeur d'asile tunisien de 24 ans, soupçonné d'être l'auteur de l'attaque au camion qui a fait 12 morts à Berlin, le plus grave jamais revendiqué par le groupe Etat islamique dans le pays. Ses empreintes digitales ont été retrouvées sur le camion, a précisé le ministre de l'Intérieur, Thomas de Maizière, lors d'une conférence de presse, jeudi 22 décembre. La chasse à l'homme se poursuit. Anis Amri a été officiellement identifié par la justice antiterroriste qui, dans un avis de recherche européen, propose jusqu'à 100 000 euros de récompense. L'homme *"mesure 1m78, pèse environ 75 kg. Il a des cheveux noirs et des yeux bruns. Il peut être violent et armé !"* met en garde le parquet fédéral à l'attention de la population. France TV Info ; Chronicle Herald

Attentat de Berlin: la famille du suspect sous le choc
En état de choc, la famille d'Anis Amri, principal suspect dans l'attaque de Berlin, affirme qu'il avait quitté sa ville pauvre de Tunisie avec l'espoir de trouver une vie meilleure en Europe. Devant le domicile familial, dans un quartier populaire de Oueslatia (centre), Abdelkader, les yeux rougis, raconte à l'AFP la trajectoire de son frère, le benjamin de la famille, visé par un mandat d'arrêt à l'échelle européenne. En mars 2011, Anis Amri a quitté illégalement la Tunisie par la mer vers l'île italienne de Lampedusa, fuyant une condamnation par contumace de quatre ans de prison pour vol et cambriolage, affirme à l'AFP Abdelkader. Un responsable sécuritaire local a confirmé à l'AFP ces informations. Outre la condamnation, « Anis est aussi parti pour fuir la misère. Il n'avait aucun avenir en Tunisie et il voulait à tout prix améliorer la situation financière de notre famille qui vit en dessous du seuil de pauvreté comme la majorité des habitants de Oueslatia », poursuit Abdelkader. Agence France-Presse (La Presse)

Obama dumps post-9/11 registry for some immigrant men, mostly Muslims
The Obama administration said Thursday it is officially scrapping a post-9-11 requirement for immigrant men from predominantly Muslim countries to register with the federal government. The U.S. hasn't used the program since 2011, but a top immigration adviser to President-elect Donald Trump has spoken of renewing it. The decision to end the National Security Entry-Exit Registration System, or NSEERs, comes amid growing international terror fears and Trump's suggestions that he could ban Muslim immigrants from the United States. After a truck attack killed 12 in a Christmas market in Berlin this week, Trump told reporters, "You know my plans." The program's elimination could make it more complicated for Trump's administration to launch its own registration system for Muslims. Associated Press (Globe and Mail, Global News)

Snowden still has contacts with Russian intelligence: U.S. House report
Former National Security Agency contractor Edward Snowden "has had and continues to have contact" with Russian intelligence services, according to a newly declassified U.S. House of Representatives Intelligence Committee report released on Thursday. The Pentagon found 13 undisclosed "high risk" security issues caused by Snowden's release to media outlets of tens of thousands of the U.S. eavesdropping agency's most sensitive documents, the report said. If China or Russia obtained access to information on eight of the 13 issues, "American troops will be at greater risk in any future conflict," said the report, which contained a table outlining the "issues", but like large portions of the document, was blacked out. Reuters

Yahoo email scan shows U.S. spy push to recast constitutional privacy
Yahoo Inc's secret scanning of customer emails at the behest of a U.S. spy agency is part of a growing push by officials to loosen constitutional protections Americans have against arbitrary governmental searches, according to legal documents and people briefed on closed court hearings. The order on Yahoo from the secret Foreign Intelligence Surveillance Court (FISC) last year resulted from the government's drive to change decades of interpretation of the U.S. Constitution's Fourth Amendment right of people to be secure against "unreasonable searches and seizures," intelligence officials and others familiar with the strategy told Reuters. The unifying idea, they said, is to move the focus of U.S. courts away from what makes something a distinct search and toward what is "reasonable" overall. The basis of the argument for change is that people are making much more digital data available about themselves to businesses, and that data can contain clues that would lead to authorities disrupting attacks in the United States or on U.S. interests abroad. While it might technically count as a search if an automated program trawls through all the data, the thinking goes, there is no unreasonable harm unless a human being looks at the result of that search and orders more intrusive measures or an arrest, which even then could be reasonable. Civil liberties groups and some other legal experts said the attempt to expand the ability of law enforcement agencies and intelligence services to sift through vast amounts of online data, in some cases without a court order, was in conflict with the Fourth Amendment because many innocent messages are included in the initial sweep. Anti-drone conference hears from correctional service
Don Head, the commissioner of Correctional Service of Canada (CSC), told an anti-drone conference earlier this month in the United Kingdom that drones pose health, safety and security risks for correctional environments. He also said the unmanned aerial vehicles present opportunities for enhancing the overall correctional response to the needs of offenders, staff, victims and communities. Head's presentation was

shared with the Whig-Standard on Friday, a sign of more transparency at the CSC this year... "CSC is currently partnered with the National Research Council and has embarked on a collaborative investigation of the commercial technologies for the detection of drones," Head, who has been commissioner since 2008, said. Jessica's favourite things from 2016 - Canada shifts its stance on personal data security
An opinion piece states "This past November, it came to light that the Canadian Security Intelligence Service (CSIS) had been illegally collecting Canadian data for over a decade. The federal government chastised the agency for its actions, and handed down a ruling stating that the intelligence service had breached its duty to inform the court of its mechanisms. The information had been collected for reasons other than national security threats, and therefore, should not have been retained by CSIS in the first place. This report accompanied several others in 2016 detailing the relationship between federal regulators and Canadian data. News that a Quebec police station tracked the smartphones of six journalists made headlines around the world and attracted commentary from history's most famous whistleblower, Edward Snowden. The reaction to these stories by federal courts and regulators demonstrates a more modern perspective on data than we've seen from Canadian governments in the

past. It's encouraging for many Canadians to see that the legacy left by Bill C-51 needn't be a permanent one..." Mobile Syrup

Un policier récompensé pour son rôle dans la Grande traversée
La Gendarmerie royale du Canada (GRC) a récemment récompensé le bénévole responsable de la sécurité pour la Grande traversée (LGT), ce relais pan-canadien de jeunes cyclistes organisé par une équipe de bénévoles et le Conseil scolaire francophone de la Colombie-Britannique. Le gendarme Ivan Provost, le coordonateur national de la sécurité de la Grande traversée, a reçu une citation du commandant de la Division C de la GRC pour son dévouement. Encore une fois cette année, une équipe de bénévoles dévoués s'affairent à préparer un nouveau tracé de la Grande traversée (LGT) pour permettre à 280 jeunes de parcourir environ 300 kilomètres à vélo en trois jours. Pour la cinquième Grande traversée, le relais commencera à Victoria pour finir au Nouveau-Brunswick. Cela veut dire des dizaines et des dizaines de municipalités et de villes parcourues. Le gendarme Ivan Provost, des Laurentides au Québec, est responsable de faire approuver le trajet de la Grande traversée chaque année. Pour ce faire, il accomplit des mois de travail bénévole. « Ivan c'est notre liaison entre les villes, les municipalités, les provinces, les services de police et l'équipe qui fait l'itinéraire de LGT », explique le fondateur de la Grande traversée, Laurent Brisebois. Radio-Canada

Colten Boushie shooting in review
The top crime story in the province in 2016 erupted in August on a farm in the rural municipality of Glenside. The shooting death of Colten Boushie, a 22-year old from Red Pheasant First Nation, sparked outrage among First Nation people and caused a social media firestorm... The case fueled racial tensions from the beginning, starting with a news release from the RCMP that described an initial confrontation on the property. Battlefords News-Optimist

Victim shows forgiveness
A Vernon woman who was the victim of a crime gave a Christmas gift to the thief. Pauline Vankoll lost her handbag at the Village Green Mall food court on Nov. 24. While a search failed to turn it up, mall staff were able to give her descriptions of some possible suspects at the food court during the time her bag went missing. Then RCMP suggested Vankoll use a locating app in an effort to locate her purse and phone... On Dec. 22, the victim contacted the RCMP detachment to say she wanted to give the suspect a Christmas hamper full of food items and requested officers deliver it. Castanet.net

Clark calls opioid crisis biggest story of 2016 in year-end interview
Premier Christy Clark says the ongoing opioid crisis was both the biggest story and most significant challenge for BC in 2016. In a year-end interview with NEWS 1130, Clark says no one predicted the devastation the drugs would wreak upon the province. "Nobody really saw it coming the way it did and it's just been a terrible crisis and everyone one of those deaths is preventable," says Clark. "There are lots of challenges in the course of the year but this is one where people are dying every day and resources have just been completely overwhelmed." Illicit drug overdose deaths in BC for 2016 reached an all-time high of 755 by the end of November with December numbers expected next month for a grand total. November also had the monthly record number of deaths with 128, an average of more than four a day. News 1130

Chile's government works to restore power in quake-affected zone
Chile's government set to work on Monday repairing roads and restoring electricity to southern regions affected by a major earthquake that struck on Christmas Day, frightening thousands but resulting in no fatalities or major damage. The quake, a magnitude 7.6 centered off Chiloe Island northwest of Patagonia, caused thousands in the tourism and salmon farming region to evacuate to higher ground amid fears of a tsunami. A tsunami never materialized however and, thanks to strict building codes in the earthquake-prone nation, structural damage was light. By Sunday night, almost all Chileans had returned to their homes. The quake did, however, cause at least one bridge collapse, cut power to 21,000 Chileans, and severed sections of the island's major highway. Reuters (Globe and Mail)

MINISTER / MINISTRE

Tackling the complexity of counter-radicalization
As the domestic terrorist threat has evolved since the advent of the Islamic State into the danger of citizens being weaponized by jihadist propaganda into lone-wolf attackers, governments in Canada and elsewhere have begun focusing on counter-radicalization as an effective means of counter-terrorism. When **Public Safety Minister Ralph Goodale** was sworn-in last November 4, his mandate letter included an order to "Create an Office of the Community Outreach and Counter-radicalization." While it sounds

straightforward, the office, whose director and full scope and mandate will be revealed this fall according to **Goodale**, the effort will unfold at the confluence of politically loaded debates about culture, religion, privacy, the role of the internet in radicalization and the difference between piety and nihilistic fanaticism. Michael Zekulin, a terrorism researcher at the University of Calgary, said the terms of reference and mission of the office will be crucial. "It's pretty much going to be make-or-break from the get-go, about whether you're going to get people to buy in," said Zekulin. "If you come up with a document or mission statement and certain communities or certain people look at this and say, we don't agree with this, you're in trouble." Reached by iPolitics, **Goodale spokesman Scott Bardsley** said it was still too early to comment on who might be appointed to direct the office or go into the details of its scope and mandate. **Bardsley** did say, ***"Public Safety has consulted with stakeholders, experts in the security field and community leaders about the creation of the new national centre of excellence for community outreach and engagement."*** On August 17, following a speech to the Canadian Association of Chiefs of Police in Ottawa, **Goodale** himself told reporters that he was in the final stages of choosing a director from a shortlist of candidates. ***"That person will be directing a very important effort to up our game in Canada in terms of recognizing and understanding the process of radicalization, who's vulnerable to it, why they would be vulnerable and what are the most effective tools and instruments and people and techniques and practices to prevent the problem in the first place and - in other cases where the problem has begun to develop - how do you intervene strategically?"*** Coordinating an approach to counter-radicalization is tricky business; there's no-one in the field who would suggest that what the government is trying to do will be easy and there seems to be little consensus about the right way to go about it - or even what the office's specific role should be. iPolitics

ISIL, ISIS or Daesh? Ottawa's past efforts to change its term for terrorist group plagued by confusion

The recent government decision to refer to the Islamic State of Iraq and the Levant by the name "Daesh" isn't the first time Ottawa has tried to change the way they refer to the terrorist group. A Conservative government edict last year to dump ISIL in favour of ISIS, for the Islamic State of Iraq and al-Sham, foundered in part over the inability to translate ISIS into an acceptable French acronym. (…) DND spokesman Daniel Le Bouthillier said last week the department and Canadian Forces will now use "Daesh" or "Daech" in French in its news releases and in dealing with the public and media. The changes have already been made on the Operation Impact website. "We are following the lead of senior governmental officials in this regard, while aligning our language with that used by other allies working in the area," added Le Bouthillier. **Public Safety Minister Ralph Goodale** noted the change in the introduction to a recent government report on terrorism. ***"This group is neither Islamic nor a state, and so will be referred to as Daesh in this report,"*** he wrote. National Post (Ottawa Citizen)

Neve: Mr. Trudeau, it's time to deliver justice for torture victims Almalki, Elmaati and Nureddin

An opinion piece by Alex Neve, Secretary General of Amnesty International Canada, states, "On Oct. 21, 2008, when I sat with Abdullah Almalki, Ahmad Abou-Elmaati and Muayyed Nureddin after the release of the report from the inquiry into their cases that had been conducted for two years by former Supreme Court of Canada Justice Frank Iacobucci, I was sure that they would soon see justice for what they had been through. But the staggering and disgraceful truth is that nearly eight years later, these three men – all survivors of torture that Canadian officials made possible – seem further away from justice than ever. They have, in fact, perversely only been put through deepening injustice, this time through obstructive Canadian government tactics in our own legal system. (…) There was much hope that the change of government would bring a change in approach to this case, a change that would at long last deliver justice. After all, Justin Trudeau himself – and other key members of his new government, including Foreign Minister Stéphane Dion and **Public Safety Minister Ralph Goodale** – had supported the 2009 House of Commons Motion calling for an apology and compensation. They now had the power to make that happen." Ottawa Citizen

Hack Attack Could Manipulate Biometric Border Screening: Report

Canadian border officials are concerned about potential hack attacks against their biometric databases, according to a new report from The Toronto Star's Alex Boutilier. The concerns were outlined in a report prepared by Canada Border Services Agency officials for the country's **Public Safety Minister** last November. The document outlines multiple digital threats to border security, with one of the more

sophisticated threats coming in the form of breaches into biometric identification systems that could "produce false acceptances and/or rejections," leading border agents to deny entry to innocent individuals while allowing in those known to pose security threats. It's an example of the new kinds of security concerns associated with sophisticated border screening technology. While biometric identification is effective in automating aspects of border screening and increasing their reliability, there is a new danger in potential "physical and technical" attacks against the attendant data centers and networks. With biometric identification becoming an increasingly important means of screening temporary residents and soon perhaps permanent residents and citizens, this is an important matter of concern. And it will only become more important as more governments around the world embrace the same technological approach at their borders. Find Biometrics

Canada Already Meets the Requirements of the UN Marking Scheme
The Firearm Marking Regulations, introduced on December 23, 2004, have been postponed for 11 consecutive years by 3 separate governments for one simple reason. No government wanted to be responsible for killing Canada's legitimate civilian firearm industry. Until now. On June 1, 2017 – ten short months from now – the shoe drops. The Trudeau government seems to have great faith in all things United Nations, but unfortunately they seem to be unwilling to examine all of the facts when it comes to the UN's Firearm Marking Scheme. (…) Should the Trudeau government implement these regulations, it is debatable how long we will have a retail firearm industry in Canada. Sure, we may be able to purchase ammunition still, but that is small comfort if we cannot purchase the firearms to use it? If you disagree with Canada's looming implementation of the Firearm Marking Regulations, please write to the following people and express politely why you believe implementing these regulations is a very bad idea for Canada: The Rt. Hon. Justin Trudeau, Prime Minister of Canada; The **Hon. Ralph Goodale, Minister of Public Safety; Michel Picard MP, Parliamentary Secretary to the Minister of Public Safety**; Bob Zimmer MP, Co-Chair of the Parliamentary Outdoor Caucus; Yvonne Jones MP, Co-Chair of the Parliamentary Outdoor Caucus; Your own federal Member of Parliament. Ammoland

Towards inclusive nation states: burkinis, hijabs and self-determination
An opinion piece states, "In France, the US and in many otherwise enlightened corners of Europe people and politicians are asking an awkward question: do Muslims belong in the modern nation-state? (…)In recent weeks, two contrasting approaches to this question have played out through the lens, of all things, of women's clothing. In France, photos shared on social media of armed police approaching a Cote d'Azur beachgoer in a full-body swimsuit and enforcing a ban on burkinis kicked off a firestorm around freedom, faith and what it means to be French. Despite the ban being overturned by a Nice court a week later, the debate over whether burkinis are acceptable beach wear, and whose decision that should be, rages on. Meanwhile, local police in Canada and Scotland have been offered an official hijab. New policies in the Scottish Metropolitan police and the Royal Canadian Mounted Police have introduced hijabs as part of police uniforms. They join the London Metropolitan police service, where hijab has been part of uniforms for more than a decade. A **spokesman for Canada's Public Safety ministry** told Canada's CBC that women could wear the headscarf ***"if they so choose".*** The decision, he said, was a reflection of the institution's values: ***"The Royal Canadian Mounted Police is a progressive and inclusive police service that values and respects persons of all cultural and religious backgrounds."*** Middle East Eye

American border authorities unfairly weed out weed users
An opinion piece states, "Marijuana has become widely accepted as both a recreational and medicinal drug. While weed is becoming more socially accepted here in Vancouver, our American neighbours have been less lenient. In a recent interview with the CBC, Canada's **Public Safety Minister Ralph Goodale** discussed how Canadians who admitted to border guards that they had smoked pot without a medical licence were barred from entering the States. Those banned *can* enter the States, but only if they apply for permission to enter beforehand, which costs about C$752, and will be raised to C$1,195 later this year. The expiration dates on provided permits vary, and those dates are all up to the officer who reviews the application. Once it's expired, you have to apply again, and pay the fee *again*. I understand that countries deserve the right to set rules on who can or cannot cross their borders. This particular restriction only affects people who admit to having smoked marijuana without a medical marijuana licence. But what infuriates me about this rule is that it's not a real ban at all. The barrier is one that anyone can circumvent

provided they have the money. It's not about following the rules, or being morally sound, or even hiding the so-called "reefer madness" from young children. No, it's about squeezing more dollars from citizens." The Peak

Nova Scotia drought unusual, catches people unprepared
The severe drought affecting parts of Nova Scotia may be causing more trouble than it would elsewhere in Canada because Nova Scotians aren't used to drought conditions. For more than a month now, people in the southwest have reported dry wells and throughout the province, rivers and lakes are low (…) Hadwen encourages farmers and homeowners to contact Drought Watch to report the impacts of drought. The program collects reports from people all across Canada, but historically, have collected few reports from Nova Scotia. CBC News

CBC News has obtained a cache of 18,000 government documents revealing the RCMP and CSIS sanctioned the mistreatment of Abdullah Almalki, Ahmad El Maati, and Muayyed Nureddin — three Canadians who were arrested and tortured in Syria in the years after the 9/11 attacks. CBC News reporter Terence McKenna. has prepared a three-part TV documentary, *The Torture*

Files — a joint investigation by *The National* that starts tonight and *the fifth estate* this week. (CBC R1, 9:12)

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Ottawa considers expanding Remote Traveller Processing program
A unique new way of patrolling the border between Canada and the U-S is playing out in the small Quebec community of Morses Line, on the border with Vermont. The border crossing is being manned remotely with border agents stationed 700 kilometers away in Hamilton, Ontario. The Remote Traveller Processing program kicked off in February and there are now plans to expand it to 19 other border crossings across the country. Travellers who stop at the crossing in rural Quebec, enter into an enclosed garage and park next to a kiosk that allows border agents in Hamilton to communicate with them, show their passport and pay duties using a credit card. If the border guard has any doubts about the traveller they are then directed to a manned border point about 13 kilometers away. But critics say the program will see border guards working the equivalent of call centres, as they police a border crossing hundreds of kilometres away. 610 CKTB

Rotten Ambassador Bridge homes worth more to city standing
Looking across the street from her home in Windsor's west end, Carla Wiedemann cringes at the rotting boarded-up homes, desperately wanting them to be replaced and her neighbourhood restored. She bought her home on Edison Street, for $80,000 back in 2004. But around the same time, owners of the Ambassador Bridge started buying up properties to make way for the twinning of the busiest border crossing between Canada and the U.S. It didn't take long for a handful of homes across the street from Wiedemann to fall into disrepair, left to decay while bridge owners battle it out in court for permission to expand their crossing. Wiedemann's home is now worth $65,000. She and her neighbours know their property values would skyrocket, if the boarded up houses were replaced with new ones, but that won't happen any time soon. "These houses, if they have to be torn down, build new ones right in their place," she told CBC News. Leaving the structures as they are translates into more tax revenue for the city than empty lots. By not allowing the bridge company to tear down the houses, the city is forcing the owner — Manuel (Matty) Moroun — to pay more tax. CBC News

Canada Already Meets the Requirements of the UN Marking Scheme
An opinion piece states, "The Firearm Marking Regulations, introduced on December 23, 2004, have been postponed for 11 consecutive years by 3 separate governments for one simple reason. No government wanted to be responsible for killing Canada's legitimate civilian firearm industry. Until now. On June 1, 2017 – ten short months from now – the shoe drops. The Trudeau government seems to have great faith in all things United Nations, but unfortunately they seem to be unwilling to examine all of the facts when it comes to the UN's Firearm Marking Scheme. Canada's already strict firearm import process accomplishes every goal specified in United Nations Protocol 55/255, formally called the Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime. (…) Each firearm contains a serial number that is "unique" to that make and model of firearm. That serial number also identifies the year of manufacture. Commercial firearm manufacturer's records are so meticulously detailed that the make, model and serial number of a specific firearm will reveal when and where the firearm was manufactured, when it was shipped and to which country, when the firearm was released from Canada Border Services Agency (CBSA) and the name and address of the company who imported the firearm." Who Are the Russian-Backed Hackers Attacking the U.S. Political System?
Two teams of highly skilled hackers directed and protected by the Russian state are on the offensive. Cybersecurity experts and intelligence officials tell NBC News the same hackers who broke into the Democratic Party's computers, the World Anti-Doping Agency's Administration System and who are

implicated in the leaks of the personal emails of former Secretary of State Colin Powell and the health documents of Olympians are executing a Kremlin-backed campaign of cyber-espionage and sabotage. Their target: Western democratic institutions and Russia's political opponents. "They are starting to figure out the way to apply the power they have in terms of technical capabilities into the geopolitical aspect," Italian cyber security investigator Stefano Maccaglia told NBC News. NBC News

The Encryption Key That Secures the Web Is Being Changed for the First Time
Soon, one of the most important encryption key pairs on the internet will be changed for the first time. The Internet Corporation for Assigned Names and Numbers (ICANN), the US-based non-profit responsible for various internet infrastructure tasks, will change the key pair that creates the first link in a long chain of cryptographic trust that lies underneath the Domain Name System, or DNS, the "phone book" of the internet. This key ensures that when web users try to visit a website, they get sent to the correct address. Without it, many internet users could be directed to imposter sites crafted by hackers, such as phishing websites designed to steal information. Motherboard

How Cybercriminals Target Victims: Report Cites Top Information Resources
Cybercriminals, whose attacks cost organizations millions of dollars a year, do extensive research on their targets. They gather organizational and personal information before deciding which vulnerabilities to exploit(…) One takeaway from the report is that websites that appear to be intended to help protect people from cyber attack are actually resources for cyber attackers (…) The top three public web sources criminals use for gathering information are Shodan.io, virustotal.com and companies' own individual websites. Hacked

Security Shortcomings Could Slow IoT Adoption
There are various elements that throttle the speed of Internet of Things adoptions and advancements but one of the most significant revolves around security. Most companies involved in creating IoT devices, platforms and strategies at least acknowledge security is paramount for consumer adoption over the long haul. Each time there's a security breach of any magnitude, whether learning that a child's Internet-connected toy has been breached or a smart home appliance was tapped by outsiders, consumer confidence can be rocked just enough for them to hold off for now. Despite the obvious need for IoT security, there are several market indicators that there's still some work to be done. For example, most (90%) organizations don't have a cybersecurity strategy for the Internet of Things, according to the new Cybersecurity Preparedness Benchmarking Study by the Berkeley Research Group (BRG). Most (86%) also don't have a strategy to deal with big data. MediaPost

Procès d'Alain Perreault : les scénarios de l'opération « Mr. Big » détaillés
L'architecte de l'opération « Mr. Big » qui a permis de piéger Alain Perreault témoigne au procès de l'homme de 54 ans, accusé du meurtre de Lyne Massicotte. L'agent d'infiltration, dont l'identité est protégée, détaille les 41 scénarios auxquels l'accusé a participé avant de passer aux aveux. Cet agent a agi un peu comme le metteur en scène de l'enquête visant à créer une organisation criminelle fictive autour du suspect. Il a participé à une dizaine d'enquêtes semblables qui regroupent également des policiers de la Gendarmerie royale du Canada et de la Sûreté du Québec. Selon le témoin de la Couronne, Alain Perreault a d'abord été approché le 30 septembre 2009 par un agent qui a feint d'être perdu dans son quartier. À ce moment, l'enquête sur la disparition de Lyne Massicotte piétinait. La femme de Chambly n'a pas été revue après être venue visiter Perreault à Québec. Les agents d'infiltration ont d'abord demandé à Perreault de faire des petits travaux comme des transports de marchandises qui avaient l'air tout à fait légaux. Après quelques semaines, l'organisation lui a offert de participer à des opérations illégales, « des artifices », mentionne l'agent en spécifiant qu'aucun crime n'est commis en réalité. Le policier répète que le but des scénarios préliminaires vise à montrer au suspect les valeurs de l'organisation, soit l'honnêteté, la confiance et la loyauté. Radio-Canada

Pas de demande pour le port du hijab chez les policières du Roussillon

Alors que la Gendarmerie royale du Canada (GRC) a autorisé le port du hijab chez ses agentes, aucune demande en ce sens n'a été formulée à la Régie intermunicipale de police Roussillon. La Régie refuse de prendre position concernant cet accommodement vestimentaire que la GRC a autorisé à la fin d'août. François Michaud, des relations avec les médias à la Régie, a indiqué que si une telle requête devait être formulée, elle serait étudiée en temps et lieu. Il en est de même pour toute autre formulation d'accommodements raisonnables. Le hijab, symbole religieux musulman, est un voile qui recouvre les cheveux, les oreilles et le cou, laissant à découvert le visage. Le Reflet

New Nanaimo RCMP commander outlines police priorities
Supt. Cameron Miller makes a quick introduction and apologizes for breaking an interview appointment. Miller, the Nanaimo RCMP detachment's new commanding officer, is also head of the RCMP's Vancouver Island tactical team and has an evolving situation – a man with a firearm and possible shots fired – on his hands, but still pauses to apologize for postponing a meeting. (…) Miller strongly supports police engagement with youth through RCMP school liaison work and programs such as Kids for Kids and the youth empowerment program that run in Georgia Avenue Community and Fairview Elementary schools. "We want to expand those programs," Miller said. He's also a strong backer of 529 Garage, a mobile app-based bike anti-theft program launched in Nanaimo in June, that allows police to return more recovered stolen bikes to their owners. Miller agrees there are more serious crime issues such as the drug trade, but said police can't safely involve the public in catching people dealing fentanyl. A major side benefit of Garage 529 is its potential for safe, positive community engagement in crime prevention. Nanaimo Bulletin

RCMP Warning Youth The Dangers Behind Social Media
Facebook, Twitter, Instagram or even Snapchat are the ways many youth communicate with each, and while it may be convenient at times it can also be dangerous as well. Okotoks RCMP is putting out a gentle reminder as kids are back in school to be aware of what they share or post on social media. Sgt Sukh Randhawa says the worldwide web is big place anyone if they want to can get information on you. "You got to be conscious of the fact how much information you're putting out in social media," he says. "You never know who is looking at your account, never know who you're inviting into your friend's circles or giving access to your accounts. There is a lot of personal information about you on social media and you have to guard that." Social media sharing can lead to online bullying or even identity theft and Randhawa says it's important to not give out too much information about yourself or someone you know online. Okotoks Online

Large quantity of marijuana seized by Saskatchewan RCMP investigating grow-up
RCMP seized a large quantity of marijuana while investigating a suspected grow operation in Saskatchewan last week. At 11:20 a.m. CT on Sept. 16, police executed a search warrant in the RM of Medstead. Turtleford RCMP said marijuana plants, packaged marijuana, cash and firearms were seized. Police arrested Cory Graham, 44, and Melanie Boulette, 34, and 43-year-old Oscar Gutierrez-Reyes. Gutierrez-Reyes is from Ontario and the other two are from Medstead. All have been charged for production of cannabis marijuana, possession for the purpose of trafficking, possession of property obtained by crime. Global News; 620 CKRM

Journée d'éradication dans les régions des Laurentides et de Lanaudière
Les policiers de la Sûreté du Québec ont participé à l'éradication de plants de cannabis dans plusieurs champs dans les régions des Laurentides et de Lanaudière dans le cadre du programme Cisaille. Au total, plus de 1 800 plants de cannabis ont été saisis. Les policiers ont également procédé à l'arrestation de trois personnes. Ils pourraient faire face à des accusations de production de cannabis. Les enquêtes se poursuivent et d'autres arrestations sont à prévoir. La Sûreté du Québec tient à souligner la collaboration du détachement de Saint-Jérôme de la Gendarmerie royale du Canada et des Forces armées canadiennes. Les policiers rappellent que la période actuelle est particulièrement propice à la récolte des plantations de cannabis. Ils invitent donc le public à signaler toutes les allées et venues inhabituelles de véhicules ou d'individus suspects dans leur voisinage aux policiers. Nord Info

Cops For Kids complete annual cycling trek

After 10 days on the road, they have cycled into the hearts of 18 communities around southeastern British Columbia. Riders from the 15th annual Cops For Kids ride arrived in Kelowna Sunday (after cycling into Vernon Saturday afternoon). The team of 28, which included Const. Nicolas Reimann and detachment transcriptionist Denise McMahon from Vernon-North Okanagan RCMP detachment, cycled across the southern Interior in order to raise money for children in medical, physical, or traumatic crisis. Funds raised from this event go to support local children who are provided with transportation to medical treatment, medical supplies, medical equipment, learning tools and mobility aids, to name a few. With recent cutbacks on government programs and other charities, families are leaning on Cops for Kids more than ever. Vernon Morning Star

Photo radar is a "cash cow"
An opinion piece states "Today's truth bomb comes from Mayor Lisa Holmes of Morinville, just outside of Edmonton, a place like many other Canadian communities that has struggled to find the right balance with photo radar enforcement. Morinville's photo radar program started in 2009. It's been run by a private contractor that reports to the town office. The program was soon raising $300,000 a year, but some felt there was too much focus on handing out tickets and generating revenue. Things got so heated that in 2014 Morinville held a plebiscite. Fifty-five per cent voted to keep the program. Nonetheless, the new council vowed to make sure the program was all about safety, as opposed to being a cash cow for the local government. Town council recently approved numerous new measures to better police its own photo radar authorities. Photo radar operators will now need to keep track of where and why they're setting up and make that information available to the public. Streets with a high rate of accidents or high numbers of pedestrians will be more of a focus, along with residential areas and school zones. Enforcement on collector and arterial commuter roads will be no more than 60 per cent of enforcement hours per month. Why were such changes necessary? If a photo radar contractor is getting paid per ticket, Holmes said, they will sit at a certain site if they know it has a huge amount of traffic, even if there's no real safety issues there. And then came Holmes' truth bomb: "They were spending 90 per cent of their time in three different spots that were on the edge of a town and it's just like it was a bit of a cash cow, honey pot situation." (…) Under the new rules, Morinville RCMP will approve all spots for photo radar and decide how long photo radar can operate at each site. "It gives people more comfort in knowing it's not the contractor themselves that's choosing, because then you can look at it that it's about money," Homes said." Drayton Valley Western Review

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Province plans to reduce the number of former inmates released to Edmonton streets
The sun was rising over the courthouse to the east of Churchill Square, where Randy Hetchler was pacing back and forth. "I arrived in the city at 6 a.m. I had nowhere to go. Nothing was open," he said. "I didn't walk too far because shoes sucked and had no laces, again." It's been a similar story almost every time Hetchler, whose criminal record consists of theft- and drug-related misdemeanour charges, has been released from the jail or the remand centre outside of Edmonton. Late at night or early in the morning, a cramped van drops him off downtown at a time when not even the homeless shelters are doing intake. It's an abrupt release back into society, one that highlights the lack of protocol to keep people like Hetchler from falling back into the criminal justice system. The result: a haphazard operation that is cost Canadians' safety - and their wallets. To keep people locked up without cause is unconstitutional, but the alternative that Hetchler keeps living also troubles Chris Hay, the executive director of the Alberta chapter of the John Howard Society, a nation-wide prison-reform group. "No one should be held in jail longer than they've been sentenced to simply because they're homeless," Hay said. "Conversely, if that's the case and we've got to punch you out into the streets of Edmonton and you've got nowhere to go, I don't want that either." While jails for inmates with sentences of under two years do some discharge planning, remand centres, where the average stay is less than a month, do even less. (…)Federal prisons, where inmates are serving sentences longer than two years, have more opportunity to plan for release. It's more challenging in provincial jails since the time people spend there is generally measured in months. Remand centres measure in days - and in Alberta, 52 per cent of people in stay fewer than five. CBC News; Radio-Canada

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

Cyberbullying Hurts Even More For Teens Facing Mental Illness
An opinion piece states, "ICQ was the big thing when I was a kid. It was one of the Internet's first live chat rooms, very popular with the kids in the early years when it was still referred to as "the Worldwide Web" and your dial-up modem took 10 minutes at minimum to connect, so you had to really want it. (…)Yes, we can share anything now and anyone can see it. This has opened the portal to a new dimension of evil, including (but by no means limited to): body shaming, bullying, psychological torture, self-worth issues, mental illness, sex crimes (including revenge porn), and almost every other form of disturbing behaviour you can think of. (…)Since the rise of social media and widespread information, there have been enough suicides to make you feel ill. They call it cyberbullying now, and it has become a new avenue to psychologically destroy teens that are struggling with mental illness online. From the sex crime surrounding Raetaeh Parsons to the chilling harassment of Amanda Todd, the Internet is the new weapon of choice." Huffington Post

Growing crystal meth use by Filipino community in Banff sparks concern
There are concerns in Alberta's Bow Valley that members of the Filipino community are using shabu - a slang name for crystal meth - to help them work longer hours. "A few clients had reported knowledge of this being used, that it went by a different word than what we've heard before, and that they're facing different kinds of barriers in seeking help and support," said Meagan Stewart, coordinator of the Bow Valley Immigration Partnership. The organization has taken part in two community meetings with local employers, Alberta Health Services and the RCMP this year to discuss the use of shabu. "It seems to be … people in the community are trying to work multiple jobs and then trying to maintain the level of stamina in that work," RCMP Staff Sgt. Eneas said. "Often times, from the discussions, they were working anywhere from 14-, 16 and 18-hour days in two or three jobs." The meetings have been an opportunity for different organizations to share information about the drug. "It seems to be very underground," Eneas said. "We - the police - haven't had a lot of information come to light about it, but other service groups are hearing discussions about it … talking about specific shabu abuses." CBC News

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

MPI needs to rethink survey design
An editorial states, "Maybe Manitoba Public Insurance should have done more homework before implementing its random roadside survey on drug use. It need only have looked south of the border to Washington to see how that state conducted similar research — and here's the kicker — without the police being involved. MPI is facing considerable criticism for its decision to ask participants stopped by police in a random Checkstop to participate in the drug-use research. Some view the research design as coercive and invasive. While MPI has made it clear participation is voluntary and the information gleaned will be kept confidential, the fact the police are involved doesn't sit well. Some are concerned that with police performing the stop, refusing is out of the question. (…) When asked why MPI chose to use the police, spokesman Brian Smiley said: "MPI needed to survey drivers who are on the roadway. Doing so in a parking lot would not be a representative sample of the driving population." Sure. Because those driving in parking lots never drive on the road. There is no doubt the use of drugs while driving is a serious issue, particularly if the federal government moves ahead with plans to legalize marijuana. Unlike alcohol use, which can be determined through a breathalyzer, being high while driving is more difficult to determine.

That's because people metabolize THC — the chemical in pot that makes you stoned — differently. Drug-impairment tests have been deemed untrustworthy and a poor indicator of impairment by Canadian courts, which may explain why there are few drug-impairment charges laid compared with drunk-driving charges. So it's not really clear how a survey on drug use will increase safety. There's still more research that needs to be done." Winnipeg Free Press

Former statistics chief questions Liberal promise of more independence
The country's former chief statistician is speaking out to explain what led up to his sudden resignation last week. Wayne Smith quit on Friday afternoon and his resignation letters accused the federal government of hobbling his agency's independence by forcing Statistics Canada to use the government's central IT department, Shared Services Canada. In an interview today, Smith says federal officials told him the centralized IT program could crumble if Statistics Canada left because it would embolden other frustrated departments to demand independence from the arrangement. Suspect in New York, N.J. bombings taken into custody after shootout
Authorities on Monday apprehended 28-year-old Ahmad Khan Rahami — wanted in connection with two Saturday bombings, in Seaside Park, N.J., and Manhattan — after an apparent shootout with police. Chris Bollwage, the mayor of Elizabeth, N.J. — another city touched by the widening probe — told reporters that Rahami was taken into custody in the neighboring city of Linden. One officer was struck in the hand, another on a protective vest, the mayor said. Rahami was also shot and was taken away in an ambulance, the mayor said. Television footage showed the suspect being wheeled into an ambulance, hands cuffed, eyes open. He was taken to University Hospital in Newark, according to a hospital spokeswoman, but his condition was not immediately available. Police and the FBI had announced early Monday that they were seeking Rahami in connection with the bombings in New Jersey and Manhattan, though his role in the incidents remains unclear. Rahami is a naturalized U.S. citizen born in Afghanistan, according to the FBI. Washington Post

Stabbings of nine at Minnesota mall investigated as possible terrorist act
Authorities are investigating the stabbings of nine people at a Minnesota mall as a potential act of terrorism, a finding that would realize long-held fears of an attack in the immigrant-rich state that has struggled to stop the recruiting of its young men by groups such as Daesh (also known as ISIS, ISIL and Islamic State). A young Somali man dressed as a private security guard entered the Crossroads Center mall in St. Cloud over the weekend wielding what appeared to be a kitchen knife. The city's police chief said the man reportedly made at least one reference to Allah and asked a victim if he or she was Muslim before attacking. The rampage ended when the man was shot dead by an off-duty police officer. None of the injured suffered life-threatening wounds. Associated Press (Toronto Star)

An Afghan immigrant wanted for questioning in the bombings that rocked a New York City neighbourhood and a New Jersey shore town was captured Monday after being wounded in a gun battle with police that erupted when he was discovered sleeping in a bar doorway, authorities said. Ahmad Khan Rahami, 28, appeared conscious, his upper right arm bandaged and blooded, as he was loaded into an ambulance in Linden. Two officers were wounded in the shootout but were not believed to be seriously hurt, authorities said. Associated Press (National Post)

U.S. mistakenly grants citizenship to at least 858 immigrants
The U.S. government has mistakenly granted citizenship to at least 858 immigrants from countries of concern to national security or with high rates of immigration fraud who had pending deportation orders, according to an internal Homeland Security audit released Monday. The Homeland Security Department's inspector general found that the immigrants used different names or birthdates to apply for citizenship with U.S. Citizenship and Immigration Services and such discrepancies weren't caught because their fingerprints were missing from government databases. DHS said in an emailed statement that an initial review of these cases suggest that some of the individuals may have ultimately qualified for citizenship, and that the lack of digital fingerprint records does not necessarily mean they committed fraud. Response to Senate's changes to Mountie union bill coming before spring: Goodale
Public Safety Minister Ralph Goodale says he is still looking through recommendations made by the Senate when it studied C-7, the RCMP unionization bill, and he expects to present the government's response to senators before the spring. ***"We've been obviously reviewing it both for its legal and its labour impacts. We're in the process now of analyzing all of the recommended clauses and Minister Brison and I will respond to the Senate report just as quickly as we can,"*** **Goodale** told

iPolitics Tuesday following an appearance at question period in the Senate. ***"This session essentially runs from now until next spring but I don't anticipate it's going to take that long."*** One of C-7's most controversial provisions is a section that includes a long list of workplace issues excluded from collective bargaining. (…) That marks a major difference between the version of the bill passed in the House of Commons and the version passed in the Senate. The government must now report back to senators on whether it will accept their changes. ***"The key question, as was focused on to a certain extent in the House but certainly in the Senate debate, is the set of issues around the prerogatives of management versus the listed exclusions and are those two compatible. We've just got to compare them all and make sure we've got it right,"*** **said Goodale.** The bill's Senate sponsor, former Mountie Larry Campbell, fought hard to remove all of the exclusions from the bill and had warned that leaving them in place could open the bill to a constitutional challenge. iPolitics

Document reveals RCMP strategy for possible 'flood of foreign fighters' fleeing Mosul offensive
Foreseeing a possible "flood of foreign fighters" out of Syria, the RCMP has circulated a strategy that involves trying to understand the returning fighters' intentions and working with communities. The plan calls for monitoring the social media activity of the "returnees," placing them on the no-fly list and asking Passport Canada to revoke their travel documents and flag their future passport applications. (…) According to figures already disclosed by the government, about 60 returnees are now back in Canada. But another 180 Canadians active in terrorism remain overseas, including about 100 in Syria and Iraq, the government has said. A victory by the regime forces in Syria could trigger an exodus of foreign fighters from the region, according to the RCMP report, which said the scenario "would pose an immediate security challenge." "It will be important to enlist the assistance of community engagement specialists as soon as possible once law enforcement becomes aware of a returnee," it said. "They may have a role to play in conducting the basic assessment of indicators noted above, and certainly would assist the returnee in engaging with supportive community resources, including those who would help steer the individual away from criminal activities associated with terrorism." Asked how the RCMP was preparing for the return of foreign fighters in light of the Mosul offensive, Staff Sgt. Julie Gagnon said the police force was "taking active measures through its criminal investigations." **Scott Bardsley, spokesman for Public Safety Minister Ralph Goodale**, said the government used a number of tools to deal with foreign fighters including revoking passports, the no-fly list and criminal charges. The report said police may act on information about returnees it receives from foreign partners but it also warned about the pitfalls. "The RCMP should be wary of utilizing information about subject X when it has been provided by a country's law enforcement forces that are known to use torture, unreasonable detention, or lack of due process." National Post

VICE Media & Civil Liberties Groups Launch Campaign to Protect Press Freedom
VICE Media Canada have joined forces with a coalition of civil liberties organizations to to launchprotectpressfreeedom.ca, a multi-platform campaign to raise awareness about VICE News Journalist and Cyberwar Host Ben Makuch's fight to protect his sources from RCMP interference. "Ben Makuch is standing up for every journalist who believes that source protection is fundamental to a free and independent press," said Ryan Archibald, President, VICE Media Canada. "We've got Ben's back and now we're asking Canadians to join us in this fight." In February of 2015 the RCMP presented VICE News reporter and Cyberwar Host Ben Makuch with a production order to turn over all communications between himself and Farah Shirdon, a source who had allegedly joined the Islamic State and who was later charged in absentia by the RCMP for having terrorism-related activity. The Ontario Superior Court upheld the production order this spring, however, VICE Media has appealed that decision and the Court of Appeal will hear the appeal in February 2017. (…) Protectpressfreedom.ca petitions Attorney General, Jody Wilson-Raybould, **Minister for Public Safety and Emergency Preparedness, Ralph Goodale** and RCMP Commissioner Robert Paulson. It asks them to drop demands for the release of Ben Makuch's private material and correspondence with sources and to amend the statutory framework governing the use of production orders to offer greater protection against a chilling effect on free expression. La GRC lance un guide de prévention du terrorisme et de la radicalisation
La Gendarmerie royale du Canada (GRC) lance mercredi un guide de prévention du terrorisme et de la radicalisation menant à la violence, destiné aux parents, aux enseignants et aux proches des personnes à risque. Le guide, intitulé "Guide de sensibilisation au terrorisme et à l'extrémisme violent", vise à les aider à mieux comprendre et à reconnaître le phénomène de la radicalisation. Il énonce, entre autres choses, les signes avant-coureurs de radicalisation et ceux de la planification d'un attentat. Il discute également du rôle de l'internet et de la propagande. On peut aussi trouver dans ce guide les coordonnées de certains organismes locaux pour obtenir de l'aide ou pour signaler un comportement suspect. Le guide est gratuit et disponible en français et en anglais. Il est offert en livre électronique et est téléchargeable sur le site de la GRC. Il a été préparé par l'Équipe intégrée à la sécurité nationale et le Bureau des communications de la GRC au Québec, avec la collaboration du Comité sur la sécurité nationale et le contre-terrorisme, l'Association canadienne des chefs de police et la Structure de gestion policière contre le terrorisme au Québec (SGPCT). EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

CN Rail working to reopen tracks near Yale, B.C., after derailment
Crews with CN Rail have made good progress repairing tracks following a derailment in British Columbia's Fraser Canyon. An email from CN spokesman Brent Kossey says crews worked through the night and expect to have tracks five kilometres north of Yale reopened before noon Wednesday. Two locomotives and several cars of a train carrying grain derailed late Tuesday morning, possibly after hitting rocks on the track. Kossey says the locomotives were lifted back onto the rails overnight and have been removed. He says the nine cars and their spilled contents will be removed in the days ahead. No one was hurt, and a boom was set up on the Fraser River below the derailment, but no oil or fuel spill was reported. CTV News; Radio Canada

NORAD exercise puts defence of northern airspace to the test
Defending North American airspace is the no-fail mission of the Royal Canadian Air Force (RCAF). But in recent years, fulfilling the North American Aerospace Defense Command (NORAD) mandate of aerospace warning and control and maritime warning has become a much busier task. In the past three years NORAD has seen a significant increase in the number of bombers, tankers and fighter jets near continental airspace since Russian president Vladimir Putin reinstated long-range air patrols in 2007… Last week, NORAD hosted Vigilant Shield 17, an annual exercise that has become the unified command's largest test of its ability to carry out collective defence of the two countries' airspace. The exercise, which ran from Oct. 17 to 21, blended live-flying with simulated elements in several regions throughout the United States and Canada, including the high Arctic. Although the specific exercise scenarios were kept under wraps, they reflected many of the challenges NORAD faces to detect, identify and intercept the growing range of threats… As a further test of Arctic capability, the RCAF had forward-deployed search and rescue (SAR) assets to the most remote locations over which the fighter jets were training. Although they were only serving in support of Vigilant Shield, a CH-149 Cormorant helicopter was at Canadian Forces Station Alert while a Cormorant and CC-130H Hercules SAR aircraft were at the USAF's Point Barrow Long Range Radar Site in Alaska. "The last thing we want to see is an aircraft go down, but if that happens we have dedicated SAR assets that are forward located to respond," Lavallee explained. Skies Mag

London Hosts Ontario Western Region Search and Rescue Exercise
London Search and Rescue hosted a regional SAR exercise on Saturday, October 22 at Camp Woodeden, Easter Seals Camp, in London. Volunteer search teams from London, Niagara and North Bruce were involved with the scenario, which included searching for four missing subjects. This event was funded by OSARVA obtaining a NIF grant. More than 50 participants were a part of the day, and worked together to highlight interoperability between our SAR teams, regardless of where they train in Ontario. London Free Press

Police partner with Alzheimer's society for 'vulnerable person' search exercise

On Friday, October 28, the Greater Sudbury Police Service Search and Rescue Team will be conducting their annual training scenario. This year, the Greater Sudbury Police Service is partnering with the Alzheimer Society Sudbury-Manitoulin North Bay & Districts to promote awareness of Alzheimer's disease and related dementias and conduct a search and rescue involving a vulnerable person. The training exercise will take place in an area off of Gagnon Street in Azilda, past the Montee Rouleau turn off at around 11 a.m. Sudbury.com

Hikers found swiftly by SAR
Two hikers were lost on Mount Hays Oct. 17 and the ground search and rescue team was called at 3:30 p.m. to find them. "Our subjects did exactly what they should, called for help, stayed in place and signalled our team with fire and a tarp," said the post on the Prince Rupert Ground Search and Rescue Facebook page. In record time, an hour and a half later, the two hikers were found safe and sound. Northern View

Alberta Premier Rachel Notley meeting with Fort McMurray wildfire victims
Alberta Premier Rachel Notley is visiting with people affected by the wildfire in Fort McMurray last spring. Notley is scheduled to meet with high school students and counsellors at Westwood Community High School in the early afternoon Wednesday. She'll also have coffee with first responders, tour a newly-built home, talk with owners, and have a roundtable discussion with social-sector organizations. Global News

Traffic-clogged highway during Fort McMurray wildfire spurs call for 2nd highway
Wood Buffalo is looking to Ottawa, the province and industry for help in building a second highway into and out of Fort McMurray. During the evacuation in May, tens of thousands of people jammed Highway 63, the sole road in and out of the northern Alberta city, as walls of flame showered embers and ash onto the roadway. Vehicles ran out of fuel and were abandoned after sitting in the massive traffic jam for hours... While most residents escaped south, about 25,000 people headed north, where they could be flown out or wait until the wildfire subsided. "We had 88,000-plus near misses. So we have to find out a way to do this better from a safety point of view," Coun. Sheldon Germain said. The municipality's wildfire recovery committee recommended supporting the $1.5-billion project along with a number of other strategies to make Fort McMurray less vulnerable to disasters. The municipality says it will put up $5-million towards the $15-million cost of the pre-design of the proposed East Clearwater Highway, which includes geotechnical work, development of traffic models and consultations, if the province and federal government funds the rest. The municipality said it would also seek help from industry to fund the project. CBC News

Back-to-business results expected from oilsands as wildfire impact dissipates
Oilsands producers are expected to report back-to-business third-quarter results over the next few days as they shrug off lingering impacts of last May's devastating wildfires in Fort McMurray, Alta. While provincial estimates report that Alberta oilsands production dropped by about one million barrels per day in May and by about 700,000 bpd in June, financial analysts say the industry's main players were producing normal volumes in the three-month period that followed. Canadian Press (Winnipeg Free Press)

Stormwater warning: P.E.I. municipalities eager for ideas
You can pardon the sewer and water folks with the City of Charlottetown if they took a moment to celebrate after the Thanksgiving storm. Four years and $18 million later, the Spring Park Combined Sewer and Separation Project had passed its first major test. After more than 74 millimetres of rain, there was no overflow at the city's treatment plant. But there are more storm clouds on the horizon and stormwater will continue to be an issue into the future for all Island municipalities, as climate change brings more unsettled weather patterns.Stormwater is rain or melting snow that runs off the land into waterways instead of soaking in, carrying along whatever debris lies in its path, potentially causing pollution. That's why representatives from Island municipalities, UPEI, the consulting industry, watershed groups, and the provincial government gathered Tuesday to talk about stormwater management. CBC News

BX wildfire safety promoted

Despite the devastation that recently scorched Fort McMurray, and years prior in Kelowna and Falkland, homeowners are failing to learn from the tragedies. But North Okanagan residents have a chance to learn how to snuff out fires before they start. A FireSmart community educational event gets underway at the BX Swan Lake fire hall Saturday from 9 to 11:30 a.m. A one-hour presentation, followed by question and answer session is with one of Canada's leading experts in FireSmart and wildfire risk reduction, Alan Westhaver. Vernon Morning Star

N.W.T.'s monitoring of municipal services gets poor marks in auditor's report
The N.W.T. government does not have a good handle on the state of essential services in many communities and is not doing enough to assist those falling behind, an audit has found. Though the communities provide essential services to their residents such as water, waste and fire protection, it's the territory's responsibility, through the Department of Municipal and Community Affairs, to monitor them to ensure they're meeting requirements and to provide support, such as training, when needed. Fire protection, waste management and emergency preparedness planning all got poor marks in a report by the Auditor General of Canada that was tabled at the legislative assembly Tuesday. CBC News

Saskatchewan changes law to help workers with psychological injuries
Saskatchewan workers suffering psychological injuries — such as post-traumatic stress disorder — won't have to prove that it occurred on the job. The government has changed the *Workers' Compensation* Act to include what is called a rebuttal presumption for all forms of psychological injuries. That means it's presumed the injury is work-related, unless an employer rebuts the position. Labour Minister Don Morgan says the legislation is unique in Canada because it covers other forms of psychological injury that workers could suffer as a result of being exposed to traumatic events or situations at work, not just PTSD. Canadian Press (OHS Canada)

NATIONAL SECURITY CONSULTATIONS / CONSULTATIONS SUR LA SÉCURITÉ NATIONALE

Thinking Through Reform: Communications Security Establishment
A blog post by Craig Forces, Professor at the University of Ottawa, states, "Green Papers, consultations, discussions, workshops, roundtables, hearings. There is a risk of overdose for a national security law and policy reform enthusiast. And an aching fear that all this is sound and fury that, in the end, will signify precisely nothing. For all the goodwill in the world, reform in this area (even more than most) is course-correcting an oil tanker. But I'm not sure that all of it has to be hard. A few thoughts on the Communications Security Establishment (CSE) and the post-Snowden concerns about oversight: The Problem. Put simply, the issue is this: CSE acquires information that enjoys constitutional protection, without going through the process (or anything approximating the process) that the constitution requires before the state acquires this information. That is, at core, the issue in the BCCLA's constitutional challenge. (In the interest of full disclosure: on behalf of BCCLA, I provided factual background information for use by the court in that proceeding)." National Security Law

ITAC calls on Ottawa to create a central IT authority for federal government
If Canada wants to remain competitive in the world the federal government must adapt to the digital age – including creating a digital services division, according to a report released today by the the Information Technology Association of Canada (ITAC). "On a global basis, every country in the world is talking digital strategies and innovation agendas," ITAC CEO Robert Watson said in an interview, noting that in

Canada's case any digital strategy should include creating a central IT authority, which he says would make the government and its services more secure, innovative, efficient, and accessible for citizens and businesses than today's piecemeal operations. (…) In the meantime, though running multiple systems makes realizing their dream of a centralized system difficult, ICT managers are used to running multiple systems separately, Watson admits. The consequences for ignoring ITAC's advice could be disastrous. In its report, the organization notes that Canada's aging IT systems have led to data breaches at the National Research Council and cybersecurity risks at the Canada Border Services Agency, to name two. IT World Canada

Un couple mexicain vivant à Toronto avec ses 3 enfants est menacé d'expulsion
L'immigration illégale de Mexicains n'est pas un enjeu seulement aux États-Unis. Un couple mexicain, qui vit illégalement à Toronto depuis 11 ans, en est un exemple. Nora Trueba et Israel Ochoa ont décidé en 2005 de rester au Canada après leur voyage de noces, alors que des manifestations violentes faisaient rage au Mexique. (…)Selon un rapport publié en 2009 par l'Agence des services frontaliers du Canada, l'agence fédérale avait expulsé 4623 Mexicains cette année-là. Ce chiffre ne tient pas compte des enfants de ces couples nés au Canada, qui peuvent rester au pays, sous la garde d'un proche ou de la Société d'aide à l'enfance. Toutefois, dans la presque totalité des cas, les parents expulsés amènent leurs enfants avec eux. Radio-Canada

Bangladesh asks Canada for effective mechanism to deport Bangabandhu killer Noor
Bangladesh has urged Canada to devise an 'effective mechanism' to move forward with the deportation of the killer of its independence architect. Foreign Minister Abul Hassan Mahmood Ali made the proposal at a bilateral meeting with his Canadian counterpart Stephane Dion at Ottawa on Tuesday, his ministry said. They discussed the possible deportation of Noor Chowdhury, the self-confessed and convicted killer of Bangabandhu Sheikh Mujibur Rahman and his family memberse in 1975. Noor is evading the gallows by living in Canada since 1996. BD News 24

Smuggling posh groceries across the border
The US grocery chain Trader Joe's isn't in Canada. But one man has made a business of smuggling their snacks across the border. BBC News

Quebecers accused of drug trafficking in Australia to remain jailed
The two Quebec women who were arrested on a cruise ship in Australia on suspicion of trafficking cocaine appeared in criminal court Wednesday, but have not registered a plea. Melina Roberge, 23, and Isabelle Lagacé, 28, were denied bail pending further proceedings, scheduled for Dec. 7. The next step is for them to inform the court of their plea, said an Australian Justice Ministry spokesperson. André Tamine, 64, was arrested with them on the same luxury ship, the MS Sea Princess, and faces similar charges. The three were arrested Aug. 29 after Australian authorities with the help of a drug-sniffing dog discovered 95 kilos of cocaine in their luggage, worth an estimated $30.5 million Canadian, police said. The three cases of importing a controlled substance with the intention to traffick might be tried separately. Postmedia News (Montreal Gazette); Canadian Press (570 News); The Chronicle Herald; Daily Star

Canada-EU trade deal compromise in works amid 11th-hour talks in Belgium
A planned EU-Canada summit to sign a free trade deal was still possible on Thursday, European Council President Donald Tusk said on Wednesday, as Belgian politicians entered a second day of talks on the future of the pact. Prime Minister Charles Michel hosted talks from early on Tuesday of regional authorities, including of Wallonia and Brussels that have rejected an accord backed by all 27 other EU governments. The talks paused after two hours to allow some of those present to attend a funeral of a Belgian politician. They were scheduled to resume at 9 a.m. ET/3 p.m. CET. Without assent from its regions and linguistic communities, Belgium cannot sign the Comprehensive Economic and Trade Agreement (CETA) at a planned EU-Canada summit on Thursday with Prime Minister Justin Trudeau. "I still hope that Belgium will prove that it is a consensus-building champion and that we will be able to finalize this agreement soon," Tusk told a session of the European Parliament. CBC News; Associated Press (Toronto Star); Reuters; L'Economiste

Canada parliament votes to take in Yazidi refugees
Iraqi activist Nadia Murad was on hand for the unanimous vote in the House of Commons. The government said it is still sorting out a plan for the airlift and does not yet know how many Yazidi refugees Canada will take in over the 120-day period. But Immigration Minister John McCallum reminded that Canada had managed to resettle more than 25,000 Syrian refugees in just a few months at the start of the year. "It is important to emphasize that Canada will always be an open country willing to step up and support people in need from all around the world," Prime Minister Justin Trudeau said in the Commons. "I am pleased to see Nadia (Murad) again today and reassure her that in the coming months we are committed to bringing in vulnerable Yazidi refugees," he said. Your Middle East

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Dyn DDoS Work of Script Kiddies, Not Politically Motivated Hackers
New research on the source of Friday's DDoS attack against DNS provider Dyn indicates that script kiddies are likely responsible, rather than a politically motivated actor. Researchers at Flashpoint dismissed numerous claims of responsibility that separately linked the attack to the Russian government, WikiLeaks or the New World Hackers group. Instead, the threat intelligence company said with "moderate confidence" that the attacks are linked to the Hackforums community. Hackforums is an English-speaking hacking forum and the place where the source code for the Mirai malware was publicly released by a hacker known as Anna-Senpai. Director of National Intelligence James Clapper said today as well that it's likely the attack was not carried out by nation-state actors during testimony at the Council on Foreign Relations. Threat Post; Security Week; Associated Press (Cape Breton Post, Washington Post)

Terabit-scale DDoS events are on the horizon
Corero Network Security has disclosed a new DDoS attack vector observed for the first time against its customers last week. The technique is an amplification attack, which utilizes the Lightweight Directory Access Protocol (LDAP): one of the most widely used protocols for accessing username and password information in databases like Active Directory, which is integrated in most online servers. While experts have so far only observed a handful of short but extremely powerful attacks originating from this vector, the technique has potential to inflict significant damage by leveraging an amplification factor seen at a peak of as much as 55x. Therefore, in terms of its potential scale, if combined with the IoT botnet that was utilized in the recent attack against Brian Krebs, we could soon see new records broken in the DDoS attack landscape, with potential to reach tens of Terabits per second in size in the not too distant future. Help Net Security; International Business Times

Emails containing malware spikes 35% worldwide
DDoS-sourced malware is on the rise, according to AppRiver's Q3 Global Security Report, which analysed malware and spam trends in Q3 2016 (between July and September 2016). For the first time, the web saw disruptions caused by DDoS attacks leveraged by botnets comprised primarily of IoT devices during Q3 of this year. The company's security analyst team quarantined 5.7 billion emails containing malware in Q3, a 35 percent increase over the total they recorded in Q2 2016. This quarterly total is more than triple 1.7 billion emails containing malware that analysts observed during the entirety of 2015. Over two billion spam messages were quarantined as well. Data breaches remained a major concern for organisations worldwide during Q3. The recent breach disclosed by Yahoo and Pippa Middleton's iCloud account hack containing private pictures of her and the UK Royal family just name a few of the noteworthy breaches that occurred during this time period... Various versions of ransomware with specific targets were seen during Q3. Locky and Zepto are still some of the reigning champs when it comes to volume, but others such as EduCrypt, IoT Ransomware and MarsJoke were seen lurking online. SC Magazine

IoT Devices Can Be Hacked in as Little as Three Minutes
With 6.4 billion IoT devices already online, researchers estimate that over 20 billion IoT devices will be connected to the Internet by 2020. That's why many security experts argue that now is the time to make sure that IoT security is taken seriously before it will be too late. Of course, there are those that who think it's already too late, citing the massive DDoS attacks that have pummeled OVH, KrebsOnSecurity, and

most recently Dyn, all carried out with a botnet of unsecured IoT devices. But let's not carried away by the recent media hype. Hijacking IoT equipment for DDoS attacks is only one of the many ways attackers can use IoT devices against a target. As leading IoT security firm ForeScout explains, attackers can also use IoT equipment as pivot points in corporate networks, using them as entry points to breach sensitive servers and steal data undetected. Employing the service of renowned hacker Samy Kamkar, ForeScout says that it generally takes an intruder under three minutes to hack an IoT device. Softpedia; ZDNet; Infosecurity Magazine

WhatsApp Executives Say They're Committed to User Privacy
One of the reasons why WhatsApp is such a popular messaging application is the fact that it uses end-to-end encryption of messages. But in August this year, WhatsApp announced that it would make the first change to its terms and privacy policy in four years, in order to share user phone numbers with Facebook. The measure displeased many and got some users worried about how WhatsApp was handling the privacy of their personal data. WhatsApp did explain that the measure won't affect the privacy of content that users share, since end-to-end encryption is still available inside the application and not even WhatsApp can see messages that users share. Still, the measure displeased some government officials. In September, the Hamburg Commissioner for Data Protection and Freedom of Information ordered Facebook to delete German user data shared from WhatsApp. Softpedia

Roundtable: Former Deputy Director of NSA Talks Insider Threats
When you picture the typical venue for a cybersecurity discussion, the British Museum probably isn't the first place that would spring to mind. However, yesterday, it played host to a press roundtable with Chris Inglis, former deputy director of the National Security Agency (NSA), and other representatives of security intelligence platform provider Securonix to explore the ever-evolving landscape of the insider threat. Does the Surrey RCMP need a surveillance camera database?
Surrey will soon launch Project Iris, which is based on a CCTV program out of Philadelphia. Sometime between April and July, Surrey's director of Public Safety Strategies was spending another evening listening to people. Terry Waterhouse was at a community forum collecting ideas for his comprehensive safety strategy when a business owner started to speak. After a couple of sentences, Waterhouse knew the man was on to something. "There had been an accident and someone was injured in front of his business," Waterhouse said. "His security cameras caught it, but he didn't realize until later that his footage could be used as evidence for a hit-and-run accident." The man told Waterhouse the RCMP should have a database that pinpoints where security cameras are located in the city. That way, police know exactly where to find video footage when a crime is committed. Borrowed idea: Waterhouse started researching surveillance camera databases and came across the SafeCam program in Philadelphia. For the last four years, residents and business owners have been able to register their cameras with the Philadelphia Police Department. Investigators say SafeCam has helped them solve everything from

break-and-enter cases to child abductions. One of the program's biggest successes came in November, 2014 when a woman was randomly snatched off the street. A few days after police released SafeCam footage of the incident, a 37-year-old man was arrested in Maryland. He is now serving a 35-year prison sentence. CBC News

Après les femmes, les hommes demandent des comptes à la GRC
La Gendarmerie royale du Canada (GRC) sera visée par une nouvelle demande de recours collectif d'employés alléguant avoir été victimes d'intimidation et de harcèlement, révèle CBC. Cette fois, les plaignants seront des hommes. Plus tôt ce mois-ci, la police fédérale a annoncé avoir constitué une réserve de 100 millions de dollars pour dédommager des employées disant avoir été victimes de discrimination et de harcèlement sexuels. Elle s'attend à ce qu'un millier de femmes se partagent la somme. C'est une firme d'avocats impliquée dans ce dernier dossier, Kim Orr Barristers, qui a confirmé à CBC qu'un nouveau recours collectif regroupant des hommes se préparait. Selon Me Megan McPhee, ce dossier est en préparation depuis des années. « Nous avons parlé à des centaines de membres, et nous sommes contactés par de nouveaux membres chaque jour », affirme-t-il. Si la demande de recours collectif est acceptée et qu'un tribunal donne raison aux plaignants, la facture pourrait s'avérer particulièrement salée pour la GRC, dans la mesure où les hommes comptent pour environ 80 % de son effectif. Radio-Canada

Death of Burnaby man Tasered by police deemed accidental
50-year-old Maurizio Facchin died after being tasered by Burnaby RCMP in 2014. A coroner's inquest has ruled the death of a 50-year-old Burnaby man, who passed away shortly after police Tasered him, was accidental. It was more than two years ago when Burnaby RCMP deployed a conducted electrical weapon (CEW) on Maurizio Facchin before he died. At a coroner's inquest last week, a jury heard from more than 20 witnesses about the incident at a Burnaby apartment, which many of them called a "chaotic" scene. People who took to the stand included building residents, police officers, firefighters and paramedics. Inquest counsel Bryant Mackey says witnesses recalled a drug-induced Facchin rampaging out of control before police shot him with a Taser. "The immediate cause of death was found to be excited delirium due to a result of cocaine toxicity and cardiomegaly," said Mackey. "That essentially means Mr. Facchin had an enlarged heart," said Mackey. "[The jury] heard from the medical practitioners that suffering from an enlarged heart does make someone susceptible to cardiac arrest at a level greater than those in the population that don't suffer from cardiomegaly." The jury made three recommendations to RCMP as a result of the incident. CBC News

Separate drug busts yield big fentanyl haul for southern Alberta police
Hundreds of fentanyl pills have been seized and five people, including an alleged gang member, are facing charges after separate drug busts in southern Alberta. The Alberta Law Enforcement Response Team says a total of 777 pills were found over the past two weeks as part of an effort to limit the supply of fentanyl hitting the streets of Lethbridge. Investigators say that on Oct. 13, team members seized 193 pills, cocaine and a loaded handgun from two homes and two vehicles in the city. Alleged Mad Cowz gang member Corey Amyotte, who is 29, and associates Ali Zalfo and Jerry Bull were arrested on 32 charges relating to drugs and firearms offences. The following Thursday, officers seized 584 fentanyl pills and arrested two suspects during a vehicle stop in Aldersyde, about 40 kilometres south of Calgary. William Hatch, who is 33, and Awet Abraha, who is 28, were arrested and charged with six drug-related offences. ALERT includes members of law enforcement agencies across Alberta, including the RCMP, the Calgary, Edmonton, Lethbridge and Medicine Hat police services and Alberta Sheriffs. Calgary Herald

Ponoka RCMP search for missing 13-year-old boy
RCMP in Ponoka, Alta., are looking to the public for help finding a missing teen.Dolton Anderson was last seen at a group home in the central Alberta town on Saturday, Oct. 22 at around 12:30 p.m.He is described as 5'4" tall and 90 lbs. with short brown hair, glasses.RCMP said Anderson has a foot scooter with an orange emblem on it.Anyone with information is asked to call Ponoka RCMP at 403-783-4472 or contact Crime Stoppers. Attendance management: Good intentions, discriminatory effects
Attendance managemenet programs are popular among employers for keeping an eye on employee absences and ensuring both good productivity levels and that employees who need accommodation are getting it — particularly for employers where employee absenteeism is a problem. However, such programs can walk a fine line where certain employee absences are related to grounds protected under human rights legislation. If such absences play a role in getting an employee entered into an attendance management program where she receives differential treatement, then it might be discrimination — whether the employer intended it or not. A federal employer's attendance management program discriminated against employees' family status and disabilities by including leaves for those reasons in the threshold for entering them in the program, the Canada Public Service Labour Relations and Employment Board has ruled. Corrections Canada (CSC) implemented a national attendance management policy (NAMP) for employees of its correctional institutions in October 2011. The policy was designed to ensure effective communications between employees and management about absences so CSC could accommodate any needs that contributed to the absences. It was meant to help employees improve their attendance rather than penalize them for absences. Managers were instructed to discuss absences with employees but not to seek medical diagnoses. Canadian Employment Law Today

Developing Assessment and Treatment Practices for Female Sexual Offenders
This impact case study is based on a body of research that has enhanced the assessment and treatment of female sexual offenders internationally. This clinical impact was underpinned by a series of unique qualitative and quantitative studies that led to the discovery of female sexual offenders' offence styles and cognitive characteristics. The work has resulted in the development of effective clinical practice training and guidelines. It has been used by professionals to enhance their assessment and treatment of female sexual offenders whose specific needs had not previously been identified. As noted by the Director General of Women Offender Sector, Correctional Service Canada: Prior to the research by Gannon and colleagues, virtually no studies focused on females in particular and many program or study descriptions even fail to indicate the gender of the participant or the subject group; the assumption of the offender as male is implicit. This research has swiftly led to impact on the assessment and treatment of offenders in the UK and internationally. Since 2010, a number of practitioner organisations worldwide (including both correctional and non-government organisations) have used Professor Gannon's research findings to inform their training, assessment and treatment practices. For example, the Correctional Service of Canada – one of the few worldwide correctional facilities to provide group female sexual offender treatment – now incorporate Gannon and colleagues' (2010, 2012) pathways into their training materials for all new facilitators who work with female sexual offenders. Should Oland get a new trial? We have no idea
An opinion piece states, "Dennis Oland was convicted of murder by 12 ordinary folks applying ordinary judgment to the evidence they heard. That conviction was then set aside by three legal Olympians on the New Brunswick Court of Appeal, working with reams of esoteric hair-splitting argument delivered by a phalanx of clever lawyers. That, in a nutshell, introduces the central dilemma of decision-making in our criminal courts: Do we follow the dictates of common sense or complex doctrine? The truth is, nobody knows." Globe and Mail

52 months of torture and the 4 men responsible
An opinion piece states, "There is a man in Thunder Bay who the Province of Ontario has kept in a hole for 52 months. His name is Adam Capay. When he was 19 he was arrested on minor charges and sent to jail. There he got into a fight and another man died. We don't know if Capay is guilty—he has been waiting an incredible four years for his trial. And while he has been waiting, he has been kept in solitary confinement, in a Plexiglas box, in an empty cellblock with no windows, and with the lights kept on for 24

hours. Capay has interacted with so few people over the last four years he is losing the ability to speak. One thousand five hundred and sixty days in solitary confinement. To put this in perspective, consider that the United Nations has declared this form of segregation should never surpass 15 days. They did this because it is considered one of the worst forms of psychological torture. How bad is it? In the 1950s, a well-regarded psychologist named Harry Harlow decided to find out. He placed rhesus macaque monkeys in solitary confinement for twenty days and recorded the effects. Every monkey emerged badly damaged. Harlow was universally condemned for his cruel and unethical experiment, and his reputation was permanently ruined. And yet, the province of Ontario has effectively conducted this experiment on Adam Capay 78 times in a row." Maclean's

5 Major Issues That Will Affect Cannabis in Coming Years
An opinion piece states, "For marijuana smokers, politics is often viewed as a cut-and-dried proposition. "Legalize it" has long been the one and only rally cry. As some states have legalized it, and others are close behind, it is time to start broadening cannabis political horizons. Now that the path to legalization seems inevitable, it's time to consider more complex political questions. What should the next priorities be for smokers in the coming years? Here are some issues that could make a big difference for America's cannabis community. Trade: One of the most complicated political issues has come to the forefront of this election season: trade. As legalization moves forward in the U.S., countries like Mexico have entered into a bit of a trade arms race to legalize their product, hoping to funnel money from the cartels to the Mexican government. At the same time, less traditional drug importers, like Canada, are exploring revenue possibilities as well." Merry Jane

Brothers From Michigan Arrested in Tunisia in Terrorism Probe
Two American brothers have been arrested in Tunisia on suspicion of belonging to a terrorist organization, two local sources told NBC News. A senior police official said the brothers were both aged in their 30s and originally from Michigan. A source in the governor's office also confirmed the arrests.

Speaking on condition of anonymity, the police source said one of the men was carrying a U.S. passport that identified him as Patrick Alan Lawwill. NBC News has seen a photocopy of the passport, which was apparently issued in July 2015 and lists Lawwill's place of birth as Michigan. Police were not able to provide a copy of the second suspect's documents. A State Department official said it was aware of reports the pair had been arrested "on suspicion of terrorist activities" but declined to comment further because of "privacy considerations." NBC News

Airstrikes in Syria kill 17 people - most of them children - after warplanes hit school
Airstrikes in Syria killed 17 people, mostly children on Wednesday when warplanes struck a school complex in the northern rebel-held province of Idlib, activists said. The Idlib News network said the strikes hit as the children were gathered outside the school complex in the village of Hass. The activist-operated group put the death toll at 17, and said most of the victims were children. There were fears the death toll could rise further as some of the wounded were reported to be in critical condition, the network added. Another activist group, the Britain-based Syrian Observatory for Human Rights put the death toll at 22. It said 14 children and a woman were among those killed. EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Seismic rift divides B.C. governments
The provincial government has taken steps to prepare for a major B.C. earthquake, investing millions of dollars in an early warning system and spending billions to seismically retrofit schools and important infrastructure such as bridges. The province recently held an emergency exercise on Vancouver Island to test its response to an earthquake. But it has shown little interest in dealing with thousands of privately owned buildings in the province that were constructed largely before the early 1970s and do not meet modern earthquake safety standards. That job has been left to municipalities, which have relied on passive triggers that only come into effect when building owners change an old building's use or undertake major renovations. Each level of government appears reluctant to tackle the issue head on, instead looking to another level of government to take the lead. Vancouver Province

Worst hit in Sydney flood seek details on compensation
The newly formed Southend Lost Homes Coalition of Sydney wants clarity surrounding compensation for inhabitable homes and is urging a speedier recovery process after members lost everything in the flood on Thanksgiving Day. The 17 homeowners in the group have agreed to allow their houses to be demolished and the entire area declared a no-development zone by the municipality. That agreement, however, came with the understanding that they would be supported in finding or building new homes, but spokesman Terry Drohan said that support has been slow in coming. CBC News

Province middle of the pack for flood preparedness
A new report from the University of Waterloo puts New Brunswick in the middle of the pack for flood preparedness, but the Conservation Council says that doesn't paint a full picture. Louise Comeau, the director of climate change and energy solutions for the Conservation Council of New Brunswick, said while the province received a C plus grade, there's still more work to be done. "We need to move from a reactive point of view, or frame of reference, to proactive, long-term planning and prevention approach to these issues," said Comeau. CBC News

P.E.I. ranks at the bottom for flood preparedness
P.E.I. has a lot of work to do prepare for floods, according to a new report out of the University of Waterloo. P.E.I. scored a D overall in the report, tied with British Columbia for the lowest grade in the country. Overall, Canada scored a C. The Island reached the national average in only two of 12 categories — wastewater systems and drainage system maintenance — and did not exceed the average in any. P.E.I.'s electricity supply and transportation systems were found to be particularly vulnerable, and the province was found to be behind on adaptation audits of both commercial and residential properties. CBC News

A Diesel Spill Is Putting the World's Largest Temperate Rainforest at Risk
In the early hours of Oct. 13, a petroleum tug-barge tanker called the Nathan E. Stewart ran aground near Waglisla (Bella Bella) on the central coast of British Columbia, crashing into one of the richest ecological and cultural treasures in Wax'wuisaxv-s Haiłzakv (Territory of the Heiltsuk First Nation). Almost three weeks later, the sunken tug is still there, still intermittently leaking diesel, and clean-up efforts have barely begun. As someone who works and lives in Bella Bella, and who has spent time as an observer for the Heiltsuk Nation in the aftermath of the crash, what I've been seeing firsthand has left me concerned (…)The risks of marine transport, especially of oil, have been a concern here for years. With eerie timing, a film recently created by students at the Bella Bella Community School summarizing these concerns was released just four days before the Nathan E. Stewart drove into a reef on a calm clear night, in a channel three kilometers wide (…) But the main thing I've seen first-hand is disarray, and the near impossibility of containment, recovery, and cleanup of petroleum once it enters this marine environment. This despite the impressive professionalism of Canada's Coast Guard on the scene, the hordes of experts brought in from around the world, and of course the tireless dedication of members of the Heiltsuk Nation who have dropped everything to devote themselves to the response. NATIONAL SECURITY / SÉCURITÉ NATIONALE

Whistleblower Edward Snowden speaks at McGill University Wednesday
The timing couldn't be better. With many Quebecers in an uproar over police spying on La Presse reporter Patrick Lagacé, McGill University on Wednesday will welcome whistleblower Edward Snowden, who is wanted in the United States for giving classified material on U.S. surveillance programs to journalists. Speaking via video link, Snowden, a former government contractor at the U.S. National Security Agency, will discuss surveillance in Canada. The free public lecture is being organized by Media@McGill, an interdisciplinary hub focused on the study of contemporary media. It will take place on Wednesday, Nov. 2, at 7 p.m. in the Leacock Building, 855 Sherbrooke St. W. Seats will be first come, first served, with a lineup starting at 5:30 p.m. Snowden's leaks revealed how the U.S. and other countries monitor global private communications. He is now living in exile in Russia to avoid prosecution in the U.S. Last month, Snowden criticized Prime Minister Justin Trudeau for not repealing Canada's anti-terror law. On Monday, Snowden tweeted about the Lagacé surveillance, quoting a Montreal Gazette story and warning journalists that police are spying on them to identify sources. Montreal Gazette

Montreal police monitored iPhone of La Presse journalist Patrick Lagacé
Montreal police strongly defended a highly controversial decision to spy on a La Presse columnist by tracking his cellphone calls and texts and monitoring his whereabouts as part of a necessary internal police investigation — while the journalist involved called what they did "indefensible." "Lives were not at stake, this was not a question of national security," La Presse columnist Patrick Lagacé said in an interview Monday. "The leaks made them look bad, that's why they decided to go after me in the way they did." Opposition politicians are also condemning Montreal police for spying on Lagacé, though Montreal Mayor Denis Coderre stood by police chief Philippe Pichet on Monday, noting that a mayor should not intervene in police operations, but did say he was troubled by the news. For several months this year, police were monitoring Lagacé's iPhone to determine the identity of his sources, La Presse reported. This was confirmed to Lagacé last Thursday by Montreal police. Montreal Gazette; Radio-Canada

L'ex-chef du SPVM Marc Parent n'a jamais autorisé la surveillance de journalistes
Marc Parent soutient n'avoir jamais autorisé la surveillance électronique d'un journaliste lors de son passage à la tête du SPVM de 2010 à 2015. Il n'a pas davantage été mis au courant de l'existence d'une telle pratique sous sa gouverne. La Presse a croisé M. Parent en marge d'une annonce du premier ministre Philippe Couillard à l'occasion de conférence de l'UNESCO sur la radicalisation des jeunes, mardi. Il n'a pas voulu commenter directement l'espionnage du journaliste Patrick Lagacé par le SPVM, dirigé aujourd'hui par Philippe Pichet. Il a toutefois accepté de répondre à quelques questions sur les pratiques qui ont eu cours sous sa direction. A-t-il déjà été mis au courant d'un mandat de surveillance contre un journaliste ou en avoir autorisé un ? « Non », a-t-il répondu. « Je n'ai pas autorisé de mandat d'écoute électronique sur un journaliste. » Il a offert la même réponse lorsqu'on a abordé la question d'un mandat de surveillance électronique, sans qu'il y ait écoute à proprement parler. Il a précisé que l'écoute et la surveillance électroniques sont « englobées » dans un même moyen d'enquête. La Presse

Défier la «propagande jihadiste» sur internet pourrait être vain
Répondre à la «propagande jihadiste» en ligne en présentant un contre argumentaire officiel ou en désactivant des comptes jugés extrémistes pourrait avoir un effet limité et occulter la lutte contre les éléments à la base de ce radicalisme, selon des experts. À mesure que le groupe État islamique (EI) a étendu son emprise sur l'Irak et la Syrie, sa communication moderne sur internet est apparue comme une arme redoutable qui avait été minimisée par les États ciblés par ses attaques. Des vidéos d'exécutions aux films promotionnels semblant sortis d'Hollywood, en passant par des facilités d'accès à des recruteurs via les réseaux sociaux, l'organisation radicale a étendu le champ de bataille sur le web,

comme aucun autre groupe armé auparavant, ont convenu les participants à la conférence «Internet et la radicalisation des jeunes», organisée lundi et mardi par l'UNESCO à Québec. Agence France-Presse (TVA Nouvelles)

How Canada's Anti-Cyberbullying Law Is Being Used to Spy on Journalists
Patrick Lagacé, a columnist for Montreal's La Presse newspaper, says that police told him he was a "tool" in an internal investigation when they tapped his iPhone's GPS to track his whereabouts and obtained the identities of everyone who communicated with him on that phone. Lagacé alleges that this surveillance was designed to intimidate and discourage potential sources within the Montreal police department from approaching him with information for his story. Police obtained a warrant for this under the hugely controversial Bill C-13, which gave investigators new powers, privacy lawyer David Fraser noted in an interview. The bill was initially sold as combatting cyberbullying and the unwanted publication of intimate images online, also known as "revenge porn (…)"According to Citizen Lab researcher Christopher Parsons, these same powers that target journalists can be used against non-journalists under C-13. And the only reason we know about the aforementioned cases is that the press has a platform to speak out. Motherboard

Bande dessinée et investissement pour lutter contre la radicalisation
Le premier ministre du Québec, Philippe Couillard, a annoncé mardi le lancement d'une bande dessinée, rédigée par des jeunes qui s'étaient radicalisés, ainsi qu'un nouvel investissement de 10 000 $, pour lutter contre la radicalisation. La bande dessinée, nommée Radicalishow, raconte l'histoire de sept jeunes du Centre de prévention de la radicalisation menant à la violence de Montréal qui ont marché sur le chemin de la radicalisation. « C'est fait par les jeunes et pour les jeunes », a souligné M. Couillard. Ces jeunes relatent également ce qui les a incités à quitter cette route. Une édition de l'oeuvre sera publiée en français et en anglais. Radio-Canada

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Canada's dairy industry untroubled by American threats: DFC
Canada's dairy industry says it's not scared by American warnings suggesting new rules on milk classes may violate international trade rules. "We're not scared of threats and we believe whatever we've done inside of our country to deal with our domestic product is something that we have every right to be able to determine for ourselves," Dairy Farmers of Canada President Wally Smith told reporters in Ottawa Tuesday after unveiling the industry's updated blue cow logo. Canada's dairy industry is debating whether to implement a new ingredient strategy after the idea was backed by members at the sector's annual meeting in Charlottetown in July. The strategy, which is not in effect nationally, comes from changes to milk classes in Ontario that tighten import rules in order to dissuade imports of diafiltered milk. (…) Diafiltered milk is a protein ingredient largely being imported from American dairy processors. The Canadian Border Services Agency classifies it as a protein ingredient, while the Canadian Food Inspection Agency says diafiltered milk is milk — a regulatory discrepancy producers say is undermining Canada's supply management system. (…) New York Governor Andrew Cuomo warned Prime Minister Justin Trudeau in a frank October 25 letter the proposed strategy would affect New York milk exports. The letter was made public Monday. iPolitics; Lohud

Firearms, Jewellery, And A Woolly Mammoth Tusk Among Items Seized At Canadian Border
On September 1, CBSA Inland Officers responded to a call from the Chatham-Kent Police Service. CKPS had custody of a United States resident who had been arrested on the evening of August 31 for domestic assault and breaking and entering. The man was a previous deportee who was in Canada on a temporary resident permit, although that permit had expired on August 31. His removal from Canada was stayed pending the outcome of the criminal charges. Also on September 1, a husband and wife from Pennsylvania were referred for an examination at the Blue Water Bridge, after both stating they had nothing to declare. While in secondary, the man admitted that he had an unloaded handgun in a cooler bag in the trailer. The handgun was seized as well as 47 rounds of ammunition that were located near it. He was then arrested for attempting to smuggle a firearm into Canada. Windsor Square; AM800

YYC opens new International Terminal
Calgary International Airport's new International Terminal officially opened for business yesterday morning, marking the completion of the largest single infrastructure program in the airport's history. The new 186,000 square metre terminal at YYC adds 24 aircraft gates and incorporates numerous technologies and processes designed to streamline the passenger experience throughout the airport. These include North America's first call-to-gate passenger boarding system, North America's first full CATSA Plus enhanced passenger screening system, enhanced U.S. and Canadian customs technology, a state-of-the-art Crisbag tote-based baggage system, and the YYC LINK, a custom-designed and Canadian-build passenger shuttle service that transports passengers between the domestic and international facilities. Canada to lift Romania and Bulgaria visa requirement
The Honourable John McCallum, Minister of Immigration, Refugees and Citizenship, announced today the Government of Canada's intention to lift the visa requirements for Romanian and Bulgarian citizens on December 1, 2017. It demonstrates the importance that the Government of Canada places on its relationship with both countries and with the EU more broadly. However, Ottama would reserve the right to reimpose the visa requirement "should irregular migration trends increase significantly from either country." "In the lead-up to the full visa lifts, Canada intends to implement partial lifts for eligible Romanian and Bulgarian citizens travelling to Canada for May 1, 2017," the statement reads. It also says Romanian and Bulgarian citizens who have held a Canadian temporary resident visa in the past 10 years or who currently hold a valid United States (U.S.) non-immigrant visa would not require a temporary resident visa and would be able to fly to or transit through Canada with an Electronic Travel Authorization (eTA) instead of a visa. Canada Journal

In-transit border pilot extended, new ports added
U.S. Customs and Border Protection has agreed to extend and expand a pilot initiative that uses a reduced data set for permitting Canadian carriers to resume in-transit operations for domestic loads. While the program will extend another year until Nov. 28., 2017, the Canadian Trucking Alliance (CTA) also announced that it has recommended the addition of three ports of entry to the program: Portal, ND/North Portal, SK; Sweetgrass, MT/Coutts, AB; and Sault Ste. Marie, MI/ON. It is unclear at this time when the ports may be added to the program. CTA says it will be working with the U.S. agency throughout 2017 to determine the expanded number of carriers allowed to participate in the in-transit process. It is expected an announcement could be made in the fall of 2017. Today's Trucking News

Halloween inspires Brian Masse statement pushing for Gordie Howe Bridge
Windsor West MP Brian Masse used Halloween puns in the House of Commons yeterday to criticize the government for a lack of progress on the new Gordie Howe Bridge. Masse stood to tell the house, "the project seems to have slipped into the Twilight Zone. Whether it's spooky back-room conversations with the ghouls at the Ambassador Bridge, or a zombie-like approach to property acquisition, the government appears lost in a haunted corn maze rather than on track to build a new crossing." With laughter coming from other members, Masse went on to say the government appears to be building its very own Frankenstein and just waiting for a lightning storm to flip the switch. Bridge authority officials have said the progress on the new bridge is on schedule, but they have not said when the Request for Proposals will be released. CBC News

Libre-échange : les tarifs douaniers au coeur des préoccupations de l'industrie des pêches
L'industrie de la pêche québécoise étudie les impacts de l'accord de libre-échange avec l'Union européenne sur le marché québécois. Toutefois, l'abolition des tarifs douaniers est au cœur des préoccupations des industriels. Le directeur de l'Association québécoise de l'industrie de la pêche (AQIP), Jean-Paul Gagné, estime qu'il est prématuré de tirer des conclusions sur les effets de cet accord. Selon lui, il y a encore trop de questions, mais la question des tarifs douaniers constitue un irritant. Radio-Canada

CBC News reported on the remote processing pilot project at the Morse Line border crossing. Rough Transcript (2016-10-31)

Calgary's new international terminal is home to the Canada Border Services Agency's new flagship operation in the Prairies. It can accommodate up to 5,200 travelers at one time, more than double what the old space could've held in the original YYC terminal. The new space has 54 automated kiosks to help speed up clearance into the country. Connecting travelers benefit with a new secure connection corridor that improves passenger flow. (City TV Calgary, 8h35ET, 10h04ET)

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Google discloses Windows zero-day, Microsoft argues disclosure ethics
On Monday, Google disclosed a zero-day vulnerability in Windows, which if exploited will enable an attacker to use it as a security sandbox escape. In response, Microsoft didn't offer details on a fix, instead choosing to promote Windows 10 and argue for coordinated disclosure. Google says the flaw was discovered on October 21, along with a vulnerability in Adobe's Flash. Adobe fixed their software last Wednesday, but since the Windows vulnerability is being actively exploited online, Google disclosed basic details about the flaw on Monday (…) A Microsoft spokesperson said Google's actions have potentially placed customers at risk. The statement goes on to reiterate the software giant's belief in coordinated vulnerability disclosure, along with a brief nudge for everyone to update to Windows 10. "We believe in coordinated vulnerability disclosure, and today's disclosure by Google could put customers at potential risk. Windows is the only platform with a customer commitment to investigate reported security issues and proactively update impacted devices as soon as possible. CSO Online; Threatpost; Dark Reading

Security Awareness Month Tips: Small rewards can go a long way
Cyber security awareness month winds up today, but before it ends we've got more advice from Symantec to pass on to infosec pros that hopefully will be useful in their work. It comes from Jamie Manuel, information protection manager at Symantec, who reminds CISOs that employee awareness training is always worth it. "A lot of companies focus on external threats, which are important," he said in an interview, "but in terms of educating employees they're really the front line and their actions can greatly increase your odds" of being more secure. So it's important to make sure everyone on staff understand the organization's security posture and how how doing – or not doing certain things can put the firm at risk. The trick, of course, is getting the message through. As we've written this month through our interviews and coverage from the SecTor cyber security conference, many experienced in the industry say repeatedly that security awareness training has to done more than once a year. Many think it should be done monthly. IT World Canada (2016-10-31)

MI5 chief not alone in voicing fears about Russian cyber-threat
Worries about Russian spying are nothing new, but the incumbent head of MI5's claim that Moscow now poses a huge threat online, in addition to the traditional arenas of espionage, chimes with a number of recent western assessments of Russia's hacking capabilities. "There is high-volume activity out of sight with the cyber-threat," Andrew Parker told the Guardian. "Russia has been a covert threat for decades. What's different these days is that there are more and more methods available." While the Kremlin swiftly dismissed the allegations that hostile Russian activity is a threat to Britain, Parker is not the first to voice concerns about Russia's online activities. Guardian UK; Reuters

Facebook Messaging Encryption Best to Protect Privacy
Facebook Inc.'s message applications Messenger and WhatsApp have the best encryption security to protect consumer communications privacy, Amnesty International said Oct. 21. Facebook, whose two messaging apps have a total of 2 billion users, is "doing the most to use encryption to respond to human rights threats, and is most transparent about the action it's taking," Amnesty International said. The ranking may not only be important to activists and individual users concerned about keeping their

conversations private, but also to companies seeking to monetize privacy protection in the highly competitive mobile messaging market. Bloomberg Legal

Algorithm Red Flags Potentially Dangerous Domain Names at Time of Purchase
A machine-learning algorithm that can detect malicious domain names as soon as they're purchased has piqued the interest of at least one corporate IT executive. Invented by five researchers at Princeton University and the University of California, the code works by scanning for 22 "features," or red flags that are consistent with suspicious behavior. They include names that are registered in bulk by the hundreds, names that are variations of the same name, random-looking names, and names with numerical characters. The tool would be helpful if it were used by the hundreds of registrars offering domain names for purchase in order to stop cyber criminals planning attacks as they're purchasing the names, said Vincent Weafer, senior vice president at McAfee Labs at Intel Security. Wall Street Journal

LAW ENFORCEMENT / APPLICATION DE LA LOI

Videos show events before B.C. RCMP arrest of elderly couple
The RCMP officers called to the scene of a raucous condo meeting in Coquitlam, B.C. are under investigation for their actions in the arrest of an elderly couple. The contents of a jarring cellphone video showing the elderly man dragged down a flight of stairs prompted not only an internal RCMP investigation, but also involved local police. But new footage has emerged showing pieces of the scene leading up to the arrest. The B.C. Condo Homeowner Association meeting on Oct. 27, held at a Best Western in the Vancouver suburb, heated up over, what appears to be, the results an election. YouTube users Victor Kim and Jee Grace, who attended the meeting, have posted more videos to the social media channel. One video shows a man who appears to be announcing the results of an election to a room full of agitated people. The man seems to have lost control over the crowd and yells over the din. He says that the results are in and will be sent to a lawyer. This is met with shouts and protests from the other members. CTV News

No one injured after RCMP car crashes in dangerous intersection
Winnipeg police said no one was injured following a crash involving an RCMP cruiser and a minivan Monday. Around 12:25 p.m., officers responded to the intersection of Kenaston Boulevard and McGillivray Boulevard following a collision with a police car. WPS said the cruiser, which had two RCMP officers inside, was travelling westbound on McGillivray. They explained the officers were on their way to a service callwith their lights and sirens on and as they attempted to turn at the intersection, the crash occurred. According to police, the collision involved a minivan and light standard. The two officers and the driver of the minivan were not injured. Winnipeg Police Service investigators in cooperation with the RCMP continue to investigate. CTV News; CBC News

Kelowna council wants a return of the RCMP Auxiliary constable program
Kelowna city council wants the RCMP auxiliary constable program back—but it want to see changes. The program, which provided civilian volunteers to support the RCMP by working with community groups, at local events and with the public, was suspended by the federal government in January 2016 pending a review of the program. (…) Tier 2 would be all the activities of the status quo option, as well as traffic and crowd control, parades and public ceremonies as well as foot and bike patrols under the supervision of an RCMP officer. Under this tier, auxiliary constables would be appointed peace officers and wear police-type uniforms, get intervention tools and soft body armour. There would be more training and work would be limited to 96 hours of participation per year. They could not work after 9 p.m. Tier 3 would include tier 1 and 2 duties, as well as general duty patrol in RCMP vehicles, manning check stops and other activities deemed appropriate. Kelowna Capital News

Windsor Mounties Make History
When members of the Royal Canadian Mounted Police participated as part of a Colour Guard during the commissioning of the USS Detroit on October 22, it was history in the making. The three RCMP members, Sgt Diebel, Cst McDonnell and Cst Kukhta, all part of the Windsor Shiprider Unit, donned the red serge for the commissioning and marked the first time for the US Navy that another country had been

included in such a ceremony. Canada-US Shiprider program involves vessels jointly crewed by specially trained and designated Canadian and US law enforcement officers who are authorized to enforce the law on both sides of the international border. "The request to have Canadian participation came from numerous US agencies in the local Detroit area," said John Peracchio, the chair of the USS Detroit commissioning committee. "They pointed out that our Canadian partners play such a vital role in our shared border security interests that they should also share in our celebrations". Windsor Square; Ottawa Citizen

Wellington man charged with running illegal internet drug site
New Zealand Police and Customs have identified and spoken to more than 160 people nationwide for buying illegal drugs via darknet and other illegal sites, with more Police visits to come. Last week law enforcement agencies around the world took part in Operation Hyperion, a coordinated effort to target buyers and sellers of illegal drugs over the internet. From October 22 to 28, agencies focused on packages coming through mail centres, and then tracked these back to buyers and sellers. (…) Several more investigations are in progress with more people yet to be visited. One person faces 13 importing charges relating to ecstasy, LSD and cannabis. As well as Police and Customs, Operation Hyperion involved international partners including; Europol; the United Kingdom's National Crime Agency; Australian Federal Police; U.S. Immigration and Customs Enforcement (ICE), Homeland Security Investigations (HSI), U.S. Customs and Border Protection (CBP), U.S. Postal Inspection Service (USPIS), Federal Bureau of Investigation (FBI), Drug Enforcement Administration (DEA), U.S. Secret Service (USSS); Canada's Royal Canadian Mounted Police. Paul Bernardo's day-parole hearing scheduled for March
Notorious killer Paul Bernardo is scheduled for a day-parole hearing next March. The lawyer for the families of Bernardo's murder victims, 14-year-old Leslie Mahaffy and 15-year-old Kristen French, says he believes Bernardo will never get parole. Tim Danson says there have been many dates set for day-parole hearings, but all of them have been adjourned. Nonetheless, Danson says the process has "gutted" the families of his victims, but he believes Bernardo will die in prison. Canadian Press (CBC News); iNews880; CHCH News; Agence QMI (TVA Nouvelles); La Presse Canadienne (Le Devoir)

Man convicted in Cole Harbour home invasion hauled back to prison
A man serving a 12-year sentence for his part in a deadly home invasion has had his statutory release privileges revoked for a second time by the Parole Board of Canada. Joseph Charles Dawson was sentenced in 2005 for robbery and manslaughter related to a home invasion in Cole Harbour a year before where John Wyllie was stabbed to death. Dawson's accomplice, William Ray Best, was sentenced to life in prison for second-degree murder in Wyllie's death. Dawson was let out on statutory release in April. He was brought back to prison in July after he failed to return to a halfway house before his curfew. When police found him, he was drunk and tried to escape by running away. In a decision released this week, the Parole Board of Canada explained why Dawson was returned to prison. "The board is of the opinion that by your own actions you have aggravated your risk of reoffending to a level where you cannot be safely managed in the community and that the circumstances surrounding this suspension were within your control," the decision says. CBC News

Lessons Learned From 1,500 Days in Isolation
An opinion piece states, "Twenty-three hours a day for 1,500 days. That's how long Adam Capay, a 23-year-old indigenous man, had been held in solitary confinement, bringing Canada's abusive practice of isolating prisoners for prolonged periods of time into the spotlight again. A recent visit by the Ontario Human Rights Commission to a provincial jail in northwestern Ontario revealed that Capay has spent four years confined to a basement cell, alone under the glare of 24-hour artificial light. The length and conditions of this young man's confinement are abhorrent. Indefinite solitary confinement is cruel, inhuman and degrading treatment and can even amount to torture under international law. What is puzzling though is why, despite a public inquest, a Commission of Inquiry, and demands for accountability following suicides in solitary cells, has nothing changed? How have successive governments squared this

inherently cruel and inhuman treatment of prisoners with their professed respect for basic human rights?" Human Rights Watch

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

We Asked Experts How to Solve Canada's Opioid Crisis
Canada is reeling from the opioid crisis. It's a complex issue that has developed into epidemic proportions in past years, leading to a troubling increase in drug-related deaths. It's not a situation that will be easy to get out of. But if you're reading this article, you probably already knew that. When OxyContin was pulled from pharmacy shelves in Canada in 2012 and replaced with a "safer" alternative, the result was far more deadly than anyone could have predicted. Fentanyl, an opioid many times stronger than heroin and morphine, appeared on the black market when the illicit drug market saw an opening. While the drug is available as a prescription, much of what appeared on the streets was a bootleg version. As fentanyl continues to flow into Canadian cities, it has already killed thousands. We don't have a complete picture, but here's what we do know from a couple of provinces that have been hit hardest by the worst drug safety crisis in Canadian history. So far in 2016, British Columbia has reported a record 555 drug overdose deaths, up from 508 from all of last year. In Alberta, the number of fentanyl-related deaths hit 153 at the end of June. And the year is not over yet. Unfortunately, as you're reading this, the death toll has already increased. The federal government has called a national opiate summit in Ottawa on November 18 and 19, but ahead of that, we wanted to allow some of those who have ideas for solutions to speak. Because the opioid crisis is a complicated, multi-faceted problem, we asked people from a variety of disciplines to voice their recommendations. VICE News

Other opioids responsible for more Edmonton deaths than fentanyl
Fentanyl is not the biggest killer for opioid users in Edmonton. New numbers in the government's Opioids and Substances of Misuse Alberta Report show more people in the city are fatally overdosing on other types of opioids. While 52 people fatally overdosed on fentanyl in Edmonton from January through September this year, 63 fatally overdosed on opioids other than fentanyl. Metro News

Tiny Alberta-made sensor may open door to hand-held drug tests
A woman is at a party and realizes someone may have slipped something into her drink. Even if she tosses it, her uncertainty and worry remain. She wonders: Has someone tried to drug me? In the future, it may be possible to get an answer by discreetly dabbing a few drops onto a smartphone and getting an on-the-spot chemical readout of what's in the drink. A portable but sensitive device for performing such tests could be realized with the help of a tiny magnetic sensor developed by a team of Alberta-based researchers. "At this moment we're far from actually doing that, but there aren't any physical reasons why that won't work," said Mark Freeman, a University of Alberta physicist who has worked out the technology that underlies the idea. In 2008, Dr. Freeman and his team developed a tiny magnetic sensing device, called a torque magnetometer, on a piece of silicon chip that is smaller than the diameter of a strand of human hair. The device features a tiny spatula-shaped arm suspended on a narrow band of material that twists ever so slightly when the arm is pulled up or down by a magnetic field. Globe and Mail

Officer pleads guilty over online remarks following death of indigenous artist
An Ottawa police officer has pleaded guilty to two Police Services Act charges in connection with online comments about the death of Inuk artist Annie Pootoogook. Sgt. Chris Hrnchiar was charged with two counts of discreditable conduct under the act. Pootoogook's body was found in the Rideau River on Sept. 19 — a death that police did not at first treat as suspicious. Several days later, racially charged comments on Facebook suggested Pootoogook's death ought not to be linked to the phonomenon of missing and

murdered indigenous women across Canada. The online remarks sparked outrage in Canada's indigenous community and elsewhere. Ottawa police Chief Charles Bordeleau called the comments inappropriate, saying they had racial undertones and didn't reflect the values of the service. Canadian Press (570 News)

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Legal cannabis could be federal cash cow, Parliamentary Budget Officer says
Legalizing marijuana may not provide a major cash boost for governments right out of the gate, but it could generate more tax revenue as consumers move from the illicit to legal market, says Canada's Parliamentary Budget Officer. In a report released today studying the fiscal considerations of legalizing marijuana, the PBO Jean-Denis Fréchette suggests initial revenue for governments from taxation could be in the hundreds of millions of dollars, rather than billions. The report also suggests that 60 per cent of revenues would go to provincial governments, with the remainder going to the federal government. The report also warns that there will be little room to tax legalized marijuana without pushing the legalized price of marijuana much higher than the illegal price. Too high a price could encourage consumers to turn back to illegal sources. CBC News; Radio-Canada; Canadian Press (Castanet)

D'ex-militaires et fonctionnaires LGBTQ veulent poursuivre le gouvernement
D'anciens fonctionnaires et militaires qui disent avoir été intimidés et limogés à cause de leur orientation sexuelle ont déposé une requête pour intenter une action collective contre le gouvernement fédéral. Doug Elliott, un avocat torontois, a indiqué que ces gais et lesbiennes ont attendu assez longtemps dans l'espoir d'obtenir une entente négociée, et qu'il est maintenant temps de passer de la parole aux actes. Les libéraux de Justin Trudeau avaient promis de présenter les excuses officielles du gouvernement canadien à tous les membres de la communauté LGBTQ qui auraient été victimes de discrimination au sein de la fonction publique. On ignore cependant si ces excuses seront accompagnées d'indemnisations. Presse canadienne (La Presse); CTV News

LGBT ex-public servants suing Ottawa for $600 million
Former federal civil servants and members of the military who lost their jobs because of their sexual orientation have launched a $600 million class-action lawsuit against the Government of Canada. Doug Elliott, a lawyer with Cambridge LLP in Toronto whose client is a plaintiff in the case, announced the lawsuit Tuesday morning on Parliament Hill, saying statements of claim have been filed in Montreal and Toronto. The statement of claim filed in Ontario Superior Court says the plaintiffs are seeking general and aggravated damages of $500 million, and punitive and exemplary damages of $100 million. Elliott said the damage claim in Quebec does not specify an amount but said it would probably be "proportionate" to the Ontario claim. The practice of dismissing gay and lesbian public servants — what has come to be known as the "LGBT Purge" — began in the 1950s and continued for decades. iPolitics; CBC News

Phoenix by the numbers: Keeping track of the costs, staffing and backlog of cases
It's been 15 weeks since the federal government first gave the public a sense of the scope of the Phoenix payroll system problem. Back on July 18, the government revealed some 82,000 public servants had reported trouble with their pay, with the majority being underpaid. Others were overpaid or not paid at all. Since then, the government has been providing updates every two weeks and a steady stream of numbers to show their progress. Here, we break down some of the essential figures we've learned over the past few months. Russia presents a growing cyber threat, according to UK spy chief
Russia is pushing its foreign policy in increasingly aggressive ways including cyber-attacks and espionage, posing a growing threat to Britain and the rest of Europe, the head of Britain's internal intelligence agency MI5 has said. The Kremlin dismissed the allegations as untrue and challenged its critics to produce evidence. MI5 Director General Andrew Parker said Russia had been a covert threat for decades, but what differed now from the Cold War era was that there were more and more methods available for it to pursue its anti-Western agenda. Reuters (Globe and Mail)

Photos show pain and jubilation as Iraqi forces parry ISIL car bombs, penetrate outer edge of Mosul
Iraqi commanders on Tuesday said they were fighting inside an industrial district on the outer edge of Mosul, making their first breach into the city that has been under Islamic State control for nearly two and a half years. Soldiers from Iraq's elite counterterrorism force said they had entered the neighborhood of Gogjali on Tuesday morning. From the village of Bazwaya, just four miles to the east, jets circled overhead and explosions could be heard from the front lines. "Right now I'm in the middle of Gogjali," said Lt. Gen. Abdelwahab al-Saedi, a commander with the counterterrorism forces, speaking by phone. "We are dealing with pockets of resistance and booby traps." The elite Iraqi troops are making a sharp push into the city from the east, but other forces on other fronts remain farther away, exposing advancing troops to attack from their flanks as they press forward. Washington Post (Leader-Post)

Female Jihadis Give ISIS New Avenues for Attacks
It was early on a Sunday morning in September when French police discovered a Peugeot parked near the Notre Dame Cathedral in Paris with its hazard lights flashing and its license plates removed. The car carried seven gas cylinders, six of them full, and three cans of diesel. The perpetrators had perhaps intended to blow it up with a lit cigarette and a fuel-soaked blanket, but the vehicle failed to detonate. Three weeks after that failed plot, police arrested two teenage suspects accused of planning a violent attack in Nice, the details of which haven't been made public. At the center of both plots: women allegedly inspired or directed by the Islamic State militant group. All had been in contact with a prominent French recruiter for ISIS, Rachid Kassim, who is believed to be in Syria. Roughly a year after the ISIS attacks in Paris that killed 130, France remains in a state of emergency, thanks in part to later assaults inspired by the militant group in Nice and the northern town of Rouen. Now, however, a new threat is emerging: women who want to wage violent jihad just like men. Newsweek (2016-10-31)

La famille Shafia n'aura pas de nouveau procès

Mohamed Shafia, son épouse Tooba Yahya et leur fils Hamed n'auront pas droit à un nouveau procès comme ils le réclamaient : la Cour d'appel de l'Ontario a en effet rejeté leur demande, mercredi midi, à Toronto. Rappelons que la justice avait condamné les trois membres de la famille Shafia à la prison à vie, sans possibilité de libération avant 25 ans, pour les meurtres des trois filles du couple et de la deuxième épouse de Mohamed Shafia. Les Shafia souhaitaient qu'un nouveau procès ait lieu. Ils prétendaient avoir été victimes d'erreurs judiciaires et de stéréotypes culturels lors du premier procès tenu à Kingston, en 2012. Le fils, Hamed tentait aussi de convaincre la justice qu'il était mineur au moment des faits qui leur sont reprochés. Radio-Canada ; CBC News

Windsor, Tecumseh flood causes $108M in insurance claims
The heavy rain and flooding that rocked Windsor and Tecumseh, Ont. caused nearly $108-million in insured damages, the Insurance Board of Canada reports. Residents filed nearly 6,000 home, auto and business claims in the five weeks since the flooding struck Sept. 29. The Insurance Board of Canada represents Canada's private home, auto and business insurers. It reports the values of insurance claims following major storms and natural disasters. CBC News; Canadian Underwriter; Windsor Star

Windsor flood victims still waiting on insurance
Several people in Windsor-Essex are still waiting for insurance claims to clear, nearly five weeks since hundreds of homes in the area were devastated by flooding. David Norwood of Tecumseh describes the process as "very frustrating." He still doesn't know how much money he's getting back. "I think we're covered," he said. "I think we're covered appropriately, but because we haven't seen the end result, we're still kind of waiting." CBC News

Canada not prepared for climate change, warns report
A broad survey of most of Canada has found that the country is not well prepared for the effects of climate change, with flooding of particular concern. The report was prepared by Waterloo's Intact Centre on Climate Adaptation which was set up and is partially funded by a leading property and casualty insurance company. Climate change is expected to bring more fire storms, hail, high winds and floods. "No area of the country is immune from flooding," says Blair Feltmate, head of the centre and author of the report. "Floods are occurring now that used to occur once in 100 years. Now, we're getting two or three of those types of floods perhaps in a 10-year period." Flooding in various parts of Canada have already been expensive for the insurance industry. Catastrophic flooding in the province of Alberta in 2013 alone cost it $1.7 billion in paid claims. Radio-Canada International

Alberta gets C+ grade in national flood readiness report
A new report looking at climate change and how well jurisdictions across Canada are prepared for future flooding says Alberta needs to do a lot better. The University of Waterloo report graded all of Canada's provinces and Yukon in 12 key areas, using data gathered in surveys participated in by provincial ministries, departments and agencies. The report gives Alberta a C-plus grade, with the average national score being a C-minus. CBC News

Forest fire season in northwestern Ontario officially over, season report released
Although there were fewer forest fires in 2016 across Ontario than the ten-year provincial average, fire fighters were kept busy with challenging blazes this season, according to the year end report from the Aviation, Forest Fire and Emergency Services (AFFES). The report said that AFFES recorded 636 fires with 83,009.5 hectares burned, compared to last season which saw 667 fires and 39,311 hectares burned. The report cites both human-caused fires that needed aggressive ground and air attack to contain, as well as fires caused by lightning, Nipigon District Fire 12, which forced an evacuation in Geraldton, Ont., and Kenora District Fire 18 were two of the most severe in the northwestern region. CBC News

Coast Guard, CFB Trenton conduct training exercise
The crew from the Canadian Coast Guard ship Cape Mercy was on Lake Ontario about six kilometres

south of Cobourg on Monday practising with members of CFB Trenton. It was the first time the ship has been involved in training with a Globemaster aircraft from 429 Squadron at the base. Canada has five Globemasters which can provide rapid delivery of troops and cargo transport to oversized combat equipment from coast to coast and to anywhere else worldwide. They have a maximum range of approximately 5,500 nautical miles and can carry a payload of up to 160,000 pounds. The Globemaster did two low fly passes over the Cape Mercy, first at 1,000 feet, then at 500 feet. Northumberland Today (2016-11-01)

Radicalisation sur Internet : quelle est la responsabilité des fournisseurs?
L'Internet et les réseaux sociaux comme agents de radicalisation des jeunes ont été au cœur des discussions dans le cadre de la conférence Québec-Unesco *Internet et la radicalisation des jeunes : prévenir, agir et vivre ensemble*. Que ce soit par la diffusion de discours haineux ou le recrutement sur les réseaux sociaux, plusieurs se questionnent sur la nécessiter de restreindre l'accès à certains contenus. Devant ce nouvel enjeu numérique, quel est le rôle des fournisseurs? Voici l'avis de trois intervenants présents à Québec. Ross LaJeunesse, responsable mondial de la liberté d'expression et des relations internationales, Google Inc. Google interdit certains sites Internet lorsque la réglementation d'un pays l'exige. Toutefois, ce n'est pas l'approche privilégiée par la multinationale pour faire taire les discours haineux. Ross LaJeunesse, qui représentait Google lors de la conférence, explique que le moteur de recherche mise plutôt sur le contre-discours. « Lorsqu'un internaute écrit un mot clé qui nous indique qu'il recherche un contenu radical, nous lui présentons une publicité dont le contenu contredit ce qu'il recherche [traduction] », explique-t-il. Radio-Canada

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

14 travailleurs étrangers arrêtés à Victoriaville
En vertu de la Loi sur l'immigration et la protection des réfugiés (LIPR), des agents de l'Association des services frontaliers du Canada (ASFC) ont procédé, mercredi dernier (26 octobre), à l'arrestation de 14 travailleurs non autorisés lors d'une opération. Au total, une vingtaine d'agents de l'ASFC, assistés de policiers de la Gendarmerie royale du Canada (GRC) et de la Sûreté du Québec (SQ) ont effectué une perquisition dans une agence de placement de Victoriaville. «Cette opération s'inscrivait dans le cadre d'une enquête sur l'embauche de travailleurs non autorisés. Les 14 personnes arrêtées font l'objet de mesures administratives», a indiqué Dominique McNeely, conseiller en communication, région de Québec, à l'Agence des services frontaliers du Canada. L'ASFC a, de plus, mené, le même jour dans le secteur de Victoriaville, une opération de contrôle des travailleurs. (…) Une opération, comme celle de la semaine dernière, n'est pas monnaie courante à Victoriaville. «Ce sont des opérations plutôt périodiques, a précisé M. McNeely. Mais l'ASFC effectue régulièrement des opérations du genre partout au Québec dans des secteurs comme l'agriculture et autres.» La Nouvelle

De jeunes Québécois auraient piraté des guichets aux États-Unis
Un groupe d'étudiants québécois aurait cloné des centaines de cartes bancaires canadiennes, puis effectué plusieurs retraits d'argent massifs dans des guichets automatiques aux États-Unis, rapporte *La Presse*. Leur manière de procéder était ingénieuse, explique le quotidien. Pour contourner les mesures de sécurité en vigueur au Canada depuis l'arrivée des cartes à puces, ils auraient eu l'idée de copier des centaines de cartes sur support magnétique au pays pour ensuite organiser des voyages éclairs de l'autre côté de la frontière. Une fois sur place, ils auraient introduit ces fausses cartes dans des

guichets automatiques locaux, qui utilisent encore la technologie de la bande magnétique, et procédé à de nombreux retraits d'argent sous la forme d'avances de fonds. Les jeunes Québécois se seraient ensuite parfois rendus dans des agences de transfert de fonds électronique, d'où ils auraient envoyé cet argent à des amis. C'est l'Agence des services frontaliers du Canada (ASFC) qui a mis la puce à l'oreille des enquêteurs américains le 29 mars dernier, indique *La Presse*. Ce jour-là, les douaniers canadiens ont fouillé le véhicule de deux Lavallois de 21 ans, Mathieu Baaklini et Ghassan Mitri, qui revenaient au pays après un séjour d'une heure et demie dans le Vermont. Conseiller

Crown seeks prison term for LaSalle mother convicted of gun smuggling
A LaSalle mother convicted of smuggling guns across the border into Canada will learn her fate January 20th. Michelle Downey was convicted of 22 criminal and Customs Act charges in August for attempting to smuggle three loaded, nine-millimetre handguns into Canada. At her sentencing hearing Wednesday, the Crown asked the judge to impose a prison sentence of three to four years. Windsor Star

Rights group urges Canada to protect migrant workers
A caregiver rights advocacy group has asked the Canadian government to give due consideration to the plight of migrant workers in its planned restructuring of the Temporary Foreign Worker Program by year's end. While a House of Commons committee had outlined its recommendations to Ottawa in September for the proposed TFWP revision, Toronto-based Caregivers' Action Center believes migrant workers and their advocates were given insufficient chance to air their side in the review process. The review, led by the Standing Committee on Human Resources, Skills and Social Development and the Status of Persons with Disabilities (HUMA), was held from May to June and heard from 50 witnesses from different sectors. HUMA presented 21 recommendations to the government of Canada touching on staffing caps, permanent residency, reduced processing times, better rights training, emphasis on local Canadian workers, the needs of seasonal industries, among others. Global Nation Inquirer

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

As CIA shifts gears in response to cyber threats, critics call for good old-fashioned spywork
When America goes to the polls on Nov. 8, according to current and former U.S. intelligence officials, it will likely experience the culmination of a new form of information war. A months-long campaign backed by the Russian government to undermine the credibility of the U.S. presidential election — through hacking, cyberattacks and disinformation campaigns — is likely to peak on voting day, the officials said. Russian officials deny any such effort. But current and former U.S. officials warn that hackers could post fictional evidence online of widespread voter fraud, slow the internet to a crawl through cyber attacks and release a final tranche of hacked emails, including some that could be doctored (...)John Brennan, the current CIA director, declined to comment on the Russian efforts. But he said Russian intelligence operatives have a long history of marrying traditional espionage with advances in technology. More broadly, Brennan said, the digital age creates enormous opportunities for espionage. But it also creates vulnerabilities. Reuters (CBC News)

It's Time To Address The Cybersecurity Gender Gap Before It's Too Late
It's well known that women are underrepresented in technology roles. While women make up 47% of the workforce, only 34% of tech industry professionals are women. Within the cybersecurity sector, the numbers are even worse. Only 10% of IT security workers are women, contributing to a projected 1.5 million unfilled positions within the industry by 2020. While it's unfeasible to completely close the cybersecurity gender gap within three years, this should serve as a wake-up call for educators and employers to more seriously address the dearth of women in cybersecurity and technology more broadly. Dark Reading

How Anonymous and Other Hacktivists Fight ISIS Online
Ever since ISIS started its advance in Syria and Iraq, taking control of large swaths of land, the group distinguished itself from previous terrorists groups for its unprecedented reliance on the internet for propaganda, recruitment, and even some low-level hacking. After tragic ISIS-inspired attacks in Europe, and seeing that ISIS was using the internet as another battleground of sorts, the hacktivists group

Anonymous declared war on the islamic terrorists in 2014. Since then, hacktivists claiming to be part of Anonymous have flagged alleged ISIS social media accounts and targeted pro-ISIS websites. Splinter groups such as GhostSec and CtrlSec have also gone after ISIS online, claiming to pass information to authorities, and boasting of having disrupted recruitment efforts and even one real-world terrorist attack. At the same time, factions within Anonymous, whose contours are by definition hard to define, have condemned the hacktivists' collaboration with the authorities. Some within the government, or former government employees, have embraced their activities. Motherboard

LAW ENFORCEMENT / APPLICATION DE LA LOI

Police seize thousands of fentanyl pills in Calgary
Close to 4,000 fentanyl pills have been seized in Calgary. Members of Alberta Law Enforcement Response Teams (ALERT), along with members of the Calgary and Lethbridge police services and the RCMP, seized 943 fentanyl pills on Oct. 26 and 2,771 pills on Oct. 28. The second seizure took place in the Killarney neighbourhood, where police found the pills in a vehicle and 23 grams of cocaine in a home. Police investigated the home based on information from an Oct. 20 arrest in Aldersyde, in which two Lethbridge men were arrested after allegedly picking up 584 fentanyl pills from the Calgary area. Sofonyas Fkade, 24, and Bereketab Gedecho, 30, were arrested. Fkade has been charged with possession for the purpose of trafficking, production of a controlled substance and possession of property obtained by crime. Gedecho has been charged with possession for the purpose of trafficking and production of a controlled substance. The first arrest on Oct. 26 took place in the Hillhurst area. In addition to the fentanyl pills, officers seized $6,000 in cash proceeds of crime. Cody Bryant, 22, was arrested. He is facing charges including possession for the purpose of trafficking, possession of controlled substances and possession of property obtained by crime. Calgary Herald

Police Agencies Want an Easier Time Serving Warrants to ISPs
For pretty much any crime involving the internet, often the first step in an investigation is trying to figure out who is behind an IP address. But, according to the FBI and other law enforcement agencies, there is a problem: often it's unclear which organisations are actually in a position to respond to legal orders for information, because of the way that IP addresses are distributed by internet service providers (ISPs). In the most innocuous cases, this problem can just be a waste of time, but in others it can present an urgent dilemma, FBI Supervisory Special Agent Robert Flaim told Motherboard in a phone call. According to a presentation from Flaim and other staff from the DEA and the Royal Canadian Mounted Police (RCMP), one case involved the online sexual extortion of a young girl. Because the WHOIS information was inaccurate, it took three months before law enforcement found the right ISP, all the while the girl was continually victimised. (…) So the FBI, DEA and RCMP have proposed a solution: each time an ISP sub-allocates some addresses, that is recorded in the WHOIS. This way, agencies won't have to go asking around trying to find the ISP that just happens to have this data. They can just go to whoever is actually handling the respective IP address. Motherboard

RCMP seek help in Mill Cove vehicle fire investigation
RCMP is investigating an early morning vehicle fire which occurred in Mill Cove Tuesday. Shortly after midnight officers and the Hubbards Volunteer Fire Department responded to the fire along Highway 329 and extinguished the blaze which was behind a residence. The neighbouring property received no damage but the vehicle was destroyed. Lunenburg District RCMP said in a release the home owner heard a noise and when he looked outside, he saw his vehicle in flames with three people standing nearby. The three suspects fled on foot when the owner ran outside. Chronicle Herald

Red Deer runner and police get their man
A champion cross-country runner teamed up with a police officer for a 30-minute chase to bring down a bike thief last Thursday. Red Deer resident Devin Woodland said he recognized his wife's distinct mountain bike while he was out for a run Thursday morning. A man who was likely homeless had it outside the downtown McDonald's and rode off on it after Woodland asked him to give it back. That's when Woodland, the 2012 Alberta Colllege Athletic Conference provincial champion, gave chase on foot and called the RCMP. "He started off really fast and was going through a bunch of back alleys. Then he

thought he lost me, but that didn't last too long," said Woodland, 25, on Tuesday. The chase took him mostly down walking trails and through parks around the downtown. All the while, Woodland was on the phone with RCMP Const. Trevor Naldrett who was tracking the chase in a police vehicle. Red Deer Advocate

Property crime a challenge
The head of the Vernon/North Okanagan RCMP detachment won't be asking city council to fund more police officers in the coming year despite a big jump in calls for service. The detachment received just under 29,000 calls for service in 2015, but requests have increased approximately four per cent so far this year, said Supt. Jim McNamara in an interview with Castanet. MacNamara blamed much of the hike on increased property crime. "Property crime is our biggest challenge," he acknowledged. "We're in the midst of a pilot project where we've started an enhanced day shift to try to better respond to the increase in calls...so far it is working quite well." Just last week, the City of Vernon's crime prevention officer issued yet another plea to Vernon residents to lock vehicle doors and keep garage doors closed after a series of thefts from vehicles in certain neighbourhoods. Castanet

Former Oshawa politician Robert Lutczyk, jailed for kidnapping and weapons offences, denied parole
A bid for release by Robert Lutczyk, the former Oshawa councillor convicted last year of kidnapping and weapons offences, has been denied by the Parole Board of Canada. The board rejected Lutczyk's applications for both day and full parole following a video conference at Warkworth Penitentiary on Monday, Oct. 31. Lutczyk pleaded guilty last December and was sentenced in February to eight years and four months in federal custody. In a written decision released following the hearing, parole board members cited what they perceive as a failure on Lutczyk's part to take responsibility for his offences and the effect they had. In a written decision released following the hearing, parole board members cited what they perceive as a failure on Lutczyk's part to take responsibility for his offences and the effect they had. The Correctional Service of Canada, which is responsible for federal prisons, recommended Lutczyk's parole application be denied, citing his lack of accountability for his crimes. CSC also questioned the feasibility of Lutczyk's release plan, which was based on residency at a halfway house or with relatives. Oshawa This Week (DurhamRegion.com)

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Missing and Murdered: Canada's Lost Indigenous Daughters
An opinion piece states, "Canada's aboriginal population is just over 1.4 million, making up just 4 percent of the populace. Despite the tiny ratio, more than half of the sex trafficking victims in Canada are indigenous. For over three decades, more than 1000 indigenous people have gone missing or have been murdered, according to the Royal Canadian Mounted Police (RCMP). However, civil rights organization believe the number is many time higher, probably closer to 4000. The reasons for the disproportionately huge number of indigenous women that have become victims of sex trafficking are wide and varied, but they all ultimately point to a history of racism, poverty and abuse. "If you're not beat up, then you would get raped by a few of them at once," said a victim."There is a debt bondage that's between $1,000 and $2,000 a day that these girls must bring, must hand in to their trafficker or else," explained Diane Redsky, an advocate for indigenous women and children. Additionally, there have been concerns about the use of excessive force in the RCMP dealing with indigenous people and a broken relationship with their communities. Danny Smyth, Winnipeg's deputy police chief, stated in the past a legacy of bias and racism prevented police officers from understanding the risks to indigenous girls, but he said they were taking steps to address it." Carbonated TV

Canada's Trudeau Should Step Up Efforts to Protect Indigenous Women's Rights
Canada's Prime Minister Justin Trudeau should back up his feminist rhetoric with concrete action on women's rights – particularly when it comes to protecting indigenous women and girls from police violence, according to the statement of Human Rights Watch. Canada's Prime Minister Justin Trudeau must do more to deliver on the promises he made last year to protect indigenous women, specifically from police violence, a rights advocacy group said Wednesday. This Friday marks a year since Trudeau, a self-proclaimed feminist, took the office and launched an inquiry into the missing and murdered First Nation women. "But after a year in office, Trudeau's critics are beginning to question whether he is backing up his feminist rhetoric with concrete action on women's rights – particularly when it comes to protecting indigenous women and girls from police violence," Human Rights Watch stressed. An investigation by the HRW in northern British Columbia found that police officers had been using excessive force and sexual violence against indigenous women and girls. It said First Nation women were also overrepresented among homicide victims and their distrust of police left them in a near constant state of insecurity. Sputnik News

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Marijuana : des entreprises du N.-B. se préparent à la légalisation
Des entrepreneurs du Nouveau-Brunswick contemplent sérieusement la possibilité de se lancer dans la production de produits comestibles au cannabis dans un contexte de légalisation. Les ventes de marijuana à usage récréatif pourraient atteindre de 5 à 10 milliards de dollars annuellement au Canada, selon les projections de la CIBC. Ginette Ahier, copropriétaire d'Adorable Chocolat à Shediac, fait beaucoup de recherche ces jours-ci sur l'industrie de la marijuana à usage récréatif. Elle croit que le potentiel pourrait être très important pour les entreprises qui décident de saisir l'occasion. Elle s'inspire de l'expérience américaine. Au Colorado, par exemple, les ventes de produits comestibles à base de cannabis ont dépassé celles des produits à fumer du côté récréatif. « Moi, quand j'ai vu des chiffres l'année passée que 27 % des produits marijuana comestibles vendus au États-Unis étaient des palettes de chocolat, c'est sur qu'il y a une lumière qui s'est allumée », explique Ginette Ahier. Radio-Canada

Should Coors Be Concerned You'll Choose Cannabis Instead?
Molson Coors says it is looking to Colorado for insight on the possible effects the legalization of marijuana in Canada could have on its beer sales. Stewart Glendinning, CEO of Molson Coors International, was asked by an analyst Tuesday during the company's quarterly earnings conference call for his opinion on the potential impact the legalization of marijuana could have on Canada's beer sector. "Cannabis is something we are thinking very carefully about, not only as a business but also as an industry, Glendinning, who was the former head of Molson Coors' operations in Canada, said in response. "There's just a lot we don't know at the moment...It's steady as she goes because of the lack of clarity about the deployment of the drug itself." It's not clear whether Glendinning's comments are a signal that Molson Coors views a recreational marijuana industry as a threat or opportunity. He did not elaborate and the

company did not return calls seeking clarification. But during the call, Glendinning said Molson Coors (NYSE:TAP) is looking to Colorado, the state where the recreational use of marijuana was legalized in 2013 and where the company is headquartered, for guidance. The federal government has said it plans to introduce a bill in the spring to legalize the recreational use of marijuana. Civilized (Times Colonist)

Too legit to quit: Former drug smuggler Brian O'Dea cashing in on marijuana legalization
St. John's native Brian O'Dea was one of the world's biggest drug smugglers in the 1970s and 80s. Today, after leaving the illicit pot trade behind, he's created a new career in the world of legal pot, partnering with some of the biggest names in hip hop. "I don't know if I'm using that [smuggling] experience per se, but what I do is connected to that kind of world," O'Dea told CBC News. "I have a branding company and I'm currently working with the Wu-Tang Clan, Kurupt of the Dogg Pound, Snoop's Dogg Pound, and I'm branding them in the cannabis world." O'Dea teamed up with the rappers to brand their names on cannabis products being sold legally in the U.S. Wu-Tang co-founder Ghostface Killah is marketing a concentrated marijuana called Wu Goo. Kurupt, the Dogg Pound rapper and former vice-president of Death Row Records, is selling Moonrock, one of legal pot's strongest strains. (…) Cannabis is an increasingly legitimate business in North America these days as more jurisdictions legalize marijuana. Now change is coming to Canada. Justin Trudeau promised to legalize marijuana when he was campaigning to become prime minister last year. CBC News

Trudeau urged to follow in his father's anti-nuclear footsteps and support UN disarmament treaty
Even as Foreign Minister Stéphane Dion called a recently announced nuclear disarmament negotiation "more symbolic than real" Tuesday, experts were urging Prime Minister Justin Trudeau to step up and make Canada a bigger part of the movement to ban nuclear weapons — just like his father did during the Cold War. Last week, 123 countries voted in a UN committee to begin negotiations on a nuclear disarmament treaty next year. Canada was among more than 30 countries that voted against, including major nuclear powers and most members of NATO. The vote will be confirmed at the general assembly in December, where Canada could, but isn't likely to, change its vote. Postmedia (National Post)

Military college under microscope over suicide, sexual misconduct reports
Senior Canadian Armed Forces commanders have ordered a complete review of the Royal Military College of Canada following a number of suspected suicides and allegations of sexual misconduct at the prestigious institution in Kingston, Ont. The rare move highlights the growing concern among top brass about the way the 140-year-old college — where future generations of military officers are groomed — is being run. "It's unusual," Vice-Admiral Mark Norman, the military's second-highest-ranking officer, acknowledged in an interview earlier this week. "But with that unusualness comes an indication of how seriously the chief of defence staff and the entire senior leadership are taking this issue." (…) Norman described the college as a "national institution," and said closing it is not an option. However, he said the top brass is prepared to do whatever is necessary to ensure it lives up to its promise and responsibility to both the cadets and Canadian Armed Forces. iPolitics

U.S. militia girds for trouble as presidential election nears
Down a Georgia country road, camouflaged members of the Three Percent Security Force have mobilized for rifle practice, hand-to-hand combat training -- and an impromptu campaign rally for Republican presidential candidate Donald Trump. "How many people are voting for Trump? Ooh-rah!" asks Chris Hill, a paralegal who goes by the code name "Bloodagent." "Ooh-rah!" shout a dozen militia members in response, as morning sunlight sifted through the trees last weekend. Reuters

Indonesian ISIS sympathisers expected at Anti-Ahok rally on Nov 4
Indonesian police are expecting local sympathisers of the Islamic State in Iraq and Syria (ISIS) to join thousands of Muslim hardliners at a protest against Jakarta Governor Basuki Tjahaja Purnama later this week. National Police Chief Tito Karnavian, who was speaking on the sidelines of the World Peace Forum on Wednesday (Nov 2), said the police has information of ISIS supporters from domestic extremist groups planning to join the rally on November 4. "But the question is whether they are going to commit any violence," he added. Strait Times

MINISTER / MINISTRE

Goodale says CSIS 'taking steps' to comply after court rules it broke law
The New Democrats are calling for "strong, new oversight" of the Canada's spy agency in the wake of a court decision that has found that the organization illegally kept electronic data about people for 10 years. In a news conference on Parliament Hill on Friday, NDP justice critic Murray Rankin called the judgment "very disturbing" and said it reveals "gross abuse of power by Canada's spy agency." (…) Speaking to reporters on Friday about the ruling, **Public Safety Minister Ralph Goodale** said he is taking ***"very***

seriously" the finding that ***"CSIS had failed in its duty to be candid" with the court. "(CSIS) has confirmed to me that it is taking immediate steps to address the court's decision,"*** **Goodale** said. ***"It has blocked all access to, and analysis of, any associated data while it considers its next steps to comply."*** **Goodale** also said he is asking the Security Intelligence Review Committee (SIRC) to "monitor the situation carefully to ensure compliance." SIRC is an independent review body that reports to Parliament on CSIS operations. In a ruling made public on Thursday, Justice Simon Noel said CSIS illegally held on to potentially revealing electronic data about people over a 10-year time period. The court found that the spy agency breached its responsibility to inform the court of its electronic data collection, given that the information was gathered using judicial warrants. CTV News

CSIS metadata breach: Ralph Goodale 'pursuing criticism' with spy agency management - 'I take very seriously the explicit finding ... that CSIS had failed in its duty,' public safety minister says
Public Safety Minister Ralph Goodale suggested today that there may be more fallout for the senior management of Canada's spy agency after a Federal Court decision found CSIS broke the law in failing to destroy potentially sensitive information about Canadians. ***"I take very seriously the explicit finding by [Federal Court] Justice Noel that CSIS had failed in its duty to be candid with the court,"*** he told reporters before entering question period. ***"I will be pursuing that criticism with the executive management of the service,"*** he said. ***"In matters of security and intelligence, Canadians need to have confidence that all the departments and agencies of the government of Canada are being effective at keeping Canadians safe, and equally that they are safeguarding our rights and freedoms, including privacy and the rule of law. "From the service and from the department of justice, a strong and timely remedial plan is required to reassure the Federal Court about the issue of candour,"*** he said. CBC News

Judge slams spy agency for keeping data illegally
Federal Court Justice Simon Noel sharply criticized the domestic spy agency, CSIS, for illegally keeping electronic data on people even though they posed no security threat. Noel said the intelligence service was not truthful with judges who were called on to authorize warrants for its data-collection program. (...) This is the second time in three years that a judge of the Federal Court has ruled that CSIS did not meet its "duty of candour" in applying for wiretaps. So far, no sanctions have been applied. In a similar ruling in 2013, Justice Richard Mosley wondered whether it would take a contempt of court proceeding to ensure that such decisions are taken seriously. (...) At a news conference, the director of CSIS, Michel Coulombe said the agency had stopped accessing and analysing the data, but did not say they would be destroyed. **Public Security Minister Ralph Goodale** said the court's ruling would not be appealed. He said he would discuss it with the security agency's management and that Canadians need to have confidence that all departments and agencies of the government are safeguarding rights and freedoms. Radio-Canada International

Goodale dit que la surveillance du SCRS fonctionne bien et fonctionnera mieux
Dans un jugement rendu public jeudi, la Cour fédérale a statué que le Service canadien du renseignement de sécurité (SCRS) avait manqué à son devoir d'informer le tribunal de ce programme de collecte de données, qui durait depuis 10 ans. Le juge Simon Noël estime que le SCRS aurait dû communiquer ses activités à la cour puisqu'elles ne concernaient pas directement la sécurité nationale. Le **ministre Goodale**, responsable de la Sécurité publique et de la Protection civile, a dit vendredi que le rapport du CSARS et l'intervention de la Cour fédérale sont la preuve que le SCRS est gardé à l'oeil. **M. Goodale** a ajouté que son projet de loi C-22 qui crée un comité de députés et de sénateurs pour surveiller les agences comme le SCRS et la GRC renforcera le système. Ce comité aura accès aux opérations en cours de ces agences alors que le CSARS ne peut que revenir sur le passé du SCRS. Par ailleurs, le **ministre Goodale** a dit avoir rappelé au SCRS son « devoir de franchise » avec les tribunaux. **M. Goodale** n'a pu dire combien de Canadiens ont vu des informations les concernant être stockées pendant 10 ans par le SCRS, mais c'est un nombre « excessif », selon lui. Presse canadienne (Radio-Canada), 1

Le fédéral dit avoir les espions à l'oeil
Ottawa promet d'avoir les espions canadiens à l'oeil à la suite des révélations découlant d'un jugement de la Cour fédérale rendu public jeudi. En point de presse vendredi matin au Parlement, le **ministre de la**

Sécurité publique Ralph Goodale a martelé que le Service canadien du renseignement de sécurité (SCRS) a la responsabilité de respecter la loi. «***Cela est absolument fondamental pour garantir la confiance des Canadiens»,*** a-t-il déclaré. Interrogé à savoir si des fonctionnaires seront congédiés, **M. Goodale** s'est toutefois gardé de répondre directement à la question. ***«Je discuterai avec les gestionnaires du SCRS pour savoir comment ils comptent réagir au jugement en consultation avec le ministère de la Justice»***, a-t-il offert. (…) **Ralph Goodale** dit avoir été mis au courant de «l'ampleur du problème il y a quelques semaines», après avoir reçu une version préliminaire du jugement. Le **ministre Goodale** a voulu se faire rassurant, en rappelant que le Parlement souhaite bientôt mettre sur pied un comité pour surveiller les agences de sécurité. Ce comité parlementaire doit toutefois avoir plus de dents que ne le prévoient actuellement les libéraux de Justin Trudeau, a signalé le NPD. «Je pense que les Canadiens devraient être inquiets que l'agence de sécurité nationale ait menti devant la cour. C'est extrêmement préoccupant», a souligné Matthew Dubé. «Quand les agences demandent aux élus d'avoir plus de pouvoirs, le minimum qu'ils doivent faire c'est de gagner la confiance du public, et ils l'ont perdue selon moi avec un tel comportement.» Vendredi, le **ministre Goodale** a confirmé qu'il était ouvert à modifier la loi afin de rendre légal la conservation et l'utilisation des données connexes par le SCRS. TVA Nouvelle

Surveillance de journalistes: pas d'assurances sur le passé à Ottawa
Si aucune surveillance de journalistes ne se produit ***«actuellement» au niveau fédéral, le gouvernement Trudeau n'a pas demandé ni obtenu l'assurance de la GRC et du SCRS que les corps policiers fédéraux n'ont pas mis des journalistes sous surveillance au cours des cinq dernières années. «L'enjeu, c'est que ce qui se passe maintenant»,*** a dit le **ministre fédéral de la Sécurité publique Ralph Goodale** en point de presse ce matin à la Chambre des communes. Le gouvernement Trudeau n'a pas l'intention de demander à la Gendarmerie royale du Canada (GRC) et au Service canadien du renseignement de sécurité (SCRS) si des mandats de surveillance ont été émis ou si des journalistes ont été surveillés au cours des cinq dernières années. ***« L'enjeu, c'est que ce qui se passe maintenant, et nous pouvons offrir l'assurance que ce genre d'activités ne se produit pas actuellement. En réponse à une question en point de presse ce matin, le **ministre Goodale** a précisé que cette assurance des corps policiers fédéraux comprend seulement la situation actuelle. Au Québec, la Sûreté du Québec a confirmé cette semaine avoir surveillé une demi-douzaine de journalistes au cours des dernières années, certains comme le journaliste Alain Gravel (Radio-Canada) pendant plusieurs années (2008 à 2013 dans son cas). ***«La réponse, autant de la GRC que du SCRS, est que rien de la sorte ne se produit actuellement. L'enjeu au niveau fédéral n'est pas le même qu'au Québec, dit le ministre Goodale. [...] C'est la responsabilité du directeur du SCRS de répondre aux questions opérationnelles. Vous allez sur une pente très dangereuse quand vous invitez les politiciens à aller dans ce domaine.»*** (…) Le **ministre Goodale** qualifie les ***«révélations au Québec»*** sur la surveillance de journalistes de ***« très inquiétantes »*** et a l'intention de ***«réviser [les] balises fédérales en place pour s'assurer qu'elles soient assez fortes et efficaces, et nous sommes plus qu'ouverts à recevoir les représentations et les conseils du public, des organisations journalistiques et le communauté juridique pour savoir s'il faut, le cas échéant, faire des changements à nos lois.»*** La Presse

CSIS law-breaking shows need for stronger parliamentary oversight: NDP
The NDP says revelations that Canada's lead spy agency illegally kept sensitive data for years underscores the need for stronger parliamentary oversight. The New Democrats are pushing for changes to a bill that would create a committee of parliamentarians to keep an eye on the Canadian Security Intelligence Service and other spy services. NDP MP Murray Rankin says the proposed model would allow the government to arbitrarily deny crucial information to the committee. A Federal Court judge says CSIS violated the law by keeping potentially revealing electronic data about people who posed no security threat over a 10-year period. EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

The Beast is alive - How the fire that tried to destroy Fort McMurray is still burning near the Saskatchewan border
Six months after it sent the population of Fort McMurray fleeing, the wildfire known as MWF-009 is still burning. The fire can no longer be seen visually; there is no smoke or open flames. But in a remote section of Alberta and Saskatchewan far from the city it tried to destroy, the blaze is still being carefully watched. "Just given the size, scope and complexity of the Fort McMurray wildfire, firefighters will continue to monitor the area," said Laura Stewart, Wildfire Information Officer with the Government of Alberta. Known by firefighters as the Horse River Fire, it is so named because the fire began May 1 near a small waterway known as Horse River. The fire was not an act of nature. By June, fire investigators were definitively saying that somebody who visited the Horse River trail system on the Sunday before the evacuation was responsible. However, it is not known what exactly sparked the fire. Given the searing, tinder-dry conditions on May 1 in Northern Alberta, it could have been caused by anything from a discarded cigarette to the spark from an ATV. Just two hectares in size when it was first spotted, it only

took three days to expand into 10,000 hectares and swoop into Fort McMurray. The blaze has been declared "under control" since July 4. Nevertheless, in the months since, the fire has entered a kind of hibernation that may allow it to survive the winter. The phenomenon is known as a "holdover fire." Long after the flames and smoke of a out-of-control wildfire have died down, the fire persists by smouldering underground. National Post

Les municipalités se penchent sur le transport ferroviaire de matières dangereuses
Des représentants de municipalités du Nouveau-Brunswick et du Québec rassemblés vendredi, à Edmundston, réfléchissent à la sécurité ferroviaire dans le contexte du transport de matières dangereuses. Il y a trois ans, l'explosion de wagons de pétrole à Lac-Mégantic et l'incendie qui a suivi ont causé la mort de 47 personnes. D'importants déraillements se sont aussi produits ces dernières années à Edmundston et à Plaster Rock, au Nouveau-Brunswick, mais sans faire de victime. « On s'est dit qu'il fallait rassembler les gens pour faire une journée de réflexion sur l'état de la situation, explique Luc Desjardins, maire de Petit-Rocher et président de l'Association francophone des municipalités du Nouveau-Brunswick. Premièrement, c'est une mise au point. On veut savoir où c'est rendu et où ça s'en va. C'est plutôt un partage d'informations. » Les gouvernements ont resserré les règles du transport ferroviaire depuis ces accidents, souligne Luc Desjardins. Il pourrait y avoir d'autres changements à venir, car, dit-il, des comités municipaux au pays formulent toujours des recommandations pour améliorer la sécurité. Les municipalités et les organisations des mesures d'urgence veulent aussi mieux se préparer à répondre aux besoins en cas d'accident. Radio-Canada

Frustration growing over lack of financial assistance for Sydney flood victims
People whose homes were hardest hit by flooding in Cape Breton on Thanksgiving are being told their cheques will soon be in the mail, but most say they won't be satisfied until the money is in their pockets. On Thursday, those most affected were meeting again with CBRM Mayor Cecil Clarke. Many wondering when they will start receiving more money through the province's disaster financial assistance program. "Now, we're at a critical point. A lot of people are finding that time has moved on and pressures are mounting, and costs are mounting," says CBRM Mayor Cecil Clarke."We're trying to respond jointly with the province so their assistance can flow as fast as possible." On Thursday, the Nova Scotia government said many property assessments are being finalized and payment is the next step, but it's still unclear when that will happen. "Once people know what their market value is for their home, what the value of the contents that they lost is for the home, then they can move on to really getting the individual conversations going with EMO, with the provincial government, to figure out what exactly that settlement is going to look like," says Transportation Minister Geoff MacLellan. CTV News

Cause of British Airways emergency landing at YVR still a mystery as plane returns to service - Flight diverted to Vancouver after crew and passenger became ill due to a 'strong noxious smell'
The British Airways aircraft that made an emergency landing in Vancouver last week has returned to service — even though authorities were never able to find the exact cause of the problem. Initial reports suggested smoke in the cabin, but that was never the case, according to Bill Yearwood of the Transportation Safety Board. "British Airways and Airbus have exhausted their techniques to find any clues or cause of the reported and apparent odour, [but] there is no definitive answer," he said. According to a Transport Canada incident report, flight BA286 bound from San Francisco to London was diverted to Vancouver for an emergency landing after several cabin crew members and a passenger became ill due to a "strong noxious smell" on the upper flight deck. The aircraft — an Airbus A380, the largest passenger jet in the world — was carrying 388 passengers at 25 crew. All 25 crew and one passenger were hospitalized when the plane landed, and were later released with no apparent lasting illness. The flight was initially diverted to Calgary, but then diverted again to Vancouver, where the airport is better equipped to handle an A380. CBC News

UPDATED: Hunting guide found in good health
The Bay St. George RCMP advised at 9:10 a.m. today the search for the lost hunting guide in the Jeffrey's area of has ended with a fantastic outcome. The 49 year old resident of Codroy Valley, NL., walked out of the woods and appears to be in good health. A helicopter from the 103 Search and Rescue Squadron is still en route and may assist with an extraction of the adult male. St. John's Telegram; CBC News

What Snowden Had to Say at the McGill Videoconference
Thousands of people lined up on the McGill campus Wednesday night waiting hours for a chance to be part of a videoconference with Edward Snowden. (…) We can't trust intelligence officials to respect the spirit of the law; in fact, we can't even trust them to respect the law itself, argued Snowden. Intelligence gathering programs have broken the law more than once, he reminded, often without consequences. "What we can do," he continued, "is put processes in place to ensure that we don't have to." He believes the key of these processes is an independent judicial authority able to oversee intelligence gathering operations and prosecute them when needed. "Canada actually has the weakest intelligence oversight out of any major western country." "Now they're not the most aggressive," he conceded, "they don't have the largest scale, but…. no one is really watching." The powers of the Canadian Security Intelligence Agency (CSIS) have drastically increased in the last 15 years. Law C-51, in particular, allows them to decide under any motive – however far-fetched – who constitutes a threat to national security and can thus be spied on. "The current Prime Minister did campaign to reform [C-51] and has failed to do so," reminded Snowden. The resources to oversee the CSIS, meanwhile, have decreased. The office of the Inspector General, which used to be a major part of it, was simply cut by Stephen Harper. This left the Security Intelligence Review Committee (SIRC) as the sole entity reporting to parliament on intelligence agencies. Its members are politically appointed. CSIS is not the only intelligence gathering agency. The Canadian Border Security Agency, Global Affairs Canada and the National Defense Department all have the power to infringe on the rights of people, including the right to privacy, in certain circumstances and there is no credible authority overseeing them. Retired Deputy Director of Foreign Intelligence Kurt Jensen pleaded for changing this situation in an article published last January. "Remember the old adage of who will watch the watchers? In Canada the answer is no one," he wrote. Forget the Box

Three New Scandals Show How Pervasive and Dangerous Mass Surveillance is in the West, Vindicating Snowden
An opinion piece state, 'While most eyes are focused on the presidential race between Hillary Clinton and Donald Trump, three major events prove how widespread, and dangerous, mass surveillance has become in the west. Standing alone, each event highlights exactly the severe threats which motivated Edward Snowden to blow his whistle; taken together, they constitute full-scale vindication of everything he's done. Earlier this month, a special British court that rules on secret spying activities issued an emphatic denunciation of the nation's domestic mass surveillance programs. The court found that "British security agencies have secretly and unlawfully collected massive volumes of confidential personal data, including financial information, on citizens for more than a decade." (…) On Thursday, an even more scathing condemnation of mass surveillance was issued by the Federal Court of Canada. The ruling "faulted Canada's domestic spy agency for unlawfully retaining data and for not being truthful with judges who authorize its intelligence programs." Most remarkable was that these domestic, mass surveillance

activities were not only illegal, but completely unknown to virtually the entire population in Canadian democracy, even though their scope has indescribable implications for core liberties: "the centre in question appears to be the Canadian Security Intelligence Service's equivalent of a crystal ball – a place where intelligence analysts attempt to deduce future threats by examining, and re-examining, volumes of data."" The Intercept

Laws on protecting journalists' sources not being followed, says retired justice John Gomery
The creation of a commission of inquiry into spying by Quebec police on journalists is a necessary step, but the public shouldn't expect it to solve the problem, says retired Quebec Superior Court justice John Gomery. Gomery, who led the commission of inquiry into the federal sponsorship scandal between 2004 and 2006, said such bodies are essential to help restore public confidence in the rule of law. "A public inquiry is a good way to find out what happened, but as far as developing policy for the future, I'm not sure it's the best way to go," he told CBC News. Gomery said one of the commission's useful functions will be to shed light on the role played by justices of the peace in the growing scandal. CBC News

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

End November 10 entry visas exemptions in Canada
All travelers from countries normally exempt from entry visas to Canada, as European citizens, must present from November 10 to the Canadian border police an electronic travel authorization (AVE). (…) For Immigration Minister John McCallum, the electronic travel authorization "increases the safety of Canadians by enabling us to verify the eligibility of travelers before they take their flight and to stop immediately those territory forbidden to travel to Canada. " The Canadian government, however, had difficulties in setting up the platform to issue the document electronically, requiring several months to postpone the requirement for passengers to be provided on arrival at the border. In September, Canada was again rejected this requirement, he said, "give travelers and airlines more time to prepare for the changes." According to the Department of Immigration, 2.3 million AVE have been issued since 1 August 2015 and is valid for 5 years. US citizens or passengers of a plane calling impromptu in Canada are exempt from this AVE. Silver Times

Canada issues 54% more work permits to U.S. residents in 2016 in face of heated election
Canadian work permits for highly skilled workers from the United States jumped in the first half as companies lured applicants with the country's calm political climate in the face of a raucous U.S. election. Canadian immigration data showed new work permits issued to U.S. residents jumped 53.8 per cent in the first eight months of 2016 from the same period last year, though renewals were down. (…)Separate government data also showed permits for international students looking to attend Canadian schools jumped in the first quarter to 42,737, up 42 per cent from a year earlier. In the second quarter, student permits jumped 63 per cent, to 56,329. While the government doesn't ask why students choose Canada, consulting firm Intead, which advises postsecondary institutions looking to recruit international students, warned in June that a Trump win could hit U.S. enrollment numbers. Reuters (BNN)

Second foreign student sent home after gun threat
The second international student under investigation related to an alleged gun threat at Seycove secondary has been sent back to his home country. North Vancouver school district confirmed Wednesday that his student visa had been revoked and he has flown home under the supervision of the homestay agency acting as his custodial guardian. Another student was arrested on Oct. 25 when he allegedly threatened to "bring a gun to school and do harm to a teacher." The student was sent home less than 24 hours later. Later, on Oct. 26, police recovered a gun somewhere off of school grounds. Police had requested charges of possession of a prohibited firearm and uttering threats for the second boy, although the Crown declined. "Because Crown didn't approve charges, there is no more criminal investigation happening. It will still try to be determined how the gun surfaced," said Cpl. Richard De Jong, North Vancouver RCMP spokesman. "We still have a concern, obviously as police, how a young person can have access to a gun." Police could confirm that the gun did not come from any of the homestay families. All other aspects of the investigation aren't being disclosed, De Jong said. Both students were subject to background checks by the school district as well as screening by the Canada

Border Services Agency and Citizenship and Immigration Canada, according to Deneka Michaud, North Vancouver school district spokeswoman. North Shore News

Stolen semi found stuck in slough with murder suspect inside: Saskatchewan RCMP
A 26-year-old man is now facing a second-degree murder charge after RCMP launched a suspicious death investigation in Saskatchewan. At around 4:20 a.m. CT on Wednesday, RCMP received a complaint about a semi that had been stolen from a farm yard north of Kerrobert, Sask. The complainant also provided a description of a suspect. A short time later, another complaint was received by police about a sudden death at a residence in Kerrobert. Members attended and found Johan Klassen Sr., 53, deceased. Investigators determined the death was suspicious in nature and identified a person of interest who matched the previous description given. Kindersley RCMP said they immediately began searching for the semi and quickly found it stuck in a slough northwest of Luseland, Sask. The vehicle was in approximately 1.2 metres of water, about 30 metres from shore. The man inside the semi refused to exit. RCMP immediately contained the scene to ensure public safety and the emergency response team (ERT) was deployed to the scene to assist. At around 2 p.m., the man was taken into custody without incident. Sughar Daily; CTV News; 650 CKOM; Star Phoenix

Bomb threat Romeo jailed, ordered to pay $89,100
P.E.I. man who called in a bomb threat to Walmart in Charlottetown because he wanted his girlfriend to get the day off was sentenced to 60 days in jail and ordered to pay $89,100 in restitution. Logan Richard Arsenault, 19, appeared before Chief Judge Nancy Orr in provincial court in Charlottetown Friday after previously pleading guilty to calling in the bomb threat. In handing down the sentence, Orr said we don't live in a society where that type of behaviour is considered a joke. "It's never been a joke," she said. Arsenault used a payphone in Stratford on Aug. 2 to call in the bomb threat, saying he knew people who worked at the store and they needed to get out. The store was evacuated and closed for about six hours while Charlottetown police, an RCMP explosives unit, Island EMS and firefighters responded. NG News

Man charged for gym mischief
A man has been arrested in relation to a break-in that ended in the vandalism of a local school gymnasium. The incident took place in the early morning of Aug. 29, when a man entered Lakeland Ridge School, and was caught on surveillance video pulling a fire extinguisher off the wall. He then used the extinguisher to spray down the school gym, causing what the RCMP noted as "several thousands of dollars' worth" of repairs made necessary by the damage. A suspect turned himself into police on Oct. 29. Charges are pending against the 19-year-old man, from Sherwood Park, for one count of mischief under $5,000. He is scheduled to appear in Sherwood Park Provincial Court on Wednesday, Nov. 30 at 9:30 a.m. The man's identity has not been released by Strathcona County RCMP. Sherwood Parknews

Lawrencetown man arrested after indecent act complaints
A Lawrencetown man has been arrested and charged after RCMP received complaints about a man committing indecent acts in front of children. Annapolis County District RCMP started an investigation after receiving a complaint Tuesday afternoon about a man masturbating while fully undressed in front of a window as children walked by. A second similar complaint was received at about 8:30 the next morning. Assisted by the RCMP Internet Child Exploitation Unit and RCMP Technological Crime Unit, officers executed a search warrant at a Sunvalley Street residence. They arrested Chester Terry Thibodeau and charged him with three counts of committing an indecent act. Thibodeau has been remanded into custody after appearing in Annapolis Royal Provincial Court Thursday. He is scheduled to return Nov. 14 for a bail hearing. Chronicle Herald; Metro News

RCMP investigating separate indecent act incidents
A woman was shaken up but not injured when she was grabbed while jogging in Spruce Grove Thursday afternoon. RCMP said the woman was running near the soccer field on Heatherglen Drive around 4:30 p.m. when she was approached by the male suspect. She told police he talked to her briefly before grabbing her buttocks and shoulder and touching her face. He's described as 5'10", with a medium build and dark skin. The victim said he was wearing a black Nike jacket, black pants, a black hat, and thick black sunglasses. iNews 880

Twilling ate RCMP Members Prepare Time Capsule
Members of the Twillingate RCMP detachment are creating a time capsule as they prepare to move into a new building in 2017. Constable Greg Bowie thought of the idea as a way to show future residents of the area a brief overview of the RCMP in Twillingate in 2016, as well as some information about the town that they serve. In the not too distant future the Twillingate RCMP will be ready to move from what is currently the oldest detachment in Newfoundland, to the newest. The idea of a time capsule seemed quite fitting for the occasion. Currently, the capsule will include a letter from Bowie with a brief history about himself and the other members he serves with. He plans to also include a current RCMP shoulder flash, a 2016 loonie, RCMP pin as well as newspaper clippings, both local and national from present day. They would also like to include photos or small mementos reflecting current life in Twillingate/Durrell. Bowie said the capsule is going to be very compact, as it will be packaged in a coffee can, therefore any donated items need to be small enough to fit inside. Pilot NL

Police seize drugs, handgun, cash during Sooke raid
Police seized drugs, a handgun, body armour and cash during a raid on a suspected drug house in Sooke. Sooke RCMP teamed up with the RCMP Island District General Investigation Section to execute a search warrant on a home in the 6700 block of Eustace Road in Sooke early Thursday. The raid followed a several-month investigation into drug trafficking. Police said they seized several ounces of cocaine, several pounds of psylocibin mushrooms, drug trafficking paraphernalia, a pistol and loaded magazine, a ballistic vest and more than $7,000 in cash. A 30-year-old man was arrested as a result of the investigation, and faces charges of possession of a controlled substance for the purpose of trafficking, unsafe storage of a restricted weapon, unlawful possession of body armour, and possession of prohibited weapons. The suspect remains in custody, but is expected to be released on bail. "This joint investigation has curtailed the activity of a high volume, and diversified drug trafficker who deals primarily to other dealers and users within the community of Sooke." said Staff Sgt. Jeff McArthur. Sooke News

CORRECTIONAL SERVICES / SERVICE CORRECTIONNEL

Woodville arena attacker will spend at least one more year in halfway house
The man who viciously attacked a four-year-old girl at the Woodville arena in 2010 is still considered to be a moderate to high risk of re-offending and will spend at least one more year at a halfway house, according to records obtained from the Parole Board of Canada. A recommendation for overnight leave privileges was also brought - and rejected - by the board. Tyson Leeder, now 23, pled guilty to aggravated assault, forcible confinement and invitation to sexual touching in October of 2011 after he abducted the girl from the washroom at the arena where he worked. Leeder's sentence officially ended Dec. 1, 2015, according to the Correctional Service of Canada, but on Oct. 26, 2016, the Parole Board of Canada recommended a residency condition - for the second time - on his Long Term Supervision Order for another year. The order, which started as soon as his sentence ended, will remain in place until Nov. 30, 2025. Kawartha Lakes This Week (myKawartha.com)

Calgary police support province's move towards safe consumption sites
The Calgary Police Service is putting their support firmly behind the province's decision to explore the use of supervised safe consumption sites to combat the ever-growing opioid problem in Alberta. Staff Sgt. Martin Schiavetta said CPS will act as a supporter as the sites are set up. He said it will be one service in what he hopes is a multi-faceted approach in dealing with the issue. For victims of domestic violence, aid organizations can be lifelines
Note to readers: Unless otherwise indicated, the names of the women who shared their stories of abuse for this article have been changed. As well, one of the counsellors is identified only by her first name. "On average, a woman will try to leave an abusive partner seven times before she leaves for good," Karina, a counsellor, tells the women gathered around two tables in the meeting room at Auberge Transition, one of about 20 Montreal-area shelters for women and children who are fleeing abusive relationships. Karina is leading a "café-rencontre" — a weekly session for residents of the shelter. Today, some former residents have come to the café-rencontre, too, to share their stories and offer hope to the new arrivals. Montreal Gazette

CBC adds oldest Manitoba case so far to MMIW database: 56 years later, still no answers: Flora Muskego was found frozen to death in 1960 near Norway House
Flora Muskego was found frozen to death in a snow drift near Norway House First Nation 56 years ago. Her family is still wondering what happened to the 22-year-old on Thursday, December 9, 1960. There was a small newspaper clipping from 1960 in the Winnipeg Free Press stating when Muskego was found and that she was last seen just the day before. It also said a coroner's inquest was pending on the police investigation. Muskego is buried in Norway House today. As part of continuing CBC's coverage of missing and murdered Indigenous women and girls, Muskego is the latest case to be added to its database and oldest case uncovered by CBC in the province of Manitoba. Sylvia Grier, 64, of Saskatoon remembers her aunt. "I remember how beautiful she was," said Grier, also a Norway House community member. At the young age of eight, Muskego introduced Grier to make-up. Grier remembers her aunt wearing beautiful clothes and always having nice shoes. CBC News

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Ottawa police raid pot shops across city
Ottawa police have arrested at least one person during Friday morning raids at marijuana dispensaries across the city. The raids at the Wee Medical Dispensary Society shop at 358 Rideau Street, and the Green Tree Medical Dispensary shops at 290 Montreal Road, 256 Bank Street and 352 Preston Street come following a volume of complaints about the growing number of dispensaries across the city. One person was seen being escorted out of the shop on Montreal Road by police and shuttled into a cruiser. Ottawa police tweeted that there were operations underway "at several locations in Ottawa" but refused to comment further "so as not to jeopardize ongoing investigations." The federal government has promised to introduce legislation to legalize marijuana by the spring of 2017 but possession, production and trafficking of marijuana remains illegal. CBC News; Ottawa Sun

BC doctors, police worried about uptick in deadly pot-related crashes
BC's biggest doctors' group is worried about what will happen on our roads once marijuana is legalized in Canada, pointing to a jump deadly pot-related crashes south of the border. The federal government has promised to make the move by next spring. "In Washington State, fatal crashes among drivers who tested

positive for marijuana doubled from 8 per cent in 2013 to 17 per cent in 2014. In Colorado the number of drivers in fatal crashes who tested positive for marijuana without other drugs in their system tripled between 2005 and 2014 from 3.4 per cent to 12.1 per cent," writes Chris Rumball with Doctors of BC. Rumball — an emergency room doctor in Nanaimo — calls the statistics "sobering" in an opinion piece published this week in the BC Medical Journal, calling for a "clear-headed" assessment of the impact of legalization on road safety. PUBLIC SERVICE / FONCTION PUBLIQUE

Millennials demand better treatment to join government ranks
Nicolino Frate spends his day job as a director at the Canada Revenue Agency, but on the side, this millennial is trying to make building a career in government an attractive concept to members of the digital generation. After hours, Frate and 31 fellow public servants from more than a dozen different departments across the country work on a project called Leaders GC — a monthly social media chat that hosts government executives to talk about what they do, on Twitter. "Millennials do make up a good percentage of our followers," said Frate, who is in his early 30s. "You have to show people what your environment is like so that they have an interest to actually join, and actually come in to the public service." But Frate's Twitter chats notwithstanding, governments tend to be "woefully behind" when it comes to digital transformation and turning on millennials, according to a recent report out of IBM global business services. Millennials — people between 18 and 35 — are replacing baby boomers in the workforce and after growing up digital, this new cohort has different expectations. The next generation of public service leaders is demanding certain conditions when it comes to joining the federal government workplace, according to Beth Bell, vice president of the public sector for IBM. N.Y. authorities warned of terror threat around U.S. election
Federal officials have warned New York City authorities about possible attacks by the al Qaeda militant group around Election Day, putting local law enforcement on alert the weekend before Tuesday's vote, officials said on Friday. Both the New York Police Department (NYPD) and the Port Authority of New York and New Jersey were given the information, the local agencies said. "We are continuing with the high level of patrols at all of our facilities that we have had in place for some time now," said spokesman Steve Coleman of the Port Authority, which operates airports, tunnels and bridges around the New York City area. He declined to offer specifics of the warning. The NYPD said the threat report lacked specifics and was still being assessed. "We are aware of the information. We have been working with the FBI through the Joint Terrorism Task Force and our Counterterrorism and Intelligence Bureaus," the NYPD said. Reuters

Sanglant attentat en Turquie après l'arrestation de 12 députés prokurdes
Le premier ministre turc, Binali Yildirim, a précisé qu'un séparatiste du Parti des travailleurs du Kurdistan (PKK) était au nombre des tués. L'attaque a été imputée au PKK, classé organisation terroriste par le gouvernement turc, mais aussi par les États-Unis et l'Union européenne. L'explosion s'est produite dans le quartier de Baglar, près d'un commissariat de police où sont gardés à vue plusieurs des élus du HDP arrêtés la veille dans le cadre d'une enquête antiterroriste, a-t-on appris de sources proches de la sécurité. Au total, douze députés du HDP ont été arrêtés, suscitant la préoccupation de l'Union européenne déjà inquiète de l'évolution de la société turque depuis le coup d'État manqué du 15 juillet dernier. Les autorités turques, qui leur reprochent d'avoir refusé de témoigner dans des dossiers liés à « la propagande terroriste », assurent que la loi a été respectée. « Les parlementaires qui ont été arrêtés ont ignoré la loi », a expliqué le ministre de la Justice, Bekir Bozdag, cité par l'agence de presse Anatolie.

« Ils ont reçu une invitation mais ne se sont pas manifestés. Quelle autre solution avions-nous? Les faire venir de force. » Reuters (Radio-Canada)

US intelligence 'warns of possible Al-Qaeda attacks' on day before election
With just a handful of days before the US presidential election, a potential threat has reportedly emerged in the form of possible Al-Qaeda plot to target New York, Texas and Virginia. Much of the run-up to polling day has until now been dominated by coverage about possible attempts to intimidate voters by white supremacists and reports of efforts to keep certain communities, particularly African Americans, from casting their vote. But CBS News said it had learned of a potential threat that could be timed for 7 November, the day before millions of Americans cast their vote after what has been a bitter, ugly election battle. Goodale says CSIS 'taking steps' to comply after court rules it broke law: https://t.co/pKcO9FBpAj

Claire_Wahlen
.@RalphGoodale is speaking now in the House of Commons re: #CSIS. He will be having #SIRC follow along, but let's be serious, LOL #cdnpoli

Claire_Wahlen
Goodale won't commit to any heads rolling, suggest they'll wait to see what SIRC says. I expect little in way of major player change.

Claire_Wahlen
On the bright side though, dim as it is, Goodale insists he will be speaking with senior management at #CSIS for this shitstorm

I_stone
Goodale says he welcomes the federal court decision - says its timely as it comes in midst of security consultations #cdnpoli

I_stone
Goodale doesn't answer directly if anyone will be fired or if there will be an inquiry. Repeatedly says decision will be followed

I_stone
CSIS and all security agencies need to comply w law, Goodale says. Judge made clear what law is

I_stone
Goodale says he takes very seriously the finding that CSIS failed in its duty to be truthful w court

I_stone
Goodale asked if he knew about this - says its in a report that was filed in Parl on Jan 28

Justin_Ling
"A strong and timely remedial plan is required to assure the court on the issue of candour," says Goodale.

Justin_Ling
Goodale says he only because aware of this massive CSIS spying campaign in early October when this judgement came out. Wow.

Justin_Ling
"The review process, in terms of SIRC, has worked," says Goodale. Which is wooooboy quite a whopper.

chrishallcbc
Goodale asked if anyone will be fired for failing to inform court that data retained... says he will discuss matter with CSIS execs.

chrishallcbc
Goodale says he will pursue with CSIS execs the failure to properly inform court that data retained #hw

ShirleeEngel
Goodale says Canadians need to have confidence all agencies being effective at keeping Canadians safe while safeguarding freedom #cdnpoli

MINISTER / MINISTRE

La GRC a-t-elle espionné des journalistes?
Sur un ton qui se voulait rassurant, le Commissaire de la GRC, Bob Paulson, le premier ministre, Justin Trudeau, et le **ministre de la Sécurité publique, Ralph Goodale**, ont tous répondu que ça ne se faisait pas actuellement. ***« Mais allez-vous vérifier les cinq dernières années? »*** a lancé un journaliste au **ministre Goodale.** Ce à quoi le **ministre a répondu*:« Regardez, l'enjeu c'est ce qui se passe maintenant et je peux vous assurer que ce type d'activité ne se produit pas maintenant. Je ne suis pas au courant de choses qui se sont passées quand on ne formait pas le gouvernement du***

Canada. » Face à cette absence de réponses, nous avons demandé directement à la GRC si, par le passé, elle avait fait de la surveillance des journalistes, qu'il s'agisse de surveillance des relevés des appels téléphoniques ou de surveillance physique (filature) ou autre. Par courriel, la GRC a répondu notamment : « Les cas où des enquêtes de la GRC concernant des journalistes ont eu lieu sont extrêmement rares, et le cas échéant, celles-ci sont menées avec des paramètres de surveillance étroite selon les directives ministérielles. » Radio-Canada

TOP STORIES / MANCHETTES

Obama says Trump meeting was 'excellent'
In a cordial beginning the transfer of power, President Barack Obama and President-elect Donald Trump met at the White House Thursday. Obama called the 90-minute meeting "excellent," and his successor said he looked forward to receiving the outgoing president's "counsel." (…) In Washington, Trump's scant transition team sprang into action, culling through personnel lists for top jobs and working through handover plans for government agencies. A person familiar with the transition operations said the personnel process was still in its early stages, but Trump's team was putting a premium on quickly filling key national security posts. The person was not authorized to discuss details by name and spoke on condition of anonymity. According to an organizational chart for the transition obtained by The Associated Press, Trump was relying on experienced hands to help form his administration. National security planning was being led by former Michigan Rep. Mike Rogers, who previously worked for the FBI. Domestic issues were being handled by Ken Blackwell, a former Cincinnati mayor and Ohio secretary of state. Trump was expected to consider several loyal supporters for top jobs, including former New York Mayor Rudy Giuliani for attorney general or national security adviser and campaign finance chairman Steve Mnuchin for Treasury secretary. Former House Speaker Newt Gingrich and Tennessee Sen. Bob Corker were also expected to be under consideration for foreign policy posts. Associated Press (ABC)

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Slight respite in flooding near Port Alberni but new storm due to hit
Waters of the swollen Somass River near Port Alberni have receded slightly overnight, but the next wave of wet weather is on the way, meaning more flooding is possible on central Vancouver Island. Single lane traffic is moving again on Highway 4 just west of Port Alberni, after the only route to and from Tofino and Ucluelet was closed for several days as the Somass burst its banks. But Environment Canada has issued a special weather statement warning a new system will hammer north, central and western Vancouver Island by Thursday night, dumping as much as 100 to 150 millimetres of rain through Friday. Eleven homes are evacuated on the Tseshaht First Nation and a state of emergency remains in effect, while on the mainland near Pemberton, an evacuation alert continues for homes on the Lil'Wat First Nation and for some properties along the Lillooet River. The River Forecast Centre issued a flood warning for the Lillooet River and its tributaries late Wednesday afternoon as heavy rain and warm temperatures melt recent snowfalls. A Flood watch is also in effect for the Squamish River near Brackendale, north of Vancouver, but forecasters expect waters in most areas to recede through the day, offering a respite before the next storm system hits. Postmedia Network (Vancouver Sun; Metro News); Global News

Important glissement de terrain à Saint-Luc-de-Vincennes
Un important glissement de terrain est survenu tôt jeudi matin, à 7h25, sur le rang Saint-Joseph-Ouest à Saint-Luc-de-Vincennes. Deux résidences ont été évacuées, alors qu'une importante section de terrain s'est détachée pour tomber dans la rivière Champlain, qui serait présentement complètement bouchée. Selon le directeur de la Sécurité civile de la Mauricie, Sébastien Doire, la partie de terrain qui s'est détachée serait de la grandeur d'un terrain de football. La Sûreté du Québec, la Sécurité civile, la Municipalité, le service des incendies ainsi que le ministère de l'Environnement sont sur place. Un périmètre de sécurité de près de 200 mètres a été érigé autour du terrain touché. Trois personnes sont présentement évacuées. Le Nouvelliste; Postmedia Network (Gazette)

$33M for 2 Calgary flood mitigation projects announced

Officials from all three levels of government announced almost $32 million in funding Thursday for a pair of flood mitigation projects in Calgary. A new pump station will be built in Sunnyside, one of the communities that saw major flooding in the 2013 disaster. The new infrastructure will direct water away from the low-lying district into the Bow River. The second project is a flood protection berm, east of the Bonnybrook wastewater treatment plant in southeast Calgary, which was inundated during the 2013 emergency, forcing the city to discharge untreated sewage into the Bow River for a brief time. The project also includes upgrades to the groundwater and storm water infrastructure to help keep the plant from flooding again... Ottawa will contribute about $10.5 million towards the cost of both the Bonnybrook and Sunnyside improvements. CBC News

Federal plan calls for more northern coast guard auxiliaries
The Canadian Coast Guard is looking to expand its auxiliary programs across the North and the idea was announced this week as part of the Oceans Protection Plan. The agency doesn't know where exactly the new volunteer organizations will be, or how many, but says it is consulting with communities. "It really has to do with where we're likely to have enough volunteers, where there's an interest in doing this," says deputy commissioner Jeffrey Hutchinson. "Then we'll look at it also from a risk perspective in terms of where traffic is happening and where we get the greatest number of search-and-rescue calls." Hutchinson says volunteers respond to about a quarter of the coast guard's search and rescue calls in southern Canada, and that they're especially important in remote areas where the agency may not be able to respond quickly. CBC News

14 Wing Greenwood personnel to conduct search and rescue exercise
Royal Canadian Air Force members from 14 Wing Greenwood will be conducting a search-and-rescue exercise in Atlantic Canada starting on Nov. 14. The exercise will run from November 14 to 18. It will involve personnel and aircraft from 413 Transport and Rescue Squadron at 14 Wing Greenwood, including a CC-130 Hercules and the CH-149 Cormorant helicopter, according to a news release from the RCAF. The SAREX is primarily based out of the Summerside, P.E.I. airport, but also will include the airports and surrounding regions of Miramichi, N.B. and Sydney, N.S. Postmedia Network (Ottawa Citizen)

Firefighters in western Labrador are taking the society's training to teach them how to handle non-typical responses from those with autism - training first responders across the province are welcoming. CBC News

Canadian makes breakthrough in potential Zika vaccine
In the race to develop vaccines for the Zika virus, researchers faced an early hurdle that Canadian Gary Kobinger set out to overcome as swiftly as he could. The challenge? Mice, the animals used in early tests of vaccine candidates, are too hardy to be sickened by the Zika virus. So Dr. Kobinger genetically engineered a line of mice that would fall ill when exposed to Zika. Then, the Quebec-based microbiologist and his research partners in Philadelphia tested a DNA vaccine on the modified rodents, and, later, on rhesus macaques. The experimental DNA vaccine, known as GLS-5700, shielded all the mice from Zika infection, brain damage and death, according to a new study published Thursday in the journal npj Vaccines. The vaccine also provoked a strong immune response in the monkeys; like wild mice, they are naturally resistant to Zika. Globe and Mail

Huge spike in U.S. web traffic before immigration site crash
Newly released statistics show Canada's citizenship and immigration website experienced a huge spike in web traffic from the U.S. just before it crashed on Tuesday, as results from the American presidential election were rolling in. Immigration, Refugees and Citizenship Canada says there were more than 200,000 users accessing the site around 11 p.m. on election night and American IP addresses accounted for about half of that figure. (…) She says the web traffic figures for Tuesday night -- when the election results were starting to indicate a Donald Trump presidential victory -- were significantly higher than the same time the previous week, when the website saw just over 17,000 users. (…) A number of U.S. citizens have said they may consider applying to move to Canada if Trump follows through on proposed policies such as mass deportations of illegal immigrants or the reopening of international trade agreements. Immigration lawyers have warned, however, that the process to move to Canada can be long and complex and may cause a number of potential U.S. emigrants to reconsider their plans to move north once they learn more. Canadian Press (Calgary Sun, Edmonton Sun, Ottawa Sun, Toronto Sun, Winnipeg Sun, Chronicle Herald, iPolitics); TIME, Hamilton Spectator, Toronto Star, 1, Vancouver Province, National Post, Yahoo

Canada: Flying To Canada? Electronic Travel Authorization Becomes Mandatory On November 10, 2016
Immigration, Refugees and Citizenship Canada (IRCC) has introduced an Electronic Travel Authorization (eTA) initiative to pre-screen visa-exempt foreign nationals travelling to or transiting through Canada by air. The eTA was introduced in March 2016. The mandatory implementation of the eTA has been delayed a number of times, as indicated in our September and October bulletins. However, effective November 10, 2016 all visa-exempt nationals, with limited exceptions, must have an eTA in order to travel to Canada by air. Mondaq (Lexology)

Canadian Immigration Lawyer Advises on Best Practices
An opinion piece states, "As an immigration lawyer, Catherine Sas of Sas & Ing wants to warn prospective newcomers against placing undue trust in immigration professionals. In many cases, people are being advised in ways that do not align with best practices. This can lead to complications and delays in the application process. (…) The penalty for misrepresentation -- either direct or indirect -- is a five-year ban from applying for immigration. IRCC and CBSA officers routinely hear stories from applicants that claim they were only following the advice or recommendation of immigration professionals. In instances where such cases have ended up in court, responsibility has historically been placed squarely on the applicant. Ultimately, an immigration application is the applicant's responsibility." SYS-CON Media Inc. (Digital Journal)

French plan for biometric database of 60 million people sparks outcry
When the French government quietly announced, in the middle of a holiday weekend, the merging of two files to create a megadatabase holding the biometrics of almost 60 million French citizens, it was clearly hoping to avoid an outcry. It failed. Among those lining up to criticize the government's move are its own minister of state for the Digital Sector and Innovation, and the National Digital Council, a body created by the government to provide independent recommendations on all matters relating to the effect of digital technologies on society and the economy. Minister of State Axelle Lemaire told French journalists the megadatabase used 10-year-old technology and had real security problems. For the Council, the creation of TES (from the French abbreviation for Secure Electronic Identity Documents) will result in abuses "as inevitable as they are unacceptable." CSO

German cabinet approves cyber security strategy
Germany's cabinet has approved a new cyber security strategy amid a growing number of attacks. Many of the cyber attacks are directed from China and Russia. The German cabinet on Wednesday adopted a new cyber security strategy to counter a rising number of threats targeting government institutions, critical infrastructure, businesses and citizens. The strategy calls for the creation of a mobile Quick Reaction Force housed within the Federal Office for Information Security (BSI), as well as similar teams within the federal police and domestic intelligence agency that are able to respond to cyber threats against government institutions and critical infrastructure. Germany's Cyber Defense Center will fall under the authority of the Interior Ministry, which will seek to foster inter-agency coordination and cooperation. Deutsche Welle

Yahoo Reveals More Details About Massive Hack
Yahoo provided more details on Wednesday about an epic hack of its services, including that the culprits may have planted software "cookies" for ongoing access to users' accounts. In revelations that could jeopardize the company's pending $4.8 billion acquisition by US telecom giant Verizon, the internet pioneer said it was trying to pin down when it first knew its system had been breached and whether hackers gave themselves a way to get back into accounts whenever they wished. "Forensic experts are currently investigating certain evidence and activity that indicates an intruder, believed to be the same state-sponsored actor responsible for the security Incident, created cookies that could have enabled such intruder to bypass the need for a password to access certain users' accounts or account information," Yahoo said in a filing with the US Securities and Exchange Commission. There is no evidence the state-sponsored actor is still active in the California-based company's network, Yahoo told regulators. AFP (Security Week); CSO

Yahoo: Verizon Could Pull Out of Deal
Yahoo has admitted its $4.8 billion sale to Verizon might not go through, as it emerged that the firm knew a state-sponsored attacker had accessed its network as far back as 2014. The internet pioneer claimed in an SEC filing yesterday that "there is no assurance that the sale transaction will be consummated in a timely manner or at all." That's mainly due to revelations of a massive data breach which exposed the account details of 500 million users, including names, email addresses, bcrypt encrypted passwords and security Q&As. In the filing, it admitted for the first time that staff may have known for two years that an attack had taken place before the company finally revealed the news in September this year. Infosecurity Magazine; CNET

Facebook buys black market passwords to keep your account safe
For a data-saturated company of its size and scope, Facebook has markedly managed to avoid the kind of security scandals, breaches and hacks that have affected many other major web companies. Take a closer look, and you'll see why. Though on the surface all seems calm, below the waves the social network is kicking its legs frantically and working around the clock to keep users' accounts safe. Keeping Facebook safe and keeping it secure are two different things, the social network's chief security officer, Alex Stamos, said Wednesday at Web Summit in Lisbon. Security is about building walls to keep out threats and shore up defenses, but according to Stamos, safety is bigger than that. CNET

Cyber-attaque d'ampleur contre les grosses banques en Russie
Une cyber-attaque d'ampleur, lancée depuis des milliers d'ordinateurs piratés dans plus de 30 pays, vise depuis mardi plusieurs grandes banques de Russie, a indiqué jeudi le laboratoire Kaspersky, spécialiste de sécurité informatique. Le plus gros établissement du pays, la banque publique Sberbank, a précisé avoir été ciblée et avoir réussi à neutraliser l'attaque sans perturbation sur ses activités. Selon Kaspersky, les attaques «complexes» de type DDoS, qui consistent à rendre un serveur indisponible en le surchargeant de requêtes, ont commencé mardi à 13H00 GMT et se poursuivaient jeudi. D'une durée moyenne d'une heure mais pouvant atteindre près de 12 heures, elles ont touché «les sites internet d'au moins cinq institutions financières connues parmi les dix premières» russes, a précisé la société dans un communiqué. AFP (Journal de Montreal)

Criminals Distribute Locky Ransomware To 2014 OPM Data Breach Victims

Locky is one of the most potent forms of crypto-ransomware in existence today. Even though security researchers try to combat this malware, the developers remain one step ahead. In fact, a new phishing campaign distributing Locky ransomware has been discovered, which targets 22 potential victims. All of these users were part of the US Office of Personnel Management data breaches in 2014 and 2015. Criminals always find news ways to target potential victims with malware and ransomware. Even though the data breaches affecting the Office of Personnel Management took place nearly two years ago, the information remains valid to this day. A lot of sensitive personal information was obtained by hackers, and they will direct target campaigns to different types of victims. One of those campaigns is already underway, as criminals impersonate OPM representatives. These individuals target government contractors and workers whose information was stolen during the attack. By sending phishing messages to these victims, recipients are asked to examine an attached file. This particular file is a ZIP file which executes the Locky payload when opened. Dyn, Liberia DDoS Attacks Were Just Test Runs

The Mirai-fueled DDoS attacks that took the entire country of Liberia offline last week are waning—but researchers say the offensive was merely a test run for something much bigger... One particular group, operating what MalwareTech.com dubbed Botnet 14, has taken on significantly bigger targets than most of the Mirai dabblers out there. "Many of the botnets are simply attacking Minecraft servers and doing technically terrible attacks on websites, e.g. a Farming Simulator game mod site," said independent researcher Kevin Beaumont, in a posting. In contrast, "it is clear [Botnet 14 is] extremely successful at attacking things....it is the largest of the Mirai botnets and the domain controlling it pre-dates the attacks on Dyn. The capacity makes it one of the biggest DDoS botnets ever seen. Given the volume of traffic, it appears to be the owned by the actor which attacked Dyn." Transit providers have confirmed that over 500Gbps of traffic is typically output during attacks, which last a short period but can be enormously crippling. In Liberia, continued short-duration attacks on its infrastructure overwhelmed the African nation's single internet cable, with various websites hosted in the country going offline and telcos reporting widespread outages for internet access. Infosecurity Magazine

Competing hackers dampen the power of Mirai botnets

The malware behind last month's massive distributed denial-of-service attack in the U.S. appears to be losing its potency. Ironically, hackers are to blame for diluting its power. The malware known as Mirai -- which is now available on the internet -- has become a bit too popular in the hacking community, according to security firm Flashpoint. Competing hackers have all been trying to take advantage of Mirai to launch new DDoS attacks. To do so, that means infecting the poorly secured internet-connected devices, such as surveillance cameras, baby monitors, and DVRs, that the malware was designed to exploit. The problem is the malware may have run out of new devices to infect, forcing the hackers to vie for control over a limited resource pool. That competition appears to be stiff. On Tuesday, Flashpoint said it found that the Mirai malware is probably being used across 52 different networks of enslaved devices, often called botnets. However, that competition is also fracturing Mirai's full power. Newly formed botnets created through Mirai are becoming smaller in size, ever since the source code to the malware was released back in late September. CSO

Finns have their heating systems knocked offline by a DDoS attack

Finnish news website Etelä-Saimaa is reporting that a DDoS attack on the internet-connected building management system of two tower blocks in the district of Lappeenranta, Finland, had taken their building management systems offline for three days. The primary systems affected were the heating and water systems. With temperatures in Finland below freezing, disruption in the heating could cause both material damage as well as force residents to relocate. The building, managed by property management company Valtia, had its internet connection blocked by the attack, which meant the building management system kept rebooting itself in an attempt to reconnect to the internet. As a result, the building was not able to supply heating into the building because it was not able to start the relevant systems. SC Magazine UK

The Internet of Things Is Just a Pit Stop On the Way to Smart Dust

As processors get faster and smaller we seem to reach points of inflection, our technological progress allows us to do something that wasn't really possible before, or at least wasn't practical. We've seen this before: computers the size of rooms gave way to ones that fit under the desk. In time those too gave way

to slabs of aluminium and glass that we carried around in bags, and then to computers that fit in our pockets, and just happen to also be able to make phone calls. Known as Bell's law, this proposition is intimately intertwined with the far more well known Moore's law. But while Moore's law may be dying, Bell's law, at least for one last turn of the wheel, seems to be holding. You might think the change I'm talking about is the arrival of the much hyped Internet of Things, but the connected devices we see today are really only the first clumsy steps towards something else. They're transition technology. Over the next decade or two we can, perhaps, expect to see general purpose computing, sensors, and wireless networking, bundled up in millimeter-scale sensor motes that can drift in the air currents around us. The dust around us will soon become smart. If you think this is just a technological fantasy, it's not. Motherboard

LAW ENFORCEMENT / APPLICATION DE LA LOI

RCMP's handling of python case challenged by Jean-Claude Savoie's lawyer
Police reneged on written assurance snake owner wouldn't be charged if he answered 4 questions. Jean-Claude Savoie's lawyer says the RCMP violated his client's constitutional rights by filing a criminal charge against him after giving written assurance Savoie would not be charged in relation to his python's killing of two young boys in Campbellton in 2013. Savoie was found not guilty by a jury Thursday on the charge of criminal negligence causing death that was eventually laid by the RCMP. With the verdict, a publication ban was lifted on an April 2016 motion by Savoie's lawyers to have the court issue a stay of proceedings in the case because of what the defence called misconduct by the police and Crown. At issue was the lead investigator in Phase 1 of the investigation, Cpl. Gabriel Deveau, who gave defence lawyer Leslie Matchim written confirmation Savoie would not be charged in the case if Savoie answered four questions for the RCMP. CBC News; Financial Newspress

Amber Alert update: Girl missing, father found dead
A man suspected of taking his seven-year-old daughter from Nipawin, Sask., and sparking an Amber Alert was found dead this morning, the RCMP said. Adam Jay Eastman appears to have died from self-inflicted injuries, police said. The search for his missing daughter, Nia Eastman, is ongoing and an Amber Alert is still in effect. Nia is described as a Caucasian female, approximately 120 centimetres tall and weighing 22.7 kilograms. She has blonde, shoulder length hair and was last seen wearing pink eye glasses, a purple long sleeved shirt decorated with butterflies, a pink skirt and purple leggings with silver trim at the bottom. RCMP said the girl was supposed to be returned home to her mother by 7 p.m. on November 9. A vehicle believed to be operated by the girl's father was located on a rural property east of Smeaton near Snowden at approximately 10 p.m. Wednesday. Nipawin is approximately 140 kilometres east of Prince Albert. CTV News; Globe and Mail; Canada News; Castanet

'Please don't hate us': 2nd officer testifies at inquest into Felix Taqqaugaq's shooting death by police
The RCMP officer who narrowly missed being stabbed by Felix Taqqaugaq said the initial plan that night wasn't to arrest him, but rather a surveillance mission to assess the situation. Peter Marshall, who was a sergeant in Igloolik at the time and has since been promoted to staff sergeant, testified Wednesday by video at the coroner's inquest into Taqqaugaq's shooting death by police in 2012. The inquest is examining how the 30-year-old Inuk man with schizophrenia was shot in his own home. Marshall told the jury that he and his partner, Const. Jason Trites, were trying to locate Taqqaugaq after he made threats against the police on local radio. Marshall suspected, correctly, that Taqqaugaq was in mental distress. (…) After his testimony, before the phone line was cut, Taqqaugaq's brother in attendance yelled out a sincere: "Thank you Peter," providing a rare moment for the family in this inquest where, for a second, some members smiled. CBC News

RCMP locate Amber Alert subjects
A province-wide Amber Alert reached its conclusion in Sicamous on Friday Nov. 4. The RCMP de-activated the amber alert for Sofia and Mateo and their mother April Pastor-Ruiz after the trio were stopped by an RCMP officer near the Esso station in Sicamous at approximately 9 p.m. on Nov. 4. An RCMP spokesperson said the stop occurred without incident. The Amber Alert was issued by the

Coquitlam RCMP at approximately 4:30 p.m. on Nov. 4. Pastor-Ruiz alegedly abducted the children near Fraser Avenue and Larch Way in Coquitlam. 36-year-old Pastor-Ruiz, is in police custody and charges are pending. The children were found safe and will be reunited with their family. Salmon Arm Observer

Two meth labs busted
Four arrests were made as two drug labs were busted in Richmond this week. The alleged meth labs were on the 7000 block of Schaefer Avenue and the 7500 block of Lucas Road. The raids were made Monday and Wednesday. In the first case, the RCMP's Clandestine Laboratory Enforcement and Response Team said the entire home was "contaminated with the products of the ongoing illicit and toxic operation." A substantial amount of chemicals and lab equipment were seized. Three people were arrested, and more arrests are possible. On Wednesday, another arrest was made at the second home, where a smaller drug lab was found. A "significant amount" of the drug was seized. Charges are pending in both cases. Castanet

Opioid use taking toll in Ontario with hundreds of overdose deaths: report
A study has found the use of prescription opioids varies dramatically across Ontario, but overall the potent and addictive drugs are responsible for hundreds of overdose deaths in the province. The study by researchers at the Ontario Drug Policy Research Network found 638 people died in 2013 from opioid overdoses - a rate of about one death for every 20,000 residents in the province. Lead researcher Tara Gomes says coroners' reports show almost 13 per cent of those overdose deaths were suicides. Gomes says the Thunder Bay District and Timiskaming District had the highest rates of opioid-related deaths in Ontario, about four times the provincial average. The researchers found there were 3,200 opioid-related emergency department visits in Ontario in 2014, which resulted in about half of those patients being admitted to hospital. Canadian Press (Globe and Mail); CBC News

How Nova Scotia pharmacists help in the fight against opioid addiction
Plenty of discussion about how to deal with the opioid addiction crisis in Canada has focused on the role of doctors, even though some patients see their pharmacist more often than any other health-care professional. That's why a Nova Scotia pharmacist and professor believes pharmacists play a key role in dealing with this issue. Every prescription involves "a pharmacist, a physician and a patient, so there's a natural triad there," said Dr. David Gardner, who works in the department of psychiatry and college of pharmacy at Dalhousie University. In Atlantic Canada, the opioids in question are not smuggled medications— they're prescribed. Gardner said pharmacists usually have daily interactions with patients coming in for drugs like methadone to deal with opioid withdrawal. They may also see patients who are receiving medication for pain but using it for other reasons, or are on a medication that may not be safe for them, he said. CBC News

Seven states say Yes to marijuana, so now what's in it for Canada?
While Donald Trump was winning one of the biggest upsets in American political history, other ballot measures were quietly tallying wins alongside the Donald. Americans in 7 states have now voted to enact legislation that will, to varying degrees, legitimize marijuana for medical and/or recreational purposes. With a combined market value estimated at US$7.4 billion annually, and an expected growth rate of 28 per cent annually, the U.S. combined market for marijuana is expected to be worth US$21.2 billion by 2020. The significance of these measures to Canadian marijuana users and growers is substantial. The more states that adopt marijuana usage rules, the closer weed comes to becoming a national export crop for Canadian growers. And that, as much as anything, explains the ongoing surge in marijuana stock prices here. With the Canadian dollar steady for the last few years at an average 25 per cent discount to the greenback, Canada is well positioned to compete with domestic production in the United States, should that market open up to Canadian imports. Financial Post

PSAC pulls out of bargaining session with federal government
The Public Service Alliance of Canada is pulling out of the latest 10-day marathon session of collective bargaining with the federal government and is seeking a mediator to help sort the differences in a bid to reach a settlement. The union's various bargaining groups met today and decided that the differences between the parties were such that a mediator was needed to make any further progress. The giant union says it is still open to further talks and is not declaring an impasse at this point. Ottawa Citizen

«L'offre de 0,75% par année est nettement insuffisante»

Obama says Trump meeting was 'excellent'
In a cordial beginning the transfer of power, President Barack Obama and President-elect Donald Trump met at the White House Thursday. Obama called the 90-minute meeting "excellent," and his successor said he looked forward to receiving the outgoing president's "counsel." (...) In Washington, Trump's scant transition team sprang into action, culling through personnel lists for top jobs and working through handover plans for government agencies. A person familiar with the transition operations said the personnel process was still in its early stages, but Trump's team was putting a premium on quickly filling key national security posts. The person was not authorized to discuss details by name and spoke on condition of anonymity. According to an organizational chart for the transition obtained by The Associated

Press, Trump was relying on experienced hands to help form his administration. National security planning was being led by former Michigan Rep. Mike Rogers, who previously worked for the FBI. Domestic issues were being handled by Ken Blackwell, a former Cincinnati mayor and Ohio secretary of state. Trump was expected to consider several loyal supporters for top jobs, including former New York Mayor Rudy Giuliani for attorney general or national security adviser and campaign finance chairman Steve Mnuchin for Treasury secretary. Former House Speaker Newt Gingrich and Tennessee Sen. Bob Corker were also expected to be under consideration for foreign policy posts. Associated Press (ABC)

Paris, Brussels attacks 'ordered by top ISIL leaders'
The cell that launched deadly attacks on Paris and Brussels had received its orders from "very high" in the Islamic State of Iraq and the Levant (ISIL) command, according to Belgium's federal prosecutor. Late last year a wave of bombings and shootings killed 130 people and injured hundreds more across the French capital. And in March suicide blasts struck an airport and a metro station in the Belgian capital, leaving about 30 people dead. "We know that the orders came from the Islamic State zone ... We know that it went very high in the command," Frederic Van Leeuw said in an interview with the AFP news agency in Brussels on Wednesday. Aljazeera

Man held in Wrexham on suspicion of terrorism offences
A 48-year-old man has been arrested in Wrexham on suspicion of terrorism offences. Police said the man, whom they did not identify, was held on Thursday on suspicion of being concerned in the commission, preparation and instigation of acts of terrorism, under section 41 of the Terrorism Act 2000. He was arrested as part of a joint operation between the Welsh extremism counter-terrorism unit, North Wales police and the West Midlands counter-terrorism unit. A police spokesman said: "The man is being questioned at a police station in the West Midlands. The arrest was preplanned and intelligence-led. There was no threat to the public's safety. An address in Wrexham is the subject of an ongoing search." Guardian

Israel, Russia affirm anti-terrorism alliance
The Russian and Israeli leaders have declared themselves partners in a battle against global terrorism. Dmitry Medvedev told his Israeli counterpart, Benjamin Netanyahu, that terrorism threatens Israel in a "very unique way." But Russia also suffers from terror with what he called "common roots," he added at a meeting in Jerusalem on Thursday. "This is why there is a need to fight terror together," Medvedev said. Netanyahu said the two countries, along with the United States and other nations, share a struggle against radical Islam and the Islamic State group. Canadian Press (Chronicle-Herald)

Mentally ill deportee transferred to Alberta Hospital
A deportee with severe mental illness who was held at the Edmonton Remand Centre for 10 months without charge has been transferred to the Alberta Hospital. Abdikarim Gelle arrived at the psychiatric hospital last Friday. His mother was relieved, as she was worried he might be transferred to a facility in Quebec. "I am so happy that my son is not leaving Edmonton and I will be able to see him," said Asili Gelle, who also thanked people advocating on their behalf. Advocates have been urging authorities to relocate Abdikarim Gelle, 31, to a secure facility that could meet his mental health needs. Up until last

week, Alberta Hospital didn't appear to be an option. Looking for an alternative, authorities raised the possibility of transferring him to a psychiatric hospital in Montreal. The potential move concerned advocates. (...) "**The minister [Ralph Goodale**] has been making continuous efforts in order to remove the person concerned to Somalia," said hearings officer Sébastien Thibodeau at Monday's review. "However, due to mental health issues of the person concerned, his removal has been very complicated to execute. The detention of the person concerned is becoming lengthy and the removal is not likely to occur in the foreseeable future." Thibodeau said Alberta Health Services advised government officials that if Gelle was released they had a team ready to assess Gelle's mental health needs and the danger he represents to the public. Ufuoma Odebala-Fregene, an immigration consultant with Black Lives Matter Edmonton, said Gelle's move to Alberta Hospital was "the right decision, reflecting the compassionate and humanitarian objectives of our immigration and refugee system. "Abdi and his family can now focus on him getting better with our outstanding medical and social services support." CBC News

Trump's election should prompt Canada to rethink its complicity with U.S. mass surveillance
President-elect Donald Trump. It's still a phrase that takes some getting used to. Trump's pronouncements on issues of online privacy, surveillance and net neutrality -- among many other topics -- should send a shiver down the spine of anyone who cares about preserving basic democratic freedoms in a digital age. For Canadians these concerns strike particularly close to home. Already, federal government ministers are grappling with the implications of the impending Trump presidency and, for **Public Safety Minister Ralph Goodale** and Justice Minister Jody Wilson-Raybould, these implications are especially profound. For many years Canada's spy agencies have worked extremely closely with their U.S. counterparts, not least as part of the decades-old "Five Eyes" surveillance alliance between the U.S., U.K., Canada, Australia and New Zealand. This co-operation is so tight that over the years the Five Eyes have evolved into what whistleblower Edward Snowden describes as "a supranational intelligence organization that doesn't answer to the laws of its own countries." Rabble

Mexican visa lift expected to cost Canada $262M over a decade
Canada's decision to lift the visa requirement for Mexican travellers is expected to cost about $262 million over the next decade, in part to deal with a potential surge in asylum seekers, according to an internal government analysis. A regulatory impact analysis statement, just published on a Canadian government website, pegs the overall cost of the policy change that kicks in today at $433.5 million over 10 years due to extra enforcement resources and added costs associated with a potential spike in refugee claims. The analysis predicts those costs will be partially offset by an estimated $171.6 million in economic benefits through increased tourism from Mexico and a boost in trade and investment opportunities. The federal government will need to make significant investments in immigration and border control processes to support a sustainable visa lift," the report reads. "Federal and provincial/territorial governments will need to manage potential increases in asylum claimants from Mexico who may seek to exploit their new visa-free status in an attempt to migrate to Canada permanently." While the majority of costs for dropping the visa requirement, and replacing it with an electronic travel authorization, will be borne by the federal government, provincial and territorial governments will also be impacted by increased asylum claims, the report says. CBC News

Canada prepares for surge of Mexican immigrants after visa lift and Trump win
Officials in Canada are readying for a potential surge in Mexican migrants, as a promise to scrap a visa requirement comes into effect amid uncertainty over Donald Trump's promises to crack down on undocumented immigrants. From Thursday, Mexican visitors to Canada will no longer need visas. The move has left the government anticipating an increase in Mexican tourists and business travellers, a spokesperson for Canada's immigration ministry said. The visa was put in place in 2009 by the previous Conservative government to address an increase in what it described as bogus refugee claims. But the

timing of the visa lift – following on the heels of Trump's vows to expel millions of illegal immigrants – has sparked concerns among officials that Canada could again see a substantial increase in Mexican asylum seekers, government sources told the Guardian. Between 2005 and 2008, Canadian officials said refugee claims from Mexico nearly tripled, making Mexico the number one source country for claims. Of the more than 9,400 claims filed by Mexicans in 2008, just 11% were accepted. The visa was embraced as a means of border control by the Conservative government. "The visa requirement I am announcing will give us a greater ability to manage the flow of people into Canada," the then immigration minister Jason Kenney said in a statement. "In addition to creating significant delays and spiralling new costs in our refugee program, the sheer volume of these claims is undermining our ability to help people fleeing real persecution." The Guardian

At one small border post in Quebec, Canada tests the idea of automated drive-through entry
First there were automated drive-through carwashes. Then automated drive-through banks. Now, the Canadian government is experimenting with an automated drive-through border crossing. While the fate of the wall along the U.S.-Mexico border promised by President-elect Donald Trump remains uncertain, Canada is carrying out a pilot project with an opposite aim: to use the latest technology to ease the flow of traffic across the United States' northern frontier. If you drive into the province of Quebec via the crossing at Morses Line, Vt., after 4 p.m. on any day, no live Canadian customs agent will stop and interrogate you. Instead, a gate opens and you drive into a large, garage-like building. There, under the gaze of several TV cameras, you are invited by a customs officer to insert your passport or other border ID into a document reader and are asked the usual questions put to visitors seeking to enter Canada. Washington Post (National Post)

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Wet, windy weather causing travel delays in Maritimes for 2nd day
High winds, rain and some snow in parts of Nova Scotia and most of New Brunswick are causing travel delays for the second day in a row. High winds cancelled Bay Ferries' service between Digby, N.S., and Saint John, N.B. on Thursday. Marine Atlantic said its morning crossings were going ahead, but it won't sail at 11:45 p.m. Thursday. Northumberland Ferries said travellers should check with the company before departing. A few flights were delayed, and one was cancelled out of Halifax Stanfield International Airport Thursday morning. Most of Nova Scotia can expect a windy and wet day. Environment Canada has issued a special weather statement for all of Cape Breton and Guysborough County. Snow is expected to develop over Cape Breton Thursday near noon and will likely mix with or change to rain over areas near the coast. "However, over higher terrain, snowfall amounts may approach warning criteria," says the special weather statement. It's also going to be dangerous near the coast. "Rough pounding surf combined with higher than normal water levels may cause minor flooding along east and southeast facing shorelines of eastern shore Nova Scotia and Cape Breton, the statement said. CBC News; St. John's Telegram

Winter storm leaves thousands without power in Quebec City area
Hydro-Québec is working to restore power to thousands of homes and businesses across the province this morning as strong winds and snow caused outages in several regions. Shortly after 7 a.m. Thursday, there were just over 40,000 outages across the province, with the bulk of them in the Quebec City area. The Chaudière-Appalaches, Lanaudière, Mauricie and Montérégie regions are also affected
It's not clear when power will be restored. Updates can be found on the Hydro-Québec website. A powerful weather system is moving eastward over the southern part of the province. CBC News; Montreal Gazette

Procès de Tom Harding : le Tribunal veut comprendre pourquoi c'est si long
Les parties impliquées dans le dossier des accusations liées au déraillement du train de Lac-Mégantic ont été convoquées au tribunal jeudi matin. Le juge Gaétan Dumas souhaite comprendre pourquoi les procédures sont si longues. Il leur a également demandé de coordonner leurs efforts afin de faire avancer les choses plus rapidement. Mardi, on apprenait que le conducteur du train, Tom Harding, déposerait, en janvier prochain, une requête en arrêt des procédures. Ce dernier invoquera l'arrêt Jordan pour mettre fin

aux procédures judiciaires en raison de délais déraisonnables. Jeudi matin, Tom Harding était représenté par Me Charles Shearson. Il a expliqué au juge que cette requête ne visait pas à attaquer le système de justice lui-même, mais plutôt qu'avec les délais encourus, son client subissait des préjudices importants. Radio-Canada

Man located after massive multi-team search - Missing person found Wednesday morning
A search involving multiple search and rescue teams from at least four counties was focused on the Weaver Settlement area in Digby County on Tuesday night. A man who went in the woods to check his property was reported missing Tuesday afternoon. Clare, Digby, Yarmouth and Valley ground search & rescue teams participated in the search. Members from the Civil Air Search and Rescue Association and the Department of Natural Resources helicopter were standing by for a break in the weather. RCMP and EHS were also on the scene. The rescue team that discovered the missing man on Wednesday morning brought him out on an eight-wheel Argo. Yarmouth County Vanguard; Cape Breton Post

Rescue aircraft dispatched as fishing boat takes on water off Yarmouth - Joint Task Force Atlantic says pump has been dropped to vessel and situation is 'stable'
A Hercules aircraft has dropped a pump to a 13-metre fishing vessel taking on water off Yarmouth, N.S., and the situation is "stable," according to the military's Joint Task Force Atlantic. Canadian Navy Lt. Len Hickey said a call to the Joint Rescue Coordination Centre came in around 8:30 a.m. AT about the fishing vessel Tide 'N Knots taking on water about 32 kilometres off the coast. The Hercules, along with a Cormorant helicopter and several Canadian Coast Guard vessels have been dispatched to the scene to help. "The latest update that I received noted that the Herc has dropped a pump to the vessel — that's in addition to their own existing pumps. They've got a couple running right now and the situation is stable," Hickey said. There's no word on how many people are on the vessel or whether anyone has been injured, though Hickey underscored the situation is "stable." CBC News

Nanaimo SAR recruiting new volunteers
The Nanaimo Search and Rescue group (NSAR) is looking for some additional volunteers and are holding a membership meeting next month. The group has been around since 1991 and have provided assistance to Nanaimo RCMP on countless ground and inland water searches and rescues. They are actively recruiting for community minded individuals, who are willing to be trained in a variety of areas such as first aid, rope rescue, climbing, swift water rescue, tracking and fund raising. Crew members require specific training over the course of several months, and upon completion, would be available for on-call shifts. CHEK News

Can cell providers tell when police spy on their networks? - New research shows it's possible to tell when police use IMSI catcher surveillance technology
For years, police and government agencies around the world have used a controversial investigative technique to spy on cellular phones, often disrupting cellular networks in the process. But one wireless carrier has had enough. T-Mobile Austria, which is a fully-owned subsidiary of Deutsche Telekom, teamed up with academics at SBA Research in Vienna to study the effects of electronic surveillance devices known as IMSI catchers on cellular networks — and most importantly, whether the use of such devices can be reliably detected. The researchers propose using the network monitoring systems that most carriers already have in place to look for tell-tale signs that an IMSI catcher may have been used. Their paper was presented at a computer security conference in France this past September. In Canada, IMSI catchers are technically illegal to possess or use, but documents shared with the CBC suggest that the

government may have granted the RCMP and CSIS an exception. In response to questions, Bell spokesperson Jacqueline Michelis wrote in an email that "the use of IMSI catchers is illegal in Canada. We don't publicly disclose the measures we take to ensure the security of our networks." TELUS and Videotron did not respond to a request for comment, while Rogers declined to comment. In the U.S. Verizon and T-Mobile USA declined to comment, AT&T did not respond to questions, and Sprint merely linked to the company's privacy policy. CBC News

Ismael Habib disait faire partie du groupe armé État islamique
Le suspect de terrorisme Ismael Habib avait confié à un agent d'infiltration de la GRC qu'il souhaitait partir en Syrie et qu'il faisait partie du groupe armé État islamique. C'est ce qui ressort du témoignage de l'agent en question ce matin au palais de justice de Montréal dans le cadre du procès de l'homme de 29 ans. «Il m'a indiqué qu'il voulait partir. J'ai demandé où. Il a dit la Syrie. J'ai demandé s'il faisait partie d'un groupe. Il a dit oui. J'ai demandé lequel? Il a répondu l'État islamique», a raconté le policier, caché derrière des paravents dans la salle de cours parce que son identité doit être protégée. Dans le cadre d'une enquête policière aux multiples scénarios, l'agent jouait le rôle du patron d'une organisation criminelle de passeurs illégaux et de fabrication de faux passeports. La Presse

Mexican visa lift expected to cost Canada $262M over a decade
Canada's decision to lift the visa requirement for Mexican travellers is expected to cost about $262 million over the next decade, in part to deal with a potential surge in asylum seekers, according to an internal government analysis. A regulatory impact analysis statement, just published on a Canadian government website, pegs the overall cost of the policy change that kicks in today at $433.5 million over 10 years due to extra enforcement resources and added costs associated with a potential spike in refugee claims. The analysis predicts those costs will be partially offset by an estimated $171.6 million in economic benefits through increased tourism from Mexico and a boost in trade and investment opportunities. The federal government will need to make significant investments in immigration and border control processes to support a sustainable visa lift," the report reads. "Federal and provincial/territorial governments will need to manage potential increases in asylum claimants from Mexico who may seek to exploit their new visa-free status in an attempt to migrate to Canada permanently." While the majority of costs for dropping the visa requirement, and replacing it with an electronic travel authorization, will be borne by the federal government, provincial and territorial governments will also be impacted by increased asylum claims, the report says. CBC News

Canada prepares for surge of Mexican immigrants after visa lift and Trump win
Officials in Canada are readying for a potential surge in Mexican migrants, as a promise to scrap a visa requirement comes into effect amid uncertainty over Donald Trump's promises to crack down on undocumented immigrants. From Thursday, Mexican visitors to Canada will no longer need visas. The move has left the government anticipating an increase in Mexican tourists and business travellers, a spokesperson for Canada's immigration ministry said. The visa was put in place in 2009 by the previous Conservative government to address an increase in what it described as bogus refugee claims. But the timing of the visa lift – following on the heels of Trump's vows to expel millions of illegal immigrants – has sparked concerns among officials that Canada could again see a substantial increase in Mexican asylum seekers, government sources told the Guardian. Between 2005 and 2008, Canadian officials said refugee claims from Mexico nearly tripled, making Mexico the number one source country for claims. Of the more than 9,400 claims filed by Mexicans in 2008, just 11% were accepted. The visa was embraced as a means of border control by the Conservative government. "The visa requirement I am announcing will give us a greater ability to manage the flow of people into Canada," the then immigration minister Jason Kenney said in a statement. "In addition to creating significant delays and spiralling new costs in our

refugee program, the sheer volume of these claims is undermining our ability to help people fleeing real persecution." The Guardian

Additional Charges Expected Against Man Charged In Fatal North London Crash
Additional charges are expected to be laid today against a 23-year-old man charged in connection with an alleged fatal drunk driving crash that killed a 60-year-old woman one week ago. It was exactly one week ago that 60-year-old Gloria Chivers was killed in an early morning crash at the intersection of Richmond and Sunningdale. Investigators say an SUV driving on Sunningdale collided with a vehicle that was stopped at a red light. Police say Chivers was pronounced dead at the scene. 23-year-old Jinghao Zhou faces multiple charges in that case, but was granted bail on Tuesday. However, soon after that decision was made, he was taken back into custody by immigration officials. Zhou's lawyer Jim Dean says he's been in contact with officials with the CBSA who tell him additional charges will be laid. "I don't know what those charges specifically are going to be but I understand they're federal immigration charges and we'll get more details." 640 News

Worldwide cyber-crime network hit in coordinated raids
One of the world's biggest networks of hijacked computers, which is suspected of being used to attack online banking customers, has been taken down following police swoops in 10 countries, German police said on Thursday. In an internationally coordinated campaign, authorities carried out the raids on Wednesday, seized servers and website domains and arrested suspected leaders of a criminal organisation, said police and prosecutors in northern Germany. Officials said they had seized 39 servers and several hundred thousand domains, depriving criminals of control of more than 50,000 computers in Germany alone. These hijacked computers were used to form a "botnet" to knock out other websites. Two people who are believed to have been the administrators of the botnet infrastructure known as "AVALANCHE" were arrested in Ukraine, investigators said. Another person was arrested in Berlin, officials added. The strike came in the same week that hackers tried to create the world's biggest botnet, or an army of zombie computers, by infecting the routers of 900,000 Deutsche Telekom with malicious software. Reuters

Cyberattacks Strike Saudi Arabia, Harming Aviation Agency
Saudi Arabia's aviation agency was attacked last month by an aggressive computer virus intended to disrupt high-profile government targets, officials and experts said on Thursday. The attack, which experts say emanated from outside the country, used a version of Shamoon, malware used to target the Saudi energy sector four years ago. Similar kinds of data-clearing software were used in 2014 against the Las Vegas Sands and Sony. The Saudi government confirmed the latest breaches on Thursday, after several cybersecurity firms noted them. Bloomberg News reported that thousands of computers were damaged at the headquarters of the General Authority of Civil Aviation starting in mid-November, "erasing critical data and bringing operations there to a halt for several days," although operations at Saudi airports did not appear to be affected. New York Times

Everyone is worried about internal cybersecurity threats, report

There are few things everyone can agree upon, but according to a new study almost all security professionals are concerned about insider threats. The study The Growing Security Threat From Insiders of 317 independently identified IT security professionals, from companies with more than 1,000 employees, conducted by Dimensional Research found 99.7 percent are concerned about internal security threats. The insider threats that particularly worry these execs are malware being installed by workers, 73 percent; stolen or compromised credentials, 66 percent; stolen data, 65 percent; and abuse of administrative privileges, 63 percent. Even when asked to consider both internal and external threats, 49 percent said the former were more worrisome. SC Magazine

Europol announces 5 arrests in 'unprecedented' cybercrime op
Europol says five arrests have been made in connection with a massive operation aimed at knocking out a cybercrime group accused of inflicting hundreds of millions of euros in losses worldwide. The European Union police agency says the sweep was "unprecedented in its scale" and resulted in the seizure of 39 servers used by the group, nicknamed Avalanche. Hundreds of thousands of domains associated with the group have been seized or blocked. Fernando Ruiz, the head of operations at Europol's Cybercrime Center, says the arrests were made Wednesday following months of work by law enforcement agencies from 30 different jurisdictions. He declined to say where the suspects were detained. Senior European justice official Michele Coninsx said Thursday the bust "marks a significant moment in the fight against serious organized cybercrime." Associated Press (St. John's Telegram)

New Proteus Malware: Jerk of All Trades?
Based on the ancient Andromeda botnet, new malware family Proteus is going for broke. According to Bleeping Computer, the code can transform infected devices into proxy servers, mine for cryptocurrencies, log keystrokes and check whether stolen account credentials are valid. In effect, it's a jerk of trades. Here's a rundown of the newest, multifunctional malware risk. Malware efforts have diversified over the past few years. Cybercriminals are no longer satisfied with simply shutting down PC functions or demanding small ransom payouts. They are getting adventurous, looking for ways to steal social data, redirect security efforts even as distributed denial-of-service (DDoS) attacks take place or lock down mobile devices with seemingly impenetrable ransomware. Few of the functions built into Proteus are new. As noted by Cointelegraph, for example, certain Android devices are shipped with firmware that could compromise bitcoin accounts. CIO, meanwhile, pointed out that the recent Dyn DDoS attack leveraged a host of compromised Internet of Things (IoT) devices to achieve massive traffic volumes at high speed. Security Intelligence

Suspected impaired driver crashes car into RCMP cruiser in Langley
A suspected impaired driver has been arrested after allegedly crashing his car into a RCMP cruiser in Langley. It happened Wednesday night near 208 Street and 76 Avenue. The RCMP officer was not injured but the car suffered some damage. Several liquor bottles could be seen on top of the vehicle once the suspected impaired driver had been taken into custody and the car was searched. The car also has Saskatchewan licence plates. Global News

Les libéraux retirent leur soutien au projet de loi Wynn
La femme de l'agent de la Gendarmerie royale du Canada (GRC) de Saint-Albert en Alberta tué en janvier 2015 promet de poursuivre le combat pour faire adopter un projet de loi nommé en l'honneur de son mari après que le gouvernement libéral du Canada eut indiqué ne pas soutenir le projet. C'est un coup à l'estomac. Nous avons travaillé si fort. Shelly Wynn, épouse de l'agent tué David Wynn Le projet de loi S-217 prévoit d'amender le Code criminel pour rendre obligatoire la présentation du passé criminel, des chefs d'accusation et des omissions d'apparaître en cour lors des audiences de libération sous caution. Pour l'instant, la présentation de ces preuves est laissée à la discrétion de la Couronne qui peut être représentée en Alberta par des policiers. Le passé criminel du meurtrier de l'agent David Wynn n'avait ainsi pas été présenté au juge de paix qui avait décidé de sa libération sous caution. Shawn Rehn avait cependant 68 condamnations à son actif et faisait face près d'une trentaine d'accusations, dont le non-respect d'une interdiction de posséder une arme à feu. « Nous ne voulons pas que ça arrive à qui

que ce soit d'autre. Et si changer un mot peut faire une différence pour une autre famille, c'est ce que nous voulons », a indiqué Shelly Wynn. Radio-Canada

Nanaimo RCMP continue investigation into suspected drug house
A heavy RCMP presence remains on hand at a home on 9th Street in Nanaimo's south end. Neighbours say a tactical RCMP team entered the home Tuesday with their guns drawn. Nanaimo RCMP have yet to reveal why officers entered the home, but neighbours say it's been a known drug house for a couple of years. They say lots of 'sketchy' people come and go at all hours of the day and night. RCMP Forensic officers have been meticulously combing through the home over the past two days. On Wednesday evening Mounties were seen pulling items – such as bikes, a chainsaw and generator – from the home's basement and loading them into a U-Haul. Nanaimo RCMP say they will issue a news release on Thursday, but spokesperson Cst. Gary O'Brien has hinted the bust is quite significant. CHEK News

Mixed Reactions as Trudeau Nixes Northern Gateway Pipeline but Approves Kinder Morgan Expansion
It was a day of mixed feelings after Prime Minister Justin Trudeau rejected Enbridge's Northern Gateway Pipeline but approved its Line 3 (L3RP) replacement project from Alberta to Wisconsin, as well as the controversial Kinder Morgan pipeline expansion in Vancouver. Indigenous opponents of Northern Gateway are finally breathing a sigh of relief following nearly a decade of protests and litigation from several First Nations and conservation groups on British Columbia's north and central coast. The 1,056-mile-long Northern Gateway pipeline would have carried diluted bitumen from Alberta's tar sands to the deepwater coastal port of Kitimat B.C. (…)However, several First Nations and municipalities near Vancouver have vowed to stop the Kinder Morgan expansion at any cost, which could mean that protests may intensify in the coming months, possibly similar to those taking place in Standing Rock, North Dakota. In early November the Royal Canadian Mounted Police (RCMP) spoke with Kinder Morgan CEO Ian Anderson regarding security of their project. "I'd be naive if I didn't expect that," Anderson told reporters. "Hopefully, it's peaceful. People have the right to express their views publicly and in that regard. It's when it goes beyond that that we'll have to be prepared. We've been in deep conversations with policing authorities, RCMP in the planning for our project—what can we anticipate and what their role needs to be." Indian Country Today Media Network

Perquisitions sur la réserve de Kanesatake liées à du trafic de stupéfiants
La GRC et la Sûreté du Québec mènent ce matin des perquisitions dans deux résidences de la réserve Mohawk de Kanesatake, sur la rive nord du fleuve Saint-Laurent, dans le cadre d'une enquête sur un réseau de trafic de stupéfiants. L'Unité mixte d'enquête sur le crime organisé autochtone de la GRC participe à l'opération. Le corps policier doit faire un bilan des saisies plus tard aujourd'hui. Les personnes visées sont notamment soupçonnées de tremper dans le commerce illégal du cannabis. La Presse

Lake Country crams cruiser
Mounties will once again be inviting the public to cram a police cruiser full of donations in support of the Lake Country Food Bank. The RCMP will again partner with the Lake Country Fire Department for the fifth annual RCMP Cram the Cruiser fundraising event Saturday at the Save-On-Foods in Lake Country between 9 a.m. and 2 p.m. Since its inception, Cram the Cruiser has raised more than 8,843 pounds of donated items, and nearly $11,250 in cash and cheques for the Lake Country Food Bank. Both regular and auxiliary members of the RCMP, in regular uniform or red serge with marked police vehicles, along with RCMP Citizen's On Patrol volunteers will be on location inviting the public to cram the cruiser with non-perishable food donations. Cash donations will also be accepted and all donations will solely benefit the food bank. "The number of those who rely on the support of the Lake Country Food Bank seems to grow each and every year," said Cpl. Jesse O'Donaghey, RCMP spokesperson. "I was shocked to hear that at least 500 individuals, one-fifth of those believed to be seniors, readily depend on this charitable organization for the everyday essentials they need to survive." Vernon Morning Star

Garth Cameron receives RCMP Certificate of Appreciation
When disaster strikes, the families of victims need support. A local hero received an RCMP Certificate of Appreciation at a ceremony held in Courtenay on Nov. 3. Garth Cameron, a 14-year veteran of the West Coast's volunteer Search and Rescue team, was recognized for his actions during a recovery effort to

find the remains of a father and son who died in a plane crash on Vargas Island Dec. 14, 2013. In a letter announcing the award, Island District RCMP Chief Superintendent Ray Bernoties said Cameron was a vital source of leadership during the search, ensuring the remains were handled respectfully and the victim's family members, and volunteer searchers, were taken care of. "His expertise, team building abilities, organization and leadership skills ensured that this difficult task was completed with the respect the families deserved," Bernoties wrote. "His loyal support to the RCMP, the Search and Rescue team and his community bring credit to himself and are in keeping with the highest standards of a Canadian Citizen." Westerly News

Family of Muslim teen attacked in Hamilton, Ont. believes assault may be hate crime
Police in Hamilton, Ont., say they are "not ruling anything out" after a Muslim teen was robbed in a weekend attack which his family suggests may have been a hate crime. Hamilton police said Noah Rabbani, a Grade 10 student from Saltfleet Secondary School, was walking near Rymal Road East and Fletcher Road just after midnight on Sunday when two men got out of a vehicle and attacked him. One of the suspects assaulted Rabbani with a baseball bat and both men fled the scene with the victim's backpack. Rabbani, who is a Muslim of Pakistani descent, suffered injuries to his brain, jaw, limbs and spine and remains in the intensive care unit, said his aunt in a Facebook post. 900 CHML

Death of 15-year-old Tina Fontaine drives Manitoba volunteer searchers
The 2014 discovery of 15-year-old Tina Fontaine's body — wrapped in a garbage bag and discarded in the Red River — shook Winnipeg to its core. To this day, it prompts residents of the city's North End neighbourhood, a low-income area with a high crime rate, to try to prevent others from meeting a similar fate. With virtually no public funding, they comb the river, the shoreline and the streets, determined to make a difference. Bad weather doesn't deter them. Neither does the very real risk of danger. Al-Qaida-led attacks intensify in Mali as Liberals prepare to announce peacekeeping mission
An al-Qaida faction has claimed responsibility for missile strikes aimed at U.N. forces in Mali as the Canadian government is poised to announce details of its peacekeeping deployment to Africa. Photos posted on social media by Al-Qaida in the Islamic Maghreb show two Grad missiles being fired at Timbuktu airport Tuesday, targeting what it called "French forces that invaded the lands of the Muslims." (…) The missiles missed their target, landing outside the airport perimeter, Reuters reported. The Gao bombing was claimed by the AQIM-linked Al Mourabitoun, whose "goal is to spread jihad across North Africa," according to the **Public Safety Canada** website. The Long War Journal reported there had been 228 al-Qaida-linked attacks in the region so far in 2016, many of them in northern Mali. "This represents a significant increase in the al Qaeda-led insurgency in northern Mali since last year, which has also spilled over the borders more frequently than the prior two years." Deadly storms add to drought, flood and fires plaguing South
Five people were killed in two states after at least 13 twisters damaged homes, splintered barns and toppled trees in parts of Alabama, Louisiana, Mississippi and Tennessee, the National Weather Service confirmed. At least a dozen more people were injured early Wednesday, adding to a seemingly biblical onslaught of drought, flood and fire plaguing the South. The storms tore through just as firefighters began to get control of wildfires that killed seven and damaged or wiped out more than 700 homes and businesses around the resort town of Gatlinburg, Tennessee. In Alabama, the weather system dumped more than 2 inches of rain in areas that had been parched by months of choking drought. Associated Press (Metro News)

MINISTER / MINISTRE

Le gouvernement Trudeau souligne le 6 décembre sans parler d'armes à feu
Plusieurs gestes de recueillement sont posés en ce jour commémorant le drame de l'Ecole polytechnique de Montréal qui a entraîné 14 jeunes femmes dans la mort, il y a 27 ans. Des cérémonies se déroulent partout au Canada, notamment sur le campus de l'Ecole, où une gerbe de 14 roses blanches a été déposée devant la plaque commémorative. Les drapeaux y resteront en berne jusqu'au crépuscule.
Une diplômée de l'Ecole polytechnique, Heidi Rathjen, militante depuis le drame pour le contrôle des armes à feu au Canada, en a profité de l'anniversaire pour dénoncer l'inaction du gouvernement Trudeau.

(…) En arrivant à la réunion de cabinet, mardi matin, le ministre responsable de ce dossier, Ralph Goodale, n'a pas voulu répondre aux questions des journalistes sur le sujet. À midi, le premier ministre et quelques-uns de ses ministres prévoyaient déposer des roses blanches au cours d'une cérémonie devant le parlement. M. Trudeau et sa ministre de la Condition féminine ont publié, en matinée, des communiqués pour souligner le 6 décembre, communiqués qui ne font aucune allusion au contrôle des armes. Six aboriginals file complaint with human rights tribunal over John Furlong investigation
Six Northern British Columbia First Nations members are accusing the federal government and RCMP of racial and ethnic discrimination for bungling their allegations of abuse against Vancouver corporate director John Furlong. Maurice Joseph, Emma Williams, Dorothy Williams, Richard Perry, Ann Tom and Cathy Woodgate filed a complaint Monday (December 5) with the Canadian Human Rights Tribunal. "Although the government failed to acknowledge, let alone investigate, our concerns regarding alleged abuse by John Furlong, it has favoured Furlong in ways that have silenced and re-traumatized us," said the complaint by the ex-Furlong students. "Neither the **Public Safety Ministry** nor the RCMP provided a service to remedy this situation. (…) On July 13, the Assembly of First Nations resolved at its annual convention to urge the federal government and RCMP to thoroughly and impartially investigate the allegations of abuse and urge the government to meet with anyone affected to hear their concerns about the conduct of the investigations and to discuss acceptable remedies. EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Service restored after landline calls, 911 services down across N.L.
Bell Aliant is reporting that service is restored after multiple outages affected landline calls across Newfoundland and Labrador Tuesday, including 911 emergency services. Service was restored around 11:30 a.m. Tuesday, but it is unclear how many users were affected. Bell Aliant has not said what caused the issue. The Royal Newfoundland Constabulary took to Twitter to spread the word and provide alternate contact information for those in need of services during phone outages. CBC News

Winter storm halts some mail delivery in southern Manitoba
The winter storm that's hitting southern Manitoba is affecting roads, flights, schools and even the mail. The severe weather conditions in the area are currently delaying mail delivery, according to Canada Post. "While every effort is being made to deliver the mail, some customers may not receive mail today," stated Canada Post in a tweet Tuesday. Global News

Environment Canada to get $83M in new and upgraded weather radar systems
The federal government has quietly awarded an $83-million contract to outfit Environment Canada with a new national network of weather radar systems. The contract was awarded by Public Works and Government Services in June of this year without an accompanying public announcement. Documents seeking input from industry before the contract was awarded say Environment Canada is embarking on a multi-year project to rejuvenate its network of meteorological radar. "The requirement is to replace approximately 20 of the existing weather radar network and related infrastructure by the spring of 2023," the documents say. The letter explains that Canada has a network of 31 radar systems across the country, one-third of which can be upgraded, but the other two-thirds have to be replaced. CBC News

NATIONAL SECURITY CONSULTATIONS / CONSULTATIONS SUR LA SÉCURITÉ NATIONALE

Don't repeat past mistakes, Privacy Commissioner warns as government reviews national security framework

The government's initiative to modernize Canada's national security framework should draw from lessons of the post-9-11 world, including commissions of inquiry and Edward Snowden's revelations of mass surveillance, says the federal Privacy Commissioner. The importance of strengthening privacy protections is highlighted in a formal submission to the government's public consultation on Canada's national security framework signed by Commissioner Daniel Therrien and all provincial and territorial privacy commissioners and ombudspersons. Commissioner Therrien was joined by Jean Chartier, President of the Commission d'accès à l'information du Québec and Brian Beamish, Ontario Information and Privacy Commissioner, at a press conference to unveil and discuss the submission Tuesday. "Everyone can agree that the police and national security agencies need adequate tools to protect us, and that these tools need to be adapted to the digital world," says Commissioner Therrien. "But state powers have already been significantly expanded, particularly with Bills C-51 and C-13. At the same time, we have seen too many cases of inappropriate and sometimes illegal conduct by state officials that have impacted on the rights of ordinary citizens not suspected of criminal or terrorist activities. In my view, those serious incidents were caused by deficient legal standards that failed to set appropriate limits on government actions," he says. "These key lessons from history remind us that clear safeguards are needed to protect rights and prevent abuse, that national security agencies must be subject to effective review, and that any new state powers must be justified on the basis of evidence. Government should only propose and Parliament should only approve new state powers if they are demonstrated to be necessary and proportionate – not merely convenient." The importance of considering the impact of surveillance measures on rights is emphasized throughout the submission, which addresses issues such as collection and use of metadata by national security agencies and law enforcement; encryption; information sharing by government and oversight. "In my view, this is not the time to further expand state powers and reduce individual rights. Rather, it is time to enhance both legal standards and oversight to ensure that we do not repeat past mistakes and that we ultimately achieve real balance between security and respect for basic individual rights," says Commissioner Therrien. Facebook and Other Tech Companies Seek to Curb Flow of Terrorist Content
For all the good that has come from the internet, the online world has also served as a powerful device for recruiting terrorists and spreading their propaganda. A coalition of top technology companies is now trying to change that. Facebook, Google, Twitter and Microsoft announced on Monday that they have teamed up to fight the spread of terrorist content over the web by sharing technology and information to reduce the flow of terrorist propaganda across their services. The group plans to create a kind of shared digital database, "fingerprinting" all of the terrorist content that is flagged. By collectively tracking that information, the companies said they could make sure a video posted on Twitter, for instance, did not appear later on Facebook. New York Times (2016-12-05); Softpedia

UNB to beta test Jeopardy computer champ's cybercrime fighting abilities
Just seven months after IBM announced it would begin teaching its Watson computer system to fight cybercrime, the company is graduating Watson to the next level of instruction. Caleb Barlow, vice-president of IBM Security, says 40 organizations will begin beta testing of the cognitive technology. "The learning process is going well. Part of this is getting it out there to several beta customers including the

University of New Brunswick, California State Polytechnic, Sun Life Financial, University of Rochester Medical Centres and others," Barlow said in an interview. Watson -- IBM's question-answering computer system -- was originally designed to compete (and win) on the television quiz show Jeopardy, but the technology has since been used on other problem-solving projects, from clothing design to cancer. Hacker Claims To Push Malicious Firmware Update to 3.2 Million Home Routers
One of the hackers who amassed a new massive army of zombie internet-connected devices that can launch disruptive cyberattacks—even by mistake—now claims to have taken control of 3.2 million home routers, taking advantage of a flaw that allowed anyone to connect to them. On Monday, the cybercriminal, who calls himself BestBuy, claimed to have set up a server that would automatically connect to vulnerable routers and push a malicious firmware update to them. This, he said, would grant him persistent access and the ability to lock out the owners as well as internet providers and device manufacturers. Motherboard

Officer attacked with bear spray, suspects considered armed and dangerous
Local RCMP are looking for suspects considered armed and dangerous after an officer was bear sprayed early this morning. Around 4 a.m. Mounties were called to a rural property north east of Grande Prairie to reports of a break and enter. The arriving officer found the vehicle and while trying to speak with the occupants, the officer was sprayed. The suspect vehicle took off through a field and the officer was able to call for help. That vehicle was found by police but another vehicle was stolen from a nearby property. Q99 Live

Woman files complaint against Whistler RCMP over cellphone seizure
A Vancouver woman has filed a formal RCMP complaint, alleging police in Whistler seized her cellphone after she used it to film an arrest. Valerie Connelly said when she refused to give officers the passcode to her phone, she herself was arrested. "There was no conversation — and you can see it in the video that I have — he just walked up and grabbed it out of my hands," said Connelly.
While Mounties have told her she was arrested for obstruction, it's a case that raises concerns with civil rights activists. (…) While Whistler RCMP didn't respond to CBC's request for comment directly, an email from one of the officers to Connelly said her phone was seized as part of an ongoing investigation and that she was detained for obstruction, but released without charges. "E" Division, the provincial body governing RCMP in BC, responded to CBC's request for comment with a statement but wouldn't comment on the specifics of this case. "In general terms, police have the authority to seize cellular phones and other video recording devices from the public, if those devices contain evidence that is not available through other means, and that evidence is at risk of imminent loss or destruction," said Sgt. Annie Linteau. The policy director for the B.C. Civil Liberties Association questioned why officers felt the need to seize Connelly's cellphone under the circumstances as she has described them. "From the outset, there is a concern that there may not have been legal authority for the confiscation," said Micheal Vonn. CBC News

Concerns raised about police conducting checkpoints without flashing lights
Concerns are being raised about RCMP officers conducting checkpoints without engaging their flashing blue and red lights. A recent video taken at nighttime in Waterville, N.S. shows the RCMP pulling over drivers without engaging their flashing red and blue lights, which is against policy. "It's unsafe. Somebody's going to get hurt or killed," says Wayne Bezanson, who recorded the video. "It's about time it got stopped." The officers approached Bezanson while he was filming and asked what he was doing. In the video, Bezanson can be heard asking why the flashing lights aren't on and whether that is against police protocol. The officer tells Bezanson it isn't, but according to the RCMP's official spokesperson, it is against protocol under the RCMP's national policy. "The emergency equipment on the police vehicle needs to be active at all times during the contact with the person who's being stopped," says RCMP Cpl. Jennifer Clarke. CTV News

Canada-wide warrant issued for suspect in B.C. sex offences
A Canada-wide warrant has been issued for a man wanted for alleged sexual offences committed in Prince George in 1993. RCMP are asking the public's help in locating Rupert William Burr, 55, who has been sought by police in B.C. since 1998. The search is being widened by the new warrant. Burr's current whereabouts are unknown and he is believed to be using an alias. The Alberta-born man is believed to have been in the community of Worsley as recently as last year. Metro News

Central man arrested following drug seizure
A 58-year-old Centreville man has been arrested in connection with the seizure of drugs, including cocaine. On Dec. 4, following a three-month investigation, RCMP officers executed a search warrant at a residence in Centreville. Police seized a quantity of cocaine as well as Canadian currency, firearms and prescription narcotics. The search was conducted by officers from the RCMP's Federal Policing Operations West, New-Wes-Valley detachment and Police Dog Services. Gander Beacon

Grounding wire stolen from NL Power's Lethbridge substation
Newfoundland Power says thieves and vandals continue to put the lives of its employees and the public at risk by ignoring warnings about the dangers of illegally entering high voltage substations. Sometime on or before this past Sunday, vandals entered the Lethbridge substation on the Bonavista Peninsula, the company said in a news release Tuesday. A hole was cut in the substation fence, causing damage to electrical equipment. Copper grounding wire that was connected to the high voltage electricity grid was also stolen, compromising the integrity and reliability of the electricity system. (…) Anyone with information is asked to contact the RCMP, RNC or Crime Stoppers. The Labradorian

Teens accused of stealing car, joyriding dangerously though Halifax
Two 16-year-old boys are due in youth court in Halifax today, accused of stealing a car, fleeing police and driving all the way from Bedford to Halifax on a flat tire. According to RCMP, the teens allegedly stole the car from a home on St. Margarets Bay Road in Timberlea on Friday. Officers spotted the stolen vehicle at about 10:30 p.m. Monday night on Prospect Road, near Brookside. The teens tried to evade officers by driving into a parking lot then speeding away, according to RCMP. Police said they didn't chase the vehicle but sent out the description to other officers. The vehicle was then spotted in the Bedford area. At around 2 a.m. this morning police put down a Stop Stick — a device that deflates tires, safely, without a blowout — and were able to flatten one of the tires. CBC News

Lucky to escape unharmed
The Penticton RCMP say a woman that opened an exploding package in a local trailer park last week was lucky to escape mostly uninjured. During a weekly briefing Tuesday, Cpl. Don Wrigglesworth said the package was an unlabelled cardboard box, wrapped in red Christmas paper, containing an explosive device. He said the bomb squad determined the device could have caused serious injury. Investigators have spoken to several people in different residences at the mobile home park on Skaha Lake Road. There have been no other incidents of this type, Wrigglesworth said. Castanet

Cop Shop event in Yarmouth brings RCMP, students together

A group of students from Central School in Yarmouth went for a special outing Friday, thanks to the Cop Shop program. This was the second year for the initiative, which gives students a chance to meet RCMP officers, go to lunch with them and do some Christmas shopping with them. Seven police officers – representing the Yarmouth town and rural detachments – took part in the Dec. 2 event, including staff sergeants Michel Lacroix (town) and Ben Parry (rural). Nine students from Central participated. They were picked up in squad cars by officers, who then drove them to Wendy's, where they had lunch, which was donated by the restaurant. Next it was off to Bulk Barn, where the youngsters were able to get treat bags, courtesy of the store. From there, the officers and students made their way to Dollarama, where the children picked out Christmas gifts. Dollarama donated $25 per student for the event. After returning to Central School, the students and officers teamed up to do some gift-wrapping. Yarmouth County Vanguard (Nova News Now)

All grown up: Nova Scotia RCMP puppy moves away for next phase of police dog training
A RCMP puppy many Nova Scotians watched grow up through social media is moving on to his next adventure. Hamer (pronounced "Hammer"), a one-year-old German Shepherd, was introduced to the public last December at just 10-weeks-old with his imprinter, Const. Richard Bushey. An imprinter is a RCMP officer trained to raise puppies into potential police dogs. Through videos and social media updates, including one in March 2016, Nova Scotians watched Hamer grow in photos and video highlighting his progress. "The goal of puppy training is to develop a confident dog who can work in any setting," Cpl. Glenn Brown, Bushey's imprinting mentor, said in a RCMP release. (…)Now in New Brunswick, Hamer is working with an RCMP dog handler who may become his permanent partner. The release said if the pair seems to mesh, they will be begin the training program at the RCMP Police Dog Service Training Centre in Innisfail, Alberta, in 2017. Metro News

Centralized 911 dispatch centre inches closer towards becoming a reality
As the top cop of the Victoria police, acting chief Del Manak is always looking for ways the department can become more efficient. The department is currently in the midst of an efficiency review focused on front line operations and has ongoing discussions with regional partners on integrating some services. Talks continue with Saanich police on how units can be integrated to fight cyber crime. Computer forensic services have already joined forces. But one thing that Manak has supported for many years and is now inching further towards a reality is the centralized Emergency Response Dispatch Centre, which would bring three dispatch points (for 911 calls and police dispatch) under one roof. It would also be purpose built designed to withstand a major earthquake. Currently, 911 calls for the region are answered among three centres — Victoria police, Saanich police and the Westshore RCMP. The information is then transferred to the appropriate agency for dispatch, but having multiple call takers has caused officials concern. Victoria News

20 police cars packed with food for seniors
Enough food was donated to fill 20 vehicles when a "pack-a-police-car" event was held Saturday at local Save-On Foods.The outcome left Prince George RCMP in an upbeat mood."The generosity of the community was remarkable" Cpl. Craig Douglass said. "We believed this would be a successful event, but had no idea that it would be this successful." Prince George Citizen

Canada-wide warrant issued for mom in girl's disappearance
Niagara police have issued a Canada-wide warrant for a woman they allege abducted her nine-year-old daughter, prompting an Amber Alert over the weekend. Layla Sabry and her mother, Allana Haist, were last seen Thursday around 6 p.m. on King St. in Welland, Niagara Regional Police say. Layla's case continues to be treated as a missing person investigation, but police said Saturday that enough time had elapsed that they concluded the Amber Alert. Police are asking anyone with information regarding the girl or her mother's whereabouts to contact 911 or Crime Stoppers. Canadian Press (Kingston Whig Standard, CJOB)

Leitch vows to 'lock up' illegal pipeline protestors
Conservative leadership candidate Kellie Leitch has turned her right-of-centre brand of populism onto Canada's pipeline protesters, vowing to increase penalties for illegal protests and calling for environmental lobbying to be recognized as a political activity. In a Facebook messaged posted Tuesday,

Leitch outlined a five-point plan in response to the political backlash against oil pipeline construction happening from B.C. to Quebec. She calls for higher penalties against violence and vandalism, "ensuring those who provide support for the aforementioned actions are charged." She wants to create a new joint police force to target environmental protests and to classify environmental lobbying as political activity "to get international money out of the process." She also calling for unspecified changes to regulations to "ensure Canada's ability to compete in the marketplace." (…) The new security "force" that Leitch proposes would be "comprised of specialized components from the RCMP, CSIS, CRA and DFAIT to coordinate investigations, freeze bank accounts, and lay charges to ensure that those who seek to illegally disrupt natural resource development projects are brought to justice." iPolitics

Here Are the Next '20 Standing Rocks' According to Frontline Activists
Anyone with even a passing knowledge of energy politics surely knows what a massive, unexpected victory it was for thousands of Standing Rock campers when the US Army announced its decision to block the Dakota Access pipeline from its planned route. (…) Even before that surprise, Indigenous groups north of the border were already encouraged by what was happening in Standing Rock. Just last month, Kanesatake Grand Chief Serge Simon made it clear that mass civil disobedience is on the table for Indigenous people opposing megaprojects. The Mohawk leader told APTN Canada could see "20 Standing Rocks" if projects go ahead without free, prior and informed consent. (…) Kinder Morgan's recently-approved Trans Mountain expansion, which will transport raw bitumen from Alberta through BC's lower mainland, is the most obviously heated pipeline fight in Canada, and one the major political players are already gesturing toward. "The Standing Rock Sioux won today, and we will win on Kinder Morgan," Green Party Leader Elizabeth May said in an email blast yesterday. Opponents say the project will increase tanker traffic in the area sevenfold and put Canada's climate targets in jeopardy. VICE News

Montreal mother convicted of attempting to kill daughter granted day parole
After spending less than a year in prison for attempting to kill her daughter, Johra Kaleki has been granted day parole. In February, Kaleki was sentenced to just under three years in prison for attacking her daughter, Bahar Ebrahimi, who was 19 years old at the time. Her daughter went out with friends to a nightclub. When she returned to her Dorval home after midnight, her mother attacked her. The Parole Board of Canada consented to day parole because Kaleki has exhibited good behaviour and has the support of her husband and daughters. However, the board members said they felt she still has some introspection to do and refused her full release. CBC News

COMMUNITY SAFETY & PARTNERSHIPS / SÉCURITÉ DE LA POPULATION ET PARTENARIATS

Une centaine de femmes manifestent à Québec
Une centaine de femmes ont encerclé la fontaine de Tourny avec le symbolique ruban blanc à l'occasion du 6 décembre, Journée nationale de commémoration et d'action contre la violence faite aux femmes. Cette journée est également le moment de commémorer le drame survenu en 1989 à l'École polytechnique de Montréal, où 14 jeunes femmes ont été assassinées. Journal de Montréal

Haut taux de violence familiale en Saskatchewan : un problème à causes multiples
Le fait que la Saskatchewan compte une population autochtone importante qui vit dans des conditions particulières et que les communautés rurales, plus isolées, sont nombreuses dans cette province au coeur des Prairies joue un rôle non négligeable.
Les victimes de violence conjugale proviennent de tous les milieux, selon la coordonnatrice de l'Association provinciale des maisons d'hébergement pour femmes de la Saskatchewan (PATHS), Jo-Anne Dusel, mais certaines populations sont toutefois plus à risque, notamment les femmes autochtones. Radio-Canada

B.C. chief apologizes, steps away from missing women portfolio over social media photo

The B.C. regional chief for the Assembly of First Nations has resigned as head of the assembly's missing and murdered women portfolio after posting a picture with sexual undertones on social media. Shane Gottfriedson has told a special meeting of chiefs that the post - a picture of his legs with an emoji in his groin area - was not his finest moment. Gottfriedson says he spoke to AFN National Chief Perry Bellegarde directly about the matter. Canadian Press (Vancouver Sun, Times Colonist); APTN

Police chief apologizes for language used to describe victim in homicide arrest
Winnipeg Police Chief Danny Smyth apologized Tuesday for the language used in recent police statements about the 2014 killing of Angela Marie Poorman. Poorman, a 29-year-old mother of three, was stabbed to death in the North End on Dec. 14, 2014. On Nov. 29, 2016, Winnipeg police announced they had charged an 18-year-old man with second-degree murder in Poorman's death. He could not be named because he was a minor at the time of the homicide. CBC News

Carfentanil responsible for at least 15 deaths as opioid crisis takes new deadly turn
The deadly opioid carfentanil has killed 15 people across Alberta, 14 in the last two months. Alberta's chief medical officer Dr. Karen Grimsrud said the concern is clear within Alberta Health Services, and they must come up with a plan to battle the lethal concoction, which is roughly 100 times more potent than fentanyl. "I am deeply concerned about the increasing number of deaths associated with carfentanil," Grimsrud said in a statement. "It's possible these individuals were not aware they were taking it. Albertans need to know that carfentanil is here ... and that it's an extremely dangerous and deadly opioid. Even the smallest trace can be lethal." Read more: This one intercepted package had the potential to kill every Canadian. In an effort to fight fentanyl-related overdoses, the overdose antidote naloxone was made available at 900 sites across the province, including pharmacies. Calgary Police Service drug unit Staff Sgt. Martin Schiavetta said they spoke at length about the highly toxic drug in July after a one-kilogram seizure of carfentanil. Calgary Sun; Radio-Canada

Elephant sedative carfentanil detected in Waterloo region, drug taskforce warns
Carfentanil has been found in Waterloo region, a drug taskforce is warning. Health Canada confirmed carfentanil was found in green counterfeit pills stamped CDN and 80, which resemble OxyContin pills, the Waterloo Region Integrated Drug Strategy said in an overdose alert sent out Monday. The notice warns carfentanil is an opioid used to sedate large animals, such as elephants, "and is not for human consumption." Carfentanil cannot be detected by sight, smell or taste. CBC News

High number of missing kids 'unacceptable,' says Kenora, Ont. OPP officer
provincial police officer in the northwestern Ontario city of Kenora says more needs to be done to help at-risk kids in his community, in light of the high number reported missing each year. In a city with about 15,000 people, Kenora OPP dealt with close to 900 calls about missing persons last year, said Const. Bob Bernie, the detachment's community mobilization officer. The vast majority of those calls were about kids, he said. "That's a number that's really unacceptable," said Bernie, adding that many of the calls involve children living in group homes, and habitual runaways. "We have a lot of kids in care in Kenora," he said, "and oftentimes they're away from family, they're perhaps not connected to resources in a meaningful way ... and they run away." CBC News

Il y a 27 ans, la tuerie de l'École polytechnique de Montréal
Depuis 27 ans aujourd'hui, le début du mois de décembre est marqué par la commémoration de la tuerie de l'École polytechnique de Montréal où 14 jeunes femmes ont perdu la vie, fauchée par les balles d'un tireur misogyne. Cette année, la mémoire des 14 jeunes femmes sera honorée sobrement sur le campus universitaire. Une gerbe de 14 roses blanches sera déposée devant la plaque commémorative de la tragédie et les drapeaux de l'établissement seront mis en berne de l'aube au crépuscule. Le premier ministre Justin Trudeau déposera également des fleurs sur la Colline du Parlement, à Ottawa, en mémoire des victimes. « Il y a 27 ans, 14 jeunes femmes ont été assassinées à l'École Polytechnique de Montréal seulement parce qu'elles étaient des femmes », a déclaré M. Trudeau par voie de communiqué. « En ce sombre anniversaire, prenons le temps de réfléchir à ce que les Canadiens - femmes, hommes et jeunes - peuvent faire pour mettre fin aux fléaux que sont la misogynie et la violence basée sur le sexe au pays et partout dans le monde. » La Presse Canadienne / Radio-Canada (Huffington Post)

27e anniversaire de la tuerie à la Poly: Trudeau muet sur les armes
En ce 27e anniversaire de la tragédie de l'École polytechnique, le gouvernement de Justin Trudeau dénonce la violence dont sont victimes les femmes, mais ne dit mot de ses intentions pour mieux contrôler les armes à feu. Durant la campagne électorale de 2015, les libéraux ont promis de défaire des mesures prises par les conservateurs de Stephen Harper. La loi C-42, adoptée par les conservateurs, a facilité le transport des armes à autorisation restreinte et des armes prohibées. Depuis l'entrée en vigueur de cette loi, un propriétaire d'arme peut transporter sa possession n'importe où et non pas seulement de son domicile à son centre de tir. La loi a également retiré l'obligation au vendeur d'armes à feu de vérifier le permis de possession d'armes de l'acheteur avant de conclure la transaction. Les libéraux n'ont toujours pas déposé de projet de loi pour modifier C-42. La semaine dernière, le groupe PolySeSouvient, qui milite pour un meilleur contrôle des armes à feu, a manifesté son impatience. La Presse Canadienne (La Presse)

Une centaine de femmes manifestent à Québec
Une centaine de femmes ont encerclé la fontaine de Tourny avec le symbolique ruban blanc à l'occasion du 6 décembre, Journée nationale de commémoration et d'action contre la violence faite aux femmes. Cette journée est également le moment de commémorer le drame survenu en 1989 à l'École polytechnique de Montréal, où 14 jeunes femmes ont été assassinées. Les femmes présentes voulaient appuyer le dépôt d'une pétition dénonçant le harcèlement et les violences vécus par les femmes locataires. Selon le collectif, 1054 femmes et enfants ont été tuées par des hommes au Québec depuis le 6 décembre 1989. Journal de Québec

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

Perry Bellegarde wants First Nations to move beyond 'doom and gloom' ahead of Trudeau address to chiefs
While many of Canada's First Nations are gripped by poverty, suicide and a funding crunch, AFN National Chief Perry Bellegarde sounded a positive message Tuesday, calling on Indigenous communities to move beyond the "doom and gloom." (…) Notwithstanding his organization's relative satisfaction with the Trudeau government, Bellegarde chided them for dragging their heels on launching the inquiry into missing and murdered Indigenous women. The prime minister launched the process last year, and has appointed five commissioners, but work has yet to begin. Hundreds of people have been waiting for years for this inquiry to begin. They should not have to wait any longer," he said, adding First Nations people do not want recommendations in two year's time to address the prevalence of violence against Indigenous women. CBC News

The 27th annual Vigil for Women Against Violence, is set to go at 12 PM at Coulter Parkette in downtown Port Elgin. Pat Sanagan of the Canadian Federation of University Women, organizers of the event, tells Bayshore Broadcasting News, "Every year there are incidents in the news to which we can turn, to remind people that violence against women is not going away." Sanagan suggests this year is worse than ever, citing the Missing and Murdered Indigenous Women (MMIW) inquiry; female RCMP officers who were compensated for sexual harassment in the workplace; and myriad sexual assault cases involving celebrities. She says it's the MMIW stories that have hit home. Bayshore Broadcasting

Honour victims by ending violence against women
An opinion piece states, "In our times, the achievements in civil rights for women have been significant. Some major hurdles have been passed, too: Canada has had a woman prime minister. Women have distinguished themselves from the Supreme Court and the Senate to executive positions in the corporate world. But despite these great gains, women remain the targets of sexist-fueled violence. On Dec. 6, 1989, a deeply troubled young man with a violent attitude towards women unleashed his disturbed sentiments by killing 14 female engineering students at l'École Polytechnique de Montréal. That's why on this day every year, we observe the National Day of Remembrance and Action on Violence Against

Women. In the aftermath of the massacre, we learned that the killer, Marc Lépine, grew up in an environment where abuse against women was common. Too many women are still subjected to this kind of abuse within the privacy of their homes and in the company of their families. While violent crime overall is on the decline in Canada, every year more than 170,000 women are victims of violent crime - 83 per cent of the time men were responsible and 45 per cent of the time the attacker is the woman's intimate partner. Tragically violence against aboriginal women is not in decline. Aboriginal women and girls are 3-4 times more likely to be murdered or sexually assaulted than other women. This national crisis has prompted the government to create its National Inquiry into Missing and Murdered Indigenous Women and Girls." Leader-Post

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Manitoba premier says he is not alone in wanting delay in marijuana bill
Manitoba Premier Brian Pallister wants the federal government to postpone legislation to legalize marijuana. The federal Liberals have promised the law in the spring, but Pallister says he and some other premiers have concerns that there are still many details to work out. Pallister says issues such as the minimum age for users, maximum strength of the pot and proper distribution are still up in the air. The Progressive Conservative premier also says there needs to be a large public awareness campaign about the dangers of driving while high. Pallister says he wants the provinces to have a common set of rules on marijuana. Canadian Press (570 News, Castanet)

Ontario cold to pot at LCBO, poll shows
Selling pot at the liquor store isn't sparking up overwhelming public support, according to stats released in a new poll. The Forum Research survey provided exclusively to the Toronto Sun found that more than a third of Ontarians (36%) think pharmacies are the best place to sell recreational pot, not the LCBO as Premier Kathleen Wynne has suggested. The survey says that specialized marijuana dispensaries rank second with 26% support while selling pot at the LCBO ranked lower with 16% support. "We have polled this issue nationally as well as provincially here in Ontario, and the answers are essentially the same; dispensaries and pharmacies are favoured as the best places to sell marijuana once it is legal, and the LCBO is not seen to be a favoured location," said Forum Research president Lorne Bozinoff. Toronto Sun

Ex-AFN leader teams with grower to bring medical marijuana to First nations
Phil Fontaine, the former national chief of the Assembly of First Nations, has teamed up with one of the first licensed cannabis growers to bring medical marijuana to First Nations. Indigenous Roots is a joint venture between Mr. Fontaine and Cronos Group, which operates the Peace Naturals Project in Ontario and The Zone Produce Ltd. in British Columbia. It would work co-operatively with First Nations to supply people living on and off reserves with the drug. In a news release issued Tuesday morning, the partners say the idea is to allow First Nations to invest, operate, and participate in the economic opportunities related to the emerging cannabis industry. (…) The Liberal government has promised to table legislation to legalize marijuana for recreational use in the spring of 2017, although it remains unclear when the drug will be taken off the prohibited list for the first time since 1923. Globe and Mail

PUBLIC SERVICE / FONCTION PUBLIQUE

Feds overpaid workers $56M
The malfunctioning Phoenix pay system that left thousands of Canada's public servants unpaid has also doled out millions of dollars in overpayments to 13,700 employees since its illfated launch. A letter sent to MPs on the government operations committee says a total of 20,600 public servants had received overpayments of more than $56 million by mid-October. The $5 6 millionin over payments were generated by two pay systems - the old clunky regional pay system and the new Phoenix system, whose first phase went live in February. The old pay system, which was decommissioned after the second phase of Phoenix was rolled out in April, generated $23 million in overpayments. Postmedia (Toronto Sun, A10)

Lack of pay irks workers in payroll snafu
The federal government's Phoenix payroll system continues to be plagued with problems, resulting in thousands of workers not getting paid for months. Roxanne Merrill Young is one of those workers. She is one of 80,000 federal government workers affected by the Phoenix pay problems since last spring. Merrill Young said she works as a seasonal employee at 5th Canadian Division Support Base Gagetown. She said she was part of a team of groundsworkers employed to repair streams and brooks on the base following military training exercises. Merrill Young said she received her first several pays on time. The next two were late, she said, and were sent by courier to her only after she made repeated phone calls asking for what she was owed. Now, she said, she's still waiting for a month's salary. "I have been told I could have to wait 10 to 12 weeks for this money. I think that's ridiculous," she said. And, she said, now the Department of Public Works has no record of employment for her so she is unable to apply for employment insurance. Daily Gleaner, A1

Don't offload Syrian refugees on provinces, Senate committee tells feds
The Senate human rights committee is joining a chorus of voices raising concerns about thousands of Syrian refugees about to be shifted on to provincial assistance rolls. Committee chairman Sen. Jim Munson says the federal government has an ongoing responsibility to ensure that language training is provided so that 30,000 Syrians welcomed to Canada in the last year can successfully join the work force and society. Federally sponsored refugees are given a year's worth of supplementary benefits, but that assistance is about to expire and many thousands of the new arrivals still require help — which will fall to provincially funded programs. Canadian Press (Metro News); La Presse canadienne

Dion annonce 8 millions $ d'aide pour le Liban
Le ministre des Affaires étrangères, Stéphane Dion, a annoncé une aide de 8 millions $ pour le Liban, lundi, au cours d'une visite dans ce pays. Selon Affaires mondiales Canada, cette somme servira à aider le Liban à faire face à l'afflux de réfugiés syriens, à favoriser la participation des femmes dans la vie du pays et à soutenir les Forces armées libanaises dans leur lutte contre l'extrémisme. «Le Canada et le Liban entretiennent des liens forts et profonds, et nos deux pays continuent à travailler en étroite collaboration pour parvenir à la paix, la sécurité et la stabilité au Moyen-Orient», a déclaré M. Dion, dans un communiqué. Au cours de sa visite, le ministre Dion a, entre autres, visité deux campements de réfugiés auxquels le Canada collabore en fournissant de l'aide humanitaire. Le Liban accueille plus de 1 million de réfugiés, pour une population d'environ 4,5 millions de personnes. Journal de Montreal (Journal de Québec)

INTERNATIONAL

NATO chief trumpets new 'momentum' with EU military ties
NATO's chief says the alliance and the European Union are moving forward on deepening cooperation, as U.S. President-elect Donald Trump insists European allies start pulling their own military weight. NATO Secretary General Jens Stoltenberg told reporters before chairing talks between NATO foreign ministers Tuesday that "we have a momentum now." He said NATO and the EU would endorse 40 proposals for boosting cooperation on cyber security and hybrid threats, operations at sea and helping neighboring countries better defend themselves. Associated Press (Washington Post, New York Times)

Obama to tout counterterror legacy, even as Trump threatens changes
President Barack Obama plans to provide a final summation of his national security record Tuesday, reaffirming his counterterrorism strategy even as his successor has threatened to reverse course on many of Obama's priorities. During a speech at MacDill Air Force Base, the Florida headquarters of US Central Command and Special Operations Command, Obama plans to again argue for closing the naval prison at Guantanamo Bay and maintaining a ban on torture -- both areas where President-elect Donald Trump says he'll change course. The speech -- Obama's final major national security address -- was billed by the White House Monday as a wrap-up of his national security priorities over his eight years in

office. That tenure has included successes like the end to large-scale troop deployments in Iraq and Afghanistan and the killing of Osama bin Laden, but also new challenges like the rise of ISIS and its threats to Europe and the US homeland. CNN

Other Than ISIS: Half of U.S. Terror Suspects Support ISIS Rival Groups, New Report Details
Almost half of the suspects charged with terrorism offenses in the U.S. since the Syrian civil war began five years ago have not associated themselves with ISIS but with the group's bitter rivals such as al-Qaeda or embraced the broader jihadist ideology, a new study by George Washington University's Program on Extremism has found. While emphasis is often placed on whether ISIS directs or inspires terrorism suspects who attack or are arrested before carrying out attacks, the new study suggests that radicalization to Islamist violence will be a problem in the West far beyond the existence of ISIS or other groups because of an extreme ideology many find alluring. ABC News

We Don't Talk About 'Radicalization' When an Attacker Isn't Muslim. We Should.
Whenever a mass shooting or some other large-scale, incomprehensible attack occurs, the nation collectively holds its breath, waiting to see which set of cultural prejudices can be mobilized to frame the massacre. In the week before the election, when two officers from the Des Moines area were murdered in cold blood, a police spokesman may have gotten ahead of himself when he said that "there are some not-so-positive views of law enforcement that a certain segment of our population holds." What was probably being hinted at here was that the shooter had to be black and all worked up by the Black Lives Matter movement — a presumption immediately squelched once the suspect was identified as Scott Michael Greene, a white local who had enjoyed engaging in racial incitement by waving a Confederate flag at a high-school football game. Ralph Goodale plans to "increase gun safety and reduce gun violence"
In a letter to **Public Safety** portfolio employees, **Safety Minister Ralph Goodale** declared that he and **Public Safety Canada** are ***"developing [a] detailed plan needed to deliver on [their] commitments to increase gun safety and reduce gun violence."*** According to the letter, which was made public on **Public Safety Canada's** website, part of this plan is to reconstitute a firearms advisory committee that is supposedly to include experts in law enforcement, public health, agriculture, hunting, and recreation. Of note, however, was also the inclusion of experts from "women's groups" – something that has been

questioned by members the firearms industry who contend that emotion should not be used to undermine facts when determining federal policies and legislation. It is clear that the current government is intent on fulfilling its election platform on the issue of gun control, but exactly how they plan to achieve their goal remains to be seen. The announcement comes on the 27th anniversary of the École Polytechnique massacre where 25-year-old Marc Lépine shot and stabbed 14 women and wounded 14 others before taking his own life at the Montréal engineering school in December of 1989. Canadian Firearms Blog

'Running out of people:' Documents contradict Sask. RCMP vacancy claims
An internal memo from provincial RCMP suggests vacancy rates are posing a dire problem in Northern Saskatchewan. 650 CKOM obtained paper copies of an email thread dated Nov. 3 discussing the issue within the context of the Northern Sask. youth suicide crisis. A source claims the internal memo was later "retracted in fear of the truth getting out." The first email in the thread was allegedly sent by Supt. Grant St. Germaine, North District commander in Prince Albert, with the subject line: "Current HR Situation – North District – Provost Issues – Relief Request – La Ronge Detachment." "At the current time, the (North) District is operating 15 per cent short of bodies," it reads. (…) The issue of understaffing has plagued Sask. RCMP in recent months following an uptick in rural crime and the recent suicide crisis in the north. "We are running out of people. I hate to say that I can't see the light at the end of the tunnel, but I can't. We are in dire straits." (…) The email thread finishes with a note from Cpl. Devin Pugh with Indian Head detachment, where he asks for members to help – and to keep the memo quiet. "I ask that you do not share the attached email with anyone outside of this office!!"(sic) RCMP have not responded to a request for comment from 650 CKOM. 650 CKOM

EMERGENCY MANAGEMENT / GESTION DES MESURES D'URGENCE

Could increased tanker traffic tank Vancouver's tourism industry?
Representatives of B.C.'s $15 billion tourism industry are apprehensive about the possibility of a devastating oil tanker spill if Kinder Morgan's Trans Mountain pipeline goes through. If constructed, the pipeline expansion project — which would triple the capacity of crude oil coming from Alberta — would increase tanker traffic on B.C.'s South Coast. While Federal Minister of Transport Marc Garneau promises a plan is in place to handle new tankers as well as an extra $200 million for a marine spill response program, Tourism Vancouver CEO Ty Speer is still worried about the impact of a devastating spill. CBC News

Weather to become more inclement as Earth gets warmer: Expert
The nation's top climatologist claims that the Earth is warming up so much that severe weather events involving heavy precipitation are becoming more likely. Environment Canada senior climatologist David Phillips said that Canada should be anticipating more heavy downpours in the near future, citing a recent report by the US Global Change Research Program that observed an increased frequency in downpours in the US (…) Warmer conditions could lead to inclement weather; while one area experiences drought, flooding could occur in another region. Tropical storms become stronger given the warmer temperatures and the number of tornadoes could swell as a result. Phillips argued that there is more than enough evidence to prove that Canada's weather is getting worse due to rising temperatures. Insurance Business.ca

BC Hazmat training today in North Saanich
Don't be alarmed if you see emergency personnel in North Saanich today, as it's most likely members of BCHazmat Management taking part in routine training. Under direction of ECRC and the Canadian Fuels Association, the groups will be conducting "Tanker Truck Rollover Training" at the BC HAZMAT training facility on McDonald Park Road as part of the Land Spill Emergency Preparedness Program. This program was set up to ensure consistent preparedness amongst responders and improve preparations in the event of land-based transportation incidents in the area. Much of the exercise will focus on non-sparking fuel transfers, grounding exercises, bonding practices and aluminum drilling. CHEK

Brace yourself! Intense snowstorm heading for West Coast tomorrow night
Environment Canada has some bad news for West Coast residents weary of the recent snow and cold temperatures: It's likely to get a lot worse before it gets better. That's because an "intense" Pacific storm is expected to batter Metro Vancouver and the rest of the South Coast region Thursday afternoon or evening with "a significant amount of snow (…)"With all the snow in the forecast, Vancouver city officials say they are already making plans with road crews and equipment is on standby. The province says it's also activating its emergency extreme weather shelter program, making an extra 1,000 emergency shelter beds available. CBC News; CTV News

Des gens de Lac-Mégantic à Ottawa pour interpeller Justin Trudeau
Se disant ignorés par les libéraux de Justin Trudeau, des citoyens de Lac-Mégantic se sont déplacés à Ottawa, mercredi, pour réclamer en personne la construction d'une voie ferrée qui contourne le centre de leur municipalité. «Par rapport à M. Trudeau, on a maintes et maintes fois adressé des demandes d'entretiens avec lui, on n'a eu aucun accusé de réception ni aucun signe de vie de la part de son bureau, a déploré en conférence de presse Robert Bellefleur, de la Coaliton citoyenne engagée pour une sécurité ferroviaire de Lac-Mégantic. C'est ce qui explique notre présence aujourd'hui.» La déception de M. Bellefleur est d'autant plus vive que selon lui, Justin Trudeau avait appuyé en campagne électorale le retrait des voies ferrées du centre-ville. Le ministre des Transports, Marc Garneau, dit attendre les résultats des études environnementales avant de trancher dans le dossier. Agence QMI (TVA Nouvelles)

Alberta, Saskatchewan ranchers brace for impact of bovine TB cull and quarantine
Farmers from more than 40 ranches in Alberta and Saskatchewan are wondering what kind of compensation and business lies ahead for them as the Canadian Food Inspection Agency (CFIA) cracks down on a bovine tuberculosis outbreak in Western Canada. In late September, the CFIA discovered a cow with bovine tuberculosis linked to Brad Osadczuk's ranch in Jenner, Alta., and launched an investigation which confirmed five other cases tied to his herd. It placed his entire operation under quarantine. CBC News

Canadian Conservatives Want More Repression Against Protesters
Canadian conservative leaders appear to be taking cues from the militarized-police response in North Dakota. As Canadian Indigenous leaders draw inspiration from the recent victory at North Dakota, where the pipeline has been halted in search of alternate routes, conservative leaders in the Far North are sharpening their tools of repression. Appearing to take cues from the militarized police response in Morton County, Canadian Conservative leadership candidate Kellie Leitch is vowing to increase police repression, penalties and political push-back against pipeline protesters in that country. (…) Environemtal lobbying is already considered a political activity for tax-exemption purposes, for example, and the repressive anti-terrorism bill C-51, passed last year by the then-conservative government, already targets pipeline protesters using many of the proposed methods. Leitch's misguided attacks come on the heels of Canada's Prime Minister Justin Trudeau's approval of two controversial pipelines that have seen heavy opposition from Indigenous communities for years. Telesur

Surveillance state rolls on
An opinion piece states, "I hope the Federal Court of Canada invites the Canadian Security Intelligence Service (CSIS) to further explain the spying on journalists it may have conducted in the past. While the court may indeed have provided a warrant for such actions – a troubling development by itself – CSIS

also has a record of misleading the court about its intentions, breaching its duty of candour. The most decisive court in the land, the one that should support Senator Claude Carignan's private member's bill establishing stronger protections for journalists and their sources, is the conviction of Canadians. But, unfortunately, too many of us have acquiesced to the emergence of a surveillance state in our parliamentary democracy. Many have reasoned that they have nothing to fear from expansive government surveillance because they have nothing to hide. In the eyes of the surveillance state, however, your opinions about your innocence count for nothing. You won't know whether you have been spied on and you won't know what conclusions have been drawn. You won't know you are a target for "disruptive" actions, permitted by the Anti-Terrorism Act of 2015, the former Bill C-51." Toronto Star

Evolving technology expected to introduce new cyber threats, broadened attacks: Trend Micro
The coming year is expected to witness evolving technology that introduces new cyber threats and attacks that broaden and differentiate to penetrate new vulnerable surfaces, suggests a report issued Wednesday by Trend Micro Incorporated. The expectation is 2017 "will include an increased breadth and depth of attacks, with malicious threat actors differentiating their tactics to capitalize on the changing technology landscape," Trend Micro, a cyber security solution provider, notes in releasing The Next Tier – 8 Security Predictions for 2017. "People waking up to the threat landscape of 2017 will say it is both familiar and unchartered terrain," the report points out. Canadian Underwriter

Russia Updates Plan to Counter Cyberattacks and Foreign Influence
The Kremlin published a new plan on Tuesday to defend Russia against what it described as stepped-up cyberattacks and "information-psychological" methods by foreign intelligence agencies bent on influencing its population with online information. The plan updates a similar information security doctrine put in place by President Vladimir V. Putin in 2000, early in his first term, that staked out a renewed role for post-Soviet government in monitoring information. The latest iteration of the doctrine comes as American officials have mulled retaliating against Russia for what the Department of Homeland Security said was government-orchestrated hacking before the presidential election, including stealing emails from the Democratic National Committee. Tragic riddle of Canadian Mountie who killed himself in a Manchester hotel on his birthday
A decorated Canadian Mountie with a 'troubling' history of mental health problems killed himself in a Manchester hotel on his birthday during a celebratory trip to the city with his girlfriend. Robert Archibald, 28, served with the Royal Canadian Mounted Police as a federal air marshall, flying armed on planes across the world. A decorated Canadian Mountie with a 'troubling' history of mental health problems killed himself in a Manchester hotel on his birthday during a celebratory trip to the city with his girlfriend. Robert Archibald, 28, served with the Royal Canadian Mounted Police as a federal air marshall, flying armed on planes across the world. (…) He said his brother was also 'very worried' about his job. His partner Ms Lau, an air stewardess who met Mr Archibald in Vancouver, said in a statement that he had been told to take two or three weeks off work because of an old back injury. Manchester Evening News UK

Complaint launched against several Whistler RCMP officers
An official public complaint has been launched against several police officers from the Whistler RCMP. Officer in Charge of Sea to Sky RCMP Inspector Kara Triance, says she's aware that the complaint is in regard to the officers alleged conduct during an interaction with a member of the public where the complainant's cell phone was seized. Triance says that in her preliminary review of the file several components in the public complaint report and the text of the officers' report were unclear and warrants further review. A comprehensive review will be undertaken and the investigation will include interviewing the member of the public that made the complaint, the officers involved, witnesses and any video footage available. Mountain FM

RCMP Charge Calgary Man with Conspiracy to Bribe Thai Officials
The Royal Canadian Mounted Police (RCMP) have recently laid charges against the president of a Canadian commercial aircraft company under the federal *Corruption of Foreign Public Officials Act* (CFPOA), for allegedly conspiring to bribe Thai public officials. It is alleged that this individual conspired to bribe Thai military officials in relation to a proposed deal involving a commercial aircraft from Thailand's national airline. The CFPOA is Canada's primary anti-corruption statute and is focused on combating bribery and corruption of foreign public officials. The scope and reach of the CFPOA is wide-ranging. It applies to the worldwide conduct of Canadian citizens, permanent residents, corporations, and other business organizations. Charges were laid as a result of a lengthy investigation by the RCMP's Federal Serious and Organized Crime Unit, initiated after a tip from the U.S. Federal Bureau of Investigation in 2013. This is the fourth investigation resulting in charges under the CFPOA in Alberta. JD Supra

RCMP in Alberta arrest man who escaped in prisoner transport van
RCMP have arrested a man who escaped from an Alberta Sheriff by stealing a prisoner transport van. Police say a man drove off from the Fort McMurray court house on Monday afternoon in the vehicle. RCMP then received a complaint about a dangerous driver. Mounties say they located the abandoned van in the city and arrested a man who they found nearby. Lyndon Rankin, who is 21, faces escaping lawful custody, dangerous driving and other charges. Canadian Press (Metro News); CBC News

Five people charged, another at large after drugs seized in Grand Rapids and Chemawawin
Five people are facing charges and another is still being sought by police after search warrants were executed in Grand Rapids and Chemawawin Dec. 2-3. RCMP arrested 53-year-old Wilfred Angus Turner, 21-year-old Phyllis Annette Dawn Scott and 28-year-old Jacob Wilfred Ducharme of Grand Rapids after executing a search warrant Dec. 2 and seizing cocaine, pills, marijuana, drug paraphernalia and ammunition. Turner and Scott are charged with possession of cocaine for the purpose of trafficking, while Ducharme is charged with possession of cocaine for the purpose of trafficking and possession of ammunition contrary to a court order. Grand Rapids RCMP are still seeking 35-year-old Kenneth Robert Sanderson of Grand Rapids in connection with the investigation. (…)Grand Rapids and Chemawawin RCMP were assisted by the Integrated Gang Intelligence Unit, the RCMP North District Crime Reduction Enforcement Support Team, the RCMP Emergency Response Team and Police Dog Services in executing the warrants. Thompson Citizen

Police incident in Cloverdale ends but little information released
A police incident in Cloverdale is now over but RCMP is not releasing much information about what happened at this time. Concerned witnesses told Global News Tuesday night there were a large number

of officers at 184 Street and 60 Avenue, starting in the afternoon .Investigators were there until late Tuesday night .The reason is still unclear but many evidence markers could be seen on the ground and police tape had been put up. Despite several requests for information, Surrey RCMP is not commenting on the nature of the investigation. Digital Cameras Planet

Waterville area resident deprived of thousands by fraud
A Waterville area resident is out $4,000 after being scammed recently. Kings District RCMP learned of the loss after a man in his 50s reported what is known as a consignment box scam. According to community policing officer Constab. Kelli Gaudet, the fraud involved a phony diplomat from Ghana and gold, diamonds and cash allegedly worth $30 million. Gaudet stated, "if it sounds too good to be true, it probably is." The RCMP nationally warn Canadians to watch out for the Nigerian/West-African Business letter scam. For years now, a release indicates, businesses, learning institutions, and government departments have been receiving e-mails from senders posing as Nigerian/West-African government or business officials offering to share large sums of money. The police recommend careful research before conducting such transactions. The Commercial Crime Sections of the RCMP within Canada and the Better Business Bureau are available for obtaining further information on this topic along with the Canadian Anti-Fraud Call Centre (CAFC). Kings County News (Annapolis County Spectator)

Drug awareness session held for parents in the Lewisporte area
You could hear a pin drop. Retired RCMP officer Harold Nippard was addressing a crowd of about 60 parents at a drug awareness session at Lewisporte Collegiate on Nov. 28. The parents were of students from Grades 5-12. Collegiate principal Krista Freake explained why they invited parents of younger children — Grade 5 students are 10-11 years old. "Drug use is happening in much lower grades than in the past," she said. "Some parents have little to no information about what drugs are available, what they look like and the side effects they have and we want to start the conversation." Nippard shared the shocking reality of what drugs are available in Lewisporte and surrounding communities. Lewisporte Pilot

Yukon gets a new top mountie
Scott Sheppard replaces longtime Chief Superintendent Peter Clark. Yukon RCMP are welcoming a new commanding officer. Chief Superintendent Scott Sheppard is taking over as M division's top cop. Sheppard is a 27 year veteran of the RCMP and has a variety of experience involving front line community policing in First Nation communities, covert and undercover operations, as well as critical incidents. In a release, Sheppard says he's really looking forward to working with partners to address the needs and expectations of Yukoners. CKRW

Organized crime group in Alberta, B.C. dismantled with 10 arrests, police say
Ten people have been arrested and 111 charges laid in the dismantling of a Calgary-based organized crime group that operated in Alberta and B.C., police say. The charges relate to drugs, firearms, and organized crime, police said in a release. The investigation by ALERT Calgary's organized crime and gang team began in November 2015 and concluded a year later with the arrest of Timothy Varga, 40, from Calgary. ALERT alleges that Varga was the central figure in a criminal network that extended from Alberta to British Columbia and had ties to Manitoba. CBC News

La Sûreté du Québec reste à Lac-Simon, insiste le porte-parole de la SQ
À Lac-Simon, il est « hors de question qu'il y ait un retrait unilatéral de la Sûreté du Québec », affirme le capitaine Guy Lapointe, porte-parole de la Sûreté du Québec. À l'instar du ministre de la Sécurité publique, Martin Coiteux, le capitaine Lapointe dément formellement l'information ayant circulé à l'effet que la SQ ait l'intention de se retirer de Lac-Simon suite à des propos tenus par la chef de la communauté. « Nous croyons toujours que la desserte par la Sûreté du Québec est une solution temporaire et qu'il est souhaitable que le Service de police Lac-Simon retrouve son autonomie. Maintenant, il n'est pas question d'un retrait unilatéral. Ce sont des discussions qui sont en cours à différents niveaux et la Sûreté du Québec ne compte pas se retirer sans avoir la confirmation du chef de police de Lac-Simon qu'ils sont en mesure d'assurer la desserte », a précisé Guy Lapointe sur les ondes de l'émission *Des matins en or*. New reform committee seeks
A new elders council has been formed to assist in offering advice and council to the attorney General of Ontario as they seek a more culturally responsive justice system in light of the disproportionate incarceration levels of First Nations people. Thirteen indigenous elders from across Canada have been chosen to represent the indigenous worldview and culture as Ontario moves forward in recognizing round pegs do not easily fit in square holes. Not yet one year in office, Trudeau took the brunt of former Harper Conservative government in its failure in providing rehabilitation programs for indigenous offenders, and the few number of incarcerated indigenous men and women who can afford bail, forcing them to serve maximum time in jail or prison. Auditor general Michael Ferguson was highly critical of Correctional Services Canada calling the situation "beyond unacceptable". Two Row Times

Le Service de police du Grand Sudbury veut se protéger du fentanyl
Le service de police de la ville du Grand Sudbury profite des discussions budgétaires pour demander du financement supplémentaire, destiné à l'achat de naloxone. Il s'agit d'un composé chimique capable d'inverser les effets des opiacés tels que le fentanyl. Le fentanyl peut être absorbé à travers la peau ou encore être inhalé dans l'air, exposant les policiers à un grand risque d'entrer en contact avec le médicament, selon le sergent-détective James Killeen. Comme cette drogue a fait son chemin dans les rues de la municipalité, les policiers veulent s'assurer d'une protection en tout temps. Le fentanyl est 100 fois plus puissant que la morphine. « Le naloxone est un produit périssable et il faut donc prévoir son renouvellement ponctuel, » explique le policier Killeen, qui n'a toutefois pas chiffré sa demande auprès du comité des finances de la ville du Grand Sudbury. Actuellement, Peterborough est la seule ville en Ontario qui fournit du naloxone à ses policiers. Radio-Canada

Sudbury cops say they need fentanyl antidote to save lives
Both authorities and addicts say that fentanyl packs a potent- but deadly - punch. Now the drug has made its way onto Sudbury's streets, and police are making sure they are ready to deal with its effects. Fentanyl can be absorbed through the skin or inhaled in the air, which puts police at greater risk of coming into contact with the drug. The new concern for police is that they can be accidentally exposed, said Detective Sergeant James Killeen of the Greater Sudbury Police Services. But that may be easier said than done. He wants to see naloxone, the the drug's antidote, made available to officers. "Something to be implemented would have to go into our budget. Naloxone is a spray that has an expiry date on it. So that's constantly going to have to get renewed, but it's kind of hard to put a price on saving somebody's life," Killeen said. "Naloxone is going to be basically an instant remedy that they can take. It's a nasal spray they can just spray up their nose and it'll counteract the effects of the fentanyl."Finding someone caught in a fentanyl overdose can be gruesome, Killeen said, and officers also need the training and possible fix to save lives. "It's something that we're just going to have to learn to adapt to and incorporate that as regular equipment for a police officer," he said. Killeen is in the process of writing the proposal to request funding for the naloxone, and any other equipment required to prevent exposure to fentanyl. Currently Peterborough is the only community in Ontario to supply its police officers with naloxone. CBC News

NATIONAL INQUIRY INTO MISSING AND MURDERED INDIGENOUS WOMEN AND GIRLS / ENQUÊTE NATIONALE SUR LES FEMMES ET LES FILLES AUTOCHTONES DISPARUES ET ASSASSINÉES

'She was Aboriginal. She had an addiction': Sister of MMIW says family had to push police
Bernadette Smith's sister Claudette Osborne went missing in 2008. She was 21-years-old and was last seen near a Winnipeg hotel. According to the Native Women's Association of Canada, in Manitoba there are 40 missing, 120 murdered and five suspicious deaths recorded in the MMIWG (Missing and Murdered Indigenous Women and Girls) database. There are 90 MMIWG recorded in Winnipeg. Two other relatives of Bernadette's have gone missing or have been murdered. Drag the Red, a volunteer-run organization that drags Winnipeg's Red River to search for traces of missing and murdered Indigenous women founded by Bernadette began as a personal mission. CBC News

A search for answers
When Jennifer Catcheway went missing in 2008, her mom, Bernice, was told by the RCMP officer to whom she'd reported it that she should give it a week-her daughter was probably just out on a bender. But Bernice knew the Mountie was wrong: Her loyal, responsible daughter had told her in a phone conversation that she'd be at her Portage la Prairie, Man., home that night to celebrate her 18th birthday. She never arrived. Bernice and Wilfred, Jennifer's father, believe the investigation into their daughter's disappearance was bungled, particularly in the crucial, early stages. Even weeks after Bernice reported her missing, officers had still not taken statements from family members who had been seen with her. "To put it bluntly," Wilfred told the CBC, "it's racism." This spring, hearings are slated to begin in the two-year federal inquiry into missing and murdered Indigenous women and girls (MMIW). They will come more than a year after the Liberals announced the inquiry and nine months after it officially launched (at this point, the inquiry still does not have a working website). But families continue to express their concern over one element that will not be part of the inquiry's agenda: A thorough review of police conduct. (…) The Catcheways are thrilled to finally have a federal ally in the inquiry. But they continue to work on their own, searching marshes, lakes and rivers and have put together a $10,000 reward for information. They've excavated three dumps and taken videotaped statements, hoping they might find out what happened. "We stopped relying on RCMP," Bernice recently told a Winnipeg MMIW forum. "I never got a call from [the officer] on her case." Maclean's

Families and lives of MMIW honoured at McMaster
McMaster University commemorated a plaque for the families of Murdered and Missing Indigenous Women (MMIW) yesterday on campus — a large step forward considering not so long ago indigenous people would lose their status as an Indian for simply attending a post-secondary school. The commemoration ceremony, was held on December 6 on the National Day of Remembrance and Action Against Violence on MMIW and was organized by the Anti-Violence Network and Indigenous Studies Program. The national day of remembrance was established to remember the 14 women murdered on December 6, 1989 in the event also known as the "Montreal Massacre", the five women from the McMaster community who have been murdered and to remember the 1,200 or more indigenous women and girls who have been murdered or unaccounted for. (…)Dr. Robyn Bourgeois gave the keynote address and spoke with an emphasis on how the government has and is currently dealing with indigenous issues that all come back to an apparent lack of effort on the MMIW inquiry. Two Row Times

Sex abuse linked to suicide: grand chief
appears to be a direct correlation between alleged sexual abuse on northern Ontario reserves and a number of recent suicides involving young girls, says Nishnawbe Aski Nation Grand Chief Alvin Fiddler. Fiddler, whose organization represents 49 of Ontario's First Nation communities, says high rates of abuse are also being reported to police in his territory. "The victims of these suicides are young girls, young women," he said in an interview. (…) Officers and nurses also require appropriate tools to gather evidence in the immediate aftermath of an incident because they lack sexual assault forensic evidence kits, he said. Sexual abuse was also a consistent theme raised during the sessions held as the Liberal government looked to design the inquiry into missing and murdered women. Waterloo Region Record

REGULATION OF MARIJUANA / RÉGLEMENTATION DE LA MARIJUANA

Marijuana use on rise in Ontario, as is driving under pot's influence, CAMH finds
With Ottawa poised to legalize recreational marijuana next year, researchers are keeping a close eye on use of the so-called demon weed, which has been steadily trending upward over the last couple of decades. In Ontario, for instance, a survey released Wednesday by the Centre for Addiction and Mental Health (CAMH) found that year cannabis use virtually doubled between 1996 and 2015, rising from about 8 per cent to almost 15 per cent of respondents. Significant increases were found among all age groups, but especially among 18- to 29-year-olds, with the proportion of pot smokers jumping from about 18 per cent in 1996 to 38 per cent in 2015. "We also see that the cannabis-using population is aging, as well," said senior scientist Robert Mann, who co-authored the CAMH Monitor report on substance use and mental health status among a representative sample of more than 5,000 Ontario adults. (…) The CAMH Monitor is a collection of survey data that has been published every two years for almost the last four decades, allowing researchers to track long-term trends in the use of alcohol, drugs and tobacco, as well as identifying problematic behaviours related to mental health within the province's population. One finding of particular concern is the proportion of respondents who reported getting behind the wheel after using cannabis. In the last five years, that figure doubled, rising to 3 per cent in 2015 from 1.5 per cent in 2010. Toronto Star

Selling a fairer economy
An opinion piece states, "Few saw the one-two punch thrown by global politics in 2016 coming. Like a set-up jab to the body, Brits voted to exit the European Union. And then, like an even harder follow-up cross to the head, Americans voted Donald Trump into the presidency. The world was left seeing stars. But maybe, if this isn't giving Canada's most famous boxer too much credit as a fight strategist, we might have braced ourselves for the blows if we'd been listening more closely to Justin Trudeau. (…) On other highly controversial files, circling back to that mantra about helping the middle class will be even trickier. Trudeau's vow to legalize and regulate marijuana-the first bold policy initiative he signalled as Liberal leader-is supposed to be fulfilled by legislation in 2017. But marijuana entrepreneurs aren't waiting for a law to be passed, and Trudeau recently expressed frustration at the way storefront pot dispensaries have sprung up in anticipation of the change. Anne McLellan, who was justice minister in the former Liberal government of prime minister Jean Chrétien, headed a task force on marijuana that is slated to deliver its report this week. McLellan was said to favour a restrictive policy, aimed at keeping pot away from young people. But exactly how Trudeau intends to liberalize marijuana policy, while also turning the clock back on the freewheeling weed marketplace that has emerged in recent months, will be a tough test." Les Occidentaux réclament un « cessez-le-feu immédiat » à Alep
Au moment où l'armée syrienne a repris le contrôle de la vieille ville d'Alep, six pays occidentaux - La France, l'Allemagne, le Canada, les États-Unis, l'Italie et Royaume-Uni - réclament un « cessez-le-feu immédiat » devant la « catastrophe humanitaire » qui sévit dans ce fief de la rébellion syrienne. Appuyés par le secrétaire général de l'ONU, Ban Ki-moon, les six pays occidentaux exhortent la Russie et l'Iran à utiliser leur influence auprès du régime syrien pour l'infléchir en ce sens. « L'urgence absolue est un cessez-le-feu immédiat pour permettre aux Nations unies de livrer de l'aide humanitaire aux populations de l'est d'Alep et de porter secours à ceux qui ont fui », soulignent les six dirigeants dans une déclaration commune. Nous condamnons les actions du régime syrien et de ses partisans étrangers, en particulier la Russie, pour leur obstruction à l'aide humanitaire, et nous condamnons fermement les attaques du

régime syrien qui ont dévasté des installations civiles et médicales ainsi que l'utilisation de barils explosifs et d'armes chimiques. Radio-Canada

Family reunification wait times for immigrants to be cut by half, John McCallum says
Newcomers to Canada will soon have a much shorter wait to reunite with their spouses, partners and children. Immigration, Refugees and Citizenship Minister John McCallum announced today in Brampton, Ont., that the current average two-year processing period will be reduced to 12 months. The new one-year guarantee will apply to applications already in the queue and new applicants. "This will be of direct benefit to the 64,000 spouses we will admit to Canada in the coming year," he said. CBC News

Montérégie: la GRC saisit 127kg de cocaïne
La Gendarmerie royale du Canada (GRC) rapporte jeudi qu'une saisie de 127 kilogrammes de cocaïne a été faite par ses policiers durant une enquête qui a permis l'arrestation en début de journée de trois

personnes. Ces suspects auraient aussi été impliqués dans du trafic de cannabis et de tabac illégal. Le stratagème auquel ils auraient participé aurait permis d'importer de grandes quantités de cocaïne au Canada qui passaient en transit par Los Angeles et Houston avant d'être destinées au marché de Montréal. Fake job, fake education, fake residency: 15 clients of fraudulent immigration scheme now kicked out of Canada

Fifteen former clients of an imprisoned B.C. immigration consultant have now been deported to China. And the failed appeals by two women who fought to remain in Canada provide a rare glimpse into the illegal tactics used to carry out what has been labelled as the biggest immigration scam in B.C. history. Immigration Appeal Division transcripts obtained by CBC News detail lies and deceptions that include one immigrant pretending to attend university in B.C. while actually obtaining an education outside the country. Another fraudulently claimed to work for a fictitious B.C.-based company while in fact living in China. The two unrelated women have been stripped of their permanent residency status for lying about their eligibility and will be unable to return to Canada for five years — unless they receive permission from immigration officials to come back sooner. They were among 1,200 clients of Xun "Sunny" Wang and his now defunct companies New Can Consultants and Wellong International Investments. Wang is serving seven years in prison for immigration fraud. The Canada Border Services Agency alleges 120 of Wang's former customers obtained permanent residency under false pretences. And more than 200 others may have lied in order to become Canadian citizens. The CBSA says another 500 ex-clients are also under investigation, bringing the total facing possible deportation to more than 800. So far, 44 removal orders have been issued, but some have pending appeals. CBC News

Airbus chosen to build Canada's new search planes, ending 12-year procurement odyssey

The Canadian military will receive new fixed-wing search and rescue planes in a two-step procurement that will cost taxpayers $4.7 billion over the next two decades. The selection of European defence giant Airbus end a 12-year, frustrating odyssey that spans three governments. Defence Minister Harjit Sajjan, Public Works Minister Judy Foote and the Commander of the Royal Canadian Air Force, Lt.-Gen. Michael Hood, announced the deal at the country's largest military air base in Trenton, Ont., which is also one of the principal search and rescue stations. The first phase — with a pricetag of $2.4 billion — involves the purchase of 16 C-295W aircraft modified for search and rescue missions. A training simulator, to be located in Comox, B.C., and 11 years of in-service support and maintenance will be included. An additional in-service support program will have to be negotiated with Airbus. That cost is estimated at $2.3 billion. CBC News; Reuters (Globe and Mail); Ottawa Citizen; Presse Canadienne (L'actualité); Canadian Press (City News)

Liberal government brings in defence analysts for briefing on how to sell search and rescue aircraft decision

The Department of National Defence is bringing in defence analysts for a special meeting designed to sell the Canadian public on the Liberal's search and rescue aircraft announcement. Canada will purchase 16 Airbus C-295 planes, it was announced today. The meeting between analysts and top government and military procurement officials takes place at 1 p.m. today. The analysts will be given government talking points and information on the aircraft deal and are expected to relay that data during TV, print and radio interviews, sources say. Thirteen individuals will be provided with the information at the meeting. Procurement Minister Judy Foote and Harjit Sajjan announced the search and rescue purchase today at Trenton.

Months into Fort McMurray's wildfire recovery, compassion fatigue could be settling in

The seven-month mark of Fort McMurray's wildfire recovery is a dark time for some of the city's frontline social and aid workers. The hours of sunlight in Canada's oilsands capital are few but there are thousands of residents downloading stories of stress and trauma on crisis support workers. It's enough to

raise worries some support workers could be suffering from compassion fatigue, even within one of the city's crisis agencies. CBC News

Security hasn't been increased at Toronto-area high school following threat
Security has not been increased at Oakwood Collegiate Institute in the wake of police arresting a 17-year-old boy who allegedly threatened to attack the west-end school on the 27th anniversary of the massacre at École Polytechnique de Montréal on Tuesday. The suspect is alleged to have made the threat in a post on an unspecified blog on Dec. 1. A search warrant was then executed at the suspect's home early Tuesday morning and a number of weapons – including a machete, a hatchet, two swords, four knives and several arrows for a longbow – were seized. (...)TDSB officials say that that the doors to Oakwood Collegiate Institute are locked during the school day, as per board policy. Two Toronto police resource officers are also posted at the school, along with a TDSB hall monitor. As well, there are 26 security cameras at the school. "It's a pretty secure facility," TDSB Spokesperson Shari Schwartz-Maltz said on Thursday. CTV News

Canada spy official doubts intelligence-sharing under Trump: report
The Canadian official who oversees the country's spies says Ottawa may have to rethink how it provides intelligence to the United States, given incoming President Donald Trump's views on torture, a newspaper reported on Thursday. Canada is a member of the so-called Five Eyes intelligence-sharing network, including the United States, Britain, Australia and New Zealand. Michael Doucet, executive director of the Security Intelligence Review Committee (SIRC), said Canada did not want information derived from torture. "They may have a new administration that thinks torture is a good thing," he told a private Toronto audience last week, according to The Globe and Mail, which cited a recording of the remarks. "It's going to be an interesting and challenging time, and we've got to think about what defines us as Canadians." SIRC is a watchdog agency that reviews the activities of the Canadian Security Intelligence Service, or CSIS. During the election campaign, Trump said the United States should use waterboarding and other harsh interrogation techniques when questioning terror suspects. Neither SIRC nor CSIS was immediately available to comment. Reuters

And more than 200 others may have lied in order to become Canadian citizens. The CBSA says another 500 ex-clients are also under investigation, bringing the total facing possible deportation to more than 800. So far, 44 removal orders have been issued, but some have pending appeals. CBC News

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

Zeus Variant 'Floki Bot' Targets PoS Data
Researchers have observed an uptick in attacks using the banking malware Floki Bot against U.S., Canadian and Brazilian banks, and insurance firms. Floki Bot, which uses code from the once notorious Zeus banking Trojan, has evolved and unlike its predecessor, is targeting point-of-sale systems via aggressive spear phishing campaigns and the RIG exploit kit. Cisco Talos and Flashpoint security researchers coordinated the release of reports on Floki Bot on Wednesday. Both firms warn the malware is quickly gaining popularity within Dark Web criminal forums. Threat Post; Security Week

Hackers Gamify DDoS Attacks With Collaborative Platform
A Turkish hacking crew is luring participants to join its DDoS platform to compete with peers to earn redeemable points that are exchangeable for hacking tools and click-fraud software. The goal, security researchers say, is to "gamify" DDoS attacks in order to attract a critical mass of hackers working toward a unified goal. The hacking platform is called Surface Defense and is being promoted in Turkish-language Dark Web forums including Turkhackteam and Root Developer, according to Forcepoint Security Labs, the security firm that first uncovered and reported the DDoS platform. Promoters of Surface Defense are actively recruiting Turkish hackers that may be sympathetic to Turkish nationalist beliefs, Forcepoint believes. Targets of the DDoS attacks range from the Kurdistan Workers Party, German Christian Democratic Party and the Armenian National Institute website in Washington D.C., said Carl Leonard, principal security analyst at Forcepoint. Threat Post; Softpedia; Bleeping Computer; ZD Net

Backdoor vulnerabilities discovered in Sony IP cameras
Researchers have discovered backdoors in Sony IPELA Engine IP cameras which could affect as many as 80 models. Cybersecurity firm SEC Consult said on Wednesday that the security flaw allows attackers to remotely execute code, hijack vulnerable cameras, disrupt device functionality, and spy on users. In addition, the backdoor grants attackers the opportunity to add compromised Sony IP cameras to botnets as slave nodes, in the same manner that cyberattackers used the IoT-based Mirai botnet to disrupt online services. ZD Net; Help Net Security; Bleeping Computer

Flash Player Security Flaws Used in Most Exploit Kits, Security Research Shows
Flash Player continues to put computers across the world at risk due to its vulnerabilities and a new research conducted by RecordedFuture shows that cybercriminals are still looking for security flaws in Adobe's solution to compromise computers. A total of 6 of the top 10 vulnerabilities used by exploit kits this year impacted Adobe Flash Player, with just one security flaw being targeted by no less than seven exploits. Softpedia

Google Fixes 74 Android Security Flaws with December Patches
Google has rolled out two security patches for Android devices earlier this month that address a total of 74 vulnerabilities in the operating system, including 11 that are rated as critical. Specifically, Google's December 2016 security patching cycle included two different releases, each of which came with fixes that were aimed at both Google and other Android devices. Softpedia

Report: Mirai 'is just the tip of the iceberg'
Mirai is just the tip of the iceberg according to a new report by the Institute for Critical infrastructure technology. The DDoS malware which has filled security headlines recently is a profound new intervention in the threat landscape, according to the authors Drew Spaniel and James Scott. Mirai, says the report, offers cyber-criminals, hacktivists and APTs, "an asymmetric quantum leap in capability". It's not, as one might expect, because of its sophistication or that it represents some kind of new weapon for which there is no counter defence, but because of its accessibility. Mirai malware offers a "powerful development platform" which can be tailored to even a relatively unsophisticated attacker's needs. The report is stark in its conclusions: "right now, script kiddies and cyber-criminal gangs are already drastically expanding their control over vulnerable IoT devices, which are enslaved to malicious purposes and can be contracted in DDoS-for-Hire services by a virtually unlimited number of actors for use in an infinite variation of layered attack methods." SC Magazine

Automated Phishing Spurs Criminals to New Heights
Cyber-criminals are lowering the cost and increasing the effectiveness of phishing by leveraging compromised servers and turnkey phishing services, which are the key drivers of the overall increase in phishing attacks. According to Imperva's Hacker Intelligence Initiative (HII) Report, the low cost of launching a phishing campaign and the high projected return on investment for cyber-criminals is leading to an epidemic of offensives. Imperva researchers browsed the darknet marketplace to estimate the cost of phishing campaigns and to get a clear picture of the business model. They observed the ease of purchase and low cost of phishing-as-a-service (PhaaS) campaigns. In addition, they saw that hackers were easily able to hijack compromised webservers for their campaign, which further lowered the investment needed. Infosecurity Magazine

Next year, attacks will differentiate to penetrate new vulnerable surfaces
The upcoming year will include an increased breadth and depth of attacks, with malicious threat actors differentiating their tactics to capitalize on the changing technology landscape, according to Trend Micro… The Internet of Things (IoT) and Industrial Internet of Things (IIoT) will play a larger role in targeted attacks in 2017. These attacks will capitalize upon the growing acceptance of connected devices by exploiting vulnerabilities and unsecured systems to disrupt business processes, as we saw with Mirai. The increasing use of mobile devices to monitor control systems in manufacturing and industrial environments will be combined with the significant number of vulnerabilities found in these systems to pose threats to organizations. Business Email Compromise (BEC) and Business Process Compromise (BPC) will continue to grow as a cost-effective and relatively simple form of corporate extortion. Help Net Security

Experts Propose Cybersecurity Strategy for Nuclear Facilities
Institutionalizing cybersecurity, reducing complexity, active defenses and transformative research should be a priority in reducing the risk of damaging cyberattacks at nuclear facilities, according to the Nuclear Threat Initiative (NTI). While the Stuxnet attacks aimed at Iran are the most well-known, nuclear facilities in Germany and South Korea have also been hit by cyberattacks. European Union officials have also raised concerns about the possibility of attacks against Belgium's nuclear plants. Reports published in the past months warned that countries are not prepared to handle attacks targeting their nuclear facilities, and the nuclear industry still underestimates cyber security risk. A report published on Wednesday by the NTI provides a set of recommendations for improving cyber security at nuclear facilities based on a 12-month analysis conducted by an international group of technical and operational experts. Security Week

Judge Releases Avalanche Network Leader, Despite Police Shootout

A judge in the city of Poltava, Ukraine, has released the alleged leader of the Avalanche malware distribution network, despite the fact the crook was involved in a shootout with the local police special forces that came to arrest him. The suspect is a 33-years-old man named Gennady Kapkanov, and according to several Ukrainian news agencies, authorities suspected him of being the leader of an international malware distribution network nicknamed "Avalanche." LAW ENFORCEMENT / APPLICATION DE LA LOI

Montérégie: la GRC saisit 127kg de cocaïne
La Gendarmerie royale du Canada (GRC) rapporte jeudi qu'une saisie de 127 kilogrammes de cocaïne a été faite par ses policiers durant une enquête qui a permis l'arrestation en début de journée de trois personnes. Ces suspects auraient aussi été impliqués dans du trafic de cannabis et de tabac illégal. Le stratagème auquel ils auraient participé aurait permis d'importer de grandes quantités de cocaïne au Canada qui passaient en transit par Los Angeles et Houston avant d'être destinées au marché de Montréal. 'Those emails took us by surprise:' Justice ministry reacts to revelations on Sask. RCMP staffing
Officials with Saskatchewan's Ministry of Justice were as shocked as anyone to learn this week that RCMP vacancy rates are as much as five times higher than officially reported in some parts of the province. 650 CKOM obtained a trove of internal RCMP emails on Wednesday. Those emails, dated Nov. 3, showed the commander of the police service's northern district facing 15 per cent of positions sitting empty. Meanwhile, the southern district reported an eight per cent vacancy rate. Both numbers are much higher than the 3.3 per cent vacancy rate reported at an RCMP news conference on Sept. 29. Drew Wilby, executive director of corporate affairs with the Saskatchewan Ministry of Justice, addressed the controversy Thursday on Gormley. "I would say that those emails took us by surprise, yesterday. And obviously that creates some significant concern for the ministry," he said. The province pays 70 per cent of the costs for 924 officer positions under its rural policing contract with RCMP. Wilby said that includes paying for spots that might be vacant for short-term reasons such as illness or injury. Wilby said the province isn't billed for longer-term vacancies, like parental leave. But even so, he said there is an expectation RCMP has enough staff to ensure public safety. 650 CKOM

Sask. premier wants explanation for RCMP vacancy rates
The premier wants answers on the RCMP staffing issues in Saskatchewan. Emails obtained exclusively by our newsroom shows a real issue of unfilled vacancies, particularly in the northern part of the province. Currently there is a 15 per cent vacancy rate in the north and eight per cent in the south. Since it was elected in 2007, Premier Brad Wall's government has increased funding for police, including to the RCMP. Given that reality, Wall is seeking more information. "I think it's reasonable that municipal leaders, urban and rural, know where those officers are, and I would like to know where they are," Wall explained. "If there's great vacancies that aren't being filled or can't be filled, whatever the issue is, we need to know that." Wall contends this speaks to a wider issue that is a concern for all involved. "At the end of the day there is also a fundamental responsibility on the part of the police force that you contract with, in this case the RCMP, to deliver core public safety," Wall argued. 650 CKOM

RCMP officer accused of historic sexual assault in Auburn elects Supreme Court
An RCMP officer accused of committing a sexual assault on a woman in Auburn while he was posted to Bridgetown more than 20 years ago will be in Supreme Court in July for a preliminary inquiry. Const. Charles Kwatei Quartey, 58, of Inuvik, Northwest Territories, was not present in Kentville provincial court Dec. 7, having earlier filed designation of counsel to be represented by lawyer David Bright. Quartey has elected trial by Supreme Court judge alone. The defence is to file notice by Feb. 28, 2017. The matter has been adjourned to July 6, 2017, for a preliminary inquiry. A publication ban protects the identity of the alleged victim. Quartey is charged with committing a sexual assault on a woman in Auburn between Jan. 1 and Dec. 31, 1995. The RCMP's Southwest Nova Major Crime Unit laid the charge against Quartey in July 2016. While dealing with an unrelated matter in July 2015, information came forward to RCMP members that Quartey had sexually assaulted a woman while posted to the Bridgetown Detachment in

1995. The charge relates to Quartey's conduct with a woman he met during the course of his duties as a police officer. It's alleged that he touched the woman in a sexual manner without her consent. Kings County News; 650 CKOM

Canadian Mountie with a 'troubling' history of mental health problems hanged himself on his birthday while on holiday in Manchester

A decorated Canadian Mountie with a 'troubling' history of mental health problems hanged himself on his birthday during a celebratory trip to Manchester. Robert Archibald, 28, served with the Royal Canadian Mounted Police (RCMP) as a federal air marshal, flying armed on planes across the world. An inquest heard his partner, Candice Lau, found him hanged in a their room at the Aurora Hotel in Manchester city centre in July. He was taken to Manchester Royal Infirmary but efforts to revive him failed. The couple had travelled to Manchester for a short trip to celebrate both their birthdays. The inquest in Manchester heard Mr Archibald, who joined the RCMP in 2009 and was honoured with the Queen's Jubilee Medal in 2012, had been 'struggling' with his mental health. Daily Mail

One arrested following threats against Nova Scotia high school

Nova Scotia RCMP say one person is in custody after threats were allegedly made against Millwood High School in Sackville. Police say they were made aware of the threat around 10:30 p.m. Wednesday and worked through the night on the case. Investigators will not release how the threat was received. One person was taken into custody, however no charges have been laid. Police will not say the age, name or gender of the individual arrested. They will also not confirm if they are a student at the school. Information about the incident has been sent home to parents. Extra police will be on scene at the high school today to help ease the minds of both students and staff. RCMP say there is no ongoing threat to either students or staff at Millwood High School at this time. Digital Cameras Planet; Metro News

RCMP officers raid Glebe Smoke Shop

RCMP officers raided a popular smoke shop in the Glebe Thursday morning. Officials from the Canada Revenue Agency were also present at the Glebe Smoke Shop, on Bank Street at Fifth Avenue, starting around 8 a.m. The RCMP didn't say why the raid was occurring Thursday, but officer were seen paying particularly close attention to the store's cash register. CTV News; Ottawa Sun; CBC News

Man charged with murder in 2006 death of Cape Breton WWII veteran

Cape Breton Regional Police say they've charged a 49-year-old man with first-degree murder in the death of a Second World War veteran 10 years ago. Harold James "Buster" Slaunwhite, 82, was found dead by family members in his home on Brook Street in Dominion, Cape Breton, on Sept. 10, 2006. He lived alone. Cape Breton Regional Police and Nova Scotia RCMP have been investigating his death ever since. (…) "Today's charges represent the hard work of dozens of police officers from the Royal Canadian Mounted Police and Cape Breton Regional Police Service," RCMP Insp. Lynn Young said in a news release. CBC News

Penticton RCMP: Explosive device could have resulted in serious injuries

Police are now saying an explosive device which detonated in the hands of a 72-year-old woman on Nov. 30 could have had much more serious consequences. Luckily Dorothy Czerniak suffered only minor burns and singed hair when the device exploded while she was trying to open it the kitchen of her home in Sun Leisure Mobile Home Park. "I can describe it as a cardboard box that was wrapped in red Christmas paper. It was unlabelled, it was examined by the explosives disposal unit and it contained an explosive device that could have caused serious injuries," said Cpl. Don Wrigglesworth of the Penticton RCMP. "The investigation is still ongoing and we've spoken to people in the residences and continue to do so." He added the examination involves not just the finger prints but DNA collection as well examination of the contents. Penticton Western News

RCMP job application leads to sex assault charge on Sask. Mother

If it weren't for an RCMP application, a Saskatchewan woman may not be heading for a second trial on sexual assault charges. Barbara George has admitted to sleeping with a 14-year-old friend of her son when she was 35 — however she maintains she believed he was 16, which is the age of consent. According to court documents, George's 17-year-old son was having a party at the family's apartment,

which the 14-year-old attended. George had stayed in her room for most of the party. (…) A few months later, George applied to become a member of the RCMP and the application asks whether the applicant has ever had sex with someone under the age of 16. George then asked her son about the boy's age for the first time, and her son replied that he was 15 or 15-and-a-half. On the application George replied yes to the question and wrote an explanation, "He was extremely mature. We had a connection. I was very lonely. It happened once. It was so wrong, and I so regret doing so." The RCMP then investigated and laid charges of sexual assault and sexual interference. 980 CJME

RCMP duty gave Hughes the Great White North

When Cpl. Kirk Hughes was young, he wanted to do two things when he got older; serve and explore Canada, particularly the northern regions. Joining the RCMP allowed him to do just that. "I wanted to travel, actually I wanted to go to the north, to serve in the Northwest Territories in one of those territorial communities, and the RCMP is the only agency that does that," said Hughes. "So that was the big motivation to join the RCMP." (…)While he loved working up north, Hughes and his wife have two young children, and there wasn't a lot for the family to do together there. Then about one year ago, a posting came up for a position based in Taber. (…)Besides the noticeable difference in the weather, working alongside another police department is a new experience, as up north there is only the RCMP. Vauxhall Advance

Broadview RCMP charge men after discovering more than $50,000 in counterfeits

Three men have been charged after the Broadview RCMP discovered more than $50,000 of counterfeits. Their vehicle was pulled over on Saturday at about 6:50 a.m. for an excessive speeding infraction. There were three men in the vehicle, one was found to have a warrant for arrest. Officers searched the the vehicle and found a large sum of cash, along with what appeared to be 32 pieces of gold and platinum, with a potential value of between $50,000 to $100,000. Follow up investigation determined the gold and platinum were counterfeit and the occupants were suspects in several suspicious pawn transactions. 620 CKRM

Here's How Much a StingRay Cell Phone Surveillance Tool Costs

Rochester Police Department in New York responded to our Cell Site Simulator Census with a rare look into the pricing and packaging of the cellphone surveillance tech: a completely unredacted quote list of Harris Corporation products. Police departments and federal agencies alike are remarkably secretive about cell site simulator details—important information like pricing, components that are sold with the devices, how the devices are actually operated, has been withheld from the public due to law enforcement fears that this investigative tool will be compromised. With this document though, we can see much more clearly how Harris sells the controversial devices. It seems that the devices are often sold in packages, like the StingRay II (a more powerful, updated version of your typical StingRay) Vehicular System. This comes with equipment for operating a StingRay from a patrol vehicle and three different kinds of Harris' Harpoon signal amplifiers. A laptop, three kinds of software for accessing different types of cellular networks, and an AmberJack cellphone tracker are also included for a grand total of $148,000. Motherboard

Police Release Sketches In 1998 Murder

Project Devote, a task force of the RCMP and the Winnipeg Police, have released some sketches to the public of individuals they hope to identify in relation to the unsolved murder of Tania Marsden. Police said; "Tania Marsden was last seen alive on her 18th birthday – September 9, 1998. She was celebrating with friends at the Gordon Downtowner Motor Hotel, but after leaving her birthday party that night, she was not seen again until her body was found partially submerged in the Assiniboine River." On November 15 of this year, police executed a search warrant at 865 Selkirk Avenue, in relation to Tania's murder. Now, investigators need the public's help in identifying the individuals in the five sketches below as well as information on a vehicle (pictured below), a white mid-1980's four-door sedan. "We believe that identifying the individuals in the sketches could help lead us to Tania's killer," said Sgt. Shawn Pike, a Project Devote Team Commander. "Tania deserves justice. Her family deserves an answer. Please call us with any information." MyToba

Fentanyl 'scourge' top of the agenda at meeting of Ontario police brass
The 'scourge' of fentanyl was at the top of a heavy agenda for the board of the Ontario Association of Chiefs of Police and police brass from across the province during a two-day meeting in Barrie. "It's unacceptable that 165 people have died in Ontario this past year because of fentanyl overdoses," said O.A.C.P. President and Chief of Ottawa Police Charles Bordeleau. "It is a crisis." Bordeleau cited a recent training session for 450 front line responders and one option on the table is to provide the opiate antidote nalaxone to officers although cost is a consideration. Barrie Police Chief Kimberley Greenwood, host of the O.A.C.P. meeting, says Barrie police have focused on enforcement and rounding up fentanyl dealers and officers are now targeting users. Lawsuit against Canadian Forces alleges discrimination against gays, lesbians
A former member of the Canadian Forces has launched a lawsuit against Ottawa over alleged discrimination based on her sexual orientation. Lawyer John McKiggan says in the statement of claim, which has not been proven in court, that between the 1950s and 1990s the Canadian government engaged in a campaign to identify, harass and purge lesbians and gays from the Armed Forces. The lawsuit, submitted on Tuesday, spans the years 1969 to 1995 and applies to anyone who served in Atlantic Canada. (…) It says after she told investigators about her sexual orientation, Satalic was given the option of staying in the military with no further training or promotions, or a release from service as "Not Advantageously Employable." She accepted the release. CTV News

Opposition slams Tories' 'sweeping' terror legislation
New Democrats and Liberals staked competing claims to the political high ground as parliamentary debate on the Conservative government's proposed anti-terror bill kicked off Wednesday. NDP Leader Tom Mulcair cast his party as a bulwark of Canadians' rights and freedoms, vowing to oppose Bill C-51 unless its extraordinary spying and police powers are curtailed and parliamentary oversight created to prevent abuse. Liberal Leader Justin Trudeau proposed more oversight, a mandatory three-year review of the legislation and a narrower definition of risks to national security, yet confirmed his support for the bill nonetheless. (…) But **Public Safety Minister Steven Blaney** dismissed calls for parliamentary oversight as attempts to import "made-in-America" interference into the Canadian system. Justice Minister Peter MacKay said there are enough safeguards in the bill, including: provisions for prior judicial authorization for Charter-breaching actions by CSIS and a requirement for attorney general or a federal prosecutor's consent for applications for special terrorism "peace bonds" or "recognizance with conditions." Toronto Star

Forced to tweet in both languages, ministers lose their impact
An opinion piece states, "Congratulations to my colleagues @HonRobNicholson, @kenneyjason and @PierrePoilievre on their new appointments!" "Enduring love is in the air at Pioneer #ValentinesDay Tea, the couple on my right has been married for 67 years!" These are three tweets you'll receive if you follow the Twitter account of Rona Ambrose, MP for Edmonton-Spruce Grove and federal Minister of Health. But you won't get these tweets in French, and Canada's Official Language Commissioner has a problem with that. Reacting to complaints about the dominance of English-language tweets issued by former foreign affairs minister John Baird and **Public Safety Minister Steven Blaney**, the Commissioner decreed that ministers must tweet equally in French and English when acting in their official capacity. What this means exactly won't be clear until the Commissioner's full report is made public. The key line appears to be "in their official capacity", which leads to the question: Are ministers' Twitter accounts "official" departmental communications, representing the "voice" of the public sector departments these ministers lead? If yes, then of course their tweets need to be bilingual. Legally, this is required under Canada's Official Languages Act. Bilingualism of official government communications is not, and should not, be up for debate here. The Globe and Mail

Forced to tweet in both languages, ministers lose their impact
An opinion piece states, "…Reacting to complaints about the dominance of English-language tweets issued by former foreign affairs minister John Baird and **Public Safety Minister Steven Blaney**, the Commissioner decreed that ministers must tweet equally in French and English when acting in their official capacity. What this means exactly won't be clear until the Commissioner's full report is made public. The key line appears to be "in their official capacity", which leads to the question: Are ministers' Twitter accounts "official" departmental communications, representing the "voice" of the public sector departments these ministers lead? If yes, then of course their tweets need to be bilingual. Legally, this is required under Canada's Official Languages Act. Bilingualism of official government communications is not, and should not, be up for debate here. If ministers' Twitter accounts do not represent the official voice of government departments, but are instead a vehicle for the partisan, personal and professional communications of the MP, then the case is similarly straightforward. While there are many reasons an MP might choose to tweet in both official languages they're not legally obliged to do so. But this is where things get complicated." Globe and Mail

Broadcast media / Médias télédiffusés :

Canada's **Public Safety Minister** will speak this afternoon at CVE summit in Washington. Much of what he'll talk about is bill C-51. (CBC Radio One, 12:06 ET; CBC News, 12:35 ET; RDI, 10:45 ET) CBC News rough transcript

CTV News reports **Public Safety Minister Steven Blaney** will be taking part in the Countering Violent Extremism summit in Washington. According to the polls Canadians support bill C-51. The NDP will not support the legislation. *CBC News* presented a similar report. CTV News rough transcript; CBC News rough transcript

The government is dismissing concerns raised by the NDP over the proposed antiterrorism bill. **Public Safety Minister Steven Blaney** calls the concerns raised by the NDP as nothing more than ideological nonsense. (CJKL-FM, 6:01 ET; CJAD, 6:04 ET; AM 630 CHED Edmonton, 6:04; CFAX 1070 Victoria, 6:35; 680 News, 7 :06 ET; 580 CFRA, 7 :36 ET)

Avis d'ébullition d'eau pour des secteurs de Longueuil, Boucherville et Saint-Bruno
La Ville de Longueuil a émis jeudi un avis d'ébullition d'eau pour les arrondissements de Saint-Hubert et du Vieux-Longueuil et les villes de Boucherville et de Saint-Bruno-de-Montarville. L'avis est en vigueur pour 48 heures. Selon le communiqué de la ville «cette situation résulte de travaux à l'usine de production d'eau potable, située au 1700, rue Bourassa dans l'arrondissement du Vieux-Longueuil». Une baisse de pression affecte actuellement le réseau, mais les autorités prévoient un retour à la normale «sous peu». Huffington Post Québec; CBC News; CTV News

Gogama crude oil spill worries nearby Mattagami First Nation
Mattagami First Nation is sounding the alarm about a CN rail spill near the community. The First Nation said Saturday's derailment involving 29 crude oil tankers occurred on its traditional territory, located 40 kilometres north of the community. Ontario's Regional Chief Stan Beardy is advocating for the community to make sure the site is cleaned, as he's concerned about the spill causing environmental damage. CN and other agencies have been on the scene cleaning up all week. They say the spill is contained, and the rail line is now open to other train traffic. CBC News

NATIONAL SECURITY / SÉCURITÉ NATIONALE

White House summit on ISIL discusses Canadian mom's project
The efforts of a grieving Canadian mother were highlighted at a White House summit this week as an example of how to turn the tide in the online war against ISIL. According to some participants at the three-day summit on countering violent extremism, it's been a lopsided fight. They say the terror group has dominated on the battlefield of modern media. Its gory videos keep surfacing on websites, its online magazines invite youth to the jihadist cause, and its hackers even temporarily seized the social-media accounts of U.S. government and military agencies. One presenter pointed out a rare response to that online onslaught of jihadist propaganda: Christianne Boudreau's participation in a video about the death of her son in Syria. National Post

"Total Information Awareness": The Disastrous Privacy Consequences of Bill C-51
An blog post states, "The House of Commons debate over Bill C-51, the anti-terrorism bill, began yesterday with strong opposition from the NDP, disappointing support from the Liberals, and an effort to politicize seemingly any criticism or analysis from the Conservative government. With the government already serving notice that it will limit debate, the hopes for a non-partisan, in-depth analysis of the anti-terrorism legislation may have already been dashed. This is an incredibly troubling development since the proposed legislation has all the hallmarks of being pulled together quickly with limited analysis. Yet both the Conservatives and Liberals seem content to stick to breezy talking points rather than genuinely work toward a bill that provides Canadians with better safeguards against security threats while also preserving privacy and instituting effective oversight." Michael Geist

Defence minister says more terror attacks possible
Newly appointed defence minister Jason Kenney has used his maiden speech to the country's military establishment to pitch the government's anti-terror bill. He's telling the Conference of Defence Associations Institute that there is a likelihood of more homegrown terror attacks. Kenney, who took over from Rob Nicholson, earlier this month, says the country shouldn't over-react to the threat of the Islamic State-inspired extremism, nor should it under-react. The anti-terrorism bill, which increases the powers of security agencies, notably the Canadian Security Intelligence Service, is being debated by the House of Commons. It is the government's response to last October's attack on Parliament and the murder of two soldiers. Kenney casts the threat of Islamic extremism as a global danger. QMI Agency (The Guardian, Cape Breton Post, The Telegram, iPolitics); iPolitics; Toronto Star; Globe and Mail; iPolitics; Canadian Press (Metro News)

Four former prime ministers call for stronger security oversight
Four former prime ministers are among almost two dozen prominent Canadians calling today for stronger security oversight. The statement published in the Globe and Mail and La Presse newspapers comes as the Conservative government proposes a new mandate for the Canadian Security Intelligence Service. It is signed by Jean Chretien, Paul Martin, Joe Clark, John Turner and 18 others involved in security matters over the years. The Security Intelligence Review Committee currently oversees CSIS, doing several studies each year and tabling a report in Parliament. Critics point out the review committee is just that, a review body, not an oversight agency peering over the spy service's shoulder in real time. The letter notes that detailed recommendations for a new oversight regime, proposed in 2006 by the inquiry into the Maher Arar torture affair, were never implemented. IPolitics (The Chronicle-Herald); Canadian Press (Prince George Citizen); CBC News; CKNW AM 980

Grieving Canadian mother's message heard at White House summit
The efforts of a grieving Canadian mother were highlighted at a White House summit this week as an example of how to turn the tide in the online war against ISIS. According to some participants at the three-day summit on countering violent extremism, it's been a lopsided fight. They say the terror group has dominated on the battlefield of modern media. One presenter pointed out a rare response to that online onslaught of jihadist propaganda: Christianne Boudreau's participation in a video about the death of her son in Syria. The young man from Calgary was one of an estimated 20,000 people from 100 countries who went to fight with ISIS. In a speech earlier Wednesday, President Barack Obama acknowledged the struggle with social media. Canadian Press (CTV News)

A Royal Canadian Mounted Police Report Said Anti-Oil Activists Were National Security Threats
As the Stephen Harper government works to pass the C-51 bill, which would extend anti-terrorism legislation to include anyone who interferes with the "critical infrastructure," "territorial integrity," or "economic and financial stability of Canada," a leaked report from the Royal Canadian Mounted Police (RCMP) Critical Infrastructure Intelligence Team demonstrates how aboriginals and environmentalists are already being targeted by law enforcement for these reasons. The leaked intelligence report from early 2014 discusses a "growing international opposition" to mining operations on Canada's tar sands and focuses on "violent aboriginal extremists," anti-fracking, and anti-pipeline activists, identifying them as threats to national security. In particular, the report is concerned with aboriginal struggles against unwanted fossil fuel developments on lands that were never ceded to the Crown. VICE (2015-02-18)

Broadcast media / Médias télédiffusés :

Broadcast media provided live coverage of U.S. President Barack Obama speaking at the CVE summit. (CBC News, 10:42; CTV News, 10:42 ET) CBC News rough transcript

CTV News reports an Angus Reid poll shows 82% of Canadians support bill C-51 which includes expanding the powers of intelligence agencies and police. Many even believe that the measures don't go far enough. The poll also says a majority of Canadians believe that we need better oversight. (CTV News, 11:35 ET)

La question du jour de *RDI* : Fort appui des Canadiens au projet de loi C-51 contre le terrorisme. Croyez-vous également important d'accroître la surveillance du SCRS? (RDI, 11 :30 ET)

RDI mentionne la lettre de ce matin signé par quatre ex-premier ministre, aussi des ex ministre de la Justice du Canada, Roy Romanow, Bob Rae aussi qui ont été sur le fameux comité de surveillance qui existe actuellement. Ils disent qu'il faut plus de contrôle des agents du SCRS. (RDI, 13 :30 ET)

BORDER SECURITY / SÉCURITÉ FRONTALIÈRE

Canada announces new Windsor-Detroit bridge
Canada was already planning to pay for 95 per cent of a new bridge between Windsor, Ont., and Detroit. Now it's covering the final portion — a United States customs plaza. Transport Minister Lisa Raitt says it won't cost Canadian taxpayers anything because the funds will be recouped through tolls and a public-private partnership. The Canadian government had expressed frustration at having to wait for construction to start on the U.S. side of the estimated $4 billion project. The new infrastructure would be a next-generation replacement for the aging bridge that currently handles one third of all Canada-U.S. trade. The Record.com

MP Not Celebrating Border Agreement
Windsor West MP Brian Masse is not celebrating Wednesday's agreement between Canada and the U.S. over the costing of the new border crossing between Windsor and Detroit.Transport Minister Lisa Raitt told the House of Commons Canada will pay 95% of the cost of building the new bridge and the $250-million cost of building a customs plaza on the U.S. side. Under the public-private partnership, that cost will be recouped through future tolls. Masse, the NDP border critic says that's like charging Windsorites twice, the first time through their taxes. "At first you might think that that's okay, but the reality is tolls are mostly paid by local people crossing the border, so we end up fronting the lion's share of the deal." "Having to front this is not fair," he says. "It's not fair for our economy. It's not fair for tourism. It's not fair for the way we actually interact with our friends and relatives on the American side. We end up becoming an experiment for the government, and I think that's wrong." Blackburn News

Plus de cinq tonnes de tabac de contrebande saisies en deux mois dans la région de Cornwall
Les dernières semaines ont été fructueuses pour le Groupe de travail régional (GTR) de Cornwall et ses partenaires. Depuis le mois de décembre, cinq événements distincts ont mené à la saisie de 5217,7 kg de tabac haché fin et à l'arrestation de trois personnes. Dans un premier cas, le 9 décembre, les policiers ont aperçu une embarcation qui s'approchait à vive allure de la rive ontarienne du fleuve Saint-Laurent, à Bainsville. Ils ont ensuite surpris deux mineurs en train de déposer des sacs à ordures dans une camionnette. Les jeunes suspects ont été arrêtés, l'un sur place et l'autre à son domicile, et ont été libérés sous promesse de comparaître. Les policiers ont également saisi 3329,8 kg de tabac haché fin, qui était caché à l'intérieur de 116 sacs à ordures. Un autre homme a pour sa part été arrêté, le 28 janvier, après que des agents de l'Agence des services frontaliers du Canada (ASFC) l'eurent intercepté en possession d'étuis à cigarettes non déclarés.David Colon Jr, 27 ans, d'Akwesasne, devra répondre à une accusation de possession de tabac non estampillé. Son véhicule a été saisi et il a été remis en liberté en attente de sa comparution, prévue le 10 mars. Radio-Canada

CYBER SECURITY / SÉCURITÉ CYBERNÉTIQUE

IT security overhaul at National Research Council to cost $32.5 million
Fortifying the National Research Council's computer systems in the wake of a high-profile cyber attack last year will cost the federal government $32.5 million. That money, given to the government's super-IT department, will cover costs for a complete overhaul of one of the most complex and sensitive IT infrastructures in the country. Hackers, reportedly from China, infiltrated systems of the NRC, one of the most important research organizations in the Canadian government, in 2014. Ottawa Citizen

Leak threats abound, RCMP's Aubin warns

In the age of cyber security, RCMP's Michel Aubin says that insufficient resources are making insider leaks in the policing community are a significant threat that goes well beyond well intentioned whistle blowers. "I understand that everyone knows about Snowden, Madden, and Delisle... But for the law enforcement community, insider threats are a real issue," Aubin told the Conference Board of Canada Cyber Security conference Thursday morning. "I'm not trying to pick on any agency in particular. Cecere was an RCMP officer in Montreal working in our wire tap room who was leaking information to the mafia." Aubin is the director general of the Criminal Intelligence Service Canada (CISC) and oversees programs that include site, personnel and IT security. The issue for him is that even a small leak would have access to a vast, treasure trove of information. iPolitics

LAW ENFORCEMENT / APPLICATION DE LA LOI

RCMP sees 'anti-petroleum' movement as a threat

In response to the news about an RCMP document obtained by Greenpeace Canada, Council of Canadians chairperson Maude Barlow has tweeted: "Dissent is a right!" She and many others are worried because the Globe and Mail reports, "The RCMP has labelled the 'anti-petroleum' movement as a growing and violent threat to Canada's security, raising fears among environmentalists that they face increased surveillance, and possibly worse, under the Harper government's new terrorism legislation." In highly charged language that reflects the government's hostility toward environmental activists, an RCMP intelligence assessment warns that foreign-funded groups are bent on blocking oil sands expansion and pipeline construction, and that the extremists in the movement are willing to resort to violence. ...The report extolls the value of the oil and gas sector to the Canadian economy, and adds that many environmentalists 'claim' that climate change is the most serious global environmental threat, and 'claim' it is a direct consequence of human activity and is 'reportedly' linked to the use of fossil fuels." Rabble.ca

RCMP charges SNC-Lavalin with fraud and corruption linked to Libyan projects

Canadian police laid charges against Montreal-based SNC-Lavalin on Thursday for corruption and fraud in connection with an investigation into dealings with Libya. The RCMP National Division announced on Thursday that three divisions, SNC-Lavalin Group Inc., SNC-Lavalin Construction Inc. and SNC Lavalin International Inc. are all charged with fraud and corruption. SNC shares fell more than 6% in early trading after the charges were laid. SNC-Lavalin said in a statement Thursday and on Twitter that it will contest the charges and enter not-guilty pleas. "The charges stem from the same alleged activities of former employees from over three years ago in Libya, which are publicly known, and that the company has cooperated on with authorities since then," said Robert Card, the company's chief executive, in the statement. We will contest the charges in the interest of our current employees and their families, clients, investors, partners. The RCMP allege that between Aug. 16, 2001, and Sept. 20, 2011, the three entities bribed a Libyan official or officials with $47,689,868 Canadian to "use their positions to influence any acts or decisions of the Great Socialist People's Libyan Arab Jamahiriya." SNC-Lavalin CEO says projects won through corruption have been commercial flops Former SNC-Lavalin executive Riadh Ben Aissa pleads guilty to corruption charges. During the same period, the RCMP allege that all three entities defrauded "by means of deceit, falsehood or other fraudulent means" the Great Socialist People's Libyan Arab Jamahiriya with regards to a manmade river project in Libya, for a value of $129,832,830 Canadian. "Corruption of foreign officials undermines good governance and sustainable economic development. Financial Post (Montreal Gazette)

Epic Team-up: Hickory police & Canadian Mounties

The Royal Canadian Mounted Police, better known as Mounties, reached out to the Hickory Police Department recently for a little help solving a crime that police say got its start north of the border before making its way to Hickory. It all started in Squamish, British Columbia, in Canada, which is about 180 miles north of Seattle and about 3,000 miles northwest of Hickory, when a check from a Canadian business was reported stolen. The payee and the amount were allegedly altered before someone cashed it for $38,375 at a Hickory branch of Capitol One Bank, according to a Hickory police incident report. Hickory Record

Muir Lake School 'locked down' as police search for suspect

RCMP in Stony Plain put Muir Lake School under lockdown Thursday morning while they searched for a suspect in connection with a stolen vehicle. Police were called out to the area, west of Edmonton, around 6 a.m. after receiving reports that four people were trying to steal a vehicle. When they arrived on scene, the four suspects were spotted trying to free a truck that was stuck in a driveway. Two men were arrested on scene, while a third was tracked down with a police dog shortly afterwards. The fourth suspect's location remains unknown. While RCMP continued to search for the fourth suspect, exterior doors at Muir Lake School were locked as a precaution. Inside the school, students and staff were allowed to move freely. CBC.ca

Broadcast media / Médias télédiffusés :

A high-profile engineer firm SNC-Lavalin is accused of fraud and corruption. The RCMP alleges that they paid nearly $47.7 million to public officials in Libya directly or indirectly in order to obtain a business advantage. They say a subsidiary are also accused of defrauding Libyan organizations more than $100 million. SNC-Lavalin plans to plead not guilty. (CTV News, 10:11 ET; CBC News, 13:30 ET; RDI, 12:30 ET)

Nova scotia RCMP to the rescue. Again. Earlier this week, we told you about officers rescuing a baby seal. Well, look at this repeat performance Tuesday night. In both cases, the seals were on the road, not a safe place, especially at night. But here are two of Pictou County's finest urging this pup back into the water. A little fun slide there as he heads back. All in a day's work. (CBC News, 9:12 ET)

Human Trafficking Is Part of the Story of Missing and Murdered Aboriginal Women
An opinion piece states, "The distraught woman paced the streets, clearly in search of someone. She broke down in tears when police approached. "I'm looking for my daughter. She's being pimped out by a boy who's in a gang, and I need to find her." In no time, a sting was set up. The trafficker was arrested and the girl restored to her family on a First Nations Reserve in northern Alberta. She was one of the lucky ones. Many more victims end up on Canada's too-long list of missing and murdered women. Aboriginal women and girls are at higher risk of becoming victims of human trafficking in Canada than non-aboriginals, according to Canada's National Action Plan to Combat Human Trafficking. This selling and abusing of people -- a modern-day form of slavery -- is one of the pieces that make up the complex puzzle of Canada's more than 1,100 missing and murdered aboriginal women. And another reason we must take action. The story of the girl and her mother -- their names have been omitted for privacy -- was one of many heard by Canadian researchers, Yvonne Boyer and Peggy Kampouris, when they conducted a study for **Public Safety Canada** on the trafficking of aboriginal women and girls. We spoke with Kampouris about why First Nation women are at greater risk, and the challenges of addressing this appalling trend. Kampouris told us underlying issues, like higher rates of extreme poverty, substance addiction, family violence and sexual abuse, make aboriginal women more vulnerable to exploitation." Feds table supplementary estimates, seeking approval for $138.1-million for incremental costs of Iraq mission
The federal government is asking Parliament to approve a total of $138.1-million for the incremental costs so far of Canada's air strike mission in Iraq and participation in NATO efforts against Russian support for separatists in Ukraine-but its Treasury Board submission to the Commons and Senate does not break down the price tag for each mission or itemize details. The request for the new spending authorities contained in supplementary estimates Treasury Board President Tony Clement (Parry Sound-Muskoka, Ont.) tabled Thursday morning does not include the full cost for each mission, listing instead the cost that Canadian Forces are incurring over and above the salaries and normal operating costs that would have gone toward the roughly 600 personnel, six CF-18 fighter bombers and other aircraft deployed to the fight against Islamic State militants in Iraq. The Hill Times

Obama calls on world to focus on roots of ISIS, al Qaeda extremism
President Barack Obama called for a global effort to combat violent extremism and urged countries around the world to address the root causes that fuel groups like ISIS and al Qaeda during a speech Thursday before hundreds of foreign officials gathered for a summit on countering violent extremism. As he recalled recent terror attacks around the world,

Obama urged countries to "break the cycles of conflict, especially sectarian conflict" and called on governments to "address the grievances that terrorists exploit," both political and economic. CNN

"Total Information Awareness": The Disastrous Privacy Consequences of Bill C-51
The House of Commons debate over Bill C-51, the anti-terrorism bill, began yesterday with strong opposition from the NDP, disappointing support from the Liberals, and an effort to politicize seemingly any criticism or analysis from the Conservative government. With the government already serving notice that it will limit debate, the hopes for a non-partisan, in-depth analysis of the anti-terrorism legislation may have already been dashed. This is an incredibly troubling development since the proposed legislation has all the hallmarks of being pulled together quickly with limited analysis. Yet both the Conservatives and Liberals seem content to stick to breezy talking points rather than genuinely work toward a bill that provides Canadians with better safeguards against security threats while also preserving privacy and instituting effective oversight. The only detailed review to date has come from Professors Kent Roach and Craig Forcese. Their ongoing work – three lengthy background papers so far (Advocating or Promoting Terrorism, new CSIS powers, expanded information sharing) – provides by far the most exhaustive analysis of the bill and is a must-read for anyone concerned with the issue. Indeed, once you have read their work, it becomes readily apparent that all should be concerned with this legislation. Much of the focus to date has been on the lack of oversight and the expansive new powers granted to CSIS. However, the privacy implications of Bill C-51's information sharing provisions also cry out for study and reform. MichaelGeist.ca

Immigration detainees on hunger strike; want meeting with public safety minister
A group advocating for full immigration status for all migrants says more than 50 immigration detainees began refusing food Monday in two Ontario centres. The End Immigration Detention Network says the detainees are protesting prison conditions that include increasing lockdowns and the use of solitary confinement, and are calling for an end to indefinite detentions in maximum security prisons. The immigration detainees are asking for a meeting with **Public Safety Minister Ralph Goodale** to discuss their concerns. **A spokesman for Goodale** says **the minister** is working on issues related to

detention and hopes to put forward proposals later this year... The End Immigration Detention Network says immigration detainees previously went on a hunger strike that began on April 21, and met with officials from Canada Border Services Agency. But the group says CBSA has not followed through on promises it made and the detainees have begun the new hunger strike — this time calling for a meeting with elected officials."We would like to meet with MPs," said Toby Clark, who has been in immigration detention since August 2014...Sharmeen Khan of End Immigration Detention Network said detainees are often on long lockdowns during the summer — sometimes kept in their cells for days in a row, unable to speak with their families, or get legal support. "**Goodale** must meet with the detainees, and commit to upholding international norms and basic human rights by ending immigration detention," Khan said... **Goodale spokesman Scott Bardsley said** Monday in an email that CBSA is required to consider all reasonable alternatives before detaining someone. ***"Under Canadian law, detention is only allowed when: identity is not certain, there is a flight risk or a danger for the public," Bardsley said. Goodale*** has met with the United Nations High Commissioner for Refugees, the BC Civil Liberties Association, the Canadian Association of Refugee Lawyers and others to discuss detention issues, **he said**. ***"Our goal is to ensure our Canadian approach is world-class, including our methods of enforcement, with effective transparency and accountability."*** Canadian Press (Coast Reporter, The Record)

Funnel clouds formed as warnings ended not capable of causing much damage: Environment Canada
Environment Canada says many of the funnel clouds seen on Sunday in the Saskatoon area were only capable of producing landspout tornadoes, which are not capable of doing much damage. Technically the clouds could have formed tornadoes but they would be in the form of landsprout tornadoes, according to Natalie Hasell, warning preparedness meteorologist with Environment Canada. CBC News

Saskatoon residents warned of heavy rainfall rolling in
City crews are cleaning catch basins and priming pumps in anticipation of heavy rain expected to settle in the next 24 hours. Jeff Jorgenson, with the City of Saskatoon, said that workers and systems are in good shape as the clouds darken. Environment Canada has issued a rainfall warning for Saskatoon, forecasting between 60 and 100 millimetres by Wednesday. CBC News; News Talk 650

Nova Scotia Power has launched an online map that delivers near-live power outage reports on mobile devices. The outage map, which launched on Sunday, will automatically be updated every 15 minutes and can be viewed directly from your smartphone or tablet. Chronicle Herald

Toronto may join growing number of US cities with 911 texting
A city council vote this week could set Toronto on the path to becoming the first jurisdiction in Canada where all residents can send text messages to 911 operators instead of calling them. Coun. Norm Kelly is calling on the city to request that the Toronto Police Services Board consider adopting emergency texting. Many parts of Canada, including Toronto and 500 other Ontario communities, offer 911 texting for people with hearing or speech impairments. Text service for people with special needs also exists in Manitoba, New Brunswick, Nova Scotia, most of Quebec, and parts of Alberta and British Columbia. But emergency texting for people without hearing or speech impairment is not available anywhere in Canada. Canadian Press (Global News)

Sask. CBSA officers seize alcohol, drugs and weapons in June
The Canadian Border Service Agency (CBSA) seized 147 litres of undeclared alcohol, as well as drugs and guns in some June border seizures in Saskatchewan. On June 16 CBSA officers in Saskatoon were examining international commercial shipments in a warehouse when they discovered 147 litres of alcohol inside a container. In addition they also seized wood, meat and medicine that weren't declared, the CBSA said. Global News

Prohibited Weapon, Undervalued Boat Among June Border Seizures at Prince Rupert
A prohibited gun found hidden in various parts of a vehicle and an undervalued boat were the two most notable seizures made by Canada Border Services Agents in Prince Rupert last month. The CBSA says both seizures were made at the

Alaska Marine Highway ferry terminal. On June 14th, someone trying to bring in a 27-foot boat was forced to pay over $30,000 US, after officers determined it had been undervalued by nearly $24,000 US. CFTK TV

Canadian Men Accused of Trying to Smuggle Cocaine, Ecstasy Across Border
Three Canadian men have been accused of trying to smuggle more than a $1 million worth of cocaine and ecstasy through the remote Yaak River region of Lincoln County. Kristopher Glenn Pfeifer and Preston Frederick Lahmer were charged in U.S. District Court in Missoula with felony conspiracy to possess controlled substances with intent to distribute and possession with intent to distribute a schedule one controlled substance. Matthew Desmond Browne was charged with one count of felony conspiracy to possess controlled substance with intent to distribute and one count of felony possession with intent to distribute cocaine. Companies must directly notify people affected by privacy breaches: watchdog
Companies that lose personal customer data should be required to directly notify affected people — with limited exceptions — about the nature and date of the lapse along with steps taken to reduce the harm, says the federal privacy watchdog. The Trudeau government plans to introduce breach-notification regulations in coming months to improve transparency and help consumers. Several large businesses have been stung by hackers in recent years, causing embarrassment for proprietors and potential headaches for customers whose personal and financial details are suddenly circulating in cyberspace. Canadian Press (Metro)

NATO sites downed as measures approved opposing Russian aggression
Three days after the North Atlantic Treaty Organization's Allied Transformation Command websites were knocked offline, the alliance has yet to release official comments over the cause of the outage that felled two military command websites. The outages occurred during a NATO summit held in Warsaw last week, raising suspicions that Russian hackers could have attacked the websites in response to the summit's initiatives opposing Russian military aggression. “This is a suspicious timing for a technical failure,” a senior NATO official said, according to a Wall Street Journal report. “If this is a cyberattack, it would be no surprise.” On Friday, NATO approved measures to place US, UK, Germany and Canada-led battalions along member nations' borders with Russia. The battalions are expected to be placed in Estonia, Latvia, Lithuania and Poland by early next year. The intergovernmental alliance also on Friday approved language that defines cyberspace as a domain of war. SC Magazine

Hidden voice commands in YouTube vids can hack mobile devices
Hidden voice commands embedded in a YouTube video can trigger mobile devices to download malware and alter configuration settings, according to ZDNet. A team made up of researchers from the University of California, Berkeley, and Georgetown University, have created a technique capable of compromising a mobile device via voice commands embedded into a YouTube video. The signal is imperceptible to viewers, but is able to trigger commands within a nearby device, whether a laptop, computer, smart TV, smartphone or tablet. On Apple systems, Siri receives the message and on Android systems, Google Now interprets the signal. In attempting to warn of the risks inherent in increasingly ubiquitous voice interfaces, the researchers note how "an attacker uses the speech recognition system as an opaque oracle." The incursion could enable attackers to issue instructions to any nearby mobile device to initiate a download of malware or adjust configuration settings, which could then lead to a compromise of the device and the possibility of surveillance. Bob Paulson tells Mounties taking off-duty community assignments not an 'expectation'
The commissioner of the RCMP has told his officers they are not expected to take part in community events while off duty if they don't want to, after CBC revealed Mounties across the country were declining "red serge duty" in a protest over

working conditions. Bob Paulson made the comments in an email to staff dated July 8 and obtained by CBC News. "Many of our members choose to represent their RCMP profession in the community activity they engage in while off duty," Paulson said in the email, which does not mention the CBC story. "That is outstanding and frankly represents the professionalism and privilege many of us feel as employees of the force. But there is no rule or expectation that everyone do so." Last week, the CBC learned that some Mounties were no longer volunteering to appear in parades, fairs and festivals wearing their ceremonial red uniforms and Stetson hats in protest over unsustainable understaffing and overall morale issues within the force, among other irritants. CBC News

Axe woman tased, beaned
Police in the Kootenays arrested an axe-wielding woman without injury to her or the attending officers. Castlegar RCMP arrested the violent and distraught woman in Robson Saturday morning. "Reports had been received that the woman was damaging a home with an axe," said Cpl Dan Moskaluk. The call came in at after 11 a.m. July 9. "Upon police arrival, Castlegar RCMP officers found the woman outside of the residence, where it is alleged that the woman, who while armed with an axe, repeatedly made threatening gestures and approaches towards the RCMP officers," said Moskaluk. Tensions avec les policiers de Montréal?
Alors que les tensions sont vives aux États-Unis entre les policiers et les membres de la communauté noire, le maire de Montréal ne croit pas que ce soit le cas ici. Pourtant, des experts disent le contraire. Certains policiers du Service de police de la Ville de Montréal (SPVM) croient surtout qu'il est important de distinguer le profilage racial du profilage criminel. Pourtant les intervenants rencontrés par TVA Nouvelles disent le contraire, mais surtout qu'il y a toujours du travail à faire. TVA Nouvelles

Rural Manitoba police constable among few wearing body cameras
Chief Const. Darwin Drader is the lone officer for the Rural Municipality of Cornwallis' police department in western Manitoba. But with the simple click of a switch, he's now got a second set of eyes when he's on calls. Drader has started using a small body-worn camera while on the job in the Rural municipality, located on the outskirts of Brandon and about 200 km west of Winnipeg. It's believed he's the only police officer in the province currently doing so... The RCMP also said officers in Manitoba aren't wearing cameras. It's not known if there are plans to implement their use but they have been tested out at a small number of detachments across the country. CBC News

UPDATE: Man to be tried for murder, interfering with body of Nova Scotia police officer
A man accused of killing an off-duty Nova Scotia police officer and disposing of her body near a Halifax bridge will be committed to stand trial. Christopher Calvin Garner, 28, was in court Monday for a preliminary hearing on charges that he committed second-degree murder and interfered with a dead body in the death of Truro officer Catherine Campbell last September... A sworn affidavit from an RCMP officer obtained prior to the hearing says Garnier allegedly told police he punched and strangled Campbell at an apartment in the city. Chronicle Herald

Viral footage of violent Calgary police arrest shows officer worn cameras critical to public trust
An opinion piece states "Where there's no trust, there must be cameras. That's not to say the Calgary Police Service did anything wrong on Friday night, in an arrest that's since because fodder for every armchair cop critic, thanks to an amateur video showing 21-seconds of the violent detainment on 17 Ave. S.W., outside a pub. But that's not to say the three-on-one arrest was right, either -- and from a layman's perspective, without context, it does look like very harsh treatment for the person being busted, with one cop dishing out several punches to the man's face, and pulling his hair while he is pinned to the ground..." Calgary Sun

Collingwood man charged after police seize LSD, magic mushrooms, cocaine
Magic mushrooms, LSD and cocaine were some of the drugs seized by police from a Collingwood home last week. Members of the Organized Crime Enforcement Bureau, Central Drug Enforcement Unit, Community Drug Action Team (CDAT) and Collingwood OPP seized 70 grams of cocaine, 85 grams of marijuana, a small amount of LSD, magic mushrooms as well as cash, prohibited knives and brass knuckles from a Second Street home July 7. 'Institutional resistance' to treating inmates with mental health issues, Senator Bob Runciman says

There is a 100-bed unit at The Royal mental health centre in Brockville, Ont., that is dedicated to federal male inmates, and in 14 years, there has never been a suicide and no one has ever escaped. "They've had a tremendously successful track record of reducing reoffending rates and turning lives around," Senator Bob Runciman told CBC Radio's The Morning Edition host Craig Norris Monday. Despite this success, Runciman said, there is still resistance in the correctional system to treating people with mental health issues by placing them in a secure facility like the one in Brockville. That needs to change, he said. Especially after it appears a female offender being held at the Grand Valley Institution in Kitchener, Terry Baker, took her own life last week... There was a pilot project where Correctional Service Canada had one bed in the Brockville facility, but those at The Royal said it wasn't enough, they needed at least 10 beds, according to Runciman. That didn't happen and the pilot project failed, Runciman said. CBC News

Rapist to call Kelowna home
A notorious Calgary rapist is moving to Kelowna at the end of this week. Known as the Falconridge Rapist, the Parole Board of Canada confirms reports that Andrew Aurie Jefferson is set to be released from a federal corrections institute on Friday, with plans to take up residence in Kelowna. Jefferson, 31, gained notoriety nearly a decade ago after terrorizing women at knifepoint during a series of armed street attacks. He was convicted in 2008 of the 2006 violent rape of two women in Calgary. After spending time in prison for the assaults, Jefferson was supposed to be released in Kelowna in 2011, but chose Mission as his new home instead. Two years later, he was put back behind bars after a violent 2013 carjacking in Langley. Friday will mark his second statutory release from the federal system, mandated by law when offenders complete two-thirds of their sentence. Just like his release in 2011, the Parole Board states that Jefferson is considered a high risk to reoffend sexually. He will be required to follow strict rules upon his release including a residency condition requiring him to live in a halfway house or other facility chosen by the Correctional Service of Canada. Banerjee: Bangladesh must halt the creep of terrorism
An opinion piece states "In the eve of the closure of the holy month of Ramadan before Eid al-Fitr, Islamic militants stepped up attacks in Afghanistan, struck Istanbul, Baghdad, Dhaka and its outskirts and Saudi Arabia. The attack in Dhaka, the capital of Bangladesh, on July 1, and the second attack in a Eid prayer ground outside the Dhaka city limits, on July 7, are particularly deeply shocking as the world has witnessed the slide of a state with a secular constitution, albeit with Muslim majority, down the dangerous slope of violence and terror that are gripping the world. Bangladesh emerged as a nation directly out of a movement of liberation from an Islamic republic – Pakistan. The independence movement was based on Bengali cultural identity and rights of self-determination. The nation's original constitution embraced secularism, social justice, pluralism and diversity, despite 90 per cent of the population following Islam. One may argue that these foundational principles were not well protected by governments in power at different periods of time in Bangladesh's history, since 1971. But Bangladeshi Muslims had certainly made their mark as moderate followers of Islam; and despite dysfunctional politics, Bangladesh has served as a role model for low-income countries in the new millennium." Bob Paulson made the comments in an email to staff dated July 8 and obtained by CBC News. "Many of our members choose to represent their RCMP profession in the community activity they engage in while off duty," Paulson said in the email, which does not mention the CBC story. "That is outstanding and frankly represents the professionalism and privilege many of us feel as employees of the force. But there is no rule or expectation that everyone do so." Last week, the CBC learned that some Mounties were no longer volunteering to appear in parades, fairs and festivals wearing their ceremonial red uniforms and Stetson hats in protest over unsustainable understaffing and overall morale issues within the force, among other irritants. CBC News

Axe woman tased, beaned
Police in the Kootenays arrested an axe-wielding woman without injury to her or the attending officers. Castlegar RCMP arrested the violent and distraught woman in Robson Saturday morning. “Reports had been received that the woman was damaging a home with an axe,” said Cpl Dan Moskaluk. The call came in at after 11 a.m. July 9. “Upon police arrival, Castlegar RCMP officers found the woman outside of the residence, where it is alleged that the woman, who while armed with an axe, repeatedly made threatening gestures and approaches towards the RCMP officers,” said Moskaluk. Tensions avec les policiers de Montréal?
Alors que les tensions sont vives aux États-Unis entre les policiers et les membres de la communauté noire, le maire de Montréal ne croit pas que ce soit le cas ici. Pourtant, des experts disent le contraire. Certains policiers du Service de police de la Ville de Montréal (SPVM) croient surtout qu'il est important de distinguer le profilage racial du profilage criminel. Pourtant les intervenants rencontrés par TVA Nouvelles disent le contraire, mais surtout qu'il y a toujours du travail à faire. TVA Nouvelles

Rural Manitoba police constable among few wearing body cameras
Chief Const. Darwin Drader is the lone officer for the Rural Municipality of Cornwallis' police department in western Manitoba. But with the simple click of a switch, he's now got a second set of eyes when he's on calls. Drader has started using a small body-worn camera while on the job in the Rural municipality, located on the outskirts of Brandon and about 200 km west of Winnipeg. It's believed he's the only police officer in the province currently doing so…The RCMP also said officers in Manitoba aren't wearing cameras. It's not known if there are plans to implement their use but they have been tested out at a small number of detachments across the country. CBC News

UPDATE: Man to be tried for murder, interfering with body of Nova Scotia police officer
A man accused of killing an off-duty Nova Scotia police officer and disposing of her body near a Halifax bridge will be committed to stand trial. Christopher Calvin Garner, 28, was in court Monday for a preliminary hearing on charges that he committed second-degree murder and interfered with a dead body

in the death of Truro officer Catherine Campbell last September... A sworn affidavit from an RCMP officer obtained prior to the hearing says Garnier allegedly told police he punched and strangled Campbell at an apartment in the city. Chronicle Herald

RCMP unveils memorial plaque for slain West Shore Mountie
West Shore RCMP have unveiled a new memorial for fallen Const. Sarah Beckett, who died in the line of duty earlier this year. The granite stone plaque was installed Monday in a memorial garden commemorating Beckett at the West Shore detachment in Langford. CTV News

Viral footage of violent Calgary police arrest shows officer worn cameras critical to public trust
An opinion piece states "Where there's no trust, there must be cameras. That's not to say the Calgary Police Service did anything wrong on Friday night, in an arrest that's since because fodder for every armchair cop critic, thanks to an amateur video showing 21-seconds of the violent detainment on 17 Ave. S.W., outside a pub. But that's not to say the three-on-one arrest was right, either -- and from a layman's perspective, without context, it does look like very harsh treatment for the person being busted, with one cop dishing out several punches to the man's face, and pulling his hair while he is pinned to the ground..." 'Institutional resistance' to treating inmates with mental health issues, Senator Bob Runciman says
There is a 100-bed unit at The Royal mental health centre in Brockville, Ont., that is dedicated to federal male inmates, and in 14 years, there has never been a suicide and no one has ever escaped. "They've had a tremendously successful track record of reducing reoffending rates and turning lives around," Senator Bob Runciman told CBC Radio's The Morning Edition host Craig Norris Monday. Despite this success, Runciman said, there is still resistance in the correctional system to treating people with mental health issues by placing them in a secure facility like the one in Brockville. That needs to change, he said. Especially after it appears a female offender being held at the Grand Valley Institution in Kitchener, Terry Baker, took her own life last week... There was a pilot project where Correctional Service Canada had one bed in the Brockville facility, but those at The Royal said it wasn't enough, they needed at least 10 beds, according to Runciman. That didn't happen and the pilot project failed, Runciman said. CBC News

Rapist to call Kelowna home
A notorious Calgary rapist is moving to Kelowna at the end of this week. Known as the Falconridge Rapist, the Parole Board of Canada confirms reports that Andrew Aurie Jefferson is set to be released from a federal corrections institute on Friday, with plans to take up residence in Kelowna. Jefferson, 31, gained notoriety nearly a decade ago after terrorizing women at knifepoint during a series of armed street attacks. He was convicted in 2008 of the 2006 violent rape of two women in Calgary. After spending time in prison for the assaults, Jefferson was supposed to be released in Kelowna in 2011, but chose Mission as his new home instead. Two years later, he was put back behind bars after a violent 2013 carjacking in Langley. Friday will mark his second statutory release from the federal system, mandated by law when offenders complete two-thirds of their sentence. Just like his release in 2011, the Parole Board states that Jefferson is considered a high risk to reoffend sexually. He will be required to follow strict rules upon his release including a residency condition requiring him to live in a halfway house or other facility chosen by the Correctional Service of Canada. Banerjee: Bangladesh must halt the creep of terrorism
An opinion piece states "In the eve of the closure of the holy month of Ramadan before Eid al-Fitr, Islamic militants stepped up attacks in Afghanistan, struck Istanbul, Baghdad, Dhaka and its outskirts and Saudi Arabia. The attack in Dhaka, the capital of Bangladesh, on July 1, and the second attack in a Eid prayer ground outside the Dhaka city limits, on July 7, are particularly deeply shocking as the world has witnessed the slide of a state with a secular constitution, albeit with Muslim majority, down the dangerous slope of violence and terror that are gripping the world. Bangladesh emerged as a nation directly out of a

movement of liberation from an Islamic republic – Pakistan. The independence movement was based on Bengali cultural identity and rights of self-determination. The nation's original constitution embraced secularism, social justice, pluralism and diversity, despite 90 per cent of the population following Islam. One may argue that these foundational principles were not well protected by governments in power at different periods of time in Bangladesh's history, since 1971. But Bangladeshi Muslims had certainly made their mark as moderate followers of Islam; and despite dysfunctional politics, Bangladesh has served as a role model for low-income countries in the new millennium." Subject: Toronto Star: Canada's spy review bodies struggling to keep tabs on agencies (Minister quoted)

Canada's spy review bodies struggling to keep tabs on agencies
Toronto Star
Alex Boutilier
April 1 2015

The review bodies for both of Canada's intelligence agencies are raising concerns about their ability to keep track of the country's spies.

The warnings come as the Conservatives continue to insist that Canada does not require increased oversight into the Canadian Security Intelligence Service or the Communications Security Establishment.

The Security Intelligence Review Committee (SIRC), which reviews CSIS actions, said continued vacancies on the five-person board, the inability to investigate CSIS operations with other agencies, and delays in CSIS providing required information are "key risks" to the committee's mandate.

Meanwhile, the Office of the Communications Security Establishment Commissioner warned that the growth of the massive electronic spying agency, coupled with fiscal restraint at the commissioner's office, is a "constant concern."

The two review bodies combined boast about 30 full-time employees and an annual budget of roughly $5 million, according to government documents. The agencies they review are expected to spend more than $1 billion this year, and CSE alone has more than 2,000 employees.

The concerns were raised in both agencies' plans and priorities reports, which outline the expected actions and spending of government departments and agencies for the year.

They come as Parliament continues to debate Bill C-51, which would give CSIS a much wider mandate to investigate and "disrupt" threats to Canada's national security.

Many critics who testified about the bill, and a good number of witnesses who support it, have argued there should be some measure of parliamentary oversight into the actions intelligence services take on Canadians' behalf.

But **Public Safety Minister Steven Blaney**, responding to questions in the House of Commons Wednesday, said Canada's review system is the ***"envy of the world."***

***"We will continue to support them,"* Blaney** said of the review bodies.

Blaney has argued that SIRC provides adequate review of CSIS activities, and that additional oversight would simply be ***"needless red tape."***

In its report, however, the SIRC admitted it can review only a "small number" of the spy agency's actions each year.

"Currently, SIRC reviews still lack the ability to 'follow the thread' of a CSIS investigation if it involves another government department or agency," the SIRC wrote.

"SIRC's effectiveness is dependent on (CSIS's) timely provision of information. In those cases where there are delays in receiving information, SIRC is at risk of being unable to complete its reviews and investigations in a timely manner."

Both SIRC and the CSE commissioner reported their review capacity depends on co-operation with the agencies they look into — while both are separate and independent from the agencies, both say they require a close working relationship. The CSE commissioner's report went so far as to say the success of their reviews is "fundamentally reliant on the relationship between the office and CSE."

Both review bodies also say they need to work together. SIRC's mandate is to review CSIS operations, but not CSIS's co-operation with CSE. Without seeing how the different agencies interact — including with the RCMP, which has civilian review, and Military Intelligence, which has no civilian review — the CSE commissioner said it's difficult to see the whole picture.

"Information sharing among intelligence agencies at the national and international level requires at minimum some co-operation among the various review and oversight bodies," the report notes.

CSIS's operations have been well known since the intelligence branch of the RCMP was separated from the law enforcement mandate. The operations of CSE, on the other hand, have attracted widespread attention only through the leaks of whistleblower Edward Snowden.

Working from those disclosures, The Intercept and CBC revealed CSE has developed a suite of cyberwarfare tools, and had a goal to become more aggressive in their use by 2015.

Other documents leaked by Snowden suggest CSE has engaged in mass Internet surveillance of file-sharing sites, and collects massive amounts of Internet traffic through 200 "Internet backbone" sites worldwide through a program called EONBLUE.

Bill Galbraith, the executive director of the CSE commissioner's office, said he could not discuss whether the office is looking into those disclosures.

"The reviews that we are conducting cover a range of signals intelligence activities, IT security activities, and there is a major review of metadata underway," Galbraith said in an interview.

Deborah Grey, the former Conservative MP and current acting chair of the SIRC, could not be reached for comment on Wednesday.

How the review bodies measure up:

18 – The number of full-time equivalent positions at the SIRC

11.5 – The number of full-time equivalent position at the CSE commissioner's office

$5 million – Roughly how much both offices have to spend this year

$537 million – Amount CSIS expects to spend in 2015-2016 alone.

2,175 – Number of employees at CSE

Is CSIS concealing security breaches?
Alex Boutilier
Toronto Star
2016-05-22, 03:27 ET

A federal watchdog is looking into claims that Canada's spy agency had only one serious privacy violation in 2015, the Star has learned.

The Canadian Security Intelligence Service reported its one privacy breach last year only after the spy agency was urged to by an independent review body.

Privacy commissioner Daniel Therrien said he'll contact CSIS to ensure they're following government-wide rules to report all serious breaches to his office.

"It is certainly something to investigate with CSIS," Therrien said in an interview Friday.

"I will follow up with CSIS to inquire as to whether they think they're bound by (the reporting requirement), (and) whether truly there was only one incident to be reported."

Documents recently tabled in Parliament revealed federal departments and agencies logged 5,853 privacy and data breaches in 2015. Taken together, the breaches involved 45,892 individual Canadians.

CSIS did not disclose its one reported incident in the parliamentary documents, citing national security concerns, but confirmed it when contacted by the Star.

In 2014, the federal government created a new rule that all "material" privacy breaches - those that could cause serious damage to Canadians, or affect a large number of individuals - must be reported to Therrien's office and the Treasury Board.

Material privacy breaches can range from the relatively minor - misdirected mail or electronic files mistakenly accessed - to serious incidents, such as stolen hard drives or improper snooping.

But the parliamentary documents reveal that in 2015, only 304 breaches were disclosed to the commissioner - 5.2 per cent of the total.

CSIS was asked to report one incident by the Security Intelligence Review Committee, an independent body that looks into the agency's operations.

The agency had been accessing taxpayer information at the Canada Revenue Agency without a warrant - a practice that CSIS itself reported to the SIRC and asked them to investigate. It's not clear how many people were affected by the breach.

In a statement, CSIS said it was bound by the policy to disclose material breaches. But when asked if the agency proactively reports breaches, or only does so at the SIRC's direction, a spokesperson said only that the agency respects Canadian law and ministerial directive.

"The (SIRC) reports to Parliament on the operations of CSIS," spokeswoman Roxanne Ouellette wrote in a statement.

"SIRC ensures that powers given to CSIS are used legally and appropriately, in order to protect Canadians' rights and freedoms.

In response to an official request to detail the number of privacy and information breaches from NDP MP Alexandre Boulerice, CSIS said they have "robust" protections in place for private information.

"CSIS maintains robust policies and procedures in regards to its collection activities and in its information management polices and procedures," the agency wrote.

"For reasons of national security, CSIS does not disclose information related to data, information, or privacy breaches."

The agency declined to provide a global number of breaches in 2015, as requested.

Other departments on the national security file, such as **Public Safety (two breaches)**, the Canadian Border Services Agency (35), and the RCMP (52) were more forthcoming.

RCMP Const. Annie Delisle said the force reviews potential privacy breaches before reporting them to both the privacy commissioner and Treasury Board.

"While the RCMP would not disclose specific details of a privacy breach that could compromise national security, or ongoing operations and investigations, it is still obligated to report that a breach has occurred," Delisle wrote in a statement.

Therrien said some national security agencies seem to be concerned that reporting to his office as well as their own review bodies would create duplication.

He said he is open to discussing how the privacy office could work with review bodies like the SIRC to provide efficient and effective oversight on privacy files.

"We're only two or three years after the Snowden revelations," Therrien said, referring to U.S. whistleblower Edward Snowden.

"I don't think it's the time now to reduce the jurisdiction of review bodies. ... I think it is more time to facilitate the sharing of information between oversight bodies so that we can do our job as efficiently as possible."

In a recent submission to a parliamentary committee, Therrien recommended that the duty to report privacy breaches to his office be enshrined in law.

Subject: Toronto Star: National electronic intelligence agency executive calls for 'rational debate' on encryption (Department mentioned)

National electronic intelligence agency executive calls for 'rational debate' on encryption
Toronto Star
Alex Boutilier
September 25, 2016

Canadians are being encouraged to ask more questions about the security of their electronic devices from an unlikely source: an executive at the country's electronic intelligence agency.

Scott Jones, the deputy director of IT security at the Communications Security Establishment, said Canadians need to start taking a greater interest in how their electronic devices protect personal information.

"We should be asking when we go and buy the stuff we have at home, OK, tell me how it's being protected," Jones said in an interview.

"If it's my cellphone, does it have encryption if I lose it? Can somebody just read the data off of it or not? We need to start asking questions like that … We need to start helping each other, and helping citizens, helping businesses, helping the government when we're buying these products they need to be secure by default."

It may surprise some to hear an employee at CSE counselling Canadians to protect their private information. The agency, which has largely operated in secret since its creation at the end of the Second World War, was thrust into the spotlight after U.S. whistleblower Edward Snowden's disclosures.

CSE is part of the Five Eyes alliance, which includes security agencies in the United States, the United Kingdom, Australia and New Zealand. Snowden's disclosures drew back the curtain on mass surveillance programs used by those countries, including programs that scooped up their own citizens' communications.

Jones' comments also come as law enforcement agencies in the U.S. and Canada are forcefully arguing for limiting citizens' ability to secure their information through encryption programs — calling for so-called "backdoors" that would let authorities decode the data.

When this is pointed out, Jones agreed the encryption debate is a difficult one to resolve.

"I don't take it personally, because I think it's a really important question," Jones said.

"(We need) a rational debate over the tools that law enforcement needs to do its job, right? I trust law enforcement to keep me safe, but I also trust the legal system to protect my privacy as well, and to find a balance. But we haven't been able to have those conversations in this country (yet)."

While police and intelligence agencies argue about whether citizens should have access to strong encryption, the federal government, on the other hand, is trying to improve its own electronic defences.

Known as "Part B" of CSE's mandate, cyber-defence operations require the agency to work with a host of other federal departments to try and protect government information — including Canadians' personal information.

For serious cyberattacks, the response could include the RCMP, CSIS, **Public Safety**, Shared Services Canada, even Global Affairs and the Privy Council Office.

"Cyber is not a singular dimensional problem, it's not just a technical issue or the computer system, it's also about the objective of the compromise or what the threat actor was trying to obtain," Jones said.

"You can't have the master of cyber in a single department, because to do that you'd have to create the department of everything."

The Liberal government is in the middle of a wide-ranging review of Canada's approach to cyber security, and Jones expects the encryption debate to figure into that larger discussion.

The government has also pledged to review Ottawa's overall national security regime, beginning with increased oversight from a parliamentary committee, and to roll back some of the powers granted to intelligence agencies through the Conservatives' controversial terrorism law, Bill C-51.

SUBJECT:
TOLERANCE FOR COLLATERAL DAMAGE TOO LOW: EX-CIA DIRECTOR GENERAL HAYDEN

[CLIP] – DONALD TRUMP (Republican Presidential Candidate Frontrunner): *I said, they're chopping off our heads in the Middle East. They want to kill us. They want to kill us. They want to kill our country. They want to knock out our cities. And don't tell me it doesn't work. Torture works, okay folks? Torture… you know I have these guys, "torture doesn't work." Believe me, it works, okay? And waterboarding is your minor form. Some people say it's not actually torture. Let's assume it is. But they ask me the question: what do you think of waterboarding? Absolutely fine. But we should go much stronger than waterboarding. That's the way I feel.*

LYNCH: That of course is Republican frontrunner Donald Trump, absolutely convinced that torture is the way to go in the fight against terrorism. He's also said it's a pretty good idea to target the families of terrorists, despite that being a war crime under international law. While Trump's ideas may be winning him some support, it's causing unease among people whose job it is to actually hunt down terrorist fighters.

One of them is Michael Hayden. He was the director of the National Security Agency from 1999 until 2005, and the director of the Central Intelligence Agency from 2006 until 2009. He's the only person ever to hold both positions. He's now the author of a new book, Playing to the Edge: American Intelligence in the Age of Terror, and Michael Hayden joins me from Washington, D.C.

Hello.

GENERAL MICHAEL HAYDEN (Ex-NSA and CIA Director and Author): Hi Laura.

LYNCH: General, what do you think of what Donald Trump said? Morality and war crimes aside, does torture work?

GENERAL HAYDEN: Wow, where to begin? How to unpack all that you just played. Look, let me give you the gut feeling of what Mr. Trump is saying, and how people like me feel about this.

Number one: he seems to be doing this out of enthusiasm. Whatever we did, and again, honest men can argue about it, we did not do out of enthusiasm, we did out of duty and occasionally out of regret. He says we ought to do this because they deserve it. We never did anything to these people because they deserved it. We're not the arm of American justice, this is American intelligence. This was never backward-looking, this was forward-looking. And again, people can disagree with what we did, and…

LYNCH: And people do…

GENERAL HAYDEN: Yes.

LYNCH: But you do say in the book – you point to examples of where you say it was effective…

GENERAL HAYDEN: Right.

LYNCH: … in gathering information.

GENERAL HAYDEN: Right. But again, just back to motivation and distinguishing what happened, to what he's claiming he would do, this was forward-looking, and it was about safety, and then finally… finally what we did was rare. We did it on three, and only three people, and the last time in 2003. He appears that he wants to do it routinely.

LYNCH: Okay, so that comment and his comment about going after the families, what do you think of that? Do you think that that's an appropriate role for America's military or intelligence agencies?

GENERAL HAYDEN: Well, two broad thoughts. With regard to waterboarding, I have said in other fora and I'll repeat for your audience, Laura, if a future president wants to waterboard somebody, he'd better bring his own bucket because the agency I'd led will not do it. Not because they disagreed with what they'd done in the past, but they frankly feel betrayed by the society they served because of what's happening… happened to them afterwards.

And with regard to targeting the innocent, violating the Geneva Convention and going after women and children because they happen to be related to terrorists, that's such a fundamental violation of the laws of armed conflict, that my expectation would be that if that order ever popped up in the American command and control system, the first American in uniform, man or woman, would simply turn to whomever had given the order to him or her and simply say, this just isn't going to happen.

LYNCH: You would defy an order of the Commander-in-Chief?

GENERAL HAYDEN: I… I… I fully expect an order so black and white as that one, I can't picture the American Armed Forces carrying it out.

Now, Laura, to be perfectly honest, you know, innocents die in combat. It's called collateral damage, and there is a moral judgement to be made with regard to the eternal principle of war with regard to distinction and proportionality. How many of the innocent might die, and is that target really necessary? That happens all the time, and frankly, I think right now our threshold for collateral damage under President Obama in Syria is too low. In the end, more innocent people will die because you have not disabled an enemy that does intentionally target the innocent.

LYNCH: And there are some who would certainly dispute that argument with you who say that the civilians dying in the name of killing those who are labelled as terrorists is simply not acceptable. But when you hear Donald Trump speak about fighting terrorism and maintaining security at home, and the words obviously concern you, but does it worry you that he might be a threat to national security?

GENERAL HAYDEN: Well, one hopes that whenever anyone becomes president, what the permanent government – you know, the folks I left behind at these agencies – try to impose on the President-Elect is their world view. I have a line in the book, Laura, and I applied it to the 2008 election, and it would have applied no matter who won – Senator Obama or Senator McCain – and it's simply this: our job is to point out to the newly-elected president, that national security looks different from the Oval Office than it does from a hotel room in Iowa.

LYNCH: I guess you're hoping that'll be true if Mr. Trump becomes president.

GENERAL HAYDEN: That's right.

LYNCH: I want to ask you about the recent attacks in Paris and Brussels. I'm wondering, what did these attacks tell you about the state of intelligence-gathering these days?

GENERAL HAYDEN: Yeah, sadly these attacks were not a surprise. They were somewhere between expected and inevitable, knowing what it was we knew and knowing what it was we didn't know about the ISIS network in Europe. These were fairly mature attacks. Multiple targets. High-end targets sequentially done, synchronized. This wasn't cooked up in somebody's basement the night before, and it's clear that the attacks for their success depended upon a network that could get the weapons, could get them hidden, could get the detonators, could get everyone to the targets on time, and so on.

And so, I fear the extent of this network is broader than we know, and it remains there as a clear and present danger to safety. I should add, Laura, in Europe.

LYNCH: But did intelligence fail?

GENERAL HAYDEN: Well, I mean the attack took place, and so, yeah, when you look back as to what happened, both intelligence – and in this case law enforcement because we are talking about domestic activities in these countries – appears to have been well short of need.

LYNCH: Let me go back to a very dark day in American history – one that was certainly dark for you and many other Americans. You were the head of the National Security Agency the day the planes flew into the World Trade Centre and the Pentagon and in the field in Pennsylvania. What were your main concerns in the minutes and hours after that attack?

GENERAL HAYDEN: Yeah, the first concern I had was to protect my workforce, not because that was a moral imperative—not just because it was a moral imperative—but it was an operational imperative. The nation would be badly damaged if we lost the talent that is represented by the NSA workforce. So the first thing I did was to evacuate all non-essential personnel, and then I took the essential personnel, Laura, and to the best of our ability got them out of the highrise headquarters building and put them into an older three-storey operations building that goes back to the near-founding of the agency. Get them out of the highrises, get them into the low building, let the non-essential folks go home. And then the other thing we started to do, Laura, was to build in plans, not just to protect America, but to protect ourselves.

LYNCH: And I want to get to that, but I need to ask you in light of what we were just discussing with Brussels and Paris, this was an intelligence failure, was it not?

GENERAL HAYDEN: What, 9/11?

LYNCH: Yeah.

GENERAL HAYDEN: Yeah. We freely admit that it was a failure, but, you know, if you let me step back, and this is not meant to be in the defense of the community of which I was a part, but to describe more broadly the issues we all face, I agree mistakes were made. My agency made some, CIA, FBI in the run-up to this. But given the overall condition of the country, Laura, given the state of law enforcement, the state of law, the way we had decided to protect ourselves against what we viewed to be the threat, if this 9/11 had been stopped, another 9/11 would have happened.

The reason we're safer after 9/11 than we were before, is not just that our intelligence got better, but that we as a nation decided to go on a war footing, and that totality is what has made us safer.

LYNCH: You write about a meeting that took place shortly after that involving intelligence services of Britain, Australia, New Zealand, the U.S and Canada, and you were told by Britain at that time that there needed to be a discussion about balancing security with freedom, and I'm wondering how the U.S responded to that advice.

GENERAL HAYDEN: Oh, no! We welcomed that. We all knew that... we all share that Anglo-Saxon democratic tradition. I mean, we've got shades of differences between and among us, you know, parliamentary governments, presidential governments, and so on, but we all go back to the same trunk of the tree, to the same roots. And in that meeting, Eliza Manningham-Buller, who then was Deputy MI5 -- later became the head -- she summarized it quite well. She said: our societies are all accustomed to do what it is we have to do to those who are guilty. Our challenge in the intelligence services is to devise what it is we must do to find and ferret out those who are not yet guilty. That's a real challenge.

LYNCH: Okay, and so your response to this is, the president asked you to find out what you can do, you write about a top secret program you launched called Stellarwind that's attracted a lot of controversy over the years. What was Stellarwind?

GENERAL HAYDEN: Yeah, Stellarwind, if you just step back for a second, Laura, talking about how we were as a society before 9/11, we, in the United States had decided the best way to get both freedom and security, liberty and privacy, was to create divisions until we kind of shoved all the foreign stuff to one side, all the domestic stuff to another, shoved all the intelligence activity to one side, all the law enforcement stuff to the other side, and we kept those separate as the best compromise to buy both security and liberty, safety and privacy. Those 19 hijackers drove down that seam between those characteristics that I just described.

So the challenge we had was how then do we... do we tighten up, in a world in which we kept foreign and domestic intelligence and law enforcement information isolated from one another... And the challenge – we responded to the challenge in many ways, but one of them was the Stellarwind program, which was designed to detect terrorist communications that should have been at the highest importance to the United States, terrorist communications one end of which was in this country, right?

LYNCH: And yet, you seem somewhat aware of the fact that you were, as you say "clinging to the edge" because you write in your book about taking a walk with your wife at Fort Meade and telling her you were about to do something controversial.

GENERAL HAYDEN: Right.

LYNCH: And you write, and I'm going to quote here: "I was comfortable with doing it because it was right, but at some point there was going to be high political and reputational risk, and I couldn't rule out legal risk either."
Why did you think that?

GENERAL HAYDEN: Because... a subsequent president might decide that what this president had authorized was, in one way or another, illegal or unconstitutional. Now, as it turned out, Laura, the next president – President Obama – not only did not do that, he actually doubled-down on the program and actually expanded it. On the other hand, some of the things that CIA had been doing, which are not the subject of that chapter, the incoming president decided, quite arbitrarily in my view, that what the agency had been ordered to do actually constituted felonies. And there were investigations of CIA officers.

So, you know, eyes wide open, reputational risk was going to be there, political risk certainly, and could not rule out legal risk -- I still thought it was, not just the right thing to do but the legal thing to do. My lawyers told me that our president, under his Article 2 authorities, did indeed have the power to—in this case—ignore the FISA Statute and go ahead and authorize us to gather metadata.

LYNCH: Now your words there that I read in that quote, someone like Edward Snowden might make the same case. He knew leaking the documents carried a legal risk, but he thought it was the "right thing" to do for the country, so what's the difference?

GENERAL HAYDEN: Well, the difference is that I stayed in this country and was willing to... willing to go under anything the American political or legal system would have me do. I did not go to a third country and remain there. You know, I don't view what I did to be civil disobedience, since I was doing it under the authority of the president with the approval of the Attorney General. Mr. Snowden has indeed conducted what he believed to be civil disobedience, and if you read the American classic on civil disobedience, Henry David Thoreau's piece, he says that civil disobedience takes its moral meaning from the willingness to suffer the consequences of your action legally. Mr. Snowden does not appear to be willing to do that.

LYNCH: And you disagree with what he did, obviously.

GENERAL HAYDEN: Yes.

LYNCH: Now I just recently though... the former Chief of Staff to Colin Powell, Colonel Lawrence Wilkerson said Snowden has done a service. He called him, and I'm going to use the words that he used: courageous, logical, impressive, he refrained from releasing anything truly dangerous, he was circumspect, altruistic motives, more helpful than dangerous...
What do you think of Colonel Wilkerson's assessment?

GENERAL HAYDEN: That's fundamentally an idiotic statement because Snowden stole more than a quarter of a million documents. He was largely unaware of the content of the documents. He freely admits that he didn't curate the documents, and so I mean, you know, I would just raise the question: what's the civil liberty's quotient of telling the world that the National Security Agency is intercepting the unclassified emails of the Syrian Armed Forces? Actually, about 1 or 2% of what the man released had to do with American privacy. The other 98% had to do with how America collects foreign intelligence, and one has to wonder, why did he shove all that other stuff out the door if his question was about American privacy?

LYNCH: I want to play you a clip now from February the 5th 2003, and this is Colin Powell, then the Secretary of State, making his case for war against Iraq before the UN Security Council:

[CLIP] – COLIN POWELL (Secretary of State-2003): *Let me begin by playing a tape for you. What you're about to hear is a conversation that my government monitored that takes place on November 26th of last year, on the day before United Nations teams resumed inspections in Iraq. The conversation involves two senior officers, a colonel and a brigadier-general from Iraq's elite military unit, the Republican Guard (plays conversation).*

LYNCH: Now, in your book you write that Colin Powell used NSA intercepts to build the case that Saddam Hussein had weapons of mass destruction and you… and of course we know that case was wrong…

GENERAL HAYDEN: Right

LYNCH: As the head of the NSA at the time, how convinced were you, really, that Saddam Hussein had weapons of mass destruction?

GENERAL HAYDEN: I was convinced enough to vote "yes" in the ultimate meeting we had on the National Intelligence Estimate. The rhythm, Laura, in our… in our intelligence organization is that the director of Central Intelligence, George Tenet, brings in the head of the three-letter agencies, we discuss the conclusions, the key judgements of the NIE, and I bid… voted in favour of each of the conclusions. I was wrong.

I did have a private conversation that I mention in the book, with Condi Rice, saying, Condi, I've got a room full of evidence this guy's doing this, I got to tell you though, Condi, all my evidence is circumstantial. Now before you jump on that, Laura, I tell another story in the book where President Obama is talking to Mike Morell, one of the good guys at the CIA that worked with me and was a senior. And the President was asking him, Michael, you guys seem all over the map in terms of whether Osama bin Laden is in that compound in Abbottabad or not. What are the people in the agency really saying? And the answer Michael gave was, well, Mr. President, anybody who touched the Iraq NIE is saying it's 50/50. Those folks who… who studied only Osama bin Laden and Al-Qaeda are giving it 90/10. And the president said, ah… so I understand. And then Michael interrupted him, because Michael had a very good relationship with the president, and Michael said, Mr. President, I gotta tell you, all the evidence that Osama bin Laden is in that compound is indeed circumstantial…

LYNCH: But you raise the question, is circumstantial good enough to take a nation to war—a war that's led to the destabilization of Iraq and…

GENERAL HAYDEN: Oh! Well…

LYNCH: … and the rise of extremist groups like ISIS?

GENERAL HAYDEN: Well, look… look… George… George Tenet makes the point that that NIE was the public justification for war, it was not the casus belli. But Laura, the purpose of intelligence is not the same purpose of evidence in a court of law where you're supposed to get things beyond all reasonable doubt. The purpose of intelligence is to enable action even in the face of lingering doubt.

I was asked by an American, actually a venture-capitalist, on a scale of zero to ten, how would you rate… right… rate CIA analysis? And the first thing I said was, we don't do 8, 9, or 10. If we can get it to 8, 9, or 10, they aren't asking us the question, they're chucking it down to the Department of Commerce or the Interior or somebody. We get a lot right, we… and that I freely admit, we got this one wrong.

LYNCH: Let's wind up our conversation then by taking it back onto your territory, the United States…

GENERAL HAYDEN: I should say…

LYNCH: Republicans often accuse President Obama of being weak when it comes to targeting of Islamic extremists – you've spoken of him already of his efforts to double-down on some of the programs you have – what do you think of that charge against him?

GENERAL HAYDEN: So, a couple of macro judgements, alright? And this may surprise your Canadian listeners, but in my heart of hearts, and I actually mention it in the book, Laura, in terms of fighting terrorism, there are bigger changes between President Bush's first and second administrations than there were between the Bush and the Obama administration. When you talk about recalibrating our fight, there was more done to do things differently between 43.1 and 43.2, than there was between 43 and 44.

LYNCH: And these are the numbers of the presidents?

GENERAL HAYDEN: Yes.

LYNCH: Just in case the listeners...

GENERAL HAYDEN: Sorry (laughs)...

LYNCH: That's okay.

GENERAL HAYDEN: Yeah. And so... so the first thing is the remarkable continuity between two incredibly different presidents which actually has disturbed some folks abroad who thought this was all about George Bush. Actually, it appears that a whole lot of it was all about America. Not Texas, not George Bush. So that's one.
That said, I got my complaints. And I do think what we're doing against ISIS in Iraq, in Syria, my line Laura has been: under-resourced and over-regulated. I would have used more firepower. I would have put more American forces. I would have pushed them more forward into the battle space — no one is calling for American manoeuvre brigades back there — but right now, Americans can't go below the brigade level even advising the Iraqi army.

And then, finally, to come back to a point we've discussed two or three times, I do think our tolerance for collateral damage is far too low. I do think, to successfully conduct a necessary and just war, we do have to accept the fact that from time to time, despite our best efforts, people we're not mad at might be hurt.

LYNCH: And that might be a difficult sell for the public, again. But I've got to ask you this, do you... you still have security clearance, do you not?

GENERAL HAYDEN: I do.

LYNCH: So, tell me, when you take a look at the world today, what do you think is the biggest national security threat facing the next president?

GENERAL HAYDEN: I... I...

LYNCH: You can tell me secrets. Go ahead.

GENERAL HAYDEN: Yeah, sure. I... I... look, I look at it three ways. And so, Laura, if you imagine I've got a graph between us. I've got an X axis and a Y axis, and the vertical axis is how bad is it, and the horizontal axis is how immediate is it... in the lower left-hand corner, I put "terrorism and cyber-attacks." In other words, they're very immediate. We have a TSA agent make a bad decision here, something bad could happen tonight.

LYNCH: You mean the airport screening...

GENERAL HAYDEN: Right, right. But as the president is correct in pointing out, that's not an existential threat to the United States. It's bad, but it doesn't threaten our existence.

Now you run the timeline on a little bit, Laura, three, four, five years, and here I bump into another problem: this is a group of states that I've taken to labelling "ambitious, brittle, and nuclear," And here I include the North Koreans, the Iranians, the Pakistanis, and maybe even the Russians. That's actually more serious. If that goes bad, it's a lot worse, but it's not going to happen overnight. We've got some time—three, four, or five years.

And then I go further out on my timeline to about the ten year point, and way up there, something that is really important is the long-term relationship of the United States and the People's Republic of China. And here I'm not talking about China

as a threat like I might view North Korea or terrorism, I'm just talking about the reality of Chinese emergence. If that is not handled well, Laura, the rest of this probably doesn't matter. You know, this is the whole historical tale of the emerging power and the status quo power. Far too many times in human history, the way we get from the old to the new equilibrium, to accommodate the emerging power, is a process that popularly goes by the name "global war." We don't want that one.

LYNCH: What about global warming?

GENERAL HAYDEN: Well, I... well you asked me my list. I've given you my list.

(Laughter)

LYNCH: Okay. General Hayden, I thank you very much for your time.

GENERAL HAYDEN: Okay Laura, thank you.

LYNCH: Bye-bye.

GENERAL HAYDEN: Bye.

LYNCH: Michael Hayden was the director of the National Security Agency from 1999 until 2005, and the director of the Central Intelligence Agency from 2006 until 2009. His new book is called: Playing to the Edge: American Intelligence in the Age of Terror, and he was in Washington, D.C.

Subject: Transcript: CSE senior officials provide a not-for-attribution technical briefing on the 2014-2015 CSE Commissioner's annual report - 2016-01-28, 11:00 ET

DATE/DATE:
January 28, 2016, 11:00 a.m. ET

LOCATION/ENDROIT:
National Press Theatre, Ottawa, ON

PRINCIPAL(S)/PRINCIPAUX:
Senior Official from the Communications Security Establishment

SUBJECT/SUJET:
A senior official from the Communications Security Establishment (CSE) provides a not-for-attribution technical briefing about the 2014-2015 CSE Commissioner's annual report.

CSE Official 1: Good day, everyone, Mesdames et Messieurs. My name is [name withheld] and I'm the [title withheld] for the Communications Security Establishment. Today a CSE departmental official will provide a background briefing on the CSE Commissioner's 2014-2015 annual report. Following the briefing, we'll be able to answer some questions, so until 11:15. With this in mind, the briefing will be done predominantly in English, but we're able to answer questions in both official languages.

Aujourd'hui, un représentant officiel de la CST présentera quelques éléments contextuels portant sur le Rapport annuel du commissaire de CST pour l'exercice 2014-2015.
As already indicated in the media advisory, this briefing is provided on background only, and is not for attribution.

We ask that all quotes be attributed to a CSE official. Cameras are not permitted, nor is there any recording for broadcast purposes.

Tel que indiqué dans l'avis aux médias, la présente séance d'information ne fournira que les renseignements généraux et ne sera pas offert à des fins d'attribution. Toutes citations devraient être attribuées à un représentant officiel de CST. Il est interdit d'utiliser des caméras ou de enregistrer afin de diffusion. Today's briefing will be provided by [name withheld], the [title withheld] at CSE. With that, I pass it (off microphone).

CSE Official 2: Thank you, [name withheld]. Bonjour. Good morning. So as [name withheld] pointed out, my name is [name withheld]. I am the [title withheld] for the Communications Security Establishment, and I'm here this morning to provide a background briefing about certain aspects of CSE's Commissioner's annual report for 2014-2015. I'll make an initial statement, and then I'll try to answer as many questions as possible, keeping in mind, as I'm sure you can appreciate, that there are some questions I will not be able to answer for operational reasons. As you all know, I am bound to secrecy on national security matters by the Security of Information Act. And as [name withheld] just pointed out, the briefing is not for attribution, and you can identify me as a senior CSE official.

So this morning the Minister of National Defence tabled the CSE Commissioner's annual report for 2014-2015. The CSE Commissioner is a fully independent review body with dedicated resources and expert staff authorized to review CSE's activities. He and his staff have full access to CSE's facilities, information holdings, and employees at all stages of their review activities.

Le commissaire du CST, l'honorable Jean-Pierre Plouffe, présente des rapports classifiés au ministre de la Défense nationale tout au long de l'année. Il lui remet ensuite un Rapport annuel non classifié qu'il dépose également à la Chambre des communes, comme il l'a fait ce matin.

The annual report for 2014-2015 summarizes nine classified reports, including: a review of metadata activities related to CSE's Foreign Signals Intelligence Program; a review of CSE's information technology security activities conducted under ministerial authorizations; a review of the Canadian Armed Forces' Cyber Support Detachments; a review of CSE's assistance to CSIS under Part C of CSE's mandate and Section 16 of the CSIS Act; and three annual reports – an annual review of disclosures of Canadian identity information; an annual review of CSE's Privacy Incidents File and Minor Procedural Errors Record; and finally, an annual review of Foreign Signals Intelligence Ministerial Authorizations. That particular review included two separate spot check reviews of intercepted private communications. So that brought the total number of reviews this year in the 2014-2015 annual report to nine.

Dans son Rapport annuel, le commissaire du CST a aussi formulé huit recommandations qui visent à favoriser le respect de la loi et à renforcer les mécanismes de protection de la vie privée. Le CST et le ministre ont tous deux accepté ces huit recommandations, et j'aimerais souligner que toutes les activités du CST ayant fait l'objet d'un examen en 2014-2015, à l'exception d'un examen portant sur les métadonnées, ont été déclarées conformes aux lois en vigueur.

So in terms of that one exception, you will have seen from the Minister's statement and the Commissioner's statement, both released this morning, that the Commissioner has completed his assessment of the metadata activities that raised legal questions. The Commissioner has made a determination and found CSE to be non-compliant with the law, in particular Sections 273-6-4 and 273-6-6 of the National Defence Act, and, as a result, Section 8 of the Privacy Act.

The Minister of National Defence has reviewed the Commissioner's annual report and the finding of non-compliance, and has accepted his recommendations on this matter. Namely the two recommendations from the report were: that CSE seek an updated ministerial directive that provides clear guidance related to the collection, use, and disclosure of metadata in a foreign signals intelligence context; and, that CSE use its existing centralized records system to record decisions and actions taken regarding new and updated collection systems, as well as decisions and actions taken regarding minimization of metadata. I'll get into definitions in a moment. It is therefore on this metadata review and the Commissioner's subsequent finding of non-compliance that I intend to focus the remainder of this briefing.

So what happened? As the Commissioner points out in his report, his office has been reviewing CSE's collection and use of metadata for quite some time. In fact, almost every review by the CSE Commissioner touches on CSE's metadata activities as they are core – a core component of both our Foreign Signals Intelligence and Cyber Defence programs. An early, more focused review on metadata occurred in 2006, and following that, subsequent reviews of metadata over the years have led to a number of recommendations that CSE has accepted and implemented. Planning by the Commissioner for a broader review of CSE's collection, use, and sharing of metadata is highlighted in his report and began around 2012, with a first report of that broader review focusing on CSE's use of metadata in a foreign signals intelligence context.

At the early stages of this review, CSE discovered on its own that certain types of metadata containing information with a Canadian privacy interest were not being minimized properly before being shared with CSE's Five Eyes partners in the United States, the United Kingdom, Australia, and New Zealand. After making this discovery, CSE proactively suspended the sharing of this metadata with its partners. The Chief of CSE informed the Commissioner as well as the Minister of National Defence about the matter. The Chief of CSE assured the Commissioner and the Minister that the suspension will remain in effect until systems are in place to effectively protect the privacy of Canadians related to that specific metadata.

So as I mentioned, I think it's important to pause here to explain a couple of very important terms. First of all, metadata. We have prepared a fact sheet that we've posted on our website today that describes what metadata is, why CSE collects it, how we use it, and how we share it. Metadata is critical to understanding the communications environments in which CSE operates. As you have heard many times, metadata is the context but not the content of a communication. Context, not content. We have defined it as information used to identify, describe, manage, or route a telecommunication or any part of a telecommunication, as well as the means by which it is transmitted.

Metadata plays a vital role in all of CSE's signals intelligence activities. CSE would not be able to conduct any signals intelligence operations without the context and lead information that metadata provides. Metadata helps us understand the networks we're targeting. Without understanding the environment in which we operate, we are blind. We use metadata to discover and track foreign targets. Without targets, we're essentially deaf. And we use it to understand anomalies in network behaviour and identify cyber threats. Without knowing these threats, we're at risk.

I'll also note that the use of metadata is pervasive. For example, telecommunications companies must use metadata to route communications from the originor (ph) to the recipient, or to manage high volumes of Internet activity. Anti-virus companies use metadata to study patterns of network activity, to reveal the efforts of hackers and other actors who want to breach network security defences, and the anti-virus companies then turn their analysis into measures that can improve

the security of the networks they defend. And indeed, advertising companies use metadata to understand the viewing patterns of Internet users and insert information of potential interest into your browsing activities.

So metadata is used for many purposes for a variety of reasons, but as far as CSE's metadata is concerned, we have a legal mandate to collect, use, and share it, albeit within certain limitations. As the Commissioner clearly states in his report, the National Defence Act mandates CSE to acquire and use information, including metadata, to understand the global information infrastructure, to provide intelligence on foreign entities located outside of Canada, or to protect computer networks and systems of importance to the Government of Canada. A ministerial directive on metadata provides additional guidance and places limits on CSE's metadata activities. In fact, both the National Defence Act and the ministerial directive also require CSE to have in place measures and – measures to protect the privacy of Canadians in conducting these activities.

So we have also on our website a fact sheet that highlights how CSE protects the privacy of Canadians. In our end-to-end activities, we apply various measures to help protect the privacy of Canadians. We have developed and – very detailed operational policies and procedures that establish specific measures to protect the privacy of Canadians and persons in Canada in the use and retention of intercepted communications. There is always a clear focus on the prohibition against directing any of our activities at Canadians or at anyone in Canada, highlighted in our policies and procedures. Our focus is also on networks most likely to have foreign targets. We avoid other networks. Only trained, tested operational and policy personnel have access to any of our data. We have time limits on the retention of data. We apply caveats on reports regarding the use of information. And of course all of CSE's activities, including collection and use of metadata, are reviewed by the CSE Commissioner.

As for the term minimization, it describes the process by which information that could be used to identify a Canadian is rendered unidentifiable before it is shared with allies.

So back to the issue. CSE discovered on its own that certain metadata was not being properly minimized prior to being shared with our Five Eyes partners due to technical deficiencies. What do we mean by technical deficiencies? It's important to underscore the complexity and the dynamic, changing nature of our operating environment. CSE must constantly adjust systems to reflect the ongoing evolution of technology. In this case, a system upgrade, which we do to address the dynamic technological environment I just described, led to the discovery of a deficiency in our automated systems responsible for some of our minimization activities related to some subsets of metadata. As a result, some metadata with a potential Canadian privacy interest was shared with our Five Eyes sig—partners.

So you're probably going to be asking the most important question, which is what was the impact of this unintended sharing with our partners. The unminimized metadata had a privacy interest, but it did not contain specific names or identities. Additional and indeed sometimes significant analysis would have been required before any unintentionally shared data could be associated with a specific Canadian. In light of this, and given the fact that the other measures in the suite of privacy protections I mentioned earlier remained effective, the privacy impact of the technical deficiency in this case was assessed as low. The protection of the privacy of Canadians is CSE's legally mandated responsibility, and it is one of our most important principles. It guides our mission to contribute to the security of our country and our citizens, and it is a principle all our employees appreciate and understand as being fundamental to a democratic society.

I do want to reiterate, as I prepare to answer your questions, that I'm limited in what I can say, in particular regarding information about CSE's signals intelligence activities. I have to be careful not to disclose national security related information that could point to our targets, our capabilities, our trade craft, our partnerships, etcetera. I'm about to be done. One last thing, and then I'll open it up to questions.

At a time when the threats from foreign signals – or rather, foreign states – terrorists, and cyber criminals are increasing, it is more important than ever to protect our national interests, our critical infrastructure, and our people. CSE has been at work protecting Canada and Canadians for over 70 years. We help to ensure the nation's prosperity, security, and stability. And we do this with a full understanding and appreciation of the necessity of privacy of Canadians and for Canadians. The principles of lawfulness and privacy are engrained in everything CSE does: in our systems, our processes, our policies, and, most importantly, our people. It is for that reason we advised the Commissioner's office of the technical deficiencies we discovered in our systems, and it's for that reason that I am here today. So thank you, and I'll now turn things over to [name withheld], who can moderate questions.

CSE Official 1: Thank you, [name withheld]. So we're going to open the floor to questions. We'll be – like I said, we'll be able to address your questions until 11:30. To give everyone a chance to participate, please limit yourself to one question and one follow-up. If you still have questions after 11:30, please, our media relations folks will be happy to take your calls. So we'll start just at the back there with the – just in front of you (off microphone).

Question: Could you give a sense of how you came to have this Canadian information? You mentioned that you're prohibited from directing your activities towards Canadians, so how is it that you found yourself with Canadian metadata in the first place?

CSE Official 2: So you're quite right, we are prohibited from targeting any of our activities at Canadians, or anyone in Canada for that matter. But as you can appreciate, we do have a legal mandate to collect information from the global information infrastructure for purposes of foreign signals intelligence in this case, or to defend systems of importance to the Government of Canada. As I think is apparent in the actual report, on our website in terms of how we describe our activities, we have collection systems. Those collection systems collect information from the global information infrastructure, and that global information infrastructure doesn't have a place that says here is somewhere where Canadians don't go. Obviously, when you're collecting metadata to try and understand what communications are transpiring in order to get ultimately to a foreign target, you need to be able to collect information. And so we collect metadata, and in that metadata it stands to reason that incidentally you're going to be collecting metadata related to Canadians.

Question: That sounds like (off microphone) interception, like mass interception.

CSE Official 2: I'm not going to get into the details of our capabilities, but certainly we have collection systems, and those collection systems vary.

Question: Can you give us a sense of how many people this may have affected in terms of how many individual Canadians may have had parts of their personal information or metadata shared with allies?

CSE Official 2: So the complexity of the systems – the complexity of our systems, the dynamic nature of the global information infrastructure means that everything is constantly changing. And we don't just have one system; we have several systems. So it becomes very difficult to answer your question specifically. We do regular upgrades. A regular upgrade of our system identified that certain fields of metadata were not being minimized. We assessed that those certain fields did have a Canadian privacy interest. But the metadata that was shared does not contain enough information on its own or contextual details to identify individuals associated with the metadata. So you can't – we never drilled down to does this point the finger at one particular Canadian. So as a result, there wasn't – there was no drilling down to have to identify that there was a Canadian.

The complexity of it makes it impossible to be able to tell you the actual volume. There are retention periods, there are various systems that do different things. And so as a result, I think the important thing is – is that the privacy impact was assessed at low, we identified that there was a problem with the minimization function, we stopped that sharing of that specific metadata until such time as we're able to fix it.

CSE Official 1: Okay, we'll move on. And if I can ask you to identify yourself as well, please.

Question: Daniel Thibeault, Radio-Canada. Est-ce que – sans rentrer dans le détail exactement des informations qui ont été transmises, sans – je comprends que c'était pas pour permettre l'identification d'un individu en particulier, mais c'était un lieu géographique, c'était un fournisseur de services internet? Qu'est-ce qui – qu'est-ce qui vous a accrochés? Qu'est-ce qui semblait être un problème de divulgation?

CSE Official 2: Je vais répondre en anglais. J'espère que les – vous avez une interprétation simultanée. Donc je suis plus confortable avec les termes en anglais, alors si vous me permettez, je vais répondre en anglais.

The – it's impossible to get in that detail metadata. Metadata, as I tried to describe, and as indeed we have a fact sheet that will walk you through it, there are all sorts of subfields of metadata. And the National Defence Act requires us to have measures in place to protect the privacy of Canadians. Indeed, the ministerial directive states you have to – it elaborates a little bit further on what kinds of measures we have to have in place, including the measure of minimizing.

So internally, we constantly have to look at metadata, because it's always evolving. We have to look at metadata and we have to say, as we're collecting it, we have to evaluate which fields we believe have a Canadian privacy interest. And if we believe that it – we do an assessment, and if we believe that it does, we then have to make sure that we have systems that will minimize that if we want to share that. So again, I don't have any specific for you in terms of in this particular case. There were examples of some subsets of metadata that we noticed had been altered when we did a systems upgrade, and our minimization system wasn't addressing it, and therefore we had to stop.

Question: Existe-il des garanties que cette information-là qui était transmise aux partenaires des Five Eyes n'a pas été ensuite transmis à d'autres agences à l'extérieur du groupe de Five Eyes?

CSE Official 2: In terms of guarantees, we have – obviously this has been a topic, I think, of debate for several years now in terms of the information sharing. We have a Five Eyes partnership. It's existed for over 70 years. We have policies, processes, procedures in place. We benefit from the information sharing that we have. I think I highlighted the fact that we have a whole series of privacy measures in place to make sure that, just because this one measure failed, that we don't have other measures in place to make sure that, if there was a potential impact on the privacy of any Canadian, that we would have other measures in place that would have caught it and made sure that we would have protected it.

So what I mean by that is, if we are to share it, only certain people that are cleared are actually available to access the information. Our allies, as are we, are bound by the fact that they cannot target Canadians. So they would not be going and looking into a pool of information that we would have shared to look for a specific Canadian. They would have had to do significant analytics. And even if they would have gotten to the end of those analytics and found a Canadian, and they – at the end of the day, in the cryptologic agency world, that turns out to a end product report. In the end product report, they would have had to have minimized the identity of the Canadian, if they even ever got to that point, and they would have had to have told us about it.

And in terms of guarantees, there are never any guarantees, but certainly in our relationship we constantly are talking to each other and we're flagging these things for each other. I also believe that, in his report, the Commissioner cites the fact that he did go down to one of our partners, for example the NSA, he met with the Inspector General that reviews NSA and got assurances that indeed they follow policies and procedures that meet our requirements.

CSE Official 1: Thank you. And just behind you, and I'll come to you right after.

Question: Philippe-Vincent Foisy de Cogeco. Juste comprendre en termes de temps combien de temps on a donné de l'information qui pouvait être avec des privacy interest? À quel moment vous l'avez remarqué et ça va être suspendu pendant combien de temps ce partage-là?

CSE Official 2: Encore, c'est très – j'ai pas envie de – c'est très compliqué. Le monde dans lequel on opère est très, très compliqué. On a – on a – il y a beaucoup de systèmes. Je sais, je sais.

I mean, just to give you an idea of, you know, metadata, what we're – what we do with metadata, we thwart tens of millions of cy—of malicious cyber attempts every day – every day, tens of millions. To give you an idea of how complex the various systems, so when one of our systems, when we're upgrading it and we discover that there's an issue – so in this particular case, we discovered it towards the end of 2013. Okay? To give you – to give you a sense of timing. It was the end of 2013. Notified the Commissioner, notified the Minister. The Commissioner was – actually, his office was undergoing a review, and so we started doing a bunch of analytics to unders—for them to understand and explain, etcetera.

In terms of trying to go back in time to say, well, how long has this error been occurred, I think that's where the recommendation came out from the Commissioner in terms of improving our records keeping practices. Because he wasn't satisfied that we were actually able to keep track. The fact of the matter is we are. We have some – we have very good records keeping practices. But in this particular case, because of the complexity, we needed to be able to discover exactly why the problem occurred, how it occurred, and how to make sure that if we continue and turn the sharing back on, that the privacy measures of minimization are in place.

How long is it going to be until we actually share information again? We haven't resumed sharing. We've told the Commissioner, we've told the Minister that – and we're keeping both apprised of our efforts in this particular complex matter, and we won't resume sharing until it's done. I can't give you a timeframe, unfortunately.

Question: Juste pour comprendre, donc d'abord vous pouvez pas garantir que l'info qui a été partagée à nos alliés n'a pas été repartagée par la suite? Et j'ai pas compris, la collecte de données d'info canadienne, comment vous faites pour avoir les infos sur les Canadiens?

CSE Official 2: Donc je vais répondre à votre première question, puis ensuite je pense que je veux avoir une clarification sur votre deuxième. Première question, question de garantie, oui, ils ne prennent pas notre information – there's a principle that anything that we share, the originator has control over that information. If they want to re-disseminate that information, they would have to check with us. So that's where I was getting in terms of my answer in terms of privacy measures in place. So it's not like we would give them something and then off they go with it and we never know what they do with it. We still collaborate. There's an exchange of information, there's an exchange of understanding in terms of analytics around that information, and ultimately when it leads to end product reporting, we share those, we see those, and there are other measures in place to protect the privacy of a Canadian. So that's the first question.

In terms of your second question --

Question: The first one. The first question, I mean. I didn't quite get simp—if you could simplify the way we --

CSE Official 2: We collect?

Question: -- collect Canadian information. It's too complicated, what you said before.

CSE Official 2: So simply put, I'm not going to – I can't get into the capabilities of how we do – how we do that. I mean --

Question: Legally.

CSE Official 2: Legally?

Question: (Off microphone)

CSE Official 2: The National Defence Act legally mandates us. We're allowed to collect foreign signals intelligence on the global information infrastructure, provided that we're doing so for intelligence – foreign intelligence purposes, so that they meet with the foreign intelligence priorities of the government.

Question: I'd like to ask you, if I may, about the extent to which your protestations that no specific names or identities were revealed is essentially meaningless. It's not a perfect analogy, but for the sake of argument, a policeman has your license plate, he doesn't know your identity but he can find it and prosecute you for running the light. The only reason you collect metadata is so that you can do that. If you give numbers, an IP address, which accessed this site so many times at what frequency on what date, whatever, you haven't revealed a specific name or identity. But the receiving agency in Five Eyes is perfectly capable of doing that. So the whole pretence that you didn't reveal identities is hollow, it seems to me, and I'd like you to comment on that.

Secondly, why do you think – they know what you're saying about oh, well, they have to let us know if they pursue that, if they drill down to the next level and establish the identity. Why the hell would they tell you if they know that it's going to create a problem for you? They're a cooperating agency. They're in the intelligence business. They're not going to create problems by revealing to you, you know, that they are doing what they should not be doing --

CSE Official 2: Right.

Question: -- in Canada, which they're not doing in Canada anyway.

CSE Official 2: Right.

Question: Okay?

CSE Official 2: Okay. So I'll answer your first question, then it'll blend into your second question. Sharing subsets of metadata, you're quite right, I mean, if I – a subset of metadata could be a phone number, could be an IP address, and that could be shared. It would go into a pool of metadata that, if you can imagine how much metadata there is, there needs to be a reason to go looking for that particular number. We have assurances from our Five Eyes partners, much like we do ourselves, that you don't go searching for a Cana—so you wouldn't do a search to say oh, well, let's just see if 613-such-and-such a number is actually in this pool of metadata so that I can do some analytics around that number. They're prohibited from doing that. They have training, they have policies and processes in place. And the limited amount of people that actually have access to this information in our Five Eyes partners cryptologic agencies are limited in what they actually can – they wouldn't be able to target Canadians, or Canadian metadata for that matter. They wouldn't be able to start with that.

However, as you point out, if they're doing analytics on another number and there's a link to a Canadian number, that's where further interest would come up. But then ultimately that would lead to an end product report that, at that point in time, would also minimize the name, the identity of the Canadian. And that report would be shared with us. And if they ever wanted to reveal the identity of that Canadian, they would have to check with us because ultimately it would have been based on information that we would have shared. And that is the policy and provision and process that we have set up, and there's no reason to believe that they're not following their policies and processes and procedures.

Question: So they're a bunch of Pollyannas. They always follow the rules, they never run a red light --

CSE Official 2: Indeed not.

Question: -- (crosstalk) international – biggest regime of international intelligence. It's hard to believe.

CSE Official 2: Well, like we did here, obviously mistakes occur, and that's why we have review bodies that find mistakes and are able – they're able to actually provide recommendations. And unfortunately, the complexity and the nature of global information today and the way that it works, unfortunately you're bound to fall into some of these mistakes. The – because it's ever-changing in its dynamic.

CSE Official 1: We're going to move on. There's a lot of people who have questions, and we've only got about five minutes left and we're gone – we have to go across the street. Go ahead.

Question: Yeah. So I'm interested in – here there's mention that the Commissioner's office, citing a CBC report – I don't mean to do PR for Terry here, but citing a CBC report, goes to CSE and says we're concerned about the details explained in this report, then explains the back-and-forth. The presentation is kind of explained in more thorough detail. The Commissioner concludes that there is no kind of prima facie breach there, that the actual process doesn't seem to be problematic. Can you kind of get into that a little bit and kind of talk to me about how some of these other disclosures from Edward Snowden don't meet the standard of breaching Canadians' privacy rights, especially in regard to the Spencer decision, which you cite in here, given the fact that, you know, CSE doesn't even have the right to kind of grab this information or analyse it from the get-go? How can – how can the Commissioner be satisfied there that this process isn't doing exactly that, when indeed these – the – these Edward Snowden reports say that you're grabbing millions' of Canadians' data, their metadata for sure? Is there a filter there? What is it? Can you give us even just the sketchiest, vaguest explanation of what that process is?

CSE Official 2: Okay. You danced around a few topics there. But at the end of the day, the National Defence Act, again, gives us our mandate to collect information for various purposes, I mean. Our work essentially helps protect lives of deployed Canadian Forces. It does find foreign targets, foreign threats. It does thwart cyber security attacks. So I don't think what you're saying is that there's not a need for us to be doing what it is we're doing.

How do we do it? It's obviously very complex. The legal landscape is changing. That is one of the challenges, certainly. I don't believe we cited Spencer, but certainly I think the Commissioner in his report cited Spencer as well as a couple of other recent legal decisions to state that, you know, communications 20 years ago were very static; now they're dynamic. And so how do you actually go about doing the type of work that we've been mandated to do in that very complex environment? Obviously, the collection of information and the collection of metadata is at issue. The Commissioner makes very clear that we have a mandate to do that.

In the specific example that you cited, our former Chief appeared before a Senate committee and I think spoke very specifically about the activities around that particular – I believe it was called the airport wi-fi deck, something along those lines. The activities there were, again, the Commissioner came back in and thoroughly – I mean, the Commissioner has staff that have engineering backgrounds, IT backgrounds, and indeed have the appropriate TS clearances to be able to come in and sit down and ask any question they would like and pore through exactly what our activities are. And what he's doing is he's making sure that all of those activities are not directed at Canadians, that we're not just willy-nilly collecting information about Canadians, but at the same time, that we actually are doing so for a foreign intelligence purpose to actually achieve some of the things that we're trying to achieve, and that we're mandated to achieve, in our Act.

Question: Okay. Just one follow-up. Can you give us some explanation of, over the course of the year, how things have shifted with the coming into force of both C-44 and C-51, which evidently changed things for you guys?

CSE Official 2: So we weren't specifically involved in either, other than possibly being part of the new SCIZZA (ph) set-up in terms of information sharing. But I don't think it would be appropriate for me to answer questions related to C-44 or C-51, given that we've only got a couple of more minutes. I'd like to focus on this. But I certainly welcome – if you'd submit any questions to us, we'll be happy to respond to those.

CSE Official 1: Over there in the corner. We're kind of coming up against time, so I'll try to get to you. If not, you can address – you can talk to our media relations (crosstalk).

Question: (Diaphonie) Radio-Canada. Je veux juste savoir combien d'autorisations ministérielles sont actives à l'heure actuelle et est-ce que la collecte de métadonnées fait l'objet d'une autorisation spécifique ou est-ce que c'est englobé dans des autorisations plus vastes? Alors combien d'autorisations ministérielles à l'heure actuelle?

CSE Official 2: Je pense que le commissaire dans son rapport mentionne qu'on en a quatre. Il y en a trois qui sont reliés à la collecte d'information au point de vue de – foreign signals intelligence. There's one related to our cyber defence activities. So we have four. The collection and use of metadata is governed by our National Defence Act. There is no specific ministerial authorization related to that because ministerial authorizations are for private communications. Metadata doesn't fall into the category of a private communication.

Question: (Inaudible, hors micro) la collecte de métadonnées, on n'a pas besoin d'avoir la signature du ministre.

CSE Official 2: Non, le —-

Question: Donc quand le ministre dit que c'est – okay.

CSE Official 2: En effet, pour faire la collecte de métadonnées, on a la loi. The National Defence Act gives us – as is clearly stated in the Commissioner's report.

CSE Official 1: Sorry, actually behind you. I (inaudible) this is going to be the last question. All other questions, you can give our office a call.

Question: So am I to understand that you really don't know how many Canadians were impacted, or you don't want to tell us how many Canadians were impacted? And when you say it's been defined as low, could you define low?

CSE Official 2: So the – low means that – can I define low? It's unlikely that there was an actual interest. In terms of whether we don't know, the actual metadata did not point to any one individual. The information on its own was not enough to be able to say that an individual's privacy was compromised. And so as a result, given that, and given the fact that it's just one of several privacy protection measures that failed, so just because that one failed doesn't mean that should – should that particular privacy interest of that particular metadata be of interest at a later point in the end-to-end signals intelligence process, that we would not have had other privacy protection measures in place to make sure that that particular person, if indeed it led to someone, was compromised.

CSE Official 1: Thank you. Thank you.

Question: And if so, why did it take so long --

Question: Yeah, exactly.

Question: -- for the public to find out?

CSE Official 2: So I'll answer that very quickly by saying it happened – we discovered it in 2013, notified the Commissioner of it. It's part of the Commissioner's report. I believe the Commissioner's report was tabled as – or was provided to the Minister of National Defence within the 90 days of the end of the fiscal year. This would have been last fiscal year. And you're finding out because obviously it was tabled today.

(Crosstalk)

Question: But did you stop sharing --

Question: But did your secret – the government kept it secret, then. The Conservative government kept it secret.

CSE Official 1: If you have any other questions, you can call the office. Thank you.

Question: Did you stop sharing then, or when the Minister told you so (inaudible) the report?

Question: Est-ce que ça a été caché? Je veux juste savoir est-ce que ça a été caché?

CSE Official 2: Non, ça a pas été caché.

Question: When was the sharing --

Question: It's rather important.

Question: -- when was the sharing stopped? Can you just say that?

CSE Official 2: At the beginning of 2014.

Subject: Transcript: Officials discuss "New Cyber Challenges in the 21st Century" - 2015-02-19 - 14h20 EST

DATE/DATE:
February 19, 2015 – 2:20 p.m.

LOCATION/ENDROIT:
Château Laurier, Ottawa, ON

PRINCIPAL(S)/PRINCIPAUX:
Scott Tod, Ontario Provincial Police Deputy Commissioner - Investigations and Organized Crime;
Admiral Mike Rogers, Director, National Security Agency;
Cheri McGuire, Symantec Corporation Vice President of Global Government Affairs and Cybersecurity Policy;
Dr. Oonagh Fitzgerald, CIGI Director of International Law;
General Richard Evraire

SUBJECT/SUJET:
Panel 2: "New Cyber Challenges in the 21st Century" is held on Day One "A Complex and Dangerous Security Environment" of the 2015 Ottawa Conference on Security and Defence, held by the Conference of Defence Associations and the CDA Institute.

General Evraire: Ladies and gentlemen, mesdames et messieurs, welcome back. Thank you again for returning from lunch so promptly. We're ready for our first panel of the afternoon and I'm very much looking forward to this one. This panel is on the new cyber challenges in the 21st century, les nouveaux défis cyber dans la 21e siècle.

I'm very pleased by the way that CIGI, our platinum sponsor, was of great assistance in putting together this panel and so we thank CIGI very much for that. The moderator for today is Dr. Oonagh Fitzgerald who is the Director of International Law and represents our platinum sponsor. Thank you very much for that Oonagh. We're very pleased that you're willing to help us guide through this very important panel which builds upon and really continues the very interesting and very important story that we've been building over the course of the morning and now into the afternoon.

I'm not going to give you the background on all of the panelists but first we do have Deputy Commissioner Scott Tod with us and Cheri McGuire who is from Global Government Affairs and Cybersecurity Policy. We also have our good friend Admiral Mike Rogers, who you heard from and very eloquently just before we came into the room. With that, Dr. Fitzgerald, I hand you the podium.

Dr. Oonagh Fitzgerald: Thank you very much General. Good afternoon everybody. It's a great pleasure to be here and CIGI is the Centre for International Governance and Innovation is really pleased to be involved in this event. I am delighted to have this wonderful panel to moderate. As you already will know, this will be a very interesting discussion.

Just a little bit of background on CIGI before I introduce my speakers in more detail. There is a real interest in cyber at CIGI right now. There is a global commission on internet governance that has been in existence for over a year now and it's a joint project with Chatham House (ph) which is the British think tank.

We've the Canadian think tank CIGI and Chatham House working on this wonderful commission on global governance with 29 international commissioners from various professional backgrounds and 35 member researchers in an advisory network.

The global commission is chaired by Swedish Prime Minister Carl Bildt and co-chaired by Fen Ove Hansen (ph) who many of you will know. The commission is conducting and supporting independent research on many internet related dimensions of global public policy. There will be a major report issued in 2016.

If you want to learn more about it please don't hesitate to go to the website. You can find it at www.ourinternet.org. At CIGI we're also very interested in innovation questions related to the internet, so any kind of innovation that has an impact on the internet. A discussion about cyber threats and cyber challenges is obviously very dear to our heart.

I would say in a somewhat dystopian manner that a few years ago analogies to George Orwell's 1984 would give shudders to citizens and politicians alike but the climate has changed somewhat in recent years. Today we may be post Orwellian in that we're dealing with both benefits and risks of internet connectedness and we're trying to find the perfect balance.

At the same time as the government is developing the powers and th capabilities to be all-0seeing and all-knowing, the private sector is not far behind. In some cases they've even be leading and is in a position to give us answers to questions we haven't even asked yet and offer services we don't even know we need. Many interesting questions come up about privacy and the individual in this environment.

How do we protect that and we certainly heard there are many policy issues to discuss today. The threats of interconnectedness continue to grow for governments, corporations and individuals and with the threats grows the need of national defence, law enforcement and the private security services to be ahead of the risks.

This discussion should help look at some of those issues. Our illustrious panel will talk about the evolving cyber threat picture and the roles and responsibilities of public and private actors in addressing these issues in ways that comport with our societal values, so no small task and they only have an hour to do it in. Admiral Rogers has been ably introduced to you so I won't spend more time introducing him.

We are absolutely delighted that he has joined us for this panel and I will introduce Cheri McGuire beside him. She is the vice president global government affairs and cyber security policy at Symantec Corporation. She has more than 20 years of government and industry experience and she leads Symantec's global public policy agenda and government engagement strategy that include cyber security, critical infrastructure protection and privacy.

She also served on the World Economic Forum global agenda council on cyber security and she is involved with an initiative that was described to us earlier by Admiral Rogers involving the National Cyber Security Alliance, the US IT Sector Coordinating Council. She's involved in one of the 16 critical sectors identified by the President and the Department of Homeland Security with the government on these issues and cyber security, privacy and cyber security.

She has a background at the Department of Homeland Security and with private sector corporations such as Lewis Allan (ph). Finally I'd like to introduce you to Deputy Commissioner Scott Tod who is Deputy Commissioner for investigations and organized crime Ontario Provincial Police. Yes, he's a police officer but he does have a military background so give him a chance.

What we're going to talk about today is we're going to talk about the criminal prosecution aspects, the private sector aspects and the national security aspects of cyber, a little bit more about Deputy Commissioner Tod. He oversees specialized law enforcement services and criminal investigations including organized crime, intelligence, behavioural sciences, anti-terrorism, electronic crime and drug enforcement for the large deployed police service in Ontario.

He's a member of the Ontario Association of Chiefs of Police, the Canadian Association of Chiefs of Police, the International Association of Chiefs of Police and the International Association of Financial Crime Investigators. That goes to that issue of partnership that's so important. Deputy Commissioner Tod is a graduate of the leadership and counter-terrorism program and received his diploma from the Canadian Forces College, Canadian Security Studies program.

He's a former officer of the Canadian Forces, Maritime Command. In 2008 Deputy Commissioner Tod attended the Governor General's Canadian leadership conference. These are our speakers. We decided for the purpose of this presentation we would first start off with comments by Cheri and Scott regarding the remarks that we heard from Admiral Rogers. Admiral Rogers gave a wonderful overview to us of the challenges that he sees sitting at the head of US Cyber Command from a national security perspective.

He touched on a number of very important issues around national security, national defence, international cooperation, even diplomacy. Some of the other issues that came out through questions are things like fragmentation, democratic oversight, privacy. We really set up the panel to have a broader discussion. What we'd like to know is what is the perspective from law enforcement and from the private sector about the challenges in cyber at this point in time.

Scott Tod: I'd like to speak about the three areas of strategic, operational and tactical challenges that we have today from a law enforcement perspective. I'll couch my comments in the fact that it's based on my experience in law enforcement and that the relationships that we share with our partners both in security and within military.

On the strategic level one of the concerns that I have within the aspect of cyber and dealing with cybercrime and I'll separate strategy, cyber strategy for cybercrime. I'll try to focus my comments towards cybercrime is in regards to the whole discussion that's occurring in the police leadership area of policing our communities in Canada.

In Ontario there's much discussion going on currently and it's happening across Canada too at the senior levels of law enforcement in regards to cost of policing, the sustainability and costs of policing. Similar comments I heard certainly on a much grander level with regards to the military commands in Canada and the United States but certainly the cost of policing and that we're trying to bend the cost curve of policing.

For comparison our budget is about 82% driven by HR, the cost of our members to come to work. 18% is operational and capital. That doesn't leave a lot of room in regards to responding strategically to the speed and the size of cybercrime. At a strategic level that discussion right now is focused on mobilization and engagement strategies in our communities. These are isolated strategies that we hope collectively will make Canada a safer place to live.

They focused around the criminal factors of homelessness, poverty, addictions and mental health, not cyber-crime and terrorism. We're hoping that by identifying those criminal factors that we can make our communities and its' generally done in isolation that we can make them safer by working with community partners. I think the success for us in the police community is in law enforcement is to make that hub environment a national discussion, a convergence of all the people that have some space within the cyber sphere.

That's the strategic level. There's a need for a national discussion by law enforcement and our security partners and also government. The second one, the operational level, is to define the jurisdictional boundaries in which we work as law enforcement. Where does each law enforcement agency respond? Our legislation allows for police services to be created in Canada. The Police Services Act of Ontario was rewritten in 1990 but it's along the jurisdictional boundaries which regions, cities, municipalities and provinces are located.

We heard this morning that the jurisdiction part of cybercrime is not a good way to attack cybercrime. The aspect is the operational level. We need to identify leadership within the space of cybercrime and we need to identify how we attack it whether it's through a regional effort or through national programs.

I have seen national programs that are successful, the national sexual exploitation centre run by the RCMP in Ottawa is a typical example of how a national approach run by the RCMP in Ottawa is a typical example of how a national approach working together with municipal and regional law enforcement providing leadership and direction provides a great success with regards to attacking people who are trafficking in child sexual exploitation.

That's one example of operational that can be successful. I think at the operational level it's the idea is better collaboration amongst leadership and the operations that support the investigations or the intelligence behind cybercrime. Purely at the tactical level, one of the things I talk about is data size. Data size today is extremely significant to us. Unlike some of the security partners that we work with, we're required to store large volumes of data.

I hope to give you an example of that during an example of an investigation I have but storing that data for long periods of time and accumulating it and retaining it perhaps for up to 35 years in regards to archival innovation is really the issue we're dealing with and the forensic ability to look into that duty and use it for the purpose of criminal prosecutions.

The criminal space that we operate in is challenged by data size. The next one is changing technologies, the rapid pace of changing technologies, keeping up with the most recent cellular devices, the ability to archive, the ability to encrypt files and the ability to do all that from a law enforcement perspective and investigation to identify criminals is really challenging.

The last one is the jurisdiction outside of where we operate either municipally, provincially or federally but outside the country of Canada and working to find criminals that are exploiting Canadians at home and abroad but through a law enforcement effort and working with our international partners. We rely on the RCMP and at times the military to work in other countries, to assist us in providing information in regards to cybercrime. I think those are the significant challenges that I see for law enforcement today.

Cheri McGuire: From a private sector standpoint, thank you Admiral Rogers for teeing up so many juicy issues for us to touch on, on the panel today. We are clearly at the nexus in the private sector between government actions and the criminal actions. Sometimes we get caught in the middle.

This is one of the reasons that information sharing is so important. It's been difficult to talk about information sharing in the last two years in the post Snowden environment because the issues have become so inflated between must have privacy over all else or we must have security over all else.

Our position has long been that we need to find the right balance between the two because we cannot have privacy without security in today's data driven world. This notion of information sharing is important. It is a tool in the toolkit to go after the bad guys, to prevent attacks and to protect ourselves more effectively but it is not the sole silver bullet that's going to change the world and fix the issue of cybersecurity today.

What I would say is on the information sharing front many companies including Symantec have been doing this for many years, sharing with our law enforcement partners, sharing with our private sector partners, sharing with national certs (ph) and governments around the world.

What we need to do now is to accelerate that so more organizations can take advantage of the good information that will help protect themselves more effectively in the future. Last Friday at Stanford University in California President Obama was there. He signed a new executive order on information sharing to help promote the development of information sharing and analysis organizations.

There are many that exist today but again this is to try to accelerate and incentivize the development of more of these organizations. They are not just solely US based. Many of them have an international component where they have international based companies that are also members.

This is an area that's very much at the forefront of the cybersecurity discussion today. How do we share the information, minimize the PII and ensure that our customer information is protected, that our proprietary information is protected if we do share and also what are the legal protections whether it be liability protection or other types of legal protection that companies will be able to gain if they do share information.

All of these are very complex policy issues but I do think a big step was taken last week in California by the President to try to move forward. In the US in particular we have some things that the President cannot do within his authority. The Congress has to take action. There's complementary legislation being proposed on information sharing and how to promote that while also providing the safeguards around privacy, one of the many issues that we're faced with today.

Admiral Rogers: There is no silver bullet here. There is no single technology that will fix this problem. There is no single legal structure that will fix this problem. There is no single organization that has the intellectual answer to all of this. I'm always trying to remind people, this will be a series of steps that we're going to take that when taken together can produce a greater whole.

The idea that one single thing is going to solve the cyber challenges we face I find that is a non-starter. The second point is most people tend to default to technology as the biggest challenge when it comes to cybercrime. My experience is quite different. It isn't the technology. It's the cultural issues about how do we move beyond the technicalities to get to a place where we're comfortable.

Lots of people have pretty limited technical knowledge and some have very high. We've got to do this in a way that technology isn't a bar that stops us from being able to address it. We've got to do this in a way that our broad society can understand and can deal with. It's not just about technology. I say that leading two organizations the prism they tend to look at the world through is we're a technically focused organization applying technology to overcome technical challenges. Guys, it is much more than this technology.

Dr. Oonagh Fitzgerald: You've already raised an issue, this question of policy that is extremely complex even though we have a very illustrious panel here. It is a societal problem. It involves the President of the United States. It involves government in Canada, big issues for society to work through.

Maybe we can get to a more operational question. Could you talk a little bit about the dividing line between cybercrime and cyber defence and the convergence between criminal law enforcement and cyber defence.

Scott Tod: I think the issues, I mentioned in my opening comments, I like to distinguish between cybercrime and cyber security. I see it as two hills. On one side the cyber security part as incorporating government, private industry réponse. On the other side I see cybercrime as being a government, law enforcement response. Through the middle there runs that valley in regards to that's where we collaborate together. I hope some days it converges rather than collision.

That is a space where we have to become better at working in and understanding our clarity of responsibilities on both sides. Cybercrime is slowly morphing into a cyber-security discussion. The problem is at the operational tactical level that causes confusion among the employees, our workers, our investigators, our online presence. It causes an issue with regards to what is their role and mandate and mission.

I speak to that whole aspect of the OPP will do whatever is lawful, morally and ethically correct to do in pursuit of its goals. Often people are colliding in regards to what is my role as an investigator, as an analyst, as an online presence for example. We have to do some training and development. The OPP is currently undergoing a cybercrime review. We are looking at our organization across all the silos, where is the footprint for each part of our organization within a cybercrime review in regards to providing the best technology, training, and providing assets in order for us to be successful at combating cybercrime.

It also leads into a bigger discussion of working with the premier organization in law enforcement in Canada, the RCMP, looking at their recently released strategic direction in regards to cybercrime. I think understanding the clarity of role is very important and developing that forensic capacity. The size and speed of data is really concerning to us. At a recent conference I talked about non-traditional forms of data storage, devices we can put in our home to run our furnaces, the ability to store data within the car and the ability of monitoring blue tooth connections, radio stations that you listen to all through the in car computer system.
I think the whole aspect around what are we seized with and why are we looking at it. The last part is how do we analyze it, keeping up with all the devices on the market today and the ability for storage in many places is really challenging a large police service in order to have the facilities to strip data out of those devices.

The next one is fostering partnerships. I talked about those two hills and that valley. I think what it is, is we need to move the hills together, whether it's an earthquake that happens but they need to collide more together in regards to convergence of our roles and responsibilities. I'm looking at is there a role for regulation? Outside of law enforcement is there a better form of regulation that can occur in regards to helping with cybercrime and cybersecurity.

Admiral Rogers: For us on the US side it generally starts with an initial determination, is the activity we're responding to an offensive act or an act of war or is it a criminal issue. If you take a look at Sony as a good example, the first question we were trying to come to grips with is how would we define what we're dealing with.

If you do it as an act of war, traditionally we'd turn to the Department of Defence and say in your role of defending the nation we would expect you to be the lead. In this case for Sony we came to the conclusion it was a criminal act and the Federal Bureau of Investigation was designated as the lead organization.

We treated it as a law enforcement issue because particularly in my NSA hat we have strong partnerships across the federal government. It is becoming quite routine now for some of the largest events that we're dealing with as a nation where the FBI will take the lead as a criminal law enforcement issue but then will come to us and say I need to harness some of the capabilities you have. Can you help us on the data analytics side?

Can you help us in terms of your ability to write counter measures that defeat the software? We've been able to create some great partnerships. We do a lot of work with the Federal Bureau of Investigation. It's a sad comment about the amount of activity collectively we're dealing with that this interaction is very routine. We have standing protocols in place now. It doesn't have to go to a director level. We've got enough of a legal framework where our teams can do what they need to do. That's worked out very, very well.

Cheri McGuire: Maybe I can talk briefly about the work we're doing in the private sector with law enforcement. As you can imagine, the largest security firm in the world but also the largest operator of the largest commercial cyber threat intelligence network, we have a lot of very rich data that we see around the world.

From that we've been able to forge some very strong and productive partnerships with the FBI, with Europol, the European cybercrime centre, and other law enforcement agencies to really go after some of the cybercriminal element that we are seeing today. Some of the biggest and well known cases have been some major botnet takedowns over the last several years. One of the most successful of those was last June with the takedown of the zero access crypto locker bot networks.

That was developed and done in partnership by more than 30 international organizations – law enforcement, academia, private sector, all working together to not only identify the command and control servers but then to sync them and take the botnet off line, very, very successful partnership, first time it had been done with that many partners and beyond simply bilateral engagement between for example the FBI and several private sector entities.

These are the kinds of things we are doing today that are very successful in helping reduce the level of cybercrime, the attacks that are happening across the internet. We need to do more of that. We need to be more aggressive. I'm sure Scott would agree, Admiral Rogers. If we do not have strong deterrents today the cybercriminals and the elements out there that are taking advantage of the internet and frankly it's big business and it's good business for them.

If we are not creating deterrents between private sector, law enforcement and governments in order to deter them as well as putting into place the legal frameworks to prosecute them, extradite them across international borders because cybersecurity is without borders. Today we have a lot of challenges in our ability to do that quickly. The multilateral process today is very slow. It's very cumbersome.

It needs to be modernized to deal with the challenges in real time that we face today. Those are some of the things we need to do in addition to making sure we have strong penalties. I was happy to see a significant hacker yesterday, there was an agreement with the US Justice Department, criminal prosecution. He'll be going away for 7 to 10 years. It's a very significant signal but it's a small step. We need to broaden that and make those penalties a lot stronger and more uniform around the world.

Dr. Oonagh Fitzgerald: Let's delve even further into the operational side. I believe that Scott has a scenario, a typical law enforcement case study that our panel can comment on. He's going to outline that law enforcement case study and then we'll get people's views about how this works. How do you address the challenge?

Scott Tod: As I talked about the size of data nand the speed of data it leads to the point of how big does data get. We talk about Cloud computing environments but eventually the Cloud has a data drop somewhere. It generally goes into a web hosting or file server.

An investigation that's ongoing right now and I'll be vague on the who and the where but I'll talk about the what. It involves a police service coming to the assistance of the Ontario Provincial Police, our child sexual exploitation unit and assisting with locating information for child sexual exploitation.

Traditionally law enforcement is funded for what's called peer to peer contact where it's an officer pretending to be a young child behind a computer, interacting with the person on the other side who is either asking for or sharing child sexual exploitation material. It's peer to peer contact. What we find during these peer to peer investigations that there are thousands of other IP addresses attached to each computer.

In this particular investigation when we commenced the investigation assisting the police service we ended up in a file service and it was owned by a web hosting company, two different companies. We're involved in the acquisition of 1,250 terabytes of information. That's not a lot of data for many of you but for a police service it's a lot of data.

For Admiral Rogers I understand the Library of Congress has about 525 terabytes of information. That was just relayed to me by Blackberry earlier on as an example of what 1,250 could compare to. The idea of 1,250 terabytes we have to secure the storage and then mirror that image. We're up to 2,500 terabytes of information. In order to do that we need further analysis.

We have a large amount of information that requires storage for retention periods too. We ended up having to search for what device is out there and we turned to the military. The military is well experienced in battle campaigns from having something called a portable optimization device, a data server itself, a warehouse of information that can provide communication and storage.

We purchased the pod for a large amount of money and the data now resides on that but within the data itself after looking at 1% of the data we literally had hundreds of people who we suspected of trading in child pornography. It required a further look in regards to how does this work rather than the peer to peer, one to one, we now want to look at corporations. How do corporations profit and benefit from the trading of child sexual exploitation?

That's what we're looking at now in regards to that but to do that you require vast amounts of storage space and you require analysis tools that you can purchase but you also require the technical skill of individuals. Although we hired a young, well trained, competent brilliant people we have at this location relied on bringing back a retired member, one of the original forensic crime individuals we had in the organization who understood the hunting concept in regards to data and not just the searching and analytical part.

Hunting through data is completely different. Now we're at the part of the investigation where we're working with over 100 countries around the world. We're looking at over 1.4 petabytes of information and try to sort through it and identify

suspects around the world. 1.5 million RAR files. RAR is a way of compressing and securing a file of which many are password protected.

We have user accounts, 2,200 user accounts in the United States, 843 in Germany, 534 in Japan, 457 in Russia, 394 in Canada, 380 in the UK, 374 in France for a total of over 7,500 IP addresses that have been trading in what we believe is child sexual exploitation.

A lot of this is uncorroborated at this time. This is an early indication of how big this file is but it speaks to that whole aspect of big data and how do you manage big data as a law enforcement agency not traditionally funded and not traditionally mandated through jurisdiction and legislation to do this. We're lucky enough as an organization. We have by military standards a rather small organization, 9,500 members and a billion dollar budget but the ability to do investigations like this challenges both our human resources, technical capacity and also our budget.

This is a long term investigation. This investigation won't be over in one year, six months. It won't be over within the mandate of the government. It's a long term investigation. Our goal and the importance of this investigation is to look at the money behind the organization. Who makes decisions so profits can be made in a criminal manner? Where do they reside? Who are they?

That leads to jurisdictions in almost 100 countries. It really has been challenging to us. The other part that challenges us is the ability to password crack. Although our security services have great tools we have to create a tool ourselves. The speed of our cracks now is 500,000 cracks per second. I don't know if that's good or bad. We're finding that's the best we can do with the resources we have with the technology today.

I don't think our technology is any more significantly different than what our security partners use. We have over 2,700 high level domains and more than 50,000 lower level domains that we're looking at around the world. That's thousands of end users that are receiving child sexual exploitation material.

I kept this one very close in regards to child sexual exploitation material but I also believe the same is going on in the financial side, there's also servers and environments in which people are profiting criminally by sharing information such as data briefs, personal identification and other things. This is just one investigation that we were asked to assist on which we have taken a different tack with the operational response.

Rather than looking one to one we're now looking at the thousands if not tens of thousands of people but more importantly the corporate mindset. Some of the money figures that we believe right now is $18 million over a three month period that's spent across the file servers. How much of it is legitimate? We're not sure but the money is significant. The efforts are significant. We think it's a large investigation that will take a large amount of time to complete.

Dr. Oonagh Fitzgerald: Would you like to comment on what that kind of a criminal investigation would mean for your organization? How you might be participating and helping?

Cheri McGuire: Through various partnerships we have we are able to look in our big data platform for the kinds of things that that investigation might be looking at. The challenge we have though is we have to make very clear distinction between actively going into our networks and looking for criminal activity because we have to have a level of trust with our customer base.

That doesn't absolve us but it does mean that when we start to see things that look like criminal activity, then we do have a responsibility to report them and to participate in these kinds of investigations. That's where much of the work we do today and the botnet eradication and other kinds of cybercrime, the work we do today, much of that focus is through our deep analytics and the research of our big data platform.

We do see so much threat intelligence on a real time daily hourly by the second basis. Much of what we see is automated. Much of what gets taken care of is automated. When things don't appear to be normal, that's what triggers our deeper analytics. We have over 500 research scientists that just do deep analytics on different types of malware and those kinds of threats.

There's opportunities to work together with law enforcement clearly but there's also a component of that which is directly related to the protection we offer to our customers be they consumers, corporations, academia and governments. They do span all of those.

Dr. Oonagh Fitzgerald: Scott has really pointed out the mouse and the elephant scenario of the specialist in security versus the police. The police used to be walking the beat on the street. Now they have to deal with these huge

challenges. Are you seeing more and more that national security, NSA are being brought into criminal investigations because they're so difficult for the police.

Admiral Mike Rogers: I think the trend we've observed on the US side I would say over the course of the last six months is that less traditional criminal activity in terms of child exploitation for example, although occasionally we'll get queries about analytic capabilities to help us from a capacity standpoint.

The more common scenario we're finding these days is major penetrations into US corporate structures, theft of large amounts of PII data, intellectual property theft, trying to work with law enforcement and identify what was the initial penetration, how did they get in.

What exactly did they take? Did they continue to have a presence on the network right now? Increasingly we find ourselves asked to provide capacity to try to help. It's been a big change for us in the last six months which is not an insignificant challenge from a resource perspective as I'm trying to walk a balance between NSA's primary national security missions and our mission of supporting the rest of our government partners.

Dr. Oonagh Fitzgerald: This raises the question of what are the different roles that government, the police and business and citizens can play in addressing the challenges of cybercrime, cyber-defence.

Cheri McGuire: There's a really bad echo up here. It's hard to hear you. If you could say it again, I'm sorry.

Dr. Oonagh Fitzgerald: My question is about the different roles of government, the police, the business community and citizens in addressing these challenges of cybercrime and cybersecurity.

Cheri McGuire: A very common thing, we all have a shared responsibility in dealing with cybersecurity, cybercrime. Everyone has a role to play in this but that's pretty straightforward, - companies, governments, individuals. However, beyond that we all need to work on developing and building a culture of cybersecurity within our own daily lives, within our organizations that we work for.

We see great disparity in different organizations depending on what roles and functions within companies or government agencies. What I mean by that is the level of awareness can be quite broad. I'll even say that even inside of Symantec which is a security company we have different levels of awareness as well because folks who have traditionally focused on finance and the running of the business functions may not have the same perspective that our technical security engineers would.

That doesn't mean they don't have a role to play. Everyone has a role to play. We have to make sure that level of awareness is there. I always say we leave our house every morning and we lock our door to protect our valuables. We need to start having the same mindset about how we treat our data. We need to do that across all devices and all platforms.

We've done some interesting surveys on mobile device usage and the level of awareness around security that is out there. About 70% of individuals today know about using strong passwords, making sure they have security software, updating their systems, basic cyber hygiene.

If you ask those same individuals about whether or not they should be doing those same things on their mobile devices, 30% are aware they should be doing that. Everyone uses a mobile device today. They're always connected, always online. You think about the additional vulnerability, the additional ways that allows attackers to try to break into your system to steal your data, to create many of these data breaches we're hearing about almost on a daily basis. Again, it's incumbent that we really do build that culture of cybersecurity and that it starts early in the schools and continues on.

Admiral Rogers: I would echo that thought. I try to remind, in the Department of Defence I try to remind our workforce cyber is the one mission set in which if we had given you access to a keyboard you are now both a potential opportunity of advantage but perhaps more significantly you are now a potential point of vulnerability.

We have given everyone access to a keyboard. As you heard depending on what source you want to use, my experience is 70%, 80% of most of the challenges I deal with inherently started with bad organizational choices. What led you to do that? Why would you click on that? Why would you be opening material from users you have no relationship with, you don't recognize?

Guys, this is not going to work. Everybody is a potential point of vulnerability. Your network is only as strong as the weakest link. This isn't about technology. It's about culture. The biggest challenge is changing culture. It's not the

technical piece. We can make technology as easy as we can but if we don't intellectualize it up here about how this impacts me and what I have to do as an individual to engage in cyber hygiene and sound practices, the greatest technology in the world is defeated like that.

It's not either/or. Just more broadly I think increasingly the key to success in the cyber domain is how to recreate partnerships, whether it be law enforcement, whether it be expertise, whether it be the role of the government and its capability. How do we bring this all together? How do we do it in an integrated way in a framework that we're all comfortable with. That is not an insignificant challenge in the world we're living in right now.

It's particularly challenging in representational democracies like the United States and Canada. We're always concerned about what's a private function and what's a public function, what are the implications for us as citizens, are we comfortable with that. I think the reality is we have to blur those lines to some extent but we've got to do it in a very public and direct way so people understand what we're doing and why and also what we are not doing. Half the things I see quite frankly are credited to one of the organizations I run, I scratch my head and go I'm not even sure that's technically possible but I still read about it.

Scott Tod: One of the issues in regards to governance and this would be an internal issue is regards to procurement and supply chain management and getting the best tools we have to the market as quickly as possible and regulation within government and understanding procurement and supply chains. Really at times there's a barrier to the speed at which cybercrime moves. The ability to acquisition the right device, the right course of training, the right piece of information we need from another company, an independent company.

The whole aspect in regards to procurement is one thing that needs to be looked at in a different light at times by government. The other one is in regards to the whole aspect of the unknown jurisdictional issues. A video of a crime that occurs in Canada is uploaded in Japan. Accessing that video and getting the video, getting it back to Canada to be used in a prosecution. How is it stored? How did it arrive in Japan? How as it stored in Japan? How was it retrieved from Japan? There's always the whole aspect of jurisdiction is how many people do we need to involve in that process, the mutual legal assistance process we have to involve lawfully in regards to repatriating evidence back into Canada.

On the case scenario I talked about one of the things we're doing is providing information sharing agreements with the Department of Homeland Security to have direct access to data that belongs to American citizens. That effort working with prosecution was a large collaboration amongst many partners to get there. There's something providing another foreign entity, a security partner for sure but a foreign entity direct access into data with a specific information agreement for American citizens or people who targeted American citizens.

I think that's something challenging the legislation we have on the books in regards to the Criminal Code and others that we're lawfully required to abide by. I think that aspect of renewing and looking at the jurisdictional boundaries and defining who is responsible for cybercrime investigations in Canada. If it's everyone then recognize it. If it's one individual organization such as the RCMP or a combination of large major law enforcement organizations recognize it. We have a great cyber strategy. We don't have a great cyber plan in regards to how do we attack cybercrime in Canada.

Dr. Oonagh Fitzgerald: We've heard a lot about the challenges of speed in procurement, speed in getting extradition to work. We've heard about the legal frameworks, dealing with the digital world. There's gaps. You've all identified the need for this collaboration and it's a high risk collaboration as you've all pointed out. You all have separate spheres of responsibility. You don't want to intermix too much unless you've got a clear framework.

Tell me about some of the governance challenges you're dealing with given that you are dealing with these outdated laws that are limited by jurisdiction as the Deputy Commissioner was saying, limited to Ontario or Canada or the US. How do you deal with these government challenges?

Scott Tod: I think one thing forums such as this are very important. I think the aspect of touching a warm hand and having a discussion, this is a great start to recognizing the leadership that's required on the issues of cybersecurity and cybercrime. The last six months have developed with incredible speed in regards to terrorism within Canada and cybercrime, cybersecurity in Canada.

The speed of discussion has never happened this quickly in my 33 years than it has in the last six months. What I'm concerned about is who steps forward in the leadership role to lead that discussion and continue the discussion with some long term solutions that need to happen. I think that's very important.

There's a lot of people that want to jump on the boat right now. It's leaving. It's moving fast and they want to be on the boat. They want to drive the board. What we really need is the leadership to step forward that can continue this discussion and have the effect and results we need to have to be successful.

Cheri McGuire: I can talk a little about some of the governance challenges of the private public partnership in the United States. There are 16 critical sectors that you've heard about. The structure by which those industry councils and government councils can come together and meet on a regular legal basis had some legal barriers they had to overcome when the initial idea was hatched back in 2004/2005.

We have a law in the United States called the federal advisory committee act and that means that if industry meets a group larger than 8 or 9 in industry meets more than one time on a regular basis with a government entity it must be open to the public and must be transparent. You can imagine when we started talking about critical infrastructure protection, how are we going to share information, how are we going to talk about these hard issues around physical security and cybersecurity in a safe way so companies didn't feel like they potentially would be exposing vulnerability in a public environment.

That had to be constructed in a way that it provided trust as well as the legal foundation by which they could legally meet regularly. That took a lot of time both from the government and industry side to get that worked out. Once it was worked around 2006 those councils began to be able to meet on a regular basis. What we have today is a pretty good structure by which we can communicate, by which we can have the hard conversations but the level of maturation is at different stages depending on which sector you look at.

Financial services is very mature, telecommunications is very mature but at the same time some of the others are taking a little longer .They didn't have as much focus on the cybersecurity area so there was a lot of time that needed to be taken to build the awareness. The foundation of all of this happening has to be trust. It has to be transparency. It has to be a true partnership. It doesn't work very well if you come into a meeting and your industry and your government says industry you shall do X,Y and Z.

This truly is supposed to be collaborative and informative on how we can best protect together the critical infrastructure. Those are some of the foundational elements that I've seen when I was in the government and outside the government sitting on the partnership on both sides.

Admiral Rogers: I think on the US side we have a broad consensus on different roles, who's going to do what. We've got a broad structure for how we're going to implement it. I wouldn't have said that two years ago but I feel much better about it now. The biggest challenge is we've got to move beyond a discussion about who's going to do what to how are we going to do this.

That to me is the next immediate challenge for us. We've got to get down to the execution level about how are we going to do this, using what means, what should the private sector expect from the government. What do I need from the private sector in order to maximize the capabilities we bring to this. What are the paths we're going to use to communicate? What are the data elements we need to share? We can just inundate each other with data.

That doesn't generate value and outcomes. Roll up our sleeves and getting into the how, as I talk to my counterparts to say this is what I really think we need to do. We need to make this easier for the private sector. If you're on the outside looking in at the federal government I still think we're very complicated and it's very difficult at times to understand who should I go see. How is this going to work? We've got to get beyond the who and the what into the how. That's a big challenge for us.

Dr. Oonagh Fitzgerald: In terms of new technology we are hearing about the role of artificial intelligence, unbreakable encryption, new challenges heading towards us quickly. Can you tell me, this is the last question, what do you see as the big challenges looking into the future and how do you think your community, your organizations can contribute to addressing these new challenges. The hope here is we can end with a positive message.

Admiral Rogers: The positive message I can argue is I think the one thing we all have in common is we've got highly motivated men and women who are willing to work hard and bring a lot of expertise and a lot of focus and conviction to the challenge. That's the best thing we've got going for us. It's not our technology. It's our people. It's the power of their intellect and the power of their heart that drives this.

My experience in the military is cyber is no different than any other mission. It's the men and women that really make the difference. That's the real positive. In terms of the challenges, I worry increasingly nation states turning to other groups

as a vehicle to disassociate themselves from attribution, as a way to attempt to obscure their activities. I worry about the challenges in the mobile device arena. As you heard that's where the growth is.

Just look at the market. Look at what's being sold. Look at how much it's integrated in our day to day lives whether that be as individuals or at work, the handheld digital recorder. The encryption piece although again I remind people if it was created by man it can be defeated by man. If we think there's some technology out there that guarantees history would suggest to me I don't believe it.

I don't think there's a single technology that's going to guarantee it. Those are probably the three biggest. I think the challenge in some ways at a macro level on the defensive side as a final thought, most defensive strategies both in the public sector and the private sector are generally built around recognition of activity based on prior knowledge.

We've seen this before so we know what it's like. That is not a long term model for success because it assumes a high level of knowledge and insight. My view is that's not a great defensive strategy. We've got to come up with defensive strategies that are not predicated on advance knowledge and recognition of the activity we're looking at.

Cheri McGuire: I think the biggest challenge I would say IOT. This great innovation we're seeing, the internet of things, they're amazing. Things we're going to be able to do today that we couldn't do even three years ago with technology and where we're going over the next several years is really truly amazing, the pace of innovation.

At the same time, most of that innovation is happening without an eye towards security and so when you think about the proliferation of devices that will open up traditional vectors for vulnerability with IOT, that's a pretty scary place in the future. We've got to be focusing on the internet of things and that whole next generation of technology so we're building the security in at the beginning rather than trying to bolt it on afterwards.

History has shown us that trying to bolt it on afterwards is not very effective. Essentially that's very much what we are trying to do today. On the positive side I think the amount of energy and the amount of focus and attention this issue is getting today is something that even four years ago we did not see.

I'll mention the summit I was at on Friday at Stanford again. It was amazing to see all of the CEO's of Fortune 500 companies that were in attendance who were talking about the security of their corporate networks, the protection of their customer data and their intellectual property. Truly speaking with deep knowledge about how important this was they make sure they protected their crown jewels and their viability and maintaining the trust of their customers.

I think the level of awareness at the highest levels now is greater than it has ever been. I see that at the corporate level, at the government levels around the world as national cyber strategies are being developed everywhere, national cyber plans are being developed by governments around the world, by the cooperation happening between different governments to build cyber capacity for those nations who maybe are not as mature.

There's a lot of very positive energy that's taking place and action that is taking place to try to raise the bar for everyone. That's something I think creates an environment where there is some hope that we can tackle this problem and make a difference going forward.

Scott Tod: One of the things I'll talk about is the trust factor, trusting our partners. An example would be the organizations independent corporations that we want to perhaps sign service level agreements with to provide services to law enforcement to do certain things.

One of them may be data collection, data storage, analysis, the aspect of analysis of the information, providing the reports. Those are things we need to look at. Speed and size are what's problematic for us. I think better collaboration with government, with corporations and educational institutions, leveraging the power they have.

I think that's the success, that's the short term success. I think the long term one is the education of the citizens of Canada and the politicians of Canada as to the extent of what this problem is, how far reaching it is and what the solutions are.

Dr. Oonagh Fitzgerald: Thank you very much for all your wonderful comments. I'm relieved to know that at the center of it all the human being still remains in charge and the possibility of human collaboration and working through complex issues is the real future here which is a great relief for somebody like me who doesn't have the math background of Admiral Rogers.

I know that one of our speakers has to go to the media so if there's one very pressing question we could take it but we can't do that many. If somebody wants to have a quick question.

Question: Thanks for an excellent panel discussion for something that's extremely complex and difficult. I wanted to get any of the panel members to discuss the culture change. That was something the Admiral touched on and all of you have discussed, the ability to create a new understanding of what it takes to defend against a threat that is so broad. Adaptability and speed is the issue.

In Canada we're trying to build an anti-terrorism policy and push that through. Bill C51 you're probably familiar with and a lot of the discussions are about invasive acts by government departments. It really is about information sharing and getting to that point where the government agencies responsible for a particular aspect can respond quickly enough to detect and respond to those cyber threats.

I'm wondering how, it's too bad that the two Senators aren't here because they're fighting that problem in the House right now. What would you see as being an enabler for the professional community, for us to do in terms of beyond passwords. What recommendation would you have to answer those people who have concerns about privacy, not the commercial or industrial side but the public?

Cheri McGuire: I would say first go talk to them because you have to have that open dialogue and have the conversation. I think you might find you're really not as far apart as it might appear. Once many folks that are privacy advocates see the type of information we're talking about sharing, it doesn't have PII, it doesn't have proprietary information.

It truly is meta data. It's zeroes and ones that is machine readable. Many of them say I get it. You're not going to sway all of them but I think it's important that you have that dialogue and you proactively reach out to them. We'll never be able to bridge the divide if we don't have that open dialogue.

Admiral Rogers: The other point I'd try to make is you must own this problem. If you think this is something your CIO or your chief technical officer or in military jargon your six is going to own, that ain't going to work in the digital world of the 21st century. You've got to own this just as if you're a fan of history, if you've read anything from General Marshall in the Second World War on the US side, he always talked about how logistics were one of the things from his perspective that he thought separated the true professional who could look at the strategic level from the traditional commander.

My argument with the leadership in this thing we call the Department of Defence down to individual unit commanders is you must own this problem and you must have a fundamental level of knowledge on this. It doesn't mean you're the expert but you don't understand as a naval officer, you don't understand every system that's on that ship but you understand the fundamentals of propulsion. You know the fundamentals of your plant. If there's no plant, no move, no power, no fight.

You quickly come to the conclusion in the maritime environment I'd better understand the fundamentals of my propulsion even if I'm an operations kind of guy or a combat systems kind of person. I think cyber is the same kind of way. You've got to understand the fundamentals.

Scott Tod: I think just creating the awareness of the issues in your organization, in your own personal space, your family, your children, relatives, in regards to cybersecurity, cybercrime and the awareness of cybercrime and what precipitates cybercrime, data breach or data access.

Lastly there's that national discussion in regards to privacy and lawful access. Those are things that are really engaging discussion. As you may know we've attempted legislation with regards to lawful access. It really is a lightning rod at times in regards to human rights, privacy and the intrusiveness of government organizations.

I think that discussion has to be matured more in regards to what it is Canadians are prepared to do in regards to the access to their personal information. I think those are healthy discussions that start at local levels. One of the things we didn't talk about today is that insider threat aspect. What are we doing internalizing in regards to that insider threat?

Although I look out quite often and look over, I don't look within very often. I think that's something is that look within first and make sure we're practicing cybersecurity, ensuring we're doing our best.

Dr. Oonagh Fitzgerald: Admiral Mike Rogers, Deputy Commissioner Scott Tod and vice president Cheri McGuire, thank you so much for owning this issue and demonstrating to the audience that there's a place for each of us in helping to solve the problem.

(Applause)

General Evraire: Before you leave the stage let me thank you again on behalf of everyone here for your masterful control and management of this panel but also for the great insights everyone brought in respect to this issue. What was really revealing here and perhaps more important was the fact that there was a great mix of military, private sector, police elements, everything you need to do or need to consider, take account of as we deal with this evolving and increasingly challenging threat.

Thank you very much for all of that. We're most grateful. You'll all get our book on the army, 1950 to 2000. I'm sure you'll read it when you have a spare moment. Thank you very much.

(Applause)

CSIS in the News/Le SCRS dans les nouvelles

Light coverage / couverture légère.

Canada

1- After officials confirmed Monday that **hostage John Ridsdel had been killed, Prime Minister Justin Trudeau called it "an act of cold-blooded murder"** by a "terrorist group" and said Canada would "pursue those responsible for this heinous act."A second Canadian, 50-year-old **Robert Hall, remains captive**, a Canadian government official confirmed. Canadian government defines **Abu Sayyaf largely as a kidnapping racket**, " the *National Post's* **Stewart Bell** points out. Ostensibly, the group's goal is the establishment of an Islamic state government by sharia law," according to the Public Safety Canada website. "In practice, however, the ASG primarily uses terrorism for profit."(extensive coverage / vaste couverture).

2- *La Presse+* rapporte qu'un **groupuscule anti-embourgeoisement aurait planifié son attentat incendiaire au quart de tour**, mais un appel au 911 l'a transformé en violente attaque contre des policiers. C'est la thèse privilégiée par les enquêteurs chargés de faire la lumière sur la **mystérieuse agression au cocktail Molotov** survenue il y a 10 jours dans Hochelaga-Maisonneuve. Pendant la soirée du 14 avril dernier, dans la rue Ontario, entre Moreau et Préfontaine, un groupe d'une vingtaine de personnes a lancé une attaque d'une rare violence contre les quatre voitures de police qui les suivaient sur quelques dizaines de mètres. Des engins incendiaires et des pièces pyrotechniques ont notamment été utilisés pour s'en prendre aux agents.

3- According to the *Ottawa Citizen*, **Mohamed Harkat**'s defence team will use a recent British court ruling to argue that the Algerian born terror suspect **should not be deported** to the turbulent North African country. A panel of judges from the United Kingdom's **Special Immigration Appeals Commission** ruled last week that six Algerian terror suspects cannot be deported because of the "real risk" they'll be tortured in their native country. The judges said the situation in Algeria is unpredictable given the threat of Islamism in the region and the frail health of President **Abdelaziz Bouteflika**. Bouteflika, 79, suffered a serious stroke in April 2013, and questions remain about who's actually running the country. In Canada, the federal government **continues to pursue the deportation of Ottawa's Harkat** 14 years after he was first arrested on the strength of a **national security certificate**. A feature of federal immigration law, the certificates give the government the power to remove foreign-born terror suspects based, in part, on secret evidence.

4- En raison du **blocage du gouvernement de l'Irak, le Canada est pris depuis plus de cinq ans avec une vingtaine de criminels irakiens** jugés particulièrement dangereux pour le public. **Au moins l'un d'eux est détenu à Montréal. Ottawa a tout tenté pour s'en débarrasser, mais Bagdad refuse de les reprendre.** Un résumé du dossier a été présenté au début du mois à la section montréalaise de la Commission de l'immigration et du statut de réfugié, lors d'une audience à laquelle *La Presse+* a assisté. Dans un des documents déposés en preuve, un représentant de l'Agence des services frontaliers du Canada (ASFC) cache mal son exaspération devant la tournure kafkaïenne du dossier.

International

United States / États-Unis

5- Addressing a *Christian Science Monitor* breakfast meeting yesterday, Director of National Intelligence **James Clapper** said the **Snowden leaks** have **accelerated** the **sophistication** of **encryption technologies** by **"about seven years** and "from our standpoint, **it's not a good thing**" because **new, commercially available encryption software** "had and is having **major, profound effects** on our **ability**" to **collect intelligence**, **"particularly against terrorists"**. (When pressed by the *Intercept* to **explain** his **'seven years'** figure, **Clapper** said it came from the **NSA.**) Clapper also said **Isis** has **clandestine cells** that are plotting more **terrorist attacks** in **Germany, Italy,** and **England** prompting the United States to step up efforts to promote more intelligence sharing.

United Kingdom / Royaume-Uni

Light coverage. / couverture légère.

Europe

6- Selon *Le Monde,* **deux faux migrants interpellés en Autriche, un Algérien et un Pakistanais, ont avoué qu'ils devaient participer aux attentats du 13 novembre à Paris.** «Ils m'ont dit que je devais aller en France, pour y accomplir une mission, et que je recevrais des instructions là-bas» .

7- **Sapo** is investigating a possible **Isis threat** to **Stockholm**, reports the *BBC,* after **Iraqi authorities** informed **Sweden** that **seven** or **eight militants** had traveled to the Nordic country.

8- *Fox News* reports that **shortly after** the **Charlie Hebdo attack** in Paris in January of last year, **French intelligence rejected** an **Israeli company's offer** of **terrorist-tracking software** that could have helped them flag terror cells. "**French authorities liked it**, but the official came back and said there was a **higher-level instruction not to buy Israeli technology,**" a **well-placed Israeli counter-terror specialist** familiar with the technology and the company behind it said. "The discussion just stopped."

9- According to **Finnish intelligence**, **2015** was a **very active** year marked by an **aggressiveness** in **espionage activity** not seen in previous years. The news organization *STT* reports Supo also made note of an attempt by foreign powers to influence energy policy decision-making.

Africa / Afrique

10- **Isis** has **claimed** it has **carried out** its **first attack** in **Somalia,** a **strike** against a **convey carrying African Union troops.** There's no word on the exact date of the attack or if there were casualties reports *Horseed Media.*

11- Selon *Jeune Afrique,* la **justice marocaine a décidé de classer sans suite la plainte déposée il y a deux ans à Paris par le kick-boxeur Zakaria Moumni contre le chef du renseignement marocain, Abdellatif Hammouchi.**

Middle East / Moyen-Orient

12- *The National (UAE)* reports that **pro-government forces** set up checkpoints across Mukalla on Monday and said all **Al Qaeda militants** had been cleared from the city where they had been based in Yemen for more than a year.

13- *Press TV* reports that **Iran's Intelligence Minister Mahmoud Alavi** says while the insecurity prevailing in most countries in the Middle East and across the world, the Islamic Republic enjoys **"unparalleled" security**.

14- The *Jerusalem Post* reports that the **Shin Bet (Israel Security Agency)** is reevaluating the way it provides entry permits after large numbers of **Palestinians** were denied entry to Israel due to security concerns.

Afghanistan/Pakistan

15- The *Khaama Press* reports **President Mohammad Ashraf Ghani** has ordered the Afghan National Security Forces (ANSF), specifically the **National Directorate of Security (NDS) directors**, to use all force against the terrorists fighting in the country.

Australia, New Zealand / Australie, Nouvelle-Zélande

16- A Sydney teenager charged with planning an Anzac Day terror attack was reportedly **part of a deradicalisation program** when he was arrested. The 16-year-old had been enrolled in the government-funded police deradicalisation program since last May after coming to authorities' attention for allegedly being in contact with Islamic State recruiter **Neil Prakash**, according to the *ABC News* and *News Corp Australia*. Prakash was said to have **encouraged the boy to take part in a terror attack last year**. The **Australian Federal Police** and the boy's lawyer, **Zemarai Khatiz**, refused to confirm the reports on Tuesday. Counter terrorism police arrested the teenager near his Auburn home on Sunday after he allegedly tried to source a gun before Anzac Day in preparation for a terrorist act.

Asia / Asie

17- The **Philippine military came under increased pressure today to rescue more than 20 foreign hostages** after their **Muslim extremist captors beheaded Canadian John Ridsdel** Monday, but troops face a dilemma in how to succeed and also ensure the safety of the remaining captives. About 2,000 military personnel, backed by Huey and MG520 rocket-firing helicopters and artillery, were involved in the manhunt for the militants, who were believed to be massing in Sulu's mountainous Patikul town, military officials said. (Extensive coverage / vaste couverture).
18- President **Park Geun-hye** said Tuesday that North Korea could **conduct a fifth nuclear test at any time** as she warned of stronger sanctions and pressure in case Pyongyang goes ahead with such provocations. North Korea **"completed its preparations for a fifth nuclear test and it is in a situation in which it can carry out"** the test at any time, Park said in a meeting with chief editors of several dozen newspapers and broadcasters at **Cheong Wa Dae**, South Korea's presidential office. The chief executive's assessment came amid speculation that North Korea could carry out another atomic weapons test to consolidate its internal unity ahead of a rare congress of the ruling Workers' Party early next month (extensive coverage / vaste couverture).

07:00 / 7h00

CSIS in the News/Le SCRS dans les nouvelles

1-A Federal Court judge **says Canada's spy agency illegally kept potentially revealing electronic data about people over a 10-year period**. At a hastily arranged news conference late yestreday, **CSIS director Michel Coulombe** said the **spy service had halted all access to, and analysis of, the data in question while it thoroughly reviews the court decision**. ``**I deeply regret the court's serious concerns with respect to meeting our duty of candour, and I commit to continuing my efforts, with the deputy minister of justice, to address this concern," Coulombe said. In a key 2013 ruling**, Federal Court Justice **Richard Mosley** chastised CSIS over a **request for warrants to track two Canadians with help from the Communications Security Establishment, Canada's electronic spy agency**. Mosley said CSIS breached its duty of candour by failing to disclose that CSE's foreign counterparts in the **Five Eyes intelligence network - the United States, Britain, Australia and New Zealand - could be called upon to assist.** (extensive coverage / vaste couverture)

2-Revelations of **police surveillance** of journalists are "troubling" and **could spark further measures to better safeguard the rights of the press, Prime Minister Justin Trudeau** says. At a news conference in Ottawa, held to respond to a Federal Court ruling on his **agency's handling of metadata collected under warrant,** CSIS Director **Michel Coulombe** offered assurances that his agency was not conducting surveillance on reporters. **"I completely agree with the PM on this issue,"** said Coulombe. **"Such a situation is not happening at the federal level." (extensive coverage / vaste couverture)**

3-**Huma Abedin** warned **Hillary Clinton** in **2010 that cables from the U.S. Embassy in Ottawa could cause problems for Stephen Harper's government**, emails released yestreday show. Abedin's email was sent on Nov. 27 2010. On Nov. 29 the *New York Times* published a story detailing a 2008 conversation between the former head of the **Canadian Security Intelligence Service Jim Judd** and senior **State Department counsellor Eliot Cohen**. The significance of Canada's role in the **Five Eyes alliance** became clearer in 2013 when leaked information from whistle blower **Edward Snowden** showed that **Canada's Communications Security Establishment** set up covert spy posts in about twenty countries on behalf of the **United State's National Security Agency,** *Postmedia News* writes.

4-**Le Service canadien du renseignement de sécurité (SCRS) a agi dans l'illégalité en conservant des données personnelles pendant 10 ans, a tranché la Cour fédérale.** Dans un jugement rendu public jeudi, le magistrat **Simon Noël a statué que le SCRS) avait manqué à son devoir d'informer le tribunal de son programme de collecte de données, qui opérait en vertu d'ordonnances judiciaires**. Le juge Noël estime que le SCRS aurait dû communiquer ses activités à la cour, puisqu'elles ne concernaient pas directement la sécurité nationale. Le SCRS a entamé le traitement de ces données en 2006 à l'aide d'un puissant logiciel nommé **Operational Data Analysis Centre (Centre d'analyse de données opérationnelles).** L'agence d'espionnage aurait ainsi obtenu des renseignements susceptibles de révéler des informations personnelles et pointues. (Vaste couverture/extensive coverage).

5-Selon *La Presse+,* se disant préoccupé par les révélations au sujet des **activités de surveillance menées par le Service de police de la ville de Montréal et la Sûreté du Québec auprès de journalistes, le premier ministre Justin Trudeau affirme avoir obtenu l'assurance de la part**

des patrons de la GRC et du SCRS qu'ils ne se livrent pas à de telles activités. En mêlée de presse, jeudi, M. Trudeau a indiqué avoir pris l'initiative de communiquer avec le **commissaire de la GRC, Bob Paulson, et le directeur du Service canadien du renseignement de sécurité (SCRS), Michel Coulombe,** afin de s'assurer que les règles et les lois fédérales qui s'appliquent à ces deux organisations soient respectées.
6-Le premier ministre **Justin Trudeau a indiqué jeudi qu'aucun journaliste ne faisait actuellement l'objet d'une surveillance de la part des services policiers ou de renseignement fédéraux.** Dans une conférence de presse organisée marge d'une séance plénière avec des étudiants, à Ottawa, il a signalé que son bureau s'en était assuré. Il a dit avoir obtenu ces **informations de la Gendarmerie royale du Canada (GRC) et du Service canadien du renseignement de sécurité (SCRS). Le premier ministre Trudeau a réitéré que son gouvernement prenait très au sérieux la question de la liberté de presse.** Il y a quelques mois, on a appris que le journaliste Joël-Denis Bellavance, du quotidien *La Presse*, avait été filé par la GRC. (Vaste couverture/extensive coverage).
7-In its reporting of Thursday's ruling on metadata retention by CSIS, the *Wall Street Journal* said the court issued a **'strong rebuke'** to the Service.

Canada

8-The *Montreal Gazette* writes that **three distinct cases of police forces spying on Quebec journalists emerged this week**. In at least two of them, investigators were trying to **stop police information from leaking to reporters.** The surveillance was launched after then-Parti Québécois public security minister **Stéphane Bergeron** asked then-SQ director general **Mario Laprise** to look into leaks to the news media about an investigation into **Michel Arsenault**.

International

United States / États-Unis

9-The *Washington Post* reports **U.S. intelligence does not see Russia** as capable of **using cyber-espionage** to **alter** the **outcome of Tuesday's presidential election**, but they have warned that **Moscow may continue meddling** after the voting has ended to **sow doubts about the legitimacy** of the **result.** However, they have **not ruled out** a **Russian-sponsored disruption** on Election Day. In recent weeks, officials at the **Department of Homeland Security** have collected **evidence** of apparent **Russian "scanning"** of **state-run databases** and **computer voting systems.** "Whether they were really trying hard to get in, it's not clear," a U.S. official said. Still, the decentralized nature of U.S. polling would make it extraordinarily difficult to subvert a nationwide race. Instead, officials said it is **more likely** that **Russia** would use **hacking tools** to **expose** or **fabricate signs of vote-rigging**, aiming to **delegitimize** an election outcome that Donald Trump has said he may refuse to accept if he does not win.
10-An **FBI agent** told Britain's *Guardian* newspaper that the **Bureau is "Trumpland"** with **Hillary Clinton** considered the **"antichrist personified"**. Other *Guardian* sources **dispute the depth of support for Trump** within the FBI, though they **uniformly stated** that **Clinton is viewed highly unfavorably**. "There are lots of people who don't think Trump is qualified, but also believe Clinton is corrupt. What you hear a lot is that it's a bad choice, between an incompetent and a corrupt politician," said a former FBI official.

United Kingdom / Royaume-Uni

11-Prime Minister **Theresa May** is expected to tell the **president** of the **European Commission Jean-Claude Juncker** that her **timetable for Brexit in March** is **still on track** despite yesterday's ruling in the High Court that parliament must be consulted first. (Extensive coverage / vaste couverture).

12-**Jayda Fransen**, the **deputy-leader** of the **far-right Britain First**, has been **fined nearly £2,000,** reports the *Press Association,* after a court found her **guilty** of **religiously aggravated harassment** for **hurling abuse** at a **Muslim mother wearing a hijab** during a "Christian patrol" of Bury Park in Luton this past January.
13-British Foreign Secretary **Boris Johnson** indicated that according to **available intelligence**, **Isis leader Abu Bakr al-Baghdadi,** is **no longer in Mosul** reports the *Guardian.*

Africa / Afrique

14-D'après *All Africa,* **officiels togolais et béninois entendent renforcer leur coopération sécuritaire**. Depuis mercredi matin les ministres en charge de la **Sécurité des deux pays et les responsables des services de renseignement se concertent**. Au programme de la rencontre, la lutte contre la **criminalité transfrontalière, le banditisme, le terrorisme, la cybercriminalité.**

Middle East / Moyen-Orient

15-The *Times of Israel* reports that Iran commands a force of up to **25,000 Shiite Muslim militants** fighting in the Syrian civil war, a majority of them from Afghanistan and Pakistan, according to **former Shin Bet chief Avi Dichter**.
16-*The National (UAE)* reports that **Abu Bakr Al Baghdadi, the elusive leader of ISIL** has released a message urging his followers to keep up the fight against a major offensive to rout the extremists from Mosul, their last urban stronghold in Iraq.

Afghanistan/Pakistan

17-The *Pakistan Daily Times* reports that **travellers flying to Canada** with a Pakistani passport require a valid visa and an eTA, which are not the same document but some third parties are selling fraudulent eTAs to Pakistani citizens, according to an advisory issued by the **Canadian Embassy** in Islamabad.
18-The *International News* reports that **Pakistan** on Thursday took a step forward to internationalise and reached out to foreign capitals regarding the activities of Indian state-sponsored subversive and terrorist activities inside Pakistan — **having contacts with Taliban and aiming at sabotaging the China Pakistan Economic Corridor** — which has led to nine Indian officials including diplomats at the Islamabad Mission found involved in promoting terrorist activities and terror financing.
19-*Pajhwok Afghan News* reports that President Ashraf Ghani has said **30 terrorist organizations** are operating in **Afghanistan** and the country could not be stabilized by militia forces and illegal armed groups, but by Afghan security forces.

Europe

20-The **Diyarbakır Governor's Office** says the **PKK** is **responsible** for this morning's **car bomb** blast in the **Turkish city** which has **killed eight people** and **wounded 100 others** reports the *Hurriyet Daily News.* The blast occurred not long after the **co-leaders** of the **opposition Peoples' Democratic Party** (HDP) and **10** of their **colleagues** were **arrested** in **'anti-terror' raids.**
21-According to the German media, the **27-year-old Syrian refugee arrested** at his apartment in Berlin on Wednesday on suspicion of being a **member of Isis** and of **plotting a terror attack** is **'Ashraf al-T'**. The suspect is considered to be **"highly dangerous"** and **Interior Minister Thomas de Maizière** said he was **under surveillance** by the **BfV** for **some time.**
22-**Swiss prosecutors** have concluded that a **"significant" number** of **computers** in use at a **Geneva hotel** where sensitive **Iranian nuclear talks** were taking place in 2015 were infected by **malware** for the purposes of **cyber-espionage** but after a months-long investigation, the Attorney General's office was **unable to determine who was responsible** so it has closed the probe reports *The Local.*

23-A **Belgian court** has ruled that the **recruitment activities** conducted by the **PKK** in the country were **within** the **scope of** an **armed struggle rather** than **connected** to **terrorism.** Turkey's *Daily Sabah* speculates "the court's ruling is expected to **sour relations between Brussels** and **Ankara**. **Belgium** once again has **turned a blind eye** to **PKK terrorist activities** in the country despite EU recognition of the group as a terror organization being binding for Belgian authorities".

24-Soupçonné d'être **le tueur du Musée juif de Bruxelles en 2014, il aurait été le geôlier de quatre journalistes français en Syrie.** Pour les Belges, il reste avant tout le principal suspect de la tuerie du Musée juif de Bruxelles. Mais pour les Français, **Mehdi Nemmouche serait aussi le geôlier djihadiste ultraviolent qui fredonnait La Bohème d'Aznavour devant ses quatre compatriotes journalistes, otages en Syrie pendant dix mois.** C'est à ce titre que Paris avait délivré au mois d'août dernier un mandat d'arrêt européen contre le Français d'origine algérienne, âgé de 31 ans et actuellement détenu dans le quartier de haute sécurité de la prison de Bruges. La justice belge a donné jeudi son feu vert à sa remise à la France, mais sans préciser à quelle date elle pourra avoir lieu rapporte *Le Figaro.*

25-**Ziane Mehadjri sort du silence. Indésirable au Petit-Saconnex, il a créé sa propre organisation.** La grande mosquée de Genève, au Petit-Saconnex, ne cesse d'alimenter la chronique. Des **jeunes radicalisés l'ont longtemps fréquentée et deux d'entre eux ont rejoint Daech l'an dernier. On sait que deux imams français employés de la Fondation culturelle islamique de Genève, qui gère l'institution, sont fichés S pour radicalisation par les services de renseignement de l'Hexagone.** La semaine dernière, on apprenait que le **chef de la sécurité de la mosquée était lui aussi fiché S. Un troisième imam a, jusqu'à présent, peu fait parler de lui: l'Algérien Ziane Mehadjri.** Et pour cause. Voilà deux ans qu'il est interdit de prêche à la grande mosquée. Il sort du silence, annonçant son licenciement à la fin de septembre - qu'il conteste juridiquement - et la création par ses soins, à Genève, de l'Organisation européenne des centres islamiques, une initiative qui a suscité l'ire de son employeur révèle la *Tribune de Genève.*

26-Selon *La Tribune de Genève,* le **Ministère public de la Confédération, qui confirme l'information, suspend son enquête, faute de pouvoir identifier les coupables Les entretiens sur le programme nucléaire iranien qui se sont tenus à Genève au printemps 2015 ont bien été espionnés.** Le Ministère public de la Confédération (MPC) l'a confirmé, mais il a décidé de suspendre son enquête, faute de pouvoir identifier les coupables. Les investigations ont permis d'établir qu'un grand nombre d'ordinateurs ont été infectés par un maliciel dans l'hôtel genevois où se sont tenus les entretiens des ministres des Affaires étrangères de l'Iran, des Etats-Unis, de la France, de la Chine, de la Russie et de l'Allemagne. Les recherches effectuées ne fournissent toutefois aucun soupçon par rapport à des auteurs concrets. Même s'ils sont passibles de poursuites pénales, les éléments ne peuvent pas être attribués à une personne déterminée. C'est pour cette raison que le Ministère public de la Confédération a suspendu la procédure ouverte en mai 2015 sur la **base d'informations du Service de renseignement de la Confédération (SRC).**

Australia, New Zealand / Australie, Nouvelle-Zélande

27-**Police have moved to smash a suspected new terror cell of Islamic State extremists** they - believe may have been **planning attacks in Sydney**. The *Australian* reports that officers from the **NSW Joint Counter Terrorism Team** yesterday conducted a string of raids across southwestern Sydney, arresting two men and turning over six houses amid fears that members of the group may have sourced weapons. **The raids were part of larger assault on a suspected cell of about 10 Muslim men.**

28-The growing risk of **cyber attacks** leaves the Australian economy exposed to a potential **$16 billion damage bill over the next decade**, according to one of the world's biggest insurance companies. In a joint study with **Cambridge University**, the *Australian Broadcasting Corporation* writes that the Lloyd's insurance giant has found out of 301 global cities, Sydney ranks 12th in terms **cyber attack exposure with $4.86 billion of economic growth at risk.**

29-**Australia's domestic intelligence agency failed to notify the intelligence watchdog of a controversial "special intelligence operation"** for **10 days** in what is the first **official confirmation of highly secretive missions that give intelligence officers immunity from prosecution,** the *Guardian* reports. In 2014 the government passed controversial national security laws that allow the creation of "special intelligence operations" that must be approved by the attorney general, **George Brandis.**
30-Concrete evidence has emerged that **there has been an attempt to carry out a terrorist attack on New Zealand soil**, the *New Zealand Herald* writes. The **security services will release no details of how the plot was foiled or when it emerged.** The system which was activated to deal with it has been in existence for only two years. The revelation of the threat came from the newly released **National Security System handbook**. It stated the system - which triggers special protocols - had been activated for a "threat of a domestic terrorist incident". The newly released annual report from **the Inspector-General of intelligence and Security, Cheryl Gwyn,** said there had been one case of the **NZSIS needing an urgent warrant for visual surveillance of a target or targets.**

Asia / Asie

31-*The Hindu* reports that **India-Pakistan bilateral relations** plummeted further on Thursday with Pakistan formally naming eight Islamabad-based **Indian diplomats as alleged spies**.
32-The *Dhaka Tribune* reports that **new JMB** had plans to stage a big terror attack in Dhaka, police learnt from four firearms smugglers arrested by the **Counter-Terrorism and Transnational Crimes (CTTC)** unit of police in the capital's Darussalam area on Wednesday.
33-According to the *China Daily*, security and technology experts are calling on African governments to embrace safe-city concepts in an effort to address the **increasing incidence of crime and extremism**. Combating crime, according to the experts, **has become the hardest activity for police and security organizations,** as **available video security systems are faced with blind spots, unclear images, difficult video retrieval and data damage or loss**. To solve these challenges, the experts are recommending a safe-city technology solution provided by **Huawei Technologies Co**, a Chinese **multinational IT company headquartered in Shenzhen**, Guangdong province.
34-The commander of U.S. forces in South Korea said on Friday a **U.S. Terminal High Altitude Area Defense (THAAD) anti-missile system battery** would be deployed to South Korea **within eight to 10 months,** an official from the U.S. forces in South Korea said. The official was commenting on a *Yonhap news agency* report on remarks made by **Vincent Brooks**, commander of United States Forces Korea, in which he laid out plans for the deployment. Brooks said rotating strategic weaponry onto the Korean peninsula would have a deterrent effect against North Korean provocations, according to the agency. He also said the battery would be bigger than one deployed in Guam, writes *Reuters*.

Americas / Amériques

35-**Venezuelan's Opposition** has set a **November 11 deadline** for the **Maduro government** to **act** on its **demands** or it will **quit Vatican-led talks** and **resume protests** reports *Reuters*.

CSIS in the News/Le SCRS dans les nouvelles

1- Citant les **révélations d'Edward Snowden et les cas de journalistes surveillés au Québec, les commissaires à la protection de la vie privée du pays** mettent le gouvernement Trudeau en garde: au lieu de donner de nouveaux pouvoirs aux corps policiers, **Ottawa doit plutôt mieux encadrer les pouvoirs policiers existants en matière de surveillance**. «Sans vouloir faire comparaison» avec les services de renseignement des ex-républiques de l'Europe de l'est, le commissaire **Daniel Therrien rappelle toutefois une décision récente de la Cour fédérale dénonçant le fait que le Service canadien du renseignement de sécurité (SCRS) a conservé de façon illégale pendant plusieurs années des métadonnées** de citoyens canadiens (le SCRS interprétait la loi différemment et s'est plié à la décision de la Cour fédérale). «Nous parlons ici de retenir des données de citoyens ordinaires. Je ne crois pas que c'est le type de société dans laquelle [les Canadiens] veulent vivre», dit le commissaire Daniel Therrien rapporte *La Presse*.

2- Canada's spy agencies should **destroy the data trails of innocent people they incidentally collect** during terrorism investigations once the actual targets have been cleared of suspicion, say Canada's privacy watchdogs. The declaration Tuesday from **privacy commissioners** across the country came after a judge recently ruled the **Canadian Security Intelligence Service** violated the law by **keeping potentially revealing electronic data about people who were not under investigation.** The message was part of a **joint submission signed by federal, provincial and territorial privacy czars** that urged the Trudeau government to strengthen protection of personal information as it revamps the national security regime, the *Canadian Press* reports. Rather than expand state powers and reduce individual rights, it is time to **beef up legal standards and oversight to prevent repetition of mistakes**, said federal privacy commissioner **Daniel Therrien**, flanked at a news conference by counterparts **Brian Beamish** from Ontario **and Jean Chartier** of Quebec.

Canada

3- A Canadian military veteran **who had been detained by Iraqi authorities** after spending six months fighting ISIL **has been released**, his mother said Tuesday. "He's been freed, thank God," **Kay Kennedy** said shortly after her son, **Michael Kennedy**, phoned home from Erbil to say he was no longer being held. She said he told her he had been detained with three Americans and two Germans over travel visa problems. While Kennedy had a valid Iraqi visa, his travelling companions did not (moderate coverage / couverture modérée).

International

United States / États-Unis

4- *Washington Post* columnist Josh Rogin reports that **incoming national security adviser Michael Flynn** will **meet** with **Obama national security adviser Susan Rice** for the **first time today** at the White House. The meeting comes as **Democrats in Congress** are ramping up their **criticism** of **Flynn** and his recent behavior, especially his **use of social media.** Rogin makes note of a a **tally by *Politico*** which found that **Flynn** has **pushed fabricated** or **dubious stories** on

Twitter at least **16 times since August**. When asked if he had any **concerns** about Trump's national security selection, Senate Armed Services Committee chair **John McCain** replied **"none at all"**.
5- Speaking at the University of Maryland, **former NSA director Keith Alexander** said an **early foreign policy test** for **Donald Trump** is how to **respond**, if at all, to a **Russian hacking campaign** designed to interfere with the presidential election. The *Baltimore Sun* reports Alexander **praised James Mattis**, the retired Marine general who is Trump's pick to run the Defense Department, and **Mike Pompeo**, tapped to lead the CIA.

United Kingdom / Royaume-Uni

6- **Mohamed Abrini**, the so-called 'Man in the Hat' suspected of participating in the **Brussels airport bombing** in March, was the subject of a **"low level" investigation** by the **MI5** when he was in **Birmingham in July 2015** but the Security Service concluded that he **did not pose** a **significant threat** to the UK. This, reports the *Daily Telegraph,* was revealed during the **trial** of **Zakaria Boufassil**, a Belgian national living in Birmingham, who has been found **guilty** of **supplying thousands of pounds** to **Abrini** during his secret mission to the UK.
7- Police are investigating a **40 second video** in which the **New IRA displays** what appears to be a **military grade rocket launcher** on the **streets of north Belfast** reports the *Guardian.* The video, which appeared on **social media** on Monday evening, is the second in two years in which the dissident republican group has released propaganda images of weapons it claims to have at its disposal.

Europe

8- **Les budgets des deux principales agences de l'alliance «Five Eyes» ont encore été augmentés** ces deux dernières années, sur fond de **lutte contre le terrorisme.** Au sein du club très fermé des «Five Eyes» qui réunit, depuis la seconde guerre mondiale, les **services secrets techniques américains, britanniques, australiens, canadiens et néo-zélandais, le Royaume-Uni et les Etats-Unis tiennent les deux principaux rôles.** Là où l'Agence nationale de sécurité (NSA) américaine compte 60000 personnes, son homologue française, la direction technique de la **Direction générale de sécurité extérieure (DGSE) emploie 3000 agents.** Chargée d'une mission offensive et défensive, la NSA s'efforce d'avoir accès à tous les réseaux informatiques et de communication afin de collecter et de traiter en masse les données de connexions. Elle dispose d'un budget annuel de plus de 10milliards de dollars, supérieur à celui de la CIA.
9- Selon *L'Agence télégraphique Suisse,* les **moyens prévus pour le Service de renseignement de la Confédération (SRC) sont pour l'instant suffisants**. Fort de cette conviction, le Conseil des Etats a enterré mardi tacitement une motion du National qui réclamait plus de personnel. **Depuis le dépôt du texte en septembre 2015, 86 postes supplémentaires ont été créés dans le domaine de la lutte contre le terrorisme, dont 23 pour le SRC, a rappelé Isidor Baumann (PDC/UR) au nom de la commission.** L'application de la nouvelle loi sur le renseignement s'accompagnera par ailleurs de la création de 19,5 emplois.

Africa / Afrique

10- Libyan fighters have declared that **Isis** has been **defeated in Sirte,** but analysts, reports the *New York Times,* warn the **Islamic State** could **still regroup in other parts of Libya** by **exploiting** the **economic ruin** and **political vacuum** that has dogged the country since the ouster of Col. Muammar el-Qaddafi in 2011. "I'm concerned about the pockets of marginalization, and in some areas **pre-existing jihadist presence,** that they could use to reconfigure," said **Frederic Wehrey**, a senior fellow at the **Carnegie Endowment for International Peace**, citing the **presence of Islamic State forces** in **Tripoli, Benghazi** and the desert town of **Sabha.**

Middle East / Moyen-Orient

11- *Press TV* reports that **Iranian Interior Minister Abdolreza Rahmani Fazli** says **25 terrorist groups** were disbanded during the religious rituals of Arba'een last month.
12- The *Gulf News* reports that police in the strategic Yemeni city of Aden **busted a cell** linked to Daesh responsible for **assassinating intelligence officers** and carrying out other terror attacks.
13- The *Saudi Gazette* reports that **Saudi Arabia suffered more than 128 terrorist operations** in the last 15 years that killed or injured as many as 1,147 Saudis and expatriates, according to spokesman of Interior Ministry Maj. Gen. Mansour Al-Turki.

Afghanistan/Pakistan

14- The *International News* reports that **Pakistan** on Tuesday said it had established a comprehensive and effective national **nuclear security regime**, which is at par with the latest international standards and guidelines.
15- *Pajhwok Afghan News* reports that **National Directorate of Security (NDS) chief for Nangarhar Brig. Gen. Dad Mohammad Harifi** told a press conference that their operatives had seized **eleven militants, including a would-be bomber** tasked with targeting the Indian diplomatic mission in eastern Nangarhar province.

Australia, New Zealand / Australie, Nouvelle-Zélande

16- According to *Scoop.co.nz,* the **Government Communications Security Bureau** wants to **give internet service providers more information** and **power to block cyber threats** which are increasing, its director told the **intelligence and security select committee** yesterday. The **communications-focussed spy agency has recorded 338 cyber security incidents in the last year**, from 109 a year earlier, which director Andrew Hampton said was due to both the number of threats increasing and the improved system picking up more threats.
17- A Melbourne man has been sentenced to a two-year corrections order plus time already served in custody for **funding an American man's travels to Syria** to fight against the Assad Government. **Hassan El Sabsabi**, 25, of Seabrook pleaded guilty in the Victorian Supreme Court to funding terrorism in August 2015 (moderate coverage / couverture modérée).

Asia / Asie

18- According to *Yonhap News Agency*, a recent **intelligence-sharing** deal that Japan reached with South Korea is a **"necessary"** step to **guarantee its national security in the face of threats** from **China** and **North Korea**, a former Japanese envoy to Seoul has said. Last month, South Korea and Japan signed the **General Security of Military Information Agreement (GSOMIA)** aimed at **expanding intelligence sharing** between the two neighbors and better countering the threat, in particular, from North Korea. The deal, however, sparked strong opposition from some politicians and civic groups in South Korea as they argued that Japan is working to expand its military power and overseas role without sincerely apologizing for its wartime atrocities decades ago.
19- Military investigators looking into the first **hacking of South Korea's cyber command intranet** said Wednesday the **suspected North Korean attackers accessed the network through a server** at the armed forces' **main information center**. The findings raised **concerns that confidential information may have been compromised** as the affected server is connected with the information systems of the **Army, Navy and the Air Force**. But the ministry said **information saved on the server system was not stolen**, reports *Yonhap News Agency*.
20- The *Times of India* reports that **terror-related violence in Jammu & Kashmir** has peaked to the highest level in past four years, with incidents up 47% and killing of terrorists witnessing a 300% spike over 2015.
21- The *Jakarta Post* reports that the **Islamic State (IS)** group's attempt to create a fully pledged wilayat or province in the southern Philippines poses a **serious security threat to Indonesia**, the Indonesian Military (TNI) has warned.

CSIS in the News/Le SCRS dans les nouvelles

1- The civil servant in charge of the government's spy-watchdog agency says Canada may have to **reconsider how it shares intelligence with the United States** if president-elect **Donald Trump** makes good on his promise to **torture terrorists to gather intelligence**. The federal official also **remarked that had former U.S. intelligence analyst Edward Snowden** worked for Canadian intelligence and leaked secrets, "**he should be shot**," but quickly backed off the opinion. **Michael Doucet**, the executive director of the **Security Intelligence Review Committee**, made the off-the-cuff remarks to a small audience in Toronto last week. An audio recording of his talk was provided to *The Globe and Mail* by a student journalist from the *Eyeopener*, a campus newspaper at **Ryerson University**, which was the venue for the talk. For 1 1/2 hours, the former intelligence analyst held forth on intelligence issues. Members of SIRC rarely make unscripted or unguarded remarks publicly because they are sworn to secrecy about their work reviewing the highly classified spying operations of the **Canadian Security Intelligence Service.** When contacted on Wednesday, Mr. Doucet acknowledged he made the comments, but said he was not expecting them to be recorded. **Should the CIA revert to practices such as simulated drowning techniques known as "waterboarding," it could cause problems for CSIS and other Canadian agencies**. Harking back to his years when he worked for Canada's signals-intelligence agency – the **Communications Security Establishment** – Mr. Doucet told the audience intelligence-sharing is vast, and alliances are important. He pointed out that in the mid-2000s, he was **CSE's embedded liaison officer at the U.S. National Security Agency.**

Canada

2- D'après *Radio-Canada - Nouvelles* - (site web), un **groupe de jeunes Québécois s'est joint secrètement aux milliers de combattants étrangers en Syrie pour lutter contre le régime de Bachar Al-Assad. Aujourd'hui, ils sont soupçonnés d'avoir commis des actes terroristes.** Nous avons découvert qui ils sont. Une dizaine d'amis se retrouvaient régulièrement dans un centre de tir de la région de Montréal pour s'entraîner avant le **départ de sept d'entre eux pour le Moyen-Orient entre l'été 2012 et l'été 2013**. Lors des séances de tir, ils prennent souvent des pauses pour prier. Plusieurs d'entre eux s'étaient convertis à l'islam. Un jour, un client aurait entendu un jeune dire qu'il était malheureux que les cibles ne soient pas des mécréants.

3- The case against an Egyptian man long **branded a terrorist threat** has been riddled with so many problems over the years that a judge should have ended the proceedings, Federal Court of Appeal heard Wednesday. Instead, his lawyer argued, Judge Edmond Blanchard **upheld the national security certificate** imposed on **Mohamed Mahjoub** despite finding the government had violated his rights, reports the *Canadian Press*. "The remedies provided in relation to the violations found by Justice Blanchard were inadequate," Mahjoub's lawyer Paul Slansky said. Mahjoub, 56, of Toronto, has been in prison or under severe restrictions since the government first decided in 2000 _ **based in part on secret evidence supplied by foreign agencies linked to torture** _ that he posed a threat to Canada's national security. Among other things, **Canada's spy agency alleged Mahjoub was a leading member** of the Egyptian terror group **Vanguards of**

Conquest, and a trusted associate of former terrorist mastermind, **Osama bin Laden** _ accusations Mahjoub has always denied.
4- D'après *Radio-Canada - Nouvelles* - (site web), un **groupe de jeunes Québécois s'est joint secrètement aux milliers de combattants étrangers en Syrie pour lutter contre le régime de Bachar Al-Assad. Aujourd'hui, ils sont soupçonnés d'avoir commis des actes terroristes.** Nous avons découvert qui ils sont. Une dizaine d'amis se retrouvaient régulièrement dans un centre de tir de la région de Montréal pour s'entraîner avant le **départ de sept d'entre eux pour le Moyen-Orient entre l'été 2012 et l'été 2013**. Lors des séances de tir, ils prennent souvent des pauses pour prier. Plusieurs d'entre eux s'étaient convertis à l'islam. Un jour, un client aurait entendu un jeune dire qu'il était malheureux que les cibles ne soient pas des mécréants.

International

United States / États-Unis

5- 'For reasons that remain unclear', *Time* reporter Michael Scherer writes in a profile of **Donald Trump**, the magazine's **Person of the Year**, Trump **still refuses** to **acknowledge** the **U.S. intelligence community's conclusion** that **(Russian) agencies** were **responsible** for stealing the Democratic National Committee and Clinton campaign emails. **"I don't believe it. I don't believe they interfered,"** Trump said. Asked if he thought the **conclusion** of **America's spies** was **politically driven**, Trump responded **"I think so."**
6- Despite making regular remarks on the campaign trail disparaging military brass, **Donald Trump's probable selection** of **retired Marine Gen. John Kelly** to **lead** the **Department of Homeland Security** would be the **third general** he's named to **top positions in his administration. "I'm concerned,"** said **Democratic Senator Chris Murphy,** a member of the **Foreign Relations Committee**. "Each of these individuals may have great merit in their own right, but what we've learned over the past 15 years is that when we view problems in the world through a military lens, we make big mistakes.". However, **Senator Thomas R. Carper**, the former chairman of the Homeland Security panel, told the *Washington Post,* that with the **selection of Kelly,** Trump has **" hit a home run with runners on base".**
7- Combing the files of the **NSA's internal news site 'SIDtoday' from 2004** which were provided by Edward Snowden, *The Intercept* described **information overload** at the **Agency,** how the **NSA trained FBI agents, enabled U.S. intervention in Latin America,** and, with the help of a gifted analyst at the Defense Intelligence Agency, learned the value of simply reading information that was already public. One document even suggests that NSA personnel routinely got dangerously chatty at restaurants near headquarters.

United Kingdom / Royaume-Uni

8- With a warning that the **terrorist threat** is **"more acute and complex"** than ever, the **British government** has drawn up a **plan** to deal with a **biological weapons attack** reports *The Times of London.*
9- Police in **Cork** are searching for **one, possibly two gunmen** who opened fire on **Aidan 'The Beast' O'Driscoll** as he walked on a city street Wednesday evening, **killing** the former **high-ranking member** of the **New IRA.** (Extensive coverage / vaste couverture).

Europe

10- **Le GCHQ britannique a espionné l'Etat hébreu tout en coopérant avec Ruffle, son homologue israélien.** On ne se méfie jamais assez de ses amis, surtout les plus proches. Officiellement, Israël et les deux agences de surveillance anglo-saxonnes les plus puissantes, **l'Agence nationale de sécurité (NSA)** américaine et son homologue britannique, **le Government Communications Headquarters (GCHQ)**, sont unis par une sacro-sainte alliance. L'été 2009 verra néanmoins pour la première fois l'organisation d'une **réunion à quatre au siège du GCHQ,**

" avec la NSA, le Centre canadien de sécurité des communications et Ruffle ", pour une mise en commun d'informations, notamment sur l'Iran et les Palestiniens. Ce partage ne va pas de soi parce qu'Israël n'appartient pas au cercle très fermé des " Five Eyes "qui ne comprend que les services anglo-saxons (Etats-Unis, Royaume-Uni, Canada, Nouvelle-Zélande et Australie) rapporte *Le Monde.*

11- Selon *Le Monde,* au sein du club très fermé des **" Five Eyes " qui réunit, depuis la seconde guerre mondiale, les services secrets techniques américains, britanniques, australiens, canadiens et néo-zélandais, le Royaume-Uni et les Etats-Unis tiennent les deux principaux rôles**. L'Agence nationale de sécurité (NSA) américaine compte 60 000 personnes, son homologue française. **Chargée d'une mission offensive et défensive, la NSA s'efforce d'avoir accès à tous les réseaux informatiques et de communication afin de collecter et de traiter en masse les données de connexions.** Elle dispose d'un budget annuel de plus de 10 milliards de dollars (9,3 milliards d'euros), supérieur à celui de la CIA. " *Le Monde* " a travaillé sur la totalité des **archives de l'ex-consultant de la NSA Edward Snowden, qui sont loin d'avoir révélé tous leurs secrets Pour beaucoup, les révélations liées aux documents extraits des archives de l'Agence nationale de sécurité (NSA) américaine par un ancien consultant, Edward Snowden, aujourd'hui réfugié en Russie, étaient de l'histoire ancienne. Il n'en est rien.** Trois ans après sa décision de dénoncer, preuves à l'appui, l'existence d'un système de surveillance construit sur la collecte massive des données de communications, il reste de nombreuses leçons à tirer du stock -**impressionnant de documents soustraits à la NSA et à son homologue britannique, le Government Communications -Headquarters (GCHQ). Comment " Le Monde " a travaillé Grâce à un partenariat exclusif avec le site d'information The Intercept , fondé, notamment, par les deux premiers destinataires des archives Snowden, Glenn Greenwald et Laura Poitras,** Le Monde a pu travailler, en 2016,
directement sur l'intégralité de ce fonds documentaire.

12- **Germany's BfV** released a statement this morning **accusing Russia** of **ramping up propaganda** and **disinformation campaigns** aimed at **destabilizing German society** reports *Reuters.* **Director Hans-Georg Maassen** is quoted as saying "we see **aggressive** and **increased cyber spying** and **cyber operations** that could potentially endanger German government officials, members of parliament and employees of democratic parties".

Africa / Afrique

13- Le **Premier ministre belge, Charles Michel, a indiqué à Alger, avoir eu avec le Premier ministre, Abdelmalek Sellal des échanges "denses et intenses sur des sujets important" dans l'intérêt du partenariat algéro-belge.** Le responsable belge estime, que "pour réaliser tout développement économique, il faut de la **stabilité et de la sécurité", relevant que l'Algérie "connait très bien c'est quoi la lutte contre le terrorisme pour avoir payé un lourd tribut" lors des années de tragédie traversée par l'Algérie** rapporte *All Africa.*

14- Selon *All Africa,* l'organisation jihadiste **Etat islamique** a perdu Syrte mais le danger de son éparpillement en Libye est plus grand que jamais.

Middle East / Moyen-Orient

15- *Asharq Al-Awsat* reports that the leaders of **Canada, France, Germany, Italy, the UK and the U.S.A.** have declared readiness to consider additional restrictive measures against supporters of Head of Syrian Regime Bashar al-Assad regarding the situation in Aleppo.

16- The *Jerusalem Post* reports that the **Shin Bet (Israel Security Agency)** recently arrested a **terrorist cell** suspect carried out several shooting attacks against the Ofra settlement in the Binyamin region of the West Bank.

17- *The National (UAE)* reports that the **Gulf States and Britain** pledged to work together to counter **Iran's "destabilising activities"** in the region as they announced a wide-ranging "strategic partnership" at the GCC Summit in Bahrain on Wednesday.

18- The *Times of Israel* reports that **Israel** was responsible for recent attacks in Syria, saying on Wednesday that they were meant to prevent **"advanced weapons, military equipment and weapons of mass destruction"** from reaching Hezbollah.

Afghanistan/Pakistan

19- The *Pakistan Dawn* reports that Adviser to Prime Minister on Foreign Affairs Sartaj Aziz on Wednesday informed the Senate that evidence was being collected regarding the role of **Indian spy Kulbushan Jadhav** in Pakistan.
20- *Pajhwok Afghan News* reports that **NATO Secretary General Jens Stoltenberg** on Wednesday said the situation in Afghanistan "is and will remain difficult and tough" but "our commitment to Afghanistan's security is strong and steadfast.

Australia, New Zealand / Australie, Nouvelle-Zélande

21- According to the *Australian Associated Press*, Prime Minister **Malcolm Turnbull** has declared terrorists should face the **"full severity of the law"** a day after a Melbourne teenager was sentenced to seven years in jail for preparing a bomb attack. A Victorian Supreme Court judge on Wednesday said the 18-year-old, who cannot be named, had "every intention" of using the partially constructed pipe bombs found in his home and the only reason he didn't go through with his plot was that he was arrested. Mr Turnbull on Thursday was asked if he thought the sentence was too lenient. The prime minister replied **that sentencing was a matter for the courts and he wouldn't comment on any particular case.** "(But) terrorist offences should be dealt with with the full severity of the law," he told *3AW*.
22- Police are using **aggressive disruption tactics** normally used on organised crime gangs to thwart a **suspected Sydney terror cell** they fear is intent on **carrying out a terrorist attack**, reports *The Australian*. State and federal detectives from the **NSW Joint Counter Terrorism Team** have been targeting a cell of about **10 young suspected extremists** operating in the southwest of Sydney. The operation, which stemmed from the arrest last month of **Mehmet Biber**, who police allege fought with an Islamist group in Syria in 2013, has been under way for several months. It is understood **Junaid Thorne**, a young preacher well known to authorities thanks to his radical sermonising, is thought to be the spiritual head of the group.

Asia / Asie

23- The *Times of India* reports that the **Twitter handles of Rahul Gandhi and the Congress** which were recently hacked were operated from five countries- Sweden, Romania, the US, **Canada** and Thailand, Delhi Police on Wednesday said.
24- The *Manila Bulletin* reports that members of the **terror cell** who planned the foiled bomb attack in Manila near the **US Embassy** last month were found to have been communicating through Facebook and other social media platforms.
25- Chinese State Councilor and Minister of Public Security **Guo Shengkun** on Wednesday met with U.S. Attorney General **Loretta Lynch** and U.S. Secretary of Homeland Security **Jeh Johnson**, the *Xinhua News Agency* reports. During his meeting with Lynch, Guo noted that China-U.S. cooperation in law enforcement has **developed steadily**.

CSIS in the News/Le SCRS dans les nouvelles

1-**The federal public safety minister is keeping the door open to the idea of Canada's spy agency crunching potentially sensitive data about innocent people**, the *Canadian Press* writes. **Ralph Goodale** told MPs at a House of Commons committee Thursday he is weighing views on whether the **Canadian Security Intelligence Service** should be allowed to retain and use such information. Last month Federal **Court Justice Simon Noel said CSIS violated the law by keeping electronic data about people who were not actually under investigation.** CSIS director **Michel Coulombe** told the committee he hoped the spy service would be in a position within about six months to decide what to do with the associated metadata collected over the 10-year period. Conservative public safety critic **Tony Clement** wondered why CSIS was keeping the data in question at all. **Coulombe said the law dictates that CSIS must hang on to any data used in criminal or administrative proceedings**. As a result, the agency is going through the material to see what it needs to keep. ``**So before we rush and destroy that information, we have to make sure that by destroying it we're not going to be contravening another court decision,'' Coulombe said.** ``**We have to take the time to do that analysis.''**

2-**Public Safety Minister Ralph Goodale has rebuked a Canadian spywatcher for publicly suggesting Edward Snowden "should be shot."** "That remark strikes me as highly inappropriate," the minister told reporters in Ottawa yesterday. He was not the only person offended. From Russia, the famous fugitive American at the centre of the comment also found it disturbing, *Globe and Mail Online* writes. **"Canadian spy, charged with keeping spies from breaking the law, wants man dead for showing spies broke law,"** read a Tweet from Mr. Snowden on his verified account. He then added wryly, "Bonus: he's mad he was recorded." When a member of the audience asked Mr. Doucet what Mr. Snowden's fate would have been had he been Canadian and leaked intelligence secrets, he replied: "**Do you want my opinion on that? Do you really want it? I'll give it to you. If Edward Snowden had worked for CSIS and did what he did, he should be shot."**

Canada

3-*CBC News* reports that **Canada has quietly imposed additional sanctions on Russian nationals over the annexation of Crimea and Moscow's ongoing support for separatists in eastern Ukraine**. The new measures, including **asset-freezing** and a **prohibition on business dealings**, were passed by the Liberal cabinet on Nov. 28 and released, without much fanfare compared with the former Conservative government, on the Global Affairs Canada website the same day. **Russian Foreign Ministry spokeswoman Maria Zakharova says her country regrets Canada's decision and "this unfriendly action" will not go unanswered.**

International

United States / États-Unis

4-President-elect **Donald Trump** is receiving an average of **one presidential intelligence briefing a week** reports *Reuters,* **far fewer** than most of his **recent predecessors**. In contrast, **Mike Pence**, Trump's vice president-elect, has been getting his own classified President's Daily

Brief at least **six days a week**. Writing in *USA Today,* **Senators Ben Cardin and Dianne Feinstein** said **Trump's apparent lack of interest** in intelligence briefings is **"particularly troubling"**.
5-The **U.S. military** believes that approximately **50,000 Islamic State fighters** (a **"conservative estimate"**) have been **killed** since the United States started battling the extremist group more than two years ago. (Extensive coverage / vaste couverture)
6-**Georgia's Secretary of State Brian Kemp** has dispatched a **letter** to **Department of Homeland Security Secretary Jeh Johnson** asking the **DHS** to **explain** what appears to be an **attempted breach** on **November 15** of the **state's computer systems** that house its **voter registration database** by someone with an **IP address associated** with the **DHS** reports the *Wall Street Journal.*

United Kingdom / Royaume-Uni

7-Delivering an **'unprecedented' speech** from **MI6 headquarters** in London, director **Alex Younger** warned a **highly organized Islamic State cell** in **Syria** is **actively planning attacks against Britain** and its **allies.** Younger indicated the **Secret Intelligence Service has infiltrated Isis** and **helped MI5** and the police to **identify** and **stop threats** to the UK and elsewhere. Younger said that the **scale** of the **threat from terrorism** is **unprecedented** and issued a warning about the **"increasingly dangerous phenomenon"** of **hybrid warfare**, such as **cyber attacks** and **propaganda operations** by hostile countries such as **Russia.**"The risks at stake are profound and represent a fundamental threat to our sovereignty," he said. (Extensive coverage / vaste couverture)

Africa / Afrique

8-*Reuters* reports there was **no immediate claim of responsibility** for a **bomb blast** at a **security checkpoint** in **Cairo** this morning which **killed six police officers** and wounded three others.
9-**International Criminal Court judges**, reports *Reuters,* have asked **South Africa** to **send representatives** to a **hearing this coming April** to determine whether it **breached its obligation** to **arrest Sudan's President Omar Al Bashir** in June.
10-Selon *Le Monde,* la **surveillance des employés permet d'accéder au réseau interne des opérateurs téléphoniques Parmi les cibles du -Government Communications Headquarters (GCHQ), l'agence de -renseignement technique britannique**, ils côtoient trafiquants d'armes, leaders politiques du Moyen-Orient et chefs de groupuscules terroristes. Leur tort? Travailler pour un opérateur de téléphonie. Un document du 10 juin 2009, intitulé " Réseau intranet Zain ", décrit les tests menés par le GCHQ sur un flux satellitaire -faisant transiter des communications internes à l'opérateur -téléphonique Zain. Basé au Koweït, il est présent dans huit pays, essentiellement au Moyen-Orient. En 2010, **Zain a vendu ses activités dans ces pays à l'indien Bharti Airtel, troisième opérateur mobile mondial. Mais, à l'époque des documents, il est très présent en Afrique et opère encore dans quinze pays, du -Burkina Faso au Niger en passant par l'Ouganda et le Tchad.**

Middle East / Moyen-Orient

11-The *Jerusalem Post* reports that the **Shin Bet (Israel Security Agency)** announced on Thursday that security forces have foiled a **Hamas plan to carry out terrorist attacks** and kidnappings in order to negotiate a prisoner swap.
12-*The National (UAE)* reports that **ISIL has called for its followers to launch attacks** on Bahrain, including on American military personnel stationed in the country ahead of a visit by the US defence secretary.

Afghanistan/Pakistan

13-The *International News* reports that the **United States** on Thursday told Pakistan they were concerned about **"safe terror havens"** being provided to the Afghan Taliban groups such as the Haqqani Network.
14-*Pajhwok Afghan News* reports that **Russia contacted Taliban** to encourage them to join the peace process in Afghanistan, the country's envoy to Kabul said on Thursday.

Europe

15-*Le Monde* rapporte que Londres et Washington aident Paris à libérer ses ressortissants et agissent, en coulisses, pour l'empêcher de payer. La France ne compte pas que sur elle-même pour libérer ses ressortissants des mains de ravisseurs à l'étranger. Elle s'appuie souvent sur les Etats-Unis et le Royaume-Uni. Mais de nouveaux documents extraits par *Le Monde* , en collaboration avec le site The Intercept montrent que cette coopération n'est pas aussi loyale qu'on pourrait le croire, malgré la sensibilité du sujet. Dans d'autres lettres internes du GCHQ les **Britanniques se félicitent de leur efficacité dans la libération d'un otage français, Antoine Falsaperla. Enlevé le 23mai 2009 au Pakistan,** il est libéré trois mois plus tard. Les services secrets français **(Direction générale de la sécurité extérieure, DGSE) ont demandé l'intervention du GCHQ pour des interceptions et des géolocalisations.**
16-**L'hébergeur français OVH, qui défend une approche libérale de la liberté d'expression, avait été tancé par l'ONU et Paris Politique ou économique, la surveillance pouvait aussi avoir un but technique C'est un pseudonyme bien connu des informaticiens. « Oles » figure dans une liste de cibles des services de renseignement britanniques,** extraite par *Le Monde*, en collaboration avec le site *The Intercept*, des archives de l'ancien consultant de **l'Agence nationale de sécurité (NSA) américaine Edward Snowden, confiées à Glenn Greenwald et Laura Poitras. « Oles », pour l'état civil, c'est Octave Klaba, le fondateur d'OVH, le plus grand hébergeur de sites Internet d'Europe.** Son adresse e-mail figure dans un document émis par les services de renseignement britannique (GCHQ), parmi d'autres « sélecteurs » – des personnes identifiées comme des cibles par les **services de renseignement américains, canadiens, néo-zélandais, britanniques et australiens, au sein de leur alliance, les « Five Eyes »** indique *Le Monde.*

Australia, New Zealand / Australie, Nouvelle-Zélande

17-The **Chinese ship assigned to search for Malaysia Airlines Flight MH370 has sailed for home**, months before completing the hunt and soon **after being exposed by security experts as probably spying on the side**. The **Australian Transport Safety Bureau** yesterday said the **Dong Hai Jiu 101** had this week stopped looking for MH370 in the southern Indian Ocean and would return to Shanghai after dropping off an underwater search robot in Fremantle. As revealed by The *Australian*, since its deployment to the MH370 project in February, **the Chinese vessel has spent very little time in the target zone actually searching for the aircraft.**
18-It took the jury just over a day to find **Ali Al-Talebi**, 27, **guilty of two counts of supplying funds to IS and one charge of knowingly making those funds available to them**, marking the first time charges of **providing material support for a terrorist group** have been tested and successfully prosecuted in an Australian court, since terrorism legislation was introduced in 2003, the *Australian Broadcasting Corporation* reports.

Asia / Asie

19-The *Press Trust of India* reports that the **Federal Bureau of Investigation** of the U.S. is set to interrogate arrested Islamic State (ISIS) and **Jamaat-ul-Mujahideen** Bangladesh (JMB) terrorist **Mohammed Musiruddin** alias Musa, an NIA official said here on Thursday.
20-The *Gulf News* reports that Philippine authorities on Thursday recovered an **improvised explosive device (IED)** in Bulacan, nearly two weeks after another bomb placed near the **US Embassy** last was discovered.

21-According to *Kyodo News*, South Korea's opposition-controlled parliament **voted to impeach** President **Park Geun Hye** on Friday over a **corruption and abuse-of-power** scandal implicating her and her longtime close friend. The motion, which needed 200 votes to pass, was approved at a plenary session of the National Assembly, with 234 of its 300 members voting in favor and 56 against.
22-North Korea on Friday **denied its involvement in a hacking attack against South Korea's military**, saying Seoul is pulling off "a childish plot" to divert public attention from its political crisis. South Korea accused North Korea this week of being behind the **first infiltration of the intranet of its cyberwarfare command** in August, noting that the Internet Protocol address linked to the attack was traced to a **location in China that was previously used by North Korean hackers**. North Korea's main propaganda website, **Uriminzokkiri**, rebuffed the claim, saying hackers never make the mistake of exposing their IP addresses or methods, which could risk revealing their identities, *Yonhap News Agency* reports.
23-According to the *Xinhua News Agency*, the third China-U.S. ministerial dialogue on fighting **cyber crimes** and other related affairs issued Thursday a list of positive fruits as the **two sides worked hard to strengthen cooperation in cybersecurity**. The dialogue was co-chaired by China's State Councilor and Minister of Public Security **Guo Shengkun** with U.S. Attorney General **Loretta Lynch** and Secretary of Homeland Security **Jeh Johnson**. During this round of dialogue, **both sides endorsed the establishment of the dialogue mechanism as beneficial to bilateral communication and enhanced cooperation,** and both regarded further **solidifying, developing, and maintaining the dialogue mechanism as beneficial to mutual interests.**

No mentions in the mainstream media / Pas de mentions dans les médias traditionnels.

Canada

1- *Radio-Canada - Télévision* (Ottawa) rapporte que des documents révèlent que des **dizaines d'agents de la Gendarmerie royale du Canada (GRC) se sont servis de bases de données policières pour chercher des informations sur la vie privée de Canadiens sans autorisation.** Selon des documents obtenus grâce à la Loi sur l'accès à l'information, de 2010 à 2015, 62 agents de la GRC se seraient servis sans permission de bases de données policières pour fouiller dans la vie privée de proches ou de citoyens. En 2015-2016, le **Commissariat à la protection de la vie privée du Canada a reçu 107 plaintes contre la GRC, incluant 12 alléguant une atteinte à la vie privée.**

International

United States / États-Unis

2- In an interview with *NPR,* CIA director **John Brennan warned against tit-for-tat retaliation** by the **U.S. government** for **Russian hacking** during the election. "I don't think we should resort to some of the tactics and techniques that our adversaries employ against us," said Brennan. "I think we need to remember what we're fighting for. We're fighting for our country, our democracy, our way of life, and to engage. And the **skullduggery** that some of our opponents and adversaries engage in, **I think is beneath this country's greatness."**
3- **Citing classified U.S. intelligence** to **support its conclusion, newly declassified passages** from a **House Intelligence Committee report** on **Edward Snowden** assert that **since arriving in Moscow** the former NSA contractor **"has had, and continues to have, contact with Russian intelligence services."** Minutes after the report was released Thursday, **Snowden's chief lawyer, Ben Wizner** called the report **"petulant nonsense." Snowden responded** it was**"rifled with obvious falsehoods"** and presented no evidence that his disclosures were made "with harmful intent, foreign influence, or harm". (Extensive coverage / vaste couverture).
4- The **U.S. government**, reports *Politico,*has quietly began **requesting** that **select foreign visitors** entering America on the **visa waiver program**, provide their **Facebook, Twitter** and **other social media accounts**, a move designed to spot potential **terrorist threats.**

United Kingdom / Royaume-Uni

5- Speaking to the *BBC,* **former MI6 director Richard Barrett** said there are **550 "really extreme potential terrorists" in Germany** and with a total of approximately **7,000 "live cases"** that's almost "an **impossible number to control"**.
6- **Four** of the **six people arrested 10 days ago** suspected of **planning a terrorist attack remain** in **custody** reports the *Independent.* The alleged **targets**, said security sources, were **one or more shopping centers** crowded in the run-up to Christmas.

Europe

7- **Italy** has announced that **"without a shadow of doubt"**, Berlin attack suspect **Amis Amri** was **killed this morning in Milan. Italian Interior Minister Marco Minniti** said Amri was was **stopped** by **two policemen** at approximately 3 a.m.local time **in front** of the **Sesto San Giovanni train station, north of Milan**. When **asked for his identification papers, Amri pulled a gun**, reportedly **yelled "Allahu Akbar"**, and **shot one of the two policemen,** lightly wounding him in the shoulder. Amri, in turn, was then **shot dead.** A rail ticket found on Amri's body indicated he had traveled by high speed train from France to the northern Italian city of Turin. He then caught a regional train to the Milan suburbs. **Italian authorities identified Amri** on the basis of **fingerprints** of the suspect **previously taken in Italy** where he served four years in prison. (Extensive coverage / vaste couverture).
8- D'après l'*Agence France-Presse,* **l'auteur présumé de l'attentat au camion-bélier de Berlin a été abattu dans la nuit de jeudi à vendredi à Milan** lors d'un contrôle de la police italienne, mettant fin à une chasse à l'homme en Europe de quatre jours. L'homme tué par la police est "sans l'ombre d'un doute" l'auteur présumé de l'attentat sur le marché de Noël de la capitale allemande, ayant fait 12 morts, à savoir le **Tunisien Anis Amri, a indiqué à Rome le ministre italien de l'Intérieur, Marco Minniti.** Son arrestation a été effectuée par une patrouille de deux policiers alors qu'il circulait de façon "suspecte" devant la gare milanaise de Sesto San Giovanni.
9- Acting on a **tip** from the **BfV**, **two brothers born in Kosovo,** ages 28 and 31, were **arrested** this morning by special forces in the **German city of Duisburg** on suspicion they planned to **bomb** the **Centro shopping mall in Oberhausen**, one of the largest shopping centers in the country. (Extensive coverage / vaste couverture).
10- **"Laughable"** was the word **Russia used** to describe an assertion by the **Lithuanian government** that the **Kremlin** is **responsible** for a series of **cyber-attacks** on its **state computer systems** during the past two years reports *Reuters.*

Africa / Afrique

11- An **Airbus carrying 118 passengers** on a **domestic flight** in **Libya** has **landed** in **Malta** after being **hijacked** by a **"pro Gaddafi" man** claiming to have a **hand grenade** reports *Reuters.*
12- Negotiations are continuing but the **Nigerian government denied** a report in the media that a **further 21** of the **kidnapped Chibok schoolgirls** have been **released** reports the *Guardian* (Nigeria).
13- Selon *Espace Manager,* (Tunisie) le terroriste, **Moez Fezzani, présumé impliqué dans les attentats du Bardo et de Sousse, sera probablement, remis aux autorités sécuritaires tunisiennes** dans un très proche avenir par l'Etat soudanais qui l'a arrêté, il y quelque temps sur son territoire. Le terroriste en question est également réclamé par la Grande Bretagne et, surtout, par l'Italie, mais il semble que les **services sécuritaires tunisiens sont les mieux placés pour le récupérer après avoir obtenu l'extradition de sa femme et ses enfants revenus à Tunis** après une escale en Egypte.

Middle East / Moyen-Orient

14- The *Times of Israel* reports that **Israeli security agents busted a 20-member Hamas cell** that was plotting suicide bombings and shootings against Israeli citizens in major Israeli cities, including Jerusalem and Haifa, the **Shin Bet** disclosed on Thursday.
15- *The National (UAE)* reports that the **Syrian army** said Thursday that it had retaken complete control of Aleppo after the **last rebel fighters were evacuated from the city**, handing President Bashar Assad his biggest victory of the war.

Afghanistan/Pakistan

16- The *Pakistan Dawn* reports that **Lt Gen Naveed Mukhtar** called on Prime Minister Nawaz Sharif, in the first such visit since his appointment as **chief of Inter-Services Intelligence (ISI)** earlier this month, a statement from the Prime Minister's Office said.

Australia, New Zealand / Australie, Nouvelle-Zélande

17- Four alleged would-be terrorists are behind bars after **police foiled a "horrendous" Christmas Day plot** in Melbourne, with authorities now confident Victorians can safely celebrate the festive season. Police allege an **Islamic State-inspired "cell"** planned to use explosives and weapons to attack Flinders Street Station, Federation Square and St Paul's Cathedral on Christmas Day. Victoria Police Chief commissioner **Graham Ashton** warned a **"substantial number"** of people could have been killed or injured in the attack, while **Australian Federal Police** commissioner **Andrew Colvin** revealed the plot concerned him **"more than any other event that I've seen"**. Three men arrested in raids by heavily armed police across the northern suburbs overnight **faced court on Friday afternoon.** A fourth man has been charged, remanded and is expected to face Melbourne Magistrates Court on Saturday morning. Two other men and a woman were arrested but released without charge, reports the *Australian Associated Press*.

Asia / Asie

18- The *Malay Mail* reports that a fugitive in India, controversial **Islamic preacher Dr Zakir Naik** is free to travel in Malaysia because he is not on the terror list here, Datuk Nur Jazlan Mohamed said. The Salafist preacher has also been banned from several countries like **Bangladesh, Canada and the UK**.

19- The *Times of India* reports that six months after the **National Investigation Agency (NIA) busted an ISIS module** in Hyderabad, the agency on Thursday filed a chargesheet against 8 members including their leader **Mohammad Ibrahim Yazdani**.

20- Hong Kong is seeking to catch up with **tougher international anti-terrorism rules** with the government **proposing legislative amendments** to fast track the **freezing of terror suspects' assets** by avoiding lengthy notification procedures, reports the *South China Morning Post.*

However, veteran Democratic Party lawmaker and security monitor **James To Kun-sun** warned yesterday of **"the devil in the details"** as he argued that **without clearly defined terms there could be hidden grey areas leading to unrelated parties being incriminated.** Under the proposed changes to the **United Nations (Anti-Terrorism Measures) Ordinance**, any person or entity would be prohibited from dealing with assets owned by a terrorist or terrorist's associate once they are gazetted under the law, unless they are under the authority of a licence granted by the security minister.

CSIS in the News/Le SCRS dans les nouvelles

1-As a **Canada's spy watchdog investigates** allegations **CSIS spied on environmental groups** — a former member says it's **not fair to call the proceedings "secret hearings."** Ex-**"Security Intelligence Review Committee"** member **Shirley Heafey** says once hearings wrap, any information that doesn't violate national security will be made public. And she says CSIS will need to prove why information **should *stay* secret**, Vancouver's *News Talk 980 CKNW* reports.

Canada

2-A lawyer who was **suspended last spring from the federal security roundtable** has just received a **letter of appreciation** from the government, reports the *Canadian Press.* In the letter, Public Safety Minister **Steven Blaney** and Justice Minister **Peter MacKay** thank **Hussein Hamdani** for his decade of work on the Cross-Cultural Roundtable on Security. There is no mention of the Hamilton, Ont., lawyer's suspension from the roundtable following a media report alleging links to extremism - accusations Hamdani flatly denies.
3-The *National Post* writes that the **Canadian government's attempt to deport two Pakistani citizens** arrested in **Toronto for terrorism is lagging**, and the lawyer for one of them said Tuesday **Pakistan was refusing to take his client back. Jahanzeb Malik and Mohammed Aqeeq Ansari** were to be deported more than a month ago, but their departure was put on hold at Pakistan's request.

International

United States / États-Unis

4-**Senior U.S. intelligence** and **law enforcement officials** have disclosed to *Bloomberg View* that the **window** for **Edward Snowden** to reach a **plea agreement** with **Justice Department is closing quickly.** Columnists Eli Lake and Josh Rogin have learned that any **momentum** for these negotiations is **gone**; Snowden's lawyers have not even had conversations about such a deal for **nearly a year** with the U.S. attorney prosecuting the case. The officials say **the chance that Snowden will be offered a plea deal** in exchange for cooperation is now **close to non-existent.**
5-**Local law enforcement agencies** are buying **cellphone-tracking equipment** that is **cheaper and smaller** than earlier systems, according to documents reviewed by the *Wall Street Journal*, but it **isn't always clear whether court orders are needed** to use the devices.

United Kingdom / Royaume-Uni

6-A **forensic analysis** by two British researchers of ***Guardian*** **laptops ordered destroyed** by **British intelligence** reveal the **GCHQ** was **very meticulous** in just how the computers, which had contained **Edward Snowden's trove of files**, be handled reports the *Washington Times.* "They were very precise," said researcher Richard Tynan. "They came in with their shopping list and said, 'Drill this chip; turn it over; drill that chip.'"

Africa / Afrique

7-**Human Rights Watch** leveled **harsh criticism** at **Egypt's new anti-terrorism law** this morning reports the *Voice of America,* saying the measure has an **overly broad definition** of what **constitutes a terrorist act** and leaves Egyptians open to stiff sentences for things that may amount to "civil disobedience."
8-*African Manager* rapporte que selon des informations tirées du quotidien Al Chourouk, **près de 300 cellules terroristes dormantes existent en Tunisie**. Les éléments de ces cellules sont répartis sur la capitale et les autres régions de la Tunisie. Près de 60% des membres de ces cellules auraient annoncé leur **appartenance au mouvement terroriste Deach**. Il appert que ces individus ont eu des **cours d'entraînement et de combat en Libye** et projettent commettre des **opérations terroristes en Tunisie.**

Middle East / Moyen-Orient

9-Yemeni Houthi leader **Abdul Malik Al-Houhi** issued directives on Sunday calling on senior commanders to **implement a state of emergency** in different parts of Yemen, including the group's northern stronghold of Saada Province, activists and residents told *Asharq Al-Awsat.*

Afghanistan/Pakistan

10-The *Gulf News* reports that in an ongoing wave of law enforcement encounters with terrorists and outlaws at least **two local commanders of Al Qaida** were gunned down and a **senior intelligence official** killed.
11-**Suspected militants on Tuesday kidnapped four judges**, including the appellant court chief, in northern Sar-i-Pul province, police told the *Pajhwok Afghan News*.

Europe

12-Light coverage / couverture légère.

Australia, New Zealand / Australie, Nouvelle-Zélande

13-The *Australian* writes that a Melbourne man, **Hassan El Sabsabi**, 24, of **Seabrook**, will stand trial for **allegedly sending thousands of dollars to an American man who travelled to the Middle East to fight with a terrorist organisation.**
14-**Canada's Prime Minister** wants to **follow Australia's lead** and make it a **crime for his nation's citizens to visit designated areas abroad that are under terrorist control**, *The Australian* writes. He has announced that if his Conservative government were re-elected, it would create a new category of **banned foreign travel zones within foreign countries where listed terrorist entities such as Islamic State operate and where they are recruiting and training followers**. The Canadian move apparently followed discussion about Australia's declared areas legislation during a meeting of the "**Five Eyes" intelligence-sharing alliance made up of the US, Britain, Australia, Canada and New Zealand.**

Asia / Asie

15-The *Times of India* reports that the **National Investigation Agency (NIA)** on Tuesday released the sketches of **two suspected LeT terrorists** who infiltrated India along with Udhampur attacker Mohammed Naveed but are absconding.
16-**North Korea** repeated its demand yesterday for **South Korea and the United States to suspend their ongoing joint military drills**, calling them a "blatant" provocation **against the North**. South Korea and the U.S. kicked off their annual joint military drills on Monday, which **Pyongyang has denounced as a war rehearsal** for an **invasion of the North**, *Yonhap News Agency* reports.
17-Police yesterday were still hunting for a **man in a yellow T-shirt** who was captured by a **security camera** putting his **backpack under a bench** at the **Erawan Shrine** and leaving the scene shortly **before the deadly bomb exploded** on Monday night, *The Nation* reports.

18-**Security experts** say Monday's deadly blast in **downtown Bangkok** does not fit the **pattern of operations of known groups in Thailand**. The groups include **southern Malay-Muslim separatists and radical political "red shirt" opponents of the military regime**, the *Straits Times* reports.

CSIS in the News/Le SCRS dans les nouvelles

No mentions in the mainstream media. / Pas de mentions dans les médias traditionnels.

Canada

1- After nearly a year and a half behind bars, a **Canadian-Libyan businessman Salim Alaradi** is scheduled to go to trial on Monday in **Abu Dhabi**, in a case that has been scrutinized by a **United Nations human-rights panel because of allegations that he was arbitrarily detained and tortured**. The **Vancouver** resident has pleaded **not guilty to three terror-related charges**, the *Globe and Mail* notes.

2- The **federal Liberals** are open to **restoring funding** for a controversial UN **agency that works with Palestinians and was cut off by the former Conservative government over its alleged ties to Hamas**, **International Development Minister Marie-Claude Bibeau** confirmed Sunday. The Liberals are eyeing a plan to provide $15-million to the Palestinian relief agency, *The Globe and Mail* reported earlier this month. But **B'nai Brith Canada**, a leading Jewish lobby group, said Sunday that it strongly opposes the resumption of funding to UNRWA.

3- *Le Journal de Montréal* rapporte que **Sami Bebawi** est généreux avec ses proches. **Accusé de fraude, corruption et blanchiment d'argent, l'ancien vice- président directeur de SNC-Lavalin** vient de **transférer une quatrième propriété à un membre de sa famille**. Le nouveau cadeau de Sami Bebawi, un condo de plus d'un demi-million $ situé dans cette tour du chemin de la Côte-Sainte- Catherine, est allé à son gendre. Cette fois-ci, c'est le gendre de l'ingénieur déchu qui profite de ses largesses. **Sami Bebawi est accusé d'avoir détourné 34 M$, selon l'accusation, notamment en pots-de-vin au régime de Kadhafi, en Libye.**

International

United States / États-Unis

4- When asked directly by *60 Minutes* whether **Isis is coming to the United States, CIA director John Brennan** replied "I think (the Islamic State) **does want to eventually find it's, it's mark here**... I'm expecting them to try to put in place the operatives, the material or whatever else that they need to do or to incite people to carry out these attacks, clearly. So I believe that their **attempts are inevitable**. I don't think their successes necessarily are."

United Kingdom / Royaume-Uni

5- The **Home Office,** reports the *Guardian,* has admitted it **holds no record** of **British citizens barred from boarding transatlantic flights** despite them being **identified** by **US security officials** as **potential threats** at UK airports.

6- **Dissident republican groups,** such as the **Provisional IRA**, are boasting they have more than a **ton** of **Semtex plastic explosive** that escaped the decommissioning process and could now be used against **mainland targets** reports the *Daily Telegraph.*

Europe

7- Selon *Le Figaro,* le 6 octobre, la **Cour de justice de l'Union européenne a déclaré illégal le système dit « Safe Harbor »** , qui régissait les transferts de données entre les États-Unis et l'Europe. Au travers de cette invalidation, la justice européenne s'est attaquée à l'empire des grandes entreprises américaines du Web, qui hébergent souvent les données de leurs clients européens dans des centres situés aux États-Unis. Trop dangereux pour la Cour, qui a rappelé dans sa décision les **révélations d'Edward Snowden sur la surveillance de la NSA**.
8- Speaking with *Euronews TV,* **Russian Prime Minister Dmitry Medvedev** said Moscow **will not pursue legal action** over the **British accusation** that the **state was complicit** in the **death of Alexander Litvinenko**. "As for any legal action, this is simply ridiculous. We don't need this and the Russian Federation will never sue any country over some **foolish fabrications** or funny films," Medvedev said.

Africa / Afrique

9- Selon *All Africa,* **deux attaques ont été perpétrées le même jour au Mali, soit à Kidal et Tombouctou**. Toutes deux rapidement revendiquées par des groupes islamistes : **Ansar Dine** d'un côté, **Aqmi** de l'autre.

Middle East / Moyen-Orient

10- The *National Iraqi News Agency* reports that **Security Advisor of the Kurdistan region, Masroor Barzani** discussed in Arbil with the **Canadian Ambassador Bruno Saccomani** developments in the war on terrorism and the Canadian aid to Kurdistan province.
11- *The National (UAE)* reports that Turkey shelled a Kurdish militia in northern Syria for a second day on Sunday and **Russia continued to heavily bomb rebel groups**, raising further doubts for a temporary truce.

Afghanistan/Pakistan

12- The *Express Tribune* reports that days after the army claimed to have busted a nexus of the top three militant outfits in Karachi by arresting their senior commanders, **intelligence agencies** on Sunday warned of **possible terror attacks** on key government officials and politicians in Karachi.
13- Afghanistan's newly appointed **ambassador to Pakistan, Omar Zakhilwal** told the *Voice of America* that he's **"very positive"** that **direct peace talks with** the **Taliban** will take place **before the end of this month** with no conditions from either side.

Australia, New Zealand / Australie, Nouvelle-Zélande

14- **Terrorism** is the defining issue of the early 21st century and it has now become an **academic discipline** with more than **5000 Australian students enrolled in anti-terrorism and cyber-security courses**, the *Age* writes. In fact, industry **demand for students with cyber-security expertise is so strong** that the master of **policing intelligence and counter-terrorism** will next year change its name, by incorporating the word **"cyber"**, to emphasise that the course offers training in **cyber terrorism, cyber intelligence and cyber warfare.**
15- *Stuff News News Zealand* writes that **Daniel Mellsop** has been named **New Zealand's next High Commissioner to Canada**. He will be based in **Ottawa** and start late February 2016. Mellsop has 15 years of experience serving New Zealand in various capacities, but the four-year High Commissioner posting in Canada will be the first time he takes the top role. Tasks on his agenda will include business promotion, hosting an ANZAC Day ceremony, discussing **Canada's role in the war against ISIS,** and tourism or education promotion.

Asia / Asie

16- **Abu Sayyaf bandits** are demanding P1 billion for the release of **three foreigners** and the Filipino woman they kidnapped in September last year. **Senior Supt. Roberto Fajardo,**

National Police Anti-Kidnapping Group (AKG) commander, said the victims were abducted on Samal Island, Davao del Norte. Norwegian Kjartan Sekkingstad and **Canadians John Ridsdel and Robert Hall**, and Hall's Filipino girlfriend Maritess Flor were **still being held by the bandits in a still-undisclosed area in Sulu**, the *Business Mirror* reports.
17- **China** won't take part in any coalition **fighting "terrorist groups" in the Middle East**, but will do its fair share in its own way and is **already helping Iraq**, Foreign Minister Wang Yi said. China wants to **develop deeper defence and anti-terrorism ties with the Arab world**, including **joint exercises, intelligence sharing and training**, the government said in a policy document released last month, *Reuters* reports.
18- **Beijing's top representative in Hong Kong** has blamed **radical separatists** for riots that erupted in the Chinese-ruled city almost a week ago, the worst violence since pro-democracy protests paralyzed parts of the Asian financial center in 2014, *Reuters* reports.
19- **North Korean hackers** sent massive amounts of **spam emails to South Korean public organizations** last month, **South Korea's police chief** said today, the latest in a series of **cyberattacks against the South** in recent years, *Yonhap News Agency* reports.
20- The **No. 1 challenge the United States** is facing right now is how to cope with **threats posed by North Korea and China**, Republican presidential runner Marco Rubio said. Rubio made the remark during a Republican presidential candidate debate Saturday night, putting the **North Korean issue** ahead of Middle Eastern problems and tensions with Russia, *Yonhap News Agency* reports.

Americas / Amériques

21- **U.S. State Department cables** obtained by the advocacy organization **Judicial Watch**, provide evidence that **al Qaeda leader Adnan G. el Shukrijumah**, who was **killed by Pakistani forces** in **2014**, **hid in 2004** with two Arab militants in the **northern Mexican border town of Agua Prieta** just across from **Douglas, Arizona** reports the *Miami Herald.*

CSIS in the News/Le SCRS dans les nouvelles

1- Two days after a terrorist killed a soldier at the National War Memorial and ran into the Parliament Buildings, **Dwayne Boissoneau** logged into **Twitter** to **offer himself up to the Islamic State of Iraq and the Levant**. "Hey brother, I'm ready to fight and support ISIS till death," Boissoneau, 30, wrote to a Canadian ISIL member in Syria who uses the alias **Abu Turaab al-Kanadi**. "I'm a Canadian and I'm sick of the face (fake) politics here." ISIL recruiters apparently believed they had found what they were looking for: a Canadian extremist willing to do what **Michael Zehaf-Bibeau** had done in Ottawa, a simple but headline-grabbing strike from within. They sent him a message on Twitter that said, "Who wants to do something to some top kaffirs (non-believers)?" They said they could get addresses. "Give me Canadian addresses," Boissoneau responded. "I will ensure something happens." The exchange was detected by the **RCMP's Tactical Internet Operational Support Unit** and Boissoneau was arrested for uttering a threat. But the judge who heard the case last month found he was not really a terrorist after all. According to the judge's decision, the man ISIL was trying to recruit is a low-toaverage functioning First Nations man from Longlac, Ont., who suffers from a **childhood brain injury and Fetal Alcohol Spectrum Disorder**, and who did not attend high school. After Boissoneau's arrest, he told police he'd never actually met a terrorist in person and "wasn't that serious about going down there." He said he was going through a rough time and just wanted to **"test the system"** to find out if the **Canadian Security Intelligence Service "can actually detect stuff like that**."

Canada

2- The **RCMP** spent just over **$900,000 in overtime pay** over the course of a five-month undercover operation that led to the arrests of two terrorism suspects in British Columbia. Documents obtained by *The Canadian Press* through a freedom-of-information request show the Mounties paid at least 200 people, mostly police officers, $911,090.54 for overtime work during the investigation, which was code named **Project Souvenir**. The operation culminated in the arrests of common-law spouses **John Nuttall** and **Amanda Korody** on July 1, 2013. They were found guilty last summer of plotting to blow up the B.C. legislature on that Canada Day.

3- A Canadian media outlet squares off against the government Monday in a legal battle that pits media freedoms against the ability of police to investigate terrorism offences. *Vice Media* and its journalist **Ben Makuch** want Ontario Superior Court to quash an order that they hand over **material related to their interviews with a suspected terrorist to the RCMP**, writes *The Canadian Press*. "Courts should be wary of allowing the state to conscript journalists as investigative arms of the police," *Vice* and Makuch state in their factum. A year ago, Ontario court Judge **Jack Nadelle** ordered the online news outlet to hand over materials that Makuch used to produce three articles in 2014 about **Farah Shirdon**, of Calgary, including that he had left Canada to fight for Islamic State. The stories were based on conversations Makuch had with Shirdon via an online instant messaging app called Kik Messenger.

4- *La Presse canadienne* rapporte que le **gouvernement libéral de Justin Trudeau a tranquillement commencé à recueillir des renseignements au sujet des drones** qu'il souhaite

acheter pour les **Forces armées canadiennes** et s'attend à ce que l'industrie de l'armement lui revienne avec des propositions d'ici la mi-avril.

International

United States / États-Unis

5- **NSA deputy director Rick Ledgett** told Washington's *WTOP Radio* that **U.S. intelligence** has **hard proof** that **almost 1,000 foreign intelligence targets**, including terrorists tracked by the U.S., have **changed their communications methods** because they were tipped off by **Edward Snowden's leaks.**

6- **Secretary of Defense Ashton Carter,** reports the *Los Angeles Times,* will **visit a Pentagon outpost** in the heart of **Silicon Valley**, speak at a cyber-security conference in San Francisco and go to **Microsoft** and **Amazon headquarters** in Seattle **this week** to highlight the risks of **cyber-attacks** and the need for **greater digital cooperation** with the Pentagon.

United Kingdom / Royaume-Uni

7- Concerned about several **privacy** and **surveillance** provisions contained within the **Investigatory Powers Bill**, a revolt **against** the legislation by **Conservative backbenchers** is anticipated reports *The Times of London.*

8- *The Times* is also reporting that the **National Crime Agency** is complaining that **technology companies** are **routinely blocking law enforcement requests** for **communications information** in serious cases such as the importing of firearms, human trafficking, fraud and **money laundering.**

Europe

9- Selon *Le Monde,* si la **DGSI ne manquait pas d'informations sur les tueurs de " Charlie Hebdo ", elle n'a pas su les analyser** L'abondance des données collectées sur les **frères Kouachi** entre 2010 et 2013 confirme que ces deux " objectifs " ont fait l'objet d'un travail sérieux en raison de leur connexion établie avec " la mouvance terroriste " . La défaillance se situe ailleurs, dans l'analyse qui a été faite de ces informations. **Après deux ans d'écoutes, la DCRI met un terme au suivi** des frères Kouachi au motif qu'il n'a pas permis de " détecter d'éléments relatifs à la préparation d'une action violente " ni " de matérialiser des éléments permettant l'ouverture d'une enquête -judiciaire " . **Ces deux arguments soulignent les limites du système français.** La DGSI est une agence hybride, à la fois service de renseignement et de police judiciaire. L'arrêt de la surveillance des Kouachi au motif qu'elle n'a pas permis l'ouverture d'une enquête est révélateur de ce mélange des genres : la mission judiciaire de la DGSI a pris le pas sur le renseignement pur, la matérialisation d'une infraction sur l'interprétation des signaux faibles.

10- *Le Soir,* (Belgique), se demande si **l'enquête menée sur Salah Abdeslam en 2015 a-t-elle été menée dans les formes?** Le 7 mars, **le Comité P** se penchera à huis clos sur la manière dont les **services de renseignement et la police ont alors travaillé**. Au lendemain de l'assaut de Verviers, qui a débouché le 15 janvier 2015 sur la mort de deux djihadistes, **Sofiane Amghar et Khalid Ben Larbi, les policiers molenbeekois, se sont intéressés aux Abdeslam. Salah et Ibrahim ont été auditionnés.** S'étaient-ils radicalisés ? Comptaient-ils partir en Syrie pour se battre dans les rangs de l'Etat islamique, comme on le prétendait alors dans le quartier ? **Auditionné le 28 février, Salah Abdeslam ne lâchera rien, sinon que lui et son frère connaissent Abdelhamid Abaaoud**.

11- A comprehensive study of **31 European countries** by the **Royal United Services Institute, Chatham House**, the **Institute for Strategic Dialogue** and the **University of Leiden** in the Netherlands reports the *Guardian* (UK), has concluded while **Islamist plotters** are given **full**

attention, individuals and small groups of **right wing extremists** are in fact **more lethal**, **almost as numerous**, and **much harder to detect by security services**.

Africa / Afrique

12- **Security** has been **beefed up** in **major airports** in **Kenya** following intelligence reports on Sunday evening of **impending attacks** by **al Shabaab** reports the *Star* (Kenya).
Isis has used **female fighters** and a **woman suicide bomber** in **western Libya** reports *The Times of London,* a **first** for the jihadists.
13- Selon *Yabiladi.com*, (Maroc), **l'armée algérienne a procédé à l'arrestation de neuf Marocains soupçonnés de vouloir rejoindre Daesh en Libye, indique le ministère de la Défense** dans un communiqué relayé par la presse locale.

Middle East / Moyen-Orient

14- *Al Jazeera* reports that the **Canadian government's plan to repeal citizenship-revocation laws** has been welcomed by civil liberty groups in the country.
15- *The National (UAE)* reports that gunmen killed **Col Adham Mohammed Al Ga'ari, Aden's deputy chief of intelligence** in the latest assassination targeting high-ranking officials in Yemen's southern port city.
16- While the UN **Security Council approved the "cessation of hostilities"** agreement in Syria which came into effect at midnight yesterday, a White House official told *Asharq Al-Awsat* about the details of a plan B that the United States has talked about in the event that the truce failed.

Afghanistan/Pakistan

17- The *Pajhwok Afghan News* reports that an arms depot containing **"Iranian-made"** ammunition and explosives has been discovered in central Bamyan province, an **intelligence official** claimed on Sunday.

Australia, New Zealand / Australie, Nouvelle-Zélande

18- The number of **Australians** being **hauled off planes by counter-terrorism units on national security grounds has risen to an average of almost two a day**, it has been revealed. And in a trend that is of concern to **security and intelligence agencies**, the number of those among them suspected of trying to reach the **Middle East and join terrorist groups is also on the rise**. Figures obtained by *The Courier-Mail* reveal that since the **counter-terrorism units (CTUs)** were deployed to major airports in August 2014, there had been 652 "offloads". **ASIO Director-General Duncan Lewis** told a Senate Estimates hearing the number of passports being cancelled was also "ticking" up every day.**The number is now more than 160.**
19- Almost **half a million dollars in cash** has been seized at **Melbourne airport** in three weeks amid suspicions of **links to the financing of terror groups**. The *Courier Mail* writes that a combined taskforce of Australian law enforcement officers detected more than $400,000 in undeclared excess currency at customs late last year and the seizure of items, including one crossbow and two electronic shock devices.

Asia / Asie

20- **China's ruling Communist Party** has **expelled two senior officials** in the **violence-prone far western region of Xinjiang for corruption** and transferred them to prosecutors, an **anti-graft watchdog** said. **China** has jailed dozens of senior officials since **President Xi Jinping** launched a sweeping campaign against deep-seated graft after assuming office three years ago. In June, authorities announced an investigation over **serious discipline violations**, a euphemism for **corruption**, into **Alimjan Maimaitiming**, 56, a **former secretary general in the government of Xinjiang**, home to many of **China's ethnic Muslim Uighurs**, *Reuters* reports.

21- An **American student held in North Korea** since early January was detained for trying to steal a **propaganda slogan** from his Pyongyang hotel and has confessed to **"severe crimes" against the state**, the **North's official media** said today, *Reuters* reports.
22- The *Press Trust of India* reports that **Delhi Police** is likely to rope in **cyber cell** to trace the numbers from which CPI(M) general secretary Sitaram Yechury claimed to have received multiple threat calls and messages and will take strict action, a senior officer said on Sunday.

CSIS in the News/Le SCRS dans les nouvelles

1-In an *Ipolitics* op-ed, Michael Harris writes: When **Ralph Goodale** and **David McGuinty** headed to the UK and France last January to get ideas about overseeing national security issues in Canada, it seemed like an intelligent thing to do. But did our public safety minister and his MP colleague go to the wrong place? The Liberals, after all, are trying to amend **Bill C-51**, a controversial piece of anti-terrorism legislation that Canadians don't like. No wonder. What's to like about a government—sanctioned police state law? Under Harper-era legislation, the **Canadian Security Intelligence Service (CSIS)** was empowered to operate outside the Charter of Rights, which gave it authority to violate citizens' constitutional rights. And Canada's cyber intelligence agency, the **Communications Security Establishment (CSE)** was allowed to conduct mass collection of information on Canadians without a specific target. Based on their attitudes towards mass surveillance, Britain and France are hardly the countries to help Canada rein in the excesses of Bill C-51. According to a **YouGov survey** of 15,000 people reported this week by **Amnesty International**, citizens of Britain, France and the Philippines were most comfortable with government eavesdropping. Britain was one of three countries out of 13 surveyed where more people favoured surveillance of all people — British citizens, foreigners, and foreign countries, than favoured monitoring none of them.

2-It was supposed to be **Prime Minister Justin Trudeau's** weak point, but according to an **Angus Reid Institute survey**, Canadians think his **Liberals are doing a good job handling national security and terrorism -** and his plans to amend the Conservatives' controversial **antiterror bill appear to have found a political sweet spot,** *the Globe and Mail* writes. The law widened the definition of **national security threats**, **expanded sharing of information held by government departments**, and gave **the Canadian Security Intelligence Service broad new powers to disrupt threats and even, with a judge's warrant, break the law**. And while they rate the Liberals highly on dealing with terrorism, respondents disagree with a symbol of Mr. Trudeau's approach: the move to repeal the Tory bill that strips Canadian citizenship from convicted terrorists.

Canada

3-*TVA Nouvelles* rapporte qu' **Adil Charkaoui doit comparaître aujourd'hui à Montréal pour faire face à des accusations de voies de fait et d'agression armée** à la suite d'une altercation avec un agent de sécurité du Collège de Maisonneuve. S'il est reconnu coupable, il risque quelques mois de prison ou une amende.

4-A British Columbia man convicted in the **Air India bombing deaths of 331 people has been denied his request to participate in political matters.** "Your associations with others of a similar mindset were directly risk-related and led to the murders of many innocent people," the Parole Board of Canada said in a ruling against **Inderjit Singh Reyat**. The board said in its decision released Thursday that it considered comments by Mr. Reyat's lawyer about his client's rights under the charter to participate in political issues. Mr. Reyat became eligible for statutory release in January after serving two-thirds of his nine year sentence for perjury at the trial of two other men charged in Canada's worst mass murder 30 years ago. The board also imposed a second

condition for Mr. Reyat to not associate with anyone involved in political or criminal activity or extremist views, reports the *Canadian Press*.

International

United States / États-Unis

5-He has no doubt **more Snowden documents** will be **released** but **NSA deputy-director Rick Ledgett** told *NPR* that the **classified information** contained therein is **getting old,** technology is changing fast and the **Agency has adapted** to these **changes.**
6-**"We get that," Apple CEO Tim Cook** mused to *Time Magazine* on the fact that **encryption** can **protect terrorists** as well as law abiding citizens. "**But you don't take away the good for that sliver of bad**. We've never been about that as a country. We make that decision every day, right? There are some times that freedom of speech, we might cringe a little when we hear that person saying this and wish they wouldn't. This, to us, is like that. It's at the core of who we are as a country."

United Kingdom / Royaume-Uni

7-Statistics from the **Home Office** reveal a **record number (16)** of **teenagers** under the age of 18 were **arrested** for **terrorism offenses last year**, up from **10** in 2014. Additionally, reports the *Daily Telegraph,* the number of **females** detained **increased by 50 per cent** to 45 in 2015.

Africa / Afrique

8-Once focused on **taking hostages** for **ransom** and **striking military targets** in **West Africa, al Qaeda** has switched its strategy in the region to **'soft targets'** reports the *Los Angeles Times.* "It's almost a symbolic reminder that this is a **serious force** to be reckoned with," said **Paul Rogers, a terrorism analyst** at the University of Bradford in England, describing al Qaeda's recent attacks and its fight for relevance. "It doesn't have the capacity to take on military forces head on, so it's **concentrating on soft targets with high impact."**
9-Selon *l'Agence de Presse Africaine,* **AL-Qaïda au Maghreb Islamique (AQMI) a publié des photos qu'elle attribue aux trois auteurs de l'attaque terroriste.** Dans un communiqué rapporté par l'Agence de surveillance des sites islamiques (SITE), AQMI a affirmé que les deux premiers auteurs des attaques, qui ont fait 19 victimes selon un dernier bilan, sont **Hamza Al-Foulani et Abou Adam Al-Ançari du groupe Al-Mourabitoune, dirigé par Mokhtar Belmokhtar** et le troisième auteur, **Abderrahmane Al-Foulani de l'Emirat du désert, dirigé par Abou Al-Ahamam.**
10-*African Manager* rapporte que mercredi soir à **Béja en Tunisie, une patrouille de la police a fait une descente musclée dans la Grande mosquée** située au centre de la ville, après avoir encerclé le bâtiment. **Cinq suspects ont été cueillis dans la mosquée par les éléments de la sécurité**. D'après les informations recueillies, la même source indique que **deux d'entre eux étaient recherchés par la brigade de lutte contre le terrorisme d'El Gorjani alors qu'un autre individu est interdit de voyage.**

Middle East / Moyen-Orient

11-The *Jerusalem Post* reports that **Meir Dagan, head of the Mossad from 2002-2011**, died on Thursday at the age of 71 following a long battle with cancer.
12-The *Fars News Agency* reports that over **4,000 Saudi mercenaries, including 178 commanders**, have been killed during the year-long Riyadh-led war against Yemen, a **Yemeni intelligence source** said on Thursday.

Afghanistan/Pakistan

13-The *Pakistan Dawn* reports that the **Pakistan Foreign Office** said that efforts to arrange direct talks between the **Afghan government and Taliban** were continuing despite insurgents' refusal to participate in the dialogue.
14-The *Pajhwok Afghan News* reports that a **senior intelligence official** on Thursday said the **Islamic State or Daesh militants** would likely to look for finding a hideout in eastern Kunar province after being wiped out from Nangarhar province.

Europe

15-Une **directive relative à la lutte contre le terrorisme dans l'Union européenne est actuellement en préparation**, précise *Le Figaro*. Le 14 mars dernier, elle a fait l'objet d'un consensus au sein du Conseil « justice et affaires intérieures » qui réunit les ministres de la Justice et de l'Intérieur de l'Union.
16-Le **frère du meurtrier jihadiste Mohamed Merah, Abdelkader, va faire appel de son renvoi devant une cour d'assises spéciale pour complicité dans les sept assassinats commis en 2012 dans le sud-ouest de la France**, a annoncé vendredi son avocat Eric Dupond-Moretti à *l'Agence France-Presse*. "Abdelkader Merah n'a jamais été le complice de son frère" dans la préparation et la commission des tueries de mars 2012, a déclaré Me Dupond-Moretti. "Il a pris des positions radicales. Si on considère que tous les radicaux sont très dangereux, il faut tous les enfermer", a ajouté l'avocat.
17-**Markus Reichel,** the **former BND employee** found **guilty** of furnishing **classified documents** to the **CIA** and **Russian intelligence** on the grounds he was bored at work, has been sentenced to **eight years** in prison (Extensive coverage / vaste couverture).
18-**Swedish intelligence** (Sapo) has accused the **Russian state** of using a **compliant news media**, "a loyal tool" for **propaganda purposes**. In its reporting of the story, ***Sputnik*** dismissed the charge as **'baseless'.**
19-The **Danish government's plan** to **re-introduce** the **mass collection of data** on residents' internet use has been **dropped** after an analysis showed that it would cost upwards of **one billion kroner** ($197 million Cdn,) reports *The Local*. **Justice Minister Søren Pind** said that he would go back to the drawing board to find a **new way to monitor online activity.**

Australia, New Zealand / Australie, Nouvelle-Zélande

20-A **collective of hackers** that claims to have **taken down thousands of social media accounts used by Islamic State supporters** has warned of a **disproportionate number belonging to Australians**. **Ghost Security Group** also says that while the death of a **British hacker** and jihadist linked to plots to attack **Western targets** had dealt a blow to Islamic State's cyber operations, it is only a matter of time before they **recruit more skilled operatives**, the *Australian Associated Press* writes.

Asia / Asie

21-*The Hindu* reports that an **intelligence alert** from Pakistan about 10 terrorists sneaking into India sent the **security establishment** into a tizzy.
22-**South Korea's military** said it suspects **North Korea** fired a **second missile** this morning, after the **North** earlier **launched a ballistic missile that flew about 800 km** (500 miles) and into the sea **off its east coast**, *Reuters* reports.
23-**North Korea** appears to be **continuing efforts to develop a submarine-launched ballistic missile**, a U.S. website monitoring the communist nation said yesterday. The website **38 North** said, citing **recent satellite imagery of the North's Shinpo South Shipyard**, that the North is **believed to be forging ahead with development of the KN-11 SLBM**, also known as **Bukkeukseong-1**, as well as a **Gorae-class experimental ballistic missile submarine**, *Yonhap News Agency* reports.

24-**China** expressed **its opposition** yesterday (17/03) to **unilateral sanctions against North Korea** saying they could raise tension, after the **United States** imposed new curbs on the isolated country in **retaliation for its nuclear and rocket tests**. US President Barack Obama on Wednesday imposed sweeping **new sanctions on North Korea** intended to further isolate its leadership after recent actions seen by the United States and its allies as provocative, *Reuters* reports.

Americas / Amériques

25-Ahead of President Obama's visit to Argentina next week, reports *Reuters,* the **United States** announced it will **declassify** military and **intelligence documents** related **Argentina's 1976-83 'Dirty War',** the seven-year period when a military dictatorship cracked down on left-wing opponents.

CSIS in the News/Le SCRS dans les nouvelles

1- **Canada is not at war with ISIS**, but **security and intelligence forces need special powers to fight the "sophisticated" terror group**, says the outgoing security adviser to the prime minister. **Richard Fadden**, who announced his retirement last week after nearly 40 years of public service, told *CBC Radio's As It Happens* that **ISIS does not pose an "existential" threat to Canada**, but it is accomplishing its prime objective of breeding terror. Military personnel deployed in Syria and Iraq may feel like they are fighting a war, but Fadden said that is **not the perspective of Canada's security intelligence agencies**. **"I think people would think we are fighting a very, very serious situation that requires a great deal of attention and probably some new powers and resources. But I think most of my colleagues would say no, it wasn't war,"** Fadden told host **Carol Off**. Prime Minister **Justin Trudeau** has faced sharp criticism for similarly rejecting the label "war." He said the word suggests the fight can be won by one side or the other, and in this case there is no path for ISIS to win against the West. Fadden added that constitutionally a war is formally declared by the Queen or her representative, the Governor General. Last month, **CSIS** director **Michel Coulombe** revealed that **agents have used new powers to disrupt suspected terrorist threats nearly two dozen times since last fall.** In the wide-reaching interview, Fadden also said **he does not believe the fast-tracked process to bring 25,000 Syrian refugees into Canada presented significant security risks, because equivalent checks were put in place.**

Canada

2- Canada's top general says there's **no end in sight in the battle against ISIS**, and Canadians should **prepare for news of casualties now that Canada has stepped up its mission on the ground in Iraq and Syria.** Gen. **Jonathan Vance** made the comments in a wide-ranging interview with **Rosemary Barton**, host of *CBC News Network's Power & Politics*, when asked if victory against ISIS should be expected soon. "I don't think it's in sight, I think we are thinking through the problem, we understand more and more and when you say ISIS, or ISIL or Daesh, it comes in many forms," Vance said. While the general said he was **confident all the right steps were being taken to eventually defeat ISIS** in Iraq, action also **had to be taken socially and politically to oppose the organization**. "There is a wider effort in the counterterror world that needs to work at defeating this across the board, including countering the messaging seeking those root causes and trying to incentivize people to either leave the fight or not go in the first place," Vance said.

3- Menacé de recevoir une «balle entre les deux yeux», **Haroun Bouazzi**, le **porte-parole d'une association québécoise de musulmans a porté plainte à la police de Montréal** et affirme craindre pour sa sécurité, rapporte le *Journal de Montréal.*

4- Un bref reportage dans *Le Droit* souligne qu'un peu plus d'un an après son arrestation pour des **allégations de terrorisme**, un Ottavien de 22 ans tente à nouveau d'obtenir sa liberté provisoire en attendant la suite de son procès. **Suliman Mohamed** est placé en détention préventive depuis janvier 2015. La Gendarmerie royale du Canada l'a interpellé après l'arrestation des jumeaux **Carlos et Ashton Larmond**, dans la même semaine. Les trois suspects se connaissent.

International

United States / États-Unis

5- The *New York Times* reports that a **"foreign fighter surge team" of experts from the F.B.I., the State Department and the Department of Homeland Security** met with their **Belgian counterparts a month before the Brussels terrorist attacks** to try to correct gaps in Belgium's widely criticized ability to track terrorist plots. **Andrew M. Liepman**, a former deputy director at the **National Counterterrorism Center** who is now a senior policy analyst at the RAND Corporation, said there were dual challenges ahead for European Union countries to overhaul their internal security bureaucracies as well as to enhance cooperation and intelligence-sharing among themselves. Some countries, like Germany and the Netherlands, take the need to share seriously, Mr. Liepman said. Others share a common language that engenders trust, most notably the so-called **Five Eyes** countries: the United States, Britain, Australia, **Canada** and New Zealand.

6- Writing in *The Intercept* on the release of the **Panama Papers**, **Glenn Greenwald** states: "The key revelation is not the illegality of the specific behavior in question but rather the light shined on how our political systems function and for whose benefit they work. That was true of the **Snowden leak**, and it's true of the Panama Papers as well."

7- *Reuters* reports that **Jhon Jairo Cruz Trejos**, a Colombian who pleaded guilty to U.S. narcotics charges stemming from a probe that began with him trying to help a **paramilitary group get uranium for a "dirty bomb"** to attack the **U.S. embassy in Bogota** was sentenced to 13 years in prison.

United Kingdom / Royaume-Uni

8- *The Independent* reports that **ISIS supporters have released a new video calling for terror attacks in London, Berlin and Rome** against a backdrop that suggests the terror group's propaganda machine may be in crisis.

9- Britain's biggest Islamic sect allowed a **militant linked to al-Qaeda to tour dozens of mosques on a jihadist recruitment drive** that spawned terror plots and murders, the *UK Times* reports. Senior representatives of the **Deobandi** sect, a supposedly moderate movement that controls almost half of Britain's 1,600 mosques, hosted the extremist cleric Masood Azhar during a 30-day visit in which hundreds of young Muslims were urged to seek weapons training at terrorist camps in Pakistan.

Europe

10- **François Sénémaud,** Directeur du renseignement à la direction générale de la **sécurité extérieure (DGSE) du ministère de la Défense depuis 2012,** a été nommé **ambassadeur de France auprès de la République islamique d'Iran**, rapporte *Acteurs Publics*.

11- **Turkey's Interior Ministry** has updated its list of "wanted terrorists" to include 23 **Islamic State of Iraq and the Levant (ISIL)** militants following the jihadist organization's twin suicide bombing in the country's capital on Oct. 10, 2015, *Hurriyet Daily News* states. The government has offered rewards of more than 42 million Turkish liras (more than $14 million) for any information leading to the suspects' capture.

Africa / Afrique

12- Mali President **Ibrahim Boubacar Keita** on Monday declared a **state of emergency** across the entire national territory for a period of 10 days, *Xinhua News Agency* reports. The imposition of a state of emergency was decided upon during a special cabinet meeting presided over by the president. "This state of emergency that follows the previous one that ended on March 31, was declared due to the **prevailing security situation in Mali** and the sub-region which is

characterized by **constant terrorist threats**," said a statement from the cabinet. Malian authorities said the state of emergency that ended on March 31 enabled security forces to arrest suspects and impound vehicles.
13- President **Uhuru Kenyatta** met his French counterpart **Francois Hollande** on Monday, the first State visit by a Kenyan leader to France in the past 14 years. President Hollande said the **European Union** as a whole **needs to support AMISOM's fight in Somalia** following an announcement that it would be cutting its funding to the troops in a couple of months. "We have no choice but to work together because terrorists now know no borders... so why should we?" he posed at a press briefing following bilateral talks with President Kenyatta at the Presidential Palace on Monday evening. Kenya's Foreign Affairs Cabinet Secretary **Amina Mohamed** had earlier told *Capital FM News* that the threatened cuts had been one of President Kenyatta's motivations for visiting France.
14- Après **l'attaque terroriste de Grand-Bassam**, une banlieue abidjanaise dont le cerveau et les supposés auteurs sont des maliens, la crainte de représailles contre la communauté malienne vivant en **Côte d'Ivoire** devient de plus en plus persistante, rapporte *l'Humanité*.

Middle East / Moyen-Orient

15- *Gulf News* reports **that three men charged with setting up an affiliate of the Lebanon-based Hezbollah group in the UAE** were sentenced to six months in prison to be followed by deportation, the Federal Supreme Court ruled on Monday. The men, **Canadian Lebanese Suhail Naif Gareeb**, 62; Lebanese Asa'd Ameen Qansouh, 66; and Ahmad Ebrahim Qansouh, 30, were found guilty of setting up an office of the militant group in the UAE and carrying out commercial, economic and political activities without licences, the court presided over by judge Falah Al Hajeri ruled.
16- According to *Reuters*, **Iran has sent commandos to Syria as advisers**, a military official said on Monday, suggesting it is using its army as well as paramilitary forces to help President Bashar al-Assad's forces in the country's civil war.
17- **Global military spending rose in 2015 to nearly $1.7 trillion**, the first increase in several years, driven by conflicts including the battle against the Islamic State group, the Saudi-led war in Yemen and fears about Iran, a report by the the **Stockholm International Peace Research Institute** shows, the *Associated Press* states.

Afghanistan/Pakistan

18- "**Afghanistan is high on our agenda**. Afghanistan is our biggest military operation ever," **NATO Secretary General Jens Stoltenberg** told reporters on Monday after his meeting with U.S President Barack Obama, *Tolo News* reports. "It shows the importance of unity in North America and Europe, because our military operation in Afghanistan is a direct response to the terrorist attack against the United States on 9/11. And European, **Canadian soldiers** have fought together with the American soldiers in Afghanistan for many, many years," he said.
19- A **suicide bomber** on a motorbike detonated his explosives near a busy bazaar in Afghanistan's northern Parwan province this morning, **killing at least six people**, officials said, the *Associated Press notes*.

Australia, New Zealand / Australie, Nouvelle-Zélande

Light coverage / couverture légère.

Asia / Asie

20- According to the *Yonhap News Agency*, North Korea has **strengthened its surveillance of its people in areas bordering China** to crack down on those contacting defectors in **South Korea** ahead of its key party congress, sources said Tuesday. The **Ministry of State Security**, the North's intelligence agency, has sent a letter expressing its strong allegiance to North Korean

leader **Kim Jong-un**, according to the sources familiar to North Korean affairs. In the letter, the ministry pledged in March to beef up its surveillance along the border as the **Workers' Party of Korea** is preparing to hold its first party congress in more than three decades in May. "The North is trying to strengthen its control over people in the border areas on the grounds that internal information in North Korea has leaked to the South Korean media," a source said.

21- North Korea's continuing attempts to jam South Korea' Global Positioning System (GPS) may be aimed at **disrupting the navigation systems of aircraft**, government officials said as the communist country continued to send jamming signals on Tuesday. In a provocative operation that started in late March, North Korea has been **sending GPS-jamming signals across the border**. The signals began last Thursday and continued on and off into Tuesday, according to military and information and communication technology (ICT) sector officials, reports *Yonhap News Agency*. "An assessment showed that North Korea's near daily GPS-jamming activity seems to be **targeting aircraft's navigation equipment**," an intelligence source said, asking not to be named.

22- *Kyodo News* is reporting that top nuclear envoys of Japan and China agreed Tuesday to **coordinate closely to implement sanctions** on **North Korea**, which were decided by the U.N. **Security Council** in response to **Pyongyang's pursuit of nuclear and missile programs**, the Chinese representative told reporters. **Wu Dawei**, China's special representative for Korean affairs who doubles as the chairman of the long-stalled six-party negotiations aimed at ending North Korea's nuclear weapons program, also said he exchanged views on the resumption of the multilateral talks in his meeting with **Kimihiro Ishikane**, director general of the **Foreign Ministry's Asian and Oceanian Affairs Bureau**, in Tokyo. Tokyo is cautious about restarting the six-party talks, which involve the two Koreas, China, Japan, Russia and the United States.

23- According to *The Times of India*, the The Bombay High Court on Monday **refused to grant bail to alleged ISIS recruit Areeb Majeed** who has been behind bars since November 2014. The HC dismissed an appeal he had filed to challenge denial of bail last May by a special court presiding over cases probed by **National Investigation Agency** (NIA).In November 2014, NIA supervised Areeb return to India from Istanbul. NIA said the Panvel college student had decided to join the extremist outfit ISIS along with three other friends in May 2014 and even went on a pilgrimage for eight days, after which they parted ways to participate in unlawful activities in Iraq and Syria.

Americas / Amériques

24- Panamanians have long shrugged off their country's checkered reputation as a financial haven for drug lords, tax dodgers and corrupt oligarchs. If they're crooks, they've learned from the world's wealthy nations, they like to joke. That same defensiveness has re-emerged amid the fallout from the leak of 11.5 million confidential documents from the Panama-based law firm **Mossack Fonseca** revealing details of how some of the globe's richest people **funnel their assets into secretive shell companies** set up here and in other lightly regulated jurisdictions. **Ramon Fonseca**, a co-founder of the firm, said Monday that his country's success in establishing itself as an offshore banking giant has bred jealousy from first-world rivals at a time of increasing competition and scrutiny of the industry in the aftermath of the global financial crisis. "**It's very unfair what's happening because there's not a level playing field**," Fonseca *told The Associated Press* in an interview. "Without a doubt if this happened to a company in Delaware nothing would happen, but because it's Panama it's the front page of the world's newspapers."

CSIS in the News/Le SCRS dans les nouvelles

1-The RCMP alleges in documents released yesterday that two men arrested after returning to Toronto from **Turkey may "travel to participate" in terrorism unless their conduct is restricted through peace bonds. Kadir Abdul**, 27, and **Samuel Augustin Aviles**, 32, appeared briefly in a Brampton, Ont., court after they were arrested last Friday at Toronto's Pearson airport, the *National Post* writes. Rather than seeking criminal charges, the RCMP wants peace bonds against the pair. Critics want the Liberal government to rescind the change as part of its promised review of the Conservative anti-terrorism law, **C-51,** arguing peace bonds place severe restrictions on those who have not been charged with any crimes. According to the **Canadian Security Intelligence Service**, about **100 people with "a nexus to Canada" are involved in the conflict in Syria and Iraq**. Between 90 to 100 extremists have not left Canada to participate in terrorism but aspire to, **CSIS director Michel Coulombe** told the **Senate Committee on National Security and Defence** on March 7.

Canada

2-Light coverage / couverture légère.

International

United States / États-Unis

3-Given **James Comey's** answer to a question at a security conference in London Thursday that the **FBI paid "a lot"** for the **tool** which allowed the Bureau to **open** the **iPhone** belonging to **San Bernardino shooter Syed Farook**---"more than I will make in the remainder of this job, which is seven years and four months"--- a number of news organizations guestimated, given Comey makes $180,000 annually, the **cost** of the **hacking tool** was in the vicinity of **$1.3 million.** But whatever the cost, the FBI director made clear the expense was **"worth it"** (extensive coverage/vaste couverture).

4-Homeland Security Secretary **Jeh Johnson** has **rejected** a **color-coded scheme** to **measure border security,** reports the *Associated Press,* after hiring a consultant that dismissed the idea as **simplistic** and **misleading.**

5-The *Washington Post* reports a **District of Columbia federal appeals court** has **dismissed** a long-running **ACLU lawsuit** seeking access to more **details** about the **U.S. government's lethal-drone operations**, ruling disclosure "could reasonably be expected to **damage national security.**"

United Kingdom / Royaume-Uni

6-A **Home Office 'whistleblower'** confidentially told the *Daily Telegraph* **UK Border Force guards** have **"zero discretion"** to **detain** and **interview travelers** trying to **re-enter Britain** if they **hold** a **UK passport** and have **not been "flagged"** by police or **security services.**

7-Concluding a visit to Britain, **Maina Kiai**, the **UN's special rapporteur** on the **right** to **freedom** of **assembly,** charged the government's **Prevent program,** designed to **counter Islamic**

extremism, has "created **unease** and **uncertainty** around what can be legitimately discussed in public" reports the *Guardian.*

Africa / Afrique

8-A **refusal** by the **South Sudanese government** to **permit rebel leader Riek Machar** to **return** to **Juba** accompanied by **weaponry** such as **rocket-propelled grenade launchers**, is **stalling** Machar's arrival reports *Reuters.*
9-Selon *Pan African News Agency,* le **Conseil présidentiel du gouvernement d'union nationale libyen a promis de fournir un soutien "total" à la ville de Derna (est),** félicitant, dans un communiqué la ville de **Derna pour sa libération de Daech (Etat islamique) et le peuple libyen pour la libération de la zone d'al-Fattaih** et l'expulsion définitive des restes de Daech de la ville.
10-D'après l'*Agence de Presse Africaine,* le **Burkina Faso va consacrer, en 2016, un montant d'environ 2,3 milliards de FCFA pour la mise en place d'un fonds de lutte contre le terrorisme** et l'acquisition de matériels au profit des forces de sécurité, a appris APA auprès de la Primature. Le gouvernement burkinabè avait déjà créé le **Conseil de défense et de sécurité nationale (CNDSN), ainsi qu'une Agence nationale de renseignement pour la sécurité (ANRS).** Le pays bénéficie de l'**appui technique et financier de la France et des Etats-Unis** dans la formation et l'équipement des forces de sécurité.

Middle East / Moyen-Orient

11-The *Times of Israel* reports that **Israel will close off the West Bank and Gaza Strip for 48 hours beginning Friday**, amid fears of attacks by the **Hamas terror group** during the Jewish holiday of Passover, which begins Friday night, the army announced Thursday.
12-*The National (UAE)* reports that the **United States and the GCC have a "common vision" for the Middle East** and Washington will continue to help Gulf countries enhance their military capabilities and counter Iran's destabilising regional activities.

Afghanistan/Pakistan

13-The *Pakistan Dawn* reports that in an unprecedented move, **Chief of Army Staff General Raheel Sharif** dismissed six army officers, including two generals, from service over alleged corruption, an authoritative source confirmed on Thursday.
14-*Khaama Press* reports that a **deadly suicide attack plot** by the anti-government armed militant groups was foiled by the **Afghan intelligence operatives** in southern Helmand province.

Europe

15-According to its **review of 2015**, the **AIVD**, reports the *NL Times,* warns the **jihadist threat** to the **Netherlands** is **"more complex and difficult than ever before"**. The Dutch intelligence service points out "**weapons** in the **hands of jihadists will not necessarily be used for terrorist attacks,** but given **examples in Canada,** the United States and France, the **risk of this is real."** Additionally, the AIVD states the Netherlands is **"naive"** when it comes to **online security.**
16-The Norwegian law firm representing Edward Snowden said **Snowden** will take the **Norwegian state to court** in a bid to **secure free passage there** reports *Reuters.* Snowden has been **invited to Norway** to receive a **freedom of speech award** from the local branch of the **writers' group PEN International,** but is worried that he would be **handed over** to the **United States.**
17-**CIA director John Brennan** arrived in **Sarajevo** this morning for **counter-terrorism talks** with **Bosnian officials** in a visit that was not officially announced reports the *Associated Press*
18-Selon *DH* (Belgique) le terroriste **Mohamed Abrini devait, lui aussi, mourir en kamikaze**, et que ce n'est pas du tout un renoncement de sa part qui explique qu'il ne se soit pas fait exploser sur place.

19-Un mois après les deux attentats qui ont fait 32 morts et des centaines de blessés à Bruxelles, **l'Europe reste désarmée face à la menace terroriste**, souligne *Le Figaro*. La Belgique sonne l'alarme, car les recrues européennes de Daech reviennent de Syrie et toutes n'ont pas été identifiées.

Australia, New Zealand / Australie, Nouvelle-Zélande

20-The *Australian Associated Press* writes that **extra security screening** will be in place for **Anzac Day commemorative services at Gallipoli** this year following terror attacks in **Turkey**. Representing the **Australian government** on the peninsula will be **Dan Tehan,** Minister for Veterans Affairs and Minister Assisting the Prime Minister for the Centenary of Anzac.

Asia / Asie

21-The *Times of India* reports that Delhi-based endocrinologist Dr RP Singh has resiled from his statement to the Maharashtra ATS where he allegedly admitted to have attended meetings where plots were hatched to avenge **jihadi terror attacks**, in what is yet another blow to the efforts of the prosecution to catch those accused of **"Hindu" terror**.

22-Five global public relations firms have made pitches to the Chinese government for a potential new campaign, four sources said, as Beijing tries to **communicate more effectively with the West**. The competition by the leading Western PR companies comes amid **intensifying scrutiny of Chinese companies abroad**, a **crackdown on dissent at home and rising tensions in the South China Sea**. The **State Council Information Office (SCIO)**, the government's information and propaganda arm, has heard presentations from **Hill+Knowlton, Ketchum, and Ogilvy Public Relations**, according to four people and company communications seen by *Reuters*. The PR campaign under consideration also comes as the government strengthens its control over domestic media and public speech at home. In January, ambassadors from **United States**, **Canada**, **Germany**, **Japan** jointly signed a letter expressing **concern over a new counter terrorism law**, and draft laws **on cyber security law and management of foreign non-governmental organizations (NGOs),** which includes widespread censorship.

23-The chief nuclear envoys of **South Korea** and **China** held talks on Friday as satellite images indicate that North Korea may be preparing to conduct its fifth nuclear test, possibly ahead of its key party congress early next month. **Kim Hong-kyun**, South Korea's Special Representative for Korean Peninsula Peace and Security Affairs, arrived in Beijing earlier in the day and began talks with his Chinese counterpart, **Wu Dawei**, said a South Korean diplomat who was involved in the Friday meeting. Before departing for Beijing, Kim told *Yonhap News Agency* by telephone that he and Wu will have an **"in-depth exchange of views on a range of cooperative measures, including an earnest implementation of U.N. Security Council resolutions, how to curb North Korea's additional provocations and countermeasures in the event of a North Korean provocation."**

CSIS in the News/Le SCRS dans les nouvelles

1-Light coverage / couverture légère.

Canada

2-**Canada** and the **United States** have set **up a working group to help sort out errors of identity on no-fly lists.** But, the *Canadian Press* writes, **Public Safety Minister Ralph Goodale** says Canada needs **"an entirely new database and information system"** to completely solve the problem of people — including youngsters — being delayed at airports due to false matches.
3-Footage analyzed by *The Globe and Mail* shows **Saudi Arabia using armoured vehicles against minority Shia Muslim dissidents in the Mideast country's Eastern Province**, raising serious questions **about Riyadh's tendency to use these military goods against its own citizens**. Copies of the videos, which date from 2012 and 2015, **were supplied by Saudi human-rights activists who want Canada to suspend shipments of combat vehicles to Riyadh in a $15-billion deal between Canada and the ruling House of Saud.**
4-*La Presse+* rapporte que plus d'un an après leur arrestation, **El Mahdi Jamali et Sabrine Djermane, ces deux élèves du collège de Maisonneuve** accusés d'une **série d'infractions terroristes, sont de retour devant les tribunaux**. Le couple de Montréalais incarcéré depuis son arrestation en avril 2015 aura à compter d'aujourd'hui son enquête préliminaire, ultime étape avant le procès. Les deux amoureux, lui, 19 ans, et elle, 20 ans, **sont accusés d'avoir tenté de quitter le Canada** en vue de **commettre un acte terroriste à l'étranger, de possession d'une substance explosive dans un but criminel, d'avoir facilité un acte terroriste et d'avoir commis un acte au profit ou sous la direction d'un groupe terroriste.** Ils ont plaidé non coupable.

International

United States / États-Unis

5-Given **Director of National Intelligence James Clapper's view** that **intelligence services must co-operate** against **terrorism,** *Washington Post* columnist David Ignatius writes a **'small breakthrough'** seems to have taken place in mid-April when **Clapper met** with **some European intelligence chiefs** in Germany to **discuss better sharing of intelligence.** Speaking to Ignatius, Clapper said the **United States still can't be certain** how much **harm** was done to **intelligence collection** by the **Snowden disclosures.** "We've been **very conservative** in the **damage assessment.** Overall, **there's a lot,"** Clapper said, noting that the leaks made **terrorist groups "very security-conscious"** and sped the move to unbreakable encryption of data.
6-Recent figures published by **New Jersey's Office of Homeland Security and Preparedness** show that at least **75 homegrown violent extremists** were found to be **operating** across the **United States** in **2015**, with the **largest portion** of these individuals **pledging allegiance** to **Isis** reports the *Washington Free Beacon.* The largest number of homegrown extremists were caught providing material support to various terror organizations, while at least **21 per cent** of the **terrorists** were found to be **planning attacks** in the **United States.**
7-**Section 702** of the **Foreign Intelligence Surveillance Act**, which authorizes aspects of NSA

observation, **doesn't expire** for another **19 months** but *The Hill* reports **Congress**, seeking to **preempt privacy advocates** on the issue, is **holding hearings now.**

United Kingdom / Royaume-Uni

8-Lending her voice to the **Brexit debate, former MI5 director Dame Eliza Manningham-Buller** told the *BBC* that "I **believe strongly** that we would be **significantly less safe outside [the** EU] because of all the networks, the relationships, the policy exchanges, the determining on data sets, things like fingerprinting, things like European arrest warrant, things like joint research on explosive detections on arms and so on. We are not going to be able to influence that if we are out."

9-A **London judge** has **rejected** a bid by the **National Crime Agency** to **force alleged cyber-hacker Lauri Love** to **hand over encrypted computer passwords.** The **United States** is **attempting** to **extradite** the 31-year-old **Love** on charges of **hacking** into the **U.S. Army, NASA** and **U.S. Federal Reserve networks.** NCA seized the computers during a raid at Love's home in Stradishall, Suffolk, in October 2013. (Extensive coverage / vaste couverture).

Africa / Afrique

10-According to the **United States**, reports *CNN,* the **number** of people **killed** by **terror attacks** in **Africa** in the **last year** is **as large**, if not larger, than the **deaths** inflicted by **Isis** in the **Middle East.**

11-**Oil companies** in **Nigeria's Delta** region have taken steps to **evacuate employees** after an **escalation** in **militant violence.** In the latest incidents, reports *Reuters,* two police officers and three soldiers were murdered in separate attacks.

Middle East / Moyen-Orient

12-The *Times of Israel* reports that a **teen Hamas operative revealed "extensive information"** about the terror organization's tunnels and plans for infiltrating Israel in order to carry out attacks, after he was arrested by security forces last month, the **Shin Bet** said Tuesday.

13-A **car bomb** in a predominantly Shia district of the Iraqi capital has **killed at least 50 people** and wounded at least 100 others, police sources told *Al Jazeera.*

14-The *Gulf News* reports that **warring parties in Yemen reached a preliminary agreement** on Tuesday to release all prisoners within 20 days, sources at UN-backed peace talks in Kuwait said.

Afghanistan/Pakistan

15-The *Pakistan Dawn* reports that the police informed the administrative judge of the **antiterrorism courts** on Tuesday that they had also released a fourth suspect out of the five allegedly detained for **spying for India** because of lack of evidence.

16-The *Pajhwok Afghan News* reports that at least 10 people were killed and another 23 including public uprising commander wounded in a **car bombing** on Tuesday in eastern Nangarhar province, an official said.

Europe

17-*Neue Osnabrücke Zeitung* reports the morning that **federal investigators** in **Germany** have **opened cases** against **40 asylum seekers,** suspecting **Isis connections.** Meanwhile, authorities have determined the **man arrested** for the **fatal stabbing spree** at a train station near Munich yesterday has **no terrorist links.**

18-**Europol director Rob Wainwright,** reports *Vice,* has tweeted **"encryption dilemma** must be **solved soon. Real problem** in **75% of all Europol cases."**

19-Selon *Le Soir,* **Mohamed Arshad, refuse de livrer le nom de ses complices en cour.** Lors de la deuxième journée d'audience, le jeune homme de 27 ans a livré des détails sur son séjour en Syrie. Il a mis en cause la légitimité de la justice belge. **Abdelhamid Abaaoud, qui pilotait de**

loin la mise en place de la cellule terroriste de Verviers, avait recommandé à son logisticien Mohamed Hamza Arshad Mamood Namji, de « se comporter comme un mécréant » pour ne pas se faire remarquer après son retour de Syrie. Les mécréants sont sans doute aussi des arrogants, pense ce dernier, encore aujourd'hui.

Australia, New Zealand / Australie, Nouvelle-Zélande

20-**More than half of ASIO investigations now target people aged 25 and under – more than triple the proportion just three years ago in a dramatic illustration of the plunge in the average age of terrorism suspects**. *Fairfax Media* understands that just 15 per cent of the security agency's investigations targeted this young age bracket three years ago, but has now risen to more than 50 per cent. ASIO has said in the past that its number of priority investigations doubled between 2014 and 2015, **from about 200 to 400 amid the surge in extremism inspired by the so-called Islamic State and like-minded groups.**

21-**Notorious Islamic preacher Musa Cerantonio is among five men arrested in far north Queensland over an alleged plan to take a boat to Indonesia and join the Islamic State (IS) terror group**. **Shayden Thorne**, the brother of another hardline Islamist, **Junaid Thorne**, was also arrested. Police arrested the men yesterday as they were towing a boat towards Cape York, in far north Queensland. They are being held on suspicion of foreign incursion offences, the *Australian Broadcasting Corporation* writes.

Asia / Asie

22-The *Daily Mirror LK* reports that a **Sri Lanka national** has been caught attempting to travel to **Canada via Taiwan using fake Canadian identification cards**, the National Immigration Agency (NIA) said Tuesday.

23-*Bangladesh Daily Star* reports that Bangladesh on Tuesday **executed Motiur Rahman Nizami, leader of the Jamaat-e-Islami party**, the country's largest Islamist party for **war crimes**, officials said, a move set to exacerbate tensions in the volatile Muslim-majority nation.

24-South Korea will put sanctions and pressure ahead of dialogue with the **Democratic People's Republic of Korea (DPRK),** Unification Minister **Hong Yong-pyo** said on Wednesday. For now, sanctions and pressures are needed more against DPRK, Hong told a forum organized by the **Korea Future Foundation**. "Now is not the right time for talks," he said. Hong made the remarks two days after DPRK closed its four-day 7th congress of the Workers' Party of Korea in 36 years on Monday, reports *Xinhua News Agency*.

Americas / Amériques

25-**Waldir Maranhao** has **reversed course** and now declared that the **recent vote** by **Brazil's Chamber of Deputies** to send the **impeachment process** against **President Dilma Rousseff** to the **Senate** is **valid.** President Rousseff has taken her case to the **Supreme Court.** (Extensive coverage / vaste couverture).

World News Overview
Aperçu des nouvelles mondiales

(A Communications Branch product/un produit de la Direction des communications)

Wednesday, June 1 2016
le mercredi 1er juin 2016
07:00 / 7h00

CSIS in the News/Le SCRS dans les nouvelles

1- Canada won't confirm exactly what its spies were doing in Afghanistan, but it has been quietly awarding service medals for their service, according to documents obtained by *VICE News*. And it was dangerous. Those medals were pinned on to the spooks' chests by Governor General **David Johnston**, who acts as Canada's head of state, for their work in Afghanistan. But for much of Canada's involvement in the war-torn country, the work of the **Canadian Security Intelligence Service (CSIS)** remained strictly secret. In recent years, CSIS' work in Afghanistan has slowly come to light. Even now, the government will only say that that **CSIS agents were processing detainees and doing basic interviews with possible al Qaeda or Taliban commanders from within Canadian Forces and Afghan military bases.** But these new documents, obtained under the Access to Information Act, reveal that **CSIS agents may have been directly in harm's way**.
2- Chinese Foreign Minister **Wang Yi** will hold high-level talks with Prime Minister **Justin Trudeau** on Parliament Hill today as planning gets under way for Mr. Trudeau's official visit to China in the fall, the *Globe and Mail* reports. Mr. Wang is also meeting Foreign Affairs Minister **Stéphane Dion** in what the Chinese government said is the first annual meeting of foreign affairs ministers. The report briefly notes that Mr. Trudeau's former national security adviser, **Richard Fadden**, said the Chinese have been **heavily engaged in spying and cyberattacks in Canada**. "Their broad approach is to use the vacuum-cleaner approach. They'll, you know, pretty well take anything," Mr. Fadden, a former director of the **Canadian Security Intelligence Service**, said in an interview on Sunday. "So I think it's actually quite difficult to balance all of this and make sure we have a work-a-day relationship, while at the same time making it very clear we don't like the **cyberattacks**."

Canada

3- A Toronto man accused of **attacking Canadian soldiers with a knife** has been **charged with a terrorism offence** just as a judge found him **unfit to stand trial**. **Ayanle Hassan Ali**, 27, was earlier charged with nine counts, including three of attempted murder, following unprovoked attacks at a North Toronto military recruiting centre in March. Witnesses described soldiers subduing a knife-wielding man who had tried to hurt them, allegedly saying, "**Allah told me to come here and kill people**." No soldiers were seriously injured. The Islamic State terrorist group has been urging extremists in North America and Europe to use such tactics against uniformed soldiers. On Tuesday, the **RCMP** announced in a statement that they laid a catch-all terrorism charge against Mr. Ali – specifically, a Criminal Code offence stating he committed all of his other alleged crimes for "the benefit of, at the direction of or in association with a terrorist group" (moderate coverage / couverture modérée).

International

United States / États-Unis

4- Specifically citing the **Euro Football Championship** in **France**, the **State Department** issued an **alert** yesterday advising **U.S. citizens traveling** to **Europe** this summer of a **heightened risk** of **terrorism**. The *Wall Street Journal* notes an 'alert' does not constitute a 'warning' which is seen

as indicative of a higher-level threat. Will Geddes, a security expert, told *The Times of London* that Americans tend to be more alarmist about security alerts but pointed out the alerts are **backed up by available intelligence.**
5- Contrary to the opinion of former Attorney General Eric Holder, reports *Politico,* **White House Press Secretary Josh Earnest** made it clear during Tuesday's media briefing that **President Obama does not think Edward Snowden rendered a "public service"** by leaking NSA documents.

United Kingdom / Royaume-Uni

6- According to the *Guardian,* **British involvement** in **clandestine rendition operations** provoked an **unprecedented rift between MI5** and **MI6** at the height of the 'war on terror'. **MI5 director Eliza Manningham-Buller** was reportedly so **incensed** when she discovered the role played by **MI6 in abductions** that led to suspected extremists being tortured, she **threw out** a **number** of **SIS staff** and **banned** them from **working** at **MI5 headquarters. Manningham-Buller** also **wrote** to **Prime Minister Tony Blair** to **complain** about the **conduct of MI6 officers,** saying their actions **threatened Britain's intelligence gathering** and may have **compromised** the **security and safety** of **MI5 officers** and their informants.

Europe

7- Selon *L'Express,* plus de **six mois après les attentats de Paris et Bruxelles, l'identité des principaux organisateurs se précise**. Parmi eux, plusieurs Français, dont un mystérieux homme clef, **Abou Souleymane.**
8- D'après *Le Soir,* (Belgique), le 25 mai dernier, la **police fédérale d'Anvers procédait à huit perquisitions à Borgerhout dans le cadre d'un dossier de terrorisme et arrêtait trois personnes.** De Standaard révélait ce mardi que les suspects (deux mineurs et un troisième homme non identifié) planifiaient de faire **exploser trois bombes : à la gare d'Anvers-Central et sur la place Astrid. Le cerveau présumé de la cellule terroriste, un mineur âgé de 16 ans, était en charge de se procurer des explosifs.**
9- An **FSB investigation** into to the **cyber-theft** of **1.7 billion rubles** ($25.7 million) from **Russian financial institutions** has resulted in the **arrest** of **50** suspected **hackers** reports *Tass.*
10- Performance artist **Pyotr Pavlensky** has been **nominated** for the **Russian Security Services' (FSB) Prize** for **Literature and the Arts** for the **artistic protest** which saw him **light the door** of the **FSB headquarters on fire** reports the *Moscow Times.*

Africa / Afrique

Light coverage / couverture légère.

Middle East / Moyen-Orient

11- The *Jerusalem Post* reports that the **United States** might start using **Israeli suicide drones** in potential future combat zones around the globe.
12- *Naharnet Newsdesk* reports that Interior Minister Nouhad al-Mashnouq said that the **security apparatuses in Lebanon** were able to uncover and thwart schemes by the Islamic State group to carry out **terror acts**, mainly in crowded areas in Beirut.

Afghanistan/Pakistan

13- The *Pakistan Dawn* reports that **Chief of Army Staff General Raheel Sharif** said that **US drone strikes are regrettable and must stop** as they are a threat to the sovereignty and security of the country.

Australia, New Zealand / Australie, Nouvelle-Zélande

Light coverage / couverture légère.

Asia / Asie

14- *The Pioneer* reports that a recent **intelligence report on the rise of pro-Khalistani terror camps near Mission City in British Columbia, Canada**, for carrying out attacks in Punjab, brings an urgent alert to the Modi Government.

15- According to *Xinhua News Agency*, the Chinese Embassy in Washington on Tuesday rejected the *New York Times'* account about a recent air encounter between **Chinese and U.S. military planes** over the **South China Sea**. The Chinese military aircraft acted professionally while it watched the **U.S. Navy spy plane carrying out close reconnaissance in Chinese coastal waters,** said **Zhu Haiquan**, a spokesman for the Chinese embassy, in a letter to the *Times* published on the paper's website Tuesday. "Our operation was completely compliant with safety and professional standards. The attempt at intimidation by American military aircraft in the South China Sea, however, was not," Zhu pointed out.

16- Chinese President **Xi Jinping** met a visiting North Korean delegation Wednesday, state media reported, in an apparent attempt by Pyongyang to mend frayed ties with its powerful neighbour. Although the official *Xinhua news agency* did not give the names of those in the delegation, the encounter comes on the heels of a rare visit Tuesday by top North Korean politician **Ri Su Yong**, vice chairman of the country's ruling Workers' Party and former foreign minister.

17- North Korea has accused South Korea of **abducting its citizens** in a letter addressed to U.N. **Secretary General Ban Ki Moon** obtained Tuesday by *Kyodo News*. North Korean Ambassador **Ja Song Nam**, sent the three-page letter to the U.N. chief on May 17, describing the **"unsettled case of group allurement and abduction"** of its citizens by **South Korea's spy agency in what it called a "heinous terrorist act."** The case involved 12 women who North Korea claims were taken together with one male manager in Ningbo, located in Zhejiang Province of China, in early April.

18- The *Strait Times* reports that **four Bangladeshi workers** detained in April under the Internal Security Act were yesterday convicted of **financing terrorism**.

CSIS in the News/Le SCRS dans les nouvelles

1- When **Roland Eid** launched his $23-million lawsuit a year ago against six high-ranking government officials, including **RCMP Commissioner Bob Paulson** and **Canadian Security Intelligence Service Director Michel Coulombe**, it was a long-shot at best. So it proved. The Ontario Superior Court has **granted the Crown's motion to have the case dismissed**, *The Ottawa Citizen* reports. A former CSIS informant, Eid alleged he had been the victim of, among other things, a negligent investigation and malicious prosecution in connection with the 2008 bankruptcy of his company, **ICI Construction**. Eid was convicted May 2 on all 10 breaches of the Criminal Code and the Bankruptcy and Insolvency Act. Judge **Timothy Ray** found that Eid had fraudulently stripped ICI of $1.7 million that should have been held in trust for subcontractors and suppliers. The judge said this action had triggered the bankruptcy and caused ICI creditors to suffer collective losses of $3.8 million. The hearing in Eid's civil action - before Madam Justice **Bonnie Warkentin** - came just 15 days after his criminal conviction.

Canada

2- D'après *Le Devoir,* la question **des droits de la personne ne devrait pas diviser la Chine et le Canada, écrit Luo Zhaohui. L'ambassadeur chinois** espère clore **l'escarmouche publique qu'ont partagée son gouvernement et Ottawa, après que son ministre des Affaires étrangères eut rabroué une journaliste.** À coup de lettre ouverte sur Internet, le diplomate chinois a reconnu que les deux pays partagent des différends, mais il a martelé que ceux-ci ne doivent pas éclipser les avantages d'une collaboration. **" La Chine n'a jamais prétendu que ses droits de la personne sont parfaits ",** a reconnu l'ambassadeur Luo Zhaohui dans un texte publié sur le site Internet du Globe and Mail dimanche soir. "

3- **RCMP** officers involved in a B.C. terrorism investigation committed criminal offences during the undercover sting – **providing money, resources and expertise to a couple living off social assistance** – a defence lawyer alleged in B.C. Supreme Court on Monday. *The Globe and Mail* reports that **John Nuttall** and **Amanda Korody** were found guilty by a jury in June of last year of conspiring to murder persons unknown and making or possessing an explosive substance – in both cases for the benefit or at the direction of a terrorist group. They were arrested on July 1, 2013, after they placed pressure-cooker devices outside the B.C. Legislature. They have argued they were **entrapped by police** and a hearing into that aspect of the case began in July. **Monday marked the start of closing arguments. Marilyn Sandford**, Mr. Nuttall's lawyer, told the court "none of this would ever have happened" if not for the actions of undercover police.

International

United States / États-Unis

4- The **Obama administration** is seeking to **amend surveillance law** to give the **FBI explicit authority** to **access** a person's **internet browser history** and other electronic data **without a warrant** in **terrorism** and **spy** cases. The *Washington Post* points out the administration made a similar effort six years ago but dropped it after concerns were raised by privacy advocates and the tech industry.

United Kingdom / Royaume-Uni

5- Sourced by a **Snowden document** from **2010**, the *Intercept* reveals a **secret report** prepared by **British intelligence** and dispatched to top government officials **warned** that **MI5** may have put **lives at risk** because their **surveillance systems** were **sweeping up more data** than **could be analyzed,** leading the Security Service to **miss clues** to **possible security threats.**

Europe

6- A **morning rush-hour car bomb attack** in **Istanbul** targeting a **bus carrying riot police killed 11 people**, including **seven police officers,** and wounded 36 others. There was **no immediate claim of responsibility** but *Reuters* notes **Kurdish militants** have staged **similar attacks before**, including one last month in Istanbul.

7- D'après *Le Monde,* à Lyon, **police et secours s'entraînent face à la menace terroriste à la veille de l'Euro 2016**. Deux simulations d'attaques sont organisées à quelques jours du début de la compétition. Le but ? **« Apprendre à travailler à plusieurs dans l'urgence. » Les attentats de Paris ont changé la donne.** La menace terroriste est désormais au coeur des préoccupations dans les dispositifs de sécurité, à l'occasion des grandes manifestations populaires. Les précautions prises pour l'Euro 2016, qui débute vendredi 10juin, fournissent une application à grande échelle d'une doctrine en pleine mutation, selon laquelle **l'ordre public, l'intervention antiterroriste et l'organisation des secours doivent s'articuler différemment.**

8- According to the Polish weekly magazine *Do Rzeczy,* **Russian intelligence**, under **diplomatic guise**, have **stepped up operations** in **Poland** in the run-up to the **NATO** summit in **Warsaw** next month.

9- Le sort des **trois Irakiens reconnus coupables d'activités en lien avec Daech fait débat** sous la Coupole fédérale. Que faire des trois Irakiens condamnés en mars dernier pour avoir participé à des activités en lien avec l'Etat Islamique (EI) au terme de leur peine? C'est la question posée lundi par le **conseiller national Fabio Regazzi (PDC/TI) à Simonetta Sommaruga.** Rien, lui a répondu en substance la ministre de Justice et Police suisse. Les **services de renseignement suisses ne disposent d'aucune base légale pour continuer à surveiller des personnes ayant purgé leur peine** rapporte *La Tribune de Genève.*

Africa / Afrique

10- In the wake of an **American terror alert** on the weekend, the **British** and **Australian governments** have issued a similar **travel advisory** for **South Africa.** The *Guardian* (UK), reports the **British statement** specifically pointed to **upmarket shopping areas** and **malls** in the **commercial hub** of **Johannesburg** and **Cape Town** as the **most likely targets.** In response, **South Africa's State Security Minister David Mahlobo** said "we remain a strong and stable democratic country and there is **no immediate danger posed** by the **alert".**

Middle East / Moyen-Orient

11- **Disenchanted Islamic State members recruited** from the **West** have **increasingly** been **contacting their governments** and **asking for help in getting home** reports the *Wall Street Journal.* Some have turned up at diplomatic missions in Turkey, and others have sent furtive messages to their governments seeking assistance.

12- *Haaretz* reports that **Israeli Prime Minister Benjamin Netanyahu** arrived in Moscow Monday evening to mark the 25th anniversary of relations between Israel and Russia and to discuss the consolidation of **coordination between their militaries** in Syria.

13- *Now Lebanon* reports that one of the **Syrian first lady's staffers has been assassinated** in mysterious circumstances, two months after Asma al-Assad's top bodyguard was killed in Damascus.

Afghanistan/Pakistan

14- The *Pakistan Dawn* reports that **Canadian High Commissioner Andrew Turner** said that the doctrine of reasonable accommodation could counter the phenomenon of xenophobes, which he described as individuals who have never been exposed to people from other backgrounds.
15- *Pajhwok Afghan News* reports that **President Ashraf Ghani** said on Monday those who believed **Afghanistan was in crisis** should think twice before saying this because the Afghan forces would protect their motherland at any cost.

Australia, New Zealand / Australie, Nouvelle-Zélande

16- Australia's military commitment in Iraq should be increased and **Australian Defence Forces** instructors should be allowed to accompany local troops into battle, says an analysis of strategic priorities for the incoming government. The 100-page document, to be released today by the **Australian Strategic Policy Institute**, says with the Islamic State terror group believed to be weakened, **more special forces should be sent to take part in operations with US units in the Middle East.** Mapping out challenges the incoming government will have to face, analyst **Andrew Davies** says recent events in the **South China Sea** have markedly increased tensions and North Korea is a destabilising force in North Asia. ASPI executive director **Peter Jennings** says the **next government should increase its military commitment to Iraq** and argue for other countries, particularly the US, to act decisively to finish the fight, *The Australian* reports.

Asia / Asie

17- The *Hindustan Times* reports that **senior intelligence officials** confided to one newspaper that they had informed a top civilian security institution about the presence of Daesh workers, whose origin is from **India, Syria and Canada**.
18- The *Strait Times* reports that **Singapore Minister for Defence Dr Ng Eng Hen alongside Canadian Minister of National Defence Harjit Singh Sajjan, and Russian Deputy Minister of Defence Anatoly Antonov**, called for countries to "work closely together to build up joint responses, and strengthen intelligence, surveillance and reconnaissance efforts."
19- The United States and China on Tuesday **agreed not to recognize North Korea as a nuclear state** and pledged to exert **joint efforts towards stopping any further provocations**, despite some fundamental differences over how to move toward that end, reports *Kyodo News*. "Neither one of our nations will accept North Korea as a nuclear weapons state," U.S. Secretary of State **John Kerry** told reporters in Beijing after senior officials from the two countries concluded an annual strategic meeting. The two-day meeting, which addressed an array of security and economic issues, was held at a time when North Korea has started signaling a new willingness to engage in diplomacy following months of arms tests and war-like threats.
20- German Chancellor **Angela Merkel** will visit China for the ninth time in her chancellorship from June 12 to 14 for the fourth round of China-Germany intergovernmental consultations, German Ambassador to China **Michael Clauss** told *China Daily* in an interview ahead of the visit. Merkel will bring about 11 ministers and vice-ministers to China for a meeting with Premier **Li Keqiang** and continue discussions according to the action plan of Sino-German cooperation to push relations forward, Clauss said. Issues including Sino-German cooperation in innovation, China's economic reform and opening-up, and mutual trade and investments are expected to be raised during the consultations, Clauss said. **International issues concerning Syria and the global economy** are also on the agenda. In addition, China and Germany will probably **reach an agreement on cybersecurity** that focuses on fighting **economic spying,** said the ambassador, calling on German and Chinese governments to facilitate a framework to protect companies from cyberattacks.

Americas / Amériques

21- An item on the *Inside the Games* website makes note of the establishment, in co-operation with **Intepol**, of a **Joint Integrity Intelligence Unit** for the **Brazil Summer Olympics.**

CSIS in the News/Le SCRS dans les nouvelles

1- In advance of the 'Three Amigos' summit in Ottawa on Wednesday, **Mexican President Enrique Pena Nieto** will **arrive** in **Canada today** for a **state visit.** The *Globe and Mail* has learned the **Trudeau Government will offer intelligence** and **training** to **combat Mexico's drug violence.**"We are going to have a **wide-ranging discussion on security,** and for Mexico, it truly has very significant security issues," a **Canadian official** disclosed to reporter Bob Fife. "We have **world-class talent** on that part on all of our institutions, from the RCMP, **CSIS** and **CSE.** We have world-class assets that countries like Mexico could really learn from."

Canada

2- The family of **Canadian academic Homa Hoodfar** told the *Canadian Press* she is being **imprisoned in Iran** for **"dabbling in feminism and security matters".**

International

United States / États-Unis

3- From government and police reports, terrorism databases, news accounts and their own independent reporting, *Los Angeles Times* journalists in the U.S. and around the globe compiled a **record of every fatal act of terrorism during the 30 days of April** and found that **not a day passed during the month where there wasn't a terrorist attack** somewhere in the world. In all, **858 people died in 27 countries** as a result of terrorism **including Canadian John Ridsdel** in the Philippines. An additional 1,385 were injured.

4- A rally by a small group of **neo-Nazi demonstrators** at the **State Capitol in Sacramento** Sunday erupted into a **violent clash with protesters** that left at least **10 people injured, five of them stabbed.** Demonstrators battled with sticks, protest signs and other weapons as the **Traditionalist Worker Party** group ,which said it wanted to **assist supporters** of **Donald Trump,** began setting up for a scheduled noon rally on the west steps of the Capitol. The *Sacramento Bee* reports the **Traditionalist Worker Party** bills itself as a group of about **500 followers nationwide** "defending faith, family, and folk against the politicians and oligarchs who are running America into the ground." It's **led** by **Matthew Heimbach,** a **discredited Trump convention delegate,** who is viewed as a **rising force within the white supremacy movement.**

United Kingdom / Royaume-Uni

5- *The Times of London* reports a **Polish community centre in Hammersmith** was daubed with **racist graffiti** and **far-right demonstrators chanted abuse outside a mosque** in **Birmingham** amid a **surge** in **suspected hate crimes** following the referendum vote to leave the European Union.

Europe

6- Selon *Le Figaro et l'Agence France-Presse,* un **commissaire de police sera jugé à Nanterre pour "violences" sur une avocate, soupçonné de l'avoir giflée lors d'une garde à vue à la Direction centrale du renseignement intérieur (DCRI, devenue DGSI) en avril 2014,** des faits

qu'il conteste. Le policier, 58 ans, toujours en poste à la Direction générale de la sécurité intérieure, comparaît devant le tribunal correctionnel pour "violences volontaires par une personne dépositaire de l'autorité publique sur un avocat dans l'exercice de ses fonctions". Le 1er avril 2014, l'avocate, inscrite au barreau des Hauts-de-Seine, avait accusé le commissaire de l'avoir giflée et insultée alors qu'elle assistait un **suspect gardé à vue dans les locaux du service antiterroriste et de contre-espionnage à Levallois-Perret, près de Paris.**

7- In a **rare intervention** into **Russian politics**, **Edward Snowden** has publicly **criticized enhanced anti-terrorism and surveillance legislation** recently passed by the State Duma as **"dangerous"** reports Britain's *Daily Telegraph.* Meanwhile, *New York Magazine,* in a cover story, has word there's a sense **Snowden is lonely in Russia** with his **conversation preoccupied with the theme of escape.** Snowden is said to muse that although he lives in Russia, he does not expect to die there and is **optimistic he will find a way out.**

8- *Le Soir, (Belgique),* rapporte qu'il y a eu interpellation à **Anvers d'un membre de Sharia4Belgium rentré de Syrie.** Les suspects interpellés à Celles et à Ensival ont été inculpés de **participation aux activités d'un groupe terroriste**. Le parquet fédéral a démenti l'information selon laquelle le duo préparait un attentat lors d'une retransmission publique du match Belgique-Hongrie. Deux suspects ont été inculpés de participation aux activités d'un groupe terroriste et placés sous mandat d'arrêt à la suite de **deux opérations de police menées à Ensival (Verviers) et à Celles (Tournaisis)** dans la nuit de vendredi à samedi. L'un des deux inculpés serait **E.S., un jeune homme de 20 ans domicilié dans la cité Armand Dederich, à Ensival.**

Africa / Afrique

9- **Buri Mohamed Hamza, Somalia's State Minister** for the **Environment** with **dual Somali-Canadian citizenship** and **family in Woodbridge**, was among **15 people who died** as a result of a **powerful car bomb** which **exploded outside** the **Nasa-Hablod hotel in Mogadishu** on the weekend reports *CBC News.*

Middle East / Moyen-Orient

10- *Al Jazeera* reports that weapons shipped into Jordan by the **Central Intelligence Agency** and Saudi Arabia intended for Syrian rebels have been systematically stolen by **Jordanian intelligence operatives** and sold to arms merchants on the black market, according to American and Jordanian officials.

Afghanistan/Pakistan

11- Badly bruised and isolated terrorists will go for softer targets for their survival, warned army chief **General Raheel Sharif** on Sunday as he directed senior security officials to hunt the terrorists and **"pre-empt their moves to frustrate their designs,"** the *Express Tribune.*

12- The *Pajhwok Afghan News* reports that the **National Directorate of Security, the spy service** on Sunday claimed arresting an 11-member Haqqani network group in southeastern Khost province.

Australia, New Zealand / Australie, Nouvelle-Zélande

13- **Seven men, including three Australians and a New Zealander abducted in Nigeria last week have been released, according to a statement issued to media by their Australian employer last night**, *The Australian* reports. "Five of the men have been injured, two of them seriously, and all are currently receiving attention from a team of medical specialists," a spokesman for Perth-based mining company MacMahon said.

14- **Queensland Police have hired experts as they grapple with a soaring number of potential jihadists,** the *Courier Mail* notes. The number of radicalised suspects has significantly increased in Queensland and other states during the past two years, compelling police to reach out

for extra help. While police stress there is no imminent threat in Queensland, it is **believed the large number of social media platforms that terrorists use to groom foreign fighters, and a growing number of potential radicalised youth, have become a liability.**

Asia / Asie

15- The *Manila Bulletin* reports that government forces are prepared to thwart any security threat after the Islamic State terror group rallied its forces to focus their fighting on Southeast Asia, particularly the Philippines. The government earlier launched intensified operations against the **Abu Sayyaf Group (ASG)** responsible for various atrocities in the south, most recently the beheading of two **Canadian hostages**.
16- *The Pioneer* reports that with security agencies in India nabbing a number of the cadres of **Al Qaeda in Indian Subcontinent (AQIS)** module during the last one year, in a statement Al Qaeda chief Ayman al Zawahiri has expressed solidarity with those associated with the outfit here.
17- The *Yonhap News Agency* reports that the **United States' forces stationed in South Korea have expanded their aerial reconnaissance along the inter-Korean border** following **North Korea's recent launch** of Musudan intermediate-range ballistic missiles (**IRBM**).

Aperçu des nouvelles mondiales

(A Communications Branch product/un produit de la Direction des communications)

Friday, July 15 2016
le vendredi 15 juillet 2016
07:00 / 7h00

CSIS in the News/Le SCRS dans les nouvelles

1- The New York based website *'News Deeply'* tells the story of **Calgarian Christine Boudreau** and her **son Damian Clairmont**, who was **radicalized** and **died in Syria.** The **Service is mentioned throughout the story** with reporter Alexandra Bradford writing 'like so many mothers who lose their children to radicalization, Boudreau had no support; no one to help her cope with her new, tragic reality. **The CSIS banned her from telling anyone that Damian had joined Isis,** and so she spent her days pretending everything was fine'.

2- **Un simple camion qui fonce dans une foule. La méthode rappelle à plus grande échelle celle utilisée par Martin Couture-Rouleau, qui avait happé deux militaires avec sa voiture à Saint-Jean-sur-Richelieu en 2014**. Et elle pose tout un défi de sécurité aux forces de l'ordre chargées de protéger la population contre les actes terroristes. « C'est très difficile à contrer d'un point de vue de sécurité. C'est un modus operandi super simple, qui ne demande aucune dextérité technique. Aucunes forces de sécurité ne peuvent empêcher la circulation de véhicules », commente **Michel Juneau Katsuya, expert en questions de sécurité nationale et ancien cadre et agent de renseignements au Service canadien du renseignement de sécurité (SCRS)** à *La Presse+*.

Canada

3- **"Clear gaps"** in **how the federal government reports invasive surveillance practices may hide the true scope of police activities**, according to documents prepared for **Canada's privacy watchdog**. Although the number of authorized wiretaps has "plummeted" since 2002, a January briefing for **Privacy Commissioner Daniel Therrien** suggests those numbers **may mask police surveillance practices**. "It would be erroneous to infer from the drop in overall warrants issued that surveillance is affecting fewer individuals," reads the document, obtained under access to information law, the *Toronto Star* writes.

4- A **Chinese man who ran an aerospace firm with offices in British Columbia has been sentenced to nearly four years in jail for stealing confidential information on a U.S. military transport aircraft and the F-35 stealth fighter**. The *Ottawa Citizen* writes that Su Bin had pleaded guilty in federal court in **Los Angeles to helping two Chinese military hackers.** Among the targets of the hacking efforts was information on the U.S. F-22 and F-35 stealth fighters as well as Boeing's C-17 transport aircraft, which is also used by the **Canadian Air Force**. Su did not carry out the actual hacking, which was done by his **two co-conspirators, both members of the People's Liberation Army in China.**

5- Réagissant au drame survenu à Nice, en France, le **premier ministre Justin Trudeau a déclaré que « les actes insensés de ce genre ne sont pas des gestes isolés » . Tard jeudi, un camion a foncé dans une foule de gens réunis pour célébrer la fête nationale en France, faisant au moins 80 morts. Le président français, François Hollande, a parlé d'une attaque « dont le caractère terroriste ne peut être nié »** . M. Trudeau a affirmé par communiqué que le Canada continuerait à travailler avec ses alliés et ses partenaires afin de « combattre le terrorisme sous toutes ses formes » . « J'ai eu le coeur brisé en apprenant que plusieurs douzaines de victimes innocentes avaient été tuées ou blessées à la suite d'un attentat terroriste perpétré lors des célébrations de la fête nationale du 14 juillet à Nice, en France » , a-t-il déclaré. « **Nous**

traduirons les responsables en justice, qu'il s'agisse des auteurs ou de ceux qui participent au financement ou à l'organisation de ces attentats » , a poursuivi le premier ministre indique *La Presse canadienne.*

6- The man that says he lives on the Internet will be the showcase speaker at SecTor, a **Toronto-based security conference this year. Edward Snowden**, the **former CIA employee and government contractor that leaked classified documents about a mass surveillance operation run by the National Security Administration (NSA),** will be appearing at the conference via a video link from Russia, where he's been living under asylum since 2013 *itWorld News* reports. **SecTor** will be Snowden's first and only commercial conference appearance in North America this year, conference organizers say. Beyond NSA's clandestine mass surveillance operations that were leaked by Snowden, Canada's **Communications Security Establishment (CSE)** has also been the subject of some of his classified leaks. He's also said that **Canada's intelligence gathering** operations have the "**weakest oversight" among western nations.**

International

United States / États-Unis

7- **No credible terrorist threat** has been **detected** but **Jeh Johnson** and **James Comey**, reports *Reuters,* told the House Homeland Security Committee that their **agencies** are **preparing for possible violence** at the **Republican National Convention** in Cleveland next week and the **Democratic convention** in Philadelphia the week after. DHS director **Johnson** said he was **concerned** any **demonstrations** could **get out of hand** and **Comey** added the **FBI** was **monitoring** the **threat of violence "very, very carefully".**

8- Appearing before the House Foreign Affairs Committee, **State Department official Richard Stengel,** reports the *Washington Free Beacon,* testified State's latest effort to **counter Islamic State propaganda** and **recruitment** is **relying on foreign states** for **strategic messaging** because the government believes **other countries** can **better deal with terrorist information operations** than the United States. "Our strategy is informed by a core insight: we are not always the best messengers for the message we want to deliver," Stengel said. "Public statements from U.S. government officials condemning ISIL can easily be used by the enemy as a recruitment tool."

United Kingdom / Royaume-Uni

9- Brexiteer **Boris Johnson's** selection as **British Foreign Secretary** has been greeted in **Europe** with **dismay** with **French Foreign Minister Jean-Marc Ayrault** denouncing him as a **"liar"** and **former Swedish Prime Minister Carl Bildt** tweeting **"I wish it was a joke".** (Extensive coverage / vaste couverture).

Europe

10- Selon *Nice Matin*, l'auteur présumé de **l'attentat survenu à Nice qui a fait 84 morts et de nombreux blessés est Mohamed Lahouaiej Bouhlel. Ce Niçois franco-tunisien était connu des services de police** pour des faits de délinquance et de violences conjugales, **mais n'était pas fiché pour radicalisation.** Il avait été placé en garde à vue pour des violences mineures en début d'année à Nice. **Il a été abattu par deux gardiens de la paix.**

11- À 4 heures du matin, le bilan de ce carnage était "extrêmement lourd: **80 morts, 18 personnes en urgence absolue et de nombreux blessés", selon Bernard Cazeneuve. Le ministre de l'Intérieur avait atterri deux heures plus tôt à l'aéroport de Nice. Aussitôt, l'hôte de la place Beauvau a rendu visite à la cellule de crise organisée dans les locaux de la préfecture au Cadam.** Ensuite, il a participé à "une assez longue réunion de police" au palais de la Méditerranée, devant lequel le camion a été neutralisé. Enfin Bernard Cazeneuve est allé salué

les pompiers à la caserne de Magnan avant de s'exprimer pendant une petite dizaine de minutes face à la presse, au pied de la fontaine de la place Masséna. Le ministre a tenu "à exprimer la solidarité du gouvernement". **Bernard Cazeneuve a confirmé que le niveau d'alerte pour le département des Alpes-Maritimes était "relevé à plan Vigipirate attentat"** rapporte *Nice Matin.*

12- It's reported this morning by *Nice-Matin* that a **local 31-year-old delivery truck driver Mohamed Lahouaiej Bouhle,** who had a **criminal record** but was **not known to French intelligence**, was **behind the wheel** of a **25 tonne transport truck** which **plowed at high speed** into a **crowd** celebrating Bastille Day in **Nice** last evening **killing at least 84 people** and injuring many more. The **Tunisia-born Bouhle** was **shot dead** by authorities after he zig-zagged the vehicle through those gathered along the seafront Promenade des Anglais knocking people down "like skittles". **President Francois Hollande** called it a **terrorist act,** extending the existing state of emergency for another three months. **Bouhle** is described as a **'loner'** who **appeared in court** as recently as **this past March** when he was **found guilty** of **violent contact** The *Daily Beast* recalls that **vehicle ramming attacks** were the subject of **two warnings issued jointly** by the **FBI** and the **U.S. Department of Homeland Security** in **2010** and **urged** by **al Qaeda's online magazine *Inspire*** the same year. As the Brookings Institution's William McCants put it to the *Wall Street Journal,* "You have to have a driver's license and that's it. There's nothing more to it."

13- D'après *Ouest-France,* dès 2014, une **note de la Direction générale de la sécurité intérieure (DGSI) révélait qu'un attentat visant le canaval de Nice avait été déjoué. En mai dernier, c'est le principal recruteur de djihadistes français, Omar Diaby, également originaire de Nice, qui refaisait parler de lui.** L'attentat de ce jeudi soir n'est pas le premier à viser Nice. En 2014, une attaque visant le carnaval, l'un des plus célèbres du monde, attirant chaque année plusieurs centaines de milliers de personnes sur la Côte d'Azur, avait été déjoué par les services de sécurité. **Des explosifs artisanaux dans des canettes Ibrahim Boudina, un Français de 23 ans avait été arrêté deux jours avant le début des festivités.**

14- Russia's **FSB,** reports *Reuters,* said it would **reprimand dozens** of **new agents** who **celebrated graduating** from the agency's training academy by **ostentatiously driving** through Moscow in a **luxury convoy,** allowing themselves to be photographed.

Africa / Afrique

15- Selon *Tel Quel,* (Maroc), le **ministère marocain de l'Intérieur a annoncé le 14 juillet le démantèlement d'une cellule terroriste composée de six personnes. La cellule agissait dans les villes d'Agadir, Amzmiz, Chichaoua et Laqliaâ**. Selon le ministère, ces personnes projetaient« de viser des installations vitales et sensibles en perpétuant des attaques d'envergure ». Elles comptaient y mener des attaques « à l'aide de bombes » et par « des attentats-suicides ».

Middle East / Moyen-Orient

16- The *National Iraqi News Agency* reports that President of the Kurdistan Regional Government Nechirvan Barzani discussed with **Canadian Defense Minister Harjit Sajjan liberation the city of Mosul from Daash** and cooperation between the coalition forces and the Iraqi army and the Peshmerga forces and plan to administrate after liberation.

17- *Now Lebanon* reports that **Amer al-Ashi, a top officer in the Syrian regime's feared Air Force Intelligence Directorate** has been appointed governor of the Druze-populated Suweida province, where a number of movements have sprung of challenging government authority.

Afghanistan/Pakistan

18- *Pajhwok Afghan News* reports that **former intelligence chief Rahmatullah Nabil** on Thursday shared some documents along with a write-up with media persons 'proving Pakistan's relations with Taliban.'

Australia, New Zealand / Australie, Nouvelle-Zélande

19- **China** yesterday called in **Australian ambassador to Beijing Jan Adams** for a briefing to contain the damage from an international court ruling that its island building in the **South China Sea was illegal.** The *Australian* writes that Ms Adams was among a number of envoys from countries Beijing considers influential to be called in for a special briefing from foreign ministry officials in the wake of Tuesday's night ruling by the Permanent Court of Arbitration that shredded its sovereignty over 90 per cent of the South China Sea.

20- The **Australian Defence Force** is working on ways to disable remote-controlled model helicopters being used by the **Islamic State in Iraq to spy on Iraqi forces**. And the general in charge of **modernisation and strategic planning in the Australian Army, Gus McLachlan**, said it was likely to be only a matter of time before the terror group packed explosives into these off-the-shelf toys and used them to carry out attacks, the *Australian* writes.

Asia / Asie

21- **North Korea today paraded a defector** accused of involvement in a child abduction plot it says was masterminded by **South Korean agents**, as Seoul demanded the man's immediate release. In a carefully stage-managed press conference in Pyongyang, **Ko Hyon-Chol**, 53, who fled the North in 2013 and was granted South Korean citizenship, "confessed" to attempting to kidnap two orphans and take them to the South. Ko's case comes amid an ongoing dispute between North and South Korea over the April defection to the South of a dozen North Korean women working in a restaurant in China. Pyongyang insists that the women were kidnapped by the South's spy agency -- the **National Intelligence Service** (NIS) -- but Seoul says they fled of their own free will. (Extensive coverage / vaste couverture).

22- The *Times of India* reports that in a **clear message to China to desist from using strong-arm tactics in the South China Sea**, India and Japan on Thursday asked "all parties" to show "utmost respect" for the UN Convention on the Law of the Sea (UNCLOS) of 1982.

The *Associated Press* reports that ineffectual attacks by **ISIL's South-east Asian** followers have shown them to be fragmented and lacking in the expertise that has produced devastating death tolls elsewhere in the world.

23- Japanese Prime **Minister Shinzo Abe told Chinese Premier Li Keqiang that rule-based international order must be respected** in talks on the sidelines of the **Asia-Europe Meeting (ASEM) today,** the *DPA News Agency* reports. The ASEM summit has been overshadowed by the dispute over China's territorial claims in the **South China Sea**.

24- **South Korea will respond firmly to all North Korean threats made against the deployment of the U.S. antimissile system on its soil**, the government said today, making clear that the move is designed to counter Pyongyang's evolving nuclear and missile capabilities, the *Yonhap News Agency* reports.

CSIS in the News/Le SCRS dans les nouvelles

1- Canada's electronic spy agency won't say how often it shares information that could lead to someone being tortured in an overseas prison. The **Communications Security Establishment** - which monitors threats from foreign terrorists and spies - has censored documents that spell out the figures, even though the **RCMP** and **Canadian Security Intelligence Service** have revealed such numbers in the past. The reticence prompted **Amnesty International Canada** to say "**much greater transparency**" is needed from the Ottawa-based CSE. "At stake is Canada's compliance with crucial international human rights obligations to prevent torture and ill-treatment," said **Alex Neve**, Amnesty's Canadian secretary general. The secretive CSE has been thrust into the national spotlight in recent years due to leaks by **Edward Snowden**, the former spy contractor who worked for the **National Security Agency**, CSE's American counterpart. It is also among a handful of Canadian agencies, including the **RCMP**, **CSIS**, the **Canada Border Services Agency** and **National Defence**, bound by a government instruction that allows it to share information with foreign partners - even when it means someone could be abused as a result of that exchange. Records obtained by *The Canadian Press* under the Access to Information Act offer a glimpse into how the CSE handled such cases in the first three months of 2015. The quarterly report to CSE Chief **Greta Bossenmaier**, labelled Top Secret and for Canadian Eyes Only, told her the number of cases that required a "**mistreatment risk assessment**" and the level of risk associated with passing the information to others. But those details were deleted from the publicly released version of the document. The report says there were "**no known instances" of a recipient country's non-compliance with conditions attached to information-sharing during the three months**. But little else was disclosed. The CSE faces "unique considerations" it must weigh when discussing details of assessments, said **Christopher Williams**, a senior spokesman for the intelligence agency. "With this in mind, we are not able to release the specific number you have requested without risking revealing insight into our capabilities." However, the number and content of such assessments are reviewed by the independent watchdog who keeps an eye on the CSE, said Williams.

Canada

2- Bangladeshi police have confirmed that a **University of Toronto student is being interrogated**, without clarifying his whereabouts or his condition, or saying whether he was being charged – escalating concerns over **possible human-rights violations in his detention**. **Tahmid Hasib Khan**, 22, and a fellow detainee, British citizen **Hasnat Karim**, 47, were among several hostages who survived a terrorist attack at a restaurant in Dhaka that left 23 people dead on July 1. They were then taken in by police for questioning, writes the *Globe and Mail*. Family members have had no contact with Mr. Khan since July 3, aside from a phone call from an unknown agency confirming his detention. "We have to conduct the investigation through interrogation of witnesses, rescuers and others concerned. The puzzle cannot be solved without interrogation," the Dhaka Metropolitan Police commissioner said, according to a report in *The Dhaka Tribune* newspaper.

3- A dysfunctional compensation system that's withholding paycheques from federal workers has also been breaching their privacy, *CBC News* has learned. Newly released documents show senior

officials were warned as early as Jan. 18 that the new Phoenix system has a flaw that allows **widespread access to employees' personnel records, including social insurance numbers.** Despite the warning, the faulty software was broadly implemented this spring — **without alerting the unions or any employees that their private details were no longer** secure. The disclosure of a massive privacy breach appears in documents obtained by *CBC News* under the Access to Information Act, deepening a crisis that has already touched some 80,000 public servants and triggered a wave of hiring to patch the problems.

International

United States / États-Unis

4- *Washington Post* columnist **David Ignatius** refers to an **upcoming forecast** by the Washington-based **Institute for the Study of War** which states that by **January 2017,** the **Syrian al Qaeda affiliate Jabhat al-Nusra** "will have **created an Islamic emirate in northwestern Syria in all but name** and will **merge** with the supposedly more **moderate Ahrar al-Sham.** The merger, even if incomplete, will accomplish a major Jabhat al-Nusra objective to unify the northern Syria opposition under its own leadership".

United Kingdom / Royaume-Uni

Light coverage/couverture légère.

Europe

5- En **dernière heure**, *l'Agence France-Presse* rapporte que **trois militaires français ont été tués en Libye**, a annoncé le ministère français de la Défense, **confirmant ainsi pour la première fois la présence de soldats français dans ce pays**. "Le ministre de la Défense, **Jean-Yves Le Drian**, déplore la perte de trois sous-officiers français décédés en service commandé en Libye", a annoncé dans un communiqué le ministère, sans plus de précisions.

6- En entrevue à L'*Express,* **l'ancien patron du renseignement, sous la présidence de Nicolas Sarkozy, Bernard Squarcini livre son diagnostic sur l'état de la lutte antiterroriste. Il recommande notamment de recourir aux compétences de spécialistes non policiers, pour mieux définir les priorités**. Comment expliquer que **Mohamed Lahouaiej Bouhlel ait pu effectuer près de 2 kilomètres au volant du camion** et provoqué la mort de plus de 80 personnes avant d'être intercepté? La question est légitime, d'autant plus que Nice est une ville bien sécurisée.

7- **Isis** released a **video** yesterday showing **'Muhammad Riyad',** the **17-year-old perpetrator** of the **axe attack** on a **Bavarian commuter train,** proclaiming in Pashto that **"I will do a martyrdom operation in Germany today."** The teenager **pledged allegiance to Isis** saying **Islamic State fighters** had **settled in "infidel" countries,** vowing: "God willing, you will be targeted in your villages, in your cities, in your airports, in your streets. The Islamic caliphate is strong enough to target you everywhere, even in your Parliament." While **German authorities** have **authenticated the video,** they now believe the **attacker**, who **registered in Germany** under the name **'Riaz Kahn'** and is identified in some media reports as 'Riaz A', is **not from Afghanistan,** but rather a **Pakistani** who pretended to be Afghan on arrival in Germany in 2015 in order to have a better chance at securing asylum. (Extensive coverage / vaste couverture).

8- The **FSB raided** the **Moscow offices** of the **Investigative Committee** Tuesday, a move the *New York Times* called **'baffling'** and a **'rare sign of dysfunction** in the **country's domestic security services'**. The FSB **arrested a deputy head** of the headquarters **Denis Nikandrov** on **suspicion** of **taking a bribe** from **Organized Crime** and the two top officials in the department of internal affairs, **Mikhail Maksimenko** and **Aleksandr Lamonov.**

Africa / Afrique

9- **Human Rights Watch** says **security agencies** are **killing** and **abducting men** in **northeast Kenya** who they suspect of **links to Islamist extremists** reports *Agence France-Presse*.
10- Selon *Le Matin*, un élu de Nampala au Mali a déclaré que des **hommes armés ont attaqué mardi le Camp de Nampala.** Il appert que les assaillants «ont actuellement le contrôle du camp, il y a des victimes, mais on n'a pas encore le nombre exact», a indiqué l'élu. Les attaques jihadistes ont été longtemps concentrées dans le nord du Mali, mais elles se sont étendues à partir de 2015 vers le centre, puis vers le sud du pays. **Le centre du Mali est une zone où est basé le Front de libération du Macina (FLM), un groupe apparu début 2015 et dirigé par le prédicateur radical malien Amadou Koufa, un Peul.**

Middle East / Moyen-Orient

11- *Reuters* reports that **European powers** are trying to develop better means for pre-emptively spotting **"lone-wolf" militants** from their online activities and are looking to Israeli-developed technologies, a senior EU security official said yesterday.
12- The *Jerusalem Post* reports that the **Islamic State terrorist group reportedly has dormant sleeper terror cells** in Syrian refugee camps in Lebanon which it may activate, according to a recent Western embassy report.
13- *Asharq Al-Awsat* reports that **experts in radical Islamist groups' affairs** have warned of ISIS's dodging approach and the increasing terrorist attacks it is staging in many countries around the world.

Afghanistan/Pakistan

Light coverage/couverture légère.

Australia, New Zealand / Australie, Nouvelle-Zélande

14- Amid growing concerns about Beijing's assertiveness in the **South China Sea**, **Malcolm Turnbull** and US Vice-President **Joe Biden** have pledged to **step up joint military training to deal with "any challenge"** in the region. Australia has also agreed to **broaden its training commitment in Iraq**, to instruct law enforcement officers in **counter-terrorism techniques to help them retain areas recaptured from Islamic State** and keep order there. Mr Biden said there would be a greater unity between US and Australian forces, stressing "it's important that we stand together". "We also discussed steps Australia and the US are taking so our troops can train more together and increase our interoperability so that we are fully prepared to respond to any challenge — to any challenge — in the Pacific with a united front," Mr Biden said after talks with Mr Turnbull in Sydney. On Iraq, *The Australian* has been told Mr Turnbull and Mr Biden shared a strong view that as more areas were recovered from ISIS, it was crucial they should be stabilised. Law enforcement training will be carried out by **Australian Defence Force** instructors already in Iraq and will not require sending additional trainers.

Asia / Asie

15- The *New York Times* reports **Bangladeshi-Canadian Tamim Chowdhury** is the **'most talked about'** of the **10 'high-value' Isis recruiters** being sought by authorities in Bangladesh. **Chowdhury** is believed by some analysts to act as a **coordinator** of the **Islamic State's activities in Bangladesh** and **parts** of **northeast India. Zayadul Ahsan Pintu**, a **journalist** who has published widely on the country's militant networks, said **"Chowdhury, in particular**, "is the **connection** from **Bangladesh** to **Syria**."
16- According to *Yonhap News Agency*, South Korea's government on Wednesday **condemned North Korea's resumption of encrypted number broadcasting**, a method used in the past to send orders to its spies operating in the country. The Ministry of Unification expressed "deep regret" over the North's latest provocation. Pyongyang on Friday resumed the broadcasting after a 16-year-long hiatus following Seoul's decision a week earlier to deploy an advanced U.S.

antimissile system in South Korea by the end of 2017. "We can't speak conclusively about North Korea's hidden intentions behind the broadcasting. But we urge North Korea desist from such outdated practices and seek ways to promote inter-Korean ties," Unification Ministry spokesman Jeong Joon-hee said in a press briefing. South Korean intelligence authorities are reportedly trying to figure out why Pyongyang resumed this type of communication, particularly in the digital era when it could have simply given out orders via the Internet.
17- Tough religious restrictions on Muslim minorities in China's far west **may have driven more than 100 to join the Islamic State group**, a US think tank said Wednesday. Beijing has long claimed that **IS is recruiting Uighurs from the mainly Muslim region of Xinjiang**, and blamed outside forces for fomenting deadly acts of violence there and elsewhere in China that have claimed hundreds of lives. At the same time, authorities have banned or strictly controlled the observance of certain Muslim practices, such as growing beards and fasting during Ramadan, saying they are symbols of "Islamic extremism". Those policies "could be a push factor driving people to leave the country and look elsewhere for a sense of 'belonging'", the Washington, DC-based **New America Foundation** wrote in a study of leaked registration documents for IS fighters. The findings were based on data from more than 3,500 foreign recruits provided by a defector from the jihadist organisation, writes the *Agence France Presse.*
18- *Press Trust of India* reports that **ISIS operatives in India** had approached Naxalite groups to understand their modus operandi for perpetrating terror and were also planning to buy firearms from them, NIA has said, revealing the sinister plans of the international terrorist outfit.
19- *BDNews24* reports that **Prime Minister Sheikh Hasina** has said that a "special team" comprising members from all the **security agencies** has been formed to probe the root of the current terror menace in Bangladesh.

Americas / Amériques

20- **Brazilian intelligence**, reports *Reuters,* is **investigating all threats** to next month's **Rio Olympics** after a presumed **Brazilian Islamist group** called **'Ansar al-Khilafah Brazil' pledged allegiance** to **Islamic State. Some terrorism experts** in the **United States** are wondering if **Ansar al-Khilafah Brazil even exists** though a **U.S. counter-terrorism official** told *ABC News* that while **Isis isn't known to have any cells in Rio de Janeiro**, "we **should take every threat like this seriously**."

CSIS in the News/Le SCRS dans les nouvelles

Light coverage / couverture légère.

Canada

1-The **Turkish government is calling on Canada to "take the necessary steps**" to address what it describes as a **terrorist organization responsible for last week's failed coup**. Turkish Consul-General **Erdeniz Sen** told *The Globe and Mail's* editorial board Thursday that his country, which has detained thousands of people since the attempted coup, has "concrete evidence" that the followers of the religious cleric **Fethullah Gulen**, who now lives in selfimposed exile in the **United States**, are behind the plot. Mr. Gulen has denied involvement. Mr. Sen declined to say whether there are **specific actions** it has asked the **Canadian government to take**, but said it's a subject his **country has raised routinely with its Canadian counterparts in the context of terrorist threats.**

2-Public servants had their **private information breached twice when Ottawa launched its new computerised pay system, the government said Thursday**. The deputy minister of Public Works, **Marie Lemay**, confirmed the incidents in an open letter to staff posted on the department's web site Thursday afternoon. The statement comes two days after *CBC News* first reported **on privacy problems caused by 'Phoenix'.**

International

United States / États-Unis

3-Speaking to *Washington Post* columnist David Ignatius, Director of National Intelligence **James Clapper questioned the recent "groundswell" of concern** about **Jabhat al-Nusra**, saying the Syrian al-Qaeda affiliate poses only a "**nascent" danger to the U.S. homeland** and **"doesn't approach the threat"** posed by the **Islamic State.** Jabhat al-Nusra's ability to **attack the United States** and **Europe** is **"aspirational" rather than "imminent,"** he said, describing as overly "strident" recent news reports about increasing evidence of external plots by the group. As for **Turkey's claim** that cleric **Fethullah Gulen planned the attempted coup,** Clapper commented it **lacks credibility** and that Secretary of State John F. Kerry "was right on the ball" to press the Turks to back up their extradition request with evidence of Gulen's involvement. "We haven't seen it yet. We certainly haven't seen it in intel."

4-*The Intercept* reports **Edward Snowden** has been working with **prominent hardware hacker Andrew "Bunnie" Huang** to develop a way for **potentially imperiled smartphone users** to **monitor** whether their devices are making any **potentially compromising radio transmissions.**

United Kingdom / Royaume-Uni

5-Rumors which have been circulating in the British media that **Foreign Secretary Boris Johnson** will **not oversee MI6** and **GCHQ** as is customary have been **squelched** by the **Foreign Office** which informed *Politics.co.uk.* "as has been long standing practice, responsibility for SIS and GCHQ lies with the foreign secretary. This has not changed and will not change".

6-Figures released by the **Office of National Statistics** say that **one in ten British adults** have been **victims of cyber-crime** reports the *Times of London.* An estimated **5.8 million** fraud and **cyber-offences** are committed annually.

Africa / Afrique

7-**President Muhammadu Buhari** announced the **Nigerian government** is in **talks** with the militant **Niger Delta Avengers** in an effort to end a string of **attacks** on oil **and gas facilities** reports *Reuters.*
8-Le Mufti de la Libye considère la présence de soldats français sur le sol libyen comme une déclaration de guerre. Le **Mufti de la Libye, Saddok Al-Ghariani, a estimé que l'annonce par le ministère français de la Défense de la mort de trois de ses soldats à l'ouest de la ville de Benghazi constituait une "déclaration de guerre"** à la Libye, appelant les **Libyens à dénoncer cette ingérence rapporte** *Pan African News Agency.*

Middle East / Moyen-Orient

9-The *Fars News Agency* reports that Iranian Interior Minister Abdolreza Rahmani Fazli announced that the country's **security forces** have discovered a secret tunnel in Eastern Iran that the **terrorists sought to use for sabotage operations**.
10-The *Jerusalem Post* reports that **Al-Qaida-influenced terrorists** have issued directives to **"lone wolf" attackers** to carry out attacks against the Israeli Olympic delegation at the upcoming Rio Olympics, The Foreign Desk reported Thursday.
11-*Naharnet Newsdesk* reports that **Kuwait's court of appeals** on Thursday upheld the death sentence to a Shiite citizen and Hizbullah member convicted of forming a **pro-Iran cell and plotting attacks** in the Gulf state.

Afghanistan/Pakistan

12-The *Pakistan Dawn* reports that India on Thursday alleged that the protests in India-held Kashmir during observance of **'Kashmir's Accession to Pakistan Day'** and 'Black Day' were led by UN-designated terrorists.
13-*Pajhwok Afghan News* reports that a **would-be suicide bomber**, who was after **First Vice-President Gen. Abdul Rashid Dostum** to assassinate him during Eid days, has been arrested in northwestern Jawzjan province, local officials said on Thursday.

Europe

14-In conversation with *Reuters,* **Turkish President Erdogan** said there were **significant intelligence failures** ahead of last week's attempted military coup. "It is very clear that there were **significant gaps** and **deficiencies in our intelligence**, there is no point trying to hide it or deny it. I told it to the head of national intelligence," Erdogan said. **Yasin Aktay**, the **deputy chair** of the ruling **AKP Party,** disclosed to Russia's *Sputnik* that **Turkish intelligence** had those **involved** in the **coup attempt under surveillance. "There were lists [of participants before the coup]. The country's intelligence spied on all of them**… Of course it knows who is who but everything is in line with the law. We never struggle with people only because they are adherents of a certain organization or have certain political views," Aktay said.
15-Both **Amnesty** and **Human Rights Watch** have accused **Ukrainian intelligence** of engaging in **abuse** and **torture** during the current conflict with rebel separatists, a **charge the SBU denies.** However, the *New York Times* points out as recently as May, the SBU **refused** to allow a **United Nations delegation** investigating reports of torture **access to sites** where **suspects were alleged to be held illegally.**
16-Selon *Radio France Internationale,* une **opération anti-terroriste a été menée jeudi dans la ville d'Argenteuil**, dans le Val d'Oise. Deux logements étaient visés. Les **policiers de la Direction générale de la sécurité intérieure (DGSI) avec l'appui des policiers d'élite du Raid**

ont perquisitionné à Argenteuil à deux adresses différentes. Cette opération est sans rapport avec l'attaque menée le 14 juillet à Nice, elle visait à vérifier un renseignement anonyme faisant état d'un **projet d'action violente, a indiqué une source policière, qui a précisé que la section antiterroriste du parquet de Paris est saisie des investigations**. Les policiers sont sortis avec trois femmes et un homme menottés d'un des deux endroits visités. Lors de la visite du second logement, deux personnes ont été arrëtées.
17-Le 20 juillet, la **Sous-direction antiterroriste (SDAT) a envoyé aux agents qui gèrent la vidéosurveillance de la ville de Nice une « réquisition judiciaire urgente » leur demandant « l'effacement complet des enregistrements de vidéosurveillance de l'ensemble des caméras desservant la promenade des Anglais** filmant pour la plupart d'entre elles **l'action terroriste commise le soir du 14 juillet »** . « C'est la première fois que l'on nous demande de détruire des preuves, précise une source proche du dossier rapporte *Le Figaro.*

Australia, New Zealand / Australie, Nouvelle-Zélande

18-**Malcolm Turnbull** has ordered **Australia's counter-terrorism agencies to urgently develop a strategy to prevent rapidly radicalised terrorists carrying out Nice-style attacks in public areas**. Senior sources have told the *Australian* the Prime Minister is particularly concerned that while it would be hard for a **terrorist to obtain a cache of automatic weapons here**, an **attack using a vehicle as a weapon** could cause devastating casualties.

Asia / Asie

19-The *Times of India* reports that days before Bangladesh home minister Asaduzzaman Khan Kamal is to visit India, the **National Investigation Agency (NIA)** has been asked to probe the Dhaka link to Islamic State operative Abu Al-Musa Al-Bangali, who was arrested from Burdwan two weeks ago.
20-The *Dhaka Tribune* reports that investigators suspect that the three local militant groups who carried out the **Gulshan terror attack** were assisted by several foreign extremist groups as well as some home-grown militant leaders now staying abroad. A key suspect behind the Gulshan terror attack is **Bangladesh-origin Canadian citizen Tamim Ahmed Chowdhury**.
21-South Korea is beefing up its government wide countermeasures to prevent **possible cyberattacks by North Korea,** officials said Friday. The **Ministry of Science, ICT and Future Planning** said the number of **cyberattacks by North Korea more than doubled in the first half of this year**. The cyberattacks **"are judged as a part of North Korean provocations to trigger public anxiety"** in South Korea, the ministry said. Last month, South Korean police said North Korea hacked into more than 140,000 computers at 160 South Korean firms and government agencies. About **42,000 documents were suspected to have been stolen, including defense-related information**, writes the *Yonhap News Agency.*
22-According to the China Daily, Islamic leaders in China urged Muslims **not to fall into the trap of religious extremism** and vowed to improve their guidance to help believers stay on the peaceful path of Islam. **"War and violence are never seen as holy in Islam. The extremists' theories of going to heaven after killing and treating non-Muslims as enemies are just not among the teachings,"** said **Ma Guangyue,** imam of Laowang Mosque in Gansu province, at an international forum on eliminating religious extremism on Thursday. About **100 Islamic leaders and scholars from China, Russia, Kyrgyzstan, Tajikistan, Uzbekistan and Kazakhstan participated in the two-day forum** held in Urumqi, capital of the Xinjiang Uygur autonomous region. The forum started on Wednesday.

Americas / Amériques

23-**Brazil's Justice Minister Alexandre de Moraes** said the **10 people arrested yesterday** on suspicion of **supporting** the **Islamic State** and preparing acts of **terrorism** during next month's **Olympics in Rio,** were an **"absolutely amateur cell, with no preparation at all, a**

disorganized cell". de Moraes said those apprehended were **all Brazilian citizens** and in contact via internet messaging groups such as WhatsApp and Telegram, but **did not know each other personally** and were **not in direct contact with Isis** though some of its members had made **"pro forma" declarations of allegiance** to the militant Islamist group. It's **unclear** whether **any of the 10** were members of the extremist **'Ansar al-Khilafah Brazil'**.

CSIS in the News/Le SCRS dans les nouvelles

1- Speaking to the *Toronto Star,* **Wayne Driver** said his **son Aaron** had been **estranged** from much of the family for years. **Driver supported** his **son's conversion** to **Islam** until he **realized how radical he had become**, explaining sometime around **Christmas 2014**, he was **contacted** by the **'Canadian Security Intelligence Committee'**. Driver recalled feeling **sick and perplexed** when shown an **inch-thick file** outlining his **son's online comments** saying it included photos of mass graves and people who had been beheaded, with his son allegedly claiming that the people depicted deserved to die. "I don't understand," the elder Driver said, noting that he's always felt such acts epitomize cowardice and cruelty. "It's not like butterflies. It's like somebody has punched you in the stomach."

2- **Ralph Goodale's media announcement** in Montreal yesterday that the **federal government** will allocate **$35 million** over five years on **de-radicalization programs doesn't impress Christianne Boudreau** who told Toronto radio commentator **Tasha Kheiriddin** (as related in Kheiriddin's column in *iPolitics*) that **"it's a camera, election, posturing thing. They really need to start putting action behind their words."** The column briefly notes that Boudreau's son, **Damian Clairmont, was under CSIS surveillance** for two years before he left Canada.

Canada

3- A **friend** of **Aaron Driver** described him to the *London Free Press* as a **"normal guy"** but the **death** of his **infant son** devastated him and **likely** played a **significant role** in his path to **radicalization.**

4- Selon *La Presse canadienne,* **à l'issue de sa tournée de collecte d'informations en Afrique, le ministre de la Défense dit avoir une idée très claire du nombre de soldats** qu'il déploiera dans des **missions d'appui à la paix sur le continent.** « J'ai un chiffre que nous annoncerons bientôt, et qui pourra être maintenu à long terme », a affirmé **Harjit Sajjan en conférence téléphonique depuis la République démocratique du Congo (RDC)**, lundi. Le ministre de la Défense n'a pas fourni davantage de précisions sur les pays et les régions où des Canadiens pourraient être déployés, disant ne pas disposer de toute l'information nécessaire à cette prise de décision. L'analyse des besoins ne se fera pas nécessairement par pays, mais bien par région, a expliqué le ministre.

International

United States / États-Unis

5- The Washington-based non-partisan think-tank the **Stimson Center,** reports *Agency France-Presse,* has compiled a study which warns **America's estimated stockpile** of about **50 nuclear bombs** at the **Incirlik military base** in **southern Turkey** are at **risk** of **being captured** by **"terrorists** or other **hostile forces"** and thus, from a security point of view, it's a **"roll of the dice"** to continue to have the weapons stored there.

6- A **mysterious hacker** or **hackers** going by the name **'The Shadow Brokers'** claims to have **hacked** the **'Equation Group', linked to the NSA,** and **dumped** a bunch of its **hacking tools.** In twist, the hackers are also asking for 1 million bitcoin (approx. $568 million) in an auction to

release more files. *VICE Magazine's* 'Motherboard' notes **Kaspersky Lab unmasked Equation Group in 2015,** billing it as the **most advanced hacking group** Kaspersky researchers had ever seen. While Kaspersky Lab **stopped short** of saying **it's the NSA,** its researchers laid out **extensive evidence pointing** to the **Agency,** including a long series of code names used by the Equation Group and found in top secret NSA documents released by Edward Snowden.

United Kingdom / Royaume-Uni

7- The *Indo-Asian News Service* reports that **British MPs** are being taught unarmed street-fighting techniques used by the **Israeli intelligence agency Mossad** in a bid to protect themselves from stalkers, terrorists, and political extremists in the light of Jo Cox's murder, it was reported on Monday.

Europe

Light coverage / couverture légère.

Africa / Afrique

8- A study released Monday by the **Intergovernmental Authority on Development** has identified **al Shabaab** as a **"Transnational Security Threat",** reports the *Washington Post,* posing a **rising menace** to **nations across East Africa** with its ability to **recruit young men** and **women from countries beyond** its **Somali power base.**

Middle East / Moyen-Orient

9- *The National (UAE)* reports that **security forces in Aden smashed an Al Qaeda cell** as the militants were preparing to detonate a car bomb in the Yemeni city.
10- *Press TV* reports that **security forces in Iran** have killed an "instrumental" member of the Takfiri terrorist group of Daesh and busted the **terror cell** he belonged to during clashes in the country's west, an Iranian official says.

Afghanistan/Pakistan

11- The *Pakistan Dawn* reports that Chief of Army Staff (COAS) General Raheel Sharif on Tuesday confirmed the **death sentences of 11 'hardcore terrorists' involved** in committing **"heinous offences related to terrorism,"** said an Inter-Services Public Relations statement.

Australia, New Zealand / Australie, Nouvelle-Zélande

12- The **New Zealand government is set to break a long-standing ban on the Government Communications Security Bureau (GCSB) spying on New Zealanders** with a sweeping revamp that brings our spy agencies under a single law. The *Dominion Post* explains that **Prime Minister John Key** yesterday said Cabinet had accepted the bulk of changes, including extra powers for the GCSB, as recommended by the Cullen-Reddy review in March. He said the changes were the most significant reform to the agencies' legislation in the country's history.

Asia / Asie

13- *Reuters* reports that **Bangladeshi authorities** named a third prime suspect on Monday in their investigation into the July 1 attack at a Dhaka cafe in which 20 hostages were killed, most of them foreigners. Police say **Tamim Ahmed Chowdhury, a Canadian citizen** and the prime suspect, is still at large in Dhaka. Analysts say ISIS identified him in April as its national commander.
14- *The Hindu* reports that asserting India's right to question **Tahawwur Rana**, a close associate of David Coleman Headley charged in the **2008 Mumbai terror attacks**, senior officials of the Home Ministry quietly visited the United States early this month to press for his extradition.

15- The *Yonhap News Agency* reports that **South Korea said today that more information is needed to analyze whether control of North Korea's intelligence agency** has changed following the latest overhaul of its cabinet organization. The **Ministry of State Security, Pyongyang's intelligence agency,** was previously placed under the control of the powerful **National Defense Commission (NDC)** before the country's parliament replaced the NDC with a newly created state apparatus named the State Affairs Commission (SAC) in late June.
16- **China has tested 21 new pieces of security equipment**, including drones, during a **counter-terrorism exercise** in the western region of Xinjiang, state media said today, as it strengthens its presence in the violence-prone area. *Reuters* points out that hundreds of people have been killed over the past few years in resource-rich Xinjiang, strategically located on the borders of central Asia, in violence between the **Muslim Uighur people** who call the region home and ethnic majority Han Chinese.

CSIS in the News/Le SCRS dans les nouvelles

1- Addressing a supportive crowd in Bridgetown, Nova Scotia Tuesday, **Prime Minister Trudeau,** in his **first reaction** to the **death of Aaron Driver**, said that **balancing individual rights** with keeping **Canadians secure from threats** has to be **handled with care. Trudeau congratulated** the **security services** and police for ``having managed to prevent any serious incidents related to this particular individual." In its reporting, the *Canadian Press* observed that during the **last federal election**, the **Liberals pledged** to **guarantee** that **all Canadian Security Intelligence Service warrants respect** the **Charter** and also indicated they would **limit the Communications Security Establishment's powers** by requiring a warrant to engage in the surveillance of Canadians.

2- In the wake of the **Aaron Driver case**, **Phil Gurski,** a **radicalization expert** who **retired last year** after a career with the **Canadian Security Intelligence Service** and **Communications Security Establishment**, told the *National Post* that "I think it calls for a little more **in-depth assessment and analysis of these guys**. We have to come up with a system where **assessments are being done on a regular basis**. So what that means is you're going to have to have **other warrant powers,** or **source powers** or something. Or maybe you **talk to Driver once every two weeks** as opposed to **once every three months** kind of thing."

Canada

3- *Le Journal de Montréal* indique que le **collectif de pirates informatiques dénonce les scandales de corruption Le collectif Anonymous a piraté hier le site de l'Association des firmes de génie-conseil du Québec** qui n'a pas été impressionnée par les prouesses des pirates. Le visage de **Guy Fawkes**, symbole du groupe Anonymous, est apparu sur le site de l'Association des firmes de génie-conseil. Des **noms de dossiers ont aussi été remplacés par des termes faisant allusion au scandale de corruption comme «fraude», «détournement de fonds» «appels d'offres truqués».**

4- Meeting in Ottawa, the **Canadian Association of Chiefs of Police** has **passed a resolution** calling for a **legal measure to unlock digital evidence,** saying **criminals increasingly use encryption** to **hide illicit activities** reports the *Canadian Press*. There is **nothing currently in Canadian law** that would compel someone to **provide a password to police** during an investigation, **RCMP Assistant Commissioner Joe Oliver** said. In response, **David Christopher**, a spokesman for **OpenMedia**, a group that works to keep the internet surveillance-free, called the proposal **"clearly unconstitutional"**. Public Safety Minister Ralph Goodale is scheduled to address the Association this morning.

International

United States / États-Unis

5- Speaking confidentially to the *Washington Post,* **two former members** of the **NSA's hacking division** known as **Tailored Access Operations** (TAO), said they have **no doubt** the **online unmasking** of **Agency espionage tools** with **code names** such as **'Epicbanana', 'Buzzdirection'** and **'Egregiousblunder'** is **genuine**. "Without a doubt, **they're the keys to the kingdom**," said

one former TAO employee."The stuff you're talking about would **undermine the security** of a lot of **major government** and **corporate networks** both here and **abroad**."
6- On his **Twitter account** Tuesday, **Edward Snowden** speculated the exposure of espionage tools from the **'Equation Group'**, allegedly **linked** to the **National Security Agency, is likely a message from Moscow. "Circumstantial evidence** and **conventional wisdom** indicates **Russian responsibility,"** Snowden tweeted. "This leak is likely a warning that someone can prove U.S. responsibility for any attacks that originated from this malware server. That could have significant foreign policy consequences. Particularly if any of those operations targeted U.S. allies. Particularly if any of those operations targeted elections." (Extensive coverage / vaste couverture).
7- Accompanied by **Governor Chris Christie** and **national security advisor retired Lt. Gen. Michael Flynn, Donald Trump** is scheduled to receive his **first classified intelligence briefing** in **New York today.** (Moderate coverage / couverture modérée).

United Kingdom / Royaume-Uni

8- **Radical cleric Anjem Choudary,** whom the *Guardian* reports is believed to have **inspired at least 100 people from Britain into terrorism**, including organizations committed to **campaigns** of **murder against** the **West**, f aces up to a **decade in prison** after he was **found guilty** of **inviting support for Islamic State** in a **series** of **lectures released** on **YouTube. Security sources**, adds *The Times of London,* said that **Choudary's conviction** marked a **seismic moment** in the **fight against terrorism**. Choudary was found guilty last Thursday of terrorism offences after a five-week trial but all reporting was banned until the conclusion Tuesday of a linked trial of other alleged radical preachers. He will remain in Belmarsh high-security prison in southeast London until his sentencing next month.

Europe

9- Selon *La Tribune de Genève,* arrêté à l'aéroport de Zurich, placé en détention, un jeune de 29 ans est accusé d'être en lien avec une organisation terroriste. Un **Genevois parti il y a neuf mois sur le chemin du djihad a été arrêté à son retour en Suisse**, a appris la Tribune de Genève. **H. est accusé par la justice d'être en lien avec une organisation terroriste.**
10- Le 25 septembre, les **Suisses votent sur la nouvelle loi sur le Renseignement, combattue par un référendum de la gauche. L'ancien chef du Service de renseignement suisse, Peter Regli,** la juge nécessaire dans le contexte actuel La loi sur le renseignement (LRens) **élargit les moyens d'action du Service de renseignement de la Confédération (SRC)** rapporte *Le Temps,*(Suisse).
11- **Germany's public broadcaster *ARD*** has viewed a leaked **German government document** which charges **Turkey** has been **deliberately financing Islamist** and **terror organizations** with the **direct consent** of **President Recep Tayyip Erdogan.**

Africa / Afrique

12- Selon *Jeune Afrique,* les **autorités marocaines ont annoncé arrêté quatre sympathisants présumés du groupe jihadiste État islamique (EI),** accusés de planifier des **attentats contre des "sites vitaux" à Casablanca**. « Le Bureau central d'investigations judiciaires (BCIJ) a démantelé une cellule terroriste composée de quatre extrémistes s'activant entre Casablanca et la commune de Mograne », une localité rurale à une cinquantaine de kilomètres de Rabat.

Middle East / Moyen-Orient

13- The *Jerusalem Post* reports that the **Shin Bet (Israel Security Agency)** on Tuesday announced that it had taken down a number of **terrorist cells** in the West Bank whose members had been recruited through Facebook by elite Hezbollah Unit 133 in Lebanon and the Gaza Strip.

14- *The National (UAE)* reports that **Russia** on Tuesday started using **an Iranian airbase to launch strikes on targets in Syria**, further entrenching itself in the Middle East and its conflicts.

Afghanistan/Pakistan

15- `The *Express Tribune* reports that in an attempt to promote restraint and responsibility in South Asia, **Pakistan** has offered its nuclear-armed arch rival for a bilateral arrangement on **non-testing of nuclear weapons**, the Foreign Office said on Tuesday.

Australia, New Zealand / Australie, Nouvelle-Zélande

16- The **Chinese embassy has warned that the rejection this year of two bids by Chinese companies to invest in Australia** showed "clear protectionist tendencies" which would have a "serious impact on the enthusiasm" of firms wanting to invest in Australia. "The Chinese government is highly concerned about the statement by the **Australian Treasurer** on his preliminary decision to block the sale of the 50.4 per cent of Ausgrid in a 99-year lease to foreign bidders on **national security grounds**," the embassy said yesterday in reply to questions from *The Australian*.

Asia / Asie

17- The *Bangladesh Daily Star* reports that banned in 2005 and subsequently broken down, the **Jama'atul Mujahideen Bangladesh (JMB)** took only nine years to reorganise. **Bangladeshi-Canadian named Tamim Ahmed Chowdhury**, who, according to IS propaganda magazine Dabiq, identifies himself as Shaykh Abu Ibrahim Al-Hanif, is leading the group as its operational commander.

18- In **breaking news,** the *Yonhap News Agency* reports that a **high-ranking North Korean diplomat stationed in Britain defected to South Korea**, Seoul's unification ministry said Wednesday, in the latest in a series of high-profile defections by the North's elite.**Thae Yong-ho**, a minister at the North's embassy in London, has arrived in South Korea with his family, the Ministry of Unification said, without unveiling further details.

19- **China's pending cyber security law** will not create obstacles for foreign business, **China's Foreign Ministry** said, responding to concerns by international business lobbies over the planned rules, *Reuters* reports. "As for the legal requirement for internet operators to provide relevant data in the course of **enforcement agencies' counter-terrorism** and criminal investigations, this is necessary for safeguarding national security and investigating crimes. All countries do this," the ministry said.

20- *Kyodo News* reports that **Japan lodged a protest Wednesday after China Coast Guard vessels** entered Japanese territorial waters around the **Senkaku Islands** in the **East China Sea**. Chinese government ships and fishing boats have repeatedly sailed near the uninhabited islands, which China claims and calls Diaoyu, drawing protest from Tokyo.

Americas / Amériques

21- Pointing to the **Rio Olympics** as an **example**, ***The Intercept's* Lucas Figueiredo** lays out a case that **for years Brazilian intelligence** has **stoked terrorism fears for its own benefit**. Figueiredo writes that "for years, the secret service has fought to raise its budget and prestige in the state's hierarchy. Recently, it requested the right for its agents to wiretap and carry firearms. **ABIN** continues to hope for increased power and resources and refuses to abandon its dark legacy from the dictatorship era. Its current general director, **Wilson Roberto Trezza**, is a veteran from the SNI era. After the Olympics, he might be substituted out for Janér Tesch Hosken Alvarenga, yet another agent trained in the National Information Service".

CSIS in the News/Le SCRS dans les nouvelles

1- In an op-ed appearing in *The Hill Times*, Phil Gurski writes: If there is one spy agency in Canada that is poorly understood and about which much of little veracity has been published it has to be **CSE, or the Communications Security Establishment**. CSE has a number of roles, but the one that gets the most public attention is signals intelligence, or **SIGINT**. This method of intelligence collection entails capturing telecommunications in a variety of forms by a variety of techniques, few of which are known. This is indeed a good thing: the spy agency that openly shares how it gathers intelligence will not be in the spy business very long. This may sound sacrilege to some, but some things need to remain secret. CSE is not a law-enforcement agency and does not go to court to acquire warrants to collect information, unlike **CSIS** and the **RCMP**. It is limited to the collection of intelligence outside Canada and it cannot include Canadians (or Americans, British, Australians, and New Zealanders for that matter—Canada's so-called "**five eyes" partners**) in its dragnet.

Canada

2- *La Presse+* révèle que le **controversé imam Hamza Chaoui, au cœur l'an dernier d'un projet avorté de « centre communautaire islamique » destiné aux jeunes Montréalais, offre maintenant ses enseignements religieux dans des lieux publics. L'homme organise occasionnellement des sorties, destinées aux jeunes hommes, qui mélangent « soccer, rappels religieux, barbecue », selon sa page Facebook. Elles s'ajoutent à ses cours hebdomadaires à la mosquée Sounna, dans Parc-Extension.** La dernière sortie a eu lieu à la fin du mois d'août au parc Jarry. Il en a publié des images sur les réseaux sociaux. On l'y voit s'adressant à un groupe d'une douzaine de jeunes, dont au moins deux enfants.

International

United States / États-Unis

3- At the behest of **Director of National Intelligence James Clapper**, **U.S. intelligence** and law enforcement agencies are probing what they see as a **broad covert Russian operation** in the **United States** to **sow public distrust** in the upcoming **presidential election** and in **U.S. political institutions** reports the *Washington Post*. A **senior intelligence official** cautioned that the **intelligence community is not saying it has "definitive proof" of such tampering,** or any Russian plans to do so. "But even the hint of something impacting the security of our election system would be of significant concern," the official said. "It's the key to our democracy, that people have confidence in the election system."

United Kingdom / Royaume-Uni

4- As **Isis loses territory** in its self-proclaimed caliphate, **security services** in the UK and **Europe** are bracing for the return of **'thousands'** of **jihadists** though the *Independent* reports **few foreign fighters** have **left Islamic State ranks** thus far with **under 10 coming home** to the UK in the past **eight months.**

5- With the **Snowden documents** as a guide, *The Intercept* pulls the veil back on **Menwith Hill,**

an **NSA surveillance base** in the **British countryside** near the small North Yorkshire town of Harrogate. Once used to monitor Soviet communications during the Cold War, the base is now utilized to aid **"a significant number of capture-kill operations"** across the **Middle East** and **North Africa**, fueled by **powerful eavesdropping technology** that can harvest data from more than **300 million emails** and **phone calls a day.**
6- Following a summer recess, a **House of Lords committee** has **resumed deliberation** of the government's **Investigatory Powers Bill,** particularly the **bulk powers** outlined in the legislation reports *The Register.* In correspondence with *The Register,* **former GCHQ director Sir David Omond** wrote "the recent **serious rise in global cybercrime** by organised criminal groups...has only reinforced the importance of having the **specialist techniques** and **international liaisons** of the **secret agencies** available to support the investigations of law enforcement".

Europe

7- Based on thousands of pages of **documents** and **photos** from **internal European investigations** and information from **sources** close to the investigation, *CNN* reports the **sophisticated Isis network** that plots **foreign strikes** had planned for the **carnage** in the **November Paris attacks** to be **far worse**, to **occur in other European countries** as well and, investigators believe, had planned to **follow them up** with **strikes in several locations.** Additionally, the documents point to the existence of **another suspected terrorist** -- never before named publicly -- who authorities claim is **linked** to the **Paris terror cell** and was on the loose in Europe for months after that attack. That man, identified by authorities as **Abid Tabaouni,** was only **arrested in July.**
8- Selon *Le Temps,* (Suisse), **cinq ministres latins sont venus défendre la loi soumise au peuple le 25 septembre. La sécurité collective le commande et elle n'est pas dangereuse pour les libertés individuelles, ont-ils plaidé.** Tous derrière la **loi sur le renseignement (LRens)** soumise au vote le 25 septembre. En tant que conseillers d'Etat, nous avons les mains dans le cambouis, explique **Béatrice Métraux**, Verte. **On sait ce que signifie terrorisme et djihadisme et on a le souci de défendre la population avant la politique de son parti.** » Or, assurer la sécurité ne saurait se faire sans autoriser les services de renseignement à agir dans la sphère privée: « On ne lutte pas contre les dangers d'aujourd'hui avec une loi du passé », estime Nathalie Barthoulot, ministre jurassienne socialiste. Pour parer au terrorisme et à l'espionnage notamment, il faut donc permettre les écoutes téléphoniques, les fouilles de domicile ou le hacking de systèmes informatiques. Au vu de l'évolution technologique, le **Service de renseignement de la Confédération (SRC) n'est plus en mesure de remplir sa mission,** selon les magistrats. D'autant plus que la Suisse est dépendante du bon vouloir des services étrangers.
9- D'après *Le Figaro,* un **surveillant a été attaqué à l'arme blanche dimanche par un détenu radicalisé, aidé par plusieurs complices.** Pas un acte isolé, mais concerté entre plusieurs détenus... À la **prison d'Osny, en France, dans un quartier dédié supposé accueillir les candidats à la déradicalisation**, l'agression dimanche de **deux surveillants, dont l'un gravement atteint, fait froid dans le dos. Le détenu auteur des faits, Bilal T.,** a frappé sa victime à l'aide d' « une lame de 25 cm très fine et très aiguisée qui a transpercé de part en part la gorge du surveillant. Selon des personnels pénitentiaires, **l'auteur de l'agression « aurait badigeonné l'une des portes de cellules du sang du surveillant et aurait levé les mains afin de prier » .**

Africa / Afrique

10- La France espionne l'Algérie. Les Etats-Unis espionnent la France. Tout le monde s'espionne. C'est une réalité connue de tous. La nouveauté ce sont **ces révélations confiées par Bernard Barbier, un ancien cadre des services d'espionnage français, Bernard Barbier, rapportés lors du Symposium central supélec.** Cet ancien espion confirme les révélations faites déjà par Le Monde en mars 2014. Le quotidien vespéral français avait révélé que les **services secrets**

français espionnait l'Algérie, le Canada, la Côte d'Ivoire, l'Iran grâce à un logiciel rapporte *Le Matin,* (Algérie).
11- **More than a dozen groups** have appeared since **attacks** on **Nigeria's oil pipelines resumed** earlier this year, each claiming their own constituencies and making their own demands reports the *Voice of America.* Some analysts believe the **government's decision to talk** with the **militant groups** is merely **encouraging them.**

Middle East / Moyen-Orient

12- The *Gulf News* reports that dual citizen **Canadians must show a Canadian passport** to enter the UAE under tightened entry rules effective September 30.
13- The *Jerusalem Post* reports that citing **Iran and its proxy terrorist organizations, Hamas and Hezbollah**, as the greatest existential threats to Israel, former **Shin Bet (Israel Security Agency)** head and current chairman of the Foreign Affairs and Defense Committee, Avi Dichter, said the Middle East is undergoing "tectonic movements."
14- The *Fars News Agency* reports that Commander of the Special Unit of Iran's Law Enforcement Police Brigadier General Hassan Karami announced that his forces have **killed three ISIL terrorists in the Western province of Kermanshah** who were equipped with suicide vests.

Afghanistan/Pakistan

15- The *Pakistan Dawn* reports that there has been a marked reduction in **terrorist attacks and deaths in Pakistan in 2015**, but terrorists seem to have become more lethal as the ratio of deaths per attack has increased.
16- *Pajhwok Afghan News* reports that the death toll from **twin suicide bombings has risen to 24 with another 91 people injured** in the latest attack on central capital Kabul on Monday, officials said.

Australia, New Zealand / Australie, Nouvelle-Zélande

17- A dangerous number of **Chinese nationals in Australia** owe their **primary allegiance** to **Beijing** rather than to Australia, **one of the country's leading strategic experts has warned**. Professor **Paul Dibb** says the **Chinese community** in Australia has adopted an increasingly - **strident pro-Chinese government view in recent years, largely influenced by the Chinese embassy in Canberra.** It is a trend, he says, that **risks fuelling a fresh backlash against foreign investment in Australia.** "The fact is that there are a considerable number of Chinese residents and students here that feel nostalgic about the **People's Republic and its ruling party,**" - Professor Dibb writes in *The Australian* today.

Asia / Asie

18- The *BDNews24* reports that **Mohammad Jahidul Islam**, the suspected militant killed during a raid on a house at Mirpur's Rupnagar is a former army officer, who left the job two years ago after returning from **Canada.**
19- Members of the G20 have agreed to **advance the anti-corruption campaign** and **refuse to offer "safe havens"** for corrupt officials who remain at large in foreign countries, reports the *China Daily.* Speaking to journalists at the end of the two-day G20 Leaders Summit in the lakeside city of Hangzhou, Zhejiang province, President **Xi Jinping** said important breakthroughs have been made this year in the fight against **graft with fugitive repatriations and recovery of assets**. G20 members have decided to **set up an anti-corruption research center in Beijing to provide intelligence support for capturing fugitives and recovering their illegal assets**. The summit also passed the **G20 2017-18 Anti-Corruption Action Plan**, Xi said. "These anti-graft achievements will leave corrupt officials no place to hide in G20 members' territories and in the world at large," Xi said. In recent years, many G20 economies, including the **United States** and

Canada, have become popular destinations for fugitive corrupt officials due to the lack of signed bilateral extradition treaties and legal differences, according to **China's Ministry of Public Security**. Many corrupt officials have transferred billions of yuan in ill-gotten assets to foreign accounts either through **money-laundering and underground banks**, according to the ministry.
20- The *Times of India* reports that probing Indian recruit of **Islamic State Mohammad Masiuddin alias Abu Musa's link with Jamaat-ul-Mujahideen Bangladesh (JMB) leaders** involved in the Dhaka attack, the National Investigation Agency has approached US, Germany, New Zealand and neighbouring Bangladesh seeking information about his online conversations.
21- According to *Yonhap News Agency*, President **Park Geun-hye** on Tuesday held a summit with her U.S. counterpart **Barack Obama** in Vientiane to discuss an array of issues, including North Korea's relentless saber-rattling, her office Cheong Wa Dae said. Their talks came amid **Pyongyang's continued provocations, including its launch of three mid-range ballistic missiles Monday**. The missiles traveled some 1,000 kilometers and fell into waters within Japan's air defense identification zone, Seoul's military officials said. Observers say the two leaders will use their summit to send a unified message against the communist state's provocations, and its evolving nuclear and missile programs.

CSIS in the News/Le SCRS dans les nouvelles

No mentions in the mainstream media. / Pas de mentions dans les médias traditionnels.

Canada

1- The *National Post* reveals that while **hiding out** in **Hong Kong** in **2013, Edward Snowden** retained the services **Canadian-born** and **trained lawyer Robert Tibbo** who hatched a plan that included a visit to the **UN sub-office** where **Snowden applied for refugee status** to **avoid extradition to the U.S.** "I had minutes to figure out how to get him to the UN, away from the media, and out of harm's way with the weight of the U.S. government bearing down on him. I did what I had to do, and could do, to help him," Tibbo told the *Post*. "They wanted the data and they wanted to shut him down. Our greatest fear was that Ed would be found."

2- *La Presse+* rapporte que l'un des **prêcheurs radicaux les plus influents d'Occident, suivi sur les réseaux sociaux par les terroristes canadiens Martin Couture-Rouleau et Michael Zehaf Bibeau, vient d'être condamné à plus de cinq ans de prison au Royaume-Uni** pour avoir soutenu le **groupe armé État islamique (EI). En 2013, il avait prédit un attentat au Canada.** Les Anglais le surnomment « l'homme le plus détesté » de leur pays, le « prêcheur de haine ». Anjem Choudary, avocat de 49 ans d'origine pakistanaise, prédicateur emblématique dans les milieux islamistes britanniques, marchait sur une fine ligne depuis plusieurs années. Il s'était fait « le porte-parole des extrémistes, faisant des commentaires des plus déplaisants, mais sans jamais franchir le seuil de la criminalité », comme l'a expliqué au Guardian le **commandant Dean Haydon, chef de l'escouade antiterroriste de Scotland Yard.**

3- **Brig.-Gen. Shane Brennan, commander** of **Canada's Joint Task Force-Iraq,** said the number of **Canadian intelligence officers** assigned to the **anti-Isis** effort based in **Kuwait** has **grown to 50.** Their mission, reports the *Canadian Press,* is to analyze the pictures taken by Aurora surveillance aircraft so the coalition can plan air strikes and ground operations.

International

United States / États-Unis

4- The *Associated Press* reports a **congressional committee examination** of the **Office of Personnel Management breach** found that while officials were **closely monitoring** the **online activities** of **one suspected hacker for months** and had devised a plan to **expel him** when he got **too close** to **critical information**, they were **unaware** of the presence of a **second hacker** who had **infiltrated** the **system posing** as an **employee** of a **federal contractor.**

5- While **al Qaeda** has **long provided salaries** and the latest military equipment, **Islamic State**, reports the *Christian Science Monitor,* with wealth generated from oil revenues and taxation in the territories it holds, is **promising foreign fighters higher salaries, housing**, and **additional benefits of $250 per month** for a family of five.

United Kingdom / Royaume-Uni

6- Radical cleric **Anjem Choudary** could be **released** in **two years** after he was was **sentenced** to **5½ years in prison** for **pledging allegiance** to **Islamic State** and encouraging others to join

the terror group. **Mr. Justice Holroyde,** sentencing, said Choudary was a **calculating extremist** who had shown "contempt for the values of the democracy in which we live". (Extensive coverage / vaste couverture).
7- Police in **Northern Ireland** have uncovered a **"significant amount of terrorist material",** specifically **explosives** and **bomb-making components,** at **12 separate locations** in the town of **Larne.** (Moderate coverage / couverture modérée).

Europe

8- *Le Figaro* rapporte qu'en s'appuyant sur une **analyse du contre-espionnage, dont « Le Figaro » a eu connaissance, Manuel Valls assure qu'il faut « se préparer à résister » à « une menace supplémentaire pour notre sécurité nationale »** . Sécurité Manuel Valls a donné le ton ce mardi en matière de sécurité : « Près de 700 djihadistes français ou résidant en France se trouvent actuellement dans les zones de combat en Irak et en Syrie . Leur retour représente une menace supplémentaire pour notre sécurité nationale (...) il faut nous préparer à résister, le combat sera long. ». **La Direction générale de la sécurité intérieure (DGSI) a expliqué que la France doit demeurer très vigilante.**
9- **Prévention de la radicalisation : des "unités dédiées au sein des détentions classiques. C'est extrêmement dangereux" Emmanuel Gauthrin, secrétaire général de FO Pénitentiaire,** a réclamé sur *FranceTv Info* la suppression "des unités dédiées au sein même des détentions classiques" après **l'agression dimanche de deux surveillants pénitentiaires par un détenu à la maison d'arrêt d'Osny (Val-d'Oise), une unité spéciale de prévention de la radicalisation**. Un acte que le syndicaliste qualifie de "prémédité" et de "terroriste". "Ces unités dédiées au sein même des détentions classiques. C'est extrêmement dangereux. On continue malheureusement à polluer le reste de la population pénale".
10- Speaking to the *New York Times* Editorial Board, **Turkey's Deputy Prime Minister Numan Kurtulmus** conceded **"we don't see any evidence** that **U.S. officials supported** the **coup d'état"**.
11- **Each day** there are more than **20 highly specialized attacks** on the **German government's computer networks** reports *The Local.*

Africa / Afrique

12- *Foreign Policy* reports that on July 7, **South Sudanese troops fired between 50-100 rounds** of **ammunition** at **two armored SUVs carrying American diplomats** en route to the **U.S. Embassy** in **Juba.** The **State Department** in Washington **downplayed** the **incident** telling *Foreign Policy* that "we **do not believe our vehicles** and **personnel** were **specifically targeted.** I think we can speak with certainty the people in the convoy did not identify themselves necessarily to the soldiers or say that it was an American convoy."
13- Selon *Pan African News Agency,* le **Premier ministre tunisien, Youssef Chahed estime que "la lutte contre la corruption et le terrorisme" sont les faces d'un même phénomène ciblant le citoyen**, axe central de tout développement", affirmant que la **guerre contre la corruption en demandant des comptes aux coupables est "plus complexe, parfois plus difficile que la lutte contre le terrorisme".**
14- **Tunisia's defence minister Farhat Hachani** implored countries in **North Africa** to **strengthen co-operation** in order to **prevent Islamic State fighters** who are fleeing their **Libyan stronghold** of **Sirte** from **returning** to their **homelands** reports *Reuters.*

Middle East / Moyen-Orient

15- *Asharq Al-Awsat* reports that a **suspected chlorine gas attack** on an opposition-held neighborhood in the **Syrian city of Aleppo** had reportedly caused dozens of cases of suffocation on Tuesday, rescue workers and a monitoring group said.

16- *Press TV* reports that **Iranian Intelligence Minister Mahmoud Alavi** has made an unannounced trip to **Germany**, with observers describing the unprecedented trip — about which little detail has been made public — as highly significant.

Afghanistan/Pakistan

17- *TOLO News* reports that **Rahmatullah Nabil, the ex-chief of the Afghan spy agency—the National Directorate of Security (NDS)** - Tuesday alleged that President Ashraf Ghani's unnecessary meddling in the works of government institutions has fueled political, security and social uncertainties in the country.

Australia, New Zealand / Australie, Nouvelle-Zélande

18- Islamic State has issued a fresh call to its followers to **kill unbelievers in Sydney and Melbourne**, bolstering the theory that as the terror group faces extinction in Syria it is lashing out abroad, repots *The Australian*. The call to arms appeared in the first edition of **Rumiyah**, a new English-language online magazine produced by Islamic State, which in recent months has suffered a string of setbacks prompting some to speculate it has entered a state of terminal - decline. The instruction, which is particularly graphic, even by the standards of Islamic State, was contained in a long feature article about Australian terrorist **Ezzit Raad**, whom the terrorist group claims was killed recently in Syria. In the article Islamic State **calls on its followers to "light the ground'' beneath unbelievers, and scorch them with terror. ''Kill them on the streets of Brunswick, Broadmeadows, Bankstown and Bondi**,'' the article reads (moderate coverage / couverture modérée).

19- The government has spelled out priorities for improving defence capabilities through clever ideas, with **boosting intelligence, surveillance, electronic warfare and cyber** heading the list. Defence Industry Minister **Christopher Pyne** says the new **$640 million Defence Innovation Hub** to be launched later this year will drive growth in defence industry innovation. The government has set six areas for research and innovation, with three given top priority for 2016-17. **"In the intelligence, surveillance, reconnaissance, electronic warfare, space and cyber capability stream we will focus on improving intelligence collection, analysis and dissemination**," he said in the keynote address to the Land Forces conference dinner in Adelaide. Mr Pyne said that would **include biometric data and cyber innovation** to support intelligence capability development, writes *Australian Associated Press*.

Asia / Asie

20- According to *The Korea Herald*, high-ranking defense officials from 33 countries and five international organizations gathered Wednesday to **discuss regional and international security** issues, namely the ongoing challenges involving **North Korea and maritime disputes involving the US, China and Japan**. The Seoul Defense Dialogue 2016, held from Sept.7-9, will kick off with a plenary session Thursday on the denuclearization of North Korea and international cooperation. Seoul Defense Dialogue 2015 (SDD)During the session, the participants will assess the North Korean threat, UN Security Council resolution 2270 and other international cooperation efforts, as well as analyze how the Iranian nuclear deal could be applied to Pyongyang.

21- Japan's nuclear watchdog decided today to make operators of nuclear power plants and other nuclear facilities **check the background of their workers to prevent terror attacks**, the *Kyodo News* reports. Following the recommendation of the **International Atomic Energy Agency**, the **Nuclear Regulation Authority** will introduce the new regulation in late September, although the actual implementation is expected to be from next year or later due to necessary procedures, such a revision of the rules regarding the handling of nuclear materials.

22- The *New Strait Times* reports that **Intelligence gleaned by counterterrorism operatives** in the country suggest that **Malaysia** now has, in its midst, suicide bombers ready to die for the Islamic State (IS) group.

23- The *Bangladesh Daily Star* reports that **Islamic State of Bangladesh (ISB),** founded in Singapore in March, planned to wage "jihad" in Bangladesh from the northern district of Panchagarh, according to a court document.
24- Increasingly assertive action by China's coast guard ships in the **South China Sea** risks destabilising the region, according to the authors of new research tracking maritime law enforcement incidents across the vital trade route. While the risks of full-blown naval conflict dominates strategic fears over the disputed waterway, the danger of incidents involving coast guards should not be underestimated, said Bonnie Glaser, a regional security expert at Washington's **Center for Strategic and International Studies** think-tank. CSIS researchers have detailed some **45 clashes and standoffs in the South China Sea since 2010** in a survey due to be published week on its ChinaPower website and seen by *Reuters*.

CSIS in the News/Le SCRS dans les nouvelles

No mentions in the mainstream media. / Pas de mentions dans les médias traditionnels.

Canada

1- The *National Post* reveals that while **hiding out** in **Hong Kong** in **2013, Edward Snowden** retained the services **Canadian-born** and **trained lawyer Robert Tibbo** who hatched a plan that included a visit to the **UN sub-office** where **Snowden applied for refugee status** to **avoid extradition to the U.S.** "I had minutes to figure out how to get him to the UN, away from the media, and out of harm's way with the weight of the U.S. government bearing down on him. I did what I had to do, and could do, to help him," Tibbo told the *Post*. "They wanted the data and they wanted to shut him down. Our greatest fear was that Ed would be found."

2- *La Presse+* rapporte que l'un des **prêcheurs radicaux les plus influents d'Occident, suivi sur les réseaux sociaux par les terroristes canadiens Martin Couture-Rouleau et Michael Zehaf Bibeau, vient d'être condamné à plus de cinq ans de prison au Royaume-Uni** pour avoir soutenu le **groupe armé État islamique (EI). En 2013, il avait prédit un attentat au Canada.** Les Anglais le surnomment « l'homme le plus détesté » de leur pays, le « prêcheur de haine ». Anjem Choudary, avocat de 49 ans d'origine pakistanaise, prédicateur emblématique dans les milieux islamistes britanniques, marchait sur une fine ligne depuis plusieurs années. Il s'était fait « le porte-parole des extrémistes, faisant des commentaires des plus déplaisants, mais sans jamais franchir le seuil de la criminalité », comme l'a expliqué au Guardian le **commandant Dean Haydon, chef de l'escouade antiterroriste de Scotland Yard.**

3- **Brig.-Gen. Shane Brennan, commander** of **Canada's Joint Task Force-Iraq,** said the number of **Canadian intelligence officers** assigned to the **anti-Isis** effort based in **Kuwait** has **grown to 50**. Their mission, reports the *Canadian Press,* is to analyze the pictures taken by Aurora surveillance aircraft so the coalition can plan air strikes and ground operations.

International

United States / États-Unis

4- The *Associated Press* reports a **congressional committee examination** of the **Office of Personnel Management breach** found that while officials were **closely monitoring** the **online activities** of **one suspected hacker for months** and had devised a plan to **expel him** when he got **too close** to **critical information**, they were **unaware** of the presence of a **second hacker** who had **infiltrated** the **system posing** as an **employee** of a **federal contractor.**

5- While **al Qaeda** has **long provided salaries** and the latest military equipment, **Islamic State**, reports the *Christian Science Monitor,* with wealth generated from oil revenues and taxation in the territories it holds, is **promising foreign fighters higher salaries, housing**, and **additional benefits of $250 per month** for a family of five.

United Kingdom / Royaume-Uni

6- Radical cleric **Anjem Choudary** could be **released** in **two years** after he was was **sentenced** to **5½ years in prison** for **pledging allegiance** to **Islamic State** and encouraging others to join

the terror group. **Mr. Justice Holroyde,** sentencing, said Choudary was a **calculating extremist** who had shown "contempt for the values of the democracy in which we live". (Extensive coverage / vaste couverture).
7- Police in **Northern Ireland** have uncovered a **"significant amount of terrorist material",** specifically **explosives** and **bomb-making components,** at **12 separate locations** in the town of **Larne.** (Moderate coverage / couverture modérée).

Europe

8- *Le Figaro* rapporte qu'en s'appuyant sur une **analyse du contre-espionnage, dont « Le Figaro » a eu connaissance, Manuel Valls assure qu'il faut « se préparer à résister » à « une menace supplémentaire pour notre sécurité nationale »** . Sécurité Manuel Valls a donné le ton ce mardi en matière de sécurité : « Près de 700 djihadistes français ou résidant en France se trouvent actuellement dans les zones de combat en Irak et en Syrie . Leur retour représente une menace supplémentaire pour notre sécurité nationale (...) il faut nous préparer à résister, le combat sera long. ». **La Direction générale de la sécurité intérieure (DGSI) a expliqué que la France doit demeurer très vigilante.**
9- **Prévention de la radicalisation : des "unités dédiées au sein des détentions classiques. C'est extrêmement dangereux" Emmanuel Gauthrin, secrétaire général de FO Pénitentiaire,** a réclamé sur *FranceTv Info* la suppression "des unités dédiées au sein même des détentions classiques" après **l'agression dimanche de deux surveillants pénitentiaires par un détenu à la maison d'arrêt d'Osny (Val-d'Oise), une unité spéciale de prévention de la radicalisation**. Un acte que le syndicaliste qualifie de "prémédité" et de "terroriste". "Ces unités dédiées au sein même des détentions classiques. C'est extrêmement dangereux. On continue malheureusement à polluer le reste de la population pénale".
10- Speaking to the *New York Times* Editorial Board, **Turkey's Deputy Prime Minister Numan Kurtulmus** conceded **"we don't see any evidence** that **U.S. officials supported** the **coup d'état".**
11- **Each day** there are more than **20 highly specialized attacks** on the **German government's computer networks** reports *The Local.*

Africa / Afrique

12- *Foreign Policy* reports that on July 7, **South Sudanese troops fired between 50-100 rounds** of **ammunition** at **two armored SUVs carrying American diplomats** en route to the **U.S. Embassy** in **Juba.** The **State Department** in Washington **downplayed** the **incident** telling *Foreign Policy* that "we **do not believe our vehicles** and **personnel** were **specifically targeted.** I think we can speak with certainty the people in the convoy did not identify themselves necessarily to the soldiers or say that it was an American convoy."
13- Selon *Pan African News Agency,* le **Premier ministre tunisien, Youssef Chahed estime que "la lutte contre la corruption et le terrorisme" sont les faces d'un même phénomène ciblant le citoyen**, axe central de tout développement", affirmant que la **guerre contre la corruption en demandant des comptes aux coupables est "plus complexe, parfois plus difficile que la lutte contre le terrorisme".**
14- **Tunisia's defence minister Farhat Hachani** implored countries in **North Africa** to **strengthen co-operation** in order to **prevent Islamic State fighters** who are fleeing their **Libyan stronghold** of **Sirte** from **returning** to their **homelands** reports *Reuters.*

Middle East / Moyen-Orient

15- *Asharq Al-Awsat* reports that a **suspected chlorine gas attack** on an opposition-held neighborhood in the **Syrian city of Aleppo** had reportedly caused dozens of cases of suffocation on Tuesday, rescue workers and a monitoring group said.

16- *Press TV* reports that **Iranian Intelligence Minister Mahmoud Alavi** has made an unannounced trip to **Germany**, with observers describing the unprecedented trip — about which little detail has been made public — as highly significant.

Afghanistan/Pakistan

17- *TOLO News* reports that **Rahmatullah Nabil, the ex-chief of the Afghan spy agency—the National Directorate of Security (NDS)** - Tuesday alleged that President Ashraf Ghani's unnecessary meddling in the works of government institutions has fueled political, security and social uncertainties in the country.

Australia, New Zealand / Australie, Nouvelle-Zélande

18- Islamic State has issued a fresh call to its followers to **kill unbelievers in Sydney and Melbourne**, bolstering the theory that as the terror group faces extinction in Syria it is lashing out abroad, repots *The Australian*. The call to arms appeared in the first edition of **Rumiyah**, a new English-language online magazine produced by Islamic State, which in recent months has suffered a string of setbacks prompting some to speculate it has entered a state of terminal - decline. The instruction, which is particularly graphic, even by the standards of Islamic State, was contained in a long feature article about Australian terrorist **Ezzit Raad**, whom the terrorist group claims was killed recently in Syria. In the article Islamic State **calls on its followers to "light the ground'' beneath unbelievers, and scorch them with terror. ''Kill them on the streets of Brunswick, Broadmeadows, Bankstown and Bondi**,'' the article reads (moderate coverage / couverture modérée).

19- The government has spelled out priorities for improving defence capabilities through clever ideas, with **boosting intelligence, surveillance, electronic warfare and cyber** heading the list. Defence Industry Minister **Christopher Pyne** says the new **$640 million Defence Innovation Hub** to be launched later this year will drive growth in defence industry innovation. The government has set six areas for research and innovation, with three given top priority for 2016-17. **"In the intelligence, surveillance, reconnaissance, electronic warfare, space and cyber capability stream we will focus on improving intelligence collection, analysis and dissemination**," he said in the keynote address to the Land Forces conference dinner in Adelaide. Mr Pyne said that would **include biometric data and cyber innovation** to support intelligence capability development, writes *Australian Associated Press*.

Asia / Asie

20- According to *The Korea Herald*, high-ranking defense officials from 33 countries and five international organizations gathered Wednesday to **discuss regional and international security** issues, namely the ongoing challenges involving **North Korea and maritime disputes involving the US, China and Japan**. The Seoul Defense Dialogue 2016, held from Sept.7-9, will kick off with a plenary session Thursday on the denuclearization of North Korea and international cooperation. Seoul Defense Dialogue 2015 (SDD)During the session, the participants will assess the North Korean threat, UN Security Council resolution 2270 and other international cooperation efforts, as well as analyze how the Iranian nuclear deal could be applied to Pyongyang.

21- Japan's nuclear watchdog decided today to make operators of nuclear power plants and other nuclear facilities **check the background of their workers to prevent terror attacks**, the *Kyodo News* reports. Following the recommendation of the **International Atomic Energy Agency**, the **Nuclear Regulation Authority** will introduce the new regulation in late September, although the actual implementation is expected to be from next year or later due to necessary procedures, such a revision of the rules regarding the handling of nuclear materials.

22- The *New Strait Times* reports that **Intelligence gleaned by counterterrorism operatives** in the country suggest that **Malaysia** now has, in its midst, suicide bombers ready to die for the Islamic State (IS) group.

23- The *Bangladesh Daily Star* reports that **Islamic State of Bangladesh (ISB),** founded in Singapore in March, planned to wage "jihad" in Bangladesh from the northern district of Panchagarh, according to a court document.
24- Increasingly assertive action by China's coast guard ships in the **South China Sea** risks destabilising the region, according to the authors of new research tracking maritime law enforcement incidents across the vital trade route. CSIS in the News/Le SCRS dans les nouvelles

1- Selon *Radio-Canada Nouvelles,* « La menace qui pèse sur vous en tant que fonctionnaire canadien en voyage officiel est bien réelle. » **Le Service canadien du renseignement de sécurité (SCRS) vient tout juste de mettre à jour ses directives sur les voyages à l'intention des fonctionnaires fédéraux.** Obtenu par Radio-Canada Ottawa-Gatineau, ce document interne d'une quarantaine de pages insiste sur **l'importance pour les employés du gouvernement d'être extrêmement prudents à l'étranger. Le SCRS soutient que « la menace terroriste qui pèse sur les Canadiens a changé » depuis les attaques survenues à Saint-Jean-sur-Richelieu et au Parlement canadien en octobre 2014.** (Similar reports appeared on *CBC News Ottawa radio and television*).

2- People who have been **deemed a terrorist threat should be incarcerated if they can't be monitored around the clock,** Conservative leadership candidate **Tony Clement** said Monday in **outlining his national security platform**. "If the safety of the public cannot be guaranteed through a peace bond, it has to be guaranteed through incarceration," he told reporters on Parliament Hill. Clement also wants **terrorist suspects to be on a published "wanted" list,** reports *CBC News*. Clement said both measures would be subject to judicial review and require an "**evidentiary threshold**" be met. "I'm not proposing some kind of wanted list that is the figment of somebody's imagination or without some kind of evidence," Clement said. "Clearly, that would not be acceptable in Canadian society." Clement repeated his **proposal for the "enhanced screening" of people coming in and out of Canada** as part of his national security platform. **He said the current process is not rigorous enough**. "**Only nine to 15 per cent of the current intake of immigrants in any given year go through the rigorous screening of CSIS and other security agencies**," he said. "That's just far too low."

Canada

3- Within days of a foiled terror plot that ended in the death of **Aaron Driver**, a known Islamic State supporter in southern Ontario, Canada's federal police arrested **another young man over fears he would participate in terrorism,** *VICE News* has learned. Ottawa man **Tevis Gonyou-McLean**, 24, was **arrested on August 12 and charged with uttering a threat to cause death or harm to another person**. The RCMP are also pursuing a terror-related **peace bond against him over fears that he might engage in terrorism at home and abroad**. At the end of August, Gonyou-McLean was released on a $1,000 bond and 27 bail conditions that heavily restrict his behaviour and movements, according to court records.

4- *Radio-Canada - Manitoba* (site web) rapporte qu'un **jeune homme de 17 ans a plaidé coupable, lundi, à une accusation de terrorisme, devant la Section de la jeunesse de la Cour provinciale du Manitoba. Il a admis avoir conseillé la perpétration d'un acte criminel au profit ou sous la direction d'un groupe terroriste, ou en association avec lui,** selon un communiqué du **Service des poursuites pénales du Canada**. Aucune information supplémentaire n'a été fournie sur la nature des accusations.

5- Canada must acknowledge, and then constrain, the government's use of **portable surveillance devices** that can indiscriminately dredge data from people's smartphones without them knowing, privacy experts say. Everything that is known or suspected about the government's use of these

machines – called "**IMSI catchers**," "**cell-site simulators**" or "**Stingrays**" – is chronicled in a comprehensive, first-of-its-kind, 130-page report written by privacy experts and released to *The Globe and Mail*. Federal police have used these devices for more than a decade, but the practice was confirmed only this year in a series of stories in *The Globe*. Now, researchers **Christopher Parsons** and **Tamir Israel** say it's time for civil society to **debate the pros and cons of IMSI catchers, even if many government agencies still won't discuss them.**

International

United States / États-Unis

6- **Iran threatened to shoot down two US Navy surveillance aircraft** flying close to Iranian territory in the Persian Gulf over the weekend, the latest in a series of recent provocations between Iran and the US military in the region, three US defense officials with knowledge of the incident told *Fox News*.
7- According to *The Intercept*, the **House Permanent Select Committee on Intelligence** will meet this Thursday to discuss former **National Security Agency contractor Edward Snowden**, who in 2013 gave journalists a massive cache of classified documents detailing the U.S. global surveillance regime.

United Kingdom / Royaume-Uni

Light coverage/couverture légère.

Europe

8- Selon *La Dépêche du Midi,* un **jeune interpellé dans un collège du Lot pour des propos approuvant les attentats sur le sol français, un second adolescent lotois paradant en photo avec une Kalachnikov et d'autres encore carrément partis en Syrie pour intégrer les troupes de Daesh**... Bref, la radicalisation touche le Lot. La préfète le dit et agit. Le Lot ne fait pas exception au phénomène ravageur de la radicalisation des jeunes. Phénomène souvent suivi par le départ de ceux-ci vers la Syrie. **Le département n'affole pas les compteurs et reste « dans la moyenne nationale », concernant le taux de signalement seulement, selon la préfète Catherine Ferrier.** En revanche, les départs dans les rangs de Daesh se situent au-dessus de la moyenne française. Les chiffres commentés hier par la **représentante de l'état dans le Lot font froid dans le dos : « 21 départs de Lotois vers la Syrie ont été constatés depuis 2014. Soit neuf adultes et douze adolescents.**
9- D'après *L'Agence France-Presse,* **trois réfugiés syriens, arrivés en Allemagne lors de l'afflux migratoire de 2015 et soupçonnés d'appartenance au groupe jihadiste Etat islamique (EI), ont été arrêtés mardi dans le nord du pays**, a annoncé le parquet fédéral allemand. Les trois hommes **Mahir Al-H., 27 ans, Mohamed A., 26 ans, et Ibrahim M. 18 ans ont été interpellés dans le Schleswig-Holstein et leurs appartements font l'objet de perquisitions.** Ils étaient arrivés en Allemagne en novembre 2015, au pic de la crise migratoire qui a vu un million de demandeurs d'asile entrer dans le pays.
10- A statement from **Germany's Federal Public Prosecutor's** office today confirmed earlier media reports that federal police and agents from **Germany's GSG 9 special operations unit were involved in pre-dawn raids against terror suspects. Three men were arrested in the raids**. All three are **Syrian nationals** and the prosecutor's office listed their names as **Mahir Al-H. (17), Mohamed A. (26), and Ibrahim M. (18).** The full names of criminal suspects in Germany are usually not released by officials. *Deutsche Welle* writes that the men **are suspected of being members of a foreign terror organization, the so-called "Islamic State" ("IS").**
11- **Professor Gilles Kepel**, a scholar of Islam, has warned of civil war across **Europe as more young Muslims facing poor job prospects turn to radical groups**, and has said a growing **'Jihad Generation'** is likely to continue to **carry out terror acts in European cities,** the *Daily*

Mail Online writes. The aim of their terror activity is to **both incite hatred towards Muslims and, in doing so, cause further radicalisation among young people**, the professor of political science said. He told the German newspaper *Die Welt* that this in turn could lead to the point where **Europe enters into civil war.**

Africa / Afrique

12- **The Nigerian military** has **killed a female suicide bomber at a security checkpoint** while attempting **to gain entrance into a cattle market in Borno State on the eve of Sallah day celebration**, *All Africa News* reports.

Middle East / Moyen-Orient

13- The *Tehran Times* reports that **thousands of Canadian citizens** and residents have signed a petition, carried on the official website of the **Parliament of Canada**, calling for the re-establishment of diplomatic ties with Tehran.
14- The *Jerusalem Post* reports that the **Israeli Defence Forces is introducing an encrypted cellphone chat program for commanders**, enabling them to hold conversations in groups and share real-time text, images and other data on developing security incidents.

Afghanistan/Pakistan

15- *Pajhwok Afghan News* reports that as many as **112 insurgents and four Afghan National Army (ANA) troops have been killed** during clashes over the past 24 hours, the Ministry of Defence said on Monday.

Australia, New Zealand / Australie, Nouvelle-Zélande

16- Intelligence officials have revealed that **calls from the public to the national security hotline spiked 50 per cent in the 24 hours** after the alleged ISIS-inspired lone wolf terrorist attack at the weekend. The deluge of tip-offs to **ASIO** and the **Australian Federal Police** has also risen about **40 per cent** since April, to almost 70 a day, *The Advertiser* can reveal. As the Government grapples with the rising terrorism threat, frightening CCTV footage has captured knife-wielding suspect **Ihsas Khan** on his bloody rampage – and how victim **Wayne Greenhalgh**, 59, didn't stand a chance.
17- According to *The Australian*, NSW police are examining whether a **cluster of red flags** concerning the erratic behaviour of 22-year-old terror suspect **Ihsas Khan** was **reported but not passed on to counter-terrorism detectives** in what would amount to a **major breakdown in communication**. News of the review came as sources confirmed police had **reopened a 2015 investigation into a spitting attack** on then-federal Labor MP **Laurie Ferguson**, which police believe may have been committed by Mr Khan. Chief Commissioner **Andrew Scipione** confirmed yesterday that police in southwestern Sydney, where Mr Khan lived, had been told of his bizarre behaviour, which had alarmed his neighbours and seen him investigated by police. "He'd come to the notice of police, local police, and that had been a result of his activities," Mr Scipione said. **There was no evidence to support accounts that he had been reported to the terrorism hotline**. Deputy Commissioner Cath Burn confirmed Mr Khan was known to police but had not been identified as a priority for monitoring.

Asia / Asie

18- The *Bangladesh Sangbad Sangstha* reports that **Prime Minister Sheikh Hasina** leaves Dhaka for Canada and the United States tomorrow morning on an 11-day official visit to the two North American nations. The Bangladesh prime minister will hold a bilateral meeting with her **Canadian counterpart Justin Trudeau.** She will hand over the **"Friends of Liberation War Honour"** award to Justin Trudeau.

19- *Kyodo News* is reporting that Prime Minister **Shinzo Abe** and his Canadian counterpart **Justin Trudeau** agreed Tuesday to **coordinate their response to North Korea's provocative acts**, including last week's nuclear test, through the framework of the United Nations, a Japanese government spokesman said. In their roughly 20-minute telephone meeting, Abe and Trudeau shared their resolute condemnation of North Korea's behavior, Deputy Chief Cabinet Secretary **Koichi Hagiuda** said.
20- China and Canada agreed on Monday to **start discussions on a bilateral extradition treaty** that would facilitate the **return of corrupt fugitive Chinese officials** who remain at large in Canada. The agreement was reached at the **China-Canada High-Level National Security and Rule of Law Dialogue** in Beijing, where discussions were held on ways to improve cooperation on issues such as law enforcement, combating transnational organized crime, judicial cooperation and exchanges on the rule of law, reports the *China Daily*.
21- The United States on Tuesday **sent two nuclear-capable supersonic bombers** streaking over ally South Korea in a **show of force meant to cow North Korea after its recent nuclear test** and also to settle rattled nerves in the South. The **B-1B bombers**, escorted by U.S. and South Korean jets, were seen by an *Associated Press* photographer as they flew over **Osan Air Base**, which is 120 kilometers (75 miles) from the border with North Korea, the world's most heavily armed. The bombers were likely to return to Andersen Air Force Base in Guam, without landing in South Korea.
22- The *Times of India* reports that a **grenade attack by terrorists** in Anantnag's Sherbagh police station killed one civilian and left 14 people including three cops critically wounded shortly after the state government decided to impose **curfew in all 10 Kashmir districts** to prevent any outbreak of violence.

8- Selon *La Dépêche du Midi,* un **jeune interpellé dans un collège du Lot pour des propos approuvant les attentats sur le sol français, un second adolescent lotois paradant en photo avec une Kalachnikov et d'autres encore carrément partis en Syrie pour intégrer les troupes de Daesh**... Bref, la radicalisation touche le Lot. La préfète le dit et agit. Le Lot ne fait pas exception au phénomène ravageur de la radicalisation des jeunes. Phénomène souvent suivi par le départ de ceux-ci vers la Syrie. **Le département n'affole pas les compteurs et reste « dans la moyenne nationale », concernant le taux de signalement seulement, selon la préfète Catherine Ferrier.** En revanche, les départs dans les rangs de Daesh se situent au-dessus de la moyenne française. Les chiffres commentés hier par la **représentante de l'état dans le Lot font froid dans le dos : « 21 départs de Lotois vers la Syrie ont été constatés depuis 2014. Soit neuf adultes et douze adolescents.**

9- D'après *L'Agence France-Presse,* **trois réfugiés syriens, arrivés en Allemagne lors de l'afflux migratoire de 2015 et soupçonnés d'appartenance au groupe jihadiste Etat islamique (EI), ont été arrêtés mardi dans le nord du pays**, a annoncé le parquet fédéral allemand. Les trois hommes **Mahir Al-H., 27 ans, Mohamed A., 26 ans, et Ibrahim M. 18 ans ont été interpellés dans le Schleswig-Holstein et leurs appartements font l'objet de perquisitions.** Ils étaient arrivés en Allemagne en novembre 2015, au pic de la crise migratoire qui a vu un million de demandeurs d'asile entrer dans le pays.

10- A statement from **Germany's Federal Public Prosecutor's** office today confirmed earlier media reports that federal police and agents from **Germany's GSG 9 special operations unit were involved in pre-dawn raids against terror suspects. Three men were arrested in the raids**. All three are **Syrian nationals** and the prosecutor's office listed their names as **Mahir Al-H. (17), Mohamed A. (26), and Ibrahim M. (18).** The full names of criminal suspects in Germany are usually not released by officials. *Deutsche Welle* writes that the men **are suspected of being members of a foreign terror organization, the so-called "Islamic State" ("IS").**

11- **Professor Gilles Kepel**, a scholar of Islam, has warned of civil war across **Europe as more young Muslims facing poor job prospects turn to radical groups**, and has said a growing **'Jihad Generation'** is likely to continue to **carry out terror acts in European cities,** the *Daily*

Mail Online writes. The aim of their terror activity is to **both incite hatred towards Muslims and, in doing so, cause further radicalisation among young people**, the professor of political science said. He told the German newspaper *Die Welt* that this in turn could lead to the point where **Europe enters into civil war.**

Africa / Afrique

12- **The Nigerian military** has **killed a female suicide bomber at a security checkpoint** while attempting **to gain entrance into a cattle market in Borno State on the eve of Sallah day celebration**, *All Africa News* reports.

Middle East / Moyen-Orient

13- The *Tehran Times* reports that **thousands of Canadian citizens** and residents have signed a petition, carried on the official website of the **Parliament of Canada**, calling for the re-establishment of diplomatic ties with Tehran.
14- The *Jerusalem Post* reports that the **Israeli Defence Forces is introducing an encrypted cellphone chat program for commanders**, enabling them to hold conversations in groups and share real-time text, images and other data on developing security incidents.

Afghanistan/Pakistan

15- *Pajhwok Afghan News* reports that as many as **112 insurgents and four Afghan National Army (ANA) troops have been killed** during clashes over the past 24 hours, the Ministry of Defence said on Monday.

Australia, New Zealand / Australie, Nouvelle-Zélande

16- Intelligence officials have revealed that **calls from the public to the national security hotline spiked 50 per cent in the 24 hours** after the alleged ISIS-inspired lone wolf terrorist attack at the weekend. The deluge of tip-offs to **ASIO** and the **Australian Federal Police** has also risen about **40 per cent** since April, to almost 70 a day, *The Advertiser* can reveal. As the Government grapples with the rising terrorism threat, frightening CCTV footage has captured knife-wielding suspect **Ihsas Khan** on his bloody rampage – and how victim **Wayne Greenhalgh**, 59, didn't stand a chance.
17- According to *The Australian*, NSW police are examining whether a **cluster of red flags** concerning the erratic behaviour of 22-year-old terror suspect **Ihsas Khan** was **reported but not passed on to counter-terrorism detectives** in what would amount to a **major breakdown in communication**. News of the review came as sources confirmed police had **reopened a 2015 investigation into a spitting attack** on then-federal Labor MP **Laurie Ferguson**, which police believe may have been committed by Mr Khan. Chief Commissioner **Andrew Scipione** confirmed yesterday that police in southwestern Sydney, where Mr Khan lived, had been told of his bizarre behaviour, which had alarmed his neighbours and seen him investigated by police. "He'd come to the notice of police, local police, and that had been a result of his activities," Mr Scipione said. **There was no evidence to support accounts that he had been reported to the terrorism hotline**. Deputy Commissioner Cath Burn confirmed Mr Khan was known to police but had not been identified as a priority for monitoring.

Asia / Asie

18- The *Bangladesh Sangbad Sangstha* reports that **Prime Minister Sheikh Hasina** leaves Dhaka for Canada and the United States tomorrow morning on an 11-day official visit to the two North American nations. The Bangladesh prime minister will hold a bilateral meeting with her **Canadian counterpart Justin Trudeau.** She will hand over the **"Friends of Liberation War Honour"** award to Justin Trudeau.

19- *Kyodo News* is reporting that Prime Minister **Shinzo Abe** and his Canadian counterpart **Justin Trudeau** agreed Tuesday to **coordinate their response to North Korea's provocative acts**, including last week's nuclear test, through the framework of the United Nations, a Japanese government spokesman said. In their roughly 20-minute telephone meeting, Abe and Trudeau shared their resolute condemnation of North Korea's behavior, Deputy Chief Cabinet Secretary **Koichi Hagiuda** said.
20- China and Canada agreed on Monday to **start discussions on a bilateral extradition treaty** that would facilitate the **return of corrupt fugitive Chinese officials** who remain at large in Canada. The agreement was reached at the **China-Canada High-Level National Security and Rule of Law Dialogue** in Beijing, where discussions were held on ways to improve cooperation on issues such as law enforcement, combating transnational organized crime, judicial cooperation and exchanges on the rule of law, reports the *China Daily*.
21- The United States on Tuesday **sent two nuclear-capable supersonic bombers** streaking over ally South Korea in a **show of force meant to cow North Korea after its recent nuclear test** and also to settle rattled nerves in the South. The **B-1B bombers**, escorted by U.S. and South Korean jets, were seen by an *Associated Press* photographer as they flew over **Osan Air Base**, which is 120 kilometers (75 miles) from the border with North Korea, the world's most heavily armed. The bombers were likely to return to Andersen Air Force Base in Guam, without landing in South Korea.
22- The *Times of India* reports that a **grenade attack by terrorists** in Anantnag's Sherbagh police station killed one civilian and left 14 people including three cops critically wounded shortly after the state government decided to impose **curfew in all 10 Kashmir districts** to prevent any outbreak of violence.

CSIS in the News/Le SCRS dans les nouvelles

1- Just two days after known ISIS supporter **Aaron Driver** was killed in a confrontation with police in Strathroy, Ont., **RCMP in Ottawa arrested a 24-year-old man over concerns he would engage in terrorism**. *CBC News* reports that police took **Tevis David Gonyou-McLean** of Ottawa into custody on Aug. 12, alleging he **uttered a threat to cause death or bodily harm "to unspecified persons,"** according to court documents. RCMP are now trying to convince a judge to **issue an extraordinary peace bond** against Gonyou-McLean. On Aug. 26, after two weeks in custody, Gonyou-McLean was released on a $1,000 bond with orders to abide by 27 conditions. Gonyou-McLean is also **barred from communicating with six people**, including Ottawa twin brothers **Ashton and Carlos Larmond**, who are currently serving prison sentences for terror-related offences. He also can't communicate with **Awso Peshdary**, who is awaiting pre-trial in December for terror-related offences, and **Luqmann Abdunnur**. At least one security expert doesn't believe those conditions go far enough, however 'Why isn't he being held?' "It would seem to me that if he's charged, then why isn't he being held?" asked **Phil Gurski**, a **former CSIS agent** who now runs a private security firm. "That's an interesting question about whether or not people accused of terrorism offences, or potential terrorism offences, should be released on bail. That's a whole other argument we have to ask."

Canada

2- Selon *Le Monde,* la **République islamique détient au moins huit binationaux, dont trois Américains, trois Britanniques et une Canadienne.** Vendredi 9septembre au matin, **Nazanin Zaghari-Ratcliffe a pu téléphoner depuis la prison d'Evin, à Téhéran, à son mari Richard, à Londres.** Cela faisait des semaines qu'ils n'avaient pas été en contact direct, mais les nouvelles n'étaient pas bonnes. L'Anglo-Iranienne a révélé le verdict qui venait de lui être signifié: cinq ans de prison. Les charges qui pèsent contre elle? Elles n'ont pas été dévoilées. «Sécurité nationale» , s'est contenté d'indiquer le gardien de prison qui surveillait l'appel téléphonique.

3- An Ottawa mosque visited by Prime Minister **Justin Trudeau** this week said it's **"categorically false"** that their Imam has **links to a terror group**. *The Ottawa Sun* reported Monday that **Ottawa Muslim Association's** imam, **Samy Metwally**, is listed as a member of the **International Union of Muslim Scholars** on the OMA's website. The IUMS was **designated a terrorist organization** by the **United Arab Emirates** and faces criticism from various experts for its supposed ties to the **Muslim Brotherhood**. **"These accusations are, of course, categorically false in what they insinuate and grossly unfair,"** OMA President **Naeem Malik** said in a statement. "The OMA and Imam Metwally do not have any ties to terrorist organizations nor do they harbour any ideology in favour of terrorism or extremism." However, the statement does not at any point address what specifically is incorrect about the *Sun's* reporting and the OMA **did not respond to requests for clarification**. Their release concludes: **"No further statement will be issued, nor will we be available for contact by the media."**

International

United States / États-Unis

4- Appearing before the **Senate Armed Services Committee** Tuesday, **NSA director Michael Rogers,** reports *Reuters,* said the **American intelligence community** continues to be **"actively concerned"** about the possibility **foreign governments** may be attempting to **undermine** the **November elections** through **cyber-attacks**. Under questioning, however, Rogers said he **could not provide specifics** about the spy agencies' current assessment of the alleged hacking in a public setting and **declined to characterize the activity** as by a **foreign nation-state.**
5- According to the *Washington Free Beacon,* the **Office of the Director of National Intelligence declined** to conduct a **required assessment** of the **damage to national security** caused by **Hillary Clinton sending** and **receiving secrets** on a **private email server** while she was Secretary of State. DNI **James Clapper agreed with security officials** who argued against the need to carry out the damage assessment. Intelligence officials argued in internal discussions that since many details of the drone missile program targeting terrorists were disclosed in earlier leaks unrelated to Clinton's use of a personal email server, gauging the **damage done by her conduct** would be **difficult**, and possibly **unnecessary.**
6- The *Washington Post* reports the **Pentagon** and **intelligence community** are expected to **recommend soon** to **President Obama** that he **break up** the **joint leadership** of the **National Security Agency** and **U.S. Cyber Command** to create **two distinct forces** for **electronic espionage** and **cyber-warfare** but in an exchange with the Senate Armed Services Committee yesterday, **NSA** and **Cyber Command director Rogers** told chair **John McCain** that he still held the position that the current **"dual hat" relationship** between the two departments be **retained.**

United Kingdom / Royaume-Uni

7- Speaking to the *Guardian,* **Edward Snowden** called Prime Minister **Theresa May** "a sort of **Darth Vader** in the United Kingdom", argued the **disclosure** of the scale of **surveillance** by **American** and **British intelligence agencies** was not only **morally right** but had **left citizens better off** and predicted in the **"fullness of time"** he will **return** to the **United States.** Snowden's supporters and his American solicitor have embarked on a campaign for a **Presidential pardon** before Barack Obama leaves office in January but two U.S. officials disclosed to *Reuters* that's **unlikely.**
8- A **19-year-old** accused of planning to carry out a **mass-casualty terror attack on London landmarks**, including **Buckingham Palace** and **Oxford Street**, will make his next court appearance next week after being remanded yesterday. **Haroon Ali-Syed** from Hounslow in west London, allegedly attempted to **buy a bomb over the internet** as well as **guns** this year. (Moderate coverage / couverture modérée).
9- Two days after he resigned his seat in the House of Commons, **David Cameron** was **sharply criticized** by an **inquiry** by **parliament's Foreign Affairs Select Committee** which concluded the former Prime Minster, relying on **poor intelligence**, approved a **botched 2011 intervention in Libya** which toppled Muamar Gaddafi and, said the inquiry**, caused the rise of Islamic State in north Africa.** (Extensive coverage / vaste couverture).
10- **GCHQ** has started an ambitious plan to **create a national firewall** to **block malicious websites.** (Extensive coverage / vaste couverture).

Europe

11- Un **adolescent "qui s'était proposé pour une action terroriste" a été arrêté ce matin à Paris et placé en garde à vue**, a appris *l'Agence France Presse* de sources proches de l'enquête. Né en septembre 2001, le suspect, arrêté dans le XXe arrondissement dans le nord-est de la capitale, était "en lien avec le **jihadiste français Rachid Kassim**", déjà au coeur de plusieurs enquêtes dont celle sur un commando de femmes démantelé la semaine dernière. Samedi, un autre adolescent, âgé de 15 ans, également en lien avec ce jihadiste et soupçonné de pouvoir "passer à l'acte", avait été arrêté à Paris.

12- Selon *Ouest-France,* un **jeune homme de 26 ans, adopté, s'est converti lors d'un de ses passages en détention**. Il est **jugé pour avoir violé son assignation à résidence et consulté des sites djihadistes**. Il se fait appeler **Daoud Abdillahi Houssein. David Pagerie**, à l'état civil, comparaît ce mercredi devant le tribunal correctionnel d'Angers. La justice reproche à cet Angevin de 26 ans d'avoir violé son assignation à résidence. **En surfant sur la messagerie cryptée Telegram, celle des terroristes récemment passés à l'acte en France, il pourrait aussi avoir consulté des sites liés au terrorisme. Des vidéos d'exécution ont été retrouvées sur son téléphone mobile.**
13- D'après *Le Soir,* (Belgique), une **disposition oblige dorénavant les commerçants à signaler les clients suspects La Belgique veut encadrer la vente de produits pouvant servir à la fabrication d'explosifs.** Une incitation à la délation sur la base de critères peu précis. A partir du 19 septembre prochain, toute personne ayant eu connaissance de vols, de **disparitions ou de transactions suspectes de « précurseurs d'explosifs » est tenue, en vertu d'une loi portant exécution d'une norme européenne, de le signaler auprès de la police fédérale**. Certaines substances chimiques, le nitrate d'ammonium et le perchlorate de potassium, par exemple, peuvent en effet servir à la fabrication de charges explosives telles que celles utilisées lors des **attentats de Paris et de Bruxelles.**
14- **Angry** at **Austria's "anti-Turkish political stance"**, a **Turkish hacking collective** calling itself **'Aslan Neferler'**, allegedly attempted to **break into the systems** of the **National Bank of Austria.** *The Local* observed the **same group** was behind behind an **attempted cyber attack** at **Vienna airport** two weeks ago.
15- **Two Swedish officials** will be permitted to **enter Ecuador's Embassy** in **London** on **October 17** to **question Julian Assange** on sexual assault charges reports *The Local.*

Africa / Afrique

16- In May, when **Isis fighters** struck **within a mile** of where **500 metric tons** of **chemical-weapon precursor materials** were **stored** in a **remote desert region of Libya,** the incursion set off a hurried chain of events culminating in a **disarmament operation** involving the **United States, European countries** and the **United Nations** reports the *Washington Post.*
17- Selon *Espace Manager,* (Tunisie), le **nouvel ambassadeur de France à Tunis s'appelle Olivier Poivre d'Arvor.** Tout ce qu'on sait de lui c'est que Tunis sera son premier poste à l'étranger. Certains doutent de sa capacité à pouvoir diriger l'ambassade de France à Tunis. Ses premières déclarations leur donnent malheureusement raison. En effet, interrogé sur ses priorités à Tunis par la radio RTL, **Olivier Poivre d'Arvor a eu cette déclaration tout à fait surprenante. Selon lui, sa « mission principale », « c'est d'assurer la sécurité des Français qui se trouvent en Tunisie.**

Middle East / Moyen-Orient

18- The *Times of Israel* reports that **Israel's new spy satellite, the Ofek-11 reconnaissance satellite** launched on Tuesday evening may be malfunctioning, officials involved in the project said a few hours after launch, though they said they have been able to make contact with the craft.
19- The *Lebanon Daily Star* reports that a **new cease-fire in Syria** brought a full day with no combat deaths in the war between **President Bashar Assad** and his opponents, a monitoring body said, and efforts to deliver aid to besieged areas got cautiously underway.

Afghanistan/Pakistan

20- *TOLO News* reports that Badakhshan officials said on Tuesday that **Taliban has seized security forces' equipment and weapons** in the province and are now using these against government troops.

Australia, New Zealand / Australie, Nouvelle-Zélande

21- According to *ABC News*, court documents have revealed Australia's spy agency **ASIO** was **fed information about two Sydney men** who were plotting to carry out a terrorist attack on behalf of Islamic State. **Omar Al-Kutobi**, 25, and **Mohammad Kiad**, 27, were **under surveillance for about a month** when they were arrested and charged with preparing to carry out a terrorist attack in February 2015. Court documents reveal an informant tipped off the **Joint Counter-Terrorism Team (JCCT)** to the plot on February 10 and said the attack was imminent.
22- Counter-terrorism authorities **could be given greater access to intelligence on criminals, local police reports, medical data and welfare information to better identify potential terrorists.** The government is examining ways information that might help identify people with extremist tendencies **could be cross-checked with other data bases to home in on potential terrorists**. The work was announced by **Malcolm Turnbull** in July and spearheaded by then counter-terrorism co-ordinator **Greg Moriarty**, who since has become the Prime Minister's foreign policy adviser. Since then, work has focused on **examining the personality and behavioural traits** of terrorists or extremists with a view to identifying potential markers, *The Australian* has been told.

Asia / Asie

23- *The Hindu* reports that in an indicator that **India** is going ahead with its SAARC commitment ahead of the summit of the grouping in Islamabad, the **chief of India's Intelligence Bureau (IB)** will address the representatives of anti-terror forces of other member-countries of the South Asian Association for Regional Cooperation on September 22.
24- According to *Reuters*, U.S. Secretary of State **John Kerry** will meet with his Japanese and South Korean counterparts in New York on Sunday to **discuss responses to North Korea's latest nuclear test**, South Korea's foreign ministry said on Wednesday. The three countries are pushing for **tough new U.N. Security Council sanctions** on North Korea after the isolated country on Friday conducted its fifth and largest nuclear test. The blast was in defiance of U.N. sanctions that were tightened in March. China, the North's chief ally, **backed the March resolution but is more resistent to harsh new sanctions** this time after the United States and South Korea decided to deploy a sophisticated anti-missile system in the South, which China adamantly opposes. South Korea said Foreign Minister **Yun Byung-se** and his counterparts Kerry and Japanese Foreign Minister **Fumio Kishida** will meet during the annual U.N. General Assembly to discuss putting further pressure on North Korea.
25- The *Yonhap News Agency* reports that North Korea on Wednesday **protested the United States' flyover of two B-1B nuclear-capable strategic bombers** over South Korea, saying such **"reckless provocations"** should stop. The U.S. Air Force on Tuesday flew the B-1B Lancers over **Osan Air Base**, south of Seoul, as a warning to North Korea following its fifth nuclear test last week. The *North's Korean Central News Agency (KCNA)* blasted the exercise as a "military provocation" revealing Washington's intentions to mount a pre-emptive nuclear attack.

CSIS in the News/Le SCRS dans les nouvelles

1-The sudden release of a **Canadian** held for **two years in China on suspicion of spying comes after a high-stakes campaign to secure his freedom, including an unusual and unannounced visit four months ago by the director of the Canadian Security Intelligence Service**, who met with **Chinese officials to try to persuade them that Kevin Garratt wasn't a spy**, the *Global & Mail* reports. On Thursday, a bearded Mr. Garratt landed in Vancouver and embraced his family, a free man. He had been accused by Chinese authorities of stealing military and defence research secrets and charged with espionage. The visit to China by CSIS director **Michel Coulombe, Canada's top spy, was one element of that effort, according to multiple sources with knowledge of the meeting**. When Mr. Garratt was indicted in January, China's state media said investigators had found evidence he had accepted tasks to gather intelligence for Canada. Mr. Coulombe met with **Geng Huichang, the minister in charge of China's powerful state security apparatus, to deliver the message in person that Mr. Garratt, a Pentecostal pastor, did not work for CSIS.**

2-*La Presse+* rapporte quà **chaque jour, au Canada, 1600 attaques de rançongiciels auraient lieu**. Mots de passe et dossiers confidentiels volés font régulièrement l'actualité, stimulant la recherche de nouvelles approches pour assurer la sécurité des réseaux. L'une d'elles, conçue à l'Université de Cambridge et imitant le système immunitaire humain à partir des mathématiques probabilistes, semble prometteuse. **Elle est proposée depuis 2013 par l'entreprise britannique Darktrace, qui a ouvert en avril dernier son bureau canadien, dirigé par l'ex-agent des services secrets David Masson.** Entrevue. Q D'abord, pourriez-vous vous présenter ? R **J'ai été membre du service de renseignement britannique, le MI5, pendant plus de 20 ans, puis j'ai travaillé au sein du Service canadien du renseignement de sécurité (SCRS) pendant quatre ans. Je m'occupais de cybersécurité et de sécurité nationale en général.** Je me suis ensuite joint à la compagnie Darktrace en janvier de cette année, après une invitation à établir un bureau ici, au Canada.

3-A group of **German artists** calling themselves **'Peng!'** have set up a **'Call A Spy'** hotline in which people can **contact an intelligence operative** through a **private network** that **masks the original source of the call.** Speaking to *Sputnik Deutschland,* 'Peng's!' **Ariel Fischer** said **"you can find most of the numbers on the internet,** some of them are from **professional organizations**, and some of them became known as the result of **intelligence leaks.** You just have to search. We have a lot of them, including for the **Canadian Security Intelligence Service**, NSA, CIA, FBI, BND and the BfV. There are also Italian and French intelligence services. We are also constantly searching for people who might be able to find new numbers so that we can bring 'Call a Spy' to different countries."

Canada

4-After a police raid on a **Toronto technology company**, Canada has agreed to share a massive stash of encrypted **BlackBerry** Ltd. messages with **Dutch police investigating an underworld conspiracy involving robberies, drug trafficking, attempted murder and assassinations.** But rather than simply hand over the messages, from 20,000 different users, an Ontario judge this week imposed restrictions designed to prevent a "fishing expedition" by police in the Netherlands

or any other country. **The 20,000 users**, writes the *National Post*, are said to include the **Dutch criminal suspects and their associates**, but also likely include many **innocent users of Ennetcom's service.**

International

United States / États-Unis

5-Calling **Edward Snowden** a **"criminal"**, the **House Intelligence Committee** dispatched a **bipartisan letter** to **President Obama** urging him **not to pardon** the exiled American. The letter, reports the *Washington Post,* emerged on the same day the **panel unanimously voted** to adopt a **classified report on Snowden** that, according to a three-page **unclassified summary**, portrays him as a **disgruntled employee** whose leak caused **"tremendous damage to national security."** Taking to Twitter this morning, **Snowden slammed** the committee, writing "their report is so **artlessly distorted** that it would be amusing if it weren't such a serious act of bad faith."

United Kingdom / Royaume-Uni

6-**Senior figures** at **GCHQ** are understood to be **concerned** the **government lacks a policy** to **assess** the **security risk of foreign investments**, reports *The Times of London,* after it was disclosed that **Hikvision**, a **company controlled by the Chinese government,** has **sold** more than a **million closed-circuit television cameras** and **recorders** to **British clients** who have installed them at sites including **airports, government buildings, sports stadiums** and the **London Underground.** The *Daily Telegraph* has learned **British intelligence** will, henceforth, be **consulted before foreign countries** are **allowed** to **sign major contracts** with **British companies.**

7-**Intelligence Services Commissioner Sir Mark Waller** has **criticized MI6** for **"serious failings"** in its response to allegations that **Michael Adebolajo**, one of the **killers of Lee Rigby,** had been **tortured by Kenyan authorities** following his **arrest** there in **2010.** Adebolajo was subsequently deported (Moderate coverage / couverture modérée).

Africa / Afrique

Middle East / Moyen-Orient

8-The *Jerusalem Post* reports that hundreds of Israelis killed in thousands of rocket attacks — that is the army's **Home Front Command's** estimation for what to expect in the event of a future all-out war, according to figures released ahead of a nationwide preparedness drill set for next week.

9-*The National (UAE)* reports that the fanatics of **ISIL** may be increasingly on the ropes in their Middle East stomping grounds, but in Indonesia there are fears that when those strongholds collapse they will scatter **battle-hardened extremists across South-east Asia.**

Afghanistan/Pakistan

10-The *International News* reports that the **United States** has lauded **Pakistan's progress towards combating terrorism** through recent military operations while insisting that a decisive policy shift was needed to overcome difficulties.

11-*Pajhwok Afghan News* reports that expressing concern over the **security situation in Afghanistan**, top American Senators on Thursday alleged that neighboring Pakistan continued to play a duplicitous role there.

Europe

12-**Turkish authorities detained four people** this morning as part of the investigation into a **potential threat** against **British and German diplomatic missions** in the country but found **no links** between the **suspects** and any **terrorist groups** reports the *Anadolu News Agency*. Earlier, **both embassies** announced they would be **closed today** for **unspecified security reasons.**
13-A study undertaken by **Norwegian intelligence**, reports *The Local,* has found that **88 per cent** of the **radicalized individuals in Norway** have an **ethnic background other than Norwegian** with more than 30 different nationalities represented. Additionally, **76 per cent** of the extremists have **Norwegian citizenship.** "The study confirms the pre-existing understanding of **extreme Islamism in Norway** as a **multi ethnic phenomenon**, characterized by **young men with low education, high crime rates** and a loose attachment to the labour market," the PST stated in the introduction to the study.
14-Selon *La Tribune de Genève,* la justice a prolongé de trois mois la détention préventive d'un jeune suisse. **Un Genevois soupçonné d'être en lien avec une organisation terroriste reste en prison, selon nos sources. Arrêté le 8 juin à l'aéroport de Zurich, en provenance de Turquie, A. a déjà passé trois mois en détention préventive.** « Le Tribunal des mesures de contrainte a, par décision du 8 septembre 2016 et faisant suite à la demande du Ministère public de la Confédération (MPC), prolongé la détention provisoire du prévenu pour une durée de trois mois», confirme le MPC, sans faire d'autres commentaires. Il est **reproché au jeune homme d'avoir enfreint la loi fédérale interdisant les groupes Al-Qaida, Etat islamique et les organisations apparentées.** Il est en outre prévenu de soutien, respectivement de participation à une organisation criminelle.

Australia, New Zealand / Australie, Nouvelle-Zélande

15-**Two Islamic State-inspired terrorists** who **planned to firebomb a Shi'ite** centre in **western Sydney with a homemade explosive claim they abandoned their planned attack when they saw someone nearby** because they "didn't want to hurt anyone", the *Australian* writes. **Omar al-Kutobi**, who along with **Mohammad Kiad** has pleaded guilty to planning a terror attack, said they planned to destroy the **Muhammadi Welfare Association of Australia's centre in Granville** but changed their mind when they saw a man inside.

Asia / Asie

16-China said Friday that a Canadian citizen it detained for two years over **spying allegations** was allowed to leave the country after a **local court issued a verdict in his case**, but it **refused to say what the verdict was or why he was detained at all. Kevin Garratt's** return to Canada was announced Thursday by Prime Minister **Justin Trudeau**, who said he had pressed Garratt's case with top Chinese officials. *Associated Press* reports that **Chinese state media** have previously reported that authorities found evidence that implicated Garratt in accepting tasks from **Canadian espionage agencies to gather intelligence in China**.
17-North Korea is ready to **"counter-attack"** in the face of **ongoing "provocation" from the United States**, its foreign minister said Thursday amid a spike in tension caused by Pyongyang's latest nuclear test. "The Korean people have indicated that we are ready to wage a counter-attack against provocation by enemies," Foreign Minister **Ri Yong-Ho** said at a meeting of the **Non-Aligned Movement in Venezuela**. The warning comes after two US supersonic bombers flew over South Korea on Tuesday in a show of force following North Korea's fifth and largest-ever nuclear test last week. Ri said the nuclear tests were needed to counter "threats" from Washington, reports the *Agence France Presse.*
18-The *Bangladesh Daily Star* reports that **Prime Minister Sheikh Hasina**, now in Montreal, will today hand over the "Friends of Liberation War Honour" award for late Pierre Elliot Trudeau to the latter's son, **Canadian PM Justin Trudeau.**
19-The *Times of India* reports that the world witnessed **11,774 terror attacks in 2015**, in which 28,328 people were killed and 35,320 injured. **India was the fourth worst-affected country**

after Iraq, Afghanistan and Pakistan, with 43% of 791 attacks in the country carried out by Naxalites.

CSIS in the News/Le SCRS dans les nouvelles

1- China's security services have been **sending undercover agents into Canada on tourist visas to strong-arm expatriates to return home**, including some suspected of corruption and other criminal activities. The secret Chinese visits have raised concern among lawyers and prompted investigations by the **Canadian Security Intelligence Service** and the **RCMP**, even as the Trudeau government begins negotiations for an extradition treaty with China. According to an insider briefed on China's secret-agent operation, the Chi**nese moved to tactics that include threats and intimidation because they were were "ticked off" at Canada for "not being willing to send people back the instant they asked"** and for dragging its feet on an extradition treaty. "Nobody has been caught and nobody has been taken to court," the insider said. The revelation comes as Chinese Premier **Li Keqiang** arrives in Ottawa on Wednesday for talks with Prime Minister **Justin Trudeau**. The two leaders are expected to discuss the extradition treaty between China and Canada Toronto refugee and immigration lawyer Lorne Waldman told *The Globe and Mail* some of **his Chinese clients in Canada have received cellphone messages from Chinese security officials threatening them and their families if they do not return home.** One client suspected that people watching him "might be from the Chinese government," he said. Mr. Waldman said he has worked with at least six people sought by China as fugitives. In the past year, two of them and the family of a third have been approached by **CSIS agents** who **"asked them whether or not they had suffered harassment at the hands of those Chinese officials in Canada** … in relation to their return to China, or made any threats directed toward them." The most recent such meeting took place this summer when "**the officers told my clients that CSIS was investigating whether or not this type of harassment is occurring,"** he said.

Canada

2- The top-level Trudeau adviser overseeing a **possible extradition treaty with China** told the previous government that China's so-called ``**economic fugitives''** don't belong on Canadian soil, *The Canadian Press* has learned. Then-deputy minister **Daniel Jean** offered that advice in a 2015 briefing note to the former Conservative government prior to his appointment in May as Prime Minister Justin Trudeau's national security adviser. ``**Canada does not want to be seen as a safe haven for fugitives and it is in Canada's interest to have such persons removed,**'' said the note, obtained by *The Canadian Press* under the Access to Information Act. In his new role with the Liberal government, Jean was in Beijing last week for the start of a new ``high level dialogue'' between Canada and China on national security and the rule of law _ talks that include breaking ground on an extradition treaty.

3- *Le Journal de Montréal* rapporte **qu'Adil Charkaoui a affiché publiquement sa préférence pour le candidat à la direction du Parti québécois Alexandre Cloutier à cause de sa position modérée sur la question identitaire.** «Le Collectif québécois contre l'islamophobie n'a pas appuyé publiquement Alexandre Cloutier. Néanmoins, il nous apparaît clairement qu'Alexandre Cloutier demeure la voix la plus modérée au sein du PQ et surtout qu'il comporte au sein de son équipe bon nombre de conseillers maghrébins musulmans pratiquants, chose qui est tout à fait à son honneur», a lancé M. Charkaoui dans une vidéo publiée sur la page Facebook du Collectif

hier. **L'imam Charkaoui avait été propulsé dans la campagne péquiste vendredi par un message twitter de Jean-François Lisée, qui l'associait à Alexandre Cloutier.**
4- The race to create **new cryptographic standards** before super-fast quantum computers are built that can rip apart data protected by existing encryption methods isn't going fast enough, two senior Canadian officials have warned a security conference. "I think we are already behind," **Scott Jones**, deputy chief of IT security at the **Communications Security Establishment (CSE),** responsible for securing federal information systems, told the **fourth annual international workshop on quantum-safe cryptography** in Toronto on Monday. **Quantum computing** – or more accurately, computers that use quantum mechanics – is not a dream, Jones and others told the conference of business executives, crypto academics, IT companies and government officials. One prediction is there's a one in seven chance that by 2026 a quantum computer will exist that can break RSA-2048 encryption. It may take longer — or, if there's an advance, shorter. "Quantum represents a fundamental change and challenge to encryption for all of us," **Jones said, noting that encrypted transactions are the backbone of security and trust on the Internet**. His comments were backed by **David Sabourin**, CSE's manager of cryptographic security, who said that if the 2026 prediction is right "we're in trouble." Speaking on a panel of government experts, Sabourin noted the **U.S.-based National Institute of Standards and Technology (NIST)** will close its call for proposed new and more quantum-secure public key encryption algorithms next year, writes *IT World Canada*.

International

United States / États-Unis

5- In a rare public comment, the **CIA's top Russia analyst Peter Clement** said **Vladimir Putin** is **likely** to **run** for **re-election as president in 2018** and may impose **tougher authoritarian rule to curb unrest** over the slumping economy. Clement, reports *Reuters,* said he has seen some "indicators" of where Putin is likely taking Russia.including a recent news report of a possible **"major restructuring" of Russia's intelligence services**. "What I see there is the **potential tightening up of society,**" said the Agency analyst, adding that he thinks **Putin "genuinely, genuinely fears instability and disorder."**
6- Director of National Intelligence **James Clapper**, reports the *Associated Press,* has made it crystal clear that he is **opposed** to a **presidential pardon** for **Edward Snowden**. "I could understand what he did, if ... what he exposed was limited to domestic surveillance. ... But he exposed so much else that had absolutely nothing to do with domestic surveillance, where he has **damaged our capability against foreign threats.** He has taken away capabilities that were used to protect our troops in Afghanistan," Clapper said. "I don't think I could concur in offering him a pardon."
7- The State Department has placed **Jund al Aqsa**, an **al Qaeda front group in Syria,** on the **U.S. government's list** of **specially designated global terrorist organizations.** (Moderate coverage / couverture modérée).

United Kingdom / Royaume-Uni

8- Speaking in Washington, **MI6 director Alex Younger,** reports the *Daily Telegraph,* said the actions of **Edward Snowden undermined trust** between **intelligence agencies** and **technology companies** and been **"highly problematic"**.

Europe

9- Selon l'*Agence France-Presse,* la **garde à vue de huit hommes interpellés pour des vérifications dans l'enquête sur l'attentat qui a fait 86 morts à Nice le 14 juillet** a été prolongée, a-t-on appris de source proche du dossier. "On est toujours en vérifications. Pour le

moment on n'a pas de certitude. Les huit restent en garde à vue", a précisé cette source, en indiquant que la garde à vue pouvait durer jusqu'à vendredi après-midi mais qu'elle "pourrait se terminer plus vite pour certains".
10- A **German immigration official**, identified as **'TSP'**, has been **arrested** and **charged** with **espionage** for an **Indian secret service** for allegedly **spying on members** of the **Sikh religion** reports *The Local.* Working at an immigration office in the western region of Ostwestfalen, prosecutors allege the 58-year-old **accessed databases** to pass on information on **suspected extremist** and **opposition members** of the religious group.
11- *Süddeutsche Zeitung* has learned that **Russia** is the **prime suspect** behind the **hacking** of **several German political parties** over the summer. Security experts employed by the German government believe a foreign power initiated the attacks in order to **gain sensitive information that could influence next year's national election.** It was revealed that **politicians and employees of several parties** received **emails** on **August 15th** and **August 24th** which appeared to come from **NATO headquarters.** Within the email was a link which, if clicked on, would enable spying software to be downloaded onto the computer.

Africa / Afrique

12- The **hunt continues** for three engineers, including a **Canadian**, who were **kidnapped in Libya** near the Algerian border reports the *Associated Press.* **Hassan Osman Eissa** of the Ghat municipal council said the **abductors are known to local authorities** and have **carried out carjackings and robberies in the past.** Eissa stated local security forces are searching for them and raiding suspected hideouts. **Global Affairs Canada spokesman Michael O'Shaughnessy** said "we are aware of the troubling yet unconfirmed report of the abduction of a Canadian citizen in Libya. We are diligently pursuing all appropriate channels."
13- D'après *All Africa,* le **président du Sénat français, Gérard Larcher, a affirmé lundi à Paris qu'avec l'Algérie "nous pouvons trouver des réponses" au terrorisme.** "Avec l'Algérie, nous pouvons trouver des **réponses pour surmonter le terrorisme"**, a-t-il dit.

Middle East / Moyen-Orient

14- The *Fars News Agency* reports that Lieutenant Commander of the Islamic Revolution Guards Corps Navy General Alireza Tangsiri announced that his forces had detained **Canadian and Australian forces** before they captured the US and British marines for violating Iran's territorial waters in the **Persian Gulf** in the past.
15- *Now Lebanon* reports that **Nizar Zakka, a Lebanese citizen and U.S. permanent** resident detained for a year in Iran over **spying allegations** has been sentenced to 10 years in prison and a $4.2 million fine, his supporters said Tuesday, the latest move in a crackdown on those with foreign ties following last year's nuclear deal.

Afghanistan/Pakistan

16- *Khaama Press* reports that the **Afghan intelligence operatives foiled a deadly suicide attack plot** by arresting a suicide attack organizer along with a would-be bomber in southeastern Khost province.

Australia, New Zealand / Australie, Nouvelle-Zélande

17- The potential return of dozens of Australian children from Islamic State-controlled Syria and Iraq has prompted **state and federal authorities to workshop how they will reintegrate a generation of battle-scarred children back into community life,** *The Australian* has been told. With Western governments increasingly confident they have Islamic State in retreat, Australian authorities have begun war-gaming how to handle a potential influx of hardened jihadists driven out of Syria and northern Iraq. About **110 Australians are thought to be fighting in Syria and Iraq**. While the threat that returning foreign fighters pose to communities has long been known, a

new challenge emerging is how to deal with children who have been exposed to the violence of the Syrian war, perhaps for years on end.

Asia / Asie

18- The *Times of India* reports that the **UK, Canada and Australia** have issued advisories asking their citizens to avoid visiting five northeastern states, parts of Jammu & Kashmir and the India-Pakistan border.

19- Two **U.S. supersonic bombers flew over South Korea on Wednesday**, with one of them landing at an air base 40 km (25 miles) south of the capital, the second such flight since North Korea's Sept. 9 nuclear test. U.S. Forces Korea said the flight by a pair of B-1B Lancer strategic bombers based in Guam was a **show of force and of U.S. commitment to preserve the security of the peninsula and the region**. The United States, which has about 28,500 troops in South Korea, flew two B-1 bombers on Sept. 13 escorted by U.S. and South Korean fighter jets in a show of solidarity with Seoul. The South's *Yonhap news agency* said the aircraft flew over a U.S. live-fire training site in the Pocheon area bordering the North (moderate coverage / couverture modérée)

20- Premier **Li Keqiang** has told US President **Barack Obama** that Beijing supports closer cooperation in the **UN Security Council** and in enforcement efforts to halt **North Korea's nuclear programme**. This could be a **signal Beijing will support tougher sanctions on North Korea after its fifth nuclear test**, with China increasingly irked by Pyongyang's behaviour and its consequences - a decision by Seoul to deploy a US anti-missile system, reports the *South China Morning Post*.

Americas / Amériques

21- **Venezuela** has accused the **United States** of **spying** on the **Non-Aligned Movement summit** it recently hosted, saying Venezuelan fighter jets **intercepted a US surveillance plane** and forced it to turn back reports *Agence France-Presse*.

CSIS in the News/Le SCRS dans les nouvelles

1- Canadians are being encouraged to ask more questions about the security of their electronic devices from an unlikely source: an executive at the country's electronic intelligence agency, reports the *Toronto Star*. **Scott Jones**, the deputy director of IT security at the **Communications Security Establishment**, said Canadians need to **start taking a greater interest in how their electronic devices protect personal information.** "We should be asking when we go and buy the stuff we have at home, **OK, tell me how it's being protected**," Jones said in an interview. **It may surprise some to hear an employee at CSE counselling Canadians to protect their private information**. The agency, which has largely operated in secret since its creation at the end of the Second World War, was thrust into the spotlight after U.S. whistleblower **Edward Snowden's** disclosures. While police and intelligence agencies argue about whether citizens should have access to strong encryption, the federal government, on the other hand, is trying to improve its own electronic defences. Known as "**Part B**" of CSE's mandate, cyber-defence operations require the **agency to work with a host of other federal departments to try and protect government information — including Canadians' personal information.** For **serious cyberattacks**, the response could include the **RCMP, CSIS, Public Safety, Shared Services Canada**, even **Global Affairs** and the **Privy Council Office**.

Canada

2- Ottawa has **confirmed that a Canadian is among three people taken hostage in Libya earlier this week**. In a statement Sunday, Global Affairs spokesman **Michael O'Shaughnessy** says the Canadian government is **"diligently pursuing all appropriate channels to obtain more information about this troubling incident."** He says the government will not comment further or release any information that may compromise efforts to secure the hostages' release or endanger the safety of Canadian citizens. The other two people taken hostage are Italians (moderate coverage / couverture modérée).

International

United States / États-Unis

3- According to an **internal law enforcement document** obtained by *BuzzFeed News,* the **Department of Homeland Security** has determined alleged bomber **Ahmad Khan Rahami** was **likely influenced by al Qaeda** and its **online magazine 'Inspire'** which contained **bomb-making instructions.** Each one of the explosive devices — allegedly planted by Rahami in Seaside Park, New Jersey, New York City, and a train station in Elizabeth, New Jersey — was **completely different from the others.**

United Kingdom / Royaume-Uni

4- Addressing the **Labour Party Conference** in Liverpool, leader **Jeremy Corbyn questioned** the need for **MI6** to **hire 1,000 new recruits** reports the *Daily Telegraph.*

Europe

5- Speaking to the Russian media the new SVR **director Sergey Naryshkin** said **"co-operation between the intelligence services** of **various countries** is **not only possible but necessary**" Naryshkin added that **Russian intelligence** is ready to **co-operate** with the **U.S., British** and **other Western security services.**
6- More than **65 per cent** of **Swiss voters** have backed **broadened surveillance powers** for the **country's intelligence services** reports the *BBC.* The law will permit the **Federal Intelligence Service** and other agencies to **put suspects under electronic surveillance** if authorized by a court, the defence ministry and the cabinet.
7- La **police espagnole a arrêté deux Marocains accusés de soutenir le groupe djihadiste Etat islamique (EI) et peut-être aussi de projeter un attentat en Europe**, a annoncé aujourd'hui le ministère espagnol de la Défense. L'un des **accusés avait voulu rejoindre l'EI en Syrie et s'était rendu à la frontière turco-syrienne pour y rencontrer un membre de l'organisation djihadiste,** afin de subir un entraînement avant de regagner l'Europe pour participer à un attentat, a précisé le ministère selon *Le Figaro avec Reuters.*
8- Les **défenseurs des droits de l'homme dénoncent des risques de torture. Pour la Chine, c'est une victoire. Paris a transféré un ressortissant chinois en fuite**, pour la première fois depuis l'entrée en vigueur, en juillet 2015, d'un **accord d'extradition avec la France.** Il s'agit d'un ancien officiel recherché dans le cadre de la campagne de grande ampleur menée par l'Etat-parti contre la corruption. **Chen Wenhua, né en 1952, est accusé par la Chine d'avoir détourné plus de 20 millions de yuans (2,7 millions d'euros) de fonds publics** indique *Le Monde.*

Africa / Afrique

9- Selon *Jeune Afrique,* le **chef du groupe jihadiste nigérian Boko Haram, Abubakar Shekau, a diffusé dans la nuit de samedi à dimanche une nouvelle vidéo dans laquelle il dit aller parfaitement bien,** fustigeant des déclarations de l'armée nigériane qui avait annoncé l'avoir grièvement blessé le mois dernier. « Vous avez dit sur les réseaux sociaux m'avoir blessé ou m'avoir tué, lance Shekau dans une vidéo d'une quarantaine de minutes, diffusée sur Youtube. Mais je suis heureux, en bonne santé et en sécurité. Je vais parfaitement bien. » **Il montre un calendrier islamique à la fin de son apparition, pointant du doigt une date qui correspond au 25 septembre 2016.**
10- The *Middle East Eye* reports a **leaked telephone conversation** involving **Major General Wael el-Safty** of **Egypt's General Intelligence Directorate** features **el-Safty** calling **Palestinian Authority President Mahmoud Abbas"stupid"** and his movement **Fatah "screwed."**

Middle East / Moyen-Orient

11- The *Saudi Press Agency* reports that **Canada** confirmed on Sunday it has become aware of a **citizen taken hostage in Libya** and is "diligently pursuing all appropriate channels to obtain more information."
12- The *Fars News Agency* reports that Governor General of Semnan Province Mohammad Reza Khabbaz announced that the **Iranian security forces** have recently captured a number of **ISIL agents** in his province.
13- The *Jerusalem Post* reports that Israel's military satellite program, the newest of which – **Ofek 11**, the newest and most advanced satellite is likely to soldier on in space, but with limited lifespan and ability to perform its **high-resolution spy duties**.

Afghanistan/Pakistan

14- The *Pakistan Dawn* reports that the former spokesperson for the **Tehrik-i-Taliban Pakistan (TTP), Azam Tariq**, has been reportedly killed in Afghanistan's Paktika province in air strikes carried out by Afghan and Nato forces.

Australia, New Zealand / Australie, Nouvelle-Zélande

15- On the back of the news on Friday that **IFM and Australian Super have lobbed an unsolicited approach for Ausgrid,** the big question for investment bankers is whether there is another opportunity to trump the domestically-funded $10 billion-plus offer. But the question remains as to what the latest situation means for **bankers who were recently in Canada to court prospective suitors for the asset**. The *Australian* writes that last year, **David Irvine,** a former director general of the **Australian Secret Intelligence Service — said to be highly vigilant on matters that may threaten national security — was appointed to FIRB.** The all-Australian offer comes as the risks surrounding Foreign Investment Review Board approval for **Chinese bidders and other foreign parties are perceived to be increasingly challenging.**

16- The *Australian Broadcasting Corporation* writes that **Australia's foreign spy agency** chief says **Islamic extremism in South-East Asia**, particularly in the southern **Philippines**, is a **growing national security concern**. Nick Warner, the head of the **Australian Secret Intelligence Service (ASIS),** is the only agency chief to have spoken publicly in its 60 years of operation. "In Australia's backyard in South-East Asia there are now ISIL affiliates — in Indonesia , in the southern Philippines," he told a panel discussion in Washington, using another term for the **Islamic State (IS) group**.

Asia / Asie

17- The *Bangladesh Sangbad Sangstha* reports that Law Minister Anisul Huq today said extradition of Father of the Nation Bangabandhu Sheikh Mujibur Rahman's convicted killer **Noor Chowdhury** was possible as discussion for his return was underway with **Canadian authorities**.

18- The PLA Air Force said on Sunday it had **conducted a drill involving long-range operations** over the **Western Pacific**, past the Miyako Strait, to test far-offshore combat and assault capabilities. **Shen Jinke**, a spokesman for the air force, said regular drills in the Western Pacific and patrols over the **East China Sea air defense identification zone were aimed at protecting China's sovereignty and national security**. According to a statement on the Ministry of National Defense's website, more than 40 aircraft including H-6K bombers, Su-30 fighters and aerial tankers of the **People's Liberation Army** completed exercises such as assaults on sea-surface targets and in-air refueling. The fleet also conducted a routine patrol in the East China Sea air defense identification zone, established in November 2013, writes the *China Daily*.

19- According to the *Global Times*, a man who claimed to be a member of the Islamic State (IS) jihadist group in an **attempt to increase his following on social media** has been detained by the police in South China's Guangdong Province, local media reported Saturday. The 25-year-old man surnamed Zhong will be detained by local police in Tangjia, Guangdong for five days for **"fabricating false facts and spreading rumors online"** in defiance of the Public Security Administration Punishments Law, said the Guangzhou-based news portal ycwb.com. Zhong was taken in for questioning by police after the city's department of public security on September 12 found that he had identified himself on the Tieba online forum as a member of IS, an Islamist group that has seized control of parts of Iraq and Syria and claimed responsibility for terror attacks around the world, said the report.

20- *The Hindu* reports that the **terror attack** at an Army camp in Kashmir's Uri district is only the latest in the long line of attacks on India's western border since the BJP led NDA government came to power. Since May 2014, there have been **23 fidayeen (suicide) attacks** along the Pakistan border, most of them in Jammu and Kashmir.

Americas / Amériques

21- **Ecuador** has expressed **optimism** that the **Julian Assange saga** is coming to an **end** reports *The Times of London.*

For more in-depth coverage of today's news, please consult the daily news summary which is published at 8 a.m.

World News Overview
Aperçu des nouvelles mondiales

(A Communications Branch product/un produit de la Direction des communications)

Thursday, September 29 2016
le jeudi 29 septembre 2016
07:00 / 7h00

CSIS in the News/Le SCRS dans les nouvelles

1- Un **jeune Montréalais soupçonné d'être allé en Syrie et d'adhérer à des idéologies « extrémistes islamistes** » a **réussi à conserver son permis d'armes à feu** pendant des années et à s'acheter légalement des carabines semi-automatiques, alors qu'il **faisait l'objet d'une enquête antiterroriste de la GRC**, souligne *La Presse+* dans une **série de reportages**. Le dossier de **Samy Nefkha-Bahri** soulève de nombreuses questions sur les mesures de contrôle des armes à feu au Canada et sur la communication entre les corps policiers. Un des reportages souligne brièvement que : « **L'Équipe intégrée de la sécurité nationale pilotée par la GRC** mène les enquêtes liées au terrorisme. Le **Service canadien du renseignement de sécurité** (SCRS) ne fait pas d'enquêtes criminelles, mais collecte de l'information pour le gouvernement sur les menaces à la sécurité nationale. »

2- According to *The Canadian Press*, the NDP is calling on the Liberal government to **immediately rescind a directive that allows security agencies to use information that may have been obtained through torture**. The Liberals _ who opposed the ministerial directive while in opposition _ say it will be reviewed as part of a sweeping examination of national security policy. "The input of all Canadians, including all members of Parliament, is most welcome," said **Scott Bardsley**, a spokesman for Public Safety Minister **Ralph Goodale**. The New Democrats want the directive repealed now. Information obtained under torture is not reliable _ and therefore the practice does not ensure the safety of Canadians, NDP public safety critic **Matthew Dube** said Wednesday. The policy applies to the **Canadian Security Intelligence Service**, the **RCMP**, the **Canada Border Services Agency**, the **Communications Security Establishment** and **National Defence**.

Canada

3- At first glance, nothing stands out about the picture. A photograph like the thousands of others seen on social media, showing the prime minister smiling in the company of a voter. What's different is that the man posing beside **Justin Trudeau** is not just an average voter, notes a front-page *Toronto Star* report (written by *La Presse* reporters **Gabrielle Duchaine and Vincent Larouche**). He is the **subject of an RCMP investigation**, suspected of **having participated along with other Quebecers in the kidnapping of two American journalists in Syria in 2013**, an incident believed to have been orchestrated by the **al-Nusra Front**, a group linked to Al Qaeda. Despite this, he was able to get close enough to Trudeau for long enough to take a selfie with the prime minister. *La Presse* has chosen **not to name the suspect, because it is not possible at this stage in the investigation to confirm his level of involvement in events that occurred in Syria.** The young resident of a suburb south of Montreal has not been charged with any crime. He travelled to Turkey for several months in 2012 and 2013, but there is no proof that he crossed the border into Syria.

International

United States / États-Unis

4- Appearing on *CNN,* CIA director **John Brennan** said despite the government's best efforts, the **likelihood of terrorist activity** in the **United States is strong**. "So I think we have to assume **there's something here in the states,**" Brennan said. "We have to be **relentless** in terms of going after them." He added **"it's impossible to say"** whether **Isis** has **operatives or cells** in the **United States**, and he credited the "tremendous advances in **information sharing** and **interaction** between federal officials" in making it difficult for terrorists to operate in the country.
5- FBI director **James Comey** informed a congressional committee yesterday that **hackers** have attempted **more intrusions** into **voter registration databases** since those revealed this summer reports the *Washington Post.* Earlier in the week Homeland Security Secretary **Jeh Johnson** disclosed **18 states have asked for help** in **improving** their **election-systems cyber-security.**
6- **U.S. officials,** reports the *Wall Street Journal,* are **increasingly confident** that the hacker **'Guccifer 2.0'** is part of a **network of individuals** and **groups** kept at **arm's length by Russia** to **mask its involvement** in cyber intrusions such as the theft of thousands of Democratic Party documents. While the **hacker denies** working on behalf of the Russian government, U.S. officials and independent security experts say the syndicate is one of the most striking elements of what looks like an intensifying Russian campaign to target prominent U.S. athletes, party officials and military leaders.
7- *NBC News* reports the **hack** of more than a **half billion Yahoo email accounts** was **motivated by espionage,** not profit, according to an analysis by the **independent cyber-security firm InfoArmor** which contends that an **Eastern European state-sponsored actor** appears to have **ordered the massive hack** as part of a **coordinated effort** to infiltrate the **email accounts** of **U.S. military, diplomatic** and **political figures.**

United Kingdom / Royaume-Uni

Europe

8- De **nombreuses chaînes de télévisions auraient reçu ces derniers jours un courrier de la part du ministère de l'Intérieur leur demandant de différer de quelques minutes leurs émissions en direct afin d'assurer une éventuelle coupure en cas d'attaques terroristes,** rapportent nos confrères de Europe 1, citant la société de production Endemol. Une **information démentie** quelques minutes plus tard par le ministère de l'Intérieur selon *Le Figaro.*
9- D'après *Le Figaro et l'Agence France-Presse,* une **ressortissante allemande enlevée fin 2015 en Syrie et son bébé né lors de cette captivité ont été libérés hier**, a-t-on appris aujourd'hui auprès du gouvernement allemand, une libération confirmée par un groupe djihadiste. Ils ont été libérés hier "et sont entrés en Turquie", a indiqué à l'AFP une porte-parole du ministère allemande des Affaires étrangères.
10- The case of whether **Edward Snowden** can **travel to Norway** to accept an award **without fear** of **extradition** to the **United States** appears headed to the **Supreme Court** reports *The Local,* after an **Oslo Appeals Court upheld** a **lower court ruling** which **backed** the **Norwegian justice ministry's position** that **no guarantees on extradition** could be given before a request had been formally received.

Africa / Afrique

11- Selon *Liberté,* (Algérie), **six personnes, âgées entre 22 et 45 ans, activant dans un réseau de soutien aux terroristes, ont été écrouées, hier, par le juge d'instruction près le tribunal de Collo, en Algérie,** pour constitution d'un **réseau de soutien et de financement de groupes terroristes armés et propagande du terrorisme.**
12- **Amnesty International**, reports *The Times of London,* has accused the **Sudanese government** of using **chemical weapons to kill civilians** including babies and children, leaving hundreds of survivors with "horrific" symptoms. **Sudan's foreign minister, Ibrahim Ghandour,**

in a meeting with the *New York Times* editorial board on Tuesday, dismissed the allegations as **"nonsense."**

Middle East / Moyen-Orient

13- The *Gulf News* reports that Shaikh Abdullah Bin Zayed Al Nahyan, Minister of Foreign Affairs and International Cooperation, met on Tuesday with **Justin Trudeau, Prime Minister of Canada**. The meeting reviewed cooperation between the UAE and Canada and ways of boosting them, as well as ways to encourage investments.
14- The *Fars News Agency* reports that Secretary of Iran's Expediency Council (EC) Mohsen Rezayee disclosed that the country's **security forces have captured a number of ISIL terrorists** who plotted to carry out **suicide attacks** at the University of Tehran.

Afghanistan/Pakistan

15- *The International News* reports that **Pakistan's intelligence establishment** has got the information that **RAW** has been tasked by the Modi government to execute covert strikes against Pakistan that includes terrorist activity, targeting of ISI or MI offices and assassination of Hafiz Saeed and Masood Azhar.
16- *Pajhwok Afghan News* reports that the **National Directorate of Security (NDS)** on Wednesday claiming preventing 11 American power generators from being smuggled to Pakistan.

Australia, New Zealand / Australie, Nouvelle-Zélande

17- Some **110 Australians are fighting with terror group Islamic State** but the federal government expects a **much smaller number will seek to return home**, writes the *Australian Associated Press*. Justice Minister **Michael Keenan** said there was a good chance a significant number would be killed in fighting for Mosul and Raqqa, some dual nationals have lost their Australian citizenship while others won't want to return. "We will make sure that anybody who returns from the conflict zone doesn't pose a threat to the Australian community. **We are not going to allow them to threaten our safety**," he told reporters in Canberra on Thursday.

Asia / Asie

18- China **"means what it says"** when it says it will **consider countermeasures against the planned U.S. deployment of an advanced anti-missile system in South Korea,** the defense ministry said on Thursday. China, North Korea's neighbor and lone major ally, has repeatedly expressed anger at the United States and South Korea for their decision to **deploy the U.S. Terminal High Altitude Area Defence (THAAD)** system in the South to counter missile and nuclear threats from North Korea. The South Korean defense ministry said it would announce a new location for the system on Friday, after opposition from residents for the initial site choice, reports *Reuters*.
19- *The Hindu* reports that **India** has carried out **surgical strikes targeting "launch pads" for terrorists** across the Line of Control (LoC), the Army said on Thursday.

Americas / Amériques

20- **Peru's former spy chief Vladimiro Montesinos** has been sentenced to **22 years in jail,** reports the *Guardian* (UK), for the **forced 1993 disappearance** of **two students** and a **university professor**, whose bodies were burned in the basement of the country's intelligence agency.
21- With Colombians preparing to vote on the FARC peace pact on Sunday, **President Santos** has suggested **talks** with the **ELN** could start as early as **next week** if the rebels agree to **release hostages** reports *teleSUR*. For its part, the ELN announced it's **ready to talk** adds *Reuters*.

CSIS in the News/Le SCRS dans les nouvelles

1-The *Toronto Star Online* writes that the civilian watchdog committee that oversees **Canada's spy agency is giving a cautious thumbs-up to CSIS for its exercise of newly acquired anti-terror powers under Bill C-51,** the controversial law passed last year that the Liberal government says it will amend. **Pierre Blais**, chair of the **Security Intelligence Review Committee (SIRC),** said in an interview that **CSIS appears to have used in a responsible manner its warranted and unwarranted powers of threat disruption and information-sharing**. Under Bill C-51, passed by the previous Conservative government in 2015, the **Canadian Security Intelligence Service (CSIS)** was given wide-ranging ability to disrupt or reduce threats to Canada's national security, inside or outside Canada. **SIRC's recommendations are non-binding.** Yet **CSIS director Michel Coulombe** issued a written statement saying **CSIS is acting to strengthen its rules around such information gathering. (Moderate coverage/couverture modérée)**

2-The worries about a suspect in a **terror investigation** seen **posing for a selfie last year with the prime minister go far beyond the anxiety of how he got that close**. A joint *CBC News/Radio-Canada* investigation has learned that the man is one of at least four **Quebec men of interest to the RCMP for their alleged connection to the 2012 kidnappings of two Americans in Syria**. CBC has been in contact with two of the men, who are going about their lives in Quebec. **Sources have indicated that the other two may be overseas, possibly in Syria or Turkey. CBC has repeatedly asked CSIS and the RCMP about the travels and status of the men. Both agencies have declined to provide details.**

3-Un **journaliste américain kidnappé et torturé en Syrie en 2013 a été troublé hier en voyant un des suspects ciblés par la police dans son dossier prendre librement un égoportrait avec le premier ministre Justin Trudeau.** Troublé, mais pas surpris. **Matthew Schrier croit depuis longtemps que les autorités canadiennes ne prennent pas assez au sérieux les crimes dont il a été victime.** Surveillance des combattants à l'étranger Le ministère de la Sécurité publique soutient qu'il a les outils pour traiter des cas de Canadiens de retour au pays après avoir pris part à des activités de groupes terroristes. « Le gouvernement dispose d'un certain **nombre d'outils pour faire face aux combattants à l'étranger, dont la révocation de passeports, le Programme de protection des passagers et des accusations possibles. Comme l'a souligné le directeur du SCRS [Service canadien du renseignement de sécurité], le nombre total de Canadiens à l'étranger impliqués dans des activités liées à la menace [terroriste] est d'environ 180,** avec environ 60 présumés combattants qui sont retournés au Canada rapporte *La Presse+*.

Canada

4-In a **front-page report**, the *Toronto Star* points out that a **young Montreal man suspected of having gone to Syria and adhering to "extremist Islamist" ideologies** was able to keep his firearms licence for years and to legally purchase semi-automatic rifles while he was the subject of a terrorism investigation by the **RCMP**, a *La Presse* investigation has found.

International

United States / États-Unis

5-**U.S. intelligence officials** disclosed to *NBC News* there is now **"no doubt"** the **Russian government** is trying to **influence November's presidential election.** The American intelligence community has determined **Moscow** is **behind** the **leaks** of **Democratic National Committee emails to Wikileaks** and others — and that the goal is to **undermine confidence** in the November 8 ballot. *NBC* has also learned from a **Department of Homeland Security** source that there have been **hacking attempts** on the **election systems** of **more than 20 states**, far more than the two that have been publicly acknowledged.

6-*Yahoo News'* Michael Isikoff reports an analysis by the **Department** of the **Director of National Intelligence** says the **Russian government** is conducting a **wide-ranging** and **"opportunistic" campaign** to **expand** its **political influence** in **Europe** by deploying **internet "trolls** and other **cyber actors"** to **challenge pro-Western journalists** and **spread pro-Kremlin messages** in **social media forums.** According to the DNI report, **two state-owned media outlets *Sputnik*** and ***RT* promote Russia's political aims** with programming targeted to "activist" audiences including "far-right and far-left elements of European society." It adds that the *RT* channel gives "disproportionate coverage and airtime to the European Parliament's more extreme factions."

7-The **FBI** envisioned **infiltrating mosques** and **Muslim student associations** to look for **young Yemenis** to serve as **informants**, according to an internal presentation obtained by *The Intercept.*

8-A study by the **Justice Department's Inspector General's office** has concluded the **FBI's use** of the surveillance statute, **Section 215** of the **Patriot Act,** enabling it to **collect Americans' phone** and **email records,** has **declined** since details about the program were **leaked** by **Edward Snowden** in 2013 reports the *Washington Times.*

United Kingdom / Royaume-Uni

9-In conversation with the *BBC World Service,* **Firas Abi Ali, a senior analyst for IHS Country Risk,** predicted **Isis** will be **defeated militarily** by **late 2017.**

Africa / Afrique

10-**Algeria** announced yesterday its military **killed five armed Islamist militants** and **seized weapons, munitions** and **food supplies** in an ongoing operation in the **forests of Tazoult** in Batna province, east of Algiers reports *Reuters.*

Middle East / Moyen-Orient

11-The *Lebanon Daily Star* reports that **Montreal Mayor Denis Coderre** advocated for closer ties between **Lebanon and Canada** Thursday on the sidelines of an international mayors' conference.

12-The *Times of Israel* reports that the **Shin Bet** will be specifically responsible for providing personal protection to "more than 60 people from Israel and the rest of the world, including 20 presidents, 15 foreign ministers, five heads of state and VIPs from various countries that are coming to represent their nations at the funeral," the agency said.

13-*The National (UAE)* reports that one of the leading figures of **Al Qaeda in the Araban Peninsula (AQAP)** surrendered to Yemeni security forces on Thursday morning. Aden police spokesman Abdurrahman Al Naqeeb said **Taher Tammah** gave himself up to security forces in the southern province of Lahj.

Afghanistan/Pakistan

14-The *Pakistan Dawn* reports that an **Indian soldier has been captured by the Pakistan army,** while Indian soldiers have also been killed in the episode of firing across the Line of Control, it emerged Thursday.

15-*Pajhwok Afghan News* reports that the **Ministry of Defence (MoD)** on Thursday said yesterday's drone strike in the Achin district of eastern Nangarhar province was carried out on Islamic State or Daesh centres based on **intelligence information**.

Europe

16-Selon *Le Soir,* les **opérateurs européens sont contre un fichier d'enregistrement des voyageurs.** Le « passenger name record » belge incluant les trains internationaux devrait être évoqué en Commission Terrorisme à la mi-octobre. La Deutsche Bahn menacerait de supprimer des ICE vers la Belgique si ce texte est adopté. L'une des mesures prévues par le fédéral dans son programme de lutte contre le terrorisme est la **création d'un registre des passagers, pour confronter leurs noms à ceux qui se trouvent dans différentes bases de données de personnes recherchées**. Mais la particularité du projet belge est qu'il ne se limite pas aux seuls vols aériens, comme aux Etats-Unis. Le **ministre de l'Intérieur, Jan Jambon (N-VA) souhaite l'étendre aux trois autres modes de transports internationaux qui arrivent en Belgique : les bus, les bateaux et les trains**. Cette perspective fait réagir viscéralement les opérateurs ferroviaires européens.

17-D'après *l'Express,* **l'émission Quotidien, dont l'un des journalistes a pu consulter un procès-verbal de la sous-direction anti-terroriste, met en lumière des incohérences dans les versions officielles données par les autorités.** Course folle du camion, intervention des policiers, échange de tirs... Que s'est-il passé le soir du 14 juillet à Nice? Deux mois et demi après l'attentat sanglant sur la promenade des Anglais, de **nouvelles révélations viendraient contredire les versions avancées par les autorités après l'attaque.** C'est l'émission Quotidien qui, jeudi soir, a mis en lumière ces nouveaux éléments par la voix de **Azzeddine Ahmed-Chaouch.**

18-**Beate Zschäpe**, the **last known surviving member** of the **German neo-Nazi NSU,** accused of a spate of **racist murders** between 2000-2007, broke her silence in a Munich court on Thursday, personally speaking for the first time since the trial against her began in 2013 reports *Deutsche Welle.* In a short statement, 41-year-old Zschäpe told the court that as a young woman in eastern Germany in the aftermath of reunification, she **"indeed identified with nationalist ideology."** Today, however, she said: "I judge people not by their origin and political affiliation but by their behavior...**I regret my own misconduct."**

Australia, New Zealand / Australie, Nouvelle-Zélande

19-A **terrorism expert** says **jihadist fighters who are off the radar are the real risk to New Zealand**. *Radio New Zealand News* reports that a would-be Islamic State fighter, **Amin Mohamad**, was arrested in **2013 while boarding a plane at Brisbane airport bound for Turkey on a trip organised by an IS recruiter.** Because of time already served he will be released next year and will likely be deported to **New Zealand, where he has spent most of his life.**

Asia / Asie

20-The *Times of India* reports that in a stunning reprisal for the Uri terror attack that breached decades of self-imposed restraint, **India conducted "surgical strikes" on seven terrorist "launch pads"** across the Line of Control (LoC) in Pakistan-occupied Kashmir in the early hours of Thursday.

21-The White House **appears to want to stabilise ties with Beijing** in the final months of the Obama -administration, Chinese analysts said yesterday, after a weekend report **that Pentagon chiefs had been barred from publicly using "great power competition" in reference to military challenges from China**. According to the *South China Morning Post*, the analysts said the **US National Security Council's** reported gag order was another sign that Washington intended to ease its tension with Beijing over disputes in the South China Sea. Citing four sources

familiar with a classified directive, the *US' Navy Times*, a weekly publication for US naval personnel and their families, reported on Sunday that the NSC **ordered Pentagon leaders to strike out the phrase "great power competition" and find something less inflammatory**.

CSIS in the News/Le SCRS dans les nouvelles

1- *La Presse+* rapporte qu'un **motard en voie de devenir membre en règle des Hells Angels est au nombre des 800 débardeurs du Port de Montréa. Roger Bishop fils, 46 ans, est sorti de l'anonymat la semaine dernière** lorsqu'il a échangé quelques mots avec un journaliste venu couvrir une perquisition policière dans un centre de conditionnement physique du chemin de Chambly, à Longueuil. « En général, les personnes qui doivent avoir accès aux zones réglementées d'un port désigné au Canada doivent obtenir une habilitation de sécurité qui repose sur un programme rigoureux de vérification des antécédents par **le Service canadien du renseignement de sécurité (SCRS), par la Gendarmerie royale du Canada (GRC)** et, au besoin, par **Immigration, Réfugiés et Citoyenneté Canada », a** réagi Daniel Savoie, de Transports Canada.

Canada

2- Whistleblower. Hero. Traitor. Patriot. These words and more have been used to describe former cybersecurity contractor **Edward Snowden**, who in 2013 copied and distributed thousand of documents to reporters and whose stories of Western intelligence agencies — including Canada's **Communications Security Establishment (CSEC)** — shook the world, points out *IT World Canada.* This morning Snowden told the the annual **SecTor cyber security conference in Toronto** that Prime Minister **Justin Trudeau** want to amend the controversial **Bill C-51** anti-terrorism law and not repeal it because he "is afraid of being attacked for being soft on terrorism." Speaking by video from Russia, where he fled to avoid prosecution by U.S. authorities, **Snowden said the legislation, needs three fixes**: First, a judicial body should have oversight over federal intelligence agencies that has the power to prosecute authorities that have broken the law. Second, because intelligence agencies are trading personal information of citizens "like baseball cards" citizens should be told if the data sharing hasn't led to an arrest for criminal activity. And finally, what Snowden called the criminalization of speech through vague definitions of terrorism should be taken out of C -51.

3- Le **Canada est-il prêt à gérer un retour massif de djihadistes sur son territoire ?** Non, répondent des experts. Pourtant, une **éventuelle chute de Mossoul**, dernier fief du groupe armé État islamique (EI) en Irak, risque de pousser de jeunes Canadiens partis gonfler les rangs de l'EI à tenter de revenir au pays Indique *La Presse+*. « Avec ses pertes militaires quotidiennes ainsi que la perte éventuelle de la ville emblématique de Mossoul, la notoriété de Daech s'effrite, explique **Jocelyn Bélanger,** expert des questions de terrorisme et de radicalisation et professeur adjoint à l'Université de New York à Abou Dhabi.

4- A major investigation by **Winnipeg police** that recovered hundreds of thousands of dollars in stolen property has **raised national security concerns after blank passports were among the items officers found**, the *Winnipeg Free Press* reports. Tuesday, police announced **Project Heavy Metal** identified 20 suspects, including nine arrested in Manitoba, who are facing 140 charges related to a theft ring that operated across Western Canada.

International

United States / États-Unis

5- A survey commissioned by the **Center for Strategic and International Studies** involving **respondents** from **eight countries**. the **United States, France, Britain, Turkey, Egypt, China, India** and **Indonesia**, found that at least **three in four** polled said they **expect a terrorist attack** to **occur within the next year**. Additionally, reports the *Washington Post,* a majority in every country polled, including the United States, overwhelmingly approved all 21 options presented to them — among them, requiring identification cards for citizens and visitors; rigorous screening of immigrants; bans on incendiary religious speech; and monitoring of phone calls, emails and social media.

6- According to a study released by the **Brennan Center for Justice**, reports the *Washington Post,* the **Justice Department** has kept **classified** at least **74 opinions, memos and letters on national security issues,** including **interrogation, detention** and **surveillance**. Also still **classified** are between **25** and **30 significant opinions** issued between **2003** and **2013** by the **Foreign Intelligence Surveillance Court**. "This is an **extensive body of secret law,** which is fundamentally **incompatible with democratic self-governance,**" said **Elizabeth Goitein**, the **co-director** of the **Brennan Center's Liberty and National Security Program**. However, **Office of the Director of National Intelligence spokesman Brian Hale** countered that "in the last several years the government has engaged in an **unprecedented level of transparency regarding its intelligence collection authorities**". Hale said that the transparency includes releasing thousands of pages of documents related to foreign intelligence surveillance on U.S. soil and numerous FISC opinions, including five opinions this year.

7- Speaking at an event in Washington yesterday, NSA director **Michael Rogers**, reports *fed scoop.com.,* said by giving the **Department of Homeland Security rather than NSA**, the **lead** in **defending civilian government networks** and working with the private sector to **protect the nation's vital industries,** the U.S. had **"take[n] our best players off the field"**. Rogers said the decision "was **politically driven** and not policy driven. People were a little nervous about having NSA … dealing directly with them".

United Kingdom / Royaume-Uni

8- A nine month examination of the **government's counter-radicalization Prevent program** led the **Open Society Justice Initiative** to label it **badly flawed, potentially counterproductive** and a risk to the basic rights of young Muslims reports the *Guardian.*

Europe

9- D'après *L'Opinion,* **François Hollande révèle avoir ordonné l'exécution d'au moins quatre terroristes par la DGSE, tout en dévoilant des conversations qui mettent le Grec Tsipras en difficulté.** Services secrets et crise grecque : François Hollande hors limites.Soixante-dix pages du **livre «Un président ne devrait pas dire ça» de Gérard Davet et Fabrice Lhomme (Stock) sont consacrées à la diplomatie et au renseignement.**

10- **Turkish police** this morning **fatally shot** a **suspected Islamic State militant** who was believed to be planning a **suicide bomb attack in Ankara.** The *Associated Press* reports the man was killed in a raid on a ninth-floor apartment on the outskirts of the city after he ignored warnings to surrender and opened fire on police.

11- In **co-operation** with the **FBI, Czech authorities** this morning **arrested** an unidentified **Russian man** wanted in connection with **hacking attacks** on **targets** in the **United States** reports *Reuters.*

12- **EU Security Commissioner Julian King** has warned the **battle for Mosul** may lead to to the **return to Europe** of **violent Islamic State fighters** reports the *Daily Telegraph.* "This is a **very serious threat** and we must be prepared to face it" King said. He added that approximately **2,500 EU nationals** are currently **fighting alongside Isis** and that if even a handful return it would pose a "serious threat that we must prepare ourselves for."

13- Selon *Le Soir,* (Belgique), **quatre personnes ont été inculpées pour participation aux activités d'un groupe terroriste après 15 perquisitions menées mardi matin dans plusieurs villes du nord de la Belgique (Gand, Deinze, Anvers),** a annoncé le parquet fédéral. Parmi les inculpés, certains sont **« suspectés d'avoir voulu recruter des personnes pour qu'elles se rendent en Syrie en vue d'y rejoindre l'Etat islamique »,** souligne le parquet.

Africa / Afrique

14- Selon *All Africa,* les **brigades de lutte antiterroriste sont parvenues à dévoiler un groupe terroriste** qui aurait projeté un attentat contre une **personnalité politique importante,** occupant une haute responsabilité au sein de l'Etat, a annoncé, dimanche, le porte-parole officiel du Tribunal de première instance de **Tunis** et du Pôle judiciaire de lutte antiterroriste, **Sofiène Selliti.**
15- As the Nigerian government negotiates with Boko Haram for the release of 83 of the kidnapped Chibok schoolgirls, the *Associated Press* has been informed by **Pogu Bitrus** of the **Chibok Development Association** that as many as **one-third** of the **students remaining in captivity** appear to be **unwilling to leave their extremist abductors.** Meanwhile, the **government** is **denying** media reports that the **21 girls freed last week** were **exchanged** for **four Boko Haram prisoners.**

Middle East / Moyen-Orient

16- *Agence France-Presse* reports that an **Iranian-American businessman** and his 80-year-old father have been given 10 **years in prison for espionage,** Tehran's prosecutor said on Tuesday, prompting the US to demand their release.
17- *Al Jazeera* reports that **tens of thousands of allied forces** continued their advance on Mosul on Tuesday, but their offensive to retake **ISIL's last major stronghold** in Iraq was slowed down by explosives and booby traps they encountered along the way.

Afghanistan/Pakistan

18- The *Pakistan Dawn* reports that **Intelligence Bureau (IB) Director General Aftab Sultan,** while speaking in the Senate standing committee meeting on Tuesday, said a large number of terrorists arrested during the last three years had connections with and were working for the **Indian and Afghan intelligence agencies.**
19- Depending on the Taliban source, secret peace talks with the Afghan government were held in Qatar or they weren't but one Taliban official told *Reuters* that in any event, "like our previous meetings, it was a **waste of time** and resources, as we **could not achieve anything".**

Australia, New Zealand / Australie, Nouvelle-Zélande

20- **Reclaim Australia** says it has never condoned violence but national intelligence bosses say **radical anti-Islamic groups are a growing threat** to Australia's security. **ASIO** director-general **Duncan Lewis** said Reclaim Australia, in particular, **was of interest to intelligence agencies.** Authorities **charged a member of the right-wing group under federal terror laws for the first time in August for allegedly collecting or making documents to prepare for terrorist acts.** Mr Lewis said Reclaim Australia has **"offered violence"** in the past and expects they will continue to when they confront pro-Islamic groups. **"To the extent that there is a possibility of violence, or there is indeed violence being offered, that is of interest to us. That is business for ASIO,"** he told a Senate committee late on Tuesday night. But Reclaim Australia said it does not condone violence. **"Reclaim has never condoned violence and we never will. Reclaim has worked closely with police at past events to ensure public safety,"** a statement provided to the *Australian Associated Press* said.
21- Up to **70 children of Australians** have been **exposed to extremist groups in the battlefields of Syria or Iraq,** the country's security chief has revealed. **Duncan Lewis,** director-general of the **Australian Security Intelligence Organisation,** said these children either travelled to the

conflict zones with their Australian parents or were born there. He told a **Senate committee** late on Tuesday night that **ASIO is investigating around 190 people in Australia who are actively supporting groups like IS through recruiting, fundraising or wanting to join themselves,** reports the *Australian Associated Press.*

22- According to *The Australian*, the highest-ranking terrorist Australia has produced is now a -jihadi without a group, "**resigning**" to "**pursue a number of projects independently**". In a corporate-sounding statement released on his official **Twitter** and **Facebook** accounts, it is claimed former Sydney man **Mostafa Mahamed**, better known as **Abu Sulayman**, resigned from the al-Qa'ida-backed Syrian group **Jabhat Fateh al-Sham** this month. The "resignation" follows his group claiming to have severed ties to al-Qa'ida in July, and being heavily targeted by Russian and Syrian bombardments in the ravaged city of Aleppo.

Asia / Asie

23- In the three months since a band of **youths tortured and killed 20 hostages in a Dhaka restaurant, Bangladeshi intelligence officials say they're rooting out radicals and restoring security to the streets**, reports *Agence France-Presse.* The report points out that the The government continued to deny any IS role even after an August raid killed three suspected militants, including a **Canadian man of Bangladeshi origin** identified on an Islamic State website as the extremist Sunni group's representative in Bangladesh.

24- North Korea on Wednesday threatened to destroy Seoul and the South Korean presidential office if there is **any sign of pre-emptive strikes** by the **United States** and the South against Pyongyang. *Rodong Sinmun*, the North's main newspaper, said that the **country will strengthen its nuclear capabilities in quantity and quality in response to what it called its enemies' scheme for aggression**. "We have warned that South Korea will be engulfed in a sea of fire and the U.S. military units in the Pacific region and the mainland will be in chaos if the U.S. wages nuclear strikes against us," the newspaper said. "Our warning is not an empty word." North Korea has further ratcheted up war rhetoric since speculation has spawned that the U.S. may consider pre-emptive strikes against the North over Pyongyang's nuclear and missile programs, the *Yonhap News Agency* reports.

25- The *Times of India* reports that **Pakistan-based terror group Laskar-e-Taiba** has issued a warning to the Baramulla SHO for facilitating an operation on Monday in which at lease 44 have been arrested for **terror-related activities**.

Americas / Amériques

26- In the spirit of **neutrality** in the **U.S. presidential election, Ecuador** has **confirmed** it has **"temporarily" restricted access** to the **internet** within its **London Embassy, cutting off Julian Assange.** WikiLeaks has released emails and other material connected to the Clinton campaign. Ecuador's action, experts inside and outside the United States government said, is **not likely to slow the flow of leaked emails.** Those emails are routed through servers around the globe. (Extensive coverage / vaste couverture).

15- As the Nigerian government negotiates with Boko Haram for the release of 83 of the kidnapped Chibok schoolgirls, the *Associated Press* has been informed by **Pogu Bitrus** of the **Chibok Development Association** that as many as **one-third** of the **students remaining in captivity** appear to be **unwilling to leave their extremist abductors.** Meanwhile, the **government** is **denying** media reports that the **21 girls freed last week** were **exchanged** for **four Boko Haram prisoners.**

Middle East / Moyen-Orient

16- *Agence France-Presse* reports that an **Iranian-American businessman** and his 80-year-old father have been given 10 **years in prison for espionage,** Tehran's prosecutor said on Tuesday, prompting the US to demand their release.
17- *Al Jazeera* reports that **tens of thousands of allied forces** continued their advance on Mosul on Tuesday, but their offensive to retake **ISIL's last major stronghold** in Iraq was slowed down by explosives and booby traps they encountered along the way.

Afghanistan/Pakistan

18- The *Pakistan Dawn* reports that **Intelligence Bureau (IB) Director General Aftab Sultan,** while speaking in the Senate standing committee meeting on Tuesday, said a large number of terrorists arrested during the last three years had connections with and were working for the **Indian and Afghan intelligence agencies.**
19- Depending on the Taliban source, secret peace talks with the Afghan government were held in Qatar or they weren't but one Taliban official told *Reuters* that in any event, "like our previous meetings, it was a **waste of time** and resources, as we **could not achieve anything".**

Australia, New Zealand / Australie, Nouvelle-Zélande

20- **Reclaim Australia** says it has never condoned violence but national intelligence bosses say **radical anti-Islamic groups are a growing threat** to Australia's security. **ASIO** director-general **Duncan Lewis** said Reclaim Australia, in particular, **was of interest to intelligence agencies.** Authorities **charged a member of the right-wing group under federal terror laws for the first time in August for allegedly collecting or making documents to prepare for terrorist acts.** Mr Lewis said Reclaim Australia has **"offered violence"** in the past and expects they will continue to when they confront pro-Islamic groups. **"To the extent that there is a possibility of violence, or there is indeed violence being offered, that is of interest to us. That is business for ASIO,"** he told a Senate committee late on Tuesday night. But Reclaim Australia said it does not condone violence. **"Reclaim has never condoned violence and we never will. Reclaim has worked closely with police at past events to ensure public safety,"** a statement provided to the *Australian Associated Press* said.
21- Up to **70 children of Australians** have been **exposed to extremist groups in the battlefields of Syria or Iraq,** the country's security chief has revealed. **Duncan Lewis,** director-general of the **Australian Security Intelligence Organisation,** said these children either travelled to the

conflict zones with their Australian parents or were born there. He told a **Senate committee** late on Tuesday night that **ASIO is investigating around 190 people in Australia who are actively supporting groups like IS through recruiting, fundraising or wanting to join themselves,** reports the *Australian Associated Press.*
22- According to *The Australian*, the highest-ranking terrorist Australia has produced is now a -jihadi without a group, "**resigning**" to "**pursue a number of projects independently**". In a corporate-sounding statement released on his official **Twitter** and **Facebook** accounts, it is claimed former Sydney man **Mostafa Mahamed**, better known as **Abu Sulayman**, resigned from the al-Qa'ida-backed Syrian group **Jabhat Fateh al-Sham** this month. The "resignation" follows his group claiming to have severed ties to al-Qa'ida in July, and being heavily targeted by Russian and Syrian bombardments in the ravaged city of Aleppo.

Asia / Asie

23- In the three months since a band of **youths tortured and killed 20 hostages in a Dhaka restaurant, Bangladeshi intelligence officials say they're rooting out radicals and restoring security to the streets**, reports *Agence France-Presse.* The report points out that the The government continued to deny any IS role even after an August raid killed three suspected militants, including a **Canadian man of Bangladeshi origin** identified on an Islamic State website as the extremist Sunni group's representative in Bangladesh.
24- North Korea on Wednesday threatened to destroy Seoul and the South Korean presidential office if there is **any sign of pre-emptive strikes** by the **United States** and the South against Pyongyang. *Rodong Sinmun*, the North's main newspaper, said that the **country will strengthen its nuclear capabilities in quantity and quality in response to what it called its enemies' scheme for aggression**. "We have warned that South Korea will be engulfed in a sea of fire and the U.S. military units in the Pacific region and the mainland will be in chaos if the U.S. wages nuclear strikes against us," the newspaper said. "Our warning is not an empty word." North Korea has further ratcheted up war rhetoric since speculation has spawned that the U.S. may consider pre-emptive strikes against the North over Pyongyang's nuclear and missile programs, the *Yonhap News Agency* reports.
25- The *Times of India* reports that **Pakistan-based terror group Laskar-e-Taiba** has issued a warning to the Baramulla SHO for facilitating an operation on Monday in which at lease 44 have been arrested for **terror-related activities**.

Americas / Amériques

26- In the spirit of **neutrality** in the **U.S. presidential election, Ecuador** has **confirmed** it has **"temporarily" restricted access** to the **internet** within its **London Embassy, cutting off Julian Assange.** WikiLeaks has released emails and other material connected to the Clinton campaign. Ecuador's action, experts inside and outside the United States government said, is **not likely to slow the flow of leaked emails.** Those emails are routed through servers around the globe. (Extensive coverage / vaste couverture).

CSIS in the News/Le SCRS dans les nouvelles

Light coverage / couverture légère.

Canada

1- Le **rôle des grandes villes** ne se limite plus à entretenir les rues et à ramasser les ordures, mais aussi à **jouer un rôle diplomatique sur la scène internationale**, selon le maire **Denis Coderre**, souligne *La Prese+*. Critiqué à la suite d'un **récent voyage à Téhéran**, en Iran, le premier magistrat de Montréal s'est défendu en disant profiter de ses déplacements pour « passer des messages », sans préciser les messages qu'il avait passés ni à qui il l'avait fait. « Chaque fois que je me promène, que ce soit à Téhéran [en Iran], à Beyrouth [au Liban] ou à Jérusalem [en Israël] au mois de novembre, autant sur le plan du développement économique, du développement social que du développement durable, on passe des messages. Si on veut faire partie de ceux qui vont faire partie de la solution, on n'a pas à jouer la chaise vide non plus », a-t-il dit hier matin.

International

United States / États-Unis

2- *New York Times* reports that **National Security Agency contractor Hal Martin** had **in his possession top-secret NSA hacking tools** that two months ago were **offered for sale** on the **internet** but so far investigators have been **frustrated** in their attempt to **prove that Martin deliberately leaked** or **sold the hacking tools** or, alternatively, that someone hacked into his computer or otherwise took them without his knowledge. While they have found some forensic clues that he **might be the source,** the **evidence is not conclusive**. In interviews with the *Times,* officials described how the **Martin case** has **deeply shaken** the **secret world of intelligence**. They expressed **astonishment** that he managed to **take home** such a vast collection of classified material over **at least 16 years**, undetected by security officers at his workplaces, including the NSA, the Office of the Director of National Intelligence and Pentagon offices and they are **deeply concerned** that some of the mountain of material may, by whatever route, **have reached hackers** or **hostile intelligence services.**

3- Amid accusations that it scanned customer emails at the behest of the NSA or FBI, **Yahoo** has sent a **letter** to Director of National Intelligence **James Clapper demanding American intelligence reveal** how they **monitor online services.** (Extensive coverage / vaste couverture).

United Kingdom / Royaume-Uni

4- **Belgian jihadi 'Rashid'** told *The Independent's* Kim Sengupta that **Isis** is **"really afraid** of the **foreign spies who are among them"**, naming **British intelligence** as the **most successful infiltrator.**

5- The *Guardian* has learned the **Muslim Council of Britain** plans to establish **its own anti-radicalization program** in a direct challenge to the government's Prevent program.

6- **Paul Chichester,** the **director of operations** at **Britain's new National Cyber Security Center**, told an event in London that **hacking intrusions** were on their way to becoming **more**

"destructive, disruptive and **coercive"** reports the *Associated Press.* **"That will be our future,"** he said. Chichester was **seconded** by **Air Force Lt. Gen. James K. McLaughlin, deputy commander** at **U.S. Cyber Command,** who said **infrastructure-wrecking attacks** were being **seen "right now in the environment."**

Europe

7- **One police officer** was **killed** and **three wounded** Wednesday after a **man opened fire on them** during the serving of a warrant in the **Bavarian community of Georgensgmünd** reports *Deutsche Welle.* Authorities said the **49-year-old suspect,** who was slightly wounded in the altercation, is a **member** of the **far right "Reichsbürger" movement**, which translates as **"Citizens of the Reich." Berlin's state intelligence service** described the movement in a recent report as "an **extremely diverse range of small groups and individuals** who believe in an ideological mixture of **conspiracy theories, anti-Semitic and anti-democratic views,** and who have been **behaving increasingly aggressively** for some time."

8- Selon *Midi Libre,* le **CAT vient de décrypter le financement des attentats de Paris**. En ce mois d'octobre 2016, le centre d'analyse du terrorisme (CAT) vient de dévoiler son nouveau rapport sur le financement des attentats de Paris. Celui-ci **décrypte avec minutie la façon dont les terroristes se sont procuré des moyens financiers, pointe les failles dans le système qui leur ont permis de passer inaperçus et fait des propositions pour tenter d'améliorer les choses**. Cartes prépayées, commerce illicite, anonymat, fraude documentaire et manquements dans le partage d'informations sont notamment ciblés dans les problèmes à régler. Le tout est consultable sur le site internet du centre, où sont rendus publics tous les travaux.

9- **Investigators across Europe**, reports the *Wall Street Journal,* are **alarmed** by the **rise of militants** who they suspect have developed a way to **utilize chat apps** and other **social media tools** to **"remote control" attacks from far away**. That is blurring the lines between assaults carried out by militants trained in Islamic State territory and those by so-called lone wolves who authorities assumed were acting without the direction or support of terror groups. "What worries us is a new type of attacker who only appears to be acting alone," said **Hans-Georg Maassen, head of Germany's BfV**. "Such assailants are being steered virtually from abroad via instant messaging."

10- Selon *Le Soir,* (Belgique), un **nouveau dispositif de sécurité combinant technologie et contrôle humain sera bientôt mis en place à l'aéroport de Zaventem en Belgique**. Dernière trace des attentats du 22 mars (hormis la stèle commémorative qui a pris place à l'intérieur du bâtiment), les tentes plantées devant le hall des départs et destinées au pre-screening des passagers de l'aéroport de Zaventem vont prochainement disparaître.

Africa / Afrique

11- Selon *African Manager,* (Tunisie), **une cellule terroriste composée de quatre éléments a été démantelée** à la cité Khaled Ibn Al Walid, à Douara Hicher, gouvernorat de la Manouba, a annoncé, mercredi, le ministère de l'Intérieur de la Tunisie.

Middle East / Moyen-Orient

12- *The National (UAE)* reports that desperate to slow the advance of **Iraqi troops towards Mosul**, ISIL on Wednesday deployed **suicide bombers** and fired mortar shells a day after the Pentagon warned that trapped civilians were being used as human shields.

13- The *Jerusalem Post* reports that security forces have arrested an **Arab-Israeli couple** accused of joining the terrorist group Islamic State in Iraq, the **Shin Bet (Israel Security Agency)** announced Thursday.

14- *Naharnet Newsdesk* reports that **Russian warships** off the coast of Norway are carrying fighter-bombers that are likely to reinforce a final assault on the besieged Syrian city of Aleppo in two weeks, a senior NATO diplomat said Wednesday, citing **Western intelligence**.

Afghanistan/Pakistan

15- *Pajhwok Afghan News* reports that **two Americans were killed and another three were wounded** when a gunman in Afghan military uniform opened fire at a base in Kabul, the NATO-led coalition said on Wednesday.

Australia, New Zealand / Australie, Nouvelle-Zélande

16- The task of being an intelligence chief has become tougher with the rise of cyber threats and terrorism, according to the former head of the **Australian Security Intelligence Organisation, David Irvine**, who says he would like to see a **"much stronger" national cyber industry**. The *Sydney Morning Herald* reports that speaking during a rare interview in Canberra, Mr Irvine said "when you put cyber on top of [terrorism], it takes a bit of time off your sleep at night. The two issues have grown exponentially within a couple of decades and while the nature of the threats is the same, the vector has changed. **And cyber is a new and very potent vector."** Mr Irvine, who led Australia's overseas spy agency ASIS before he headed up ASIO, said he'd been "horrified" at the revelations of **Edward Snowden**, the subcontractor to the **National Security Agency** who exposed vast top- secret US government programs for monitoring global communications.
17- An **Australian living in Yemen was kidnapped** at the weekend, raising concerns he may have fallen into the hands of **Islamist militants**. The unnamed man was kidnapped near the capital, Sanaa, in an area believed to be under the control of **Houthi rebels**, a Shia insurgency that has taken control of tracts of the country. It is not clear who is holding the man, or why he was taken. Sources contacted by *The Australian* said while there was concern the man may have fallen into the hands of a terrorist group, it was just as likely his kidnapping was part of a criminal enterprise.

Asia / Asie

18- The *Times of India* reports that **Islamic State "operative" Subahani Haja Moideen's** account that he was allowed to leave IS-held territory due to a knee injury that ruled him out of active fighting is likely to be closely scrutinised by the National Investigation Agency that is looking at the possibility of his being tasked with setting up a **"sleeper cell"**.
19- According to the *Yonhap News Agendy*, South Korea's foreign ministry issued a **strong condemnation of North Korea's latest missile launch** on Thursday, which it said would only worsen the communist regime's isolation from the international community. The U.S. Strategic Command said N**orth Korea fired off what is presumed to be a mid-range Musudan missile from the northwestern city of Kusong**. The latest missile test-launch came less than a week after the regime unsuccessfully tested another Musudan missile on Oct. 15. The **Thursday launch came in defiance of warnings issued by the UNSC's press statement that was adopted right after the previous test-firing**, the foreign ministry said. It added, **"the latest provocation highlights North Korea's manic obsession with nuclear and missile development."**
20- The *South China Morning Post* is reporting that, a Hague ruling on the **South China Sea** was just a "piece of paper" and the case would "take the back seat" in talks with President **Xi Jinping** today, Philippine President **Rodrigo Duterte** said in Beijing yesterday. Officials said the two sides were expected to sign nearly 20 memoranda of understanding - mostly on economic cooperation - and shore up other **joint efforts against drugs and terrorism**. Duterte arrived in Beijing on Tuesday with a huge business delegation to pave the way for what he calls a new commercial alliance, amid deteriorating ties with long-time ally the United States.

Americas / Amériques

21- *NBC News* reports that **'quiet pressure; from** the **U.S. government** played a role in **Ecuador's decision** to **block** WikiLeaks founder **Julian Assange** from **using the internet** at Ecuador's London embassy. "It was a bit of an eviction notice," said a senior American intelligence official.
22- Stung by accusations that it **installed "back doors"** for the **American government** to **access customers' communications, Microsoft,** reports *Reuters,* has **opened a center in Brazil** where officials will be able to **inspect its programming code** in an attempt to **allay suspicions** in the region that its **software programs** are **vulnerable to spying.**

Light coverage / couverture légère.

Canada

1-Foreseeing a possible "**flood of foreign fighters**" from **Syria**, the **RCMP** has circulated a strategy that **involves trying to understand the returning fighters' intentions and working with communities**, the *National Post* reports. The plan calls for monitoring the **social media activity of the returnees**, placing **them on the no-fly list** and asking **Passport Canada to revoke their travel documents and flag their future passport applications**. The RCMP has also compiled a list of indicators to ascertain the "future posture" of returning fighters that includes whether they are employed, married, "raising funds linked to a little-known charity" or "proselytizing." As an example of the dangers posed by returnees, an unreleased draft of **Public Safety Canada's 2016 annual threat report cited Hiva Alizadeh**, a **Canadian who attended a training camp in Afghanistan.**

2-La **Gendarmerie royale du Canada (GRC) a lancé un guide de prévention du terrorisme et de la radicalisation** menant à la violence, destiné aux parents, aux enseignants et aux proches des personnes à risque. Le guide, intitulé **«Guide de sensibilisation au terrorisme et à l'extrémisme violent»,** vise à les aider à mieux comprendre et à reconnaître le phénomène de la **radicalisation**. «Il n'existe aucun profil type du terroriste», prévient-on d'emblée. Mais pour identifier les personnes à risque, il énonce, entre autres choses, les signes avant-coureurs de radicalisation et ceux de la planification d'un attentat. Il discute également du rôle de l'internet et de la propagande rapporte *La Presse canadienne.*

3-D'après *La Presse+,* l'intensification des **combats contre le groupe armé État islamique dans la région de Mossoul, en Irak, pourrait avoir un impact au Canada** en mobilisant certains partisans du groupe, prévient la **Gendarmerie royale du Canada (GRC).** Celle-ci demande aux citoyens de demeurer «vigilants», tout en se gardant d'« être paranoïaques». «La ville va être libérée, des gens fuient, et ils vont aller quelque part. Sans être paranoïaques, on doit être conscients de cette menace», souligne la surintendante **Martine Fontaine,** responsable de la prévention au Québec pour le corps policier fédéral.

International

United States / États-Unis

4-According to a forthcoming report, now in draft form, to be issued by the **U.S.-China Economic and Security Review Commission** and viewed by the *Washington Free Beacon,* **Chinese spies** have **repeatedly infiltrated U.S. national security agencies,** including official email accounts, and **stole U.S. secrets on Pentagon war plans** for a future conflict with China. "The **United States** faces a **large and growing threat** to its **national security** from **Chinese intelligence collection operations,"** the draft report reads.

5-Speaking to the British edition of the *International Business Times,* **former NSA deputy-director John Inglis** said despite the controversy surrounding the Agency since the Snowden leaks, he's confident the **"NSA is in the right place** and I think **history will judge that it was in**

the right place" but conceding that "it will also judge that it **wasn't transparent enough** about what it was doing."

United Kingdom / Royaume-Uni

6-The **Home Office**, reports the *Guardian,* has disclosed that **six extremists** or **terror suspects** are now subject to **terror prevention and investigation measures** (Tpims) which include being **relocated** from their home towns or cities. **Five** of the six are **British.**
7-Testifying before the House of Lords EU Committee, senior **Metropolitan Police Assistant Deputy-Commissioner Helen Ball** said **access to information** in **Europe-wide security databases**, including the **European Arrest Warrant,** is **"mission critical"** in **fighting terrorism** reports *The Independent.*

Africa / Afrique

8-In an effort to **close an intelligence 'blind spot'** in **northern Africa**, the **United States**, reports the *Washington Post,* has secretly **expanded its global network of drone bases** in the region, deploying unmanned aircraft and U.S. military personnel to a facility in **Tunisia** to conduct **spy missions** in neighboring **Libya.**
9-A group **loyal** to **Islamic State** has **seized** the **small port town** of **Qandala** in **Somalia's** semi-autonomous **Puntland region,** the **first town** it has **taken** since emerging a year ago. *Reuters* reports the group is **led** by **Abdiqadir Mumin**, a **former al Shabaab commander.**
10-**Two American brothers** from **Michigan**, 32-year-old **Nathan Wells Lawwliss** and **Patrick Alan Lawwliss**, 31, have been **arrested in Tunisia** on suspicion of **involvement** with a **terrorist organization** reports the *Daily Beast* and the *New York Times.* Nathan has claimed on Facebook to be the Islamic Messiah and his site also features an Isis flag.
11-Selon *La Nouvelle Tribune,* (Maroc), sur la **liste noire de l'ONU des jihadistes les plus dangereux, le Français Kevin Guiavarch, soupçonné d'être un recruteur très actif du groupe EI, a quitté la Syrie pour rejoindre la Turquie où il est incarcéré.** Deux de ses quatre femmes, parties avec lui, **viennent d'être transférées en France et mises en examen. Kevin Guiavarch, 23 ans, avait rejoint la Syrie fin 2012, d'abord dans les rangs du Front Al-Nosra, la branche syrienne d'Al-Qaïda, avant d'intégrer l'organisation Etat Islamique (EI).**Outre ses activités de recruteur, il est aussi soupçonné d'avoir été directement impliqué aussi dans le **financement de l'organisation**. Le jeune homme, qui dit être « repenti », avait écrit aux autorités françaises disant qu'il voulait rentrer en France, puis avait traversé en juin la frontière turco-syrienne avec ses quatre compagnes françaises et leurs six enfants avant d'être interpellé en Turquie où il est écroué dans l'attente d'un procès.

Middle East / Moyen-Orient

12-*Press TV* reports that **Iran's elite Revolutionary Guards** said on Wednesday they had developed a **"suicide drone"** capable of delivering explosives to blow up targets at sea and on land.
13-*Now Lebanon* reports that a recently-formed group with ties to **ruling Kurdish authorities in northern Syria** has touted that it will soon launch attacks against Turkish forces backing **Free Syrian Army factions**.

Afghanistan/Pakistan

14-The *Pakistan Dawn* reports that Pakistan on Wednesday conveyed to the United States that **India's Research and Analysis Wing (RAW) and Afghanistan's National Directorate of Security (NDS)** are patronising terrorists groups to attack soft targets in the country.

15-*Pajhwok Afghan News* reports that **US forces** carried out precision strikes in eastern Kunar Province this week, targeting **Faruq al-Qatani and Bilal al-Utabi, Al-Qaeda's most senior leaders in Afghanistan**, the Pentagon said.

Europe

16-The **German** media reports that **four Ku Klux Klan cells** are **currently active** in the country.
17-Selon *Le Soir,* (Belgique), la **Belgique a sous-estimé l'intérêt de la lutte contre le financement du terrorisme. Au-delà des sommes en jeu, ces données financières auraient pu faire avancer bien des enquêtes.** Près d'un an après les attentats de Paris, l'Institut Egmont publie une évaluation des mesures préventives et répressives prises en matière de lutte contre le terrorisme depuis les attentats de Charlie Hebdo par sept experts issus du monde académique. Un **rapport assez sévère pour le gouvernement Michel** et dont Le Soir a pu prendre connaissance. L'un des volets du **rapport pointe l'inertie dont a fait preuve la Belgique en matière de lutte contre le financement du terrorisme** alors que « la quête de l'argent est vitale pour les terroristes », souligne **France Lemeunier**, coauteure du rapport.

Australia, New Zealand / Australie, Nouvelle-Zélande

18-**Australia's Reserve Bank** is fighting a **war against cyber security threats**, with potential hackers **testing the resilience of its systems every two seconds**, according to the central bank's technology chief. **Sarv Girn**, chief information officer at the RBA, told delegates at the Gartner Symposium on the Gold Coast that the central bank was withstanding a barrage of potential attacks, the *Australian* reveals.
19-The *Australian* writes that one of Southeast Asia's most notorious militants and a mastermind of the 2002 Bali bombing, **Hambali**, will remain behind bars in **Guantanamo Bay** after US - officials rejected his appeal for release, ruling he still posed a "**significant threat to the security of the United States**". Both **Indonesia** and **Malaysia** opposed Hambali's release. Malaysia warned he could still have strong influence over the remnants of **Jemaah Islamiah** — the terror group behind the Bali attack, which killed 202 people including **88 Australians** — and could even spur a resurgence of JI militancy in Malaysia.

Asia / Asie

20-The *BDNews24* reports that **Bangladesh has urged Canada to devise an 'effective mechanism'** to move forward with the deportation of Nur Chowdhury, the killer of its independence architect.
21-The *Times of India* reports that a **Pakistan High Commission official** has been asked to leave the country, as he was involved in **spying**, Delhi police said.
22-South Korea plans to **reopen talks on an intelligence-sharing pact with Japan** in more than four years, Seoul's Defense Ministry said Thursday, seeking to **boost security cooperation** amid a thaw following their settlement over the sex slavery issue. The envisioned General Security of Military Information Agreement will be the first ever bilateral military accord between the two countries, designed to fac**ilitate the exchange of intelligence and data on North Korea**, as well as search and rescue missions, reports *the Korea Herald.*
23-The government is stepping up efforts to recover billions of yuan in assets **illegally transferred overseas** by corrupt officials via **money laundering platforms** and underground banks. Statistics provided by the **Central Commission for Discipline Inspection**, the nation's top anti-graft watchdog, show that from 2014 to July, the police confiscated illicit assets sent overseas worth 7.62 billion yuan ($1.14 billion). Last month, during Premier **Li Keqiang's** official visit to **Canada**, the two countries signed a bilateral agreement to share illegally transferred assets, a move that is being seen as a milestone in China's program to recover misappropriated funds and assets. Similar agreements are now under negotiation with the United States, Australia and France, reports the *China Daily.*

Americas / Amériques

24-**Hundreds of thousands** of **Venezuelans** dressed in white and chanting **"This government will fall!"** poured onto the **streets of Caracas and other cities** on Wednesday to **demand** a **referendum** to **oust President Nicolás Maduro** reports the *New York Times*. The protests were sparked by a **ruling** by **Venezuela's Electoral Council** to **suspend the process** for **organizing a recall referendum.** "This is a **dangerous new phase,**" said **David Smilde,** a scholar of Venezuela at Tulane University and a senior fellow at the Washington Office on Latin America.

World News Overview
Aperçu des nouvelles mondiales

(A Communications Branch product/un produit de la Direction des communications)

Thursday, November 3 2016
le jeudi 3 novembre 2016
07:00 / 7h00

CSIS in the News/Le SCRS dans les nouvelles

1- D'après *La Presse+,* alors que la SQ et la Ville de Montréal ont confirmé avoir mis des journalistes sous surveillance, la **GRC et le Service canadien du renseignement de sécurité (SCRS), les deux corps policiers fédéraux, ne veulent pas confirmer s'ils ont déjà adopté de telles pratiques, et le cas échéant à quelle fréquence. La GRC précise seulement que «les cas où des enquêtes de la GRC concernant des journalistes ont eu lieu sont extrêmement rares». Le commissaire de la GRC Bob Paulson a dit mercredi «ne pas être au courant que nous avons des enquêtes actives ou de la surveillance à l'égard de journalistes»**, mais la GRC n'a pas voulu confirmer si des journalistes ont été surveillés dans le cadre de ses enquêtes. Un cas de filature avait été rendu public il y a un an, celui du journaliste de La Presse **Joël-Denis Bellavance** qui a été pris en filature en 2007.
2- *Le Devoir* rapporte que le **ministre de la Sécurité publique ordonne une enquête administrative En lieu et place de l'" affaire Lagacé "**, il faudra désormais traiter du scandale de la surveillance des journalistes : la Sûreté du Québec a confirmé mercredi qu'elle avait, tout comme la police de Montréal, traqué des reporters au cours des dernières années dans le cadre d'une enquête, suscitant une nouvelle vague d'inquiétudes et de dénonciations dans l'univers des médias. **Fait inquiétant, ni la Gendarmerie royale du Canada ni le Service canadien du renseignement de sécurité (SCRS) n'ont voulu préciser si des journalistes avaient déjà été, ou se trouvent actuellement sous écoute électronique.**

Canada

3- *La Presse+* rapporte que le lanceur d'alerte américain prenait part à une vidéoconférence organisée par l'Université McGill, hier Les **Canadiens sont très mal protégés contre les pratiques de surveillance abusives, estime Edward Snowden, qui s'alarme des possibilités ouvertes aux services de renseignements d'ici et d'ailleurs par les nouvelles technologies de communication.** L'ex-sous-traitant de la National Security Agency (NSA), qui participait hier à une vidéoconférence organisée par l'Université McGill, a souligné que le **système de régulation des services de renseignement canadiens était probablement le plus « déficient en Occident** ». Il a déploré à ce titre que le gouvernement libéral de **Justin Trudeau tarde à réviser la Loi antiterroriste, dite loi C-51,** qui confère des pouvoirs accrus à ces mêmes services.

International

United States / États-Unis

4- **Current** and **former U.S. intelligence officials** are **predicting** a **months-long campaign** backed by the **Russian government** to **undermine** the **credibility** of the **presidential election** - through hacking, cyber attacks and disinformation campaigns - is **likely** to **peak** on **Tuesday,** when Americans head to the polls reports *Reuters.* **CIA director John Brennan declined** to **comment** on the Russian efforts but he said **Russian intelligence operatives** have a **long history** of **marrying traditional espionage** with **advances in technology**. More broadly, Brennan said the digital age creates enormous opportunities for espionage but it also creates vulnerabilities. **Former CIA director Leon Panetta** said **"don't underestimate what they can do or will do.**

We have to be prepared. In some ways, they are succeeding at disrupting our process. Until they pay a price, they will keep doing it."

United Kingdom / Royaume-Uni

5- The **British government will appeal** a decision by the **High Court** this morning that it **must have parliament's approval before starting** the **process** to **leave** the **European Union** reports the *BBC*. Prime Minister Theresa May had stated she intended to activate Article 50, formally notifying the EU of the UK's intention to leave, by the end of next March.

Europe

6- Selon *L'Obs,* l'enquête sur **l'ex-patron du renseignement révèle que Bernard Squarcini n'a jamais coupé les ponts avec son ancienne maison, tout en travaillant pour LVMH Juste avant d'être présenté aux juges,** Bernard Squarcini a tenté de s'expliquer. « Je suis parti contraint et forcé, a déclaré **l'ex-patron de la DCRI (le renseignement intérieur, devenu la DGSI en 2014). J'ai changé d'activité, mais j'ai gardé un état d'esprit identique** à celui qui m'accompagnait en ma qualité de haut fonctionnaire. » Une défense bien maladroite. Mis en examen fin septembre notamment pour « compromission » et « trafic d'influence », le « Squale » est justement soupçonné d'avoir continué, après son départ, en février 2013, à **se comporter comme un chef du renseignement au mépris de la loi**.

7- **Quatre mosquées de région parisienne ont été fermées par les autorités**. Dans un communiqué, le ministère de l'Intérieur précise que leur fermeture a été décidée sur "le fondement des dispositions de l'article 8 de la loi sur l'état d'urgence permettant la fermeture des lieux de culte au sein desquels sont tenus des **propos constituant une provocation à la haine ou à la violence ou une provocation à la commission d'actes de terrorisme ou faisant l'apologie de tels actes"**. Parmi ces établissements, figurent la mosquée Al-Islah de Villiers-sur-Marne, dans le Val-de-Marne. Fin août, une perquisition avait permis de découvrir qu'elle abritait une école coranique clandestine indique *Atlantico.*

8- Police in **Berlin** have arrested a **27-year-old** as yet unidentified **Syrian refugee** on suspicion of being a **member of Isis** and plotting an **attack** on **one** of the **city's airports** reports *Deutsche Welle.* The man, who has been living in Germany since 2015, was apprehended at his apartment. Authorities have until the end of today to bring the suspect before a judge for a decision on whether they can continue holding him.

9- In an **audio recording** released this morning, **Isis leader Abu Bakr al-Baghdadi** has commanded his followers to **attack Turkey** reports *Daily Sabah.*

10- Interviewed by broadcaster *RT,* **Julian Assange flatly denied** the **Russian government** is **WikiLeak's source** for the trove of **Clinton campaign emails.**

Africa / Afrique

11- D'après *Jeune Afrique,* le **Niger, cible de trois attaques terroristes en dix jours au mois d'octobre** se trouve sous les feux de la rampe et des **jihadistes venus du Nord-Mali**. La sitution au Nord-Mali s'est dégradée. Le Niger a demandé à ce que le **mandat de la Minusma soit plus offensif et permette de faire la guerre.**

Middle East / Moyen-Orient

12- *Agence France Presse* reports that Tehran's notorious former chief prosecutor **Saeed Mortazavi**, whose role in curbing dissent has been condemned by human rights groups for years, has been sentenced to 135 lashes on charges related to a corruption trial. The **Canadian government** accused Mortazavi of direct involvement in the death of **Zahra Kazemi, an Iranian-Canadian photo journalist**.

13- The *Jerusalem Post* reports that **Canadian Governor-General David Johnston**, who arrived in Israel on Tuesday with his wife, Sharon, told President Reuven Rivlin on Wednesday that he

would like to "reaffirm Canada's commitment to work with Israelis, Palestinians and other partners to **uphold the prospects of a two-state solution** and achieve a just and lasting peace."
14- *The National (UAE)* reports that **Iraq's elite counterterrorism troops** became the first Iraqi soldiers to set foot in the northern city since the army ignominiously abandoned Mosul to ISIL in June 2014.

Afghanistan/Pakistan

15- Two Indian diplomats in Islamabad have been caught spying for India's premier spy agency, **Research and Analysis Wing (RAW)**, and may be expelled, sources told *The Express Tribune* on Wednesday.

Australia, New Zealand / Australie, Nouvelle-Zélande

16- According to *ABC News*, Counter-terrorism police allege one **of two people arrested in Sydney raids this morning had links to a member of foreign fighter network**. A Sydney man accused of travelling to Syria to fight alongside Al-Qaeda affiliate **Jabhat al-Nusra** has alleged links to two other men who are also under the watch of counter terrorism police. State and federal police from the **Joint Counter Terrorism Team** have arrested **Mehmet Biber**, 24, and a **17-year old boy** on suspicion of **breaching foreign fighter laws**. Biber was arrested at Birrong this morning over allegations he travelled to Syria to fight alongside Jabhat al-Nusra in July 2013.
17- *Radio New Zealand News* is reporting that the **Inspector-General of Security and Intelligence** has **reviewed an urgent authorisation for warrantless surveillance** and has found **no "material concerns"**. The **SIS** used the **first ever authorisation to respond to a suspected terrorist act in the second half of last year, to carry out surveillance without a warrant for up to 24 hours**. In her annual report, the Inspector General, **Cheryl Gwyn**, says there **were no major problems with the authorisation**. She also says the **Government Communications Security Bureau** has 'self-reported' four completed investigations and seven other possible incidents of non-compliance. Ms Gwyn says none require immediate, urgent action, but all will be followed up.
18- Cabinet ministers have **been told to improve the cyber security of their departments** after it was found **inadequate safeguards risked government agencies** becoming the **"honey pots"** of **secret information** in **cyber espionage**. **Dan Tehan**, the minister assisting Prime Minister **Malcolm Turnbull** on cyber security, will tell his senior colleagues they need to appoint top bureaucrats to be responsible for cyber security after a study by the **Australian National University's National Security College** found **smaller government agencies** and **medium-sized business were the weakest link, or "honey pots"**, in Australia's cybersecurity defences because they are not vigilant enough about "low-level" threats like malware and denial of service attacks. This is despite a $230 million cyber security strategy introduced by Mr Turnbull in April. "This report clearly shows that, when it comes to government agencies, we've still got more work to do," Mr Tehan told *The Australian Financial Review*.

Asia / Asie

19- The *Times of India* reports that **Pakistan** on Wednesday pulled out six employees posted at its high commission in New Delhi, days after India declared one Pakistani official **persona non-grata for espionage activities**.
20- China's **draft cybersecurity law**, which stipulates that **foreign technology firms should store important business data and personal data related to their operation within China**, is aimed at effectively safeguarding State security as well as protecting people's privacy, an expert said. The comment came after *Reuters* reported that short-term rental company **Airbnb** told Chinese users that it will store their **personal data locally "as foreign tech companies operating in China respond to increasing regulatory pressure."** A spokesperson with the Airbnb China confirmed with the *Global Times* on Wednesday on condition of anonymity that its

parent company is moving Chinese mainland-based users' information including the guest bookings in China and Airbnb listings to local servers for greater localization.
21- According to the *China Daily*, China and Kyrgyzstan vowed on Wednesday to **fight terrorism, separatism and extremism through strengthened security cooperation** as Premier **Li Keqiang** paid his first visit to the Central Asian neighbor. In the capital, Bishkek, Li and Kyrgyz Prime Minister **Sooronbay Jeenbekov** signed a joint communique on bilateral cooperation in fields such as security, agriculture and production. The agreement is especially timely since the Chinese embassy in Kyrgyzstan was attacked by a suicide car bomber on the morning of Aug 30. The attack injured three embassy personnel.
22- *Indo-Asian News Service* reports that Kolkata born former Scotiabank's Vice Chairman **Sarabjit Singh Marwah** has become the first Sikh to be appointed to the **Canadian Senate**.

Tuesday, November 22 2016
le mardi 22 novembre 2016
07:00 / 7h00

CSIS in the News/Le SCRS dans les nouvelles

1- La **menace de cyberattaques est de plus en plus présente et les Forces canadiennes veulent mieux y répondre**. *Radio-Canada* a appris qu'à partir de l'année prochaine, un **nouveau corps de métier totalement consacré à la cyberdéfense sera créé au sein de l'armée.** Le risque de cyberattaques a de nouveau été exposé au grand jour la semaine dernière. Même si l'origine du problème demeure inconnue, le site de recrutement des Forces canadiennes a été ciblé jeudi. **L'ancien directeur du Service canadien du renseignement de sécurité (SCRS) Richard Fadden y est favorable, mais croit qu'il faut avoir une discussion nationale sur le sujet** puisque, selon lui, mener des cyberattaques vient avec son lot de risques. Au Canada, il n'y a pas que la **Défense nationale qui est responsable d'assurer la cybersécurité. Le ministère de la Sécurité publique et des agences comme le Centre de la sécurité des télécommunications** ont aussi un rôle important à jouer.

2- Most of the government employees who have seen their **security clearances revoked** for bad behaviour since January 1 work at the **Canada Revenue Agency** and **agencies under the purview of Public Safety Canada** — including the **RCMP**, **Correctional Services Canada** and **CSIS**, *Ipolitics* reports. An order paper question filed by Conservative MP **Jim Eglinski** on October 3 asked the government to **provide a breakdown by department of all employees who have had their security clearances cancelled or revoked,** excluding retiring employees or employees whose terms of employment had ended. It also asked how many of those employees with revoked clearances were terminated as a result and what the reasons for the revocations were. Liberal MP **Kevin Lamoureux**, parliamentary secretary to the Leader of the Government in the House of Commons, submitted the response on November 18. It shows that **48 government employees had their security clearances revoked for bad behaviour,** not including those whose clearances were revoked or cancelled because of retirement or taking another job after receiving a clearance during the recruitment process. The **Canada Revenue Agency** saw the largest number of employees whose "reliability status" was either revoked (12 employees) or administratively cancelled (six employees). While **Public Safety Canada itself hasn't had to revoke or cancel the security clearances** of any department-specific employees, the same can't be said for several agencies that fall under its purview. **Two employees** at the **Canadian Security Intelligence Service (CSIS)** had their security clearances revoked and were terminated as a result. The documents tabled by the government don't give reasons for those revocations. "**For reasons of national security and to protect employee safety, CSIS does not disclose the reasons or rationales as to why security clearances were cancelled or revoked**," the documents say.

Canada

3- La **police de Montréal a lancé un avis de recherche concernant deux suspects après la découverte d'une cartouche de fusil pleine au consulat de France de la métropole québécoise, laissant craindre une menace potentielle à la sécurité**. «Le 18 octobre dernier, une munition d'arme à feu non utilisée a été retrouvée à l'intérieur du bâtiment du Consulat général de France», a indiqué le service de la police de Montréal (SPVM). Une cartouche de fusil de chasse

de calibre 12 aurait été laissée par deux suspects, a indiqué **Jean-Pierre Brabant, porte-parole au SPVM** indiquent *TVA Nouvelles avec l'Agence France-Presse.*

International

United States / États-Unis

4- Speaking to *McClatchy,* **former CIA director Leon Panetta** said **nominee Mike Pompeo** is a **"pretty good choice"** to lead the Agency. "I've had a chance to talk with him during hearings on the Hill," Panetta said. "He's someone who has **very good credentials** and **understands what intel is all about.** He knows what the Agency's responsibilities are. I believe he's interested in doing a good job." **New York congressman Pete King applauded** the selection of Pompeo because he believes the nominee will bring back **"realistic approaches"** like **waterboarding** which King supports.

5- **Four U.S. officials** who spoke to the *Daily Beast* said **fear is pervasive among Muslims** inside the halls of the Pentagon, the **CIA**, and the **Department of Homeland Security** in anticipation of a **Trump administration**. Already, the officials said, they are seeing colleagues who are **less willing to share their thoughts about national security.** They fear they will no longer be seen as an asset to confronting terrorism but rather suspect members of the government they serve.

6- **President-elect Trump** released a **video** on **YouTube** yesterday which dealt primarily with domestic issues reports the *New York Times.* **National security** was **not mentioned** other than Trump saying he would **ask his top military officials** for a **comprehensive plan** to **guard America's vital infrastructure** from **"cyber-attacks**, and all other form of attacks."

7- The **Defence Department,** reports the *Washington Post,* has become the **first U.S. government agency** to launch a policy **enabling researchers** to **report bugs** or **flaws** they discover in its **websites without fear of prosecution.**

United Kingdom / Royaume-Uni

8- **Prime Minister Theresa May** is to **approve plans** for an **elite armed police force** to protect Britain's most **sensitive infrastructure** from a Paris-style terrorist attack reports *The Times of London.*

9- **Donald Trump** has publicly suggested a "very flattered" **Nigel Farage** be **Britain's ambassador** to the **United States** tweeting Farage would "do a great job!" In a terse response, **Downing Street replied** there is **"no vacancy"**. (Extensive coverage / vaste couverture).

Europe

10- *Le Monde* rapporte que la **CNCTR vient de mettre au jour un pan entier des interceptions, celles par voie hertzienne,** qui lui étaient jusqu'ici interdites d'accès C'est une ligne de front invisible pour le grand public, où se parle une langue indigeste. C'est pourtant là que se défendent les **frontières de l'Etat de droit. Après avoir subi quelques revers, la Commission de contrôle des techniques de renseignement (CNCTR) repart à l'offensive,** profitant de la censure, le 21 octobre, par le Conseil constitutionnel, de l'article du code de sécurité intérieure consacré à la surveillance des communications circulant par la voie hertzienne. Dans sa délibération, datée du 10 novembre, adressée au premier ministre, dont Le Monde a eu connaissance, la **CNCTR part à l'assaut d'un champ de surveillance des communications par les services de renseignement français** qui lui était jusque-là interdit.

11- The **U.S. State Department**, citing **"credible information"** that **Isis** and **al Qaeda** are **planning attacks** in **Europe** has issued an **advisory** warning **American travelers** to be cautious about attending **Holiday festivals, events** and **outdoor markets** reports *Newsweek.*

12- According to *Süddeutsche Zeitung*, the **Federal Court of Justice** has ruled **Edward**

Snowden must be **brought** to **Berlin** to **personally answer questions** posed by a **parliamentary committee investigating National Security Agency activities in Germany**. *The Local* points out the **government** has long argued that it could **not guarantee Snowden's safety** if he were to travel to Germany due to the fact he is wanted on charges of espionage and theft of government property in the U.S.
13- Le **ministère de l'intérieur a annoncé l'arrestation à Strasbourg et Marseille de sept personnes, soupçonnées d'avoir planifié des attaques terroristes en France**. C'est un important projet d'attentat, possiblement fait d'attaques simultanées, qui a été «déjoué» suite à une vague d'interpellations à Strasbourg et à Marseille, dans la nuit du samedi 19novembre au dimanche 20novembre. Le ministre de l'intérieur, **Bernard Cazeneuve, l'a annoncé lui-même, lundi 21novembre. Une série d'arrestations qui s'ajoute à d'autres et à la vingtaine d'attentats «déjoués» depuis le début de l'année, selon la place Beauvau, et vient rappeler que des cellules très structurées sont toujours dormantes, en France.** Paris et Marseille étaient visées révèle *Le Monde.*

Africa / Afrique

14- Selon *All Africa,* en Libye, le ministère de l'Intérieur annonce l'arrestation **d'une des épouses de Mokhtar Belmokhtar.** L'une des femmes du chef **du groupe jihadiste al-Mourabitoune,** de nationalité tunisienne, circulé dans une voiture dans la région de Syrte. Son nom vient d'être révélé, par **la Direction générale du comité libyen pour la lutte contre le terrorisme.**

Middle East / Moyen-Orient

15- **Ginella Massa**, who on Friday became the **first Canadian woman** donning the Islamic veil covering the hair known as hijab, told *Al Arabiya* that she hopes this will change "misconceptions" about Muslim women.
16- *The National (UAE)* reports that **Syrian regime forces advanced quickly** in rebel-held areas of Aleppo on Monday, pressing a new offensive in defiance of international concern over the fate of the city and its residents.

Afghanistan/Pakistan

17- *Pajhwok Afghan News* reports that **Pugwash, a Canada-based organization**, is holding a conference in Islamabad tomorrow to discuss Pakistan-Afghanistan relations besides the Afghan government-initiated peace process.

Australia, New Zealand / Australie, Nouvelle-Zélande

18- Authorities will **soon be able to impose control orders on children as young as 14** after controversial **counter-terrorism laws cleared parliament**, reports the *Australian Associated Press*. A bill that included a suite of measures passed the lower house on Tuesday after changes were made in the Senate earlier this month. Aside from reducing from 16 the age a person can be subject to a control order**, the legislation creates a new search, telecommunications interception and surveillance regime for those under the orders.**

Asia / Asie

19- The *Philippine Star* reports that **Abu Sayyaf bandits** are reportedly demanding P500 million in ransom for a German hostage. Sub-commander Alhabsi Misaya disclosed their demand through text messages when they released photographs of Juergen Kantner.
20- The *Press Trust of India* reports that the **NIA** carried out searches at 17 premises of controversial Islamic preacher Zakir Naik, his NGO and a few associates for the third consecutive day on Monday, even as it **blocked the website** of outlawed Islamic Research Foundation founded by him.

21- The **governments of South Korea and Japan** on Tuesday **separately endorsed a pact that allows the sharing of military intelligence** in response to the growing threat posed by North Korea's nuclear and missile programs. South Korea's Defense Ministry said the pact, known as the **General Security of Military Information Agreement**, will be signed at 10 a.m. Wednesday in Seoul. The complete text of the agreement will also be disclosed. According to South Korean government officials, Defense Minister **Han Min Koo** and Japanese Ambassador **Yasumasa Nagamine** will ink the deal at the Defense Ministry. **It will go into effect immediately as it does not require parliamentary ratification**. President Park **Geun Hye**, who is at the **center of an influence-peddling scandal**, was absent from Tuesday's Cabinet meeting where the endorsement was announced, but she endorsed it later in the day, *Kyodo News* reports.

Americas / Amériques

22- Colombian President **Juan Manuel Santos** has announced he is **cancer free** but will take medication and undergo one session of radiotherapy to eliminate any vestiges of a previous bout with the disease reports *Reuters.* **Santos**, who won the Nobel Peace Prize last month for his efforts to end the war, is expected to **sign a new peace document** with **FARC leader Rodrigo Londono** but the **timing** has **not yet been announced.**

CSIS in the News/Le SCRS dans les nouvelles

Light coverage / couverture légère.

Canada

1-Le meilleur endroit pour **recruter de jeunes Québécois prêts à partir faire le djihad en Syrie, c'est au centre islamique Assahaba du prédicateur Adil Charkaoui, croit le suspect de terrorisme Ismaël Habib,** dont le procès s'est amorcé cette semaine à Montréal. C'est du moins ce qu'il a confié en février à un agent d'infiltration de la GRC jouant le rôle du patron d'un groupe criminel de passeurs illégaux rapporte *La Presse.*

2-During a three-hour conversation with an undercover officer only days before he was arrested, **Ismael Habib admitted he was willing to do anything necessary to get to Syria and fight for the Islamic State**, the *Montreal Gazette* reprts. Testifying at Habib's trial on Thursday, the **RCMP officer said Habib told him he believed it was his duty to do so, that he lived to die and knew of other young people in Montreal who were ready to leave with him**. Habib was on **Passport Canada's watchlist** and **suspected of terrorist** activities as early as March 2013. He had tried to have a new passport made after his was seized following a trip to Turkey that same year.

International

United States / États-Unis

3-Calling him "the closest thing we have to Gen. George Patton," Donald Trump has nominated 66-year-old retired general **James Mattis** as his **Defence Secretary**. Mattis led the United States Central Command, which oversees military operations in the Middle East and Southwest Asia, from 2010 to 2013. His tour there was cut short by the Obama administration which believed he was **too hawkish on Iran.** But, reports the *New York Times,* his insistence that **Iran is the greatest threat to peace** in the Middle East, as well as his **acerbic criticism** of the **Obama administration's initial efforts** to **combat** the **Islamic State** in **Iraq** and **Syria,** made him an **attractive choice** for the incoming president. However, in some areas his **views differ from Trump**. For instance, he told the President-elect that **torture does not work** and that he believes **Trump's conciliatory statements** toward **Russia** are **ill informed.**

United Kingdom / Royaume-Uni

4-**Britain's independent reviewer of terrorism legislation David Anderson** said in his annual report that the **threat of terrorism remains 'severe',** expressing disquiet about the **ability** of **ports officers** to **defend against terrorist infiltration** due to **poor manifest information** reports *The Times of London.*

Africa / Afrique

5-According to the London-based *The New Arab,* the **Egyptian** and **Syrian governments** have been **co-operating** to send **Egyptian extremists** captured in the war-torn country **back home** to **face prosecution.**

6-Selon *Kapitalis,* (Tunisie), la **garde nationale a arrêté à Kairouan, un terroriste recherché et condamné par contumace à 20 ans de prison**. La police a intercepté **Mohamed Ali B. (36 ans) à son retour de Libye où il était en fuite** depuis plusieurs mois. **Il était membre du groupe terroriste tunisien Ansar Charia, avant de se rendre, en 2013, en Libye, où il s'est entraîné dans des camps de l'organisation terroriste l'Etat islamique (Daech)**. En rentrant en Tunisie, en 2014, il a participé à des attaques terroristes contre les forces sécuritaires, avant de fuir de nouveau en Libye.

Middle East / Moyen-Orient

7-*The National (UAE)* reports that in a **lightning offensive, Syrian government forces** have driven the rebels from about 40 per cent of their territory in eastern Aleppo over the past week.
8-*Al Jazeera* reports that an **English-language news website in Qatar** has raised the issue of **"censorship"** after it was blocked by the country's two Internet service providers simultaneously for reasons unknown.

Afghanistan/Pakistan

9-The *Pakistan Dawn* reports that the **US State Department** on Thursday congratulated Gen Qamar Javed Bajwa on his recent appointment as Chief of Army Staff and said the army chief should be given time to implement **counterterrorism efforts**.
10-*Pajhwok Afghan News* reports that Deputy Chief Executive Officer (CEO) Mohammad Mohaqqiq on Thursday said **Daesh or Islamic State (IS)'s main objective** was to disunite people and take them war against each other.

Europe

11-A report issued by **Europol** this morning warned that the **Islamic State** is **likely** to **carry out an attack** on the EU **member nations** in the **near future** having **"both the will and capability"** to strike at **both hard** and **soft targets**, though **soft targets** are the **strategic choice** given their capacity to frighten the public.
12-In a dispatch from Berlin, the *Daily Beast* identified the 51-year-old **BfV employee arrested** earlier this week on suspicion of preparing a **serious act of violence against** the **state** and an **attempted breach** of **government secrecy,** as **'Roque M'** He told his interrogator that he infiltrated the intelligence agency because it was **"Allah's will."** Indeed, 'M' claimed that there was a **bigger plan for infiltrating the BfV**—one that would continue without him, reportedly warning **"You may have me now, but the plan will go on."** The *Daily Mail* has published pictures of 'M' which shows tattoos of Che Guevara on his torso.
13-*Tass* reports the **FSB** warned on its website this morning that **"foreign special services** are preparing to carry out **massive cyber attacks** starting from December 5 aimed at **destabilizing Russia's financial system"**.
14-**Russia's new foreign policy concept** advocates a **readiness** to **develop ties with Canada** including on the issue of the **Arctic** reports *Sputnik.*
15-Selon *Le Figaro,* **face à la désormais connue « menace terroriste d'une ampleur inédite » que Bernard Cazeneuve juge lui-même « particulièrement complexe à détecter et à prévenir »** , tenaillé par l'ombre portée d'un plausible 11-Septembre à la française que se disputerait un État islamique en perte de vitesse et Al Qaida en quête de légitimité sur la scène terroriste, le **ministère de l'Intérieur s'évertue tant bien à harponner puis vitrifier les islamistes radicaux.** Dans le collimateur? Les **ressortissants étrangers ou les déchus de la nationalité française installés dans le pays pour prêcher la haine, se faire les zélateurs du djihad armé sur les réseaux sociaux ou encore les sergents recruteurs de Daech.**
16-D'après *Sud Ouest avec l'Agence France-Presse,* **l'Office européen de police alerte sur la probabilité de l'utilisation d'explosifs dans des voitures piégées par des terroristes du groupe Etat islamique en Europe.** C'est un mode opératoire maintes fois éprouvé par les

terroristes en Irak ou en Syrie. D'après Europol, l'Office européen de police, les réseaux terroristes tels que le groupe Etat islamique pourraient avoir recours à des voitures piégées pour atteindre leurs cibles en Europe. **"L'utilisation d'engins artisanaux, d'explosifs militaires ou achetés dans le commerce dans des voitures piégées n'a pas encore été employée par le groupe EI en Europe"**, selon un rapport publié à La Haye.

Australia, New Zealand / Australie, Nouvelle-Zélande

Light coverage / couverture légère.

Asia / Asie

17-*Reuters* reports that before **Tamim Ahmed Chowdhury** orchestrated Bangladesh's worst militant attack, he sought and won approval for it from the militant Islamic State (IS) group. A **Canadian of Bangladeshi origin**, he was told by his contact in the militant group, Abu Terek Mohammad Tajuddin Kausar, to target foreigners, according to a senior police official who has seen communications between the two men.

18-*The Manila Times* reports that the **Philippine National Police (PNP)** has placed the entire country under **"terror alert level 3"** following the foiled bomb attack by the Maute Group near the US Embassy.

19-US intelligence whistle-blower **Edward Snowden** has condemned the treatment of **asylum seekers in Hong Kong**, describing it as **"criminal"**. Snowden was sheltered by three groups of asylum seekers when he was in the city for about two weeks in 2013, after he had fled the United States. In an interview with **Canadian news outlet** *Ricochet Media*, he described the poverty, **"discrimination and repression"** suffered by such people in Hong Kong. The former **National Security Agency** contractor criticised the fact that asylum seekers were not allowed to work in the city, saying they were left "hungry and destitute" as they waited for their claims to be processed. When the former CIA contractor was in the city, he applied as an asylum seeker with the UN refugee agency. **"He was given several options and he thought it was in his best interest to leave Hong Kong," Robert Tibbo**, Snowden's lawyer in Hong Kong, told the *South China Morning Post*.

20-South Korea **blacklisted several top aides of North Korean leader Kim Jong-un** on Friday as part of a fresh set of its **unilateral sanctions** aimed at helping curb the defiant neighbor's nuclear and missile programs. According to the *Korea Herald*, the package is also designed to tighten Seoul's squeeze on Pyongyang's financial and maritime networks and reinforce export controls. The announcement followed two days after the **UN Security Council** approved a new resolution in response to Pyongyang's fifth nuclear test in September. **Japan also said Friday it had decided to toughen its own sanctions on the North Korea.**

Aperçu des nouvelles mondiales

(A Communications Branch product/un produit de la Direction des communications)

Wednesday, December 14 2016
le mercredi 14 décembre 2016
07:00 / 7h00

CSIS in the News/Le SCRS dans les nouvelles

1- Les **dirigeants du Service canadien du renseignement de sécurité (SRCS) font volte-face :** après s'être engagés devant un comité du Sénat le mois dernier **à préciser si des journalistes avaient fait l'objet d'une enquête de leur part dans le passé**, ils reviennent sur leur parole dans une réponse écrite qui a été envoyée au sénateur conservateur **Claude Carignan**. Dans leur réponse écrite, les dirigeants du SCRS justifient cette volte-face en affirmant qu'ils pourraient « compromettre l'intégrité des opérations » de l'organisation et « nuire à sa capacité d'exercer le mandat que le Parlement lui a confié » s'ils confirmaient que le SCRS avait déjà eu un journaliste dans sa ligne de mire dans le passé. « Ainsi, le SCRS est au regret de ne pas pouvoir confirmer si des journalistes ont fait l'objet d'une de ses enquêtes, et ce, même si son représentant s'était engagé à donner une réponse spécifique », affirme le SCRS dans sa réponse écrite, obtenue par *La Presse+*. Le journaliste **Joël-Denis Bellavance** rappelle que Durant son témoignage devant le Comité sénatorial permanent de la sécurité nationale et de la défense, le 28 novembre, le directeur adjoint aux opérations du SCRS, **Brian Rumig**, s'était pourtant engagé à préciser aux membres du comité le nombre de journalistes qui auraient été la cible de surveillance directe ou indirecte.

2- Canada's spy agency has backtracked on its promise to reveal to a Senate committee how many Canadian journalists it spied on in the past, citing operational security, reports the *Toronto Star*. The **Canadian Security Intelligence Service** said while it **"appreciates the importance of the question"** to Canadians and the Senate committee on national security and defence, **"we regret that we cannot confirm whether journalists have been the subject of any CSIS investigation."** Conservative Sen. **Claude Carignan** called it a **"bizarre response"** and a **"serious" breach of an undertaking to a parliamentary committee**. He suggested it **implies that surveillance of journalists is either still ongoing or has been recently suspended**. **"How can it harm operations if you don't have any operations ongoing?"** he said in an interview. The statement to the committee said **CSIS recognizes it "has a duty to fulfil its mandate in a manner that upholds Canadian law and values.** However, **we also have a duty to identify and advise government of threats to our national security, and exercise our authorities set out in law to fulfil this mandate.** Any individual engaged in threat-related activities may be subject to this kind of lawful investigation, irrespective of their profession. While CSIS can discuss elements of its relevant policy framework, **we cannot provide information regarding whether anyone may or may not have been the subject of investigation. To do so would compromise the integrity of our operations and jeopardize our ability to fulfil the mandate given CSIS by Parliament."**

Canada

3- According to the *National Post*, an **attack on a mosque in Chakwal, Pakistan**, has led to **calls for an investigation in Canada** over allegations a **Toronto-area man was part of a group** that vowed "**extreme measures**" against the place of worship. A mob of about 1,000 surrounded the mosque belonging to minority **Ahmadiyya Muslims**, according to Pakistani newspapers *The Nation and Dawn*, as well as social media posts, some showing video of the damage. The incident Monday reportedly came after locals filed a petition with police claiming "**infidels" were illegally occupying the building** and unless action was taken "**we will be forced to take**

extreme measures to liberate this mosque." One of the names near the top of the petition was **Haji Malik Rashid Ahmed**, whom Ahmadiyyas say is a **Canadian**. A news website run by the Ahmadiyya community reported he had spoken about the issue at mosques in the Chakwal area. The **Ahmadiyya Muslim Jama'at Canada**, which represents Canadian Ahmadiyya Muslims, raised the issue at a meeting with **Global Affairs Canada**, said **Asif Khan**, the organization's director of public relations.

International

United States / États-Unis

4- **Donald Trump's cabinet picks** and his **campaign rhetoric** have **industry experts** worried that his administration will **increase surveillance** on Americans and **gut** the **regulatory bodies** that **oversee cyber-security** reports *CNBC*. Of **particular concern** said **Corynne McSherry**, legal director at the **Electronic Frontier Foundation**, is **CIA nominee Mike Pompeo** who has **advocated routine mass collection** and use of "social data" from third parties. "The president-elect, his advisors and future Cabinet members appear to see more enemies lurking in the homeland than in Russia or other cyber superpowers," said **David Cowan,** an investor in cyber-security start-ups with **Bessemer Venture Partners**. "I fear that for the **first time,** the **federal government** really does **pose** a **'Big Brother' threat in cyberspace."**

United Kingdom / Royaume-Uni

5- An accusation in the House of Commons by **Labour MP Ben Bradshaw** that **Russian hackers "probably" swayed** the **referendum** in **favor** of **Brexit** was **dismissed** out of hand by **Downing Street** reports *Sky News*.

Europe

6- Three major German media outlets *Süddeutsche Zeitung* and broadcasters *NDR* and *WDR* have reported that **religious groups** from **Saudi Arabia, Kuwait** and **Qatar** have been **increasingly supporting Salafists** in **Germany**, raising **concerns** within both the **BfV** and **BND**. Currently, German intelligence estimates there are **10,000 Salafists** in the country and believe that refugees could also be drawn to the movement. Specifically named as **supporting organizations** are **Society of the Revival of Islamic Heritage** from **Kuwait**, the **Shaykh Eid Charity Foundation** from **Qatar** and the **Muslim World League** from **Saudi Arabia**. The **BND declined** to **confirm the accuracy** of the reports but **Sebastian Sons** of the **German Council on Foreign Relations** believes they're **credible** telling *Deutsche Welle* "it's well known that for decades Saudi Arabia has been launching missionary initiatives throughout the world, both by using private foundations and by sending clergymen abroad. Saudi Arabia wants to present itself as the leader of the Sunni Islamic world."

7- **L'organisation djihadiste possède ses propres unités de renseignement.** Ce sont elles qui ont planifié les attentats menés en France et Belgique en 2015 et en 2016. Enquête sur un corps d'élite toujours menaçant. L'homme, encagoulé et revêtu d'un uniforme camouflé, parle un français sans accent. Derrière lui, dans un décor de ruines, un prisonnier bâillonné est attaché, les bras en croix. La vidéo, diffusée sur Internet le 26 novembre dernier, est censée avoir été tournée à Raqqa, la capitale « régionale » de l'organisation Etat islamique (Daech) en Syrie. **Le djihadiste, surnommé Abou Souleymane al-Firansi (« le Français »), donne une abjecte leçon de meurtre au couteau. Ce vademecum du terrorisme individuel peut être vu comme une réplique à un événement survenu en France, cinq jours plus tôt.** Le 21 novembre, les policiers de la **Direction générale de la sécurité intérieure (DGSI)** ont démantelé une cellule djihadiste qui prévoyait de commettre des tueries dans Paris et en Ile-de- France, le 1er décembre rapporte *L'Express*.

8- Selon *La Dépêche du Midi,* **trois individus, suspectés de vouloir partir faire le jihad en Syrie ont été interpellés très tôt hier matin dans une cité toulousaine par une unité de la Direction générale de sécurité intérieure (DGSI).** Leur interpellation s'est déroulée dans le cadre d'une commission rogatoire délivrée par un magistrat parisien. On ignorait hier soir ce que les perquisitions réalisées dans la foulée de ces arrestations ont permis de découvrir.

Africa / Afrique

9- Through its conduit the *Amaq News Agency,* **Isis** has **claimed responsibility** for Sunday's **suicide bombing** at **Cairo's** main **Coptic cathedral** which **killed 25 people** and wounded four dozen more. **Isis identified** its bomber as **Abu Abdallah al-Masri** which *Reuters* points out is **not** who the **Egyptian government named** as the **perpetrator**. Its culprit is **Mahmoud Shafik Mohammed Mostafa.**

Middle East / Moyen-Orient

10- *Haaretz* reports that **Israel** is undergoing a revolution in identity security in **biometrics** as other countries such as the United States, Australia, **Canada** and soon Britain have passports that include biometric data based on facial data.
11- A **deal** to **evacuate rebel fighters** and **civilians** from **eastern Aleppo** appears to have **stalled** this morning with **heavy shelling** reported in the Syrian city. The *BBC* reports the **breakdown** of the deal, brokered by Russia and Turkey, is being attributed to **demands** from the **Syrian government.** (Extensive coverage / vaste couverture).
12- The *Times of Israel* reports that the **Islamic State** terrorist group accused Israel of conducting **multiple airstrikes** against it in the northern Sinai Peninsula.
13- *Asharq Al-Awsat* reports that **Yemeni security forces** seized a commercial truck carrying **spy drones** on its way to the Houthi rebels, according to a Yemeni military official.
14- The *Fars News Agency* reports that **Iran's President Hassan Rouhani** ordered scientists on Tuesday to start **developing systems for nuclear-powered boats**, in reaction to what he called the United States' violation of a global atomic deal.

Afghanistan/Pakistan

15- *Pajhwok Afghan News* reports that **leading political and jihadi leaders** gathered in Kabul on Tuesday to discuss a peace resolution suggested by Pugwash, an official said. **Pugwash, a Canada-based organisation**, arranges conferences and seminars to seek solution to conflicts in various parts of the world.
16- The *Pakistan Dawn* reports that **Pakistan Navy's special 'Task Force-88' (TF-88)** was established Tuesday for maritime security of Gwadar port and protection of associated sea lanes against both **conventional and non-traditional threats**.

Australia, New Zealand / Australie, Nouvelle-Zélande

17- The US State Department has defended its role in the **Nauru and Manus Island refugee resettlement** deal with Australian Prime Minister **Malcolm Turnbull** and described its **security vetting procedures as "thorough".** It has also **outlined how it will attempt to facilitate the deal** without taking it through the minefield of the US congress. US Senate Judiciary Committee chairman **Charles Grassley** and House of Representatives Judiciary Committee chairman **Bob Goodlatte** have publicly questioned in recent weeks the **State Department** and **Department of Homeland Security's** decision to **keep the deal classified and not consult with congress.** The State Department hit back, **outlining its stance in a letter**, obtained by the *Australian Associated Press,* to Mr Grassley. "The **USRAP continues to implement thorough security vetting procedures for refugees of all nationalities**, and the **United States will not accept any refugees for resettlement,** under this arrangement or otherwise, unless they **pass all required security vetting.**"

18- The New Zealand government **rejected on Tuesday a proposal for industries to police new money-laundering rules themselves,** and will **instead leave one government department in charge of supervising thousands more businesses**. The **Department of Internal Affairs (DIA)** would scrutinize the new professions covered by the rules, including lawyers, real estate agents, accountants and car dealers, according to a proposal released by the **Ministry of Justice** on Tuesday. The new rules will be introduced next year, reports *Reuters*. The **government has come under pressure to tackle money laundering** since the release in April of the **Panama Papers**, which showed how **offshore companies often use New Zealand trusts as a way to create a secretive un-taxed vehicle in the South Pacific nation**. The Ministry of Justice said **"self-regulating bodies"** had **no experience in tackling money-laundering and the financing of terrorism.**

Asia / Asie

19- *Trend News Agency* reports that more than 500 employees of the **Azerbaijani State Security Service** have been dismissed within one year's time frame, **Madat Guliyev**, lieutenant-general, head of the service, told reporters in Baku.

20- The Chinese foreign ministry said on Monday a **Chinese State Councilor** met a **senior adviser** of US President-elect **Donald Trump** as part of **China's efforts to establish connections with Trump**. State Councilor **Yang Jiechi** met **Michael Flynn**, Trump's choice for **national security adviser**, during a recent stopover in New York on his way to Latin America, **Geng Shuang**, a spokesperson for Chinese foreign ministry, told a daily briefing on Monday. The two sides exchanged views on China-US relations and major issues of common interest, said Geng, without mentioning when exactly they met. This is China's attempt to build connections with Trump's team, and paves the way for the next meeting, **Wu Xinbo**, director of the Center for American Studies at Fudan University told the *Global Times* on Tuesday, who declined to say whether the next meeting will involve other top officials from both sides.

21- The *Times of India* reports that **India** is getting ready to test its **Agni-V intercontinental ballistic missile (ICBM)** in its final operational configuration from Wheeler Island off Odisha after two years.

Americas / Amériques

22- The Rupert Murdoch owned website *Heat Street* reported earlier this week that **senior Russian intelligence officers** from **Cuba visited** the **head** of **Ecuadorean intelligence** in Quito, **days before Edward Snowden pilfered classified NSA files.** This, concluded *Heat Street,* 'strongly suggests' that **both Ecuador** and **Russia 'knew in advance'** of Snowden's intentions.

CSIS in the News/Le SCRS dans les nouvelles

1- The federal government secretly gave **RCMP security officials the authority to tap telephone calls without court oversight during the Cold War,** newly unearthed archival documents show. According to *The Canadian Press*, the surveillance program, codenamed "**Picnic**," began as an emergency effort during the **Korean War**, but **federal agencies collaborated with telephone companies in 1954** to continue the wiretaps, says **Dennis Molinaro**, who teaches history at Ontario's Trent University. Molinaro's research indicates the RCMP security branch was listening in on the embassies of East Bloc countries, "**certain unfriendly organizations**" and individuals suspected of disloyalty. It has **long been known the Mounties kept an eye on a wide array of people and organizations - from church and gay rights groups to Quebec separatists and Communists - in the name of national security**, amassing hundreds of thousands of dossiers. Mountie scandals in the 1970s led to a royal commission, the **demise of the RCMP security service** and **creation in 1984** of the civilian **Canadian Security Intelligence Service**. Molinaro believes the documentation he has uncovered with the help of tenacious staff at **Library and Archives Canada** helps flesh out **how the RCMP surveillance of Canadians took place** and implicates federal politicians and bureaucrats in making it happen.

Canada

2- A British Columbia man has been **arrested on a terrorism peace bond**, officials said Wednesday, marking the 19th time since last year police have used the **legal tool against suspected extremists**. **Khalid Ahmed Ibrahim** was to appear in provincial court in New Westminster, B.C. on Dec. 20. Police told the court on Dec. 8 there were **reasonable grounds Ibrahim "may" commit a terrorism offense.** He has also been charged with **uttering threats**, court staff said. The threatening charge dates to July 19 and was to return to court Dec. 21. No further details about Ibrahim or the allegations were available. Peace bonds are not a criminal charge but rather impose conditions on the conduct of those subjected to them. Frequently suspects cannot travel, use the Internet or associate with other known extremists for one year. Police have been **increasingly using peace bonds in terrorism cases in an attempt to cut suspected extremists off from ISIL and al-Qaida online propaganda** and prevent them from leaving Canada to join terror groups, writes the *National Post*.

3- Selon *Le Point,* **l'espionnage informatique est l'arme fatale du renseignement, et les Français ne sont pas en reste.** Nous sommes en juin 2012. **Edward Snowden est pour une année encore l'un de ces bons petits soldats de l'ombre, tapi dans une base secrète de la NSA** à Hawaii. A Paris, **Nicolas Sarkozy termine son mandat, quand le chef des services informatiques de l'Elysée, un homme de la DGSE, s'inquiète. Les services de renseignement canadiens En 2009, le Centre de la sécurité des télécommunications du Canada (CSEC) découvre une vaste opération de cyberespionnage baptisée Snowglobe et l'utilisation de Babar, un programme malicieux (maliciel). Le CSEC soupçonne les services secrets français.**

International

United States / États-Unis

4- In conversation with *Sputnik,* the **president** of the Washington-based **Global Policy Institute Paolo von Schirach** said an **intelligence sharing fissure** between **Canada** and the **United States** over a **change in policy** under Donald Trump regarding **torture** is potentially a **"very big deal"** and **"probably damage U.S. security"**.

5- *Bloomberg* reports that **more than 150,000 U.S. government** and **military employees** are among the **victims** of **Yahoo's newly disclosed 2013 data breach** which impacted **one billion accounts worldwide.** The government accounts belong to current and former White House staff, U.S. congressmen and their aides, **FBI agents, officials** at the **National Security Agency**, the **Central Intelligence Agency**, the **Office of the Director of National Intelligence**, and each branch of the U.S. military. The list includes an **FBI division chief** and multiple **special agents** working around the U.S.; current and former diplomats in Pakistan, Syria and South Africa; **a network administrator** at **NSA's Fort Meade headquarters**; the **chief** of an **Air Force intelligence group**; and a **human resources manager** for the **CIA.**

6- **Senior U.S. intelligence officials** have disclosed to *NBC News* that the **intelligence community now believes** with **"a high level of confidence"** that **Vladimir Putin** became **personally involved** in a **covert Russian campaign** to **interfere** in **November's presidential election.** Two senior officials with direct access to the information say **new intelligence** shows that **Putin personally directed** how **hacked material from Democrats was leaked and otherwise used.** The **intelligence** came from **diplomatic sources** and **spies working for U.S. allies. Putin's objectives** were **multifaceted,** a high-level intelligence source said. What **began** as a **"vendetta" against Hillary Clinton** morphed into an effort to **show corruption in American politics** and to **"split off key American allies** by creating the image that **[other countries] couldn't depend** on the **U.S.** to be a **credible global leader** anymore". However, the *Town Hall* website reports that **FBI director James Comey phoned** President-elect **Donald Trump** and told him there was **no credible evidence** to suggest **Russian meddling**. Furthermore, Comey is reported to have informed Trump that **DNI James Clapper agreed** with the **FBI's assessment. CIA director John Brennan did not.**

7- According to **Army records** obtained by the *Washington Post* under the Freedom of Information Act, a **secret U.S. military investigation** in **2010** determined that **Michael Flynn**, the retired Army general tapped to serve as **national security adviser** in the Trump White House, **"inappropriately shared" classified information** with **foreign military officers in Afghanistan.** Although Flynn **lacked authorization** to share the classified material, he was **not disciplined** or **reprimanded** after the **investigation** concluded that he **did not act "knowingly"** and that "there was **no actual** or **potential damage** to **national security** as a result". The *Post* reports **former U.S. officials** familiar with the matter said that **Flynn was accused** of **telling allies** about the **activities** of **other agencies** in **Afghanistan,** including the **CIA.**

8- The **Shadow Brokers**—a **hacker** or group of **hackers** that **stole computer exploits** from the **National Security Agency**—has been quiet for some time but, reports *Vice Magazine's* 'Motherboard', a **newly uncovered website**, which includes a **file apparently signed** with the **Shadow Brokers' cryptographic key**, suggests the group is **trying to sell hacking tools directly** to **buyers one by one,** and a cache of files appears to include **more information on specific exploits.**

United Kingdom / Royaume-Uni

9- Speaking at Royal United Services Institute, **Chief of Defence Staff Sir Stuart Peach** warned **Islamic State** militants are **"moving in migrant flows, hiding in plain sight"** reports *Sky News.*

Europe

10- C'est une idée qui tourne dans les milieux politiques de droite et d'extrême droite depuis plusieurs mois et que le candidat François Fillon a faite sienne. La proposition de loi de **François-Noël Buffet invite à élargir « la notion d'intelligence avec une puissance étrangère pour y inclure l'intelligence avec une organisation terroriste** » et propose de créer « un délit d'allégeance à une organisation prônant la commission d'actes portant atteinte à des ressortissants français ou aux intérêts fondamentaux de la nation française » . La première permet de doper le quantum des peines en matière d'infraction terroriste pour le porter à trente ans. Une telle disposition pourrait être plus efficace dans la lutte contre le terrorisme que « l'association de malfaiteur » rapporte *Le Figaro.*

11- The **Russian government** and the **FSB** announced this morning that planned **terror attacks in Moscow, Crimea** and the **Rostov region** have been **foiled** and the alleged perpetrators arrested reports *Tass* and the *Associated Press.*

Africa / Afrique

12- Selon *Le Journal du Mali,* le **chef d'Al-Mourabitoune, Mokhtar Belmokhtar ne serait pas décédé dans la frappe aérienne menée par la France dans le sud-ouest de la Libye.** C'est ce que l'on a appris des aveux d'un infirmier nigérien, qui aurait soigné le chef djihadiste. Selon, les **services de renseignements algériens** qui collaborent avec les services nigériens, Mokhtar Belmokhtar se serait pas mort dans la frappe aérienne menée par la France en novembre dernier.

13- **Egypt hanged prominent Islamist fighter Adel Habara** this morning days after a top court rejected his final appeal and in defiance of **militant threats** to **ignite "a volcano of jihad"** across the country reports *Reuters.* Habara, 40, was **sentenced to death** in 2014 for **killing 25 army conscripts** in Northern Sinai in August 2013.

Middle East / Moyen-Orient

14- *The National (UAE)* reports that a **deal to evacuate fighters and civilians** trapped in east **Aleppo's** last remaining rebel-held pockets was suspended on Wednesday – just hours after the agreement was hatched.

15- *Haaretz* reports that the **Civil Service Commission** has launched an investigation into suspicions that **Mossad head Yossi Cohen** received free tickets to a concert worth thousands of shekels from Australian billionaire James Packer.

Afghanistan/Pakistan

16- The *Pakistan Dawn* reports that **Pakistan** on Wednesday successfully tested an improved version of the **medium-range and subsonic Babur cruise missile** to bolster the country's deterrence capabilities.

Australia, New Zealand / Australie, Nouvelle-Zélande

17- A report by a group **monitoring coalition air strikes in Iraq and Syria** has given Australia **low marks** for **transparency and accountability**. The UK-based **Airwars organisation** says Australia remains one of the **least transparent members** of the international military coalition, **consistently refusing to disclose almost any information about air strikes by RAAF aircraft or acknowledge any incidents that may have produced civilian casualties**. According to the *Australian Associated Press*, Airwars collates data on air strikes from official reporting and on civilian casualties from media and other reports. It said the US-led coalition, comprising aircraft from 13 countries, had conducted about 14,200 strikes in the first two years of the campaign against the Islamic State group. US aircraft conducted the majority of strikes in Syria and Iraq. Airwars ranked **Canada the most transparent of coalition members**, followed by the UK, US and France.

18- Australian warplanes in Iraq and Syria are **increasingly hitting Islamic State's logistics and finance networks as changes to the rules of engagement** and Australia's war crimes **legislation allows the RAAF to expand the list of targets**. *The Australian* understands **RAAF planes** have been working at a higher tempo in the past few months as the coalition pounds Islamic State targets in Mosul ahead of the final assault to retake the Iraqi city. As calls mount for a humanitarian intervention in Aleppo, which has been decimated by a Russia-backed campaign by Syrian government forces to retake the city, coalition planes are helping Iraqi forces on Mosul.

Asia / Asie

19- Canadian officials visited North Korea and met with **Canadian detainee Hyeon Soo Lim**, who was **sentenced to life in prison** last year over what Pyongyang described as **anti-state activities**, the North's state media said Thursday. A Canadian government delegation led by **Sarah Taylor**, director general for **North Asia and Oceania for Global Affairs Canada**, arrived in North Korea on Tuesday for a three-day visit to discuss Lim's case and other issues, Pyongyang's *Korean Central News Agency* said. The agency said the Canadian officials met Lim, but provided no further details. Lim, a **Christian pastor**, was convicted by Pyongyang's Supreme Court for **trying to use religion to destroy the North Korean system** and helping U.S. and South Korean authorities lure and abduct North Korean citizens. North Korea is often accused of using foreign detainees as a way to win concessions from other countries. The country is locked in a standoff with the international community over its expanding nuclear weapons and missiles program. North Korea is also holding at least **two Americans for alleged espionage, subversion and other charges**. Korean-American **Kim Tong Chol** is serving a 10-year prison term with hard labor, while University of Virginia undergraduate **Otto Warmbier** has received 15 years, reports the *Associated Press*.

20- Foreign organisations including **social and environmental advocacy groups fear they could inadvertently break broadly defined new rules that take effect in China next month**, with some even shutting up shop to avoid such pitfalls. Chinese President **Xi Jinping's** administration has made **sweeping changes to Chinese law** in the name of **boosting national security**, including a **controversial cybersecurity law** passed last month and another **targeting foreign non-governmental organisations (NGO)**, slated for Jan. 1. China says the **NGO law**, which **grants broad powers to police to question NGO workers, monitor their finances and regulate their work**, is necessary to regulate an unruly sector and that only those operating illegally have anything to fear. Western governments say the law, which was passed in April, **treats groups as criminals and would severely limit their ability to operate in China.** Foreign NGO employees in China have told *Reuters* that many groups still do not know whether they will be able to register with the authorities in time as key information about the process has not been published.

21- The *Press Trust of India* reports that **India's requests for extradition of 110 fugitives** are at various stages of execution in various countries, government said today. **Canada** is one country with which India has inked the treaty till date.

22- The *Philippine Star* reports that **China** appears to have constructed **point-defense capabilities** at each of its outposts in seven of the Manila-claimed islands on the Spratly (Kalayaan) Islands in the **South China Sea**.
